## 2013 KSPTA Safety Team Roadeo

## Student Management Profiles

**Jordan:** a 10 year old who has been diagnosed with deaf-blindness and is almost completely deaf and blind. Jordan is sensitive to quick movement (both hers and the quick movement of those around her), which makes her nervous and afraid which, in turn, causes her to scream and become aggressive. She is comforted by a small stuffed animal she carries with her everywhere.

**Alex:** a 13 year old who has been diagnosed with a behavior disorder (also known as Emotional Disturbance). She seems angry at the world. Jordan has consistently demonstrated the characteristics of ADHD, but is currently in the process of testing – ADHD has not yet been officially diagnosed. She craves turmoil and will act out to keep things stirred up.

**Drew:** a 5 year old who is diagnosed with Traumatic Brain Injury (TBI). Her condition has left her with a weakness to her left side (arm and leg). She is ambulatory although slow, and requires assistance with her balance. Her brain damage causes her to become very frustrated. Sometimes she kicks or flails her arms or legs when someone comes close to her.

**Pat:** is an 8 year old who has been diagnosed with Obsessive Compulsive Disorder (OCD). She performs ritualistic patterns when climbing the bus steps and taking her seat. She is focused on germ removal and will frequently stand and wipe down the backs of the bus seats. When she is denied any of these rituals she becomes filled with extreme anxiety about being on the bus.

**NOTE: All Students may be male or female**
