

School Bus Inspection Sticker Information

Per Kansas law, every school bus, activity bus and school passenger vehicle owned, contracted or leased to a public or private school and used to transport students shall be inspected between June 1 and September 30 every year. After passing the inspection process, the vehicle SHALL display the current KHP School Bus Inspection Sticker on the lower left corner of the windshield.

The inspection sticker colors are rotated every year through 4 possible colors. Blue, Red, Green and Orange. The color of the inspection sticker for a school year is determined by the Kansas Highway Patrol.

Inspection stickers are numbered, and the number is documented on the KHP inspection form. **The stickers are required by Kansas law and KHP policy to be placed in the lower left corner of the windshield.**

The current inspection sticker is valid until September 30th unless the Kansas Highway Patrol fails the vehicle in the inspection process. If the Kansas Highway Patrol fails the vehicle any inspection sticker becomes null and void and the vehicle CANNOT be used to transport students until the vehicle passes a KHP reinspection and is issued a new sticker.
