Tiered Technical Courses

What are Tiered Technical/Excel in CTE Courses?

- ✚ Post-secondary credits first funded when Senate Bill 155, or the Governor's CTE bill, was passed into law on July 1, 2012.
- ✚ Provides free tuition or tuition reimbursement for high school students taking designated CTE courses from post-secondary institutions while in high school. ✚ The goal of this bill is to create a Kansas workforce that is highly skilled and ready for employment.
- ✚ Students may be financially responsible for fees outside of tuition including technology fees, tools, and textbooks.

What are the benefits of students completing Tiered Technical / Excel in CTE courses?

- ✚ Of the students earning nine or more college credit hours while in high school, 88% continued in post-secondary education after high school. (Community College Research Center, 2017).
- ✚ Students who earn nine or more college credit hours can be considered a pathway completer if they have taken the correct sequence of courses for a pathway.
- ✚ Students who earn nine or more college credit hours will meet the requirement for post-secondary assets for graduation (starting with the Class of 2028). ✚ Schools often are not able to offer courses in each pathway. This allows students to pursue their pathway of interest, while earning college credit.

Community College Tiered Technical Courses

Allen Community College
