

UNITED STATES DEPARTMENT OF EDUCATION  
OFFICE OF SPECIAL EDUCATION AND REHABILITATIVE SERVICES

JUN - 1 2009

Honorable Alexa Posny  
Commissioner  
Kansas State Department of Education  
120 S.E. 10<sup>th</sup> Avenue  
Topeka, Kansas 66612-1182

Dear Commissioner Posny:

Thank you for the timely submission of Kansas' Federal fiscal year (FFY) 2007 Annual Performance Report (APR) and revised State Performance Plan (SPP) under Part B of the Individuals with Disabilities Education Act (IDEA). We appreciate the State's efforts in preparing these documents.

The Department has determined that, under IDEA section 616(d), Kansas meets the requirements of Part B of IDEA. The Department's determination is based on the totality of the State's data and information including the State's FFY 2007 APR and revised SPP, and other State-reported data, and other publicly available information. See the enclosure entitled "How the Department Made Determinations under Section 616(d) of the IDEA in 2009" for further details.

Specific factors affecting the Office of Special Education Programs' (OSEP's) determination that Kansas meets requirements under IDEA section 616(d) include: (1) The State provided valid and reliable FFY 2007 data reflecting the measurement for each indicator; and (2) The State reported correction of its FFY 2006 findings of noncompliance or high levels of compliance for Indicators 9, 10, 11, 12, 13, 15, 16, 17, and 20. We commend Kansas for its performance.

The enclosed table provides OSEP's analysis of the State's FFY 2007 APR and revised SPP and identifies, by indicator, OSEP's review of any revisions made by the State to its targets, improvement activities (timelines and resources) and baseline data in the State's SPP. The table also identifies, by indicator, the State's status in meeting its targets, whether the State's data reflect progress or slippage, and whether the State corrected noncompliance and provided valid and reliable data.

As you know, your State must report annually to the public on the performance of each local educational agency (LEA) located in the State on the targets in the SPP as soon as practicable, but no later than June 2, 2009, pursuant to IDEA section 616(b)(2)(C)(ii)(I) and 34 CFR §300.602(b)(1)(i)(A). In addition, your State must review LEA performance against targets in the State's SPP, determine if each LEA 'meets requirements,' 'needs assistance,' 'needs intervention,' or 'needs substantial intervention' in implementing Part B of the IDEA, and inform each LEA of its determination. For further information regarding these requirements, see the SPP/APR Calendar at: <http://spp-apr-calendar.rrfcnetwork.org/explorer/view/id/656>. Finally, as you included revisions to baseline, targets or improvement activities in your APR submission, and OSEP accepted those revisions, please ensure that you update your SPP accordingly and that the updated SPP is made available to the public.

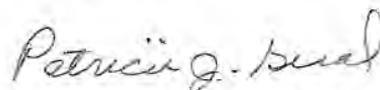

In its October 17, 2008 Memorandum 09-02, "Reporting on Correction of Noncompliance in the Annual Performance Report Required under Sections 616 and 642 of the IDEA," OSEP provided Chief State School Officers and Lead Agency Directors with important information regarding: (1) requirements for identifying noncompliance and reporting on the correction of noncompliance in States' APRs; and (2) how OSEP will, beginning with the FFY 2008 APR, due February 1, 2010, consider the correction of noncompliance in making annual determinations for States pursuant to section 616(d) of the IDEA. Most significantly, beginning with our 2010 determinations:

1. OSEP will no longer consider a State to be in substantial compliance relative to a compliance indicator based on evidence of correction of the previous year's noncompliance if the State's current year data for that indicator reflect a very low level of compliance (generally 75% or below); and
2. OSEP will credit a State with correction of noncompliance relative to a child-specific compliance indicator only if the State confirms that it has addressed each instance of noncompliance identified in the data for an indicator that was reported in the previous year's APR, as well as any noncompliance identified by the Department more than one year previously. The State must specifically report, for each compliance indicator, whether it has corrected all of the noncompliance identified in its data for that indicator in the prior year's APR as well as that identified by the Department more than one year previously.

It is important for States to review the guidance in the memorandum, and to raise any questions with their OSEP State Contact. The memorandum may be found at: <http://spp-apr-calendar.rrfcnetwork.org/explorer/view/id/656>.

OSEP is committed to supporting Kansas' efforts to improve results for children and youth with disabilities and looks forward to working with your State over the next year. If you have any questions, would like to discuss this further, or want to request technical assistance, please contact Ellen Safranek, your OSEP State Contact, at 202-245-7515.

Sincerely,

Patricia J. Guard

Office of Special Education Programs

## **How the Department Made Determinations under Section 616(d) of the Individuals with Disabilities Education Act in 2009: Part B**

In making our determination for each State under section 616(d) of the Individuals with Disabilities Education Act (IDEA), we considered the State's FFY 2007 Annual Performance Report (APR)/State Performance Plan (SPP) submission, information from monitoring visits, including verification reviews, and other public information, such as the State's performance under any existing special conditions on its FFY 2008 grant or a compliance agreement, longstanding unresolved audit findings, and other State compliance data under the IDEA.

### FFY 2007 APR/SPP Submissions

In reviewing the States' FFY 2007 APR/SPP submissions, we considered both the submission of valid and reliable data and the level of compliance or correction.

With respect to data, for Indicators 1 through 19, we examined whether the State provided valid and reliable FFY 2007 data (e.g., the State provided all the required data, the data were for the correct year and were consistent with the required measurement and/or the approved SPP, and the State did not indicate that its data were not valid and reliable). For the results indicators (Indicators 1, 2, 3, 4A, 5, 7, 8, 14, 18 and 19), if the State did not provide valid and reliable data, we considered whether the State provided a plan to collect the missing or deficient data for reporting in next year's APR/SPP submission. For Indicators 9, 10, 11, 12, 13, 15, 16, and 17, we also examined whether the State provided any FFY 2007 data, even if the data were not valid and reliable.

With respect to compliance, we examined Indicators 9, 10, 11, 12, 13, 15, 16, 17, and 20. With respect to these indicators, we looked for evidence that the State demonstrated substantial compliance either through reporting a very high level of compliance (generally 95% or better) or full correction of its FFY 2006 findings of noncompliance for Indicators 9, 10, 11, 12, and 13. If the State did not demonstrate either a very high level of compliance or full correction, we examined whether it nonetheless had maintained current levels, or made progress in ensuring compliance over its performance for that indicator as reported in its FFY 2006 SPP/APR submission. We considered "progress" to include reporting higher compliance numbers or reporting more accurate and complete compliance data compared to the data provided in the prior year's submission. Indicator 15 evaluates "timely" correction, so for this indicator we specifically examined whether the correction was timely. For the other compliance indicators, we considered both whether the State timely corrected its FFY 2006 findings of noncompliance and whether the State subsequently corrected findings of noncompliance. We did not consider Indicators 16 and 17 if the State reported less than 100% compliance, but fewer than 10 complaints or 10 fully adjudicated hearings, in recognition of the inequities in basing decisions on small numbers.

Generally, and absent any other issues (see below), we considered a State to "meet requirements" if it provided valid and reliable FFY 2007 data consistent with, or substantially the same as, the measurement for each indicator and/or the approved SPP, and demonstrated substantial compliance for Indicators 9, 10, 11, 12, 13, 15, 16, 17, and 20. We determined that a State demonstrated substantial compliance if it provided data showing a very high level of compliance (generally 95% or better) or that it had fully corrected previously identified noncompliance. (Beginning with the Department's determinations in 2010, we will require States to demonstrate correction of previously identified noncompliance consistent with OSEP's Memorandum, 09-02, dated October 17, 2008, and will not consider a State to be in substantial compliance based on correction if its reported FFY 2007 data are low (generally 75% or lower).) If a State did not meet these standards for only one

indicator, we considered the State to “meet requirements” if the compliance level for this indicator was high (generally 90% or better) or, for a data issue for a results indicator, if the State provided a plan to collect the data for next year. In no case, however, did we place a State in “meets requirements” if it failed to provide valid and reliable FFY 2007 data for compliance Indicators 9, 10, 11, 12, 13, 15, 16 or 17. We also considered whether the State, when it reported under Indicator 4A: (1) made clear that, if it identified any districts as having significant discrepancies in the discipline of children with disabilities, it reviewed and, if appropriate revised (or required the LEA to revise) its policies, procedures and practices related to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, as required by 34 CFR §300.170(b); and (2) if the State identified any noncompliance in policies, procedures or practices in these areas as a result of this review, corrected the noncompliance.

Generally, and absent any other issues (see below), we considered a State to be “in need of intervention” if it demonstrated very low performance for Indicators 9, 10, 11, 12, 13, 15, 16 or 17 (generally 50% or below, or in the case of Indicators 9 and 10, 50% or above, and such performance did not represent progress (as defined above) over the prior year’s compliance data), and did not demonstrate full correction of its FFY 2006 findings of noncompliance. We also identified a State “in need of intervention” if it did not provide any FFY 2007 data on Indicators 9, 10, 11, 12, 13, 15, 16 or 17 or if the data for these indicators were not valid and reliable (as defined above). We also identified a State “in need of intervention” if it did not provide valid and reliable FFY 2007 data on one of the results indicators and did not provide a plan to collect and report that data.

We would identify a State as “in need of substantial intervention” if its substantial failure to comply significantly affected the core requirements of the program, such as the delivery of services to children with disabilities or the State’s exercise of general supervision, or if the State informed the Department that it was unwilling to comply with an IDEA requirement. In making this determination, we would consider the impact of any longstanding unresolved issues on the State’s current implementation of the program. We would also consider identifying a State “in need of substantial intervention” for failing to submit its APR/SPP.

We determined that States that did not “meet requirements” and were not “in need of intervention” or “in need of substantial intervention” were “in need of assistance,” absent any other issues (see below).

#### Monitoring Data and Other Public Information

We also considered other public information available to the Department, including information from OSEP monitoring activities, performance under pre-existing special conditions, and longstanding audit findings. We did not consider a State to “meet requirements” if the State had unresolved special conditions that were imposed as a result of the State being designated as a “high risk” grantee, outstanding OSEP monitoring findings, including verification visit findings, or longstanding audit issues or a compliance agreement. We considered the length of time the problem had existed, the magnitude of the problem, and the State’s response to the problem, including progress the State had made to correct the problem, in determining whether the State should be identified as “in need of assistance,” “in need of intervention,” or “in need of substantial intervention.” Finally, for States with a current Compliance Agreement covering the requirements of one or more indicators, we did not consider the State to be “in need of intervention” based on those same indicators if the Compliance Agreement provided for the State to demonstrate compliance beyond the reporting period.
