At the start of each new school year, you will be starting with all of the records from the previous year. During the Begin Year Setup process, you will need to set the dates and delete any assignments that are no longer needed. The first person to log on for your district will be doing the setup, so please be prepared for this.. If you have summer assignments, they are presented first, then Regular assignments.

The next screen returned should have the Process button enabled. Click PROCESS to continue setting the dates.

If you had Summer Assignments in the previous fiscal year, you will need to perform these steps for Summer Term, then repeat for Regular Term.

Regular Term: Any assignments ending prior to May 1st the previous Fiscal Year will be already automatically deleted.

Once you Process the Regular Term Setup page you will be directed to the Main page. All the users in your district that work with the Personnel Web System will be set to regular mode so when logging in everyone will go directly to the Main page and the setup will not be run again until the next Fiscal Year.

Note that for both summer and regular term setup there is a "Log Off" button. If you click this it will not save any changes made on the current page and you will be forced to run through setup again upon your next log in. However if you log off in regular term the summer assignments deleted are already permanently deleted. You can still delete additional assignments if there are any. You can also make changes to the dates on the existing buildings the next time through the new year setup.

DELETING AN ASSIGNMENT – you can check the box next to the assignment, or choose "Check All" or "Clear All". When you click on "PROCESS", it will delete those checked records.
