Indicator 13: Secondary Transition Webinar
Q and A

Q: What is the difference between the two data collection windows?

A: For the **SY 2011-2012** Indicator 13 data collection (July 1, 2011 through June 30, 2012), districts that were identified with noncompliance must complete several steps to correct the noncompliance. The steps to correct noncompliance include submission of a District Corrective Action Plan (DCAP), Individual Corrective Action form (ICA) and updated data via the www.sppkansas.org website. Districts were notified of noncompliance on July 30,2012 and will be receiving a memo regarding submission of updated data. **The updated Indicator 13 data collection window dates do not apply if a district was not notified of noncompliance**. For districts notified of noncompliance the following updated data timelines apply.

For districts notified of noncompliance for the SY 2011-12 data collection period, districts must review the same number of student files that were required during the initial data collection (10,15,20). Districts will select student files using a random sample of files with IEPs dated November 30, 2012 through February 20, 2013.If there is not the required number of student files during this time period, the district must review all the student files available. If there are more student files than required, the district must review files until the required number is reached. If no files are available, then the district will indicate the file review is complete in the sppkansas website. The root cause analysis contained in the previously submitted District Corrective Action Plan (DCAP) serves as the district's assurance that the district is correctly implementing the regulatory requirement. Access to the sppkansas.org website for updated data entry is January 3, 2013 through March 1, 2013.

For the **SY 2012-13** Indicator 13 data collection, all districts will submit data for a random sample of students aged 16 and above with IEPs dated from July 1, 2012 through June 30, 2013. Access to the sppkansas.org website for initial data entry is April 15,2013 through June 30, 2013. Districts will review the required number of files based on the size of the district (10, 15, and 20). If there are more student files than required, the district must review files until the required number is reached. If no files are available, then the district will indicate the file review is complete in the sppkansas website.

Q: **Should the employment goal state after high school or after completing their training/education?**

A: All measurable postsecondary goals occur after high school.
