

SPECIAL CIRCUMSTANCE CODES FOR KANSAS DISTRICTS

This resource is available at <u>http://secure.dynamiclearningmaps.org/content/shared-resources</u>.

This resource includes procedures that apply to only Kansas.

- Special Circumstance Codes are specific to each window the fall and spring windows.
- Only the State Assessment Administrator (SAA), the District Test Coordinator, and the Building Test Coordinator roles have permission to enter Special Circumstances Codes.

Reasons for Not Testing English Language Arts and Mathematics

Results for ELA and mathematics during the fall window are used in conjunction with results for those subjects from the spring window for federal and state accountability.

If a student cannot participate in a testlet that generates a performance level used for federal and state accountability, a special circumstance code can be entered in Educator Portal to provide the reason the student was not tested. The state education agency (SEA) selects a list of codes for Kansas to use. That list is included at the end of this document.

Entering Special Circumstances Codes for ELA and Mathematics in the Fall and Spring Window

- Special Circumstance Codes are specific to the testing window.
 - A code that is added for ELA or mathematics during the fall window for a student applies only to testing in the fall window. If a special circumstance code is needed for the same student in the spring window, it must be also added during the spring window.
- Special Circumstance Codes must be entered for each subject.
- The codes must be entered before the closing of each testing window.
- The codes for ELA and mathematics during both windows are assigned in the Instruction and Assessment Planner.
- Applying a Special Circumstance Code does not prohibit further testing.

NOTE: Testing science in the fall window is optional. Only results for science tested in the spring window are used for federal and state accountability. Directions for entering a Special Circumstance Code for science during the spring window are described later in this document.

Before an authorized user can add Special Circumstance Code to the Instruction and Assessment Planner, the student must be assigned a testlet in each subject to which they are rostered. The testlet must remain in the assigned status with the testlet **not yet administered**. After the testlet is assigned, follow these steps: 1. Go into Manage Tests.

7. Select the applicable Special Circumstance Code and select Save.

After selecting the **Save** button, the Special Circumstances column updates to indicate the Special Circumstance Code has saved. The column for this student will then be disabled.

NOTE: If a Special Circumstances Code was selected, but is not needed, an authorized user should follow steps 1-7 and choose the default "select" as the Special Circumstances Code. If a code is needed, but the wrong one was entered, follow steps 1-7, and choose a different code. Remember to change the code for all subjects for the student. The code can be changed by any higher-level user or the Service Desk.

8. Once a code is selected and saved, the user will see the status, "pending further approval." The state education agency is notified and periodically approves or disapproves selected codes. The user will be able to check back later to see if the applied code has been

approved.

REMINDER: Applying a Special Circumstance Code for a student does not prevent continued testing for the student.

END-OF-YEAR REPORTS AND EXTRACTS

The student will receive an end-of-year Individual Student Score Report even if a Special Student Code is added to an ELA or mathematics Essential Element during either window or the science test session name during the spring window. The state may choose to invalidate the student's record in the General Research File (GRF) during the state's two-week review window.

Also, the state will receive a Special Circumstance Code file at the end of the year with the list of students who had a special circumstance code added during either testing window. Review the Special Circumstance Code file, along with the Exited Students file, when reviewing the GRF and make decisions about invalidations. All three of these files become available in Educator Portal at the same time, based on the date that Kansas state department selected for the assessment window close date, (i.e., the batch the state's closing date falls in: Batch 1 or 2).
