Appendix

The Licensed Personnel Guide is designed to assist employers and school district staff in answering questions regarding appropriate licensure for specific staff assignments. If you have questions regarding the type of endorsement required for a particular teaching assignment not listed in this publication, please keep the following in mind:

1. PreK – 12 educators working in schools should be licensed at the level and endorsed in the content area appropriate for the assignment.
2. Teachers providing direct instruction should have a content assignment and be licensed accordingly.
3. Charter and virtual school personnel should be licensed at the level and endorsed in the content area appropriate for the assignment. All charter and virtual schools have building numbers and personnel assigned to these buildings should be accurately reported.
4. Persons with secondary content endorsements at the 7-12 level or middle school content endorsements at the 5-8 level will be allowed to teach that content subject only to grade 6 in a middle school. Teachers with secondary or middle school (5-8) content endorsements cannot teach in an elementary setting. Middle School (5-8) is appropriate for elementary 5-6 levels.
5. The verified mentoring experience is a requirement of the State to upgrade to the professional level of licensure and must be completed during the two-year validity of an initial license. The educator must be employed in an area of endorsement on his/her license and the mentoring experience must be completed in that area of endorsement. The mentoring experience cannot be completed in alternate settings or assignments that only require a “licensed at level” educator.
6. Please make sure the data entered in this report is accurate. This data determines mentor payment requests as well as other State and Federal reporting requirements.
7. The courses available on your Licensed Personnel Report are linked to the mapping your district completed through the Kansas Course Code Management System. If you have not completed the Kansas Course Code mapping, you will need to do so prior to completing your Licensed Personnel Report.

If you have licensure questions, please contact an education program consultant on the Teacher Licensure team by emailing tlicensure@ksde.org or calling (785) 296-2288.

Notes and Miscellaneous Information:

1. For each assignment, enter the corresponding number of classes. In general, an elementary self-contained assignment will be entered as one class. In middle schools and high schools, teachers should have multiple classes. Specialist or administrator assignments should be counted as one class.
2. Please refer to the CIP funding code for Career and Technical Education assignments. Questions about approved funding codes should be directed to Career and Technical Education at KSDE (785) 296-4351.
3. Second assignments relating to content are required for all Special Education and English for Speakers of Other Languages teachers.
4. Service Centers, Cooperatives, and Interlocals are expected to complete the Licensed Personnel Report. If a teacher works in multiple buildings, an assignment and class count will need to be entered for each. The shared staff function should be used to report staff in multiple LEAs.

Restricted Teaching License Alternative Pathway

The Alternate Route to Licensure in Kansas

The Restricted Teaching License Alternative Pathway is designed to recruit mid-career professionals who have a bachelor's or master's degree in a content area they want to teach and who are seeking a career change.

If offered employment by a Kansas school district, an individual with a content area degree may receive a restricted teaching license. This license allows a district to hire an individual who has not completed a traditional teacher education program. The individual is given access to practice (restricted teaching license) while he/she completes the teacher education (pedagogy) coursework with a Kansas college/university. The process is a collaborative effort among the applicant, school district, and participating institution of higher education. Information on the restricted teaching license alternative pathway is available on our website at <http://www.ksde.org/> in the Teacher Licensure section.

Out-of-State Applicants

Teaching in Kansas requires a Kansas license issued through the Kansas State Board of Education. You cannot teach in Kansas based on an out-of-state license or certificate. A Kansas license must be obtained before teaching in Kansas. If all requirements for Kansas licensure have not been met, it may be possible for an individual to obtain a Temporary One Year Non-Renewable License, Interim Alternative, or a Transitional License during which time they can complete any unmet Kansas requirements. Kansas licensure is based on completion of approved teacher education programs. An application packet may be requested or downloaded at <http://www.ksde.org/> in the Teacher Licensure section.

Use of Substitute Teachers:

Accreditation Regulation 91-31-34. Board of Education Requirements:

(a) General. Each local board of education shall assure that each school meets the requirements of this regulation.

(b) **Staff.**

(1) In filling positions for which a certificate/license is issued by the state board, each school shall employ persons who hold certificates/licenses with specific endorsements for the positions held.

(2) If a teacher holding an appropriate certificate/license is not available, a school district shall use a substitute teacher holding a valid Kansas teacher or administrator certificate/license at any level or in any field or subject. A school district shall not allow any person holding a Kansas teaching certificate/license to substitute teach for more than 125 days in the same assignment.

(3) If a substitute teacher holding a valid Kansas teacher or administrator certificate/license is not available, a school district shall use a substitute teacher holding a valid Kansas substitute teaching certificate/license. A school district shall not allow a person holding a substitute teaching certificate/license to teach for more than 90 days in the same assignment.

(4) If a substitute teacher holding a valid Kansas substitute teaching certificate/license is not available, a school district shall use a person who holds a baccalaureate degree and an emergency substitute teacher license. A school district shall not allow a person who holds a baccalaureate degree and an emergency substitute teacher license to teach for more than 45 days in the same assignment.

(5) (A) If a person holding a baccalaureate degree and an emergency substitute teaching license is not available, a school district shall use a person who has been licensed by the state board as an emergency substitute teacher. A school district shall not allow any person who does not hold a baccalaureate degree to teach for more than 25 days in the same assignment or more than 75 days in a semester.

(B) If a local school board can demonstrate, in writing, an insufficient supply of substitute teachers, the board may appeal to the commissioner of education for authority to allow individuals holding an emergency substitute teaching license based on completion of 60 semester credit hours to continue to teach for an additional length of time not exceeding a total of 93 days in a school year.

(6) If the state board of education has declared a time of emergency, any person holding a five-year substitute teaching certificate/license or an emergency substitute teaching license with a baccalaureate degree may teach for the duration of the time of emergency in a position made vacant by reason of the emergency.

(7) Each school shall report the names of each certified/licensed staff member on the licensed personnel report or the supplemental licensed personnel report required by the state board. Each certified/licensed personnel staff change that occurs between September 15 and the end of the school year shall be reported on a form prescribed by the state board within 30 days after the staff change.

Note: S.B.R.91-1-203(e) allows an emergency substitute license to be issued to any applicant who has completed at least **60** semester hours of college credit from a

Licensure Review Committee

The Licensure Review Committee is authorized by S.B.R. 91-1-211 to consider appeals from applicants who do not meet regulation requirements, but who do meet certain *criteria for forwarding an appeal for consideration*. The Commissioner of Education refers appeals to the review committee for consideration. Submission of the appropriate documentation is a requirement for referral by the Commissioner to the Licensure Review Committee. Application does not guarantee that the case will be referred to the review committee.

If the case is referred to the Licensure Review Committee, the application, supporting evidence and documentation will be considered. The applicant is not present during this initial review. The Licensure Review Committee will make a recommendation for approval or denial of the request based on this paper review of the appeal. Applicants will receive written notification of the Committee's recommendation. If the Committee recommends denial of the appeal, the applicant will be given the opportunity to be present at the next available hearing to further appeal their case. Recommendations of the Review Committee are forwarded to the State Board of Education for their final action on the appeal. State Board action will take place at the first available State Board meeting. The applicant will be notified in writing of the decision of the State Board of Education and a license will be issued if appropriate.

The Licensure Review Committee meetings for the school year will be held:

August, October, December, February, April, and June

Applications will be processed for consideration at the first available meeting date. Deadline for submitting materials is four weeks prior to the scheduled meeting date.

Specific questions about the Licensure Review Committee should be directed to Nikk Nelson at nnelson@ksde.org.

Criteria for forwarding appeals for consideration to the Licensure Review Committee:

1. Applicant has achieved full standard certification/licensure in another state through an alternative route to certification/licensure - i.e. through a means other than the traditional university delivered system.

OR

2. Applicant has appropriate equivalent experiences to be considered as a substitute for experiences as defined by regulation

OR

3. Applicant is certified/licensed in another state, has accredited experience in the licensure area, but does not qualify for Kansas licensure because Kansas regulation requires that the applicant hold a valid Kansas professional teaching license. (library media, school counselor, reading specialist)

OR

4. Applicant is completing an approved program out-of-state and is seeking a conditional license, but does not meet Kansas regulation requirements for the license because their program is established differently than Kansas approved programs. (School psychology programs where the degree is not granted until after the internship is completed).

OR

Provisional Endorsements

Two-year provisional endorsements are available in certain content areas for individuals who already hold or are eligible for a Kansas license in another content area. This type of license is authorized by SBR 91-1-203j. The applicant must be employed to teach the content area before a provisional endorsement can be issued or renewed. To determine if a teacher is eligible for a provisional endorsement, the teacher must contact the Licensure Officer of a teacher education institution with an approved program in a subject area allowing a provisional endorsement. Refer to the *Kansas Directory of Approved Professional Educational Programs* to determine the colleges that offer the desired program. This guide is available on the KSDE website at <http://www.ksde.org/> under the Teacher Licensure section. The chart in this manual also lists areas in which provisional endorsements are available.

To qualify for the first two-year provisional teaching license the applicant must:

1. Hold a valid conditional or professional license at the appropriate grade level. Some exceptions may be allowed for all level endorsements.
2. Verify completion of 50%* of the approved teacher education program in the requested endorsement area;

Licensure Waivers

S.B.R. 91-31-34 allows a school accredited through the Quality Performance Accreditation System to request a licensure waiver to assign an individual to teach in a subject or at a grade level not authorized by the educator's Kansas teaching license. The intent of a licensure waiver is to allow a school district to utilize the expertise of teaching staff to meet the educational needs of students. Waivers may be granted for one academic year and are subject to approval by the State Board of Education. If an individual has a deficiency plan to achieve licensure in the field in which the waiver is requested and is making the required progress on that plan, one-year renewals of the waiver may be requested by the school district for two succeeding school years. The following criteria are used to evaluate requests for a licensure waiver.

Form 16 - QPA Regulation Waiver is now an online process. To start the online application process, go to <https://online.ksde.org/authentication/login.aspx>. Waiver applications will be accepted between August 1 and February 1 each year. Applications received after February 1 will be returned.

WAIVER CRITERIA Appropriate Licensure of Staff

1. The teacher must have one of the following valid Kansas Teaching Certificates or Licenses on file with the Kansas Department of Education:

Initial License, Professional License, or Transitional License

Considered on individual basis: Temporary Non-Renewable License or Interim Alternative License

2. Substitute or Restricted licenses will not qualify for a waiver.

3. The teacher must not be eligible for a provisional endorsement in the waiver area.

4. The teacher must not be eligible for review by the Licensure Review Committee for the requested endorsement area.

5. A waiver request is required if any portion of an assignment is outside the area of endorsement.

6. If granted, the waiver is effective for the academic year in which issued. Waivers are not effective until a valid certificate or license is in force as listed in #1 above.

7. Waiver applications must be received in the office of Teacher Licensure, Kansas State Department of Education by November 1.

If a district hires or reassigns a person requiring a waiver after the start of the school year, and the individual cannot meet the current enrollment requirement until the second semester, the completed waiver request must be submitted by **February 1** of the current academic year.

8. The applying district must submit a complete waiver application electronically before the waiver application will be reviewed.
