7/21/2020 8:18:51	Kelli	Lauritsen		Blue Valley school district	Our kids need to be in school. I don't agree with the delay as I don't think three weeks will change anything. Everyone has a choice to either to virtual or in person, so allow those that want to be in person to start school. What I am afraid of is the governor continuously delaying the start and thereby negatively impacting the education of our kids - especially those in Kindergarten-3rd grade where reading and math is important for their future development. Keeping our kids out of school is not fair to our kids or our community.
7/21/2020 8:18:57	Tom	Johnson		Derby	I am not in favor of a delay. Our kids have been out of school for too long. In many cases they are at least 6 months behind academically. There is a social cost as well. The science clearly informs us that the 18 and under age group is the least vulnerable. They are no more in danger with COVID then with the flu. We have never shut down schools because of the flu. Most of the parents of these children are not in the high risk category either. There should be an option available for those parents that want to send their kids back to the classroom. For those parents who wish to do all of the learning on line there should be option for that as well. (or possibly a hybrid program) The state school board needs to show some courageous leadership and push back against Governor Kelly's mandate.
7/21/2020 8:18:58	Sonja	Stice		Stockton, KS	Keep class size under 10. Masks. Hand sanitizer and disinfect tables, etc. 1/2 online
7/21/2020 8:19:02	Kalyn	Waller	Usd 259	Wichita	As a teacher I think it is imperative that we delay the start of school until cases are low enough that it is safe for everyone to attend. Please support the governor's mandate in this matter.
7/21/2020 8:19:06	Hana	Dreiling		Lawrence	Schools need a delay to the start of the year to prepare for hybrid/remote instruction and operational strategies.
7/21/2020 8:19:16	Penny	McAnulty	Substitute teacher	Newton	Please vote to pass the governor's executive order to delay the opening of school until after Labor Day.!
7/21/2020 8:19:19	Darrell	Harris		Wichita	No school until this is under control
7/21/2020 8:19:21	Brandy	Goetz		Cimarron	Please allow our schools to open on time this August. I truly believe we can do this safely, and most importantly, we will be looking out for our children's mental health. Also, in SW Kansas most parents are back to work which is leaving children home alone, sometimes without meals. We need to get back to school.

7/21/2020 8:19:22	Amanda	Mendoza	Parent and teacher in KS school	Emporia	We need to support Gov Kelly's executive order to delay the start of school so that schools have time to procure the needed essentials for cleaning, temperature checks, and configuring social distancing as recommended by the KSDE guidelines. Kansas COVID cases have increased in the last week alone, which is also worrisome. As a relative of a "recovered" COVID-19 patient, I know that this virus has long-term effects. Why would you choose to put Kansas children, teachers, and staff at risk when we don't even know the full spectrum of long-term effects of this novel virus? Why would I or should I, as a teacher and parent, choose to remain a teacher when I am being forced to be a sacrificial lamb? We don't know who will die when they catch this virus. One child, one teacher, one custodian, one bus driver; even one is too many to die when you can do what's right to prevent it. If you truly care about our children and all of the people who keep Kansas schools running, you will support the executive order to delay the start of school.
7/21/2020 8:19:30	gina	lawson		Olathe	Hello! I am very concerned on my 9 year old son returning to school. For many reasons. We do not know the long term affects of the virus. How will we prepare our kids if the teacher, principal, best friends mom or even there mom gets covid 19. These situations stay with our kids for life espicaly if one of these cases becomes deadly. We need to think about the safety of our teachers, staff and our children. This is a very uncertain time right now. We do not know facts still. Please do not open our schools up. Thank you!
7/21/2020 8:19:33	Rodney	Peterson	Self	Salina	I am in favor of opening schools immediately. The financial burden of extra daycare is too much. The socialization the kiddos are missing out on is too much. Grades k-5 online learning does not work. Last year was a night mare. Daycare providers had no clue.
7/21/2020 8:19:37	Susan	Allen	Myself	Olathe	I feel that the order is correct for delaying the start of in person. I think we should start online and then re-evaluate in person.
7/21/2020 8:19:39	Amy	Garza		Bel Aire	Give schools time to get things organized. Give them grace and patience to get things in order to keep everyone safe. This isn't a matter of schools opening or not, it's a matter of safety, listening to the numbers, and taking precautions even in areas not highly affected. The sooner we rush into school, the sooner remote learning will need to be implemented. Schools will open, they won't remain closed so that matter isn't even something to think about. Teachers make magic out of little, give them time and support to implement changes so they can do as much as possible given the circumstances for our children.
7/21/2020 8:19:40	Ron	Wilson	USD 489 Hays	Hays	Please Support the Governor's order! The forest is on fire and we still need time to get the fire under control before we send kids and staff back into the forest! It is that simple! Do not make this a political game, please!
7/21/2020 8:19:47	Amanda	Foskuhl		montezuma	Starting late doesn't affect us to much, our starting date is Aug 26th. My concern is mandating masks, we have done practice, our swimming pool has opened, our kids have been around their friends, we had prom, graduation! How do you have all this and then mandate masks? There are schools having summer ball programs and have not heard of a major break out! If we can do all this and still be healthy, then why mandate masks! Our school is pretty clean, our teachers have hand sanitizer on their desks, the kids wash their hands after recess And before lunch. We are a small town of maybe 1500 and have a total of 400 give or take kids in our school, I know if we don't have some normalcy there will be several kids home schooled and that will hurt us! It should be up to the district on what they think is best for them. If parents want to send their kid to school in mask then great and if we don't want to then that should be fine also. If teachers feel they need to wear them, then go ahead! I have worn a mask a couple times and I struggled for the short time, I don't think our kids will do well having to wear them all day! Get our kids back in school, they need this and parents need this so they can go to work!!
7/21/2020 8:20:13	Stephanie	Young	Young's Auto Sales	Little River, KS	I am a parent to a child entering high school. He is totally devoted to and passionate about sports. They help him physically, emotionally, socially and intellectually. I. Completely disagree with taking that away from him. In person school is critical to our kids' development. They will be harmed in many ways the longer they are out. It affects their social development, physical and mental health, and learning. Please get them back ASAP
7/21/2020 8:20:18	Tina	Smalley	BV	Overland Park	Open up our schools! Please..
7/21/2020 8:20:24	Constance	Buller	Grandparent	Piqua	Please uphold the governor's plan and delay the start of school for 2020-2021.

7/21/2020 8:20:29	Kelly	Gofus		Olathe	Given the rise in positive cases, it only makes sense to delay opening school buildings until we can do so more safely. Please consider the health and well-being of school staff in this decision. We know the virus affects adults worse than children. Teachers and school staff are not disposable. They are essential. There are also a lot of unknowns of COVID when it comes to children. I don't want my children or any children to be an experiment. We can overcome COVID but not without strong leadership sharing a united message. This is not a political matter. It is a public health matter. Thank you.
7/21/2020 8:20:50	Mac	Knight		St. John	<p>I am a music teacher, but the science (or lack there of) in this situation is telling. The preliminary results of the NFHS aerosol study for music classrooms indicated numerous procedures and changes should be implemented to assist in the mitigation of the COVID-19 spread. The final results of this study will not be determined until December, which implies we don't know what we don't know. A few additional weeks of planning, strategizing and implementing change for the safety and security of our students staff is not unreasonable.</p> <p>While I wholeheartedly agree that the best instructional environment for students is in the classroom, the best students to instruct are the students who are not sick at home in quarantine or worse, dead. The same thoughts apply to the best teachers - they teach best when they aren't in the grave.</p> <p>I wish what I was saying was hyperbole, but 318 deceased Kansans say otherwise. What does the COVID-19 death toll need to be before we decide to take the advice of experts in the medical community? The research done so far, while incomplete and ongoing, indicates a massive shift in the normal routine of school operations. Additional recommendations based on the continuing research may be made over the coming months, so flexibility and adaptability will be a key component to the successful operation of our schools. More time is needed before opening schools to make these initial changes and help ensure the safety of students and staff.</p> <p>Kansas was once the scientific joke of the United States for the adoption of the Critical Analysis of Evolution science standards. Regardless of your feelings or beliefs on the subject of evolution, the results of that BOE decision only impacted our state's reputation in numerous scientific communities around the globe. The decision in front of this current BOE on whether to delay the start of this school year or not could result in the deaths of children, school staff and community members.</p> <p>I strongly urge the Kansas BOE to support and abide by Governor Kelly's executive order to delay school openings until after Labor Day. Thank you for your time and attention.</p>
7/21/2020 8:20:55	Dorine	Cunnningham	USD	Marquette	I believe school and activities should be start as normal. This is not a pandemic and as a parent and educator we are falling into the belief it is.
7/21/2020 8:20:59	Andrea	Rottinghaus		Wichita	I am fine with delaying school until Sept 9th. However I am not fine with anything after that. Students need to be present in buildings and learning! With the mask mandate this can happen safely! Please don't let the governor continue to keep our student from learning in person. Thank you!
7/21/2020 8:21:04	Emily	Boedeker	Lawrence public schools	Lawrence	Please uphold Gov. Kelly's order by giving schools time to start educating children again- SAFELY. As a parent and a teacher I ask you to take my life and the lives of my family seriously.
7/21/2020 8:21:17	Lauren	Sanders		Manhattan	Open before Labor Day at the usual time. Children need to be back in school.
7/21/2020 8:21:24	Marcia	Fiorentino	Citizen, Parent of 2 College Students, Taxpayer	Topeka	As a parent of two college students I believe that local districts need to make the decision for their students. For many families the financial hardships and emotional stress leading to emotional breakdowns are just as important as the risks of the CoVid19. A work colleague of mine had his 16 year old son walk in front of a train in late May, another friend lost her elderly mother to CoViD(She already was ill and 79 with diabetes complications), many friends have had CoVid and all have recovered within a short time frame, and my oldest son who is 24 and lives and works in the hospital system in SC had CoVid and was only symptomatic for a day. Please leave the choice for school to local district leaders, trusting that they will absolutely consider the health and well being of their community both from CoviD and from life going on for emotional stability.

7/21/2020 8:21:30	Stephanie	Nall		Goddard	I support returning to in-school instruction, but I don't have an issue with delaying the start of the school year by three weeks. I have more of an issue with the mask mandate for children under 10 and think that wearing a mask for approximately eight hours seems like an impossibility.
7/21/2020 8:21:38	Leslie	Simpson	Retired counselor from BlueValley	Overland Park	My thoughts are that schools should be closed until after Labor Day for the safety and health of the community. It will give all districts time to make the buildings safe for staff and students.
7/21/2020 8:21:44	Debra	Smith	Manhattan-Ogden USD 383	Manhattan	Wearing the mask makes sense, but delaying school by starting 3 weeks later is not going to prevent the outcome. Students, teachers, and parents need to get back to some sort of normal routine.
7/21/2020 8:21:44	Jill	Kearn		Concordia	School needs to start on time as scheduled. Kids need in-person classes and school resources such as counseling and school lunches. Virtual classes are not getting the job done. We've tried it. It's a bandaid and not for long term. Please vote to start school on time. Thank you for your time and hard work.
7/21/2020 8:21:45	Leann	Sanchez	My family and friends	Emporia	The goal is to keep people safe. We need to keep our children safe, our teachers safe and the district staff safe. I want my children back in school but we don't know everything about Covid19 and it is best to err on the side of protecting the most people possible. Politics or personal gain must be put aside. We are discussing the potential of loss of life, any amount of loss is unacceptable. It is your responsibility to make the best decision for the safety of our children and your staff.
7/21/2020 8:21:53	Erin	Tompkins	SMSD	Prairie Village	I think the delay is needed to make plans to safely reopen or establish alternative plans that are appropriate.
7/21/2020 8:22:04	Crystal	Walter	Mrs.	clearwater	Feel free to delay the school year. We want our kids safe. Requiring masks when in session is also perfectly acceptable.
7/21/2020 8:22:24	Jennifer	Deamos	Myself	Shawnee	I support a later start to the school year but NOT the wearing of masks for elementary school kids. The EVIDENCE suggests that COVID is not spread among children easily and the wearing of masks is detrimental to their social and mental well-being
7/21/2020 8:22:27	Angie	Seibert		Overland Park	Please DO NOT delay start of school, kids need structure and in person interaction! Covid numbers for children do not support delay/closure.
7/21/2020 8:22:31	Meagan	Costantini		Pittsburg, KS	If you would not be willing to teach a class and have a student come up to you that is Covid-19 positive, you have no right to vote to put our teachers in that position. If you would not send your child to sit next to a Covid-19 positive child all day in a classroom, you have no right to vote to make other children do this. Protect our kids, our parents, our teachers, our grandparents, and our communities. Delay school! Or come up with an all telecommute mandate for this semester!
7/21/2020 8:22:32	Darren	Needham	Parent	Andover	I support delaying the opening of schools until 9/8. The foundational changes that school districts are trying to implement to keep students, teachers, and parents safe and healthy can't happen in such a short time frame. With cases spiking across the state, especially in the larger school districts, delaying opening will hopefully give Kansas a chance to level off the infection rate or reduce it. I would support rural school districts opening sooner if there isn't a significant Covid threat in their area. I fear opening the larger districts will cause a large spike in COVID cases in these areas. The Kansas education system covers a large diverse area with varied needs and challenges. There are no good, quick fixes for this mess. I do believe the Governor's plan is a good first step.
7/21/2020 8:22:46	Kelsey	Holguin		Kinsley	Let the smaller districts open! Our kids have been out of school for 7 months that almost a full year! These kids need to get back to some normalcy in their lives. If we wait to open til September who knows if they will get to go at all things could be worse by that point so at least get them started and go from there. Kids in rural farm districts are already behind some of your larger schools waiting until September is just hurting the kids more!
7/21/2020 8:22:55	Lori	Pierce	Usd 259	Wichita	Please delay the start of school and make sure our students and staff are safe!!! Our COVID numbers are out of control right now!
7/21/2020 8:23:02	Amy	Kelley		Overland Park, KS	Please delay the start of the school year to allow more time for data collection on Covid-19 and for the schools to better plan and prepare for public health issues that will arise once school is back in session.
7/21/2020 8:23:06	Lori	Maxwell	USD 467 - Wichita County	Leoti	Each school district has unique circumstances, and for that reason, I believe each community should have the opportunity to assess their situation and make the most informed decision about the safety of their students and staff. Please give the authority back to the local level rather than a "one size fits all Kansans" approach.
7/21/2020 8:23:13	June	Entz	Parent of a 2nd grader and 5th grader	Whitewater, KS	Please vote to open schools after Sept. 8th.

7/21/2020 8:23:16	Brian	Higgins		Wichita	I am not supportive of requiring masks at school and we will seek options within private school, online, or moving to another State, if this is passed. Clear and effective communication between teachers and students is very important. Schools already have return to the classroom guidelines when coming back from an illness. Children have been successfully playing sports all Summer, without wearing masks. Masks should be an individuals choice and responsibility to wear. Masks do not filter out the COVID-19 virus with its tiny micron size, so it is an ineffective solution being forced on the population, mainly to “make a social statement that we have a virus...” per the CDC.
7/21/2020 8:23:19	Christine	anderle		Olathe	I feel that giving staff and teachers this extra time to prepare the things iis necessary to keep everyone safe. If they or the buildings are not set up it could be devastating in the spread of this virus. My biggest concern is that it is not ready. Kids go back , numbers go up and we need to start at square one again. I know it is important for kids to go back but, their safety and the staff safty is way more important. You can make up school but, people's health and well being should be top priority. Thank you for your attention in this matter.
7/21/2020 8:23:19	Kendra	Otterman		Bonner Springs	I truly believe that it is best we wait to open the school to children till a later date or we cut the first semester short. Putting all those kids in one place is just a bad idea over all.
7/21/2020 8:23:30	Sarah	Bowlin		Overland Park	Please follow Gov. Kelly's EO regarding delayed school start for the safety and health of our communities and state as a whole. The teachers and staff need to be educated and prepared to take care of themselves and their students as the pandemic continues.
7/21/2020 8:23:33	Kay	Burns	USD 428	Great Bend	I hope you accept Governor Kelly's mandate. I work at the high school and I will be in a school with around 1,000 people. I feel the extra time will be well spent preparing a plan and putting it into place before students enter the building. I am concerned for my well-being as well as our students. Thank You
7/21/2020 8:23:37	Tamra	Quinn	Student	Andover	Kids need to be back in school without masks. It's a must for the well being of our children. They are struggling both physically and mentally.
7/21/2020 8:23:43	Michelle	Burt		Topeka	Please uphold the order to delay the start of school. Those few extra weeks will enable us to see what the virus is doing and to make plans for quality education for everyone.
7/21/2020 8:23:48	Andrea	Fournier	Teacher	Kansas City Kansas	Please delay school until September 9th please! This is not safe for anyone.
7/21/2020 8:23:59	Mary	Heble	Individual voting citizen and resident	Olathe	I fully support Governor Kelly's order.
7/21/2020 8:24:08	Geraldine	Heil		Hays	For health safety for all follow Govenor's recommendations to delay start of school
7/21/2020 8:24:19	Emily	Smith		Bennington	Please give our teachers more time to prepare for this upcoming school year. They need additional weeks to prepare the building and flush out all the safety protocols for our students. Not the mention adjusting the curriculum for the new grade-banded standards. Let's not rush our kids and teacher back into an environment that isn't safe.
7/21/2020 8:24:44	Megan	Paceley		Lawrence	Follow science and delay the start of school until after Labor Day
7/21/2020 8:24:48	Catherine	Cedeno	preschool paraeducator	Lyons	It is NOT safe to return to school yet. Our elementary principal issued a rule yesterday that the only people allowed in the school building during summer school the next two weeks are the contracted teachers and paras (less than 15 people) and the children enrolled (approx. 25 kids). He did this for everyone's safety! The health threat will still be as great on Aug. 13th when our school is scheduled to resume. Please approve the governor's executive order. The adult staff need as much consideration as the children. Delaying school by a few weeks will not have that great of impact on learning. Contracting the virus will have a huge impact on my family and I.
7/21/2020 8:24:51	Holly	Henderson	Mother of two school students	Olathe,ks	Please consider starting in school learning On time. Please offer online learning to families that aren't ready to return.
7/21/2020 8:24:54	Grahm	Whitley		Winfield	School should happen completely by distance learning or not at all until we're past the pandemic. Anything less is irresponsible.
7/21/2020 8:25:04	Marti	Bauer		McPherson	Please uphold the governor's decision to delay the opening of schools. There is no excuse for safety not to be the most important goal in moving forward. Three weeks could make a huge difference, and if even just 1 life is saved because of it that would be priceless! We are watching this situation closely and am not opposed to home schooling if health and safety are not put first.

7/21/2020 8:25:06	Traci	Gaultney	Starside Elementary PTA president	DeSoto, KS	Please do not send our kids back to school until Labor Day. The schools need time to gather and organize resources.
7/21/2020 8:25:13	Kelly	Jones	USD 497 Board of Education	Lawrence	Dear Kansas State Board of Education Members, I am the President of the Lawrence School Board and am respectfully requesting that you delay the start of school until after Labor Day. Our district needs additional time to safely prepare to provide high quality teaching and learning for all students. This includes time to enable the Douglas County COVID Response and Recovery Coordination Team to procure CARES Act Funds, which will help us secure the necessary safety supplies to mitigate health risks for staff, students, and our community. As we stand today, many of our staff and families do not feel safe returning to schools under the current conditions.  Teachers have shared with me that they need more time to adopt remote learning approaches. Even in cases where we anticipate in-person learning, we must prepare for periods of remote learning due to upticks in County COVID cases and/or exposure to an individual who tests positive for COVID.  Thank you for your service to Kansas public education.
7/21/2020 8:25:19	Mindy	Sullivan		SENECA	Please allow the Governors order to stand. Unprecedented times call for us to strive for the best we have. The best we have is to protect our students and teachers. It will be OK. We will be OK. It's just 3 weeks. My 3rd grader and teacher spouse would truly appreciate it.
7/21/2020 8:25:24	Alyssa	Mendoza		Don't open the schools	Being a kid myself I feel it's not safe to go back to school. Cases are back up and we don't know what's going to happen when it starts to get cold. I would rather postpone the opening of school than to go back now and then have to go back for a little now and then have another shutdown and have school cancelled all together.
7/21/2020 8:25:41	Aimee	Boudreaux	Blue Valley parent	Overland Park 66223	I am for delaying the start of the school year if it means safety measures can be put in place for the students to be able to attend in person. I am also in favor of continuing sports in a safe fashion.
7/21/2020 8:25:42	Sara	Gillespie	Self	Kansas City	As a teacher over 60 that just happens to be changing districts this upcoming school year, I would like to actually be in school to meet my kids face to face. But because I am over 60, coupled with my husband having health issues and the county my new school is in not having mask requirements as the number of cases is getting larger rather than smaller, I do not feel returning to the school building for classes is best for the entire learning community at this point in time. Thank you for your time and thoughtful consideration.
7/21/2020 8:25:54	Tina	Jackson		Wichita	Open schools full time as normal in August. Special needs students have fallen so behind and should be allowed their normal routine and therapies as needed. Open up our schools ASAP!
7/21/2020 8:26:11	Cindy	Sheldon	USD 309	Hutchinson	I love my job! I love my students! However, I am now considering a new career; teaching in person scares me to death. Please don't make me choose.
7/21/2020 8:26:12	Emmy	Pratt		Lindsborg	Please do! Uphold Gov. Kelly's executive order.
7/21/2020 8:26:15	Monique	Marquette		Overland Park	I strongly believe we can safely return to school, sports, and activities with masks in school. Conditioning has proven to be safe! BV has done a fantastic job! Kids need sports. Suicide and depression rate is going up. My kids are both suffering missing sports. They are living for conditioning every day!!!! Thank you BVW for doing such a great job with keeping our kids active and safe!
7/21/2020 8:26:24	Jennifer	Grabbe	Parent and teacher	Hays	It is time for students to get back in the classroom. This disease has put fear and anxiety in front of basic needs. There are so many students that are safer at school than in their own home. I as a teacher am ready to get back to school. I am not afraid of this virus but I worry everyday about my students. Also it is unreasonable to ask grade schoolers to wear masks. There will be more germs and issues than any benefit to wearing them. Also there will be some older students who will not be able to wear them .

					I sincerely hope that the board votes to approve the governors executive order. I have started reading through the navigating change document, and I believe that the extra few weeks will give teachers more time to plan and prepare to implement the changes. It will also give more time for COVID-19 numbers to go down throughout our state. I can not wait to see my students and I miss my job so much, but I'm concerned for what I'm going to bring home to by family being stuck inside a small classroom for 7 hours a day with 20 kids. I have 1 tiny window in my classroom and the ventilation is not the best. My parents and in-laws provide child care, and they are in a very high risk category. Another aspect to consider is those of us that go to school that will have to find alternative childcare because our childcare providers can not risk being around our kids. I know we are not as big of a group as parents who rely on school for childcare, but we are there nonetheless. I have watched your meeting on the navigating change document and hope you consider that since your meetings are done remotely and not in person, that should be an indication it's not safe to be back in the classroom. I do not know a teacher that isn't anxious to go back. But we want it done as safely as possible. I know you have many different viewpoints to consider and I appreciate you taking all of them into account when making your decision.
7/21/2020 8:26:41	Valerie	Ortiz	Classroom Teacher	Wichita	
7/21/2020 8:26:49	Erin	Schulte		Wichita	Please. For my husband's life. For my kid's life. For the people I work with and alongside everyday.
7/21/2020 8:27:00	Jada	Lobmeyer	Usd457	Garden city	Yes I agree! Start after Labor Day, shorten breaks and no inservice days! Also no sports for now! I just don't see how we can open safely, there is not enough man power to keep schools sanitized correctly. Kids don't wash their hands on a normal school day. Teachers rarely clean and now we want them to sanitize things in their rooms. Probably not going to happen.
7/21/2020 8:27:25	Dawn	Bankston	USD 260	Derby	School should start after Labor Day.....as well as return to normal with no masks or social distancing. This just adds anxiety to everyone, and creates an environment and culture of unrest something that can create more problems than solve. I think we should give the government the time to collect the correct numbers on COVID as they have just turned it over to our military and out of the hands of the CDC due to the inaccuracies in reporting.
7/21/2020 8:27:27	Pam	Williams	none	LAWRENCE	If even one life is lost due to reopening too soon, it is one life to many. Districts need the extra time to plan for the safest return possible.

					<p>Thank you so much for all of your hard work and countless hours you have put into this situation. It is appreciated.</p> <p>I am writing to you in preparation for the Kansas School Board of Education vote regarding the mandate to delay school opening.</p> <p>As a parent of three children - one each at the Elementary, Middle &amp; High School levels - I respectfully request that we work with you to ensure a safe school environment that includes no delay of student participation in school, athletics, and activities.</p> <p>In response to the Mandate delaying School opening statewide, please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.</p> <p>Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>As a Registered Nurse of 19 years, I have continued to work full-time through the pandemic. Because of this, I know that the number of positive cases had no where to go except for up. Initially, citizens were unable to obtain a COVID-19 test unless they were ill enough to be admitted to the hospital. In June, that rule changed to anyone and everyone - symptomatic or not - can be tested for COVID. Of course the numbers went up! Subsequently, the fear and panic set in. You cannot change the variables of your data collection and still call it a reliable measure. Yes, COVID is here, but halting all school, sports and activities is not the answer. Appropriate cleaning, sanitizing, and masking is sufficient in the control of this virus. I work for Children's Mercy Hospitals &amp; Clinics. As of today, we have a 0.02% positive test rate for the pediatric population of the KC area. That covers children from birth to 22 years of age. I cannot fathom delaying the start of school, sports and activities for a 0.02% rate.</p>
7/21/2020 8:27:42	Allison	Juneau		Olathe	
7/21/2020 8:27:47	Angela	Whitebread	Usd475 parent	Junction City	I AGREE with this order, school needs to be postponed
7/21/2020 8:27:57	Norma	Pando	USD 102	Dodge City	It is of a high interest that we protect all children and staff from a pandemic that hasn't reached its full affect in our area. We need to take the PPE requirements necessary once school does commence. We are taking the notion of the illness too lightly. Districts are already counting on county commissioners being able to reverse any orders. We need an order in place that actually protects our teachers especially those with underlying conditions and our students with chronic illnesses. Once all is set in place and we can go back safely with precautions, then we can go back to school fully practicing what is needed to keep us healthy. Please do not let politics define the order but a clear plan of consideration for all at stake.
7/21/2020 8:27:58	Taylor	Burson	USD 232 Teacher and parent	Shawnee	I urge you to vote in support of the Governor Kelly. Schools need more time to prepare for the upcoming school year. The 1100 page document for schools is overwhelming and school is not going to be normal by any means this year. I do not feel safe sending my high schooler, middle schooler, and elementary schooler in August because I don't feel that our school is prepared or safe at this time. As a teacher I'm terrified of getting this virus. Thank you for your consideration.
7/21/2020 8:28:00	Erica	Sims	Kansas teachers	Overland Park	Schools should be delayed for now and only reopened for in person class when the rate of infection cases is 5% or below in the area where the school is located. Anything else is unsafe. We do not know how serious the disease can be for children because most kids have not been exposed to it. If you reopen in person schools now you are rolling the dice with their health. Not to mention staff deserve to be safe. It is mandated that employers provide a safe workplace. You cannot ensure safety at schools right now even with best practices. Thank you.
7/21/2020 8:28:02	Jeanette	Ische	Teacher	Chapman	As a high risk teacher I agree the school year should be extended. I would like to go to work and not have to worry about easily getting sick. 3 extra weeks might allow for schools to finalize plans

7/21/2020 8:28:05	Robin	Embry		Overland Park	This state and country has got to get back to some sense of normalcy for the benefit of all parties. The death rate from COVID continues to go down and the risk to the younger generation is small. If there are teachers that don't want to work or be at risk then so be it, stay home, don't work and don't get paid! Do you think all the essential medical workers have wanted to go to work and do their job everyday?? At some point decision makers like yourselves have got to take into consideration the mental welfare of students. They need friends, socialization, structured learning, a guaranteed meal for many and a sense of what it means to be a kid. Furthermore, many dual income parents will have great difficulty and additional stress to have the school year delayed which leads to unhappy homes and the potential of greater risk to kids. This country needs to stop living in fear and get back to life. Have a little faith!!
7/21/2020 8:28:09	Hillary	Davis	Parent of SMSD student	Overland Park, KS	I support the governor's EO to delay the start of school. It's important for the health of students and staff to have enough time to prepare for additional steps to keep all of our families safe. Thank you for this consideration.
7/21/2020 8:28:13	Jim	Metz	My Family	Lincoln, KS	I have a 6 year old and the governor expects him to wear a mask all day? I thought the initial guidance said 6th grade and up? 5, 6 and 7 year olds do not know how to wear masks???. And, have you thought about how they will pick their noses??!!  Temperature checks to enter the building? Can you be more specific governor on how this will work? What constitutes sending a child home? 100.3? 101.5? Please clarify!  I am ok with the 3 week delay. It's logical and follows the covid-19 data. But the other order with the mandates is preposterous!  Also, here is what will happen when I assume it will be decided that there will be no activities. Communities will form their own activities and people will gather, not wearing masks, not social distance, just like people have been doing all summer. I hope you know what you are doing governor!
7/21/2020 8:28:16	Kelly	Kirk	My kids	Stilwell	These kids need to get back to school and in person!! Precautions measures can be placed to reduce the transmittal of COVID. I'm assuming that's what the school district has been working on for the last four months. It is completely ridiculous that you are considering keeping these kids from in person learning. Families should have the choice on online learning if they have underlining health concerns but those families that need in person learning should have the option.
7/21/2020 8:28:13	Maria	Boothe	Private school	Goddard	Have a soft start and open aug 19. Start remedial learning. Kids didn't learn a whole lot last spring.
7/21/2020 8:28:21	Kathy	Martin	Self - current substitute teacher in 3 local districts - former KSBE member - retired elementary school teacher in both parochial & private schools in Kansas	Clay Center	Our students and their parents are counting on your decisions. Please don't "throw them under the school bus"! Open our classrooms & schools again. Kansas has been a local control state for education and we need to allow that to continue. Local teachers, administrators and school boards are more in tune to the special circumstances and needs of their districts than a governor in Topeka. Please leave it a decision that they will make based on their best judgement. The thing it would be good for the KSBE to do as a body is to approve the legislature's limiting of executive power & to promote the legislation that would limit liability during this pandemic. Please show your collective courage and common sense and approve the opening of schools and classrooms.
7/21/2020 8:28:27	Davia	Krupa	Parent	Fort Riley	Please reject Gov Kelly's executive order requiring schools to remain closed until after Labor Day. Our children have been out of the buildings for almost five months. If we do not allow them in until Sept, they will be out of the building for half a year. For those like my sons, who have special needs, every day delayed is more time for social regression. If you do choose to accept her order, please adjust the requirements for state testing and instruction hours. Thank you.
7/21/2020 8:28:34	Caroline	Seals	SELF - TEACHERS	Topeka	The number of cases in the state continues to rise. Putting so many people close together in one building all day long makes no sense at all. More time to get the number of cases down in the state is critical. Please support the governor's executive order. This should NOT be a partisan issue. It is a matter of life and death.
7/21/2020 8:28:40	Jay	Marquette		Overland Park	Miss NEED to return to school IN PERSON!! They are struggling in so many ways!!! Masks are fine!! I also think we need all sports and activities. These kids need their outlets. Too much has been taken away from them!! Please let them have a normal school life w accommodations of masks!

7/21/2020 8:28:53	Lisa	Ochs		Salina	Please support the governor's executive order to delay the start of school. Now is not the time to take a "let's see"-expeimental approach. Strong leadership is needed and guidance to move forward with primary emphasis on safety and health of students and staff. Thank you for your strong consideration. As a school based PT, I am terrified to return to work.
7/21/2020 8:29:04	Leslie	Boe	Parent	Overland Park	I support the Governors executive order postponing the start of school. We need the time to bring the Covid numbers down.
7/21/2020 8:29:06	Jo Ella	Hoye	My third grade son	Lenexa	Please UPHOLD the Executive Order and delay the start of school. It will give school districts more time to figure out how many students will attend school in-person and adjust safety measures to meet the needs of all students. We all want our children to be able to go to school in their school buildings—but not at the expense of the safety and well-being of our children, teachers, and school staff. We need this extra time.
7/21/2020 8:29:22	Matt	Nelson	Olathe schools	Olathe	I feel that in person school attendance should be restricted until this country has a better grasp on the pandemic. Rate and method of spread for this virus need to be better understood before allowing students, teachers, and faculty back in schools.
7/21/2020 8:29:23	Bobby	Lorg		Scott City	Not all counties are the same, let counties decide when to start and let parents and counties decide on mask.
7/21/2020 8:29:27	Kelli	Ridgeway	USD 259 Teacher	Wichita	Please respect Gov. Kelly's delay of school. Too many lives are on the line. Children will get sick, staff will get sick. We do not have enough guest teachers to fill openings in a non-pandemic time. This is not political, this is protection.
7/21/2020 8:29:36	Molly	Williams	USD 259	Wichita	I believe we should be given some kind of metrics for how and when we should open that is based on our current case count. Until we see our case count going down for 14 days, I do not think we should return to school buildings. Organize some small site schooling and encourage schools to operate using a hybrid model. Put middle school and HS kids in the same class everyday with the same kids and let them learn remotely from their home room if they must be in a school building. Mixing hundreds of kids in the hallways and amongst different classes is asking for an outbreak that will be difficult to pin down. You should not sacrifice school teachers or school staff or the health of these already suffering families for the sake of normalcy. If we do plan to go in person, staff needs protocol training. We need more counselors in school to help kids deal with the trauma they are experiencing and you need to have an adequate plan in place to deal with the loss of any human life taken by this virus. We all need to be aware of the predetermined criteria that will result in further closure or pivot to online. It should not be about how any of us feels about it. The decision should be based on number of cases and whether they are trending up or down.
7/21/2020 8:29:44	Erica	Vaughn		Wichita	More than appropriate to delay. Remote learning is the way to go this year. Perhaps we could shift the focus to how we can address the challenges of remote learning and keep all kids safer at home instead of forcing in-person. Frankly, we signed our kids up for an e-cademy two months ago. We love our school, but there is no way we're going back yet.
7/21/2020 8:29:48	Hope	Buessing		Colwich	I believe in our Administrators and teachers that are willing to return to the classel room, to open safely following guidelines suggested by KDHE. This is not a one size fits all situation. Allow parents to choose to send their children to school or have their children learn remotely. Trust your local Administrators to make the best decision for their communities. Open up!
7/21/2020 8:30:10	David	Bloyd	My children	Wichita	I believe the board should agree with the executive order delaying the start of school. The COVID numbers in Kansas are increasing too quickly right now to safely start school.
7/21/2020 8:30:12	Barry	Schwien	Sacred Heart School	Bazine	I agree with the Governor's decision. A later start will hopefully lower our numbers by then.
7/21/2020 8:30:16	Jennifer	Mc		Wichita	We would like to see school open in August. We think delaying serves little purpose for the health and well-being of our children. At this point, their mental health is our largest concern.
7/21/2020 8:30:25	Dianna	Rottinghaus	blue valley schools	overland park	Please do not put our community at such a health risk! Children are resilient and will bounce back academically and physically. The adults who work with them and care for them may not.
7/21/2020 8:30:26	Heidi	Henson		Holcomb	No mask!!

7/21/2020 8:30:50	Shannon	Duncan		Overland Park	For consideration: If the district is considering in-person class then schools should provide regular testing for students, teachers, and staff. I'd also like to know how the schools plan for continuity with course lessons in the event teachers are sick or have to quarantine as a result of contact with someone infected. Is it in the students' best interest to have in-person class if there is a constant rotation of substitute teachers?
7/21/2020 8:30:50	Jessica	Burche		Olathe	I am so grateful for the executive order delaying the start of school. The Kansas School Board had only just approved the document explaining guidelines for schools in the fall, giving school districts barely any time to decide what kind of model they could use to keep kids and families safe in the fall. Additionally, the numbers of infected just started going up in Kansas. This has led to a lot of confusion and uncertainty. Nothing about this situation is ideal, but it seems to me the end goal is to keep children, teachers, staff, and the community at large safe. There is now evidence that teens and tweens spread the virus just as much as adults--this changes how we can handle school for these children. Additionally, I fully support the other items outlined in the executive order calling for temperature checks and use of hand sanitizer or handwashing once per hour. I'm so glad our governor is showing real leadership instead of going along with the party line.
7/21/2020 8:31:18	Luciana	Thrash	USD 333 Concordia Public Schools	Concordia, Ks	I believe that schools should be delayed only in areas with high populations of COVID. There are other areas that have little to no cases, and I feel that these school districts should open on time and not be delayed. IF/WHEN school does open back up all staff should take the proper precautions in order to prevent the spread of COVID. As far as school athletics, I believe they should be postponed until next year, because kids traveling into other districts could contract the virus more easily depending on the cleaning procedures in other counties and schools, especially in locker room settings and bathroom facilities. I do not believe that kids should wear masks while exerting themselves physically due to the lack of oxygen intake due to the mask blocking adequate air flow during high stress workouts. Football, for example, is a close contact sport that requires a mouth piece and a helmet, and to add a mask to that equation will be distracting to the players. The same goes for wrestling. They have a mouth piece and a helmet on, and with a mask that can easily be removed during a wrestling move is putting kids at risk. It's for the safety of all involved to have less movement of large groups from county to county and from state to state until there is a vaccine available or a medicine that can help people recover quicker with less difficulties.
7/21/2020 8:31:18	Jennifer	Lehman	USD 352	Goodland	Please do not approve the order to delay the start of school. Goodland does not currently have any active cases and has only had 9. Our kids need to be in school. They need a sense of normalcy. So many of our students are at-risk, and being out of school in the spring was bad for these students. Our students need to feel the love, caring, and encouragement of face-to-face school. They need the structure. They need all of this soon. Even my own teenagers - who live in a loving, encouraging, and supportive home - need school to start soon. From a counselor's perspective, my kids are hurting, and I know so many more students in my district who are as well. Please do not delay school. Allow districts to choose their own start date. If local districts want to delay, allow them to do so. I firmly believe a delay in starting school is not in the best interests of our students in Goodland.
7/21/2020 8:31:22	Karen	Rawlings	My family	Olathe	Open schools up fully, and on time. Look at the science, not politics and fear. Our children's overall health is critical to it. Incentivize teachers who come back. We all have at-risk jobs. Let's get our kids back to a productive and healthy place. And next time send a survey out BEFORE you make such an astounding announcement.
7/21/2020 8:31:28	Molly	Drimmel	Myself	Auburn	The kids have to go somewhere. Sending them to daycare is just as much risk. Leaving them at home alone is not the answer. The stress of it is not good on parents or family life. If people aren't comfortable they have the option to do online but don't make a decision that leaves no options for parents that work outside the home.

					<p>Please accept Governor Kelly's executive order. Following is an email sent to the state BOE earlier this week.</p> <p>Good afternoon,</p> <p>I am sending you this email from the perspective of a parent to a 6 and 3 year old who attend public schools as well as a veteran educator who has worked in schools for 13 years. This email is my personal opinion and does not reflect the opinions of my employer.</p> <p>"What is best for students?"</p> <p>As an educator, this is our driving question every second of every minute of every hour of every day. It's a question I take extremely seriously while developing lessons, creating routines, and establishing relationships with my students. This should be our focus question as we look to this school year. Not what is best for the economy and not what is best for our local, state, and federal government. What is best for our students.</p> <p>Many arguments have been made that to keep our students out of the building means they will be scarred and stunted in their mental health, and that we must open buildings immediately to preserve their mental well being and give them an opportunity to socialize. However, the public needs to realize that bringing back students physically does not mean we are going back to a "normal" school year.</p> <p>Per recommendations and guidelines, I am supposed to keep my students six feet apart. As a teacher that normally utilizes group work, collaboration, and physical movement in their classroom of middle schoolers, this will be impossible. I do not have the physical space to achieve the recommendations while simultaneously utilizing these best practices of teaching. My classroom will not look like it normally does this year. Students will have to remain in their seats, socially distanced, and work mainly independently. In essence, we will be remote learning while physically in the same four walls. Is this what is best for students? According to my education degree and countless hours of professional development of teaching best practices, that answer is simply no.</p>
7/21/2020 8:31:29	Katherine	Wiechman		Wichita	
7/21/2020 8:31:29	Lindsey	Rimmel		Abilene	I agree whole heartedly with postponing the school year. I even think that it needs to be online learning for the first part of the year so we can see how this is going to go. Cases are increasing and no matter what you do to try and keep the kids from getting sick, it's not going to be 100% effective.
7/21/2020 8:31:33	Kylie	Kinman		Hoisington	Schools need to open on time. It has been long enough. Three weeks will not accomplish anything. The kids need to get back to "normal" before they really start to fall behind. The spring semester was already a loss. My kids gained nothing from online learning & hated it. If parents do not feel comfortable sending their children back, they can opt for the online option. It's not a one size fits all scenario. Not all communities are in the same situation. Therefore, reopening should be determined by each school district & their situation. If we wait for the ideal time to reopen, we'll be waiting a forever. In my opinion, things will not improve until we stop being afraid of something that is not any more life threatening than the flu, which schools deal with yearly. If more stringent cleaning/disinfecting procedures are implemented and a few new safety precautions are added, things will be fine. The numbers for this virus are so flawed to begin with. We cannot base decisions off of deaths & cases. The common flu claims just as many lives per year, yet schools have never been ordered to shut down for the flu. I beg of you to please veto Gov. Kelly's order and reopen schools on time. It's time to stop being afraid.
7/21/2020 8:31:39	Samantha	Grimm	Parent	Overland Park	this virus is here to stay, we have to learn to live with it. We can't keep hiding for the rest of our lives. We need to get back to some normalcy in our lives for these kids!!! Teachers are acting like it's a death sentence for them. Buck up and do your job! I'm in healthcare everyday and not once was I off. We need to start back and gave the normalcy for our kids.
7/21/2020 8:31:39	Kevin	Chesney	My Student	Salina	Please do not delay the start of school. This will serve no purpose, will be detrimental to our children, 20 days of delay does nothing but disrupt the entire year for our children. This will also create such an incredible hardship for working parents that depend on their children going to school, children that depend on the school lunch program, and total disruption of the students extra curricular activities. Our kids are ready and willing to go back to school, practice all safety measures, and they want to Learn!!

7/21/2020 8:31:43	Shelly	Swayne	USD 407	Russell	The mandate to start school on Sept. 08 is one that USD 407 can deal with, but not without attention to KSA 72-3115. To be quite honest, no matter when we begin school, USD 407's planning cannot find a way to log the needed 1116 ours and keep health and wellness in tact. Without the opportunity to flex the 1116 hours or 186 day requirements, USD 407 cannot maintain operations under our current contract or budgets. We are 100% committed to our children and staff who need the opportunity to join us in classrooms, hallways, and activities. We are also 100% committed to the priority of doing that with wellness and health at the top of our list. Starting school on Sept. 08 vs. August 26 for USD 407 really is not the issue for us. KSA 72-3115 however is a larger challenge that we need your help with and we need it BEFORE we begin the semester. We don't need much help to get there, but we need some...
7/21/2020 8:31:55	Nicole	Smith	Forestview Elementary	Olathe	Please delay the start of school to help numbers go down and for school and staff to have a chance to make plans for safety in school. Very scared to return to school now and teachers need time to prepare classrooms and any changes that will be coming. Time will help!!
7/21/2020 8:32:02	Corbin	Stevens		Scott City	Please vote to not delay school opening.
7/21/2020 8:32:05	Kerry	Kuplic		Dodge City	I fully support Gov. Kelly's thoughtful and science-based decision. It is imperative that we listen to scientists and scientists alone. You must prove that you care about the safety of students and teachers by implementing her orders. Anything less would be an abdication of your responsibility.
7/21/2020 8:32:09	Chris	Korb	My family	Olathe	I believe in the facts like number of cases in our area. Those are facts. It is disgusting that some have made this political. In our area, there is no way I would support students returning to classrooms. We have a 15 year old daughter that is a Sophomore at Olathe West High School.  I SUPPORT THE DELAY to start school so the district can get things lined up for successful online learning. There is no way our district will be able to have in-person learning in a safe manner.
7/21/2020 8:32:09	Noelle	Tesmer		Olathe	Please approve the delay of school. Our teachers, admin and kids deserve a 3-week pause in the hope our community can slow the spread and schools can open as safely as possible.
7/21/2020 8:32:11	Amy	Disbrow	Parent	Garnett ks	First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas. Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening. I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following: Safe School opening following the Board of Education Return to School Plan No delay to student participation in school, athletics, and activities. In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions. This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense. Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time. I am one of the over 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay. We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.
7/21/2020 8:32:15	Nicholas	Rawie	SMSD	Overland Park	Listen to science. Look at what happened in Israel. They had things under control, trending way down before they made the decision to open schools. Then it blew up again within the first couple of weeks. This is not something to take lightly, people will die, grand parents, parents, teachers, staff, students. There is no chance we can open safely with the numbers going up. Do everyone a favor and make remote as solid as you can and find solutions for those families that have parents that must work outside the home.

7/21/2020 8:32:25	Shannon	Allen		Shawnee	I think we need to start after Labor Day. Schools need time to figure out the best way forward.
7/21/2020 8:32:39	Leasha	couchman	self	scott City	No delay, No masks! Stop it! Stop scaring our kids. Let our kids have normalcy back in their lives!
7/21/2020 8:32:50	Michelle	Dunlap		Salina	Ridiculous. Send the kids back to school so they can learn and continue their education. They missed the end of last year and they NEED to be in school! What is delaying it a month going to solve?!!
7/21/2020 8:32:57	Doug	Penner	Retired from Kansas Independent College Association	Topeka	Please endorse the Governor's policy regarding conditions under which public schools should open. This is an absolutely critical issue in the lives of our students, our teachers and in the health of our community.
7/21/2020 8:32:58	Annette	Sosa	Hugoton High School	Hugoton, KS	We need the extra time to prepare safety measures!
					<p>Please approve the Governor's delay of the start of school until after September 8, and later if she so determines. There is no possible way to prevent children and teachers from contracting this deadly disease if they are placed indoors, together while cases are still spreading throughout Kansas. We do not know what devastating, lifelong effects our children will suffer, and I hope we don't have to find out. We cannot afford to lose our teachers, paras, and other school staff, and I am not prepared to walk my kids through grieving for teachers and friends and friends' parents. I am not ready to raise them to the constant reminder that they can lose so many people so quickly. We don't have to. Please exercise leadership. All of this is so preventable with simple statewide adherence to evidence-based recommendations.</p> <p>I work full time. I don't have good child care options. I desperately want a return to normal. But sending kids and teachers back to school before science supports it will not be normal; it will be a devastating change from all we tried to protect them from as the disease spreads and takes hold on our communities. We simply cannot take this risk.</p>
7/21/2020 8:32:59	Melanie	DeRousse		Lawrence	<p>Please support the Governor's attempts to protect all of us.</p> <p><del>The proposed order to delay school opening is simply unwarranted. It is supported by neither reason nor science. The delay is troubling because it relies on only one metric – number of cases.</del></p> <p>An examination of the most recent data from the KS Dept. of Health shows a much different picture of the impact of COVID on both the spread across the state and the impact of the virus of school-age children.</p> <p>Consider:</p> <ol style="list-style-type: none"> <li>1. There have been zero deaths of school-age children (the youngest in the state is 29).</li> <li>2. Only 20 people under the age of 19 have been hospitalized due to the virus.</li> <li>3. Half the state's counties have reported fewer than 20 cases (3 still have 0 cases).</li> <li>4. Only 58 patients were in ICU statewide due to COVID on July 17.</li> </ol> <p>While other states are working on reopening schools, we seem to be going the opposite direction, instead focusing on how to keep them closed. To what end? When there is no substantive COVID-related data to justify denying hundreds of thousands of students an in-person education that many of them crave (mine are demanding to go back, post-haste), what is the true purpose?</p> <p>The National Academies of Sciences, Engineering, and Medicine published a report stating that states should be focused on reopening schools. According to the authors, "(w)eighing the health risks of reopening K-12 schools in fall 2020 against the educational risks of providing no in-person instruction, school districts should prioritize reopening schools full time, especially for grades K-5 and students with special needs." Furthermore, "(o)pening schools will benefit families beyond providing education, including by supplying childcare, school services, meals, and other family supports."</p> <p>Students most vulnerable would likely suffer disproportionately from a delay. There will undoubtedly be academic impacts, potentially increasing already unacceptably high achievement gaps. There are indicators that low-income kids are already more than two years' worth of learning behind their more affluent classmates. Students have been</p>
7/21/2020 8:32:59	Marc	Elton		Olathe	

7/21/2020 8:32:59	Steve	Bock	USD232	Shawnee	I believe we should go all in on bringing our COVID-19 numbers down. Halfway isn't the answer. Therefore, I agree with the decision to delay the start of school. I'm very concerned about the safety of teachers and staff.
7/21/2020 8:33:00	Michelle	Shopteese	Myself	Osage City	Keep schools closed until after Labor day and make masks at school mandatory.
7/21/2020 8:33:18	Shanae	Gooden	Parent - USD345	Topeka	I already emailed all of you, but this is too important. Please reject the Governor's Executive Order. Kansas districts are too different for a one size fits all approach. If our district is ready, our kids need to return to school. We have had plenty of time since March to get the precautionary measures in place. Most districts already have plans ready to go. Please vote no!!!
7/21/2020 8:33:19	Timothy	Terrones	No organization	El Dorado	I support the governor's decision and believe the board should too. At a time when covid 19 is on the rise I believe being cautious is a better decision. The start date is only pushed back a little anyways. Sometimes the right thing to do is not always the most popular.
7/21/2020 8:33:29	Kathy	Wichmann	none	Manhattan	Support delaying school & offering hybrid model of in-person 1-2 days/wk & online
7/21/2020 8:33:35	LuzVanessa	Matthews	USD 475	Junction City	I agree with the delay but only because I feel that our districts need more time to successfully plan for the school year. If another delay is required past the September deadline, can we please have all students start remotely.
7/21/2020 8:33:36	Megan	Tyner		Newton	This entire conversation has gone back and forth and back and forth. The public needs consistency so that we can enter the school year with a positive and focused energy. Stick with the Gov's orders. Encourage ALL districts to consider what teachers need moving back into the classroom (if that's what is safest). Districts will have more time to communicate with students and families so they know what to expect. The entire state will have an opportunity to show care for our children and communities by slowing the spread. It makes me so sad that this has descended into political football. We have seen what happens when communities are left to make decisions on their own - too often politics win over common sense. The Gov is trying to protect all Kansans and it shameful that she is being undermined by partisan politics. Support the order.
7/21/2020 8:33:54	Kelly	Bradford		Lawrence	I support Gov.Kelly's efforts to keep Kansans safe. Wagle and her minions simply do not care about Kansans' well-being.
7/21/2020 8:34:11	Christine	Splichal	Parent	Olathe, KS (Spring Hill Schools)	Please ensure that school starts after Labor Day to help ensure children and teacher safety. In addition, encourage flexible scheduling to minimize concentrations of students.
7/21/2020 8:34:16	Kristin	Whitlow	my family	Wichita	The way schools are reopened needs to be left up to the individual districts, with parent input. Districts have been working and planning all summer on how to safely and effectively open schools. They have surveyed parents and teachers, and although their plans differ from each other, they have made the best choice for THEIR district. There is no ONE best way for every school and district in the state. The governor is railroading the education system in Kansas, and it will only do harm. There are many families who will not return to the public school system in Kansas if her executive orders go through. My children will not return to school if masks are mandated.
7/21/2020 8:34:36	Alison	Boles	Boles Christian Academy and Maranatha Christian Academy	Shawnee	Schools who have been preparing all Summer for online or in-person education this Fall are prepared to start on time. I don't see any reason to force them to start later. Some schools were online schools prior to COVID. Why should they have to delay their start? Makes no sense to force the Online and Private schools to delay their start dates. Are we trying to punish these families for not going to public schools? We appreciate the Board of Education and are glad that you have the opportunity to vote on whether to accept this over-reaching executive order or override it. Thank you!
7/21/2020 8:34:45	Dale	Wolgram	USD 386	Madison	Open schools at the normal time. The schools have had 6 months to prepare for the opening and students need to be in the classroom. The effects of not having face to face school for our students far outweigh the possible infection from the Covid virus which is far less deadly than earlier estimated. We need to stop the political games and get our students back in the classroom. Why are we wearing masks? There is not one study that verifies the effectiveness of wearing masks. Are we wearing masks because of China? As a teacher, I anticipate having more issues with students not wearing their masks properly than any other issue. Please make research based decisions before you mandate anything on the population that is the least effected by this virus. I am tired of being lied to by the government officials. Thank you for asking for the public opinion on this issue.
7/21/2020 8:34:49	Jessie	Reimer	USD 232	Kansas City	I agree with Governor Kelly. It's smart to wait. It allows Administration to finalize plans, gives teachers time to prepare, and hopefully we can see numbers decrease. The only way to go back is SAFELY and we are not there yet. If you have to meet virtually, then why would you send students and teachers back??

7/21/2020 8:34:52	Ron	Nichols		Tonganoxie	Absolutely support delaying until after Labor Day. It gives school boards and schools the needed time to make final preparations. I also would look very closely at extra curricular activities and the allowance of spectators.
7/21/2020 8:35:01	Melissa	Drummond	BVUSD	Overland Park	We should let school boards decide...one size does not fit all.
7/21/2020 8:35:09	Megan	Glenn		Olpe/Emporia	<p>As a parent and a teacher, I see many sides of this situation. However, the ever-looming issue right now is COVID-19 and our changing understanding of how it affects the human body. Even as adults with proper precautions - masks, hand-washing, social distancing, we are spreading it to one another. My own teenage boys have rarely left the house since March and just recently have been able to see family outside of our home.</p> <p>I have been so thankful that, up until this point, the state-wide school plan has been driven by teachers from every field and from a variety of communities representing the entire state of Kansas. There are no good answers right now - so many unknowns. There are students, even in my small rural school, who I worry about being at home without a good support system. This virus has brought to light so many things that we need to work on as a society when not having kids in school has been so difficult.</p> <p>I know some of my fellow teachers will disagree with my stance, but I believe giving schools 2-3 more weeks to better prepare for masks, temperature checks, and rearranging of schedules will allow them to keep open longer and better avoid an outbreak. As teachers, we have been working all summer on our "break" to prepare for multiple scenarios this fall, so giving us 2-3 weeks as a school team (rather than individually) to prepare will bring us back stronger.</p>
7/21/2020 8:35:20	Jennifer	Keene		Junction City	Since there is doubt of the safety of our children. Go to full online schooling to start. And yes, delay starting till after Labor Day. Please put our children first. Please there is so much unknown about this virus and we need to protect the children as best we can from the unknown. Our city hasn't reached a peak yet and it would be foolish to think we are out of the woods and completely safe.
7/21/2020 8:35:29	Jane	Alsop		Salina	<p>Please put aside partisan politics and support Gov. Kelly's executive order 20-58.</p> <p>In this time of COVID-19 we need our leaders to pay attention to science, doing what you can to protect Kansas children, teachers and ultimately Kansas families.</p> <p>If a short delay in school opening could help lower the numbers of COVID-19 cases, why would we not do that?</p>
7/21/2020 8:35:35	Anne	Biram	USD 475- Seitz Elementary	Manhattan	I believe closing schools until after Labor Day is the safest measure we can take at the moment. I am in a school district in which safety measures and protocols have yet to be shared with me- a 5th grade teacher. With the original start date, that leaves little time for me to prepare make sure my classroom is. It only safe but also welcoming to all my new students. I am also hoping this delay might give more time for the mask mandate to take place and therefore hopefully help lower our number across the state.
7/21/2020 8:35:36	Sheena	Pfeil	My family	Phillipsburg	The governor is a quack and with this BS won't be re-elected. She is NOT thinking for the people, nor does she have the people's best interest or health at heart. I don't care what she says, i won't listen to her and my kids will not go to school if this becomes mandated. They WILL NOT be forced to wear a mask!!!!!! Period
7/21/2020 8:35:52	Sarah	Heironimus		Lawrence	Please delay school until after Labor Day! Don't rush into anything! Keep our communities safe!
7/21/2020 8:36:00	Jenna	Eshleman		Salina	Please hold off on school until labor day!
7/21/2020 8:36:02	Jandee	Oard	Buhler schools USD313	Hutchinson	I have four kids in public schools and I am for delaying school until after Labor Day. It gives everyone a chance to put the brakes on heading into school and prepare to do it safely.
7/21/2020 8:36:10	Jennifer	Pearson		Wichita	My 12-year-old daughter attends public school in Wichita, and as difficult as it has been for her to be so isolated and for us to juggle work schedules, we are absolutely not willing to put her back in school until it is safe to do so. With the number of cases and deaths continuing to increase in Kansas, we strongly support the governor's decision to delay school and to require masks and other safety protocols when schools do open.
7/21/2020 8:36:13	Shawna	Gilbert	Kansas Teachers	Saint Joseph Missouri	Please follow Governor Kelly's school pushback for after Labor Day. Our district has not made any decisions on how to return to school and we need more time to plan for this new year and the changes it brings. Allow us to fully prepare for whatever it is that we need to do, safely, and not rush the process. Thank you.

7/21/2020 8:36:17	Talia	Brown		Ottawa	You need to open schools as normal! No masks! No social distancing! To not allow our children to live in a fear free environment, to get the education they need and we pay for is unjust and wrong! There have been all kinds of viruses that have gone through the communities since the 1800's and we have never done something as oppressive as this. The government shorted our children last year out of an education for NO reason. Covid was in the US as of January last year but we didn't shut down then. Other countries are open, providing education and there is no evidence that we should not do the same! Wake up and stand up for the kids and the families that you swore to protect!
7/21/2020 8:36:30	Micaeh	Tice		Wichita	We don't need to delay the start of school! Our kids need to be in school- socializing and learning. No masks, no plastic barriers, and no forced hand sanitizing with chemical products that kill good bacteria. Let the teachers that want to teach teach and let the parents that want to send their kids send them. Offer a virtual option for those (teachers and students) who don't want to be in the classroom. Viruses don't just "go away". Waiting a extra few weeks to start school does absolutely nothing to protect anyone. Let us make our own choice, INCLUDING staff and teachers.
7/21/2020 8:36:31	Katie	Korte		Lenexa Ks	In person school SHOULD NOT resume yet! It is dangerous and poses health risks to our kids, teachers, and families. Please uphold Gov Kelly's mandate to delay school!
7/21/2020 8:36:33	Allyson	Brumley	Myself	Tonganoxie	As a teacher I am being asked to start school on the planned schedule. This means if school does not start for students I do not have childcare for my school age kid. To pay for this is an unexpected expense In addition to the lack of available care. I want to be safe. I want my students to be safe. I want my children and coworkers to be safe. I know there are no good answers to this situation but I support not starting school until September.
7/21/2020 8:36:55	Petrina	Campbell	Parent	Hugoton	I would like to wait until after Labor Day so that schools have time to prepare and be safer for students, teachers and staff.
7/21/2020 8:36:58	Ruthann	Harris	UTW member/USD 259 Teacher	Wichita	I SUPPORT Governor Kelly's Executive Order to delay the start of the 2020-2021 school year.
7/21/2020 8:37:04	Nikole	Zegunis	Parent/teacher OLATHE DISTRICT	Lenexa	Please allow time for schools to open safely while allowing sports to continue for HS kids. Mental health is as important as Covid fears.
7/21/2020 8:37:25	Sherri	Nelson		Hiawatha	Yes stay closed and then get the kids to school! And masks are dumb! No one is going to be wearing the ones that actually filter the air and will also be touching their faces all day long!!! And teachers won't be able to be heard... I for one am a lip reader. Learned that during all of this when I can't see people's lips!!
7/21/2020 8:37:26	Sara	Turvey		Kechi	I appreciate that Governor Kelly is watching the numbers and realizing that schools across the state must take efforts to prevent the spread of disease during the pandemic. As a parent and a school district employee it is comforting to see common sense precautions made mandatory. It is also reasonable for the districts to need additional time to put these measures in place. Please vote in favor of delaying the start of school so we can keep kids safe.
7/21/2020 8:37:33	Richard	Johnsen		Republic	Follow the Governor's order. The safety of our children should be top priority, and I haven't heard a plan for keeping teachers and support staff safe.
7/21/2020 8:37:34	Yolanda	Reo		Auburn	Start school on time, bring back sports, let kids have a normal life, NO mask just wash hands. This is getting out of control.
7/21/2020 8:37:48	Miriam	Khan-Kitson		Hutchinson	By all means, please please please delay as long as possible.
7/21/2020 8:38:07	Josh	Lowrie	Oakley Middle School	Oakley, KS	Please do not allow the governor to require masks for K-12 students. I have no problem with temperature checks but masks are not a healthy answer.
7/21/2020 8:38:07	Jennifer	Traffis		Kansas City	I support Governor Kelly's Executive Order to delay the start of school. This will allow for the potential slow of cases to make it safer for our children and the staff to return to teaching in buildings. It also allows for the school districts to plan accordingly to best meet the needs of their students and families.
7/21/2020 8:38:19	Heather	Hanson	Blue Valley and Desoto Public Schools	Shawnee	I am a mother of 4 and a teacher. Forcing students, educators, support staff and other school personnel to go back to school in person during a pandemic is reckless and irresponsible. Virtual learning from home should be the only choice.
7/21/2020 8:38:21	Jill	Mateljan	Kckps	Shawnee	Do not open schools

7/21/2020 8:38:23	Debbie	Stull		Natoma Ks	Please, the children need to get back to school and some sort of normal. They need organized and structured daily routines. An education is the most important thing you can give a child. One size does not fit all in this situation. Please encourage board members to consider the School, Covid cases in Osborne country. ( and all others with a few to no cases of virus) My little community is almost gone and we can't afford to lose people, even to home schooling. We will surely shrivel and be done for good. For the good and the future of the children do the right thing.
7/21/2020 8:38:27	Elliott	Adams	adams4Kansas	goddard	I do not support the reopening of schools at their normal time of the year. I vote to DELAY!
7/21/2020 8:38:32	Amy	Rouse	Blue Valley	Overland Park	PLEASE accept Governor Kelly's request to delay the opening of schools until after Labor Day. As a teacher I am fearful to go back. I take care of my elderly parents and am afraid of what the exposure of being around 100+ students would cause my family. Please consider not only our students but just as importantly the staff. Last year I covered classes for teachers who could not get a substitute by doubling up my classroom. We cannot do that now. Are you prepared for sub shortages now? What is the plan if I am exposed to COVID-19? My classes? Do all 100+ students quarantine? Is online learning what is best for most students? No. However with the Covid numbers still rising yes online learning is what is best for EVERYONE! I not online pray you accept the delay but will start school online! Good luck with your decision and thank you for letting me share my voice!
7/21/2020 8:38:38	Mary	Nielsen	Self	Wichita	Please support Gov Kelly's executive order to delay the opening of Kansas schools until after Labor Day. This will give schools time to prepare fully to address all contingencies about the outbreak, for the safety of our children, their families, the teachers and other school staff, and our communities.
7/21/2020 8:38:51	Isidro	Marino	Kansas Democratic party	Garden city	I believe schools should not be opened until after Labor Day. I agree with Governor Kelly's decisions since she is probably the only leader Kansans feel like they can trust during this global pandemic and actually take action instead of standing by and watching our people die. If you vote to open schools back up before Labor Day you can expect hundreds of students in the Finney County area to not take their kids to school until it is safe so. Whether you vote for it or against it my younger siblings will not be attending in person whatsoever
7/21/2020 8:39:01	Meranda	Hoose		Horton	Please follow the Governor's guidance and delay school start till after Labor Day. Cases are still accelerating, rural areas are not following any medical recommendations, and schools do NOT have the ability to restart this school year on schedule safely at this point. My kids have special needs & IEP's & even if it causes regression, I want them, their teachers/staff/families to be safe! We do *not* have enough educators in this state to make it through in person schooling without strict adherence to medical advice at his point; please make thw best decision based on medical science and NOT political agendas!
7/21/2020 8:39:03	Britt	Lagemann	Parent	Olathe	Please vote to support the executive order. Support the safety and well-being of our children, their families, teachers, and staff.
7/21/2020 8:39:05	Kathy	Cooper		Basehor	Delay school opening
7/21/2020 8:39:10	Valerir	Mann	Parent	Kansas City, Kansas	I believe that learning should be virtual until the pandemic has reached a lower level.
7/21/2020 8:39:10	Lisa	Maziar		Lawrence	I have been working in education for over 20 years, first as a high school teacher, and currently as a Para. It frightened me when our roles grew to include being trained on how to handle a gunman, but that is nothing compared to the anxiety I am having about Covid19. I've read that students under 12 will not be required to wear a mask, and that 3 feet of space may be sufficient. I have also kept myself updated on the research around this virus. Three feet of space is NOT anywhere NEAR sufficient. Children over 10 are as contagious as adults, and children under 10 are about 50% as contagious. Imagine a scenario with just 15 unmasked students and one who is unknowingly sick. Research shows speaking in a normal tone just a few words can release airborne infected particulates that float around for 8-14 minutes. Will we be enforcing complete silence in our rooms? If not, the potential for mass infection is staring us in the face. I am over 50. My husband and son are both in high risk groups. I miss working face to face with kids. I LOVE my job, but it am not willing to risk lives over it.
7/21/2020 8:39:19	Katie	Salsbury	Maize USD 266	Wichita	Please leave politics out of your decision and do what you truly believe is best for our kids. Give our teachers the time and resources to do what needs to be done that is best for all involved.
7/21/2020 8:39:27	Jodie	Barnett	Bodyworx Health Care	Wichita.	No, it's unfounded that it should be delayed. With the data we need to focus on the at risk children and not expect children to mask and do it properly. The at risk teachers and students need to be at home and isolate.

7/21/2020 8:39:30	Mary B	Wright	USD 473	Junction City	We are not ready to start school safely. Our school district is struggling to get the necessary PPE equipment. If the State Board Of Education wants schools to open then they need to provide every school the necessary PPE for every student and staff plus the money to sustain it till this COVID thing is past us. Sports teams, Hollywood etc are providing the necessary PPE, quarantining everyone in one location to keep them from bring in COVID to others, and testing them daily. Educators and schools are expected to do everything on their own. Students and staff are expected to be the test group for everyone else. Our kids are our precious future. We need to protect them. SUPPORT GOV KELLY, she wants to keep our students and teachers safe.
7/21/2020 8:39:46	Siri	Campbell	Usd232	Lenexa	Delaying is fine until after Labor Day but please allow schools and students back to school
7/21/2020 8:39:51	Scarlett	Sherretts-Risley	Northwest Middle School	Overland Park	My students often don't have parents that are able to come get them when they are ill due to lack of transportation, so how will a student with a temperature safely get home? Our classes are 50 minutes long, so if students have to wash their hands every hour, it will be a huge disruption to the educational process. My students all receive a free lunch so I am uncertain about families being able to afford masks. Hallways will be a nightmare! How can you keep students 6 feet apart as they change classes? If we modify passing periods to reduce the number of students in the hallways, it will decrease our minutes of instruction, and our students lose out. Many of my students live with grandparents so I have a concern about them spreading COVID19 to them.
7/21/2020 8:39:55	Crystal	Plante	Teacher	Hill City	My county did not have our first case until July 4. It has quickly spread since then. At one point, we had over 100 in quarantine, mainly children, due to community Vacation Bible School. We need more time to reverse this trend. I beg you to please support the governor's order.
7/21/2020 8:39:55	Christy	Smith	I'm a parent	Saline county	Please delay the start of school for everyone's safety.
7/21/2020 8:39:57	Kristen	Stiles		Neosho County (Chanute)	Please reconsider opening the schools! Some of us are Paras and really can use the paycheck! Also look at what all has still been opened! Softball/Baseball travel leagues, tournaments, and regular ball! Cheer Camps. Church Camps. Summer School! And lots of other things! I understand the social distancing but surely we could figure out a way! Besides the fact of the kids that need the school time. That is their way out of maybe an abusive family member or maybe they need the meals cause some parents can't afford a lot!
7/21/2020 8:39:57	Ashley	Sanem		Olathe	Do not delay the opening of schools and make us go into June of 2021. Instead, have us start online on Aug 13th and move to in person school when it is safe. Please. Thank you.
7/21/2020 8:40:01	Morgan	Gottesburen		Lawrence	I support the EO keeping schools closed until AT LEAST Labor Day and support them remaining closed as long as it is deemed necessary by the scientific community.
7/21/2020 8:40:02	Grant	Adams	My family	Overland Park	I have been very disappointed with the way the State and County have handled the school reopening process and the current proposal to delay school an additional three weeks after Labor Day has to be one of the worst decisions I have heard of thus far! They say it's to give schools more time to prepare yet we have been dealing with this Pandemic since March. I see teachers complaining about the safety aspects of having kids back in school yet I see them posting pictures of them and their kids not wearing masks and hanging out in large groups while not socially distancing as suggested by the CDC! This is a dangerous standard we are setting with our children's education at risk and neither me nor my wife know what else to do other than keeping our kids in our Daycare Kindergarten program as they seem capable of continuing to educate our kids while maintaining the CDC safety standards. Instead of defunding the police maybe we should defund our public school system so parents like ourselves can absorb these additional costs??
7/21/2020 8:40:02	Bradley	Davis	Kansas City Kansas Public Schools	Kansas City	Opening schools will result in mass death and sickness among staff members, students, and their families. It is impossible to socially distance and protect against infection in a school building, period. KSDE will have blood on its hands if they attempt to open schools while the community spread of the virus is still so out of control. This pandemic also disproportionately affects people of color and people of low socioeconomic status, categories in which the majority of the students and families in my school's community fall. Forcing schools open would further impact the people within these demographics, which, in my opinion, constitutes racist and classist violence. It is an open attack upon these groups of people. As a result, I will not hesitate to participate in whatever collective action, up to and including striking, is necessary to protect the lives of my students, their families, and my colleagues, if KSDE cannot guarantee their safety by postponing the start of in-person schooling until the spread of the virus allows schools to open safely.

7/21/2020 8:40:13	Makenzie	LaGue		Lawrence	Please uphold the governors order to delay the start of school until September 8. This is the most appropriate course of action to ensure the safety of our students and teachers.
7/21/2020 8:40:15	Heather	Merino	Teacher and Parent	Springhill	I feel very strongly as a teacher and a parent that schools should not open till after Labor to be able to give the schools more time to prepare and also to watch and see if all of the cases of Covid in Kansas start going down.
7/21/2020 8:40:25	Andrea	Slagle-Abrams		Manhattan	I urge you to pass Governor Kelly's recommendation to keep schools closed until after Labor Day. School districts need more time to come up with a safe plan for our students and staff. This needs to be done for the safety and health of everyone.
7/21/2020 8:40:26	Robin	Miller	KCKPS (As a teacher)/BV Public Schools (as a parent)	Johnson County	Between three people in my family, we have diabetes, asthma, and autoimmune disease. Politicians and scientists both acknowledge the risk for meeting in groups, especially within enclosed spaces at this time. In this attempt to make learning "top" priority, what will happen when my daughter is without her parents? Or when her parents are spending weeks in a hospital? Is the (slight) benefit with in class instruction going to be worth THAT? Dear Board members,
7/21/2020 8:40:29	Nicole	Conner	Myself and my family	Shawnee	I write today to implore you to stand by Governor Kelly's proposal to postpone the start of school and/or implement virtual learning. Teachers and children are counting on you to do what you can reasonably do to keep them safe.  As Kansas City is currently a "hot-spot", it simply doesn't seem prudent or reasonable to open our schools in-person right now. Hopefully, the addition of the mask order will help get our numbers under control. Until that time, I support a delayed start and/or virtual learning. In my opinion, we either start virtual or push back the start of school until the requirements for phase three are reached in our locale under the federal guidelines. We must rely on facts and take care to prioritize safety over inconvenienced parents.  On a more personal note, my daughter Adison will be entering Kindergarten at Clear Creek this fall. We moved to this neighborhood expressly because the schools are so wonderful. I mourn that her introduction to public school will be "strange" no matter what happens. While I was initially concerned about what learning virtually would mean for her social skills, it occurred to me last night to consider what attending in person would mean for her social skills. What will the long-term effects be of having to stay at least 6 feet away from everyone around you on a 5 or 6-year-old? Of washing your hands every hour? What will the effects on their speech development and emotional/nonverbal queuing be when they can't see the full expressions and formation of words on their peer or teacher faces due to masks? What would it be like to explain to my Kindergartner that a peer or teacher is seriously ill or, God forbid, dies? As I consider these points, it just seems irresponsible to send children back in person at this time.  I don't envy your position as a board member, and I certainly appreciate your willingness to listen. Please vote to act prudently and follow Governor Kelly's mandates as she presents them. At the very least, please provide virtual options so that those who share my concerns have appropriate alternatives.  Thank you again for all you do,
7/21/2020 8:40:32	Mickey	Bogart	Educator	Manhattan	Please uphold the Governors order to delay school openings until after Labor Day to give Local School Boards the time needed to plan for safety of students, faculty and staff. Please make this about the health and safety of all and NOT a political ( Conservative Republican) issue.
7/21/2020 8:40:35	Robin	Baker		Oakley, Kansas	I feel masks in school is going to take away from children getting an education. Anyone with children should know this is common sense that they will be messing with their masks way more than paying attention in class. Also, starting school later does the kids no good at all. Especially out here in western Kansas where we have very MINIMAL cases of Covid19. The Governor is being absolutely ridiculous with all of these rules. We have kept schools open, without requiring masks, for how many years with influenza being spread every single fall/winter?? Quit letting the media scare you, Covid 19 has a very high survival rate!! Don't let the media or governor take away our children's education that they deserve! Start school at regular times in August and no masks required!
7/21/2020 8:40:36	Jennifer	Gay		Lawrence	Kansas

7/21/2020 8:40:36	Michelle	Johnson		Olathe	PLEASE for the safety of our children and teachers postpone until after Labor Day! Thank you!
7/21/2020 8:40:39	Stacie	Steong		Pratt	Please allow control to be given to local districts. One size fits all just doesn't make sense here and quite frankly isn't fair. 1A-6A is very different and can't be under the same restrictions. I completely understand why larger schools or unplanned schools need this extra time, but we were ready and had a good adjusting plan depending on our numbers. Not letting a school start educating in a low case area because there are large case numbers hundreds of miles away in a large school area, is like closing every lake in the state because 1 or 2 have confirmed blue-green algae in them. Instead we watch and change recommendations as needed. This along with study after study coming out that children are actually a break from the virus and very very low rate of transmission to one another and adults. I also know many, many families that will be homeschooling if their children are forced to wear masks all day, not only is that detrimental to their mental health but will be a contributing factor of why they get sick with a hundred other things besides Covid. Please quit sacrificing our children. The narrative doesn't fit justifying these mandates!!!
7/21/2020 8:40:43	Donna	Maskil	Self	Bonner Springs	Support Governor Kelly's plan for re-opening schools. As a grandparent, I want my grandchildren to be safe. We can always bring them up to speed educationally but we can't bring them or those they come in contact with back to life. Quit playing politics with our lives!! Governor Kelly has done a great job in leading Kansas during the pandemic despite the ridiculous antics and interference by Wagle and her cronies .
7/21/2020 8:40:47	Susan	Wellman		Hutchinson	I am in support of being cautious and keeping our students and teachers safe. I have two parents that are both teachers along with medical conditions they put them at a higher risk of complications from Corona Virus. While I want our students to not have their education interrupted, keeping them safe and healthy is the top priority. Delaying the start of school is essential while we are still seeing the worst of this pandemic.
7/21/2020 8:40:48	Jonathan	Hein	Self	Lawrence	No child or teacher should die because school reopened without a strong plan in place with adequate PPE. Children deserve better than to be lab rats. Until we have 2 straight weeks of decline in Covid19 cases keep schools closed
7/21/2020 8:40:50	Tim	Plante	Parent	Hill City	No school or sports until after Labor Day
7/21/2020 8:40:51	William	England		Overland Park	Delayed start - or online only, especially in Johnson and Wyandotte counties - is a good idea. I support, and ask you to support a later start to allow the current peak in cases to decrease.
7/21/2020 8:40:56	Brenna	Hipsher		Olathe	I support the Governor's order to keep schools closed until after Labor Day. The pandemic is nowhere near under control, and children, especially young ones, cannot be expected to socially distance in their current school facilities. Furthermore, it is common for both students and teachers, especially in Pre-K and elementary settings, to get sick at the beginning of the year. I certainly do not want to see the "first day plague" be COVID19, especially when my asthmatic mother is a Pre-K teacher for the Olathe district and my youngest sister is in her senior year of high school in Olathe.
7/21/2020 8:41:06	Krista	Holcomb		Liberal	I am okay with schools starting after Labor Day. However, I am NOT okay if they keep pushing it back. We have got to get kids in school. Also, my 6 year old kindergarten student cannot wear a mask! This is something we should not even have to deal with
7/21/2020 8:41:12	Linda	Featherston	myself	Overland Park	I support the governor's order to delay the start of schools. Our COVID numbers are out of control and we need time for the public to take responsibility and get things under control. Additionally, schools need more time to obtain supplies to make classrooms safer and develop fully formed virtual learning plans.
7/21/2020 8:41:20	Nikole	Zegunis	Teacher/coach/mom/parent	Lenexa	Please take some time to analyze the COVID data among children and weigh the very slim risk of a COVID death to young people against all of the resulting complications created for our children when they are not being educated in person (academic, physical and social). If I can get my teeth cleaned in a safe manner, then teachers can protect themselves in a classroom. These kids were forced to stay home for two months this Spring and now are socializing and cross contaminating in club sports, HOA pools and each other's basements. If they are already sharing space outside of school in mass numbers, and the mortality rate is near nothing, the decision to education them in person should be straightforward. Bear in mind that school districts have online-only options for anyone who is concerned or compromised. Please give parents the opportunity to take informed risk and decide whether or not to send our children to school in person. Give us a choice.
7/21/2020 8:41:22	Jacquelyn	Hancock		Leawood	I support Governor Kelly's order to push back the school start date. Cases are rising in Johnson County and we need to keep our kids and our teachers safe until we can get this under control.

7/21/2020 8:41:22	Lyle	Sobba	Personal	Garden City	<p>No one wants to go back to school worse than I. As a band Director, I want to see my kids and rehearse. I want to travel across the state for band competitions. I want to see the joy in their faces when they've achieved something they didn't think was possible.</p> <p>As a realist I understand it is not safe for students, teachers, or families to return to school at this time. The numbers are not encouraging long-term. And while I quite literally cannot teach what I teach virtually as large group rehearsals are not a possibility in an online setting, I will gladly continue redesigning my curriculum to keep people safe.</p> <p>It seems to me we have two options as schools, to remain shuttered, or to open. My fear as we open is schools become the next driver of the infection. If everyone who interacts with Garden City High School were to contract COVID-19, and the current rate for mortality were followed Somewhere around 40 people could perish.</p> <p>I urge the state school board to err on the side of caution. I understand it is not popular with all. But if we err in the side of caution and the scientists are wrong, then no one has died, no one has gotten sick, no one has contracted the virus due to our schools. Should our schools lean the other way and the scientists are correct, we lose life, we hand students and families a lifetime of scars from coronavirus.</p> <p>Please take the steps needed to protect our students, our families, our staff members by shuttering schools until we have a vaccination. To all members of the board, thank you for your time and thank you for reading through my full comment.</p>
7/21/2020 8:41:21	Griff	Hawkinson	Myself	McPherson	<p>Dear Board Members,</p> <p>You simply cannot require K-5 students to wear masks while in school. I also seriously doubt the value of masks worn by 6-12 students. They will interfere with learning and have negative psychological impacts on the kids far more than any hoped for mitigation of virus spread.</p> <p>Respectfully submitted,</p> <p>Griff Hawkinson</p>
7/21/2020 8:41:26	Joetta	Glessner	Manhattan High School	Manhattan	<p>Absolutely not! Delaying the inevitable is no way to run a school district or state. These kids need to be in school. Not only for educational purposes but for some children the ability to have a safe place to go. So many of these kids voices go unheard. My child is more than happy to wear a mask and follows all of the CDC rules and state mandates if it means she can be back on a schedule and with her friends and teachers.</p>
7/21/2020 8:41:38	Erica	Burns		Wichita	<p>Please keep the schools closed till after Labor Day. If you really have the children's interest at heart, you won't risk their lives or the lives of our educators to please those that don't agree. Delaying school a couple of weeks may not seem like a lot but it could make a huge difference. Our children's lives should not be used as a political pawns. Economic recovery shouldn't be placed solely on our teachers. Do the right thing.</p>
7/21/2020 8:41:43	Megan	Johnson	USD	Pittsburg	<p>I support the delay. The safety of students and staff, as well as the larger communities they live in, should be paramount. Schools will be epicenters of outbreaks. It is not right to ask teachers like myself to be society's sacrificial lambs.</p>
7/21/2020 8:41:51	Kevin	Edwards	Kansas City Kansas School District	Kansas City	<p>How will everything get disinfected each time students come in room? Passing period are 4-5 minutes. Teachers are required to be in hallways moving students to class. How will this disinfectant work on technology? Will the state provide funds to continue use purchasing supplies to replace those broken because of the constant cleaning? When will the state politicians stop playing politics with something so serious? Will they come and take over the classes they seem to know so much about but are ignorant as hell about the reality? How will masks and social distancing be enforced for those who act like the selfish adults refusing to think of others? There are too many questions to pose, especially to politicians that will think only of themselves and supporting their party, not the safety of students and teachers.</p>
7/21/2020 8:41:52	Barbara	Holmes	Teachers	Wichita KS, state BOE district 10	<p>I definitely think we should delay the start of the school year.</p>

7/21/2020 8:41:52	Angela	Montoy		Ellsworth	Please keep our kids and school staff safe. We are in the middle of a pandemic. Rules are out the window. We are dealing with new circumstances. No one is safe right now. 3 weeks isn't going to hurt anyone. It should be longer. Please approve the extension. It's not worth sickness or worse death.
7/21/2020 8:42:03	Brittney	Johnson	Parent	Colby	I don't feel there is any need to delay the start of school. The kids have already missed 2 months of being in school this year, while in our county, 0 cases were reported during that entire time. These rules should not be state wide - they should be decided by county. Our situation is much different than those in Wichita, Kansas City, Dodge City, etc. The mask mandate is much worse, in my opinion, and will cause many families to home school. You will be losing lots of numbers this year in the public school system.
7/21/2020 8:42:11	Brenna	Scott		Topeka	Students need to be in the classroom and school shouldn't be delayed. Three weeks of NO learning is not acceptable.
7/21/2020 8:42:20	Rebekah	Alexander	Wellington Middle school	Wellington	Please delay the start of school to after Labor Day in hopes that mask mandates will assist in lowering the amount of active spread in our communities. Being a rural community, we are just now seeing the active community spread that has ravaged higher population centers across the nation. This is not the time to expose our students, district staff, and resulting families to a virus that we still know so little about. Thank you so much for the compassion and care you have dedicated to our schools during this unprecedented time of uncertainty.
7/21/2020 8:42:20	Amy	Gilbertson	Parent of Elementary/Middle School Students	Gardner	I fully support delaying the beginning of school until after Labor Day. The additional time would allow us time to evaluate the learning options provided by our School Districts and our school districts to find additional PPE to keep our in-person returning students. Right now, with the unknown nature of so many components of the virus, I do not see the need to rush back to returning some of our most vulnerable citizens and their extended families to such large, daily gatherings.
7/21/2020 8:42:22	Tena	Stoppel		Wichita	I believe it's important to get "on top" of the COVID spread throughout our state before sending our children back to school. The opening of schools should be delayed and re-evaluated after Labor Day. The sooner all of our residents start doing their part by wearing masks the sooner our children can return to school.
7/21/2020 8:42:28	Leah	Stotts	family	Derby	Please approve the executive order delaying school until after Labor Day. Students need to learn in a safe environment. The best way for that to happen is to give the district time to gather supplies and allow teachers to organize their classrooms and prepare effective lessons to be safe for our students. The top priority for the 2020-2021 school year should be safety. The orders presented on Monday make our schools safe.
7/21/2020 8:42:35	Somer	Van Pelt	Parent	McPherson	Delay!
7/21/2020 8:42:40	Kate	Roth		Olathe	As a Kansas parent, I support governor Kelly's decision to delay the start of school. Please vote to uphold this order. I would like to see COVID 19 numbers trending down before children and teachers start school in person this fall.
7/21/2020 8:42:42	Quentin	Meyers	Parent	Plainville	Please think beyond your own fears and into the reality of the strength these children have. They have been together all summer without masks in closed and open environments and successfully avoided the spread. Not to mention every daycare in the state has no restrictions whatsoever. Common sense wins out here if we allow it to work. One person should never be able to dictate to an entire state how to think or act.
7/21/2020 8:42:44	Lucinda	Kuhn	I am a social worker employed in the Catholic schools	Lenexa	I believe delaying the start of school would benefit students and teachers and INCREASE the likelihood of in person classes taking place successfully. Teachers are unpaid and not under contract during the summer. Allowing them to come back without students for a few weeks would allow them to prepare for in person school, remote learning, or a hybrid of the two. Asking teachers to prepare now while they are not being paid is unfair. Bringing them in to buildings to collaborate and plan will decrease their anxiety and increase their sense of well being. Teachers are amazingly hard working professionals. They should be able to plan for this unprecedented year and they should be paid to do so. I know that some districts have few cases and aren't as impacted by Covid-19, but starting after Labor Day will also increase the chances that their community will continue to have low infection numbers and will not significantly impact the school year for them. Thank you for an opportunity to share.
7/21/2020 8:42:45	Cassidy	Maples	N/A	Salina	Please support Governor Kelly's plans to delay the opening of school! This gives time to ensure schools are prepared.
7/21/2020 8:42:57	Kimberly	Chambers	Parent of K-12 student in Kansas, BVSU High School	Overland Park	Please allow our students to return to in-person school with the original start date of August 12th. There are other options available for parents and students who are not comfortable returning to a live classroom and building in mid August.

7/21/2020 8:43:02	Melanie	Ohlson	Ohlson family	ottawa county	Kansas students are failing behind in education and socialization. We are oozing valuable time in the classroom and in extracurricular activities. These years cannot be replaced. We have to stop living in fear of a virus whis risk has been blown out of proportion.
7/21/2020 8:43:05	Gary	Hageman	None	1511 SW Birch Ln, Topeka, KS 66615	I support Gov. Kelly's proposals to keep our children safe in school.
7/21/2020 8:43:11	Conor	Goodness		East Wichita	Opening schools is dangerous for students, staff, family, and the city. It should be handled with extreme caution. The extra time is necessary to prepare. In-person schooling should definitely be postponed, if offered at all. Ideal would be online only.
7/21/2020 8:43:13	Gretchen	McGraw	Blue valley parent	Overland Park	Please allow our kids to resume in person school for the 2020-2021 year. The teachers and education they receive in person can't be replicated at home. As a single working mom it is also difficult for me to create the time and learning environment needed for home school. Thank you.
7/21/2020 8:43:13	Jennifer	Nolan	Kansas parents	Dodge City	I support Governor Kelly's mandate on science backed safety. I support mandated masks, cleaning and social distancing as well as the late start date if needed to prepare.
7/21/2020 8:43:16	Cynthia	Carr	Public School Employee - USD 257- Iola	LaHarpe	I support Governor Kelly's Executive Order delaying the opening of schools until after Labor Day. Given the current circumstances, and all of the unknowns that we may be facing in the future, I believe that our schools, with some additional planning, can put together a plan that will provide us with several options as we move through the school year. With such a plan in place, we can navigate smoothly through the school year, making adjustments as needed, rather than close our schools and try to devise another plan.
7/21/2020 8:43:28	Tiffany	Riffel		Salina	I don't believe this is beinifical to continue to have our children out of school. This is not good for not only their learning but their social development that is needed. We may possibly start to create more mental health among our younger generation as well. We need to allow this children back in school they need some sense of normal in their lives.
7/21/2020 8:43:29	Nickie	Lee		Overland Park	I support the proposed delay of school starting until after Labor Day.
7/21/2020 8:43:37	Diana	Evans		Wichita	I support Gov. Kelly's decision to delay the start of school until after Labor Day. Your vote to support her decision is a vote to show concern for kids, their families, teachers, and support staff in the schools.
7/21/2020 8:43:46	Sandra	Ifland	I support Governor Kelly in postponing school until after Labor Day. Please don't use our children & teachers as a testing project	Junction City	Follow Governor's guide lines
7/21/2020 8:43:54	Kendra	Mitts	Special needs parents and regular parents in Olathe District	Olathe	We need to keep with the delay. It's not going to harm our kids but it could help protect our kids and staff. We haven't even had registration. How will the schools have enough time from registrations to start date if we do not delay. It's not safe for our children, teachers, and staff. My special needs child needs OT, Speech, and one on one para. There is no way for them to social distance. Especially if my son needs to be restrained which happens every other day. I am immune compromise. My kids need a mother to raise them not a mother dead.

7/21/2020 8:43:55	Jeana	Mayfield	Douglass USD 396, Douglass, KS	El Dorado, KS	<p>I support Governor Kelly's proposal to extend the start of the school year to after Labor Day for adequate planning in this current public health crisis. I appreciate the fact that she has shown true leadership, has followed the science and data and has made smart, non-political decisions for public and school safety up to this point. Honestly, we are foolish to think we can safely enter school buildings any time soon when many members of the public refuse to follow public health guidelines, such as wearing masks. They call this intrusive virus a "hoax", a "plandemic", and ignore science. In WWII, I believe companies provided child care so women could build necessary products to fight the war. I am not a "child-care" provider, I am a teacher. I will not put myself in a position to contract this virus. There are doctors and nurses, who are well-trained in the proper use of PPE, who have contracted this virus and have or are experiencing varying degrees of impact from it. They barely have adequate PPE for their purposes. How in the world can employees and students be adequately protected?! I've learned enough about this virus and its spread to know it's foolish to think we can congregate in school buildings in any fashion in the near future and not start an outbreak in our respective communities. It's all just "happy talk" to suggest otherwise. We'll be the next nursing home, meat-processing plant, church, funeral gathering, Logan, etc. As I understand it, Kansas is a "1 to 1" state in technology provisions for students. Let's use it and stay safe!!</p> <p>I appreciate the opportunity to share my thoughts on this issue. I appreciate your leadership on this issue and please know I do appreciate how challenging your jobs must be for you at this time.</p> <p>Sincerely, Jeana Mayfield</p>
7/21/2020 8:43:59	Megan	Cicero		Prairie Village, KS	I fully support the delayed starting of the 2020-21 School Year. This gives our school districts and our teachers more time to ensure a safe and effective plan is in place for reopening. Thank you.
7/21/2020 8:44:00	Jesse	Lobbs		Lenexa	Gov Kelly is absolutely doing the right thing. It is dangerous to send our children back to school without the guarantee of safety as prescribed by medical professionals. this is doubly true for teachers, many of whom are older and in higher risk populations.
7/21/2020 8:44:07	Lindsay	Weiss		Overland Park	I believe we should delay the start of the school year for in-person classes, but allow districts to begin as planned in a virtual manner if they choose.
7/21/2020 8:44:09	Valerie	Brown-Kuchera		Quinter	I hope we can begin the year (even if that start is a bit later than usual) and stay in school, avoiding a shut down. If delaying a couple weeks means we can have better protocols in place, I certainly support the decision. A solid plan, adequate funding to implement that plan, and prepared personnel will go a long way toward ensuring safety for everyone in our schools.
7/21/2020 8:44:13	Hannah	Burns		Gardner	I absolutely think delaying in person school is a good call. I even worry that starting in person late will be unsafe. If the decision to start late is overturned, I urge you to consider online instead of in person or at least a hybrid model. There is no way school can safely operate as usual even with masks.
7/21/2020 8:44:14	Jeffrey	Watson	Citizen	Wamego	As a former school administrator, I worry about all those involved in having school and their families at home. I believe the extra time to plan effectively to open schools in some type of way gives all communities the opportunity to educate and protect its citizens. Politics should not have a voice in this. The extra weeks gives us a chance. Please consider this for the good of all Thank you
7/21/2020 8:44:14	Stacy	Rezac		Onaga	It's only about 2weeks later than it would normally start. Give the districts and teachers a couple more weeks to get this figured out and be fully prepared to welcome back students safely!
7/21/2020 8:44:16	Katie	Taber	Usd232	Shawnee	Please give the extra time for teachers and staff to make sure our kids can return safely! Let us watch other states open and adjust to their failures. 3 weeks could save lives!
7/21/2020 8:44:17	Mary	Coplen		Hutchinson	As a retired teacher I strongly encourage the KSBE delay the start on the 2020 academic school year until after Labor Day. I have examined the strengths and weaknesses of Governor Kelly's plan and have read the recommendations of the KNEA President Farr, who articulates extremely well in support of the delay. Please vote to support the Governor's recommendation. She has the best interest of all citizens and recognizes possible increase of COVID-19 cases and deaths if we open too early. Thank you!

7/21/2020 8:44:21	Caitlin	Schwanke	educator	Topeka	Please vote to AFFIRM EO 20-58. Between local politics and people with their heads in the sand, we can't count on our districts to keep us safe. We have seen with the mask mandate that when it was made "optional," people didn't follow it, or not as thoroughly, and cases have been rising ever since. We can't take that risk with our schools. We need the extra time to prepare for the changes in schools as well as to get our out-of-control cases down across the state. We need a statewide order to protect EVERYONE, including those who cross district and county lines every day.
7/21/2020 8:44:23	Patricia	Hileman	Parent	Wichita	Please give local School Boards the support to make the best decisions for their locations. Please do not affirm the EO, but instead encourage schools to take time if their disease rates and hospitalization rates justify it.
7/21/2020 8:44:27	Ashley	Washington	KCKPS USD #500	Kansas City	PLEASE delay the 20-21 K-12 school year.
7/21/2020 8:44:32	Gretchen	Aerni	substitute teacher and parent	Shawnee KS	Please delay opening to give KS- 1. Time to get the # of cases under control. 2. Time to plan for all the scenarios if students, teachers, staff contract the disease. Thank you for listening! Let's stay safe!!
7/21/2020 8:44:32	Jen	Koerner	Kansas educator and parent	Gardner, KS	Please vote to keep our educators and children safe by supporting Laura Kelly's decision to postpone the start of the school year. Governor Kelly clearly supports science and has made solid decisions to keep our communities safe. Please continue to support her leadership. We are incredibly lucky to have her.
7/21/2020 8:44:40	Julie	Serati	Blue Valley School District	Overland Park	It's time for children to return to class, in person! Our governor closed school state wide in March with few or no cases of COVID-19 in many counties. Now delaying school seems to be more fear mongering. Our children need normalcy, in person education, socialization, and mental stability. Delaying the opening of school only prolongs a fear of the unknown. Governor Kelly presented a plan for schools to reopen in May. It's time to implement that plan. We've done due diligence, closed schools, shut down the economy, and flattened the curve. Of course there are more positive cases now. We are open and trying to function normally and more people are being tested. This virus isn't going away anytime soon, but it's time to get back to living. I feel that continuing to delay the opening of schools is far more detrimental than the virus. Our kids need this, our economy needs this! If school does not reopen, I will not be able to work and do the job that is expected of me because I will need to be teaching my children. Delaying the opening of schools impacts every facet of life and our economy. I appreciate the opportunity to voice my concerns and I hope you will thoughtfully consider the long term harm keeping schools closed will cause. Thank you
7/21/2020 8:44:42	Season	Schwind	myself and my children	Wichita	Please allow children to go to school without wearing masks. This is a huge physical and mental distraction. Do your own research on the CDC site and you will find the virus is not nearly as bad as the media is telling people, especially for school age children. Listen to the parents and students. I haven't found one parent in my large circle of friends, neighbors and church who has had or knows someone who has had the virus. And all of these parents do not want their kids wearing masks. Quit listening to scary numbers and do what the parents want or you are going to lose excellent students in the public schools. We will send our kids to private schools where they are taught to think on their own. Thank you for your consideration and please make the right decision for our kids in the long run, not just to appease those who are scared in the short term. If scared, do online school. If you can think for yourself and are comfortable sending your kids without restrictions, go to school. Thank you.
7/21/2020 8:44:42	Ruth	Wise		Emporia	Please support governor Kelly in her effort to delay school starting until after Labor Day.
7/21/2020 8:44:46	Dianna	Stenzel	Myself - I am a school counselor	Shawnee	Please vote to uphold the Governor's order!! I do not believe schools have an adequate plan to address social distancing in schools and other means of infection control. Infection rates are high and going up. Protect our students and staff!!
7/21/2020 8:44:49	Lisa	Otter	Self (parent)	Newton	Uphold Gov. Kelly's executive order! It is based on scientific data. The COVID numbers in Harvey County are increasing, as are the number of cases in youth ages 10-19. Delaying the start of school allows for a potential decline in COVID numbers AND time for schools to make necessary adaptations to keep students and staff safe.

7/21/2020 8:44:56	Sally	Ledford	A citizen	Wichita. Grandkids in Andover	I agree with school delay til sept 9. That would be the safest & smart thing to do. Grandparents play a role in schools as well - taking & picking up the kids after school & staying with them until parents get home. We don't need kids getting sick & missing more learning & grandparents getting sick. Just approve it.
7/21/2020 8:44:59	Carrie	Littrell		Clay Center	Please support the governor. Covid cases continue to rise.
7/21/2020 8:45:00	Connie	Coleman	Teacher....USD 253	Emporia	I'm an elementary teacher in Emporia getting ready to start my 27th year of teaching and I have had a lot of anxiety about starting school face to face because elementary students have a hard time social distancing and they tend to spread germs pretty easily. I know how important it is for students to get back into a school environment but I have a lot of fear for my own health as well as for the health of my colleagues and students, especially since the virus cases continue to rise. I'm asking you to support Governor Kelly's executive order to start school after Labor Day so that we can have time to make a plan that will best help our students academically, social/emotionally and with good safety and health procedures that will protect everyone involved in a school setting. We, as educators, need this extra time to prepare and hopefully by September we can start to see a decline in the case numbers. Thank you for your time and I hope you vote to do the right thing for Kansas schools to keep us safe.
7/21/2020 8:45:04	Kimberly	Dennis		Wichita	Opening should be delayed due to the increasing number of coronavirus cases. The few extra weeks will allow us to better access situation that our children face.
7/21/2020 8:45:07	Jana	Deters	Basehor Linwood	Basehor	Please open schools on time! My children, I have 4 in the Basehor Linwood School District, have been out of school since March 6th. They did not do well being home schooled and are missing the daily interactions with friends and classmates. My kids mental health is just as important. As a future teacher, it is imperative these kids are in the classroom learning. Education is essential to the well being of these kids. We have played competitive ball all summer and everyone is fine! They need to go back to School... unmasked!!! Please, I ask you to think about this. Laura Kelly does not have the best interest of our kids in mind, she has made that clear time and time again. Don't make this a political statement with our kids caught in the middle. Enough damage has been done! Let them go back to school!!!! I will say it again, in classroom learning is essential.
7/21/2020 8:45:08	Rita	Wood	Parents	Leavenworth	I agree with Governor Kelly
7/21/2020 8:45:11	Ashley	Hampel		Pratt	School should not open for in person school until the numbers go back down.
7/21/2020 8:45:14	barbara	gingrich		Wichita	I support Gov Kelly's executive order to delay the start of school until after Labor Day. At that time, I hope the order will be extended if warranted (we haven't seen significant decrease)
7/21/2020 8:45:15	Patrick	Koerner	Kansas school parent	Gardner, KS	Please vote to keep our educators and children safe by supporting Laura Kelly's decision to postpone the start of the school year.
7/21/2020 8:45:18	Jessica	Humphries-Winfrey		Andover	I'm writing to ask that you vote to support the Governor's order to close schools until Sept. 9th on Wednesday. As a 259 employee and parent of two elementary school-aged children, I do not feel it is safe to open schools while our state is experiencing a virus surge. While the virus may generally have mild effects on most small children (although there are exceptions to this) our teachers, bus drivers, administrators, custodians, and many other adults who come into contact with literally dozens, if not hundreds of children every day, will be put at unnecessary risk. It's estimated that over 20% of our nation's teachers are at greater than average risk due to underlying health conditions. In addition, reopening schools will contribute to community spread, which is already increasing in our state. I urge you to support the Governor's order to delay schools until school can be opened safely. Thank you, Jessica Humphries-Winfrey
7/21/2020 8:45:19	Dustin	Hawks	USD210	Hugoton	Sent from my iPhone
7/21/2020 8:45:23	Ashley	Floberg		Topeka	Do not post pone school and no mask in school as it will only be a distraction to the younger ages
7/21/2020 8:45:23	Ashley	Floberg		Topeka	Dont start school until after Labor Day. It allows plenty of time to hopefully get numbers after the mask orders
7/21/2020 8:45:35	Rhianna	Nelson		Manhattan	I am a teacher and after school program Director. Please start us on time. With the mask mandate and other KSDE recommendations, we will be able to start school as normal In-person in our town, safely.

7/21/2020 8:45:34	Ryan	King	Parent, Teacher, & Coach	Conway Springs	I am backing Governor Kelly's mandates as a minimum. As a parent who teaches in the same building that my kids attend, I am seriously considering a online option out of district. I don't get the perception that my district will do enough or allow for enough flexibility. I am a teacher in district and have not even been communicated with about options that we could be doing. All we have been told is the superintendent and the BOE is working on a plan. None of which will be out and around the # of students that teachers will or will foresee issues that are unique to each positions situation. I am very concerned because I come in contact with over 180 students daily, I seriously doubt this is going to be addressed and know that I have not been contacted about any change how this will be corrected. Thank you for allowing me to voice my opinion
7/21/2020 8:45:36	Devon	Bernica		Olathe	Accept
7/21/2020 8:45:50	Michelle	DeWeese		Topeka	These kids need to start school on time, their lives have been turned upside down by all of this and they need that consistency that school brings to them. They need to have the daily interactions with their teachers and their classmates, they need to have their activities that give them that reason to do well in school. The schools have been working very hard and have things in place for them to come back, at least give them the option to start on time. I have faith in my school to make sure our kids and teachers will be in the best environment they can be in this situation. Please give these kids a chance to flourish again and not be at home for another 3 weeks, they and the schools are ready for school.
7/21/2020 8:45:51	Ryan	Wiehl		Spring Hill	I agree with Governor Kelly's EO delaying school openings in Kansas.
7/21/2020 8:46:03	Traci	Crow		Pratt	We need to stop fearing something that's never going away! Look at this from outside of the box because we need a different perspective on health. We need to be proactive in our actions by helping everyone build better immune responses with diet & exercise. Viruses will never go away for us to see because if they do then we will be gone also. Our kids need life again! Our kids deserve better then this! We are teaching them to hate others because of how they feel on something. The very thing our fore fathers worked so hard to push out. This is nothing but discriminating against healthy individuals! Move it from one thing to another. This is discrimination. Our district has worked hard to get a great plan in place. Let's move forward with school!!!!
7/21/2020 8:46:04	Karen	Arokiasamy		Overland Park	I strongly support Executive Order 20-58. We have already been asking for the impossible from our educators for years - as we put the burden of feeding, sheltering, parenting, emotionally supporting, etc, etc on our education system - and now we are asking even more, with the threat of reduced funding and the enormous health risk to teachers, staff and administrators. It's RECKLESS AND CALLOUS to send our students and teachers back when covid cases have not dropped or even stabilized. Cases and numbers are PEOPLE - sons, daughters, mothers, grandpas. I do not support ill-advised decisions in support of the economy with flippant comments like that of the Missouri Governor about children getting covid and getting over it. What a privilege it must be to say such a thing when you've put federal funding toward TOURISM in the time of a pandemic. Thank goodness for Governor Kelly and this order. She is listening to science and medical experts and the BoE should UNANIMOUSLY support the order. Full stop.
7/21/2020 8:46:18	Kristi	Loftus	Olathe USD 233	Olathe	Please follow Govenor Kelly's tilling. Delay start of schools!

7/21/2020 8:46:20	Anna	Hamilton		Leawood	I am a rising junior at Blue Valley North High School. Throughout the governor's press conference regarding her executive orders, she claims that she cannot, in good conscience, open schools in mid August this year. On the contrary, how can the Board of Education, in good conscience, make the decision to continue jeopardizing the education of Kansas students. The decision to eliminate, in essence, an entire month from the school year would have significant implications on the amount of material that students are able to learn in the academic year. I am a student with a rigorous schedule, filled with 6 AP classes out of my 7 class schedule. Each of my classes are so content heavy, that missing even a week of those classes means missing a piece of it that we cannot get back, due to the tight schedule we must keep in order to get through all of our content before the AP exams in early May. I feel that with online learning last quarter, I have missed a fourth of each of my classes, as there is no way to replicate the in-classroom experience from home. It is crucial that we students go back to school this fall, not only for the educational aspect of our lives, but for our mental health. There are certain relationships that exist within the school setting that do not necessarily exist outside of it. The extension of our time away from school will most certainly be met with an onslaught of mental health issues within our teens, and sadly, the continuing rise of teen suicide rates, as students will not be able to access their school's mental health resources in the same way outside of school. I beg you to consider the students and how much we NEED school in our lives and send us back to school, with the necessary precautions to keep us and our school staff safe. Thank you.
7/21/2020 8:46:25	Liz	Darling		Pittsburg	How can you even consider putting our babies back in school when you're meeting VIRTUALLY? If this is really safe for our kids, their teachers, and their families, then put your money where your mouth is and meet in-person (with 6-foot spacing waived, like it will be for kids.) Wait until cases decline!!!! Uphold Gov. Kelly's order!!!!
7/21/2020 8:46:30	Steven	Maples	Parents	Salina	Protect our kids, teachers, staff, parents, grandparents and our communities by delaying the opening of schools and coming up with a real plan.
7/21/2020 8:46:46	Tammy	Wallin	self	Wabaunsee	Please take in to account both the safety and social emotional well-being of our teachers and our children. Safety requires masks, social distancing, and other such measures. Social-emotional well requires teachers to have support and needed materials when starting school. Teachers can not teach well if they don't feel safe and they need to be in the best mind-set as our children go back to school. Our children have been through a lot over the past several months and teachers will need to be at their best in order to support them. Please allow schools the extra few weeks to ensure both the safety and emotional well being of both the children and the teachers.
7/21/2020 8:46:49	Lisa	Ball	USD497	Lawrence	Please delay the start of school until after Labor Day. We need time to make sure our schools are safe for teachers and students!
7/21/2020 8:47:02	John	Orvis		Winfield	This is a good thing. Not the best.
7/21/2020 8:47:07	Jennifer	Crane	Teacher	Hutchinson	I think the Executive Order to leave schools closed is the best idea for students and staff. It gives teachers the necessary time to adjust their curriculum and have the best lessons prepared while being safe. Plus, maybe the cases will stop increasing if we wait the three weeks.
7/21/2020 8:47:08	Tammy	Jennings	My grandsons	Overland Park	School needs to get in session. I cannot school both boys and work from home.
7/21/2020 8:47:28	Deanne	Korsak	None	Emporia	Please support the Governor's executive order!
7/21/2020 8:47:30	Susan	Mayberry	USD 458	Overland Park	Employees in education are the lives of which you hold in your hands regarding a decision to implement a late start this Fall. How does the KS BOE meet virtually and expect us to be physically in our classrooms. Who will be on the news when the first school related employee death occurs? You folks. I hope you consider the severity of this virus. We can all LIVE through a semester of online teaching. Support Governor Kelly's informed decision to delay school. Thank you.
7/21/2020 8:47:36	Bethany	Howard	USD 457 teacher	Garden City	I think we should start at our normal start date but do online learning first.
7/21/2020 8:47:39	Kelli	Hansard		Wichita	I am a parent and a teacher. Please sign the order delaying the start of school. It gives us time to come up with a plan and time for the spike in Covid cases to flatten.
7/21/2020 8:47:40	Kay	Gehring		Oxford	Please vote for the governors executive order to delay the start of school. By voting with the governor you allow the schools to have more time to assure as much safety as possible for students and staff. This would also allow parents more time to weigh their options for the education of the children without having to rush into their decision.
7/21/2020 8:47:40	Emily	Cable	USD 303	Ness City	These kids need to get back to school ASAP! It is vital to their mental health. Masks should not be mandatory in a town where there are no cases...a blanket policy is not right for the entire state. Mask policies should be left up to each district!

7/21/2020 8:47:43	Kevin	Lee		Olathe	I'm in support of delaying the start of the school year until the number of cases of COVID19 comes down.
7/21/2020 8:47:47	Jennifer	Worley		Wellington	I am in support of the order to delay the start of the school year until after Labor Day. As a teacher, it gives me more time to plan for both online and in person instruction. As a parent and a teacher, it gives us time to see if our county continues to have a spike in cases or if they begin to drop. Right now, we have too many positive cases each day and I don't feel it would be safe right now to be back in school.
7/21/2020 8:47:49	April	Schlenker	Parents of USD 259 students	Wichita	Dear BOE MEMBERS, I urge you to vote yes for the executive order that delays the start of Kansas schools until after Labor Day. I am a parent in the city of Wichita and I am concerned for the wellbeing of my family, the staff and students if they return to school before the rate of infection for COVID 19 decreases. I believe that Dr. Lee Norman presented more than adequate data to show you how Kansas communities are negatively impacted by COVID 19 right now. He further stated evidence that shows that we have the opportunity to lower the rate of infection to bring us back down to flatten the curve before September 9, 2020. Additionally with the mask mandates now being implemented in the the Wichita area, I feel that our numbers could start improving making our schools safer to open. Lastly, this executive order needs to stand and be approved by you and the other board of education members so that we can protect Kansans lives from further decimation from the COVID 19 virus. We must all work together to end this. Sincerely, April Schlenker
7/21/2020 8:47:51	Julie	Battaglia	Lawrence Public Schools	Lawrence, Kansas	Please allow educators more time to prepare for this school year. We want to make sure teachers, students, and all of their families are as safe as we can possibly be in this unprecedented time while still providing the highest levels of education to our students. Please, please extend the beginning of the school year until after Labor Day. Thank you for your consideration.
7/21/2020 8:48:00	Elizabetn	Patterson	Marion schools	Florence	I believe that as long as the virus is out there schools should not open back up an if they do I will home school because I myself an one of my children are at very high risk
7/21/2020 8:48:01	Elsa	Evans		Lawrence, KS	I support the efforts of the governor to keep school staff and children/families safe by delaying the school start date and requiring additional measures to protect them. I am in favor of virtual school for those who are able. We need to stop this virus! Opening schools too early will only delay the opening of our economy. Thank you.
7/21/2020 8:48:01	Shawna	Cortez		Andover	I support delaying the opening of schools.
7/21/2020 8:48:06	Scott	Miller	Self	Wichita	I would like to see our schools open and kids back in them, I believe keeping things as normal as possible is the best. Kids being social and around other kids and teachers is a very important part of education that cant be replicated online, I feel the risks are very low.
7/21/2020 8:48:08	Kiley	Wakeman	USD #219	Minneola	Our students have been out of school for nearly 6 months and they deserve to be back in the classroom. Their social and emotional needs need to be met. Our schools are the only safe place for many of our students. Putting off school for 3 weeks is only going to hinder our students further.
7/21/2020 8:48:08	Christine	Ross	None	Wichita	Hello, all scientific research, including research from other countries has shown the virus does not spread between kids as much. I believe we need to look at the data that is available and make decisions off of that. Also, parents know what's best for their children-we should be given a choice what we would like. We pay for a private school education and we do not want to be forced to do thinks we feel like are unnecessary . Thank you for your time!
7/21/2020 8:48:11	Jay	Lemino		Salina	I think prudence in this time is important. There are conflicting studies, opinions, etc. plus many unknowns. I think a delayed starts will give schools more time to prepare, and hopefully take a closer look at how they can proactively implement anything else that will help bring the community together.
7/21/2020 8:48:12	Tina	Wardlaw	Parent of Olathe School district students	Olathe	If a delay of school must happen, let extra curricular activities start: Sports, band, choir, etc. Let them have their seasons for the Parents and children that are comfortable with it. Have a Covid waiver families must sign to protect coaches and school district. Our children need to run and play. They need to socialize and have some normal times.
7/21/2020 8:48:15	Sarena	Roubideaux	Family	Clearwater	Schools need to go back to normal. Life needs to go back to normal. This is ridiculous!
7/21/2020 8:48:23	Jennifer	Schields		Lenexa	Please do what is right to keep our kids safe. Delay school opening. Their health is in your hands!

7/21/2020 8:48:37	julie	eastlick	myself	wichita	don't open schools until after labor day
7/21/2020 8:48:43	Sarah	Ramsey		Wichita	Please go ahead and delay the start of school until September 9th. While it is important that students return to school, it is also important that everyone be safe.
7/21/2020 8:48:50	Connie	Hummel	USD 402	Towanda	Schools should start as what was planned by the calendar set last Spring and take necessary precautions.
7/21/2020 8:48:51	Rachelle	Depew	USD259	Wichita	Please keep us safe. Delay in-person classes until the numbers are declining for 14 straight days.
7/21/2020 8:48:53	Ana	Colbary	Personal	Modoc	Please do not delay schools. Do not require masks etc. Let us chose to get back to normal. We should be able to decide for ourselves how we want to address personal medical needs and beliefs. We should not be ordered what to think, say, do or wear. Our children need an education. The public school system is supposed to be free and available for the public. That's why we pay taxes. If you want to make rules that violate personal freedoms, than work for a private organization. The people have the right to choose what is right for their individual needs and families, not the government.
7/21/2020 8:48:55	Riki	Kisner		Shawnee	I support the delay.
7/21/2020 8:49:01	Amy	Hall	Myself-substitute teacher	Manhattan	Please delay school to give more time to prepare. I know too many high risk staff and students to take this lightly. I have had zero communication with USD 383 (zero-from day one) so I assume that means they haven't even gotten around to thinking about how they will protect me, as a substitute. I (and others) do not make enough money to be able to miss weeks or months with no pay.
7/21/2020 8:49:07	Katie	Ballew		Olathe	Please support Gov. Kelly's decision to not open schools until after Labor Day. As a former 2nd grade teacher and parent to 2 young children, I am extremely worried about sending kids back into school buildings with cases as high as they are. Please give teachers, students and parents a fighting chance by allowing extra time for cases to decrease, parents to make extraordinarily difficult decisions, and for teachers to prepare for the most challenging school year they will ever have.
7/21/2020 8:49:08	Jessica	Hanvey	usd 382 pratt teacher	pratt	open school and leave decisions to local school boards
7/21/2020 8:49:09	Kelly	Watson	Shawnee Mission School - Hocker Grove	Merriam	I agree that postponing school is probably the best decision. I do think that physical school is important for the well-being of a lot of children.  I do not have confidence in the online schooling program. I know they would do better than the spring, but without knowing what that looks like I can't in good conscience let my daughter's education be pushed to the way side because SMSD can not provide education online or tell us what that would look like. If it ends up needed to be online only this fall I worry for the education.  We have supplemented math and reading to ensure she doesn't fall behind standards wise. But it is doubtful other kids/families have done the same.  My daughter is also enrolled in classes that need heavy collaboration and people (theatre), journalism, etc  So if by us waiting a few more weeks to ensure they can go back to school I'm all for it.
7/21/2020 8:49:12	Bubba	Dowling	My family	Smith Center	I'm indifferent on the start date, but get them to school ASAP. These kids need it. I am NOT ok with the forcing of masks to be worn. If masks are mandated we will be removing our children from the school and homeschooling.
7/21/2020 8:49:14	Carol	Zarda		Shawbee	I fully support Govenor Kelly's decision to hold off opening the schools until after Labor Day. In the past schools always waited until then to open. I also agree to the students wearing masks and using sanitizer. These are guidelines set by her that fully make sense. Anyone that says differently isnt thinking of the children and teachers they're just trying to oppose Gov Kelly.
7/21/2020 8:49:17	Deb	Wertin	Retired Teacher-substitute	Olathe	Thank you for your work to make the school year safe for children , teachers, substitutes and all support staff working in the buildings.
7/21/2020 8:49:23	Carole	Kindt	Maize South High School	Wichita	Start school after Labor Day and require masks for older kids.
7/21/2020 8:49:24	Christina	Hibarger		Wichita	I think that delaying the start of the school year is the right choice for our community.

7/21/2020 8:49:25	Emmy	Murphy		Augusta	Please give control to the local school districts. They know what's best for the kids in each area, vs a one-size-fits-all approach. Overturn the Governor's executive order, and get our kids back in school.
7/21/2020 8:49:28	Christy	Fell		Belle Plaine	Because we have waited so long to decide anything- we should wait until after Labor Day. Families have to be able to make plans for the upcoming school year and will need time. Why didn't we start planning after the last school year was over?
7/21/2020 8:49:39	Dana	Regehr		Buhler	We understand the difficulty of this situation; please know that we are praying for great wisdom for you! We also know case numbers are not what we would like, but we hope that you will make the decision to open schools at least by September 8. If we wait until we are closer to flu season, numbers will only continue to increase. Our kids desperately need school; they at least need to get started before we have to move to virtual learning. Physical health is important, but there are many other kinds of health we must consider. Thank you for your service to our state!
7/21/2020 8:49:47	Angela	OKane	Parent	Shawnee	As a middle school parent, I urge you to make the scientifically sound decision to support Governor Kelly's mandate of starting school after Labor Day. Covid cases are still trending upwards. Why would we put our children's health at risk?
7/21/2020 8:49:48	Kelly	Heide	Parent in the Shawnee Mission School District	Leawood	Please uphold the governor's order. We need to slow the spread and pouring 2000 high schoolers into a building will not help. Teachers and administrators need time to implement the KSDHE recommendations which were just issued. I recognize that individual districts can change their own schedules, however, it sends a strong message that the state of Kansas will listen to science and not politics when we all stand together to do what is safest for Kansans.
7/21/2020 8:49:48	Sara	Smoker	Parent	Moundridge	Thank you Governor Kelly for creating this mandate to keep our communities safe! Students and staff should NOT meet in person until we see Kansas COVID cases sharply decrease!
7/21/2020 8:49:50	Lara	Cotte	Self	Madison Kansas	I think delaying the start of school until after Labor Day is a good idea. The numbers of infected folks are going up. Seems not smart to gather our children together in a high risk situation when we know the infection is spreading right here among us, right now. I also think that masks should be mandated for all to wear at school and every other public place. Just like the Governor said. Go state board do the right thing. Keep us safe with the only tools we know about so far 1. Physical distancing 2. Wearing masks Thank you for your time. Sincerely.
7/21/2020 8:49:51	Kelsey	Hastings		Valley Center	I am not sure that we should delay the start of the school year - I think that we start by virtual education or blended education to get the kids back on track. Several kids are not in good situations at home and they need to be back in school. For some, school is the only escape. Pushing back the start of school keeps these kids in an unhealthy environment for longer. I am fine with the kids wearing masks, distancing, etc. - I truly do not feel there should be a delay in the start of school because kids need to be in school or learning, they need interaction with peers, teachers, counselors. I am so worried about kids getting left behind or not being able to catch up.
7/21/2020 8:50:07	Kristen	Sells	Kansas mother	Lenexa	Thank you for doing this. Until we see a decrease in numbers my children will not be attending in person. I also think the protection of our teachers is ever is important. Thank you for keeping us protected!
7/21/2020 8:50:14	Jennifer	Hayes		Overland Park	This is ridiculous, my children did not learn anything from online learning and should be starting school in August. I will not be making them do distance learning at all this year, they will only be doing in person school. The death rate for kids from Covid is pretty much nonexistent, so why are they not starting school?
7/21/2020 8:50:22	Lana	Ayers-Kirkley		Topeka	Many children, especially younger ones, may not be capable of social distancing and there are too many children in schools for adults to watch everything they do.

7/21/2020 8:50:22	Mary Susan	Simpson	Kansas City Catering	Shawnee	I believe children must be back in school at the earliest date. They are losing ground academically, socially, and even in some cases, physically, on a daily basis. While I appreciate teacher's position about their health issues, the children must come first. In the same way that medical personnel and policemen and women, bravely go where they are needed, teachers must navigate through the risks. If their health concerns prevent them from doing so, let them work from home or step out of teaching. Everyone has been hurt by this pandemic, including us (losing all business). Perhaps teachers will have to lose a year of teaching before retirement. We can not let teacher unions or governors push us to put children at educational risk. We are at war against a virus. Everyone in our nation must take a loss in order to save our children.
7/21/2020 8:50:24	Aaron	Bridges	My family	Quinter	Kids should be learning face to face with a teacher in school.
7/21/2020 8:50:32	Danielle	Albert		Madison	I support the governor's mandate to start school after Labor Day.
7/21/2020 8:50:34	Rachael	Garcia	USD 475	Fort Riley, KS	Please strongly consider moving the start date of school to after Labor Day. As a school district employee and as a mother of a student in my district, I implore you to give our district a few extra weeks to ready their staff and buildings to give us all a fighting chance to stay as healthy as possible. Thank you for your consideration.
7/21/2020 8:50:35	Heather	Kauk	Paola High School	Paola, KS	Dear members of the BOE,  I urge you to uphold Gov. Kelly's mandate in regards to delaying the opening of schools until after Labor Day 2020.  I can assure you there is no place I would rather be than back in my classroom, but when I listen to my colleagues in my home district, and across the state, the fear that they feel is justifiable and understandable.  The delay in starting will allow us critical time to plan for what may be one of our most challenging years as educators yet. As it stands, my district has two days of inservice before we are set to see students. This is no where near enough time for us to implement safety standards and protocol on top of what we normally do with our students at the beginning of the year.  I know these times are unprecedented. I know these decisions are hard to make. Please help us. Please delay the start of school.  Thank you, Heather Kauk
7/21/2020 8:50:39	Alexis	Sanchez	Parent of Olathe students	Olathe	Students need to be back in school ASAP. Masks should be optional in classroom!
7/21/2020 8:50:41	Cindy	Schooler		Edgerton	I agree with her decision. Hopefully people will start wearing masks and social distancing so we can get the numbers to go down, between now and then. Between now and Sept. 8 will give schools more time to prepare. So sad that this has become political. Let's take care of our students, teachers, and elderly!
7/21/2020 8:50:41	Sally	Ledford	Citizen	Wichita	And another thing: governor jelly should also declare a tax holiday for back to school supplies and clothes and shoes--- all that stuff. Due to the virus & fed unemployment ending. The tax holiday would help lots of people getting back to school. Please bring this to her attention. Thank you
7/21/2020 8:50:56	David	Wood		Manhattan	I believe the BOE should UPHOLD the Governor's order to delay the start of school until AT LEAST after Labor Day. This will give schools longer to plan and a chance for mask orders and other preventive measures to hopefully decrease the instances of COVID-19 around the state. We need to protect our teachers, staff, and students, along with all of their families by not putting them at an unnecessary risk of infection. We don't have appropriate data to plan for children and teenagers to be in schools for 7+ hours a day and teachers also need a longer time to prepare for the online options that will certainly be part of the planning.
7/21/2020 8:51:12	Jamie	Redic	Kckps	Kansas city	Delay
7/21/2020 8:51:23	Jennifer	Myers		Lawrence	Please keep our children safe! The school districts need more time to plan and prepare for our children to safely return to school. I work as an RN in the Covid unit and I know how devastating this virus is. If our children and teachers/staff are expected to return to school, it has to be a safe environment.

7/21/2020 8:51:24	Megan	Dischinger		Overland Park	Please open our schools! As a parent to four - 3 elementary, and one busy toddler, the spring edition of virtual learning was stressful for my kids as well as the parents who also were trying to manage full time work while (unsuccessfully) facilitate and manage online school for Kindergartener and 1st grader and keeping a 1 year old occupied and safe. (I'm thankful my 4th grader is at least able to manage on his own, although that also feels unfair to put that on him alone)
7/21/2020 8:51:20	Eric	Ward	my family	Manhattan	I respectfully urge you to let LOCAL school boards make decisions on when/how to open schools. You all put a tremendous amount of work into guidelines to make it safe already. Every community is different. No doubt some should delay, but many rural communities have low population, few or no active cases, and no need to further traumatize kids and stagnate their economies by delaying school. Let those elected to make these decisions make them. Once again, our governor's "one size fits all" solution creates more problems. Thank you.
7/21/2020 8:51:26	Jenny	Lamb	My family	Ozawkie, Kansas	I am in support of Governor Kelly's executive order to delay the start of school until after Labor Day. Please support her in this effort. Furthermore please consider encouraging all school districts to start online for a period of 2-4 weeks before phasing students into the buildings. Thank you for your service on the state school board.
7/21/2020 8:51:34	Terrie	Meade	Parent of a high school freshman athlete	Overland Park	<p>First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.</p> <p>Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <ul style="list-style-type: none"> <li>• Safe School opening following the Board of Education Return to School Plan</li> <li>• No delay to student participation in school, athletics, and activities.</li> </ul> <p>In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.</p> <p>Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>I am one of the more than 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.</p> <p>We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.</p> <p>To view the petition: <a href="http://chnng.it/7LG6GzBjqM">http://chnng.it/7LG6GzBjqM</a></p>

7/21/2020 8:51:36	Meghan	Wells	Myself and my child	Manhattan	Please open up our schools! I have watched what an isolated summer without children and sports have done to my son. Children MUST go back to learning and most importantly interacting with other children! Do not force our children to go back to an environment filled with masks, plexiglass, and social distancing. Do your research on cloth facial masks and children. They will serve as moist petri dishes on their faces. Take their temperature when they come in the door, and let it be. There is little data to show that children spread this virus to other children. The death rate alone, does not warrant these extreme measures. We cannot keep delaying the inevitable and making our children a social experiment. This virus is going to run its course whether or not our schools are open. If daycares can be open, schools can be open. At the very least, you need to leave the decision up to the local school boards and private schools. Some of the schools have had plans in place all summer to handle this. It is not fair that because some schools are not prepared, all other schools should suffer. Public education will suffer if you decide to close or delay schooling. I for one, will no longer be substituting in public schools, and we enrolled my son in a private school. I know of countless others who have enrolled their children in private school, along with numerous people who will be homeschooling. Do the right thing and leave the control up to individual schools/school boards. Also, please implement new and current nutritional models for children. What better way to change the health of our schools, then by starting with what goes in our bodies. The fact that we are not focusing on our immune system's right now it's a shame. Thank you!
7/21/2020 8:51:52	Kelly	Blackburn		Lawrence	It is imperative, for the safety of our children, teachers, and families, for the school year to delay starting until after Labor Day as indicated in Governor Kelly's executive order. This simple measure will allow districts more time to adequately plan for multiple learning formats in this quickly changing environment. This delay will also (hopefully) allow residents to follow safety protocols so the infection rate decreases. It's unfair and cruel to expect teachers to risk their health and safety, and that of their families, in a haphazardly fashion. This is not political - this is common sense. It is everyone's moral responsibility to care about each other.
7/21/2020 8:51:52	Todd	Allison		Pittsburg	I think the governor is doing the right thing. Kansas needs some time to get its infection rate under control. We also need some more time to plan. I'm not against opening schools, but we have to be smart about it. There have been other countries that had classes this summer and the virus ended up spreading to both students and teachers. That could pose a real risk to older teachers and people at home. While I personally think the science is clear, even if it is not, it is only prudent to error on the side of caution. Thank You.
7/21/2020 8:51:56	Christopher	Garnica	USD 259	Wichita	I think the delay is necessary for a large district like WPS to pivot and implement the requirements per executive order. I'm less worried about spread if we implement those requirements and feel we can attend in person school, on a varied schedule, after labor day.
7/21/2020 8:51:56	Karen	Wallace		Osborne	Please support the governor with the delay of opening schools. This will give the necessary time (3 incubation periods) for school districts, administrators and teachers to make the safest environment for the children of our state. This is a health and safety issue. Our governor has taken a stand that some will support and others will scoff at, but she is taken a leadership role and is not passing this off to another group of people to try and figure out. We need more leadership during this crisis and people willing to be the ones to say this is our plan to keep Kansas kids, teachers, janitors, cooks, bus drivers, parents, etc... safe. Normal will never look the same. We as Kansans can grow and become stronger with positive leadership. We used to start after Labor Day because it was too hot for students in the buildings. Can we not start late because we do not want to gather in large groups that have the potential to make others sick? When you make your decision, please do not make it about a political party. Do not make it about the dollar because no amount of money can bring back a life. Make it about the health and safety of our future. I am not a big fan of virtual schooling (but I'm glad it can be done) and I feel that our kiddos need to be around their peers and some students just need that personal interaction to learn. I just want it to be as safe as possible for the kids.
7/21/2020 8:52:07	Reagan	Tofflemire	Teacher and parent in USD450	Topeka	I encourage the members of the State Board of Education to vote in support of the Executive Order to delay the opening of schools.
7/21/2020 8:52:08	Amanda	Smith		Augusta	Please delay the school year or move to virtual education. Please keep the educators, staff, and administrators at our schools safe with PPE when they do reopen. Please trust in and follow the science! We cannot open when cases are as high as they are in Sedgewick county.

7/21/2020 8:52:10	Alan	Sunkel		Leawood	I think schools are not prepared to reopen safely. Opening without adequate testing or the ability to enforce safety measures will endanger not only students (we don't know what long-term effects of virus might be, even for asymptomatic carriers) but also for society at large.
7/21/2020 8:52:21	Kayleen	Weber	USD428	Great Bend	I have 3 elementary age children. I am classified staff at an elementary school. I am happy with staff wearing masks or face shields. Adults can handle it. Children should not be expected to wear masks. They will pull, touch, and play with a mask, throw it up in the air, trade among each other, brandish as sling shot, lay their mask on the bathroom floor and put it back on their face, kids will lose track of whose is whose, take them off at lunch and accidently throw it away, lose it, draw on it, drool on it, chew on it, forget it, wear one they found in the hall, fight with their friends over it, pick their nose through it, ETC ETC. All this positive attitude stuff is not going to work. I have seen ALL of these things done with a simple PENCIL on a daily basis. And yes, teachers and staff do everything in their power to prevent and stop abuse of pencils. Kids still do it. Can you imagine all of this and more being done to a mask, then expect them to breathe through that germ encrusted piece of cloth? Children are disgusting disobedient disorderly disasters. That's just the honest truth. Ew.
7/21/2020 8:52:30	Anne	Billman	Blue Valley	Overland Park, KS	Please, please vote to pass Gov. Kelly's order to delay school opening. As an employee of Blue Valley and parent of a HS student, I am very concerned about trying to open schools with our COVID spread so high! I think the students need to get back to in person school.
7/21/2020 8:52:34	Lori	Williams	parent of student	Halstead	I disagree with the pending "executive order" interfering with local governments and school boards regarding the school opening timeline. I believe that our local school board and their communities, parents, students and local leaders should be able to do what is best for their students, schools and employees with guidance from you, the State Board of Education regarding these school openings.  If I can't count on you and our teachers who I consider public servants to provide the services that they are employed to do, my family may need to work towards an alternative learning situation for my child who has basically been not educated by the public schools system since March 2020 and the Governor wants to extend that time to September and perhaps further.  I am a health care provider. I have been working directly with some of the most vulnerable, cancer patients. My clinic and the hospital systems that I work with have been communicating, planning and executing their plans very well and I think they have provided a safe environment for our patients, staff and family members.  EMS, fire and police have shown up to do their work as public servants. I am not sure why teachers are any different. Even the private sector workers have been working in modified ways. In health care, we have been able to modify our practice flow and protective gear and still have been able to provide services safely for our patients.  The pediatricians have recommended that students get back to work.  My school district is USD 440, Halstead-Bentley. We have classrooms, gyms, and outside places to space kids. We have multiple doors they could enter and exit from to limit traffic flow and be able to sanitize and temperature check. I would hope that teachers and administrators don't need 2 more months to get ready to go back when they should have been working on contingency plans since March 2020.
7/21/2020 8:52:39	chelsea	Lentfer	Manhattan Catholic	Manhattan -Salina diocese	Please allow schools to reopen at MCS, we have smaller class sizes, my kids had to be home schooled at home for 7 weeks and that put them behind 7 weeks. We cannot allow their education to be Pushed out of anymore. There education is essential for their wellbeing & their health. I am OK with all the precautions put into place( mask, etc) but we need to get our kids back to learning & being social. My kids education academic/religious is so important to me which is why I send them to MCS. Please allow them a full education. This is about the kids.  Sincerely Chelsea LentfeR
7/21/2020 8:52:48	Sharla	Smith		Ingalls - Cimarron	Open them now and get our kids back to the business of learning!

7/21/2020 8:52:48	Terri	core		Wichita	Open the schools, our kids need socialization with their peers. If places like Walmart and Target can stay open so can our schools they are essential.
7/21/2020 8:53:10	Sue	Crowl		Arkansas City	Please follow Governor Kelly's Executive Order. Instead of having a knee jerk reaction and making this political, help the districts prepare for a safe opening. Have a plan in place that will not only protect our children, but teachers and all employees working in our educational facilities. Yes, children do need to be back in school, let's do it safely.
7/21/2020 8:53:12	Melia	Patterson	Usd364	Marysville	Please don't start in person classes until a viable solution to keep our educators and students safe is reached.
7/21/2020 8:53:24	Amanda	Mykins		Olathe	<p>Governor Kelly announced her plan to delay the start of school and today I am writing to encourage you to support her decision. I am a parent and former elementary educator and I understand the importance of in-person instruction. However, we are facing a challenge that we have never seen before. I have watched the numbers climb in Kansas and the status of our state was moved to a critical level placing our state on a quarantine list for parts of our country. The health and safety of my family and my community is my highest concern.</p> <p>As more cities open and children participate in activities, we are seeing more children affected by this virus. Our children were protected through this by shutting down schools in March, canceling sports and practices, and closing playgrounds. I have to wonder if the low number of affected children correlates with these actions?</p> <p>Please support our Governor and delay the start of school. This will give districts time to review the plans, locate the proper equipment to keep our kids healthy, plan how to pay for this equipment, and most importantly allow the state cases to decline. Please show that you care about Kansans by taking care of our children and their families. Education will happen, I guarantee you teachers, parents, and school districts will make sure of that. Right now we need to adopt a growth mindset and be flexible with our vision for education.</p> <p>Thank you for your time!  Amanda Mykins  Olathe School District Resident  Former Blue Valley Educator (6 years)  Parent of 2 children</p>
7/21/2020 8:53:25	Dustin	Schwind		Wichita (Goddard USD 265 district)	<p>Families should be given 2 options; one, go to school as normal with reasonable accommodations for prevention, such as hand sanitizer and regular hand washing or two, online school. Any scenario in-between and we are kidding ourselves. It's not feasible for working parents to do alternating weeks are partial weeks of school and it does nothing to prevent virus spread. Regarding teachers, they can wear masks if desired, or if a teacher is not comfortable doing their job they are the ones assigned to online education. The CDC data barely supports this virus at epidemic levels (as its dipped below that level several times) and the data also tells us that kids under 18 are the lowest risk of the entire population. If families have members that have health concerns, they can elect their kids utilize the online option for school.</p> <p>I do not want to see our kids schools turned into "prison" camps with forced face masks, mandated isolation, formation lines for hand washing, and no group lunches or physical recreational activities. The CDC data and common observation does not justify it, plus when will it stop. This cannot become the new normal as we all know another virus will emerge in the future.</p>
7/21/2020 8:53:28	Jennifer	Rosenbaum	SMSD and USD232	Shawnee	Delay the start of schools, if you can't meet in person safely why rush to open schools. Cases are increasing why not wait before opening
7/21/2020 8:53:31	Derek	Rothstein	Home	Olathe	<p>I would expect that the state and the schools should already have the plan in place! I mean what have they doing for the past 6 months!!</p> <p>And the kindergarteners wearing mask? Really for 8 hours of the day !!</p> <p>Put a mask on a dog and see how long that last!</p>

7/21/2020 8:53:32	Afton	Lopez	Elementary School	Whichita	I am an administrative assistant and I have some major concerns about opening schools. The nurses office is attached to mine and when she goes to lunch, meetings, etc, I am the one who takes care of sick kids. I have 2 daughter's with health issues, one who had croup multiple times last year and she's only 2. Please let us take this extra time to prepare. I appreciate what our governor is doing and fully support her decision. Thank you
7/21/2020 8:53:35	Brian	Anderson		Overland Park	For the safety of our teachers, students and families, please keep in person schooling closed until we get our community spread under control. Thank you!
7/21/2020 8:53:43	Maura	Coleman	My two children and my entire family.	Prairie Village, KS	If businesses are finding it unsafe to work in person it is ridiculous to put children and teachers in a situation where they are working and learning in close proximity to each other. School should NOT be in person until there is a strict and clear plan for safety.
7/21/2020 8:53:51	Amy	Kidwell	St Marks School (Renwick USD 267)	Wichita	No school delay. Open as usual.
7/21/2020 8:53:54	Pam	Gassmann		Lawrence	Please don't open schools earlier than Labor Day especially if cases are still increasing. Children's safety is what's important and maybe if we delay opening we won't have to shut down again.
7/21/2020 8:54:03	Erin	Siemens		Holyrood	What's a couple more weeks going to help? Covid 19 will be here Aug 20 or Sept 9. Open schools when they were supposed to open. And wearing masks is not possible with little ones. They need school, friends, learning. Not online. Too many mental disorders are forming because of all this.
7/21/2020 8:54:01	Laura	Geist	Mother	Jackson County Schools	OPEN our schools fully and on time. No mask and No restrictions. Let our kids be kids! Stop the Political nonsense. Enough is enough!
7/21/2020 8:54:15	Jim	Renyer	USD 113	Sabetha	The science is saying, that kids are not at risk. If teachers are at risk, then place a tv in the class room, let the teacher zoom into the room with the help of volunteers. The schools must reopen as normal as possible for the kids sake, physically and mentally. Every person must remember what school, especially high school, meant to them as they make this decision. Never forget, in this debate, you will be taking something from kids you can never give back. If you decide to open after labor day, then what, it is just a step towards shutting it all down the whole year because 3 weeks will not make a difference with this virus, according to CDC, has little to no effect on kids. This note is being wrote by a 51 year old man that did not understand what school meant until after he graduated. I have encouraged my kids to enjoy school to its fullest. Proud to say my wife and I have had 2 top 7 in the class graduates and a valedictorian with 2 more on the way to finish in the top of their class as well. They are involved in sports, plays, band, musicals, student council and all school can provide. I am asking again open the schools as normal as possible. Thankyou. Jim Renyer
7/21/2020 8:54:19	Michelle	Rowe		Junction City	Please delay school. Also, it would be extremely helpful if there weren't snarky comments when we ask questions on Facebook. I also would like an answer the question this district has been avoiding. Will you push back the deadline for e-learning? You guys are close to demanding flexibility from your patrons (another word for customers, which please do not get me started on that) but yet will not allow flexibility for us. We have no idea how you're planning e-learning but we MUST make an "informed" decision. I'm very close from pulling my child from this district, as are several parents.
7/21/2020 8:54:23	Cynthia	Lanterman	Salina schools	Salina	If the fact that administrators won't meet face to face, but rather through Zoom meetings to protect themselves is not enough reason to support Governor Kelly, then think of this. You have a virus whose only purpose is to feed itself so that it can replicate and you want to open the "all you can eat buffet". Perhaps we should pull back a bit and be online the first semester to see if we can get a handle on this thing before we offer up children and school staff.
7/21/2020 8:54:24	Christine	Campbell		Wichita	I support delaying school until after Labor Day and masks worn by everyone in classrooms
7/21/2020 8:54:27	Caren	Corneliusen	Mize Elementary	Shawnee, KS	Kids need to be physically in schools!! Especially title 1 schools. In some situations students are safer at school. Also, high school sports make students feel confident and give themselves motivation to do well in school.
7/21/2020 8:54:28	Makenzie	Boltwood		White City	As a teacher, I think pushing back until September is a great thing. We should want every schools faculty, students, and families as safe and healthy as possible during this time.

7/21/2020 8:54:45	Colleen	Beason	Goddard High School	5602 W Franklin St Wichita Ks 67212	I think our schools need to open up like normal with adjustments like wearing masks in the high school and middle schools. Younger kids will not understand or keep their masks on properly. There are things that can be done to maintain safety without shutting down or delaying education!
7/21/2020 8:54:56	Kara	summer		Derby	Delay opening schools. Stand with science, our Gov.and protect our schools' staff. Don't let the hyperbole of describing a child as dying to learn become a reality. Live to Learn!!! Delay
7/21/2020 8:55:01	Lisa	Brown		Topeka	Schools should be closed until AT LEAST after Labor Day. Please do not bow to political pressure.
7/21/2020 8:55:07	Carrie	Cummings	Parent	Sedan	I believe it is NOT in the best interest of the students to delay school or delay the start of student athletics or activities. Even if we agree to delay school, students could still hold practices, just make adjustments (smaller groups/alternating days etc.). These kids are ready to begin school and a large majority of their focus lies on their extracurricular activities. I believe it should be a local decision, as we are not all affected in the state in the same ways.
7/21/2020 8:55:08	Lauren	Wood		Sedgwick	Unless schools have online options available please remain closed. We have an elderly individual in our household who is at risk and its already difficult enough keeping the child safe between two homes.
7/21/2020 8:55:11	Shelby	Simpson		Leavenworth	Delaying the start of school is a great idea because schools can watch other schools in the country to see what their spikes are like, we have more time to plan and implement the guidelines, and more time to get our school year online in the event that we have to do remote again. Yes, there may be some spikes after Labor Day, but it's better to have two full cycles of COVID run it's course instead of allowing that to happen inside a classroom.
7/21/2020 8:55:12	Jenny	Kleinmann	Parent/teacher	Overland Park	Open schools after Labor Day
7/21/2020 8:55:13	Kathleen	Feld		Shawnee	Uphold the governor's mandate delaying the start of school. Follow the science and don't send students and staff into a situation where there is a very high probability of getting COVID-19. I am both a teacher and a parent. I am terrified for my safety, my child's safety, my students' safety, and my colleagues' safety. Please don't make us go into a dangerous environment.
7/21/2020 8:55:17	Ronda	Smith		Hiawatha	I believe the largest issue regarding wearing masks and the start of school is a LOCAL CONTROL ISSUE! Most people I have spoken to are not against wearing masks or delaying the start of school, but do not want their liberties taken away. If those issues were presented in a manner that these are recommendations I believe people would accept them better. The outbreak of the virus looks much different in rural Kansas than it does in urban Kansas. Don't lump them all together! I'm a school teacher. The best learning takes place in the classroom NOT VIRTUALLY!!! I'm concerned that the divide between the haves versus the have nots is going to continue to increase. Allow students to go back to school at the regular locally assigned time with masks being optional based on local dept of health's opinions! Thanks!
7/21/2020 8:55:21	Ruth	Hanvey	Grandparent	Greensburg	Leave opening up to local school districts
7/21/2020 8:55:22	Jan	Cyr		Overland Park, Kansas	Please support Governor Kelly's executive Order 20-58. . .As a former teacher, I can attest that the time to plan for a safe opening after Labor Day is crucial to success!
7/21/2020 8:55:22	Erin	Gibson		Hays Ks	Yes delay!
7/21/2020 8:55:24	Lerin	Combs	Parent of USD 231 Student	Gardner	I would like to see schools open at regular time to get our kids back on track and learning.
7/21/2020 8:55:25	Caitlin	Wohler	Public comment	Sedgwick County	I am in favor of staying closed until after Labor Day or even longer if needed. Especially if we can avoid masks in schools.
7/21/2020 8:55:31	Rhonda	Lefferd	USD 450 Teacher/USD 337 Parent	Hoyt	I am asking the board to please vote in support of the EO. As a traveling teacher that attends three schools, my job is changing greatly and I need time to work with my schools to figure out how perform my job safely. Starting after labor day, will allow my schools and district to work together to gather the necessary supplies (our masks are on back order) and procedures to open school with the safety of the students at the forefront. I miss my students and job and will work diligently those three weeks in August to prepare my schools for September opening.
7/21/2020 8:55:32	Jessica	Schasteen	USD 450 Shawnee Heights	Lawrence	Delaying the start of school is something that is teachers will need to get the school year started. It will give us the time to get what we need to open our classrooms a little more safely but will also give us the time to get some professional development that will allow us to be more successful this year.

7/21/2020 8:55:39	Amanda	Meyer		Wichita	It's Disheartening to hear this virus being so politicized. I'm thankful Governor Kelly used science to make her decision and I support the decision completely. KS is the new hot spot in the country for Covid. The numbers (hospitalizations) are going up exponentially. Our community is at risk, and teachers should not be turned into first responders.
7/21/2020 8:55:46	Carolyn	Ramsey	KCKPS	Kansas City KS	As a first year teacher and residing in Wyandotte county I ask for the order to delay schools to be approved. I believe this will allow the mask mandate to take greater effect at lowering cases and will provide teachers and staff adequate training and preparation time for a school year unlike any other.
7/21/2020 8:55:47	Wayne	SUMNER		Derby	please delay the opening of schools
7/21/2020 8:56:03	Trisha	Logan	Parent	Wichita	Requiring children to wear masks hurts children instead of helping them. They are not passing the virus. We must value their mental health too. I think a quote in the July 12, 2020 Wichita Eagle made by a child currently in summer school speaks volumes. He said his favorite part of the day is when he can socially distance from his peers & take his mask off. I hope you can appreciate how significantly harmful this is to teach kids to stay the heck away from each other. And that getting away from their peers will be their only relief from the dangerous confines of a mask. I believe strongly that requiring masks K-12 will be more harmful than good. Thank you for giving me the opportunity to comment.
7/21/2020 8:56:05	Debi	Corrigan	Community member	Wichita	Schools need to open
7/21/2020 8:56:07	Kian	Williams		Hutchinson	As a student, I fully support the Executive Order. My friends and I should not have to risk our lives as pawns in the partisan chess game. Please, protect the lives of Kansas's kids and delay school opening.
7/21/2020 8:56:11	Jennifer	Schwisow		Olathe	Please delay the start of our 2020 school year and allow our districts more time to implement COVID safety protocols. By doing so, I can assist my school in providing a safer classroom environment for my 20 students. Their safety and that of my family is of the highest concern and we need additional time to be prepared. Data shows the infection rate of the virus is not trending downward yet, further indicating that having students gather with lax protocols in place will be a dangerous situation.
7/21/2020 8:56:12	Shannon	Rothchild		Smith Center	Decisions should be made at the local level. That is why we elect public officials. Let the local school board decide when school starts. Let the local school board decide how the school should allow students to attend school. One size never has, nor ever will, fit all. Schools in Johnson County should not be managed the same as schools in Smith County.
7/21/2020 8:56:24	Mary	Turner	Parent	Hays,KS	Children and teachers will die if schools are opened. That is unacceptable. There is no justification for the preventable death of a child or teacher. Period.
7/21/2020 8:56:30	Bri	Frisby	USD 483	Plains.	Our school district sits in 2 different counties, both have voted that masks are not required due to the low number of cases and lower population compared to larger cities like Wichita, Topeka, and Kansas City. The rural communities should NOT be required to have our students and staff wear masks simply because larger populations do. If they choose to because that's what they feel is best for their household, that's one thing, but a blanket mandate is not what our area is in support of. Each time is has been given to our counties to vote on, they have voted against the mandate. One of the MAJOR reasons we live "all the way out here" is because of the space and the bubble this area provides verses the big city. Most people in Topeka think there is nothing past Wichita, or atleast nothing past Pratt, however, since the tornado, I'd give some the benefit of the doubt that they would say there is nothing past Greensburg. With that said, it's frustrating when we are forced into mandates that have nothing to do the size of our population. We chose to live where we live for a reason. Our town is less than a 1,000 people. Our school district has less than 700 students in 4 different buildings in 3 different towns/locals. We are capable of making the best common sense decision for ourselves. We do not need BLANKET mandates for an entire state when the states population has such a large variance. We are praying for you and our country, state, and local leaders. Please, let the locals in each area hear from their own people and make the decision that is best for their people.

7/21/2020 8:56:33	Amy	Tighe		Manhattan	As an educator I support this order 100% I don't want to have to worry constantly that I am going to be home without pay and have used all of my personal time that I am saving up for maternity leave in the future (since ours is unpaid) because I was exposed to the virus prematurely. This give our district more time to be prepare and our area to get the outbreak back under control. We opened up the bars too early in our area and went from 8 active cases to over 130. The mask order is helping bring that down, but I think these extra 3 weeks will give the masks more time to work. I want more than anything to be back with my students and guiding them to learn which I value greatly! But I also want to be set up for success rather than fearing for my life and my students lives and wellbeing.
7/21/2020 8:56:37	Paul	Fibelkorn	Myself	Edgerton	Please share with the KS State Board of Education to support the Governor in not starting school attendance until after Labor Day. Leaving politics aside, COVID-19 cases and deaths are increasing, and the possibility of future student and school deaths is real. Please consider the danger that our teachers, students and their families are in by rushing to open schools before the coronavirus is under control and/or a cure is found. Sincerely, Paul Fibelkorn Edgerton KS Teacher
7/21/2020 8:56:52	Julie	Weishaar	Just family	Abilene	Please delay school. Teachers need time to plan.
7/21/2020 8:56:55	Rebecca	Wilson		Halstead	I support Executive Order 20-58. We are all anxious for our children to return to school, but it is in their and the school personnel's best interest to delay the start of the school year until after Labor Day. If the majority of Kansans follow the recent mask order for at least the next six weeks, I believe that we can again flatten the curve of COVID-19, and we can then begin the back to school process. In the meantime, a delay will allow school districts to better plan for the reopening of schools as safely as possible for all involved.
7/21/2020 8:56:58	Jennifer	Slater		Pratt	I agree that the state should implement certain rules/restrictions that must be followed by all districts, but believe that local leaders should be able to most decisions in how school will operate in the time of COVID.
7/21/2020 8:57:04	Reed	Uthe		OPKS	In favor. Please give school staff the extra time to prepare and train to bring students safely back into the classroom.
7/21/2020 8:57:11	Chris	Lyon	My Household	Ovelrand Park	My family is not concerned about the virus. Please reopen schools and leave them open.
7/21/2020 8:57:19	Judy	Bosshard	Shawnee Mission	Overland Park	Please accept Governor Kelly's request to delay schools.
7/21/2020 8:57:23	Carolyn	Green		Mulvane	schools should delay. Please follow Gov. Kelly's lead.
7/21/2020 8:57:34	Phyllis	Chapman		Effingham	Yes children should be back in school they be out long enough and getting very bored not seeing other kids
7/21/2020 8:57:38	Katie	P		Lansing	I suggest remote learning is the best option. But at least this the school year needs to start at the earliest in September.
7/21/2020 8:57:40	Nick	Grummert	USD 262	Valley Center	Please make the decision to keep us safe and delay the opening of schools as the governor has ordered. As an administrator and parent, I'm walking the line of keeping my family, myself, my staff and my school families safe while also remaining optimistic and excited about being back in the building. Please keep safety in mind. We can always adjust the school year and requirements. We can't bring back lives or reverse the terrible effects of COVID when one contracts it.
7/21/2020 8:57:47	Michelle	Cunningham		Oakley KS	I do not agree with kids wearing masks. I have 3 boys enrolled in our school district and refuse to force them to wear a mask and live in fear. It's time to get life back to some sort of normal for them and stop letting our governor put mandates in order so long after this pandemic has been going on. We live in such a rural area and most of us feel we've already had some wave of this virus. Late start means late sports and my boys thrive off being on the field and court!
7/21/2020 8:57:48	Christopher	Lounsbury	491	Lawrence	I am very concerned about going back to school without testing, mask requirements for kids in elementary school and a massive lack of substitutes available.
7/21/2020 8:57:49	Micah	Veatch		olathe	we must uphold the executive order to buy our schools and teachers time to prepare to keep our children safe
7/21/2020 8:57:56	Cheryl	McFall	USD233 and USD231	Gardner	Open schools

7/21/2020 8:57:55	Sarah	Keller	Shawnee mission school district	Prairie Village	Please support the delay of the school year. This is a gift of time to help our teachers/schools/districts prepare to accept students and also gives us time to get the current outbreak in our state better controlled. Why are we in a hurry. We all want to get children back IN school and I intend to send my children to in person learning when it is permitted but right now we are rushing and we don't have proper systems in place since districts are just receiving the guidance now. Thank you. Please support a healthy, planned school year for our children beginning after Labor Day.
7/21/2020 8:57:57	Heather	Inich	My family	Basehor	I strongly agree with delaying the start of the school year until after Labor Day, if our district chooses to send children back to physical school. I have a child going into 8th grade this school year. I think it will be best for the delay so that the schools can make sure that all precautions are in place to ensure the safety of the staff, students and teachers. I also am in favor of the option to have online school again. While he misses seeing his friends and having some sense of normalcy, we all know that things will never be the same as they were last year. It will be hard for teenagers to keep social distancing practices in place and the masks will most likely be a distraction to the kids which will in turn distract teachers from teaching.
7/21/2020 8:58:03	Elizabeth	Durkin	Parent	Eudora	I fully support delaying school opening and providing schools with the necessary resources to open in a safe manner. While schools are a critical part of our society, it is imperative that the state supports and leads schools in keeping students, faculty and staff safe.
7/21/2020 8:58:06	cathy	kidd	blue balley west	overland park	open school asap. the kids are the helathieat & least likely to have issues with covid. they NEED school. NEED sports. NEED socialization. stop looking at postivie covid #s and start looking at those ill enough to be hospitalized!
7/21/2020 8:58:08	Cheryl	McFall	USD233 and USD231	Gardner	Open schools
7/21/2020 8:58:08	Kennedy	Sumner		Derby	schools should delay
7/21/2020 8:58:18	David	Sharp	Family	Caldwell	School needs to get back to normal as quickly as possible. This farce needs to end.
7/21/2020 8:58:36	Cooper	Sumner		Derby	schools should delay
7/21/2020 8:58:41	Erin	Loose	Parent of a Shawnee Mission Student	Overland Park	I agree with the Governor, this gives our schools more opportunity to get ready for more in person time and hopefully allow for our cases to decrease prior to school starting.
7/21/2020 8:58:42	Julie	Stielstra	myself	Ellinwood	We are nowhere near able to keep students, teachers, and their families safe at this point of the pandemic as cases and deaths continue to rise, and I can personally testify that compliance with masking and distancing is ignored by many. Many states begin school after Labor Day anyway. This small delay is only prudent (and probably not prudent enough). Pushing kids back into classrooms is foolish and dangerous; one sick teacher will force quarantine for dozens of kids and other teachers. Be sensible, be safe. Keep our KIDS safe and delay reopening. Alternatives are already in place - rely on them for now.
7/21/2020 8:58:39	Sarah	Legleiter		Salina	I think that school needs to resume in person. I have personally seen the detrimental effects on our youth through lack of structure and hope throughout this pandemic. I believe that if we take necessary safety precautions, we can provide our kids with a healthy learning environment on a normal timeline. Please consider the mental/emotional/social consequences of delaying school any further.
7/21/2020 8:58:56	Kristen	Hummel	Parent USD475	Fort Riley	I support the Governors order to delay the opening of school. This provides school districts and parents more time to prepare for the opening of school. The number of Covid-19 cases are rapidly growing across the state. This also allows time to see what will happen in the next couple of weeks. Delaying the start of school is not only wise for preparation but it is the safest option. The priority should be the safety of not only the students but the teachers and staff. If an outbreak occurs and our teachers become sick our kids can't learn anyways. Health and safety should always come first. The lives of students and teachers should be the priority. Thank you for your time.
7/21/2020 8:59:00	Terrance	Saunders	Blue Valley West Parent	Overland Park	I believe schools can safely and effectively start up with school and sports after labor day (Sept. 7th) as governor Kelly stated. We/ our kids need in person contact and sports (for those that want to participate) in activities due to social & emotional wellbeing.
7/21/2020 8:59:03	Daniel	Klinger	Kansas resident	Phillipsburg	With the virus increase all around us it is a very risky move to send students and teachers back to school. There has to be other options at least until the virus cases begin drop.

7/21/2020 8:59:03	Kerry	Perrier		Wichita	Delay school until Labor Day to help provide time for the virus to be better under control. Remember we are 2 weeks behind seeing what is going to happen due to the incubation time of the virus. The teachers & administrators will have more time to prepare & create strategies for productive teaching. Also, if the virus is better controlled the staff would be less at risk.
7/21/2020 8:59:03	Ashley	English	Teacher	Topeka	Please allow school buildings to remain closed so that staff and be properly prepared for the guidelines that were just recently released but much more importantly so that students and staff can be safe.
7/21/2020 8:59:08	Ann	Lounsbury		Lawrence	Please support Governor Kelly's Executive order so that schools can open safely. There are too many unknowns with this virus. Delaying could help us be able to stay in school longer and avoid interruptions. Protecting the lives of students and teachers should be the number one priority. Thank you.
7/21/2020 8:59:09	Danielle	Young		Eudora	We shut down school in the spring for very few cases in our county and now that cases are spiking we are going to open schools? Student health may be impacted mildly by the virus, but what about staff and those they take it home to? There is a large number of students raised by grandparents or have grandparents living with them not to forget the possibility of parents with underlying health issues. The 2nd highest group of positive cases in our county is 10-19 year olds. Opening schools and then spikes will only result in another shut down why start out face-to-face only to end up going remote
7/21/2020 8:59:11	Erica	Waters	None	Arlington	I agree with the Governors decision. Our counties chose to disregard any recommendations given by medical professionals and we are now in worse shape than when we shut down schools in March. We have to get a hold of the situation before sending kids and staff into classrooms face to face. Had political slanting not taken place, we probably wouldn't even be having this conversation right now. This is a public health issue, not a political one, and I am not a fan of politicians using Kansas kids as bait to try and force a return to "normal" when it's is not safe to do so right now. It is not fair that we ask school staff to put themselves on the front line of this pandemic when we don't even have a handle on the situation. I have a sister who teaches in Wichita. She and her husband are making sure they have wills and last wishes in order should she contract Covid and it hit her really hard. That is what we are asking staff to face should we return before it is safe to do so. The first decision to close caught many of guard and districts had to scramble to come up with lesson plans for distance learning. Having already done that for half a year, many districts are better prepared and have seen what works and what doesn't. I believe school can be done distance or hybrid without losing quality of education this school year. We have to let educators and health professionals work together to do what is in the best interest of students and staff and not force them into an unsafe situation. Otherwise we will see an even steeper shortage of teachers in Kansas. A problem we've been facing for a while.  If we want kids to have any kind of normalcy by the end of the upcoming school year, we have to be proactive now instead of just responding when our poor judgement results in big clusters. I have 3 kids high school and middle school age who want desperately to return to school. But, they also understand science, and know that it may need to be modified for everyone's safety. Masks and social distancing work, we have to be ok with that. At least for time being. If we don't follow suit now, I fear we will regret it. Please don't buy into the political spin on any of this. You are all educators. Trust science, facts, and the experts who are giving recommendations. It's your job to keep Kansas kids and school staff safe, please do so.
7/21/2020 8:59:11	Lori	Doolan		St George	Open school on time. We are ok wearing masks during school time. We need the option of starting in August not September.
7/21/2020 8:59:12	Carter	Sumner		Derby	Delay starting
7/21/2020 8:59:13	Chris	Sprague		Gardner	It is your responsibility to protect both the children AND the faculty of all the schools you govern. If medical professionals say it's not safe for everyone to return, you should not ignore this.
7/21/2020 8:59:21	Penny	Massing		Cuba	I am a teacher and a mother who supports the delay in reopening schools. We need time to plan according to the Change documents and mandates. And we want school to happen in the safest way possible.

7/21/2020 8:59:22	Kelly	Jorgensen	Citizen	Ottawa	I don't believe there is a good decision for school reopening. All options are bad. Having said that, I believe the governor's order is valid for the interests of public health and I support her decision. I am very frustrated that politics has thrown reasonable health precautions out the window, and put everyone's health in further jeopardy. Thank you.
7/21/2020 8:59:36	Susan	DeVore	Retired teacher	Lawrence	Please do not reopen schools until after Labor Day and even then only if there is a downward trend of new COVID 19 cases during the entire month of August.
7/21/2020 8:59:39	MK	Jones-Peterman	My family in Shawnee Mission School District	Overland Park	Delaying the school year's start is the right response to our current situation of rising COVID numbers. Gatherings of large groups of students across the state when our COVID numbers are peaking everywhere is a bad and entirely avoidable idea. Teachers need more time to prepare for contingency plans once districts finally hear your ruling and can choose how to proceed.
7/21/2020 8:59:46	Feiyan	He		Overland Park	Please start the fall semester on time, but I would like have my kids attend online class
7/21/2020 8:59:46	Craig	Tennis		Spring Hill	<p>First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.</p> <p>Second, I am writing to you in preparation for the Kansas School Board of Education Vote on the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <p>Safe School opening following the Board of Education Return to School Plan</p> <p>No delay to student participation in school, athletics, and activities.</p> <p>In response to the mandate delaying school opening statewide, please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.</p> <p>Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>I am one of the over 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.</p> <p>We all are thankful for the leadership you have provided.</p>
7/21/2020 8:59:49	Cody	Sumner		Derby	Follow Gov. KELLY, delay school
7/21/2020 8:59:53	Johanna	Noriega		Junction City	Yes to delay the start of the school year. Schools are in need of time to prepare. I would rather have e-learning for the entire first semester.

7/21/2020 8:59:59	Laurie	Bruce	Parent and Math Teacher Leon/Bluestem	Rural Augusta	<p>Are teachers essential or not? Are we doing more harm by keeping students out of schools? I am of the belief if we don't work we shouldn't get paid, if this threat was made I guarantee the "scared" teachers would be on the job. Day cares have been open, summer workouts at schools have been opened at many schools, camps, churches, gatherings, swimming pools, summer baseball/softball has been going on here...it is time for schools.</p> <p>And the mask mandate should be an individual choice. This is like instituting a school wide dress code. Why force everyone, including teachers, to wear a mask? I do not wear a mask and when I see anyone with a mask I can guarantee you they are very unsanitary. I see then touched repeatedly, stuffed in pockets to be put on right before entering a store, pulled down to have a conversation with someone...I have yet to see them used correctly. Just one more divisive and forced compliance issue. I live in a county that masks are optional, why as a public school teacher does the governor tell me in a taxpayer supported facility that I must wear a mask?</p> <p>The overreach has gone to far. Either teachers are essential or not?</p> <p>Thank you!</p>
7/21/2020 9:00:01	Robin	Wacker	Lansing USD 469	Lansing	As a food service worker in a high school, and a mother of a child with special needs (autism & ADHD), I'm VERY concerned about the safety of myself and my child returning to school as the number of coronavirus cases continue to increase. The virus is NOT political. The virus does NOT discriminate. We can NOT play Russian roulette with our health, ESPECIALLY when it comes to OUR children.
7/21/2020 9:00:24	Kasey	Winegar		Fredonia	I am in favor of pushing school back to after Labor Day so schools and educators can rightly prepare for the new world of covid and education.
7/21/2020 9:00:28	Anna	Nippert		Wamego	If the State School Board votes to uphold the EO, please also address the ability to give a waiver to the 1116 hours of required education time. The EO will either result in schools going way into June, or it will require decreased holiday breaks, spring break, etc. I don't believe either is in the best interest of our kids. Thank you for the work you do.
7/21/2020 9:00:30	Rev. Charles	Kerschen	Episcopal Church	Cunningham	Please keep schools closed until after Labor day.
7/21/2020 9:00:28	Marilyn	Fronk		Manhattan	Please vote in favor of delaying the start of school. We should take all precautions to protect our children, school employees and their families. This is the right thing to do.
7/21/2020 9:00:32	Erin	Giebler		Hays	Please let local school districts decide when to open schools and what restrictions to take. They will work with local officials, teachers, and parents to make the best decision for their school district. 1A schools and 6A schools are different and should not all be lumped together. It should be individualized.
7/21/2020 9:00:35	Darcy	Hoke		Manhattan	Please wait to send kids to school until we see considerable improvement in our local cases or a vaccine is available.
7/21/2020 9:00:56	Cassie	Crotts	USD 253 parent	Emporia	I agree with the governor's order to delay the start of school in order to allow time to obtain all necessary safety equipment, and that when school does open, masks should be used by staff and students. If grown adults are still balking at in-person meetings, how can we throw our kids into that fire. It's our greatest job to protect them.
7/21/2020 9:01:04	Jose	Izazaga		Wichita	Delaying start of school was great news to me. There is nothing more important than the safety of my children and their teachers. The worst decision that can be made is putting something else first before them.
7/21/2020 9:01:06	Hannah	Kemp		Overland Park	Do not delay the school year. Children need to be out of the home and around other adults to make sure they are safe. Child abuse, malnutrition, and Suicide are all things that teachers work hard to recognize, report, and see changed. Too many kids are hidden away at home right now in conditions we can't even fathom. Do it safely, but reopen.
7/21/2020 9:01:07	Katie	Jenne	USD 435	Abilene	I think it should be up to the district on when or how school starts. I have heard from our superintendent and it sounds like they already have a plan in place and supplies that the district will use for the school year. We are also a county with a low Covid positive count.

7/21/2020 9:01:16	Susannah	Schmidt		Manhattan	I don't think we should delay the opening of schools. Another wave will probably happen this fall/winter and we will have to close school buildings again. But we know that kids, especially the younger grades, learn better face to face. Let's get them in the buildings and learning now, before we have to move online! You are also inviting a lot more exposure into our schools if you let people continue to travel for long periods up through Labor Day. If we are in school, fewer people will travel and thus we will hopefully have less exposure for everyone.
7/21/2020 9:01:17	Melissa	Sherwood	Blue Valley	Overland Park	As a teacher I approve the delay. I am very nervous to go back and potentially spread the disease to my family.
7/21/2020 9:01:31	Stacey	Marney		Topeka	I believe the Board of Education should vote down the Governor's Executive Order and allow each district to make the appropriate guidelines for their students and staff.
7/21/2020 9:01:33	Tracy	Lindsey	My Child	Blue Mound KS	I feel we are doing our children a injustice by not allowing them to go to school. Put mask on them if need be. But get these kids in school. I don't care how but get them back in school. This whole Covid-19 has been blown out of proportion. Stop playing games for political purposes.
7/21/2020 9:01:38	Marcala	Skinner	Parent	Hugoton	This virus has been around and is going to be around just like all viruses and we can't keep closing, pushing back dates or canceling things. We will not build immunity to it if we stay locked up. Both our grandparents got it (ages 89 & 90) and they both survived, and they got it from their in home nurse. Stop being scared like the media wants us to be and let's show them how tough we really are.
7/21/2020 9:01:42	Torrie	Weber-Jones	Parent of High School S	HAYS	I fully support the the mandate that has been proposed. I want my teenager back in school, but not at the expense of teachers and students health. I live in a community that has done nothing to stop the spread of this virus. They refuse to wear masks, including our educators, citizens, and local government.....why would I trust any of them to do the right thing for our children and teachers. They have had all summer to make a plan to keep our children and teachers safe and they can't even answer simple questions on their plan to do that. No matter how you rule....I will not send my child back to school until someone can assure there is a safe plan in place for our teachers and children. This is not a time for politics, it is a time to come together for the safety of or children and our communities. Our local county commissioners last night said they were tired if hearing about it, masks don't work, and they delete any emails pertaining to wearing a mask.. this is the mentality of our community leaders.. so I don't for see anyone following the rules at schools either...they cannot be trusted to do what is right for our children and teachers. Thank you!
7/21/2020 9:01:57	Brandi	Balk		Assaria	I believe we should be sending our kids to school. I also don't think masks are necessary, actually I believe they would only provide a distraction to the younger kids. If we are taking all of these precautions for COVID then why are we not doing the same for flu season? We are only setting our kids up to fail in the future by not sending them to school as normal.
7/21/2020 9:01:59	Miaoju	Luo	My Kid	Olathe	School should start at its normal time. Teachers online teaching is fine if pandemic is spreading. Then in person class can be judge base on circumstance. Some classes (such as debate and PE) can be arranged outdoor to help to immunize the expose of the virus. Thanks.
7/21/2020 9:02:01	William	Friesen		North Newton	We must do the responsible thing and delay start until it can be done safely. Please pay attention to the science, data, and CDC and not the politics. Our students and our teachers deserve our respect.
7/21/2020 9:02:02	Ronald	Means	N/A	Hutchinson	For the safety of our children and school staff, I recommend keeping schools closed as per Governor Kelly.
7/21/2020 9:02:03	Robert	wise	Law Enforcement	Wichita	Schools need to open sooner rather than later. Most citizens do not see the way this crisis is affecting our youth. More kids than ever are needing a safe place like school to continue to get by rather that be with support or even a constant meal. Please open the schools at the earliest time.
7/21/2020 9:02:12	Gabrielle	Carroll	Geary County 475	Junction City	Please vote to start school "on time" (for us Aug 17). Kids need to get back into a routine. Parents need to get back to work. Continually changing the date and moving it back is stressful not only for parents but kids as well. Single parents, dual working parents, parents going back to colleges that are still starting on time, and even daycares are in limbo. We need a SET answer. Cases will continue to rise and fall as this is a virus and is GOING to spread. But we need to push forward as community and start living life again.
7/21/2020 9:02:16	Jara	Hansell		Gardner	Thank you. Don't wait to reopen

7/21/2020 9:02:18	Jennifer	Gay		Lawrence, KS	<p>I do not feel schools should open under the current situation with our COVI-19 positives and death climbing. To do so would either be to decide that we aren't going to try to minimize the horrible impact this virus can have on individuals in our community, or we are trying to open school to get a few days in before it has to be completely shut down (which I question weather it's worth that). I understand people need public school for childcare, but that is not the purpose of public school. Our society has put families in a position to have no bandwidth and resources in a crisis like this pandemic, and I do not think it is right to depend on public school to take on the burden of saving the day despite the public health risk for the teachers and the child. States that are opening schools as normal WILL have teacher and children deaths. I ask all leaders who have a say in our we proceed, will you be able to sleep well at night knowing year books will include pages for those who died due to COVID-19? There was this myth that children don't get it, but after a County in Texas found many infants infected, and the study out of South Korea found kids 10 and up pass this germ as easily (if not more because of lack of social distance) than adults) we know that isn't true. I understand lack of childcare will be a great hardship for some people if the kids are online, but let's call it what it is. I need for daycare. Here in Lawrence we have Boys and Girls Club that could help with that.</p> <p>I learned a few days ago a guy I went to high school died at age 37 of COVI-19. To say we know young people and their parents should be fine if they contract this virus is playing a game of Russian Roulette. We just don't know. Please consider making school closures and opening based on the level of infection in the state. We need to go in this proactively instead of reactively, which means not being in denial about our current situation.</p>
7/21/2020 9:02:26	Sandra	Pointer	None	Linn Valleu	<p>Why would a childs life be less important then an adult???adults are working from home, bars closed, small business you know whats closed. No to opening schools</p>
7/21/2020 9:02:29	Lisa	Cummings		Leawood	<p>I feel it is very important to get the kids back in school for their mental health. Humans need social interaction in a learning environment to thrive which they have been deprived of for well over 4 months now. Kids are bored and need structure. They tend to not retain a lot of their learning over regular summer break and with this big gap I fear kids have lost even more and we are jeopardizing their education and putting them at risk for failure. There has been plenty of time to prepare since schools closed in March and I believe we need to return to school as planned in August and not delay until after Labor Day for our children's mental well being so they can continue to grow, be successful and happy.</p>
7/21/2020 9:02:30	Janie	Bishop	Pratt County taxpayer	Pratt	<p>Open the schools up at the usual time. Students are getting behind academically. Students need interaction with their peers, and need to be a part of sports, bands, and clubs to mold them and prepare them for the future. Open up schools in August, students need to learn by teachers.</p>
7/21/2020 9:02:40	Todd	Elsen		Hays, Kansas	<p>I'm an educator at Trego Junior High in WaKeeney, Kansas and I support the Governor's plan to open school after Labor Day 2020. Reason one, this will allow all school districts to secure what they are going to need for opening schools. PPEs, disinfectant wipes, hand sanitizers, etc. Reason two, this will allow school districts to plan out how to social distance in the school building. I have gone back into my classroom and spaced out desks 6 feet apart from one another. I can fit 7 desks in my room. I have a class of sixth graders at is 43 students. With social distancing I would have 6 classes of 6th grade alone, I also teach 7th and 8th grade. The school district needs time to plan with the teachers how classes will work. I agree that we need to figure out how to get students back into the classroom, they need that socializing and community, but if we are to pull this off and stay in school all year we need more time, the Governor's plan helps give us that. Reason three, starting after Labor Day could help with allowing classes to open windows and getting fresh air into the rooms. This is not a political decision, when I went to school we started after Labor Day and finished after Memorial Day it isn't a big deal on the start date, the big deal is the safety of our students and staff. You our representatives in the state house need to listen to the people who elected you. If they are saying open after Labor Day approve it! This isn't about power, it's about safety, we aren't give up liberties wearing masks and open school after Labor Day we are thinking about the future. The world is a much different place now and the thinking of the past doesn't work anymore we must adapt approving this proposal is the first step.</p>
7/21/2020 9:02:53	Danielle	Yulich		Kansas City	<p>The health of our children needs to always come first and that is exactly what Gov. Kelley is doing with this order. I support it 100%.</p>

7/21/2020 9:03:03	Brandy	Schoenberger	Parent	Wakeeney ks	What will three weeks really help, these kids need to go back to school normally scheduled time!!!
7/21/2020 9:03:11	Amy	Reif	De Soto School District	Lawrence	Please keep schools closed until it is safe to return!!!
7/21/2020 9:03:12	April	Kohrs		Overland Park	Please support the order to delay the start of school to give schools time to gather supplies, adjust to safety guidelines, and to keep teachers and students safe.
7/21/2020 9:03:10	Cathy	Baker		Shawnee	I think that masks on children in school are detrimental to their health. I do not want my 2nd grader wearing one for 7 hrs aday.
7/21/2020 9:03:20	Rayna	Bolen		Pratt	Good morning, I feel that it is very important to get these students back into school to have a routine, structure, and somewhat of a normalacyfor that student(s). With that being said I think we need to wait til after labor day, so teachers have a concrete idea of how things are going to be ran and have time to organize and situate their classes, classrooms, supplies, have a plan if it is switched at the last second for online. I understand this is new territory for all. Yes we need to get kids back in school. Yes Teachers need time to adjust and prep for how the year will go. Vote after labor day.
7/21/2020 9:03:31	Rhonda	Zheng		OVERLAND PARK	We think it will be very beneficial to open the school on time, with online classes in the first 3 weeks before labor day. The students are in isolated environment, without online or in-person contact/study for too long. It created very high anxiety and stress to the students. Having online, teachers lead, structured classes will help the students go back to routine, start to focus on study, and erase some tension.
7/21/2020 9:03:32	Kerry	Anglin	USD 416	Louisburg	School should NOT be delayed. Science shows that with proper protections, children in school will have minimal risk. The greater risk would not be attending school. School districts have had 6 months to prepare for this, let the kids get back to school and continue their education. There should be an option that if some don't feel safe, they can start school at home. Delaying school for the entire state when the majority of the state is not in a crisis is causing problems for schools that are ready to begin classes.
7/21/2020 9:03:44	Sarah	Craig		Andover Ks	It's an over stretch. The cities that have let this run its course are seeing no flare ups this time around. Dodge city was a hot spot during the first wave and they're doing fine now. We have to let it run it's course or we'll never get over the hump. We have to protect the immunocompromised so let's create exceptions for them and let the virus run it's course.
7/21/2020 9:03:47	Shad	Allen		Saint George	My wife is an aide at Saint George Elementary School and it would be safest for her and my children to delay the opening of schools. Teacher and student safety need to be the first priority. Thank you.
7/21/2020 9:03:52	Marcie	Riley		Pittsburg Kansas	I fully support pushing the start date until after Labor Day. I vehemently disagree with the suspension of athletic training until then. These student athletes have been conditioning all summer without any student coming down with COVID-19. Please allow individual districts to implement what is best for their district. Wichita, Manhattan, Topeka and Metro KC area is far different than Pittsburg, Liberal, and other smaller districts. I trust my local administrators over Wagle and her backwards thinking group. She hasn't stepped foot into a public school since one room school houses were around. Her and many others are so out of touch with current realities.
7/21/2020 9:03:52	Christina	white		Gardner	I fullt support Gov. Kelly's executive order to delay the start of school. It is imperative our children, teachers and staff return to school safely. With the increase in cases of COVID, school should be delayed until a solid plan can be devised for whatever school will look like for this year.
7/21/2020 9:03:54	Cheryl	Standridge	Lighthouse	Overland Park	Please allow for the individual school districts to decide for themselves when it is best to open schools.
7/21/2020 9:04:22	Jennifer	Ludowese		Colby	I am for everything EXCEPT the face masks. There is more bad that can come from wearing a face mask all day long than no wearing one at all. Also there is no reason to hold school until September 9th. Let's start on time.
7/21/2020 9:04:28	Melissa	Vancrum	None	Lenexa	Please heed the warning of rising COVID-19 case numbers and delay the start of the school year consistent with the Governor's order. Sending children back to school too soon will be disastrous for the students, teachers and administrators and everyone else that they come into contact with in their lives. This virus cannot be contained without paying close attention to the warnings of our public health officials, scientists and doctors. It is too soon.
7/21/2020 9:04:29	Melissa	Salsbury	My family	Overland Park	Please uphold Gov. Kelly's Executive Order pushing back the start of school in Kansas until after Labor Day. This is a very easy approach to getting more traction towards achieving a safer school environment in September.

7/21/2020 9:04:32	Jolec	Berroth	None	Topeka	School year needs to start immediately after Labor Day. No more pushing it back. The virus is not going to be eradicated. We've slowed the spread enough. The risk kid to kid is minimal and even kid to adult is very low. We have to get back to normal lives at some point. You can't rely on distance learning until there's a vaccine. Half the people will not be getting it anyway. It's been fast tracked & skipped animal testing. Absolutely NOT safe to give to our children. And the virus will continue mutating - it would be like getting a flu shot - not very effective and have potentially dangerous side effects.
7/21/2020 9:04:31	Lesley	Weigel		Hutchinson	please delay start to ensure safety for families in Kansas.
7/21/2020 9:04:37	M	T	Public School Teachers	Topeka KS	Please look at science, Please look at the numbers, Please accept the Governors request. How can anyone think it is safe to open up school with the pandemic like it is right now in our county! Insane. If we open then I expect all all of you board members to be in our schools all day as well. It is ridiculous to assume that no one will get sick and die from this. 1 life is 1 too many in my opinion. I love teaching, but there are MANY MANY jobs that haven't even returned to work and they are adults who CAN social distance, we are dealing with children who can NOT social distance and adults who deserved to be treated like humans- not a science experiment. Please pass the bill, its 3 weeks. My school district ordered supplies in March and they are still not here. This gives districts another month to get all the PPE and disinfectants needed for our schools. There is simply not enough time if we go back August 5th. Teachers are to report Aug 5th and we will be having our building/district meetings via zoom- how is it ok then a few days later we put hundreds of kids in the buildings? No way. Please give districts more time to get it together!
7/21/2020 9:04:55	Miranda	Illoldi	USD 217	Rolla	Our school district has made it clear that they are implementing or have implemented all state suggestions and are over preparing for our original start date. We are a district of about 120 students K-12. I can understand the larger districts will take longer to implement state recommendations. I fully support the delayed start, but as a 4 day a week school I also understand that we would be in school into June if we do. I think waiting to start and being sure we are ready is important, especially with the recent influx in cases state wide. Even smaller population counties and communities reported large increases in cases over the weekend. I am also concerned that school staff aren't taking things seriously and perhaps aren't even acknowledging the medical importance of the situation and would rather make this political. That is a huge problem with my trust in the education system.
7/21/2020 9:04:58	Amy	Freeman	USD210	Hugoton	I would ask that you consider delaying the start of school until September 9 as the governors executive order states. This would allow teachers, administrators, and staff to prepare for the new mandates and make sure we are ready for a much different school year than we have seen before.
7/21/2020 9:05:00	Katie	Waalkes		Augusta KS	I urge you to vote down this executive order. While I and many others that I know are not objected to waiting on starting back to school or wearing masks this really should be left up to the individual districts. We can not prescribe a one size fits all response to this issue and can NOT vote in good conscience that this is the right thing for every person, in every schooling type, in every part of Kansas. I'm also deeply troubled by the fact that this order extended to all private schools and included in that all homeschoolers as we are our own private school legally. The government should not have jurisdiction over private entities in this way.

7/21/2020 9:05:08	Tracey	Keeling	Parent	Iuka	<p>I have a lot of concern regarding the executive order of delaying schools and mask wearing, especially in the elementary schools.</p> <p>As a mother of twin 6 yr olds, 1 who has a learning disability and is struggling to learn her alphabet. The delay of school, after they have already had 6 months off, only puts kids with disabilities that much farther behind. Of course as a parent I work with her daily, but I am not trained to help her the way she needs. If schools are delayed I am concerned the pandemic will only get worse in the winter, which will force another shut down. Then what? Kids with special needs has to wait another year and get that much farther behind. This is going to cause self esteem issues and kids at such a young age to lose any love of school or learning. That can be detrimental to the rest of their educational years. If this moves forward with a shut down there needs to be some kind of extra help setup for kids who have special needs. Something were they can get some 1 on 1 tutoring a couple days a week.</p> <p>As far as masks go, elementary kids will not be able to keep their hands off of them, I know this for a fact, because no matter how much I educate my 6 yr olds on the importance of them and not touching, they constantly have their hands in their face playing with them and each other's.</p> <p>Good luck with the decision, i know you won't be able to please everyone, and I truly believe you have all kids best interest at heart.</p> <p>Tracey Keeling</p>
7/21/2020 9:05:16	Julie	McEathron	KCKPS and Lawrence P	Lawrence	<p>Please accept the executive order to delay the start of school for students. Additional time is necessary to allow districts time to develop plans and train staff in new procedures to minimize risk for all. Thank you.</p>
7/21/2020 9:05:17	Gail	Ryan	Blue Valley School Dist	Overland Park	<p>As grandparents who take care of our young grandchildren, my husband and I are both fearful for our own health as they head back to school. My daughter is also a teacher and is experiencing extreme anxiety over the entire situation. Allowing children to go back to school without buildings and teachers having the proper supplies and protection is not safe for anyone involved.</p> <p>As a former educator I realize the magnitude of what will have to occur for this to happen. I also realize the financial commitment this is going to cause the district.</p>
7/21/2020 9:05:18	Lindsay	Anderson	I will be a student teache	Newton	<p>Please the support the governor's request to delay the start of school. This gives schools additional time to plan and hopefully allows mask ordinances that have been recently issued across the state to slow the spread of Covid19 in our communities. The health and safety of our students and staff should be our top priority right now.</p>
7/21/2020 9:05:27	Deonta	Wade	Field Kindley High	Coffeyville	<p>This order leaves everyone in a reaction mindset instead of being proactive. I may be making this overly simplistic, but why can't we devise a plan of action for when a school or activity program is hit with a Covid case. I have yet to see a plan of action for what to do when this occurs. It will be naive to think it won't occur. As a coach we (by nature) have a plan for when things don't go out why. Also I understand moving the start of sports by, but what is the point of taking away the ability for programs and coaches to train their athletes? What good does this do? It seems to do the exact opposite. We have been going at in since June 1st and we have not had any cases. Maybe exercise is the medicine everyone needs.</p>
7/21/2020 9:05:31	Charis	Grosdidier	Eudora High school USI	Eudora, Kansas	<p>Local control is the only fair way to go on the issue of schools opening and on schools following guidelines. It's terrible to have a school of 200 following the same policy as a school of 2000! Kansas is a rural state, and should not be tyrannically ruled by blanket order. Vote down the EO in favor of local control!</p>
7/21/2020 9:05:41	Kendal	Berrey		Paola	<p>Please consider approving to governor's executive order. This will allow schools time to have everything in order to safely start the school year. I wish to reduce risk my at risk family members to exposure through these measures.</p>
7/21/2020 9:05:42	Lindsay	Bauer	Turner USD 202	Johnson County	<p>I support Governor Kelly's decision to close schools until after Labor Day. As a newly expectant mother, a few more weeks to get my mind and body right will do light years of good and truly make me ready to take on the year.</p>

7/21/2020 9:05:43	Nicole	Moore		OLATHE	<p>As a school nurse that serves a medically fragile population I fully respect and understand the necessity of in person school if it is possible. I am very tired of hearing the word "safely". Schools with this pandemic are a significant risk. Therefore, I think the reality and verbiage needs to be how do we "lessen the risk" not "do this safely". I am worried that cases are consistently climbing in our area. We need to see a declining trend before we open in a normal capacity. Additionally, I am concerned about the ability to maintain an appropriate supply of PPE and cleaning supplies for schools statewide. I acknowledge that many counties in Kansas have yet to see a lot of cases, but my fear is when these small communities, especially in rural areas of Kansas begin to see the likely climb in cases when school resumes how do they manage that when far too many of these small towns do not have adequate hospital space or resources. Typically, these communities will go to a large neighboring town or city, but what happens when that isn't an option because those hospitals are at capacity. I know we cannot shutdown over maybes, but I also would like to point out we are already see strain on the hospitals and this is before we have influenza return for it's normal season.</p> <p>As worried as I am for my own children in all that they will miss if they can't be in school "as normal", but I also worry that we will end up losing so many staff members in our schools that those mentally and emotional consequences would be greater. Even if we don't lose educators in a death sense, how many will face life altering side effects and complications from this illness. We have some of the best educators in the country and while in person is best I know they will continue to fight and do everything they can to support and teach students even if online. I'm also confused seeing all the meetings by companies, groups, organizations, etc. are limited by number of people that be present in the room, often there are plexiglass dividers, and often make Zoom (or other similar methods) the route to meet, but it is the expectation that all this goes out the window to have kids in school. I full support the use and wear of masks, but how in the world are teachers supposed to police this all day every day? How much educational time will be lost due to this? I know this is a complex and ever changing situation, but please remember that this extra time could literally be the difference in thousands of lives.</p>
7/21/2020 9:05:45	Eva	Rodriguez	Dodge City USD 443	Dodge City	<p>Why would they not open schools if they're having the DC Days Rodeo, a parade, the bars are open and PACKED, the Water Park is also open!! They're also having concerts/dances at the night clubs!!! Open the Schools!!</p>
7/21/2020 9:05:49	Alyson	Collins	Parent of three students	Olathe	<p>Please uphold Governor Kelly's order to delay the start of the school year. Teachers and administrators need that the to plan to make school safer for students and staff. And maybe that additional time will allow the trend in Covid-19 cases to reverse.</p>
7/21/2020 9:05:55	Sara	Pound		Valley Center	<p>Please delay the start of school until after Labor Day. There is a larger number of cases now than in March when in-person school was cancelled. Teachers and students should not be subject to virus exposure when places such as churches, movie theaters and other large gatherings are still closed/discouraged.</p>
7/21/2020 9:06:08	Seán	Riley	Blue Valley teacher	Overland Park	<p>Please uphold Governor Kelly's order! As a 3rd grade teacher we need time for our district and teachers to figure out how we're going to manage what is being asked of us. As it stands, we would have 4 days before students return to plan to start the year. That is enough time during a normal year but now there is so much more being asked of us.</p> <p>My classroom is structured for flexible seating which means I need to rearrange the furniture completely to create a safe environment for students. For mini in my building that means removing group tables and replacing them with individual desks. This is just one of the many things we will need to do to prepare and four days is not enough pushing to after Labor Day gives us time to plan and figure out how we're going to manage teaching in this Covid world.</p> <p>Please don't make this a political fight this is about what's doing what's right for children and teachers not a political game!</p>

7/21/2020 9:06:13	Kayla	South	Lenexa resident and parent	Lenexa (Olathe school district)	I support delaying school. At this current time we are having to make a decision without enough information about sending our children to school or not sending them to school. At this time being forced to make this sort of decision could be detrimental to so many. By pushing back the start date of school we will at least be given a few more weeks to take in the data and hopefully make a more informed decision on what is best for each of our families.
7/21/2020 9:06:22	Timothy	Wilkins	Self	Abilene	I urge all board members to except and support this order to delay schools. I am an experienced and respected public school teacher. Our schools are not prepared to implement what needs to be put in place to keep students and staff safe yet. Beginning school in just a couple of weeks as originally planned is not wise, safe, or healthy. Please support the governor's order to delay schools.
7/21/2020 9:06:34	Melissa	Kasprzyk		Topeka	The Board should approve the executive order and delay the start of school until after Labor Day. That additional time will allow teachers time to prepare for an unprecedented school year.
7/21/2020 9:06:37	Brandi	Reinert	Parent	Ness City	I do feel that delaying school is in the best interest of the students to start all of them at the same time. In our household both parents work outside of the home to provide for the family. Going to complete online classes puts us at a disadvantage to other households. As neither of us work jobs that can be done from home. Getting the kids back in the classroom should be a top priority and I do feel that can do that safely.  As for face masks my students are in PK and 1st. That is a hard age group for them to keep them on. And over time I know my 1st grader will wear one with minimal issues. I do have a problem with wearing them in the classroom and on the bus. With students that don't have to wear them for after school activities. I feel that if its okay to not wear for after school activities then that dismisses wearing them during the school day.  I am also a parent who does not go out to eat or walks into many shops. I do not feel that enough of our society it takes this seriously and I for one do not want to see my child sick and missing school because of someone else's choices during this pandemic.  Also, the questions come up about health of students. What are going to be the requirements to stay home with a fever? What if someone in the household must quarantine or has tested positive for COVID or the Flu? There are more questions than answers at this point that I feel each district or private school should have been addressing during the summer break.
7/21/2020 9:06:40	Laurie	Spencer	Family	Kansas City, MO. 2 sons	Please open the schools for our children
7/21/2020 9:06:41	Lori	Vilkanskas	Myself	Manhattan	Please do not delay school opening. It is critical that the children get back into the classroom and this decision should not be made by the governor, it should be made by the schools. Parents can decide if they want to take their kids to school, just as they have decided if they want to continue playing out of town baseball, going out to restaurants, visiting friends (which has happened all summer). I also encourage you to consider all of the children that do not have a healthy environment at home, and school is the best place for them. They need structure, a social environment, and of course a challenging curriculum (which is not found by home schooling). If daycares can remain open, why can't schools open as scheduled?
7/21/2020 9:06:42	Michael	Torkelson	Shawnee Mission School	Prairie Village	Waiting to open schools until after Labor Day is certainly an appropriate measure here in Johnson County. In rural, low population locations around the state, they may be able to adequately follow health guidelines for stopping the spread, but it's not possible in Johnson County schools. We need to enforce mask-wearing now to get this under control first.
7/21/2020 9:06:43	Xizhi	Zhu		Overland Park	There is no reason to have any state-wide restrictions. Kansas is a big state, and many counties have just few or even zero cases since the beginning. There's no reason not to allow schools there to open.
7/21/2020 9:06:43	Xizhi	Zhu		Overland Park	See the stats here: <a href="https://www.coronavirus.kdheks.gov/160/COVID-19-in-Kansas">https://www.coronavirus.kdheks.gov/160/COVID-19-in-Kansas</a>
7/21/2020 9:06:52	Cynthia	Howard		Colby	Please do not mandate that our children wear masks all day at school. I believe in frequent hand washing. Look at each district separately. Thank you!

7/21/2020 9:06:54	Brenda	Janzen		Oakley	If we are taking the necessary precautions: temperature checks, face masks, social distancing and hand washing, we do not need to delay the start of school. Schools should have been working on contingency plans all summer to be prepared.
7/21/2020 9:06:55	Kate	Murray		Salina	IF you plan to START school in Hybrid Mode or Online mode please start in August. IF you are going to start in September I think you should start full time- 5 day classes. If nothing, we have learned that it takes WEEKS for new routine to be put into place and kids to get into a good rhythm.- They have already missed out on so much. Require masks and get it started!
7/21/2020 9:07:01	Jay	Adkins	Teacher	Emporia	The protection of our students and educational staff is very important in making this decision. I hope you can see this as a nonpartisan issue and do what's best for Kansas
7/21/2020 9:07:05	Terri	Liggett	USD382	Pratt	I agree with the EO. I think that local people feel pressured to try to please as many people as they can and therefore are not always willing to do what is needed. Take the mask order for example. Originally our county opted out of the order and only came back to opting in after all of our local doctors wrote an article supporting it. Even with all of this a lot of residents are upset. If our community wants to stay in school in person as long as possible and our students have the ability to participate in activities I think that the EO's need to be implemented.
7/21/2020 9:07:12	Sara	Hayhurst	Public school	Rose Hill	As a parent and teacher, I am very concerned about going back to brick and mortar school. I am very worried for several of my colleagues and students that fall into the high risk category. I am also worried about taking this virus home to my children- who have decided to do online schooling this year. Please hold off on the start of school to give us educators time to adequately plan for online learning and give some time for numbers to hopefully go down so that some can get back into the school buildings. This issue cannot be only looked at from the viewpoint of how the children will be affected. The staff needs/concerns/risks should also be considered when making decisions.
7/21/2020 9:07:12	Ashlynn	Sandoval-Dooley	USD 266	Wichita	I stand with Governor Kelly. I believe that for the safety of our students, teachers, and other school personnel schools should remain closed until after labor day. Also, upon returning to school masks should be mandated. Please consider the safety of all when making this decision.
7/21/2020 9:07:16	Brenda	Gutierrez	North Central Kansas Fe	Salina and Downs	Vote to Delay  Delaying the beginning of school until after Labor Day will give local school boards and administrators time to digest the Kansas State Board of Education recommendations for opening school in a safe manner.  Many teachers, para-educators, cooks, custodians, school secretaries and administrative assistants and administrators are already in high-risk categories. They need every option and opportunity to go back to school safely.  County governments are doing what they are able to support the increased sanitation and disinfectant procedures but they also need time to absorb the cost and meet the new standards.
7/21/2020 9:07:17	Kim	Allison	Parent of Middle School	Pittsburg	The delay of school for several weeks to allow the schools to prepare for students in this new health situation is not an unreasonable request. Asking students and staff to wear masks to protect each other is not an unreasonable request. I urge you to enforce the governor's order. Don't listen to groups or individuals who make arguments against this order based on politics or unfounded fears. Stick to the science and common sense solutions to public health. This issue has nothing to do with individual freedoms—health and safety of Kansans is what to focus on. We can find a way to make sure our students still get a solid educational experience. We can find a way to give them their sports and arts and music. It's heartbreaking that my senior will not have the same experience as students before her, but the steps we take to keep the virus from spreading immediately only increases the chance for some normality. Vote to support.
7/21/2020 9:07:24	Jennifer	Frier	Summit Trail Middle Sc	Lenexa	Please give us time to make solid plans, safe practice routines, and adjustments to our new "normal" before returning to the classroom. It would be ideal to avoid starting and stopping several times. Let us meet as staff and solidly prepare for an after Labor Day start to school. Thank you.

7/21/2020 9:07:26	Lori	Gabrielson	Personal	Wichita	I am a local teacher. I so badly want to return to school as normal. I am fearful for myself and fellow staff members if we are to return to school under the current conditions. It is not the same as working in an office or even a bank and now stores where you can achieve social distancing and have the aide of a plexiglass partition. I have taught for 32 years and I cannot begin to tell you the germs I have "shared" with my students. I know it is a hardship for parents to have their students at home but these are extreme times. I think we cannot be ok with a few teachers dying. That may happen but it needs to be despite all of our best efforts to prevent that. If we can say we did everything we could and we lose students and teachers that will be different. Please delay school so that we can make our best efforts to keep teachers and children safe. I don't want to volunteer to be one of the few we lose... nor do I want my little neighbor to be the child who does get it and doesn't survive. I think a lot of this boils down to thinking about people and not a number. Numbers are anonymous but when you start putting faces to them it hits you a lot harder. Thank you for your work always but especially during this life changing time.
7/21/2020 9:07:26	Cari	Haning		Pratt	COVID numbers are rising so fast it's way too risky. The governor is correct putting children and staff in an enclosed space for such a long time is the opposite of what we should do right now!
7/21/2020 9:07:31	Jacquelyn	Forssberg		Pratt	I ask that we resume school at the 8/12/20 date already established rather than pushing the start date back to after Labor Day. Thanks for your time.
7/21/2020 9:07:34	Shandi	Lang	Self	Fowler	Public schools need to open according to their usual school calendars. Do not make us wait until after Labor Day and do not postpone school indefinitely! I teach Middle School. I am a mom to children who attend public school. This virus, with a 98% survival rate, is NOT the problem. The problem is children at home with no face-to-face instruction, sports, or peer interaction; it is negatively affecting our children! Let us resume school!
7/21/2020 9:07:47	Kayla	Rathbun	Self/family	Hays	I do not feel it is safe to reopen schools. Not even after Labor Day unless there is a significant drop in cases.
7/21/2020 9:07:48	Adam	Liebentritt		Overland Park	Kids belong in school. The long term social and mental effects of them being out of school are far worse than Covid. Even Children's Mercy has come out in the last week advocating for kids to be back in school. Elementary school kids should also NOT be required to wear masks. It will be a distraction, they will not wear them properly anyway, and it will effect there ability to learn as they will not be able to see other kids mouths moving and they will not be able to speak and hear as clearly.  Kids will get Covid, they will be fine, and they will benefit from coming back to school. The under 18 mortality rate does not warrant keeping these kids out of schools. They have already spent the summer in daycare programs, Y Care programs and team sports.
7/21/2020 9:08:04	Ashley	Nix	USD 332 Cunningham	Pratt KS	GET THESE KIDS BACK IN THE CLASSROOM.
7/21/2020 9:08:13	Kayla	Skiles		Wichita Kansas	I am a teacher at USD 332 and I believe school needs to start at its normal time. Kids need the structure of school and they need to interact with their peers. For a lot of kids school is their only safe place, for some it is a life or death matter! Our school is very small and able to follow social distancing guidelines. I also believe that children prek- 6 should not be forced to wear a mask. It will cause more problems than good! That is just begging kids to touch their faces more!
7/21/2020 9:08:28	Janna	Patterson	Parent of Special Needs	Olathe	Our kids have been out of school too long as it is. Not everyone is equipped to do homeschool and/or virtual learning. Children need education and social interaction to develop and thrive. We need to send kids BACK TO SCHOOL!
7/21/2020 9:08:38	Julie	Eddy	Goddard USD 265	Wichita	I fully support a delay in school beginning until after Labor Day.
					We want our kids in school full time. If grades 7-12 have to wear masks, we would be willing to do that to have them in school. However, we are sensitive to those who do not feel safe. They should have the option for online school.

7/21/2020 9:08:40	Charlotte	Muñoz	USD501	Topeka	As a teacher, I am asking that all in person schools remain closed until after Labor Day. Students should be able to learn online, but being in schools in crowded buildings is not safe. I am a caretaker for a child with Cystic Fibrosis, a terminal illness of the lungs. While we decided that she and our other children will be homeschooled this year, I will still be required in the buildings potentially bringing this home to her. Her grandmother, another caretaker of her, also works in the public school system. As a classified staff member she is not being paid. If we were able to learn online, she would be able to get paid and not risk bringing COVID-19 home to us all. Please consider the safety of our staff, students, and their families.
7/21/2020 9:08:46	Nick	Quenzer		Colby	No Late Start
7/21/2020 9:08:51	Gina	Lueger	My home	Beloit	I would like to see decisions regarding school delays or cancellations, as well as any relevant safety measures, left up to local school districts, as they know the local situation best.
7/21/2020 9:08:55	Jennifer	Schreiber	Blue Valley School	Overland Park	School needs to be in person with sports and extracurricular activities. The social and emotional benefits of this issue far outweighs any health risk from Covid-19.
7/21/2020 9:09:06	Darin	Snyder	Colby school district	Colby	I personally think these kids need to get back to school on time.
7/21/2020 9:09:08	Patrick	Murphy	my children and grandcl	Wichita	<p>Please reopen schools as regulary scheduled. The recent increase in positive tests is simply due to so many more people being tested. In April and May if you were a younger person or not in a high risk category, you essentially could not get a test. Now, virtually everyone can be tested. (I was even tested 2 weeks ago because my assistant had tested positive.) THERE ARE MORE CONFIRMED CASES NOW BECAUSE THERE ARE MORE TESTS AVAILABLE! IT IS NOT BECAUSE THE DISEASE IS MORE PREVALENT!</p> <p>Next, there is no compelling evidence this virus is meaningfully more deadly than influenza. The State does not modify school attendance each year when the flu becomes active and causes people to die. The State did not modify school attendance in 2008 when the H1N1 virus was active and causing people to die. The State does do not modify school attendance to account for the deaths of students, parents, and grandparents from traffic accidents as they travel to and from school. If you delay school this year for covid 19, then you must explain why you have never done so for the flu. A death is a death. Each year in the past you have knowingly allowed schools to function and children to infect each other and their families with the flu. People have died because of this. Any decision to delay schools now must have an accompanying explanation for why you allowed those deaths from the flu in the past.</p> <p>The question is not whether there is a risk of some people getting covid 19; some people will. The question is whether this risk is so great that you affect the students, parents, teachers, and the entire education community.</p> <p>Proponents of delaying or keeping schools closed primarily cite the asymptomatic carriers of the virus. They say students will have it; they will spread it to other students and staff; and then those people will unknowingly spread it to other people. If this is true, then you must agree that the disease is far more widespread than positive tests have revealed. If it is far more widespread, then the mortality rate is much lower than currently described. Therefore, the very argument for keeping schools closed defeats the argument about the risk. If an unknown number of people have it and survive, then we do not know the mortality rate. If we do not clearly know the mortality rate is higher than the flu or other risks, then we should not act as if it is. The reality is this virus does not present a verifiable risk that is greater than that of the flu.</p>
7/21/2020 9:09:19	Rebecca	Coyne		El Dorado	I am a kindergarten teacher in a small rural school where people do not believe this is real. As much as I prefer to teach in the classroom and love being with the kids I am nervous about going back because I don't feel like it is safe. I am good with postponing our start date but even starting in person after that I am still so nervous to do.

7/21/2020 9:09:28	Melissa	Pinkney		Hays	<p>I live in a county where the rate of infection is on the incline. Our local leaders decided last night to say no to the mask mandate, for the second time, despite knowing our numbers were climbing. I can only imagine our numbers will get worse before they get better.</p> <p>As teachers, we are told our students learning is affected by their feeling of safety in their environment. Do we want kids showing up to school afraid, no, never, but we should also think the same for our teachers. Workers should feel safe in their environment, period. Our aging staff who cook, clean and work support jobs at our school need to be thought of, not just the students.</p> <p>If there is the slightest bit of hesitation in your decision, err on the side of caution. That's what any good parent, boss or logical adult would do. I plead you think about the safety and well being of all individuals that make up a school. You can't learn when you are dead.</p>
7/21/2020 9:09:32	Megan	Hoadley	USD 259	Wichita	<p>I am a school counselor in the best and largest district in the state of Kansas. At my school alone, we serve over 1700 students. I am very concerned about the health and safety of my students and staff at my school during this pandemic. Having an autoimmune disease myself, I am labeled high risk if exposed to COVID-19. Our district is no where near prepared as far as sanitizing and properly ventilating our facilities. We were down the number of custodians necessary to staff our building during the 2019-20 school year, are we going to have an adequate amount of staff sanitizing our buildings on the hour every hour when school begins? Who is going to stand at the entrance and make sure no one has a fever entering the building? Many parents already send their sick children to our school as it is. How are masks going to be properly be enforced for staff and students? Social distancing?! Our school only has one lunch period and halls and crowded. Our passing periods alone have no room for anyone to get through. I have no choice but to work because I am single and this is my only income. Don't get me wrong, I would rather be at work anytime, but as of now I do not feel safe with our COVID numbers so high in our community. People are still mass gathering without masks and not taking it seriously. I know because I see it on my social media feeds. The parking lots at places in the city prove it. Please consider waiting until after Labor Day to open our schools fully. Thank you.</p>
7/21/2020 9:09:32	Wanda	Beitz		Topeka	<p>Please give our schools more time to plan a safe return to our schools. I hope you will support the Governor and not let politics influence your decisions.</p>
7/21/2020 9:09:45	Kris	Kasprzyk		Topeka	<p>The board should approve of the executive order and delay the start of school by 3 weeks. This additional time will allow teachers to adequately prepare for an unprecedented school year.</p>
7/21/2020 9:09:52	Tina	Greim		Manhattan	<p>In my opinion waiting until after Labor Day is not a bad thing for the safety of our children and teachers. I think we should give K-State a chance to open up and see what happens before opening up our public schools around the same time. I also feel this gives our schools more time to prep and implement safety measures that are needed.</p>
7/21/2020 9:09:53	Sarah	Meitner	My family	Hays	<p>Please uphold the Governor's order to delay school openings. My husband is a principal and I can assure you, the schools need all the time they can get to enact a safe back-to-school procedure. I really want to send my kids back to school, but I need to know it's safe and smart. Thank you.</p>
7/21/2020 9:09:55	Jeff	Burns	Self	Cherokee	<p>I support Executive Order 20-58. Keep our kids home and safe. If schools open without proper supplies, equipment or funding we are risking everyone. The teachers need our support.</p>

7/21/2020 9:10:01	Mariah	McDowell		Wichita	<p>I am a middle school teacher in the Wichita area. Like all educators, I am eager for my students to get back to school and receive the in-person learning and experience we all know they need for not only their education, but also for their mental health, social development, etc. However, I want reopening schools to happen when it is SAFE for students and staff to return to in-person learning. Right now the number of COVID cases in Kansas is on the rise. I am hopeful that with the mandatory mask update in place, we as a state and county will be able to get those numbers under control so that a safe return to school is possible by the September 9 deadline set by Gov. Kelly. I fully support her decision to push reopening schools for these few weeks in order to get our state under control. To return while the number of cases is surging, and to consequently put our children, teachers, administrators, support staff, bus drivers, kitchen employees, custodial crews, etc. at risk of contracting this virus, not to mention potentially bringing it home to other susceptible loved ones, is putting countless citizens at unnecessary risk.</p> <p>Yes, staying out of school indefinitely is detrimental to the education and mental well-being of our students, but what will their mental well-being be like when one of their classmates or teachers dies of COVID? Research is unclear at this point on whether or not students are less likely or as likely as adults to spread the virus. Current studies have shown older students, middle and high school age, spread the virus at the same rate as adults. And the fact is, students haven't been in schools since March, so returning to school could cause a massive leap in COVID cases among children, simply due to being in the same confined spaces and sharing the same germs, even with preventative measures like masks and attempts to socially distance.</p> <p>Will we look back with hindsight and say we pushed to reopen schools too soon, much like our economy? We've already seen the secondary spike that can occur when reopening too quickly and the damage it can cause. We all have the same goal: to keep our citizens, and children safe, while finding a way to return to 'normal'. Governor Kelly's plan gives us a safe option for doing so. I encourage you to delay the opening of in-person learning until our state has this virus better contained, and our children and staff are at less risk of contracting this harmful and deadly virus.</p>
7/21/2020 9:10:01	Heather	Gieber	East Elementary Republ	Belleville	<p>I have an incoming 4th grade student this year. She is an excellent student, in a structured classroom with an actual teacher present face to face. She has been home since March 17. She is an only child. Her mental health is suffering. She needs structure and community. Her final 9 wks of 3rd grade was done online, she did not grow and learn academically in those 9 weeks. She participated fully in those 9 weeks but was very frustrated in the delivery. Please veto the governors order and send these children back to the only way they know how to learn.</p> <p>Sincerely  Heather Gieber  Republic County  East Elementary Belleville KS</p>

7/21/2020 9:10:04	Meg	Godderz	Mother of 3 children all	Overland Park	<p>Thank you for your commitment to all the children, teachers and administrators in Kansas. I am a mother of three children (a senior and sophomore in high school and an incoming 6th grader to Middle School). I have a genuine vested interest in this matter.</p> <p>I do not have a strong opinion about waiting until September to start the school year if the BOE believes this is what needs to be done to keep everyone safe. I do, however, have a strong opinion about in-person vs. virtually learning. I want to express my strong support for an in-person school option. I know these are strange times and keeping everyone (teachers, staff, and schoolchildren) safe, obviously must be at the forefront of any discussion. Many businesses have adapted and made modifications for safer environments and I don't see any reason that schools can't do the same. Yes, schools will have teachers that have underlying health conditions, so adjustments can and should be made for those individuals.</p> <p>But staying healthy is a complex matter and has many facets, including both physical, mental, and emotional health. Our school system prides itself on being a place where kids not only learn academically, but is also an environment that fosters and encourages the emotional development of our kids, whether that's from athletics, clubs and other extracurricular activities, to the social network and friendships kids develop with their classmates. All of these aspects play a strong and vital role in the mental health and maturity of our kids. School is one of only avenues that kids can get this critical element of development, and cutting this off will rob kids of this opportunity.</p> <p>I realize you are considering many different points of view from the students and parents to the teachers and administrators, and I trust that facts, not fear, will be the driving factor behind whatever decision you make. I am also assuming you have received many opinions on this matter. I do not envy the decision that you have in front of you. Ultimately I do believe this decision will set the tone for the upcoming year, and I believe an in-person option needs to be available.</p> <p>So, please accept this email as a parent of 3 children attending Blue Valley schools, and that there are many of us who believe that on balance, benefits of having kids return back to school (with whatever modifications need to be made to</p>
7/21/2020 9:10:09	Briena	Matzke	Kindergarten Teacher	Lawrence, KS	As a kindergarten teacher, I have been having major anxiety attacks about the school year starting. With 5 year olds, it is difficult to keep them away from one another to begin with, nonetheless 6 feet apart. I fear it may also be difficult for them to learn online if there is not proper resources. Allowing schools to start after Labor Day would give teachers an extra few weeks to plan and be 100% prepared for the coming of students. I am extremely excited to meet my new kindergartens and get closure with the ones I didn't get to say goodbye this past year, but please give us the time to properly prepare for this by allowing schools to reopen after Labor Day!
7/21/2020 9:10:10	Sarah	Holmes		Olathe	Please keep KS schools closed till after Labor Day.
7/21/2020 9:10:14	Virginia	Schumacher	Self	Topeka	I support gov Kelly. With the recent mask orders let's give us a chance to bring the cases back down before we start school back up. It used to start after Labor Day anyway. Could we lengthen the days by about 30 minutes of necessary So they get a little more time in school?
7/21/2020 9:10:14	Jessi	Helmer		Marion	I am in support of the delay to start school. I also feel it would be in everyone's best interest if online school was to take place until after Christmas and see where the virus numbers are at then and reassess. Sending everyone back to school in large groups is only going to make the spread of the virus worse. Making the kids wear a mask all day, even those who ride the bus to and from school, is going to be very hard for most kids, especially with the temperatures being high. How effective is school going to be if you have to wear a mask all day and be 6 feet away from your friends. I feel it will really wear some kids down.
7/21/2020 9:10:14	Amanda	Baker	USD 330	Topeka	Open schools back up! Day cares have remained open and deemed essential, posing just as much of a risk to children. Pools are open in Shawnee county (without a mask requirement). Restaurants are open. Stores are open. It is time to open our schools back up. Children have needs. Education should be deemed essential. Working parents will have to seek day care for their elementary aged students any way, which poses just as much of a risk. Open back up with precautionary measures implemented (masks, frequent hand-washing, hand sanitizer, sanitizing equipment/surfaces/etc., social distancing). Children need face-to-face schooling!

7/21/2020 9:10:17	Chad	Kerr		Dodge city	We need to get our kids in classrooms with teachers doing there job in August not September! Sports should already be started and continue as planned for August start. Kids are depressed and need socializing and sports to be healthy. Look at current suicides amongst school age kids in Kansas compared to Covid deaths in same demographic. Let's get our children back in school and save lives.
7/21/2020 9:10:18	Angela	Stuhlsatz		Derby	You should support the delay. This will give schools the time to get procedures and supplies in place to make sure our children and school faculty are as safe as possible. All precautions should be taken and a couple of weeks delay to create a more safe environment for students and staff will do more good than harm.
7/21/2020 9:10:39	Mariah	McDowell		Wichita	<p>I am a middle school teacher in the Wichita area. Like all educators, I am eager for my students to get back to school and receive the in-person learning and experience we all know they need for not only their education, but also for their mental health, social development, etc. However, I want reopening schools to happen when it is SAFE for students and staff to return to in-person learning. Right now the number of COVID cases in Kansas is on the rise. I am hopeful that with the mandatory mask update in place, we as a state and county will be able to get those numbers under control so that a safe return to school is possible by the September 9 deadline set by Gov. Kelly. I fully support her decision to push reopening schools for these few weeks in order to get our state under control. To return while the number of cases is surging, and to consequently put our children, teachers, administrators, support staff, bus drivers, kitchen employees, custodial crews, etc. at risk of contracting this virus, not to mention potentially bringing it home to other susceptible loved ones, is putting countless citizens at unnecessary risk.</p> <p>Yes, staying out of school indefinitely is detrimental to the education and mental well-being of our students, but what will their mental well-being be like when one of their classmates or teachers dies of COVID? We've already seen the secondary spike that can occur when reopening too quickly and the damage it can cause. We all have the same goal: to keep our citizens, and children safe, while finding a way to return to 'normal'. Governor Kelly's plan gives us a safe option for doing so. I encourage you to delay the opening of in-person learning until our state has this virus better contained, and our children and staff are at less risk of contracting this harmful and deadly virus.</p>
7/21/2020 9:10:35	Caroline	Harris	Belinder Elementary	Prairie Village	<p>What will happen when there is an outbreak at school?</p> <p>How will the students at school learn with the direction and instruction from their teacher. Our students need connection and engagement to their teachers regularly (not like spring semester)</p> <p>How often will the districts plan be re-evaluated? Weekly/monthly/quarterly?</p> <p>Has the school considered outdoor learning for students to have more space, fresh air and the ability to stay distanced with her mask off?</p>
7/21/2020 9:10:45	Albert	Friesen	Plains and kismet	Plains	I say open up schools and not to make the kids wear a mask
7/21/2020 9:10:50	Meghan	Schippers	USD 385	Maize, KS	I fully support this executive order to delay the opening of schools until Labor Day. I would also support further legislation requiring schools to be online only until vaccinations for COVID 19 are administered or until community cases are eliminated. I am a teacher. The health risk to my students, my colleagues, and our families is irresponsible and unfair.
7/21/2020 9:10:50	Brian	Rouse	Blue Valley School Dist	Overland Park	Accept Laura Kelly's request for delaying school until after Labor Day.

7/21/2020 9:10:51	Ryan	Zimmerman	none	Lenexa	I have kids both in Olathe and Lenexa school district. I support a late start, past Labor day, to allow faculty to continue to make safety precaution adjustments
					I do not want for my children to lose any more time with their education. We are putting the future of our children at risk by keeping them home and isolating them. We all know from birth and even into adulthood, babies, toddlers, teens, and adults thrive on human interaction. They need to be around their peers for their mental health which we can argue is just as important as their physical health (which i think we can provide solid evidence is not at risk nearly as much right now as their mental health). I have spoke with several parents of children that are greatly concerned for their children's mental state of being right now. I am asking you all to please speak with several pediatricians, speak with parents, speak with the children around you before making your decision. Kansas is not New York our hospitals are not overwhelmed. There is no reasonable reason for the delay. If this virus was really going to harm the children i cant imagine a three week delay changing the lethality of the virus. And as for forcing children to wear a mask I feel like it is absolutely ridiculous. Children already have a hard enough time focusing. I feel that all this is going to do is cause teachers to have a harder time teaching children who will most undoubtedly be anoid with a mask on their face. I am also gravely concerned for the unknown health side effects that will come with wearing a mask for hours on end. I personally promise that if anything happens to my children because they are forced to wear a mask all day i will have no issue with suing the board of education and anyone else who enforces this rule without having hard evidence to prove their are no negative health effects to wearing a mask for hours on end.
7/21/2020 9:10:51	Vanessa	Raub		Wamego	The districts across the state of Kansas are fortunate to have dedicated and committed educators, but they are not the only group of people who educate our kids. How about the paraprofessionals who are often paired with vulnerable students, lunch staff, janitors, bus drivers and monitors, and volunteers. Kansas has some of the best teachers (and a community of educators within each district) with the lowest earnings, reduced resources, and trying times. They keep coming to school. They keep teaching our kids. They keep doing their jobs. They don't do it for the money, and they do it out of love for every student they've ever had or will have.
					I support the delay. I also understand why others do not. I understand the push back on a one-size-fits-all approach, but we've proven as a state we can't handle going the other direction. I know that we are concerned about jobs and a host of other concerns. However, if we don't start the year off right - we'll be right back where we were in March. We have to approach this in a united front. Lead by example and unite for our communities. Teach our kids that we can be part of the solution, not be part of the problem.
					Kids learn by example. Let's provide an example.
					The one thing we can do for our community of educators is to allow them an extra few weeks to prepare. Some teachers will need to adjust to fill in if required due to the lack of subs. They'll not only do double work to prepare for instruction, but they need time to prepare for increased responsibility if a coworker gets sick. Give teachers and educators the grace we expect from others and that we have granted others. Make it possible for districts to pay hourly staff or provide resources or training needed to keep those folks employed. They are hard to come by.
					We praised educators in March when they changed abruptly. We expected a lot from them. They handled it. They became not only a teacher but a parental support system and had to do it remotely. Let's not call them selfish and lazy because they don't feel safe in July. We wouldn't accost any other group for that fear. We'd protest for them.
7/21/2020 9:10:54	Sarah	Farlee	Community Member/Sc	Lawrence	Let's use this time from now until September 9 to be leaders in our communities, promote the use of masks, social distancing, and work together to move forward.
7/21/2020 9:10:58	Frank	Tra	Self	Wichita	I am a high school wrestling coach. I want nothing more than to find a way for our athletes to compete IF it is safe for them and their families. We must listen and adhere to the science. If cases rise then deaths will increase. If a delay will give us a clearer picture whether to have in school classes or to find an alternative I strongly suggest we support that course of action.

7/21/2020 9:10:59	Jeff	Wenzl	Parent	Overland Park	I have to believe you know if we are starting in the classroom or virtually at this point. You have had months to plan. If virtual, there is no reason to delay the start. If in the classroom (greatly desired), kids already have masks as they are required to go anywhere in public. Don't politicize our children's education. Districts should be able to decide what is best for our local community.
7/21/2020 9:11:03	John	Mackey		Bonner Springs	<p>I am very concerned about students and staff returning in-person. I am a 3rd grade teacher. I want to be back in the classroom with my students, but I don't think it is currently safe to return. My classroom is not large enough to allow safe social distancing. I live with an immunocompromised individual and worry about what germs I may bring home to her.</p> <p>I also worry about the quality of education students will receive if we return in person. We won't be able to have small groups, physical interaction, or even see each others' smiles. Students' Social-Emotional education is one of the reasons we send them to school, but if they return now they will be returning to a social-emotional desert. Why risk going back to schools and people getting sick - possibly dying - if we can't provide a quality experience and environment?</p> <p>I strongly encourage the state board of education to support Governor Kelly's executive order and delay reopening until after Labor Day. If we're going to have to go back and risk our lives and student lives, at least give us some time to plan for it. Refusing to support this executive order would be a blatant disregard for the health of Kansas and a slap in the face to school staff who already sacrifice so much for students.</p>
7/21/2020 9:11:05	Susan	Wright	None - retired school tea	Wichita	Please vote to hold off opening schools until it is safer for kids and staff. There are huge challenges to prepare to safely reopen. We need time. We need wisdom. We especially need time for this virus to subside because folks are starting to wear masks. We need to figure out how to respond when someone becomes sick. Vote for the long term best and uphold Gov Kelly's mandate. Please.
7/21/2020 9:11:09	Laura	Hayden		Olathe	I support Governor Kelly and her decision to keep schools closed until after Labor Day, or as long as is needed for public health. Yes, children need to be educated, but they need to be alive as well.
7/21/2020 9:11:08	Cathleen	Crow	Crow Family	Derby	I work as a sped para for Derby USD, but I am also a parent. I am also a wife to a Leukemia patient. I am scared. I am mad. I love my job and my students but I'm also a Mom of a soon to be 9th grader. A child who has a diagnosed kidney issue. A wife of a 20+ military veteran who has been working from home since March for his health & safety. I am begging you to at least postpone school until districts can get a better handle on the lengthy process they are going to have to implement to ensure everyone's safety. Please don't make this political. Please don't make this about your opinion. This is for the children, our future. Please do the right thing!
7/21/2020 9:11:11	Angela	Degnan	Parent	Overland Park - 66213	I have a student with an IEP. He needs services sooner than later. However, I want to ensure schools are set up and precautions are in place to ensure a safe return to school. Safety is a priority, but my son needs services to return to in person so that he can receive an appropriate education.
7/21/2020 9:11:12	Tracy	Cook	Usd 229	Stilwell	I completely support this decision!
7/21/2020 9:11:40	Elise	Rottler	SMDS	Overland Park	No! People are back to work, meaning now additional childcare needs to be found for working parents. Personally working in the outpatient facility in the medical field we are only wearing masks and eye protection. That being said our volumes of patients we have seen has doubled since the stay at home order was lifted. In the hospital setting we are giving no more than what a teacher would be given. Parents are struggling and need their children to return to school. Take safety precautions and things could resume!

7/21/2020 9:11:38	Danielle	Jewell		Kiowa	This does not need to be a “one size fits all” order. We live in a small, rural community where our kids have been fully participating in swim meets, summer basketball, summer weights, etc. They are all working hard preparing for the fall seasons since so much was taken from them in the spring. Our county, and those surrounding it, have not seen a rise in COVID numbers at all. Why should all their work suddenly be halted? Our class sizes are small enough to maintain “social distancing” within the walls of our school building. We could even adjust schedules for transitioning in hallways. We could even do this safely without the distraction and restriction of masks, just as these kids have been functioning , surviving, and once again thriving, this summer! This order does not fit every school, community, or county. In fact, the statewide numbers represented with this order do not even back the need for this decision in relation to daycares, sports, school activities, etc. However, it is much easier to see, even without a graph, the need for socialization, peer interaction, teacher feedback, and participation in athletics, activities, organizations, etc. These things are absolutely vital to the growth and development of our youth!
7/21/2020 9:11:43	Andrea	Jack-Murdock		Pratt	Many pediatricians have voiced their opinion on this issue and feel it’s safe for children to return to school. I feel they should go back to school as well. There were many actions our school district were taking to keep everyone safe. I also don’t think this should be a state wide issue. Some counties are still do not have cases. Why treat the entire state the same?
7/21/2020 9:11:44	Rebecca	Remengesau	USD 475 Parent of 3	Junction City	Great job! In pushing the start date back for our children. I know you guys are doing the best you can for our children!
7/21/2020 9:11:46	Shaun	Watts	Myself	Hutchinson	Keep schools closed through Labor Day.
7/21/2020 9:11:48	Terri	Warf	USD 450	Berryton	Many teachers had not received copies of our districts reopening plan until last night, and then only a working draft. We have not had time to fully understand new safety guidelines or receive training, we have not had time to collaborate with peers to revamp lessons and be sure they are in alignment with the KSDE 1000 page document. Teachers need the additional time to plan and prepare for in person and more importantly, online learning when that occurs, as it will no doubt occur at some point this year. Spring was not our best work. We’ve had training on online instruction and need time to implement. Please allow us the necessary time to do so. Thank you!
7/21/2020 9:11:49	Ada	Welch		Pratt	I think delaying the school year is a good idea. Honestly, I want school to be offered as a mix of both online and a little in class. I don't feel like its safe to go back at all yet. I work with people who are immune compromised, I don't want to risk getting them sick, I don't want to risk my kids getting sick and I don't want to get sick. Keep them home a little longer, make masks mandatory, and enforce the mask rule.
7/21/2020 9:11:51	Jennifer	Kelly	Parents	Salina	Childrens immune system is slowed down utilizing mask I feel mask should be a choose for parent to make
7/21/2020 9:11:52	Dawn	Meis	Manhattan High School	Manhattan	I support pushing the start of schools back to after Labor Day. As a parent I want my child to have as much of a normal senior year as possible. I feel this extra time will give the districts and teachers time to get the buildings ready with masks for the Students who won’t have them, hand sanitizers, disinfectants, getting the classrooms spaced out, get their teaching plans ready for all teaching scenarios. The teachers I have talked to say the need more time to plan. As a parent I want my child safe and I don’t want them to open schools until they are ready this extra time will allow them to get things in order. I want the teachers to feel like they are ready to teach no matter what the scenario looks like online or in-person. Thank you!
7/21/2020 9:11:59	Benjamin	Vargas	N/A	Overland Park	Comment removed due to profanity
7/21/2020 9:12:01	Todd	Harris		Prairie Village	I understand this is a very complicated situation and needs to be well thought out. Unfortunately, this virus isn’t going anywhere so keeping children out of schools for an undetermined amount of time doesn’t seem like a realistic option. This said, I also understand our teachers are at risk and frankly, underpaid for the work they do. We all need to be sure they are safe and protocols are put in place.
7/21/2020 9:12:04	Rachel	Wilson	JAYHAWK USD 346	Mound City, KS	I think we should wait to start until after Labor Day so we can flatten the curve in our area some more and I need time to get ahold of coverings for band instruments and masks that allow students to play or sing safely. I also am worried about how cases have been rising recently in our area and I don't want for it to spread and hurt our most vulnerable people in the district. Substitute teachers are not always available either. I also worry that if I get sick that my students won't have a substitute teacher for 2 weeks or longer.
7/21/2020 9:12:06	Kendra	Haines		Moscow	Open up schools.

7/21/2020 9:12:08	Madison	Farmer	Usd 219	minneola	Keep school closed and do home schooling
7/21/2020 9:12:09	Sabrina	Mills		Derby	Our children need in school option
7/21/2020 9:12:14	Jennifer	Leeper	Physician assistant	Pratt	I strongly vote NOT to delay the academic school year and proceed with the originally proposed plan of beginning our school year in August. I also would please strongly urge that you allow each district the opportunity to make that decision as many Kansas communities are rural/low risk/low populated areas. Thank you for your consideration.
7/21/2020 9:12:17	Jodi	McAninch	My family	Wichita	Please allow the schools to decide, do not force everyone to wait. The private schools are ready. They have been preparing for this all summer. Don't punish them because the public schools didn't get ready.
7/21/2020 9:12:20	Alfred	Benberg	Parent	Shawnee	I strongly encourage the board of education to follow Governor Kelly's recommendations and those of health experts and keep schools closed until the state has a manageable hold on the virus. The health and safety of our families are at stake.
7/21/2020 9:12:23	Heather	Palkowitsh	Parent/ substitute teacher	Scott City	I know you all are doing your very best for our kids. I don't have an issue with starting school later, if that's what the districts need to get everything in order and not be rushed. I do have an issue with kids wearing a mask all day. It's hard for them to keep them on and be able to concentrate and learn. I have a child with asthma and it is hard for him to wear a mask to be able to breathe properly. I do feel it should be left up to each district/County to make the decision on what's best for that district. Thank you for your time.
7/21/2020 9:12:29	Katherine	Warren	Parent and teacher	Wichita	Please vote yes on the governor's plan
7/21/2020 9:12:42	Jamie	Klausmeyer		Wichita	I am in favor of waiting until Labor Day to start school ONLY IF that is where it ends. Our children need to be in the classroom and parents need to be at work. I fear that kicking the start date back is only the beginning of Governor Kelly's agenda to disrupt the Kansas economy. Our children are being used as political pawns and it needs to stop now.
7/21/2020 9:12:45	Jennifer	Staab	USD 270	Plainville	This cannot be a "one-size-fits-all" approach. The numbers in our county are extremely low compared to the larger more urban areas. I invite Governor Kelly to actually make a trip to Western Kansas sometime to see how different we are than the Johnson County/Sedgwick County areas. Allowing individual counties or even school districts to decide how and when to open up our schools is so important. This cannot be a political decision. It has to be based on not just physical health, but, almost more importantly, the mental health of our children. I don't believe Governor Kelly is qualified to make that decision.
7/21/2020 9:12:40	Bruce	Phillips		Lawrence	My daughter is a teacher and my son-in-law is a principal. I strongly recommend you support Gov. Kelly's proposal to delay the start of school.  Teachers, principals, and school administrators need the extra time to plan the safest way to have in-classroom instruction now that the state of Kansas has released its very extensive guidelines.  Additionally, the extra time will hopefully mean fewer active cases of COVID-19 in our communities as more Kansans adhere to the guidelines of social distancing, wearing masks in public places, and hand-washing.  A 2-3 week delay is a very small price to pay for the improved safety of our children, teachers, and other school employees.
7/21/2020 9:12:59	Tracie	Chavez		Partridge	I feel with cases rising like they are right now we should wait or do online schooling again. I feel that if it's still not safe to do meeting except for online then is it safe for my children?
7/21/2020 9:13:00	Jennifer	Peters		Overland Park	My daughters' school is a small, private school that is fully prepared to start on August 13th. Many of the children there have been attending sports and church camps throughout the summer, and NONE have had any symptoms nor positive Covid-19 tests, which is a great gauge showing that with extra precautions, they can safely be near each other. I recommend allowing districts to make decisions that apply to THEIR needs.
7/21/2020 9:13:01	Misty	Freeman	My children!	Liberal	I am a mom that works 40 hours + in a demanding essential office. (Oil and gas) and my husband works on the road as a pilot car working wind energy. My children are begging to return to school and I have no childcare for them. Please for our children's mental sake and for the burden of the parents let these kids return to school. They have been out since the first week in March. We come to work every day and expose our children as it is, no different than returning to school!

7/21/2020 9:13:11	Tracy	Warren		Shawnee	Please give our schools more time. Governor Kelly took a bullet so the local school boards can focus on making school safe. Please put politics aside and put the people first!
7/21/2020 9:13:20	Bethany	Weber		Topeka	Please allow Governor Kelly's executive order to stand. Schools need time to prepare for the realities of what education has to look like now. Social distancing and online instruction will require additional training for teachers. Additionally, this delay will allow communities with surges in positive COVID tests the opportunity to reduce the rate of transmission.
7/21/2020 9:13:24	Lorena	Baker		Dodge City	Please vote for the delay of school to start in September. I am a teacher and feel very comfortable with technology. However, many of our teachers need training and time to learn how to switch from in-class learning to remote learning at home. We have a high ELL population and our teachers need additional time to plan and make sure we are creating lessons that our ELL students can do in the classroom as well as at home. The curriculum designed by our education team is a good plan but there are many new components to it. We need the time to learn the new components of the plan as well. We want to be prepared and trained to deliver all modes of instruction to our students in Dodge City. Please give us time and vote for delaying schools to open in September.
7/21/2020 9:13:24	Jaime	Burget		Derby	I'm ok with kids wearing the mask during passing periods but during class time I think they should take them off. Make the desk face forward don't set them in groups or at tables facing each other. It's hard Trying to understand people talking through a mask, try learning from a teacher wearing one. There are ways to set up a classroom where kids can be distanced from each other. Sports are already going on kids are playing, let them play in the fall! You are not in a closed building during fall sports unless it's volleyball but at that point have the parents or people watching wear a mask.
7/21/2020 9:13:31	Kimberly K	Logan	Patrnt	Usd 265	Resume school after Labor Day, masks PreK-12 th, staggered days.
7/21/2020 9:13:33	Melissa	Chaney		Hays	I support extending the school start date until after Labor Day. Additional time for planning for the safety of staff and students is a benefit to all involved - administration, staff, students and parents.
7/21/2020 9:13:38	Lana	Felzien	USD 314	Brewster	It is ridiculous to make the kids & adults wear masks. They have not been proven to be effective. Checking temperatures and washing hands regularly is the key. No masks!
7/21/2020 9:13:55	Wendy	MacNeill		Shawnee	We have 2 children at SMSD and fully support delaying the start of school until after Labor Day. Lives of our children are at stake. Please support this ruling.
7/21/2020 9:13:58	Mark	Vittetoe	Horton High School	Everest	Don't postpone school until after labor day.
7/21/2020 9:14:12	Jasna	Kalan		Pittsburg	Please allow our children to go back to school. The COVID numbers do not justify this disruption in their education, especially the numbers in our rural area. They need to get back into the classroom and get caught up on their academics. Any teacher or parent of a child who is uncomfortable with the school setting can choose not to return rather than taking education away from everyone else by keeping schools closed. Thank you for your consideration.
7/21/2020 9:14:18	Paula	Hansen	Retired	Milford	Follow governor's recommendation
7/21/2020 9:14:19	Carrie	Allison-Rolling	Individual Resident	Overland Park	Please support Governor Kelly's order to delay schools reopening for the sake of public health
7/21/2020 9:14:22	Anne	Schnable		Rolla	We need to get these kids back in school. It needs to be before September. We live in a town where there have not been active cases since March. They need the socialization, they need normalcy. If social distancing can't be done, sure, have them wear a mask, but not the whole day. Hand sanitizer is a quick fix and I'm sure it is the easy way out, but let's just have them wash their hands instead. Hand sanitizer does not need to be used that much, put soap in the classrooms and make them wash their hands. My kids are going to be in Preschool and 1st grade, they know they may need to wear a mask certain times of day, but don't make them wear them ALL day. Use common sense, let's get these kids back to school. Override what Kelly is telling us. She is making poor decisions and I'm tired of it. Get them in school.
7/21/2020 9:14:24	Andrea	Stverak	Cure of Ars Catholic Sc	Overland Park	I vote for giving the parents a choice to send their children to in person school or virtual. With that...I think an ideal compromise is the hybrid situation where half the school goes in person while the other goes virtually...but a parent has the choice to have their child be strictly virtual. I would feel safe sending my children in a half capacity school setting with all the precautions in place...social distancing, mask wearing, lots of sanitation throughout the day. I do think for the parents that work full time out of the home and do not have a way to be home to virtual school...they should have the option of in school status full time....

7/21/2020 9:14:28	Tera	Morriss	Junction City High School	Junction City	I think this is the best choice. With the growing number of cases in cases and the lack of proper ppe and cleaning supplies available to teachers is one reason. Another reason, yes kids under 10 have a lower chance of getting COVID 19, but what about the teachers, staff, and students over 10. Are these live not being regarded as important. I understand that we want students in school and we want students lives back to normal... but this is not normal and will not be normal until there is some control over the virus. Yes other countries have returned to school, but their numbers were controlled when they did so. Give our teachers and students the respect they deserve. Show them that they are important by delaying the start date.
7/21/2020 9:14:30	Abigail	Kingsford	University of Kansas	Lawrence	please support Gov. Kelly's executive order so all staff and school families can safely return to school and local school districts can have time to prepare for the recently mandated supplies.
7/21/2020 9:14:37	Carla	Clarke	Counselor USD259	Wichita	The district needs time to plan and get people equipment. Cases are rising, it isn't safe. I have a chronic lung condition, and fear if I get the virus I may not survive.
7/21/2020 9:14:40	Gwyn	Valverde		Overland Park	My question is more what happens after Labor Day? Do we think in three weeks this will have magically disappeared? Won't the "surge" just be delayed? I am not for doing school as "normal" but halftime/online combo or online....why not just make the decision? I can't imagine 3 weeks will make a difference. Will the required number of days be adjusted? Or will students be expected to go to school until the middle of June?
7/21/2020 9:14:43	Lisa	Ignoto	Shawnee Heights USD 4	Tecumseh	Support the delayed start. I listened to the SH board meeting last night for hours and hours and I would summarize by saying it is OBVIOUS they need the extra time to get ready. For hours I listened to how things are not figured out, not ready, not sure, not clear, direction lacking or inconsistent.... bottom line area schools are not ready!
7/21/2020 9:14:45	Connie	Oltmanns		Pratt	I believe that our district has, and has always had, our student's and staff's best interests at heart. I think that it should be up to our own district leaders to decide what is best for our students. If that means delaying the start of school, then I will support them.
7/21/2020 9:14:47	Karen	Flagler		WaKeeney	In Trego County we have had only 5 Covid cases. I believe we would be ok to start in August as our calendar was set up for. That may not be the case for ALL counties.
7/21/2020 9:14:50	Kelsea	Cain		Wichita	I am in support of Governor Kelly's decision to delay school openings until after Labor Day. You would be very irresponsible to not do so and the illness and death of many teachers, children, and family members would be on your hands if you prematurely open schools.
7/21/2020 9:15:14	Karla	Lero		Topeka	Please delay the start of school until after Labor Day. The districts really need time to acquire the necessary equipment and sanitizing supplies. Please put the health and well-being of our students, their families, and all of the staff and their families first.
7/21/2020 9:15:19	Sara	Plante	Moundridge PreK	Newton, KS	Please think about the kids. These littles especially need to be protected because their immune systems are still developing and it is not worth the risk of them maybe being alright!

7/21/2020 9:15:26	Erica	Bittel		Hays	I support Gov. Kelly's Executive Order 20-58 to delay the opening of schools until after the Labor Day holiday. If this order can aid schools in better preparing to re-open AND possibly decrease the numbers of those infected by Covid-19, then why not???
7/21/2020 9:15:27	Haritha	Boggarapu		Overland park	Please delay the school year 20-21
7/21/2020 9:15:27	Julie	Swartz	USD 475	Junction City/Fort Riley	As a teacher with a health condition, we need the extra two weeks to allow Kansas to lower their numbers. Please vote to delay the start of school
7/21/2020 9:15:27	Jill	Huber		Shawnee	Please adopt the delay of school starting as Governor Kelly has declared. There needs to be sufficient time to control the spread of the virus and determine if schools can even safely open for all involved: students, staff, families.
7/21/2020 9:15:34	Laura	Capello	self and my children	Overland Park	Please support Governor Kelly's executive order to delay opening schools in-person
7/21/2020 9:15:37	Cleta	Lampe		Coldwater	Not every county has been effected in the same manner with Covid. Therefore, it only makes sense to allow counties the right to open schools, set mask regulations, and other school activities as they see fit. Parents also need to be allowed to decide what works best for their children in regards to mask wearing during school.
7/21/2020 9:15:49	Crystal	owen	my kids	geary county usd475	I feel it's best to push school opening until it's safe for All to return. My youngest son who is going into the 8th grade, has an IEP so needs brick and motor school. He struggled so hard with e-learning i dont feel its a good fit. But he also has asthma so wearing a mask all day or for most the day while at school is not an option either. There is no harm in waiting till it safe for all students and faculty to return.

7/21/2020 9:16:06	Miranda	Russell		Manhattan	I believe in the delay to help our district get the necessary items needed to make traditional instruction method possible and safe for the children.
7/21/2020 9:16:10	Aaron	Scott	The average American w	Olathe	I get that this is a no win situation. I just feel if we are going to lose regardless then we default to the side of health and safety for our teachers and children. Expecting teachers to also be health care workers on top of the insane level of expectations already present is obscene. DELAY, DELAY and DELAY.
7/21/2020 9:16:20	Karla	Ast	Parents	Ingalls, ks USD 477	I appreciate all the work & considerations you are putting into this decision- I really wish Senator Wagle was our govener, she speaks what somany of us are thinking- One size does not fit all!! They can put out their recommendations, but allow the decisions to be left to school districts, board members, sports leagues, parents and students. We are mindful of the concerns, but also very confident in our school system, staff and families of our school community- we are a rural , tremendous school in s west Kansas with maybe 250 students in whole school- It would be hard to find a more dedicated, supportive, caring school anywhere- Please vote to allow schools and sports to start on time without delay and leave powers up to individual schools & leagues! Thank you so much for allowing us a voice!
7/21/2020 9:16:21	Tehren	Esparza		Offerle	I feel that delaying the start of the 2020-2021 school year will gives schools adequate time to ensure they have the supples needed and the policies in place in order to assist in keeping both our teachers and students healthy and safe. With COVID 19 there are many gray areas. We need adequate time to help ensure the safety of our students and school staff. If the schools do not have adequate time to obtain the necessary resources and prepare their classrooms for social distancing, we are putting everyone at risk.
7/21/2020 9:16:25	Deana	McMillan		Wichita	Please, please, please keep schools closed until September. My children will already be attending virtual school this fall but as an educator, I don't want to bring the virus home to my medically complex son. He is almost 9 and would love nothing better then to be in school.  Local control should not be given back in this case. These are unprecedented times and call for unprecedented measures. Please wait until September to open schools! Thank you for your time and attention to this matter.
7/21/2020 9:16:40	Josh	Spradlin	Lawrence Public School	Lawrence	I want to voice my support of delaying school openings until after Labor Day. I live in Lawrence and we have had a large spike in the last month and I can only imagine what will happen when the university opens back up in mid August. I have been working with district officials on science curriculum and my building leadership team and I can promise you that the extra time will be most beneficial and allow us to be more prepared. Please vote in favor of this. Thank you.
7/21/2020 9:16:40	Janice	Robben	none... I am a grandpare	Olathe	My grandchildren have already been out of the classroom over four months. Classroom learning achieves significantly more than remote learning and meets the needs of students much better (educational, mental, physical, social, emotional, and family financial). We have the tools to create safety.... face shields or medical masks for teachers, masks for all students, hand washing, sanitizers, and social distance as available!!! People get that now! Teachers/administrators can figure it out and still provide a safe but challenging learning environment which we all know serves to educate children effectively and promotes future success! PLEASE.... open the schools as usual. Don't delay any longer. Children are hungry for the structure and learning school provides. Providing a choice of classroom or online may be appropriate given the divisions among society.
7/21/2020 9:16:40	Emily	Pounds	Parent of school aged ch	Roeland Park	It is unsafe to open Shawnee Mission School District at this time. Be an example of partnering with leadership and putting the health of others first. Do not override Governor Kelly!!!
7/21/2020 9:16:58	Amanda	Davis	Blue Valley	Overland Park	SEND OUR KIDS TO SCHOOL!!!! They are perfectly safe!!!!

					<p>First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.</p> <p>Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <ul style="list-style-type: none"> <li>*Safe School opening following the Board of Education Return to School Plan</li> <li>*No delay to student participation in school, athletics, and activities.</li> </ul> <p>*In response to the Mandate delaying School opening statewide, please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.</p> <p>Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p>
7/21/2020 9:17:06	Kim	Self	Garnett Elementary Sch	Ottawa, KS	
7/21/2020 9:17:09	Kelly	Miller		ogden	I think it is in the best interest of students and staff to delay opening so schools can better be prepared.
					<p>First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.</p> <p>Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <ul style="list-style-type: none"> <li>Safe School opening following the Board of Education Return to School Plan</li> <li>No delay to student participation in school, athletics, and activities.</li> </ul> <p>In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>I support all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.</p> <p>We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.</p>
7/21/2020 9:17:21	Deb	Stifter	Parent	Greeley	
7/21/2020 9:17:24	Ann	Manzardo	resident of Shawnee	Shawnee	I support the passage of Executive Order 20-58 delaying the start of the 20-21 K-12 school year. Delaying the school years is the only responsible course of action given the present COVID19 outbreak. Please approve this measure.
					As teachers and schools, we have been preparing for this fall since last spring. We have improved our tech expertise, implemented better hygiene practices, and worked to create safe, learning environments. Please let the local school boards and their communities put into practice what works best for their schools. They know these kids and their families. They see them in their communities. Their community is my community and we want to do everything we can to keep us all safe. We are ready to go back to school! Please don't make us wait and allow the governor to create a one size fits all plan.
7/21/2020 9:17:26	Rebecca	Edwards	Triplains School	Winona	
7/21/2020 9:17:28	Jason	Pennington	Me	Kansas City	Go to school.
7/21/2020 9:17:26	Shellie	Prado	Olathe schools	Olathe	<p>Please vote NO to delay schools</p> <p>Opening until after Labor Day.</p>

7/21/2020 9:17:30	Tiffani	Bacon	Parent	Live in Plainville - Scho	START SCHOOL ON TIME - This is NOT a one size fits all solution! In rural Kansas there are minimal cases - there is NO reason to not start school on time. Let the Local school boards decide how to proceed on their own! I have 4 kids - 2 in full day school, 1 that will be starting preschool and 1 that is not in school yet. I work full-time and don't have the time of day to be a teacher as well as work full-time. Kids are at extremely low risk for harm with this virus, let them have their normalcy back.
7/21/2020 9:17:42	Amy	Muirhead	MY CHILD	Olathe	My child will be a 2nd grader, He is eager to attend school, he thrives in that social environment. Our children need to go back to school on time not only for their mental health but for teachers and parents to get back to work! And most importantly, the Cases of covid to children has been so low and ZERO deaths reported! Delaying school will put them back in the middle of regular cold and flu season! Their immunities need time to build back up from being stuck at home for months without social interaction! Otherwise we will see the worst cold and flu season on record! DO NOT DELAY SCHOOL OPENINGS!
7/21/2020 9:17:55	Heather	Hicks	none	Great Bend	This delay is the most responsible overall to balance return to school with the required public health measures to control the spread of the coronavirus. It is irresponsible to NOT delay until this spike in cases is under control. The mixing of large groups which returning to school is, will only exacerbate the spread. If the board hopes to be able to manage the return to school in a safe way for not only students, but for all district staff as well as the families, the governors order is the way to go. While I understand the desire for home rule, this pandemic has become too politicized and divided for this. In addition, these communities may not have the public health and epidemiological experts on their governing bodies which will lead to uninformed and dangerous local decisions. Following Dr Norman's science based guidance is the best route to ensure safety in schools.
7/21/2020 9:17:56	Madelyn	Kamphaus		Prairie Village	Delaying the start of school (in case that we cannot begin online only learning, on time, as scheduled) is the best practice. It gives us time to see the impacts of COVID post-July 4th, gives schools additional time to prepare supplies and plans as needed, but mainly provides more time to see where the current trend of COVID is headed. Should we decide to open post-Labor Day, we also need to consider the incubation period surrounding that holiday and how long it would be before we see the full effects. I should also mention that moving directly to online learning immediately, and then choosing to re-open physical schools would be the best-case scenario as I realize we cannot push the start of school back time and time again without any learning taking place.
7/21/2020 9:18:06	Kim	Staats	Parent and Staff of USD	Pratt	I have a medically fragile middle schooler and 2 others in school (12th and 1st). I heard one of your board members has a granddaughter that is medically fragile as well. Our specialist Doctor years ago told us "You can not keep him in a bubble! That's not living!" We have to continue being cautious but live with our healthy children. Years if not sooner we will feel the mental and social affects of this pandemics and the lockdowns (I am a behavior specialist.) We know as educators a 2 week Christmas break can cause regression....and I'm not talking academics! What will 6 months look like????! And where will it end for our Governor-another month after a another month...this is not living and it's NOT what's best for our children. I had a Senior last year and I have another this year. PLEASE I beg you do NOT allow her to take away activities for the month of August!!!! These kids (and yes they are still kids with developing brains) need these outlets. Stop sacrificing our children for the state. Our district has done an excellent job preparing for this moment. Let them take back control with the help of our Health Dept as it should be. On behalf of my children and my students do not sign this order.
7/21/2020 9:18:12	Lacee	Kovanda		Overland Park	Our schools need to open and not be delayed. There is more at stake than just the health considerations of COVID 19. Students need social interaction, support, and connection.
7/21/2020 9:18:15	Megan	Gabehart		Girard	As a teacher, we are absolutely NOT ready for school to resume. My school district does not even have a reopening plan yet, let alone the PPE needed to keep students and staff safe. Please give us time!

7/21/2020 9:18:19	Mari	Dietz	Teacher	Dodge City	<p>For the safety of us who are in large schools please delay. I don't want to but I see very little consideration for the lives of teachers. Please listen to experts in the field.</p> <p>Our school has over 2000 students. My classes are over 30 in a room sized for 24. They are shoulder to shoulder.</p> <p>Many teachers are older and have underlying health issues. Don't make this mistake and then we will hear about teacher and students getting sick and some may die.</p> <p>The passing period are a mass of bodies and if even one student gets it there will be an outbreak.</p> <p>Our lives need to be worth more than being childcare or the economy.</p> <p>For the first time value us.</p>
7/21/2020 9:18:20	Molly	Suing		Salina	<p>We must start face-to-face school as planned on August 12. Children are falling way behind mentally, socially, physically, and emotionally. The longer we go without school the more long term and irreversible these issues become. At this point the cure is worse than the disease where kids ages 3-18 are concerned.</p>
7/21/2020 9:18:21	Melissa	Calvin	USD501	Topeka	<p>Please consider 100% online learning until covid numbers go down in Kansas. The covid numbers are worse now than when we cancelled classes back in March! It is a temporary solution for the time being until covid is under control. There are just too many things to factor in that I'm not sure how this will work. 1. I teach middle school, if one of my kids tests positive for covid, does that mean everyone goes on quarantine for 2 or more weeks? 2. What if one of my family members tests positive for covid? Do I go on quarantine again and all of my students who came in contact with me? 3. The same for my students, what if a family member tests positive... do we all go on quarantine because we all came in contact with each other? 4. I work in a school that has one boys' restroom and one girls' restroom for the entire school, that's 500 kids! How can we all wash hands once per hour? 5. I teach in a classroom with no windows and poor ventilation, how will this keep us safe? 6. What happens if I die or my students die? If our reopening plan contains a contingency for staff or student death, should we really be reopening? I implore you how can we guarantee my safety, my family's safety, my students' safety, and other staff members' safety? The only viable plan is one that keeps us ALL safe... 100% online learning until it is safe for everyone!</p>
7/21/2020 9:18:28	Mandy	Fritz		Holcomb	<p>We are not ready for in person schooling yet. The number of cases must start to drop before we will feel safe in such large gatherings.</p>

7/21/2020 9:18:32	Lesley	HORNBERGER	Usd 500/497	Lawrenxe	<p>Hi. I am the parent of two high schoolers In Lawrence and a high school teacher in kck. I support the three week delay. It gives time for the mask mandates fo set in, for cases to continue to decline and time to sort through the 1100 page document. It also gives time to build a robust online presence for those families who would like to continue that way.</p> <p>I understand that local control is better, however, parts of the state are just not listening to scientific evidence or making this political. We did amazing as a state when Gov Kelly shut us down. It was after the LCC made a huge political stunt that we have reversed course.</p> <p>I also understand that most children under 10 are less affected and that the death rate for teens is minimal. I also feel like any death from this is avoidable. I wouldn't want my new drivers out in the road NYE, and we are still debating schooling for the first semester. I am concerned that rushing back to work and school is risky and would push us to go online.</p> <p>These are unprecedented times and we need strong leadership as well as innovative thinking. I have already emailed the two Board Members in the districts I am a part of, but today I am encouraging all Board Members to uphold Gov Kelley's EO.</p>
7/21/2020 9:18:38	Fariha	Shafi		Overland Park	<p>Being a physician and recently going to a small ice cream social organized by our High School Band Booster organization, I can tell you with absolute confidence, we are NOT READY for in person instruction yet. There is a dearth of awareness and education. Even the Band Directors has no idea of cross contamination etc so what example will they set for these teenagers? Most prenatal were present and not really calling out their children on their reckless behavior. The district NEEDS to be instructed and educated before you are ready to have bodies in those buildings!!!!</p>
7/21/2020 9:18:40	Sherii	Farmer	Parent	Derby	<p>Please vote to open schools by Aug 10. Precautions and guidelines have been worked on all spring and summer for going back to school. Students need the structure and safety of the schools. I agree with students 6th grade and up wearing masks along with all staff but the younger kids will make it a huge distraction from learning. Allow parents the flexibility to choose either online school or full in person at enrollment. Outside paras, regular volunteers and other supportive organizations should still be allowed to be at yhe school. They are necessary to supportive learning methods at all levels. Also you should remove the fall break and move all parent teacher conferences to virtual. These should be a requirement every 6 weeks for both online and in person students to make sure students are participating and held accountable. Please allow the extra curricular activity to start on time as well. Not only athletics but others like band, clubs, etc. Kids learn from all of these. NOT ALL students learn by lecture alone. The SPED kids need hands-on and in person learning opportunities. The key to all of this is grace and flexibility. Please don't just listen to the loud minority on this subject. Thank you for the opportunity to share our thoughts.</p>
7/21/2020 9:18:42	Genevieve	Brown	USD 232	Kansas City	<p>I am an elementary teacher in USD 232. I am writing to ask the Kansas Board of Education to accept Governor Kelly's mandate to begin school after Labor Day. Teachers and administration need this additional time to plan and be trained on new safety procedures if we are to teach in-person during the surge of COVID-19 cases in our county. Furthermore, I believe that students and teachers should not return to in-person classes until covid cases are decreasing for at least 14 days in the district's county. Please do not put the health and safety of Kansas teachers, students, and families at risk. Teachers should not have to chose between their health and the health of their families and their jobs. I believe that putting students back in the classroom too soon will be unsafe for their physical health as well as emotional health, if they are to witness friends and adults in the school building getting sick.</p> <p>Please keep Kansas safe and please vote to accept Governor Kelly's mandate.</p>
7/21/2020 9:18:45	Nancy	Hamilton	Parent	Lawrence	<p>Opening schools when there is a high level of community spread is reckless. I am concerned about kids, but I am more concerned about teachers and staff. Delaying opening until after Labor Day is sensible. It gives the state time to get Co19 under control.</p>

					<p>Dear Members of the Board of Education,</p> <p>I want to implore you to follow the Governors guidelines in delaying the start of school. It is only 3 weeks later than normal, and it will make a lot of difference in the safety of our teachers and students.</p> <p>My daughter and son-in-law are both teachers. They tell me that they have had little communication with their school leadership and currently there is little planning for reopening. They will need the extra time to prepare classrooms, policies, and procedures for the reopening. The three additional weeks will go a long way in making this possible. If not, it is going to cause chaos in the schools because currently there are no plans, PPE, guidelines, or procedures for safe reopening. Give our teachers and staff the time they need.</p> <p>I have four grandchildren in the school system. Two of those students have parents who are at risk due to health problems. It may be true that most students may not have a severe reaction to Covid-19 themselves. However, if they pass it on to their parents, they could end up orphans. This is serious stuff! They need to go to schools that are safe, with good policies and procedures to assure minimal chance of infection.</p> <p>I also have concern that there is no policy as to how to deal with teachers and staff who become infected and lose time due to this illness. You are requiring them to work in unsafe conditions and many will become sick and some will die. Will this time off come out of their normal sick leave, or are special consideration being given to their compensation. Our teachers and staff are not receiving compensation for hazard pay, yet they are expected to risk their health to do their job. I will not even go into the legal consequences of a failure to reopen safely but it does not take a genius to know they will be huge.</p>
7/21/2020 9:19:07	John	Scott	Concerned Grand Parent	Paola and Olathe	Again, please do not override the Governor's direction and do what is right for our students, teachers, and staff.
7/21/2020 9:19:11	Michelle	Nichols-Holland	Usd267	Wichita	I feel that everyone's safety should come first. Please vote for virtual online classes.
7/21/2020 9:19:14	Rebecca	Hornecker	Maize School District	Maize	Open schools with precautions!
					<p>First, please let me say thank you to all of those in positions of decision making during this very difficult time. We appreciate your time, hard work, and devotions to our state.</p> <p>I'd like to voice my concern about the re opening of schools, before the cases of COVID 19 have begun to decline. In our county, Saline county, we have had a large increase in cases in the past few days (33 cases from Friday - Monday), and that is with the mask mandate in full effect.</p> <p>In order to best protect our kids, teachers, and support staff, I do not feel like opening the buildings would be safe or prudent until new cases have begun to decline and we have full safety protocols in place to handle what may occur.</p>
7/21/2020 9:19:26	Stacia	Brenneman	Family	Salina	Again, thank you for your service and consideration of what the general public is thinking.

7/21/2020 9:19:26	Mandy	Todd	Olathe School District 2	Shawnee	Although I am fully ready to be back in my elementary art room, it is clearly not safe for both educators and students. We are not like other essential workers during this pandemic. We don't have protective plexiglass to distance us from others, we don't have the appropriate protective gear for staff and students (N95 masks, face shields, etc.) we are not one on one with our students like doctors and nurses and retail/store workers, and there is no way to truly protect everyone from daily exposure in schools! I would likely be exposed to 400 students or more every week! Educators are in a classroom of 20-30 students who will definitely not follow social distancing! If we go back face to face when the virus is climbing, it will spread like wild fire! We already have a sub shortage in Olathe, and it will be even more so this year. There clearly won't be enough subs to cover sick teachers and staff. School will not look like normal school. I would advise keeping the delay of school until after Labor Day. Then we can see where things are at by then. This also allows time for schools to train staff for the possibility of multiple teaching scenarios. Not only do our schools need more time to prepare, but safety of educators, staff, and students matters! Our lives matter!
7/21/2020 9:19:43	Elizabeth	Tuttle	My Family	Olathe, KS	As a school district staff member and a parent to two boys who attend school in Olathe. Please give the school districts more time to make things as safe as possible for all of us. This isn't political it's a PUBLIC HEALTH ISSUE. Please.
7/21/2020 9:19:43	Glenna	Burden	Self	Hutchinson	As both a parent of a student in high school and a high school teacher I cannot fathom bringing kids in to close contact while the virus continues to climb. Please delay the school opening so that we can get a curve shifting down word to make it safe. Please do not place the teachers staff members and most of all the students at risk just because of an arbitrary start date
7/21/2020 9:19:47	Jenna	Thiessen		Cassoday	I do not want to delay school start. I think each school along with parents school decide what the safety precautions are. Whether kids wear masks and what kind of social distancing the school can do. Its not a one size fits all decision. There are many very small private schools that receive zero Gov funding that should have freedom to do what they choose. Especially since parents pay tuition for students to attend their they should have a choice. Children need school and need it as normal.
7/21/2020 9:19:55	Kalie	Romney	After labor day	Seneca	Start after labor day
7/21/2020 9:19:56	Paige	Stutey		Wichita	Reopening schools currently is not an option that cares for the lives and health of any students or teachers. Waiting and reassessing the situation at a later time is a step in showing that care for others' safety.
7/21/2020 9:19:56	Nicole	Smith		Wichita	I am requesting that schools go completely online until our area has a declining or zero positive Covid-19 cases. We all know that if we open schools we will be creating hot zones in every city. Please do the right thing and protect our citizens. Putting off in person schooling, during a pandemic, is the only safe option. Thanks for considering. Nicole Smith, parent to a student at USD259.
7/21/2020 9:20:04	Alexandra	Bahadori		Pottawatomie County	You need to keep schools closed. I am a teacher and I can say that we are not ready. We have not been given policies, cleaning supplies, or anything to keep ourselves or our kids safe. Myself and other teachers are prepared to quit if it comes to that.
7/21/2020 9:20:05	Angie	Keithley	Myself	Shawnee county	I total support the delay of school. It worries me the amount of chemicals my child will be exposed to when going back to school . More then the virse scares me now.
7/21/2020 9:20:21	Audrey	Garvey	Teacher	Wichita	I believe that for the safety of our students and staff, and to give adequate planning time for teachers and staff, students should not return to buildings until after Labor Day.
7/21/2020 9:20:21	Jerad	Haskett	None	Lenexa	Keeping students out of the schools isn't about the health risk to the students, but to the spread of the virus to those who are at risk. And also the direct risks to the teachers and staff. Do the sensible thing and allow the schools to be open online for the 2020-2021 school year.
7/21/2020 9:20:24	Dixon	Woodburn	USD 465	Winfield	As a teacher, I have already spent hours of my summer preparing for many contingencies this fall, all in order to best educate students who may be learning in my classroom and/or at home. I am not close to being ready because I have also needed time to educate myself on new technologies and platforms. Many of my colleagues will need teachers like me to provide guidance and training-- all of this takes time! Thank you for considering these needs!
7/21/2020 9:20:25	Chrissy	Stover		Sabetha	Yes, to be safe. After Labor Day will give the districts more time to prepare.

7/21/2020 9:20:29	Carrie	Sherron	Blue valley schools	15050 oxford st Leawoo	These kids NEED in person school and sports. I had a Sr last year and she was robbed of so much. We now know what we can do to protect ourselves. I also work in the elementary school and so i will be there every day working with kids and i still feel the same way. Let parents choose. If they choose to keep their children home they can but give an option to let kids go back.
7/21/2020 9:20:31	Shayla	Cook		Hoisington kansas	I am a RN and I have three school age children. I can definitely see the pros and cons of school starting late, however logically these same kids hang out outside of school, go to daycares together, and like my kids summer rec. my kids spent 5 weeks at a summer rec program for PreK-5th grade and Had well over the number of children in this program then they would in a classroom size, is there something that 3A and smaller can start and 4A and larger need to wait because of population size? Also the improvement in my children's sleep habits and behaviors when they were able to interact and run with their friends and learn drastically changed over these 5 weeks! We have now been out of summer rec for 1 week and they are back to not sleeping and behaviors have become a struggle. I also am married to a teacher, and because of him being off of work for multiple months and the uncertainty of when he will returning he has had to start new medication to help with the anxiety. He says he became a teacher to make a difference in kids life and be that person kids can trust and be able to teach them real life scenarios not just math. My vote would be to start school and sports mandate mask and increase cleaning take temps daily. Kids need school and sports for their mental health and so do the teachers!
7/21/2020 9:20:36	Kira	Larson		Wichita	The BOE needs to do what's best for children and teachers. Please do not force them back into school while the COVID-19 cases are still rising daily. It's unfair to ask teachers to put their lives at risk and it is insane to put children's lives at risk. Please do what's right for Kansas residents.
7/21/2020 9:20:39	Margaret	Snead		Olathe	Schools are not ready to open in August. Our children are not "guinea pigs" and we shouldn't open just to get them back in the classroom. Our job as educators is to keep them safe, and if we do not have the supplies, resources, or capability to open then we should not be opening to in-person classes.
7/21/2020 9:20:40	Aaron	Miller	USD 259	Bel Aire, KS	Please please please vote to keep schools closed until after labor day. We need time. Plain and simple. Where I teach, it is a hot-zone. There are many covid cases, and I do not feel at ease heading back into my school with 800+ teens. 1,116 hours can be made up; Lives cannot.
7/21/2020 9:20:52	Carrie	Miller		McLouth	Please delay the start of school until the county in which the school resides is new case free for at least two weeks. This means that each county may start school at a different time. It would take into account schools in western Kansas that have no cases, but protect student in larger districts where there has been daily new cases. There are still many unknowns with this virus and our children should not be the test subjects.
7/21/2020 9:21:08	LOri	Martin	USD 500	Lenexa	Please protect our teachers, students, bus drivers, cafeteria workers, secretaries, paraprofessionals and the families they come home to each day. Support Governor Kelly's delayed reopening. Kansans can endure.
7/21/2020 9:21:15	Julie	Davis-Windler	Usd 305	SALINA	Last year my 3 paras and I with our 9 students all got sick with colds and some fevers. We were all sick off and on for at least 3 weeks. We wash hands in our classroom & use sanitizer constantly with our SPED students along with spraying down our tables, handles, doors, etc. & no matter how careful we were and are we still all got sick. I hate doing on line school, but I have many reservations about starting school this year!
7/21/2020 9:21:24	Nicole	Huey		TOPEKA	Do not open until after labor day. Allow schools to prepare. I work in healthcare and have been on the frontline. This will spread and we do not have the resources to treat all the ill.
7/21/2020 9:21:29	Brianna	Siefkes		Manhattan	Please vote in support of the Governor's mandate! Even if you don't think the virus is a threat, teachers need time to prepare!!! It is vital for the safety of the students and the staff! We have already had issues with enough custodial support pre-Covid, and many of us have been told to "wait and see." We've done what we've been able to planning wise but cases are rising and to ensure safety we need time to think through all the logistics, especially at the middle and high school levels! Please, I urge you to err on the side of safety and solidarity and support our Governor!!!! Kid's lives and quality of education depend on it!!!!
7/21/2020 9:21:36	Meghann	Gourley	USD #412	Hoxie	PLEASE allow our kids to go back to school on time and function as normal as possible! Western Kansas is so much different than eastern Kansas and I don't feel that the governor should make a blanket order for the whole state. Let's keep control local!!
7/21/2020 9:21:40	Jeanette	Daly	Usd 501	Topeka	Open now. Waiting messes up school calendars. We have been out of the classroom for 6 months. That's enough time to get supplies.

7/21/2020 9:22:04	Jennifer	Ankerholz		Clearwater	I appreciate that the Governor wants us to delay the start of school. First and foremost, the pandemic is worse than it was in the spring when we closed schools. But now, with this constantly changing situation, we need more time to plan for the re-opening of schools.
7/21/2020 9:22:09	Heather	Crump		Andover	I am an elementary special education teacher for USD 259 and have been teaching for this district for the last 8 years. My school is one of many urban schools that is over crowded. We have over 500 students who attended our small elementary school. Our gym doubles as a lunch room because we don't have any other place for students to eat. This means that there are many days where we have lunch on one half of the gym and P.E. on the other half bringing 150-200 student into the same crowded room. In addition, many of our classes exceed 25 students making social distancing in classrooms impossible. I am also a wife and mom. My husband works from home due to having an autoimmune disease and heart failure. Per his cardiologist, if he gets COVID-19 the results will be catastrophic. We have been social distancing and self isolating since March to ensure his health and safety. My husband and I are not elderly, we are 33 years old. While I love my students and want to return to the classroom to teach them, we cannot safely do so at this time. COVID cases are increasing daily. One of my roles as an educator is to ensure student safety and returning to school at this time will not do that. Imagine the toll it will take on young students when some of their teachers and classmates die. Your decision on schools reopening could literally be the difference between life and death for students and educators, not to mention students families that may be at a higher risk at home. I respectfully ask you to not open schools at this time.
7/21/2020 9:22:11	Andrew	Slingsby	My family	Manhattan Ks	Please vote to leave the decisions to locally elected school boards. One person should not be making decisions for everyone, that's not how our system was designed to function. If this continues, my family will have no choice but to not put our children in the public school system.
7/21/2020 9:22:32	Theresa	McDowell	Goddard schools	Wichita	Please delay the opening and recommend online school where multiple cases of Covid is present. Support the governors order.
7/21/2020 9:22:34	Laura	VanGoethem	Mother of elementary ki	Olathe	My children need to go to school from a developmental, socio-emotional and academic perspective. To feel safe in our Olathe public school, I would love to see a hybrid option where half the grade attends in the AM and half the grade attends in the PM to reduce class size for social distancing. Or the days could be split instead. Then the kids have some structure and in-person learning for the core subjects. Remote learning is not effective for elementary age children. Please help us get some in-person learning safely through a hybrid option. Kids need school!
7/21/2020 9:22:41	Ryan	Nelson	School teacher	Topeka	Please keep schools closed like the Governor has asked. As a teacher putting all these kids in a big pot is unfair to students and teachers. Hospitals are designed to handle disease and infection. Schools are not.
7/21/2020 9:22:43	Melissa	Feldhausen	Parent	Liberal	I am writing you today asking you to please let us start school on time!! As a parent and a staff member! We need things to get back to as normal as possible. School is about so much more than learning. Kids need the interaction. If school is delayed until after Labor Day we will have been out for 6 months!! That is too long. If people do not want to go back they have that option but please let the ones of us want to go back! As staff I am worried about being able to take care of my family if we don't go back! I only budget for so long with no paycheck and that time is coming to an end. Please send us back at our normal time!! Thank you for reading this!
7/21/2020 9:22:43	Daneen	Deam		Milford	Please do your job and act in the best interest of ALL Kansas students. Vote YES on the delay start order. If Governor Kelly can be brave enough to do so, you can too. Don't pass the buck down to local officials, who may not have the strength to put public health first. We tried that and our Covid numbers shot up. I'm sure you know this virus disproportionately affects Black and Hispanic families. Please don't endanger our kids most in need of protection.
7/21/2020 9:22:46	Ross	Newell	Parent	Olathe	Just permanently make the school year start after labor day and go into June from now on. Many schools across the country already do this, it will save districts on AC costs. August is too early to go back to school, with or without covid.
7/21/2020 9:22:54	Lindsey	Dewell	Olathe School District	Olathe	As a teacher and parent in the state of Kansas, I strongly encourage you to accept Gov. Kelly's order to push back the start of school until Sept. It is imperative that we protect the children, teachers, and staff. I support Gov. Kelly and would appreciate your support too! Thanks for your time and consideration.

7/21/2020 9:22:54	Chandea	Eidson	Paola High School	Paola, KS	It only makes sense to delay schools until after Labor Day to ensure ALL schools get the required and much needed PPE supplies they need. If they can follow proper guidelines then I am all for having my child go back to school AFTER Labor Day.
7/21/2020 9:22:56	Carlita	Pederson	I'm a teacher.	Topeka	Please let us wait to open brick and mortar schools until we can do so safely.
7/21/2020 9:22:58	Michelle	Collins	BVSD	Overland Park	I think school should be delayed
7/21/2020 9:23:00	Jordan	Tabares	USD 475	Junction city, Kansas	I support the delay of schooling
7/21/2020 9:23:02	Joe	McGregor	Tax payer and parent	Haysville	Masks should not be a requirement.
7/21/2020 9:23:03	Robert	Castleberry	USD 259	Wichita	How are we going to keep teachers safe? We are on the front lines of all this. We need more time for planning as many of us don't know anything yet. How will you handle deaths of students and teachers. Mental health of all ?? Everyone is talking about that students need to be back but there is little talk about how the teachers feel.
7/21/2020 9:23:06	Mj	S		Osborne	The survival rate is 99.96 percent. There has been more suicide deaths than coronavirus deaths. We need to look out for these kids social emotional health and look at the statistics. Get back in school! And no masks which will only provide respiratory problems down the road for the toxicity of breathing in our own carbon dioxide.
7/21/2020 9:23:10	Heather	Ashley	Parent	Hoyt	Let the kids go back to school and allow the activities to continue. Should be a county decision.
7/21/2020 9:23:13	Marilyn	Ott	Usd 422	Greensburg	I prefer that school opens after Labor Day! I think as teachers it would be nice to have a bit of extra planning and inservice time to get ready for the kids! We have a lot of new things to implement this year.! Thank you for asking!! Have a great day!!
7/21/2020 9:23:15	Melissa	Saaranen		Stockton	Delaying the start of school isn't my favorite option. I hope you will consider the impact this will have on families across the state that are already struggling with childcare and finances. Not to mention, the impact it has on our children. We all want a return to normalcy, but I have little faith that it will happen. But honestly, this isn't the executive order I have the most issue with. And I guess there isn't anything you can do about Executive Order 20-59. But I still want you to know where I stand on that one. I hope my local district will have an option for online/distance learning. I cannot bear the thought of sending my children (pre-K & 1st) to school in masks (for my 6 year old) and be taught by teachers in masks or face shields. And socially distance, and temperature checks. It is just surreal for me to think about. I can't help but think about my 3 year old's first year in school will be a bit frightening for him, with his teachers in mask and face shields, and all his older peers as well. We are going against human nature here. I get the idea it to keep everyone safe from the virus. But at the expense of suppressing the instincts of our children to learn to interact, play, and connect with each other. It makes me incredibly sad to think that the young children will not be able to do what comes naturally to them. Not to mention the burden this will have on our teachers, even if all the parents are supportive. I don't come with answers, I wish I did. But my kids won't be attending in person schooling this year with the Executive Order 20-59 in place. We love our school district and our teaching staff here. It makes me incredibly sad that my kids won't attend school. But I will not risk my children's natural tendencies to connect and learn by subjecting them to these unattainable mandates of masks and distancing. At least at home, we will be able to hold on to the connection and interaction. So we hope for the online option through our district, and if that isn't available we will choose a homeschool route without local support of our district. And in doing so, We will likely go down to a one income household for a while. My business will suffer further, it is already suffering from the shutdown, but I will risk it for my kid's education. Thank you for your time.
7/21/2020 9:23:18	Somer	Dokolas	Olathe Public Schools	Olathe	No in person classes
7/21/2020 9:23:18	Nick	Pfeiff		Overland Park	Please do not overturn the Gov. Kelly's order. Many of my family members are elementary school teachers and have been given ZERO information on how they are to stay safe in school. Please give out teachers, administrators, students and parents the extra couple weeks to prepare for this new normal and do it the RIGHT way, not just the easy way. Thank you for your consideration.
7/21/2020 9:23:25	Reggie	Rice	Parent	El dorado	Keep schools closed. Also, when the do resume, only have days or alternate
7/21/2020 9:23:29	Kimberly	Unruh		Hillsboro	Please do not delay the school opening, in 3 weeks a lot of learning will happen. The kids need to get back to in person school.

7/21/2020 9:23:34	Rachel	Schmale		Hamilton KS	Please delay school until after Labor Day to allow ALL our wonderful teachers and faculty to learn and prepare for the new normal. Then have schools do a mandatory 14 day online remote learning to start to allow for families that choose to travel over the holiday. This virus is soo new that they learn something new about it almost daily. I am concerned that the younger kids won't understand or know to keep their masks on even though we need them to.
7/21/2020 9:23:36	Merri	Archibald		Lawrence	For the safety of Kansas children, listen to the Governor and keep schools closed until after Labor Day!
7/21/2020 9:23:37	Meghan	Plankers	Olathe School District	Olathe	As a teacher in the Olathe school district I feel strongly that we should wait till after Labor Day to begin the 2020-2021 school year. Our district has not had the opportunity to update the staff and families of the plan for the year. With the extra weeks in August the district will have more time to solidify a safe environment for kids and staff. A plan should be put into place that has longevity and can be used throughout the semester. The rise in COVID positive cases and the push to start at the beginning of August, I think, will lead to more spread and quick closure. Pushing back the start of the year will hopefully lead to a confident plan within the Olathe district and more confidence in teachers as they transition back to classroom.
7/21/2020 9:23:38	Kara	Reed	Parent and teacher	Leavenworth	Ad cases rise and schools prepare for the “new normal”, please allow the districts the time needed to create a workable and safe plan for our students and teachers. Rushing back to school in three weeks isn’t necessary or wise.
7/21/2020 9:23:39	Cora	Cooper		Manhattan	I support Gov. Kelly’s directive for schools to begin after Labor Day. Our numbers are so much worse now than they were when we shut down in March, why would we think it’s safe now? If the legislature would would towards getting everyone to wear masks (a requirement is just fine with me— people are required to wear clothes in public, aren’t they?), we would see an improvement in numbers and save many lives in addition to those of teachers and students. Stop your political grandstanding and do what’s right for our lives, not your personal career. Let’s make Kansas a shining example of how we can control this pandemic. We’re been a laughing stock far too long.
7/21/2020 9:23:41	Traci	Klein		Overland Park	I support Governor Kelly's executive order delaying the opening of our public schools until after Labor Day. Before any schools open, all school districts should be required to have protocols in place for any positive cases at the school: students, teachers, para-professionals, bus drivers, support staff, etc. I read through 2 districts' reopening plans, and neither mentioned anything about how they would handle the reason any of this is even happening. Teachers deserve to feel safe and protected while serving our communities, and they need to know that their health is a priority to our community. And while children seem to fare better with COVID-19, the long term effects are still unknown. As cases continue to rise, please do the right thing and protect your public school constituents.
7/21/2020 9:23:44	Wade	Nudson	Self and family	Olathe	Don't assume your kid is *so* special they WON'T be one of the 14000 kids that are going to die. That's sheer hubris. Assume your kid WILL die if you send him to a crowded school, and act accordingly. Keep them closed until you can open SAFELY. Until the number of cases are down. Until R0 is WAY below 1. Cancel the fall semester, if we need. Put the health of our kids above political games.
7/21/2020 9:23:46	Austin	Schopper	USD 385	Wichita	To open schools during a pandemic, exposing children, parents, teachers, support staff, and the larger community as a whole, to danger is not only irresponsible, it's evil. You cannot claim to support education while playing fast and loose with the lives of those involved. As a teacher, I love my job and have dedicated my life to the education of young people. I come to school knowing full well that I may someday die in the service of my students. That is a choice that every teacher faces when we see Sandy Hook or Columbine. However, to create an environment where teachers are not only likely to face that choice at the hands of a virus, but where their deaths, and the deaths of children, are acceptable losses for nothing more than tallies on a political scorecard, or worse, because they just aren't worth caring about, is perhaps one of the most immoral and unethical things a person could do. The science has been settled. We trust experts when they fix our cars, plumbing, power lines, or air conditioning. But, for some reason, when it comes to our very lives, we pretend that we know better than them. Vote to keep schools closed and trust our educational experts that we will be able to provide the best possible services to our students. Those same ones that, every day, we fight for.

7/21/2020 9:23:49	Carolyn	Williams	Teacher/Counselor - US	Sedan	Please vote NO on the Governor's mandate. Counties and schools should be able to decide on their own how it is best to get their kids back in school. No educator would ever do anything to risk the health of a child. We know what is safe for our kids and our community. Let us decide! This is not a "one size fits all" situation. Thank you.
7/21/2020 9:24:05	Margaret	Shoffner		Overland Park	Please keep schools delayed as long as possible. This gives educators more time to prepare. My only child is a cancer survivor and is at high risk. Both his dad and I work. Please don't make educators and kids pawns. Keep them safe!
7/21/2020 9:24:11	Jackie	Malec	Blue Valley School Dist	Overland Park	Please vote to wait to open schools until after Labor Day. The schools need more time to plan and gather PPE supplies.
7/21/2020 9:24:14	Matt	Morrow		Olathe	reject the executive order. These decisions should be handled by the individual districts
7/21/2020 9:24:19	Emily	Mulligan		Lawrence	Please follow the governor's recommendation to delay the start of the school year by 3 weeks. Health officials say it's not safe to begin in-person school, and that is who we should be listening to. It is not healthy for the kids in Kansas to begin school in August. Listen to the experts, and make the safe and healthy choice for our kids!
7/21/2020 9:24:20	Stephanie	Jensen	USD 240	Bennington	Please listen to health officials and all the facts surrounding this illness. That is what is really important, not the opinions of parents or teachers. Also please do your best to be consistent. I have already told my children they will not have school until after Labor Day and this back and forth is not healthy for them. We, as parents, need consistent information they allows us to plan our lives out. As you know kids need structure and consistency, please make sure you also take that into consideration.
7/21/2020 9:24:22	Beverly	Regier	grandparent, paraeducat	Newton	I'm writing to support Governor Kelly's mandate for the public schools in Kansas. I'm a grandparent of students in the public schools of Newton, Kansas, as well as a special education paraeducator in one of those schools.  Now is an important time to keep the children and the community safe from the rampant spread of covid-19. We still do not completely understand the full long term impacts of this disease on the general population. We don't know how much children spread the disease. We do know that some populations already have a higher risk of long term health effects and death. As time progresses, we are seeing others in the lower risk groups have long term debilitating symptoms months after contracting this disease. This isn't a time to take chances on spreading that risk.  We are asking parents, children, and educators to risk their safety in order to open schools at the usual time. I've been an educator most of my life as I also home schooled my own children for a number of years. What I learned then is that children can survive a break in formal education. They gain maturity and new perspectives and resilience and can catch up and exceed our expectations. Their minds are still developing and learning even when not in formal education. They are able to quickly make up for what seems to adults to be lost time.  What they can't make up for is lost health, or in worst cases, lost lives. Late start to school is small, in comparison.  Beyond this, the impact on the larger community also must be taken into account. The risk of spread in schools is a risk to the entire community, as I'm certain you are aware. Please delay.  One other observation I would add is one of my own community. Our county commissioners met after the governor mandated mask wearing. The political pressure on them was huge. At the beginning of the meeting, all three commissioners indicated their belief that mask wearing was crucial in preventing the spread of covid-19. The pressure they received, combined with police reluctance to enforce, that was enough to make all three commissioners choose not to follow the governor's mandate. Numbers of infections quickly began to rise in our county. Because of those infections, they have since bravely chosen to follow the mask mandate with some small revisions. My point here is that our county officials ran for a job that was very different than what they are facing now. A decision by the Kansas State
7/21/2020 9:24:31	Farima	Farokhi		Lawrence	I fully agree with the governor's decision to delay opening schools. As a parent & a public school educator I am concerned about our lack of PPE for starting school in person. The 3-week delay will allow more time to figure out the logistics of returning to school, either in person or online or in a hybrid. The number of Coronavirus cases also needs to decrease before I feel comfortable sending my child back to brick and mortar buildings.

7/21/2020 9:24:33	shana	watson		bennington	I feel that it is in each kids best interest to return to school as normal as we can make it. They have been out long enough. Most kids have been together throughout the summer as is.. whether playing some sport, swimming, conditioning. As far as the start date, if you wait till after labor day and it let's them come back without mask then I am for that. otherwise if your going to mandate mask then what does it matter 2 weeks difference. I hope you really think of how the mask are going to work for the teachers to deal with. They do not need to wear them 7-8 hrs a day.. Teachers will be spending more time directing children of all ages to stop touching or messing with their mask, which will be less time teaching. Please consider all factors with this. some kids can not wear them, for many reasons..as for one of mine, she struggles with catching her breathe.. think of the autistic kids or sensory, or the ones who struggle with reading. I think it should be an option. if some parents feel they want their child to wear them then that's their choice. but not every person kid/teacher should ever be mandated to wear them.. There are other steps to take for caution. The kids need to get back to activities as well. Kids need to be involved in things, let's get these kids back to school and let them enjoy their childhood! Not every county is in the same boat. The smaller schools are not dealing with it as much as bigger cities. Our numbers are significantly low.. I think it should be up to each county to determine the mask.. thank you
7/21/2020 9:24:35	Becky	Strunk	Teachers	Colwich	Children thrive on routine. Disrupt that routine or take it away altogether and they are lost. When children's routines are disrupted they often misbehave. But what they are really saying is that they are lost, that we have pulled the foundation of their days and weeks out from under them, and now they are confused and disoriented. We need to take into consideration what is best for kids. The science shows that kids don't pass the virus as easily to others. We have to ask are the teachers just being lazy or do they really fear for their life. The flu has killed more people and we don't close for that. So I ask, please open our schools on time. Our kids needs the safety and security of school.
7/21/2020 9:24:40	Rachelle	Wertenberger	Parent of children in US	Sabetha	Please leave decision up to districts.
7/21/2020 9:24:40	Stacy	Przybylski	School	Overland Park	Go virtual and/or delay start. Teachers are afraid and need to be safe. We cannot bring this virus home to our family.
7/21/2020 9:24:42	Jonee	Crump	Parent - USD 435	Abilene	Thank you for the opportunity to provide opinions from the citizens of Kansas. Please reject this order. Teachers are Essential, Education is Essential. We are sending the wrong message to our youth by delaying school, while EVERYTHING else is moving forward with masks. It's ok to go on vacation, it's ok to practice and play sports tournaments, it's ok to go out to eat, it's ok to attend theater camp and science camp, I could go on and on. Heck, a neighboring town has a day camp at the Trampoline Park - that's ok but delaying school is necessary? Most professionals are back working at their offices, doing business and making necessary changes to keep employees and customers safe. We've had MANY professions working this whole time and making the changes to make it work. Our kids have been out of school since March and the schools have been preparing to start in August and had plans in place to make it safe - there is no reason to put off education. Thank you for your time. Jonee Crump Abilene, KS
7/21/2020 9:24:45	Kinley	Neier		Olathe	I think the schools should delay in person learning until at least after Labor Day. Maybe even until the spring semester.

7/21/2020 9:24:43	Peter	Crevoiserat		Wichita	I know that the state Board of Education did not choose to be in the position to affirm or deny Governor Kelly's orders. However, the importance of this decision cannot be understated. I know that some members of the board have vocally claimed that this decision should be left to local school boards. The issue with this methodology is that many districts are following the guidance of the state. If the state says, "you are allowed to open." They will. They will do so with the belief that the state would not allow them to do something that isn't safe. For those areas that believe they are immune, remember that it only takes one person to spread the virus in your community. We are a state, not a collection of local communities. For things as important as global pandemics it is vital that we act together. States that have devolved power for making these important decisions to local governments have seen the effects. Local officials without the bigger picture in mind have taken steps to weaken our response to this pandemic. That is why multiple communities voted to eliminate the mask mandate. The results were clear. Our numbers rose because people were being given permission to act irresponsibly. Now we see businesses finally taking up the cause of enforcing masks. However, this is not because they were eager to get involved. It is because their community governments have left their employees and customers at risk by not following clearly decided health guidance. Your responsibility is to do the right thing for students, not for ideology. This virus does not care that you believe power should be vested in localities. Your ideology does nothing to protect Kansas students' health or justify a lack of response. I know some will vote against Governor Kelly's order, but I hope that the majority of board members will not align themselves with a faction of government that has openly espoused support for conspiracy theories. Board member Dombrosky posted on her personal Facebook on May 7th a diatribe that supports multiple conspiracy theories, including: Fauci knew about the virus in 2017, China acted maliciously to spread the virus, masks prevent the body from receiving oxygen, and that this is a plot to spread vaccines. I'm flabbergasted that an elected official would not only hold these faulty beliefs but openly spread them. I hope many other members of the board will speak out against that type of ignorance, stand with decided health science, and vote to approve Governor Kelly's orders.
7/21/2020 9:24:50	William	Heck	Kansas City Kansas Pub	Westwood	It is currently too dangerous to allow students to return to schools. Cases are on the rise in Kansas, and in Wyandotte county specifically (which is where my district is located). It is not worth the political points that might be scored to risk the lives of students, teachers, administrators, and their families. There is no research out there that says it is safe for teachers and older student to return to buildings. Please support the Governor as she was elected by the entire state to lead, while each of you were only appointed by a single district.
7/21/2020 9:24:51	Janet	Kellogg		Riley, Ks	Please don't let schools open before Labor Day, my daughter's life and health of her children and husband depend on you to make the correct decision! Your decision needs to be made based on the physical safety of all of us not on the lobbying by a group who is more interested in the economics. Believe me, I know the economy is important. We've lost several thousand dollars of our retirement funds due to COVID-19. However, grieving families burying loved ones or waiting for loved ones to come home from the hospital don't go shopping. They may just barely be able to pay their bills because of their grief. Please, give us a few more weeks to flatten this COVID-19 curve. Governor Kelly is moving us in a healthy direction just like she tried to do this past spring. Please support her, our children and their families by voting to follow Governor Kelly's executive order. Please!
7/21/2020 9:24:53	William	Hageman		Manhattan	I support the delay in school start date.
7/21/2020 9:25:00	Jolene	Reed	Reno County Education	Buhler	I would plead with you to allow the Governor's delay of schools. It doesn't mean we aren't going to open, but allows our districts to put into place the important precautions that are needed to open safely. After 32 years of providing Speech-Language services, I have never been more scared of my life and my students (PreK-12 grades). I work between two buildings. There is no way that my district will be able to get all of the plexiglass stations in place that they have committed to, allowing everyone to stay safe. I want to return to school but safety comes first. Let's do it given the time our Governor and Dr. Norman are recommending!! Otherwise, I would see retirement after this year.
7/21/2020 9:25:01	Kelli	Schoenthaler	Schools	Olathe	Please keep our students, teachers and school staff safe.
7/21/2020 9:25:04	Lance	McDowell	Goddard high school	Wichita	We need to delay opening and be online for the first semester to protect people and still play sports.

7/21/2020 9:25:05	William	Heck	Kansas City Kansas Pub	Westwood	It is currently too dangerous to allow students to return to schools. Cases are on the rise in Kansas, and in Wyandotte county specifically (which is where my district is located). It is not worth the political points that might be scored to risk the lives of students, teachers, administrators, and their families. There is no research out there that says it is safe for teachers and older student to return to buildings. Please support the Governor as she was elected by the entire state to lead, while each of you were only appointed by a single district.
7/21/2020 9:25:09	Anne	Fancher	My child!	Overland Park	<p>Please look at the science (as our governor states) and realize the very small risk to children and young people. If masks work (as she states) then lets put them on and go to school! There is now a 5 month lag in learning (please don't consider spring online as learning). Children's mental health needs to be considered here! My child has come home from summer workouts in a better mood until this week when the threat of them getting shut down is looming! To date, we have had no outbreaks at our summer workouts and our child has also played club baseball every weekend with no outbreaks. You can go to the store, eat at restaurants, go to the pool, go to the dentist, why can't they go to school. We have seen teachers out at all these places, even at a protest (which there was no social distancing), so why can't they go back to school. If parents don't want to send their kids, they can choose online school. If parents don't want their kids to do activities, they can choose that, but don't cancel it for everyone!</p> <p>Based on the information from doctors and psychologists, I believe we do more harm than good if we delay starting school and activities on time. I am one of over 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay. If we need to sign a waiver, I'm fine with that.</p> <p>If the schools need more time to prepare, fine, but don't cancel their activities! Let them continue to practice! Let's give kids some credit! My child will wear a mask if it means he can go to school! I'm tired of seeing teachers bash kids on social media that they won't follow the rules! Missouri, Nebraska, Iowa and even Florida are all moving forward with fall sports! It's hard to explain that 10 miles away in Missouri they can play sports, but Kansas can't!</p> <p>Please don't ruin another classes senior year! The majority of these kids will never participate in these types of activities again and have worked hard to get where they are now. Senior year is to be enjoyed with their classmates, not spent online in their bedroom!</p> <p>Thank you for your consideration!</p>
7/21/2020 9:25:09	Dylan	Harris		Wichita	I am science teacher in a large high school. My classroom is small and usually filled with close to 30 students. The delay not only gives me and my colleagues a chance to prepare, but gives more time for for people to comply with masking requirements to (hopefully) reduce infection rates. My mother was recently diagnosed with cancer and I am her primary caretaker. I have no interest in putting her life and mine at risk.
7/21/2020 9:25:09	Jan	Scheideman		Wamego	Please vote YES to delay school opening until after Labor Day
7/21/2020 9:25:21	AGA	CARPENTER	parent	overland park	Hello, I would like the Board to know that our household is against delaying the start of the 2020-2021 school year. The schools have worked very hard to come up with plans to re-open safely and they should. Please vote against Gov. Kelly's executive order 2058. Thank you.
7/21/2020 9:25:23	Curtis	Mitchell	Self	Valley Center	The BOE should approve the executive order and delay school until after Labor Day. Buying a little more time to make sure we get it right is critical to our chances of completing a full educational calendar. Let's do this the most responsible way possible for the safety of the entire community.
7/21/2020 9:25:27	Kelsie	Crist-Funk	My child	Manhattan	I do not feel we should cancel our children's school, school should be in person and sports should be I'm full swing. We are listening to much to political agendas instead of the facts and data from countries that have had daycares and schools in session.
7/21/2020 9:25:28	Tawnya	Becker	n/a	Junction City	I vote to start school at the normal time. this virus is not going away. there will be not end until there is a vaccine.
7/21/2020 9:25:28	Camber	McDonald		Kansas city	I think school should be delayed and kept online
7/21/2020 9:25:29	Catherine	Ireton		Lenexa, KS	The rate at which people are contracting this disease is even higher than before, and people are considering having their children go to school? We don't even have much of a plan. I think it would be irresponsible and dangerous to not wait for a well-thought our plan at the very least.
7/21/2020 9:25:38	Darrel	Kleeman		Ulysses	Support required unless you really don't care about health of children, teachers or parents!

7/21/2020 9:25:39	Rebecca	Grondahl	Olathe School District	Overland Park,	Please keep the health of students and staff at the forefront of this discussion. While I believe we should have mandatory virtual classes for starting fall*, at the very least, we should delay opening. Give Kansas a chance to flatten the curve back down before going into the school year. *Please consider that influenza season is right around the corner, and with covid rates going up, this could lead to a disastrous fall/winter.
7/21/2020 9:25:40	Robin	Cabral	Retired Educator, Grand	Wichita	This delay- at the very least -is needed to assess health conditions and medical capacities prior to throwing Kansas kids and by proxy entire communities and economic sectors into the Petri dish of in-person schooling.
7/21/2020 9:25:40	Amadee	Staab	Parent and Teacher	Hays	Please accept the governor's recommendation. I pray for the safety of my students, my children, family, and myself. I do not feel we are prepared to proceed with school stating as scheduled. We need additional time to put safety measures into place to protect us all! Thank you!
7/21/2020 9:25:51	Kylee	Hipp		Garden City	I believe that this is a decision that should be left up to the local district and the parents. This is not a one size fits all situation, and is unfortunately being treated as so. Parents should decide if their kids will be sent to school, and with or without a mask. Current active cases in S.W. Kansas just don't support delaying school until September.
7/21/2020 9:25:54	Christian	Ammerman		Wichita	Pass this. This is not only safe for our students, but every other person that works in a school building. Human health and safety should not be a political issue. I know more than anyone that students and staff want to return to schools, but it shouldn't be at the risk of their own lives to do so.
7/21/2020 9:25:58	Mirna	Guadarrama		Wichita	Schools should remain closed until after labor day. Students should not need to wear masks 8 hours a day especially the small children. ait is not safe for them to return as more and more people are tested positive and its not safe for them to return wearing masks when adults can not even wear a mask for a 40 min shopping trip!
7/21/2020 9:25:59	Marian	Dawson		Topeka	While as a teacher of Special Ed in Topeka 50, I know that pushing school back will cut out much needed breaks in order to get the required hours in for the school year, I am however very much in favor of using that time to plan and get prepared to teach remotely and using the hybrid model my district has agreed on.  We need time to figure out HOW - all students will even begin to get access to the technology, have technology repaired from having been left with them over the summer, - to safely redo bus routes and staggered schedules to match school plans - to assign staff and teachers to best meet all student needs remotely and in person. - to find solutions for parents to find child care for their children who aren't going to school when they are working - to find ways for teachers to figure out how to teach online and in person at the same time. We crash coursed teaching online last spring and it wasn't as effective as it could have been. We cannot do better without learning new tricks in using online learning the most effective ways possible.  ALL of this is totally chartered territory and it is overwhelming.  It would be easier for parents to just put everyone back in school, but since that isn't really a viable option, that could be dangerous to many, we need time to figure out plans.
7/21/2020 9:26:12	Marissa	Atchison		Medicine Lodge	This limbo of not knowing what to even begin to plan for must end. I have children who need to be in the class room! For more than just learning! My 6 yr old daughter has been diagnosed with Level 3 Autism Spectrum Disorder, and needs that time to socialize with children her age! She has regressed since schools closed in March!
7/21/2020 9:26:17	Christopher	Grabast	NA	Baldwin City	I agree with the governor. We need to follow her recommendations. Thanks!
7/21/2020 9:26:18	Julie	Thornton		Manhattan	I am in favor of delaying the start of school until after Labor Day. This would give teachers more time to prepare for remote/hybrid learning. With more people wearing masks, our case numbers might also be able to level off by then.

7/21/2020 9:26:21	Sue	Sandbothe	USD #233	Kansas City	As a parent and educator, I do not believe that schools can reopen safely at this point. There is NO possible way to provide opportunities for hourly sanitizing, to have appropriate physical distancing within already crowded classrooms, or to keep kids from removing masks, touching others, or being sent to school sick. We need to think about our kids, AND our staff, many who will get sick and/or need to quarantine multiple times during the school year.
7/21/2020 9:26:26	Catherine	Ireton		Lenexa, KS	The rate at which people are contracting this disease is even higher than before, and people are considering having their children go to school? We don't even have much of a plan. I think it would be irresponsible and dangerous to not wait for a well-thought out plan at the very least.
7/21/2020 9:26:26	Mellissa	Wiltrout	USD 320	Manhattan	I am in support of delaying the school year. Teachers need time to adequately prepare for the expectations we are given as it relates to a safe reopening approach. I would rather have more time to ensure our school is ready, than to start on the "normal" date and potentially end up closing a few weeks later, because we weren't prepared and case numbers went up. Starting the school year without having a detailed plan will put teachers in "emergency teaching" mode, which does more harm to staff and students than good. We also need to consider (and keep at the forefront of our minds) that many teachers travel for work. This fact affects the ways in which districts should be looking at infection numbers and risk factors.
7/21/2020 9:26:28	Natasha	Zielke	Parents	Pratt	I believe the decision to start should not be decided by the governor. My daughter will be a third grader and is ready to get back into the classroom. She misses school. There is no reason to wait until after September 8th. I would prefer districts start in August if they are ready and leave some cushion to the schedule if it becomes necessary. I work in the hospital at Pratt and I still feel that the kids deserve to be in school
7/21/2020 9:26:37	Sara	Vincent		Topeka	As a licensed social worker and school counselor, I strongly encourage the school board to return authority to local schools and administrations to make the best decision for their districts and allow schools to open on time (August) and in person, should they so choose. Our students have been without necessary structure, support, and services for nearly six months. This decision is not about their safety or well-being, but is a broad over-reach by our governor that does not consider the potential costs to our children, not only in their academic growth, but for many their safety, emotional support, and nutrition. Distance learning and on-line education are not viable, let alone good, options for many students/families. We should follow the recommendations of the American Academy of Pediatrics and many other organizations dedicated to the care of children, and allow students to return to school in person and on time.
7/21/2020 9:26:50	Jason	Rawlings	My family	Olathe	Kids, especially young children to early teens, need to get back to in-person school. The extended social isolation for kids with few to no friends is extremely harmful, especially in ages 11 to 14. My son relied on school as his main social interaction and he has few friends outside of school in our neighborhood.
7/21/2020 9:26:54	Alyssa	Preisser	USD 332 Cunningham	Cunningham	Our children will not be starting late or wearing masks. We will be homeschooling if school does not start like normal. This has gone to far. It's no longer about their safety. This decision needs to be left up to each school individually. It is not a one size fits all.
7/21/2020 9:26:54	Crystal	Johnsom	Seaman School District	Topeka	Delaying the start of school is a nightmare. The virus is not going anywhere. Task forces across the state have been working since March to prepare for August. Now their work is partially wasted. Let's get kids and parents BACK where we need to be. If parents don't feel it is safe to return, they have the option to keep them home.  Also, mandating that K-12 all wear masks is ridiculous. Give K-3 the option. The Governor and her doctor look like absolute hypocrites as they stand and speak with no mask on. What a joke!
7/21/2020 9:26:57	Kayla	Mendoza	USD 483	Plains	As a mother of 4 and wife of a school teacher I urge you to please delay opening our schools. My husband is eager to get back to work but I worry about our children. Yes, I know they are young and will probably get over it but what are the lasting effects? Damage to their heart and lungs? During this pandemic I have kept my children away as much as possible and now my hands are tied. I know they need to return to school but does a delay really hurt anything. It gives more time to flatten the curve and helps school prepare for students. Please vote for a delay.
7/21/2020 9:27:03	Susan	Holm	Parent of Olathe district	Olathe	I am for school starting but if delayed start is going to happen for in person classes, we need to start the online programs on our original start date. Let everyone get used to it, work out the kinks and be prepared if we don't start back after Labor Day or know what to expect if we have to go back to online later. Our kids need to be learning! My children have not learned anything new since March!

7/21/2020 9:27:18	Phillip	Bennett		Overland Park	Don't delay opening schools. My kids have been in YCamp all summer, located at a school. There have been zero issues. The face mask requirement is simple and one everyone is okay with. Our kids don't learn at home. Home is a place for play. Working and teaching just did not work at all. They learn with their teachers and their social interactions with other kids is very important. Please vote to against delaying school. They have had all summer to prepare and a mask requirement is key such as many organizations require. Thank you!
7/21/2020 9:27:26	Jason	McCullough		Hays	<p>I would like to expression my displeasure for the executive order to delay school and to require masks for students. The social and developmental component to school is extremely important. Have you thought about the repercussions of social and developmental impact from this?</p> <p>As a health advocate, I would suggest focusing efforts on improving the immune system through exercise, fresh air, nutrition, and stress relief. This order does the opposite!!</p> <p>Allow these students to learn, socialize, and interact with one another or we will see additional unforeseen problems in the future!! Let them strengthen their immune systems.</p> <p>Cases are up primarily due to increased testing. Deaths are down despite this increase in testing. The mortality rate from Covid-19 has been reported as low as 0.26 from the CDC and even lower from other independent research. It will continue to decline as more positive cases come.</p> <p>Children need school and they need a social outlet that does not require masks or other extreme measures.</p>
7/21/2020 9:27:31	Sara	Fuller		Burr Oak	<p>As a parent and an educator I'm not sure what delaying schools opening is going to help. Students have already been without school, routine, and for some much needed food and a safe place since March.</p> <p>Also, with the delay in starting will this push back schools going until after Labor Day? I feel like this would be creating a cycle of something not good. (Cutting into summer break/activities, forcing parents to keep kids occupied for 3 more weeks, and the list could go on and on.)</p>
7/21/2020 9:27:36	Nicole	Zacharias	Teacher	Leawood	Provide teachers with ample time to prepare and to bring the infection rate down
7/21/2020 9:27:36	Tracie	Howell	Autism Speaks	Overland Park	I feel going back after Labor day is fine with a hybrid system. Please do create a plan for those kids who are waiting patiently for the math advancement test or create a building opportunity for them.
7/21/2020 9:27:42	Sara	Plante		Newton, KS	We also need to keep staff safe and healthy or we are not going to be able to provide our students with effective instruction and education! If teachers are not kept healthy and safe then how are they supposed to teach their students?
7/21/2020 9:27:43	Melanie	Falcon	Parent	Lindsborg	I fully support the governor's executive order. I'm a parent and a teacher and I believe the later start would give us more time to prepare for opening our schools. I'm excited to get back to work, but want I want to ensure my kids, students, and coworkers are safe.
7/21/2020 9:27:44	Joslyn	Nelson		Junction city	<p>I don't agree with delaying the school year. COVID-19 will be around for quite some time because so many individuals choose not to follow appropriate guidelines.</p> <p>If the school year does indeed get delayed, we have be forced to homeschool due to an upcoming PCS. Which in unfortunate because I did NOT get a degree in childhood education. My son is still learning the basics (letter sounds, simple adding, sharing, following rules, etc.)</p>
7/21/2020 9:27:53	Sally	Dreher	Teacher at USD 475	Manhattan	Delaying the start to school would be a blessing in order to allow school staff to better prepare the safety expectations in reopening. Safety has to come first, and this time would allow us to do what's best for our students. Please allow us the time now to keep our kids safe later.
7/21/2020 9:27:54	Tammy	Sutherland-Abbot	Boe 209	Moscow	I would like for school to open with no restrictions. Our children need to be in the classroom. Our local county and local BOE are responsible and will do what is best for our community.
7/21/2020 9:27:56	Laurie	Ulrich	Teachers	Finney	Please keep in mind timeline. If we start after Labor Day, we will be going into June. If we end in mid to late June, we start back in early August. That's only 6-7 weeks off. What does that do to summer camps, athletes?

7/21/2020 9:28:05	Broone	Waters	USD50Q	Topeka	I want to make sure the lives of teachers are considered. I am scared about getting COVID. I do not want to die. Please make sure health is the top priority.
7/21/2020 9:28:08	Jennifer	Patel	Parent	Lenexa, KS	Please support Governor Kelly's E/O's. Students and teachers need to be safe.
7/21/2020 9:28:08	Becky	Shamburg	Brown County Kansas S	Hiawatha	Please remove politics from this decision. We have a governor who has the support of medical experts who believe this is the best course of action. This also gives all of us in education the gift of time allowing for us to plan for the upcoming year. We must plan for basically three types of ways education may look. We want to do this well so give us that gift of time. Also, to put a decision of this magnitude to local control is a recipe for anger, hurt feelings, and decisions based on emotion and not reason. The state of Kansas elected Governor Kelly. Please allow her to do her job and lead.
7/21/2020 9:28:09	Jennifer	Switzer		Manhattan	I do not believe delaying the school start date will have a positive impact on the school kids. The school districts have had since March to prepare for the scenario and to delay it even more puts the stress back on the parents. I have 3 children and both my spouse and I are college students. Delaying the start date puts us in a stressful position of trying to find a caretaker for our child, now that he will start after us. I do not believe that adding 3 more weeks will have any affect on being prepared for school to start. You have had more than enough time to prepare and I am honestly disappointed that we are at this key point in the school process.
7/21/2020 9:28:24	Gary	Glenn	myself	Olathe	I urge you to delay the opening of schools until after Labor Day. We must make sure the safety of teachers and students is at the forefront. This pandemic is spreading in Kansas, and we need to try to get it under control before we return to school.
7/21/2020 9:28:24	Dan	Brungardt	USD 204	Bonner Springs/Edward	Do to the current increases in the number of COVID cases across the State of Kansas I believe it is a good option to postpone school until after Labor Day. This will provide local county health departments and school districts more time to study current COVID trends. Additionally, due to the new order by the Governor of Kansas requiring temperatures of all individuals entering school buildings, for larger school districts it is going to take time to develop a plan to facilitate this process and also assure some sort of social distancing.
7/21/2020 9:28:26	Nancy	Renner		Dodge City	I do NOT support waiting until after Labor Day to begin the school year. I have a Senior and a Sophomore this year and have seen signs of anxiety and depression as a result of missing out on school activities and the socialization that school provides. I ask you to override the governors mandate.
7/21/2020 9:28:34	Stephanie	Avila	TPS USD 501	Topeka	I believe we should wait and return when it is safe for staff and students. Thankyou
7/21/2020 9:28:35	Michelle	Bollin	Parent	Easton	Please give school time to plan a safe reopening plan. Our district usd449 just sent out parent survey on Friday July 17th. Parents have no idea when their reopening plan will be shared with us so we can make an informed decision. They haven't communicated with us and I'm not sure teachers and staff can have enough time to plan for a variety of types of learning since we have no idea what the district guidelines are. Their teachers need more training on the new way learning will be happening whether face to face, hybrid or remote.
7/21/2020 9:28:35	Jonathan	Carman	myself	Overland Park	Delaying school for safety is necessary and imperative.
7/21/2020 9:28:38	Melissa	LaRiviere		Junction City	I think it is a good idea to delay school. Until the school boards are able to safely meet IN PERSON then school should be delayed. If the school board doesn't feel it is safe to meet in person then it is NOT safe for our children to return to school!!
7/21/2020 9:28:39	Cheryl	Standridge	Lighthouse	Overland Park	Please allow for the individual school districts to decide for themselves when it is best to open schools.
7/21/2020 9:28:40	Becky	Woodward		Belvue	I support delaying school until after Labor Day.
7/21/2020 9:28:49	Jacob	Wright	Liberal High School Bar	Liberal, KS	I believe this executive order is a smart and safe decision for the preperation of schools, teachers, and administrators. However it can also present an issue with childcare for those families that work long hours when their children are back in school.
7/21/2020 9:28:52	Rachel	Whitaker		Lenexa	Please uphold the Governor's order. We support the delay of school starting to give the community more time to wear masks and decrease cases of COVID.
7/21/2020 9:28:55	Julia	Willhite		Olathe	Please support the delay. Our teachers and districts need more time to plan.
7/21/2020 9:29:04	Sharla	Brummett	My family	Wichita	You need to open schools. My child has already lost so much this year and losing her education is not ok.
7/21/2020 9:29:10	Jamee	Saiz-Fischer	None	Salina	Please uphold the governor's order, the cases are increasing and it's not if a child or staff member gets ill, it's when if we don't listen to health officials like Dr.Norman. Schools are not ready, please vote with the health of Kansans in mind! Thank you!

7/21/2020 9:29:13	Heather	Burch	Parent	Louisburg	I am unhappy that my children are continuing to miss out on their education because our governor oversteps her authority. My children have the right to an education, that we all pay taxes for. I want my kids in brick and mortar buildings, without masks, and without social distancing. The science is saying the virus is weakening, the death count is continuing to decline, and the CDC has said it is nearing (already there in my opinion) become a non epidemic. Kids need to be in school!
7/21/2020 9:29:17	Megan	Snyder		Coldwater	Our kids have been allowed to play sports and swim together, all summer long. There is no reason to delay the start of school!  This goes way beyond "protecting" our children. What about working single parents? What about two parent working households? What about the agencies and businesses that employ the parents of these children? It's not just as simple as a kid staying home.  Decisions like this have HUGE implications.  As a mental health RN, I urge you to consider the psychiatric effects of being away from trusted adults, friends, and instruction/structure for as long as our kids have. It is imperative that they are allowed to be kids. It is vital that kids who need a safe place, have a safe place to go. There are things worse than catching a virus that has a near perfect recovery rate, and many of these kids are living that nightmare right now.
7/21/2020 9:29:24	Courtney	Devot		Fort Riley	Will face shields be another option for students as well as teachers?
7/21/2020 9:29:31	Samuel	Naumann	Myself	Greensburg	It is absolutely ridiculous to continue to rob our children of an education. Get these kids back in school now! No more delays! No more restrictions!
7/21/2020 9:29:35	Chelsea	Hull	USD 259	Wichita	I fully support the governor's order to delay the start of school until it is safer to do so.
7/21/2020 9:29:41	Shaina	Wiens	Self	Phillipsburg	The lives of students, teachers, school staff, and their families are endangered by schools not being adequately prepared to implement safety measures such as masks, daily temperature checks, etc. Schools need time to plan on how to implement such safety measures in a way that will ensure the safety of everyone in the building. Moving the start of school back by 3 weeks will allow schools this time, and will ensure that the year can start as smoothly as possible.
7/21/2020 9:29:45	Jennifer	Peterson	Delaware Ridge Elemen	Merriam, KS	Please vote for the executive order to push back school opening until after labor day. It is clear that we needed this guidance from our Governor as our state is a hot spot now. This delayed start will give school districts extra time to get supplies needed to help keep students and faculty safe. This will also give teachers time in their rooms that they were not able to access over the summer because of COVID. It provides us time to make a plan for manipulatives, books, resources, etc. and to set up our room for minimum exposure.  Last year during flu season, my classroom had to be sanitized with 2 separate sanitation bombs because of all the students who were out sick in my room. This was also with me wiping down surfaces during the day and a janitor cleaning my room. We stop giving handshakes and hugs, we washed and sanitized our hands constantly and it didn't stop the flu. I am very concerned about how COVID will look in my room this year because of what flu season looked like last year. We don't have the data and information on children and it is scary as a teacher and a parent.  If you give this choice to local control, I fear more lives will be at risk than are needed. If delaying the start of school keeps 1 person from getting COVID, it will be worth it.
7/21/2020 9:29:47	Michelle	Fields		Wichita	I am in support of the EO. While I realize that not every district needs this, I am not confident that the areas that should delay their start will do so without such an order.
7/21/2020 9:29:50	Doris	Sher		Shawnee	Children need to be in school. Little ones that have just started their education have already forgotten so much. Learning to read is essential and they need that instruction. Last year the on line education was far below standards and we desperately need to catch up. We all need to sacrifice and I strongly feel teachers and leaders need to be on the front line of saving our children's education

7/21/2020 9:29:52	David	Jackson	N/A	Olathe	Please delay the school year as long as is necessary to ensure you have equipped teachers and students with the same level of protection that is available to doctors and nurses on the front lines of the pandemic. And for the administrators to plan adequately to accommodate true social distancing, effective online learning options and class scheduling where teachers are able to prepare material to fit those plans. Without these firmly in place, we will be putting children and school workers at great risk without adding any educational value.
7/21/2020 9:29:54	Kristin	Burnett		Riley	As a school employee, I very much appreciate: 1) getting back to the business, responsibility, and privilege of getting children back IN school; 2) doing so safely and in a manner that practically and realistically makes sense (I'm not sure that such a reliance on hand-sanitizer is a good idea, though); and, 3) starting school after Labor Day so that each and every district has time to order enough supplies so that we can keep ourselves and our students as safe as possible and prepare our classrooms/classes in the best way. Obviously, we're not interested in eradicating disease--lovely but foolish idea--and, we know that illnesses of every sort will be part of school day just as they always have been; but, I admit, the fear-mongering has got to me, and I'm apprehensive about going back to work and how we can keep somewhat sterile environments. Our district seems to be on the ball with taking care of the physical aspects; I have concerns over being able to work away from the building (if needed) and still be paid. As a classified staff member, I know too well that we are not highly regarded and seen as "less than". That being said, I think it is imperative that our children get back into schools so that they may continue to grow, learn, and live; and, I am honored that I get to be a part of that process. Thank you for supporting education, for working diligently on behalf of so many different groups of people, and for really considering the needs of the people of this state.
7/21/2020 9:29:57	Stan	Compton	Myself	Topeka	Open the schools up in August. Our children need to be in school.
7/21/2020 9:30:03	Karen	Langer		Olathe	We must do the right thing for our children and open the schools. All evidence from medical professionals and countries where kids are in school tells us it is safe. The continued panic over a virus that for most of the population has at least a 97% cure rate. Our children are being used in some sick political theater. The harm to our children from continuing school closure is well documented. Kids in food crisis, abusive situations, kids with learning disabilities falling further behind possibly unable to catch up. Are we really just going to doom an entire generation on fuzzy science? Yes, this is uncharted territory, but we have other cases to examine, the schools in EVERY other Western country has successfully sent children back to school. If we care about kids at all, we must send them back. We need to offer them more than uncertainty, possible abuse, possible malnutrition, rising drug abuse and suicides. As adults it is our duty to protect the children, Let's make sure we are protecting them from the right things. OPEN THE SCHOOLS AS USUAL.
7/21/2020 9:30:12	Jenny	McGinnis	Parent - Shawnee MIssis	Overland Park	Please have class IN PERSON for these kids! They need it!!! They want it!!! If a kid gets sick - they can stay home. But don't quarantine everyone! Life needs to move on or we will miss out on some very crucial years of learning for these kids. Online does NOT cut it for grade school age kids.
7/21/2020 9:30:19	Shannon	Long	Usd453	Bonner Springs	Uphold the Mandate to delay opening schools! Gov. Kelly made a data based sound decision to protect teachers and students, the board does not present data to the contrary to not support the delay. A vote against the mandate would be based on personal bias and politics. Shame on you being on the board of education if you undermine any efforts to keep teachers and students safe! You need teachers, our students need teachers, give us time to prepare for the real possibility of online or remote learning more than the week we got in the spring. Ask yourself if you'd do what you're asking teachers to do?, if the answer is no then delay the start. Do the right thing here! We're counting on you! Don't make this political or personal, support data based decisions!
7/21/2020 9:30:20	Lisa	Haas		Wichita	postpone start of school, then start schools with a hybrid and half of class size fewer people in person means better ability to space the kids out. H This is important especially with elementary kids

7/21/2020 9:30:32	Tammi	Mitchell	USD 214	Ulysses	As our county numbers continue to increase rather quickly, I am in favor of delaying the start of school. My concern is out county fair is happening now. It is being said that there are infected persons &/or those being told to quarantine, who are shopping in the stores and out in public. If those individuals are at the fair, our numbers could skyrocket in the next 2 weeks. I am immunocompromised so do have a high concern of putting myself into this situation. I am our building librarian and see about 900 kids/teachers/staff members each week.
7/21/2020 9:30:41	Betty	Zwahlen	Citizen	Columbus, KS	Please support online only learning. If that isn't possible please delay the start date until after Labor Day.
7/21/2020 9:30:43	Laura	Haffner	Parent	Hays	I don't think it is wise to have a state wide blanket mandate. Currently our city is experiencing an uptick in cases. It "may" be beneficial to wait here. However, what about all the places that are stable with zero cases? Does it make sense to hold them back? I'm clearly not a virus expert but would support more local control.
7/21/2020 9:30:47	Allison	Celik	parent/USD 383	Manhattan KS	Public schools should follow Gov Kelly and NOT open until after Labor Day
7/21/2020 9:30:49	Mae	Young	USD 259	Wichita	Please stick to the Governor's plan to keep us safe. I'm very worried about my health and the health of my community if we were to return to in-person instruction. I love teaching, but I don't want to risk my life or the lives of those around me. My daughter attends daycare in the high school where I teach and I want to keep her safe and well.
7/21/2020 9:30:54	Amelia	Cramer	Family	Overland Park	I think its a wise decision. It allows more time for schools and institutions to make the changes and adjustments needed to ensure health, safety and well being of every person that will be in buildings
7/21/2020 9:30:56	Shaunna	Cardinell		Wichita	I support delaying the opening of school.
7/21/2020 9:31:02	Amber	Ives	Clearwater Elementary	Clearwater	DELAY
7/21/2020 9:31:04	Trisha	Swindle	Our Home	Derby	Please set bench marks for when school should be open, partially open, or closed. The lack of guidance from the BOE and our local districts continues to shock me. Please sit down with the health department and come up with definitive numbers of positive cases that merit the opening, partially opening, and closing of school buildings and/or classrooms. I support delaying the start of school to buy you time to set these vital and life-saving benchmarks. I have read the State BOE guidelines for the opening of schools. I have read my districts proposal as well. There is absolutely no mention what threshold of positive cases merits a change in plan. Nor is there a definition of what "community" means either. I appreciate wanting to let individual districts have control over their schools. However this is not a curriculum discussion, these decisions are what's going to stand between a child or adult living and dying. You have got to step up and lead.
7/21/2020 9:31:04	Allen	Galloway		Andover	Gov. Kelly is doing the right by our children, their families, and educators & support staff by delaying the start of school until after Labor Day. Children are not medical experiments! We should not hope that they are not carriers of a devastating disease that can kill family members and those who are educating them. Please make the right decision and support Gov. Laura Kelly!
7/21/2020 9:31:06	Rachel	Smith		Cheney	Delay. I want my kids in school with their friends, social health is important too. But, with the way things are right now, I don't feel like it's safe yet. I'll be doing virtual if given that choice. I have 6 kids that are school age, a baby, and pregnant, it will be hard but worth keeping them safe.
7/21/2020 9:31:27	Dwight	Goodman		Wichita	The Governor is only asking for a delay to allow districts to start there chosen/individualized plan successfully and not rushed. The mask requirement protects all involved and allows everyone to go home and not bring the virus with them. Some districts may not need the mask requirement but when dealing with children we probably should be overly cautious than not.

7/21/2020 9:31:36	Joetta	Whitcomb	Personal	Moundridge	<p>The legislators in this state have had to control our governor's uneducated knee jerk reactions and executive mandates. Now she is hiding behind you! She has made 3 extremely poor and uneducated decisions that have caused educators to spiral.</p> <ol style="list-style-type: none"> <li>1. The knee jerk reaction to close our schools without a plan in March. By the way we were vacationing in Hawaii when this happened. Our governor and the state were mocked on their stupidity. I did not dare say I was from Kansas. It took our kids out of school and they lost basically a 3 months of their education. No discussions, just a mandate.</li> <li>2. In June, we had schools planning graduation and were marching to the orders of the governor. Again a knee jerk reaction from our governor sent educators scrambling and changing their dates. No discussions just another one of her mandates.</li> <li>3. Now in July she has another knee jerk reaction to move our schools start date. My son-in-law is the president of the school board for one of our area schools. They were marching towards the original mandate. They had a zoom meeting the date the governor made her announcement. Our educators were blindsided by this decision. Instead of presenting their plans they had nothing.</li> </ol> <p>All these decisions the educators were blindsided and have zero time to react. If you stand by the governor with this mandate, you all have failed as top educators of this state in protecting our educators and children.</p> <p>STOP the knee jerk reactions and stupidity from our uninformed and politically motivated governor. Our legislators have had to stop her and now she is "using" you! She is refusing to comply with open records so we can all see where she gets her information. What is she hiding??</p> <p>Understand there have been zero children under the age of 29 that have died from Covid19 in this state. Last year Harvey county alone saw two children die of "the flu"!!!! We did not go into mass hysteria for those children. Did we???</p> <p>I believe that the State Board of Education has allowed many of our school systems to fall behind the curve. You have stood by and watch our governor make extremely poor decisions that will affect generations. That lies on your backs.</p>
7/21/2020 9:31:54	Carry	Suchy	Teacher	Basehor	<p>I am both a teacher and parent in the USD 458 district in Kansas and wanted to send my support for Governor Kellys decision to delay the start of school. This time is necessary for teachers and staff to prepare for reopening of schools in the safest way possible. We closed school at the beginning of the pandemic and reopening during the highest point in our state wouldn't make sense and most likely lead to closures again. I am certain you are getting bombarded with emails opposing her decision as well, most of these people have a false expectation of what in person classes will be like and believe it will all just go back to normal. They do not understand the planning, preparation, and redesign that must happen to open again. They have the belief that this is a typical flu virus and are not taking it serious. I can't wait to be back into my classroom again when it is safe. I care about all students and staff and only want wants best for everyone. Please give us time to prepare and plan, give us time to allow numbers to go down. I very much appreciate your effort and consideration on this matter and trust you have what's best for all of us in mind.</p> <p>Thank you,</p>
7/21/2020 9:31:57	Natalie	Brown	Usd 260	Wichita	<p>Please delay school opening! Please don't risk our safety and allow time to forget prepare. I am willing to teach truck June for a safer school start.</p>
7/21/2020 9:31:58	Mandi	Nemechek	Student / parent	Salina	<p>Please delay. I have emailed the commissioner about my reasons.</p>
7/21/2020 9:31:59	Kyle	Pringle		El Dorado	<p>While the easy road may be tempting, we only get 1 shot to do this right. Caution while others preach expedience is the truest test of resolve. Failing to remain steadfast in this will cost lives.</p>

7/21/2020 9:32:00	Kimberly	Munk	USD 274, Oakley High	Oakley	<p>Dear Kansas Board of Education,</p> <p>I know that many people have different opinions on school, community, and COVID-19. I am reaching out to you with my viewpoint as you will have a tough decision on whether to support or deny the Governor Kelly's executive order that will delay the school year until September 9.</p> <p>I am a teacher at Oakley High School, USD 274, and am not in support of the executive order. Currently, as I write this we have only had 2 Covid cases in our county. I am not against taking precautions such as masks, social distancing, extra cleaning, etc, but feel that each county should be able to dictate school term according to what is happening in the area. I would rather start as normal in August and then if we start increasing or get an outbreak in our community at that point be able to go remote or shut down temporarily. By opening when the numbers down allow us to get back into the classroom, create routines and connections to our students that will help when we would need to do remote learning. Last year our school district struggled between having a 7th grader commit suicide, a 12th grader killed in a car wreck, and going remote in March. Our kids have communicated how difficult all this has been and my biggest concern is the mental health of our kids. By starting school this allows these students to an outlet to as normal as their life can be at this time. It also allows the school district to be positive with the current situation, communicates positive self-help to our students, and continue their academic needs. Our school district has purchased Germ misters for each building, cloth masks (enough for each student to have one each day and the school wash them), hand sanitizer for each room, clear dividers for desks and are discussing ideas on how to deal with hallway transfers and cafeteria issues. Our district is also working with teachers one on one whom may feel uncomfortable being in the classroom.</p> <p>Covid is uncharted territory but from the community to community it will be different scenarios and I feel that the local health department and school districts should create the best scenario for them. Some may wait to open, while others may open and then have to have a temporary closing during outbreaks. Please when making your decision consider the difference from community to community.</p> <p>In the end, whatever decision you uphold, I will teach my own children and students at school that you must be flexible and create a positive attitude about whatever life throws at you. Problem-solving is what will make you successful in</p>
7/21/2020 9:32:02	Cescha	Hoffman		Pratt	<p>Thank you for putting students and teachers health first. Our town is seeing an increase in numbers and recently opted back into the mandatory mask rule. I'm hoping the delay will allow us to get the number of cases on the decline before we send our kids and teachers back for the year, so we don't have to quickly change to virtual. Thanks for your time and consideration.</p>
7/21/2020 9:32:08	Genevieve	Allison	Students	Pittsburg	<p>I think that you should support the governor's decree because I believe that if the schools reopen at the date that was originally set (Aug 19); then the schools would have absolutely no time to get procedures in place in time for when students will enter the school. The issue of Coronavirus is a very tough subject for schools. If we are to have 100% face to face instruction in schools, then they would have to prepare to not only protect the students, but also protect the teachers, because no matter how you try and protect the students, the teachers are going to be exposed to all of the students. Because of this, there needs to be a plan that not only protects students, but teachers. If a plan isn't introduced soon then many schools will not have any time to implement the plan, let alone implement it well. We must protect the younger generations from catching Covid, which means having time to give a good plan that can be implemented well. Having the extra time will allow administrators in school districts to plan ahead better and be better prepared for the school year ahead. It will also allow parents time to understand how this school year will roll in their child's school district; which will give parents peace of mind knowing that their school has properly prepared for this pandemic.</p>
7/21/2020 9:32:12	T. A.	Clanton		Maize	<p>Delay schools or go to hybrid learning until it is safe for the children to return. Protect their health and that of our teachers!! Do the right thing and respect the Governors authority, do not set the bad example to our youth of undermining her authority like so many have chosen to do.</p>

7/21/2020 9:32:15	Michelle	Marvel	Parent	Prairie Village	Please consider this opposition to the Governor's order to delay the start of school. My children attend a small private school in Prairie Village. The school has been planning for 5 months. Three additional weeks is not necessary to get supplies or adjust curriculum. Let the schools/districts that are ready open. Delaying school after the extended shut down is detrimental for our children's social and emotional well-being and development. Local medical authorities, including Children's Mercy Hospital doctors, say it is safe for schools to reopen. Remote learning is not viable and creates hardships for working parents. Learning setbacks that occurred over the extended summer break are concerning. Please do not exacerbate the problem by adding an additional three-weeks that are unnecessary.
7/21/2020 9:32:18	Jason	Cummings	Parent	Sedan	School and all activities should resume with no restrictions. It is up to the parents to determine if they want their children to participate in school activities.
7/21/2020 9:32:19	Ginny	Titus		Hugoton/Moscow	I believe schools should start on time. Delaying them does not add safety, but in fact does the opposite for the emotional/mental health of our children. I also feel STRONGLY that decisions like these should be made at the local level. Our local elected officials, school administrators, and community members should be the ones who decide what's best for our children in our communities. A one size all mandate is not appropriate and hurts kids and communities. Thank you for your consideration
7/21/2020 9:32:25	Megan	Allen	SMSD Parent	Overland Park	I support the delay to hopefully give teachers more time to prepare for all schooling options
7/21/2020 9:32:36	Cherith	Mock		Rose Hill	Please hold off opening until after Labor Day. As a teacher I have very mixed emotions of opening full time knowing how well schools get items they need and how well they are cleaned.
7/21/2020 9:32:37	Sabrina	Ramirez		Salina	School delay does make perfect sense, masks mandatory for Elementary school age children does not. I believe the schools will have a hard time trying to focus on teaching and learning while trying to make sure kids are cooperating with the mask mandate. This should be optional not mandatory for the young children who barely understand the situation. How bad are the consequences going to be if the children can not mentally and emotionally wear a mask for 8 hours a day? Please reconsider the mandate for Elementary aged children.
7/21/2020 9:32:41	CK	Middleton	Parent	Lawrence	I support Gov. Kelly's executive orders. Our schools need more time to prepare, please.
7/21/2020 9:32:47	Lisette	Hamilton	Kansas Students	Overland Park	The most dutiful way to ensure equitable education to all k-12 students in Kansas and a safe working environment for all employees is to delay the start of school indefinitely as long as Covid 19 cases continue to increase.
7/21/2020 9:32:49	Jen	Johnson		Overland Park	I ask that the state please allow districts to make decisions that are best for them. Small schools in western Kansas are very different than the large Kansas City districts. Our children have been at various camps this summer with no health problems, and our teachers and principal are prepared to start in August.
7/21/2020 9:32:50	Mandy	Faust	My family and my students	Haysville	My own personal children are ready to go back. I have a Junior in high school, 6th grader, and Kindergartener. All three have voiced their expression to go back now! As a teacher, I need all the time I can get with my incoming 3rd graders. They lost 1/4 of their second grade instruction time. Most will come to me without basic knowledge of subtracting with regrouping and multiplication. Both are standards taught at the end of 2nd grade. We already struggle to get all our standards taught to mastery before testing in April. Now I have to include 25% of the 2nd grade standards. Please open our schools! At the very least, allow it to be a local decision. Many communities do not have any reasons to be shut down. Those are also the communities that are smaller and lower SES communities. Those are our most at risk students. They need to be in school. Please allow this to be a local BOE decision! Closing schools is not a one size fit all solution!
7/21/2020 9:32:58	Tara	Meyer	High school teacher	Wichita	Good Afternoon, I want to urge you to stand with the Governor, and delay the start of school. As a parent, teacher, and daughter of a high-risk parent, I believe this is the safest way forward. If the Covid cases can have a chance to slow or trend downward, I believe the state's recommendations will have a better chance of keeping the teachers and students safe in school. I want to teach my students face to face, mask to mask, or screen to screen. But I do not want to attend even one funeral of a coworker or student. Thank you for your consideration.

				<p>we need to follow the Governor's mandate to delay the start of the school year, or accept distance learning until conditions significantly improve.</p> <p>As a parent these are some of my concerns:</p> <ul style="list-style-type: none"> <li>—Hand sanitizer, tissues and Clorox wipes are provided by parents as school supplies. How does our state fund schools adequately for safe onsite learning?</li> <li>—Half of my community, entrenched in cognitive dissonance, believe the virus is a hoax and masks a conspiracy to strip their constitutional rights. Their children believe as they do. They will put others at risk.</li> <li>—Teachers become our greatest sacrifice to COVID-19. Say by some miracle, all the little 1st graders do sit forward all day, they are facing the teacher.</li> <li>—How does a school implement a fair and equal education for every group in their district during these times? IDPs were not written with a pandemic in mind.</li> <li>—How do schools that are underfunded and understaffed create a safe class size?</li> <li>—How does a small janitorial staff in our small town school district handle the work load?</li> <li>—What sort of protection is there for the teacher whose students come down with it and the parents blames the teacher?</li> <li>—What happens if a student or a teacher dies? Was the school adequately supplied and were all guidelines strictly enforced? The hunt for blame will happen. The lack of supplies will happen. The rebel kid will happen. The exhausted with all of it teacher will happen.</li> <li>—There are so many unknowns with this virus and children are unpredictable by nature.</li> <li>—I can not imagine the impact on-site learning will have on the mental and physical well being of our staff and administrators at the local level. We are asking so much of them, at great risk to their own health and the health of our children.</li> </ul> <p>This is a medical issue that has become political. Please do the right thing even if it is not the popular thing.</p>
7/21/2020 9:32:58	Chalsea	Millner	Abilene, Kansas	Thank you for your service to our community during these troubled times.
7/21/2020 9:32:59	Jeff	Hanhardt	Bison	Get the kids back to school so that we may resume the old regular.
7/21/2020 9:33:00	Danica	Gibson	Galena	I am a parent and a teacher and I fully support the delayed opening. We need time to design a course of action that will be safest for students and staff. If we rush opening school, the ramifications will be serious. Please allow us the extra time for such an important endeavor.
7/21/2020 9:33:05	Jessica	Pannell	USD 233	<p>Please delay the opening of a schools in Kansas until after Labor Day. While we have access to practice using our updated Synergy system, we do not have full access until August 3rd, leaving us a limited number of days to work with the full system if school starts on time. It would render us less prepared for serving all students.</p> <p>Also, with the increasing number of COVID cases in our area, it feels unsafe and inconsiderate of the community as a whole to ask large numbers of students and faculty to gather when no other businesses are allowing such situations.</p> <p>Thank you, Jessica Pannell USD 233 Teacher and Parent</p>

7/21/2020 9:33:06	Kylie	Smith	Parent	Lawrence	I beg you to listen to science and not politicians when making decisions regarding the safety of our children, their educators, and the respective families of both. Your guidelines for the state were just released and now the districts should be allowed the time that they need for planning and for the acquisition of very hard to come by products like disinfectants and PPE. I am assuming that these districts could not apply for CARES Act funding for said supplies until your standards were released. It would be unconscionable to allow yourself such a long time to come up with standards while not allowing the districts enough time and resources for safe implementation. Furthermore, regardless of your standards, schools will cause hotspots and outbreaks of this virus. You should start putting resources toward making online learning more robust and equitable now! You are going to look foolish when we have to turn back to it on a full-time basis again and you haven't prepare at all.
7/21/2020 9:33:06	Krystal	Randa	Parent	Hays	I am a former elem teacher and now mother to a first grader. I am against delaying the start of schools. I feel pushing back the start date is just pushing it back more and more into the cold and flu season - which will be a nightmare. I am for wearing face masks when social distancing cannot be observed (ideally that would be in small increments 10-20 min. at various points of the day). I understand teachers and parents are worried - however, our children NEED to be in school and taught by a certified teacher. If parents are uncomfortable with this, enroll your child in digital learning for the semester/year. Our children have essentially had no school (or socialization with peers) for what is going to be 5 months - and that scares me as a parent and former teacher. These children will be way behind in their curriculum, not the mention those who are suffering from anxiety/depression/and other mental health issues that are not being addressed, due to them not being in school. What do we think these parents/children/families will continue to do in August? Go on vacations, see family, attend large gatherings - just like they have all summer long! You are just extending their summer...they won't stay home and help lower the numbers. Hello, they haven't stayed home all summer long - which is why we are in the position we currently are.
7/21/2020 9:33:08	Charlie	Thornton		Manhattan, KS	I hope you will support the Governor's choice to delay the start of K-12 school this fall. With covid-19 cases rising in my community, I don't believe the options available to my local district can provide a safe In-person environment for my third grader. A delayed start is the right choice to give us time to stabilize before starting school again.
7/21/2020 9:33:10	Jill	Roane	USD 381	Offerle, KS	Please postpone the first day of school with students until after Labor Day. We need that time to prepare for the safety of ourselves and our students. We also need that time to prepare academically so we can provide quality education through any of the three possibilities. The guidelines released will be just as helpful in early September. Thank You.
7/21/2020 9:33:11	Shelley	Goethe		Olathe	I realize you all are getting quite a bit of flack in advance. Thank you first for looking out for the kids and staff - all decisions right now are rough, but you're still trying.  I love school. My kids love going to school and going to specials (gym and technology ). But to talk to the virologist, it sounds as though even if the kids maintain spacing, the ac handlers will spread anything airborne. The kids in the classrooms will still physically be stuck with the viral load as it gets recirculated in the building. Maybe the buildings could be outfitted with air scrubbers or more rigorous HEPA filters? If strict filtering is keeping people on the planes safe, could schools not try something similar?
7/21/2020 9:33:17	Brittney	Fiedler	Olathe	Olathe	Please delay school openings!
7/21/2020 9:33:25	Alta Vista	Alta Vista	parent	Alta Vista	start after labor day
7/21/2020 9:33:28	Eric	Boles		Shawnee	Prohibiting virtual learning is an overreach by Executive Order 20-58. There are many organizations that have spent months preparing for a virtual learning experience, and this order will penalize them for doing the correct preparation. It should not be the state's concern that some organizations are more prepared than others to provide education, just as it is not the state's concern that some pharmaceutical companies are ahead in the race to develop a vaccine. The nature of our varied experiences in life is that some organizations will always be better prepared than others -- whether by deliberate action or merely luck -- and it is foolish to think the state can intervene to force a uniformity of opportunities and outcomes. It is one thing to prohibit in-person, physical school. It is quite another to ban education entirely. Please do not vote in favor of Executive Order 20-58.
7/21/2020 9:33:22	Danielle	Juiliano		Lenexa	Keep schools closed

7/21/2020 9:33:31	Keri	Lane		Topeka	I understand that there are circumstances where the parents/family cannot keep the children at home without risking jobs or essential income. But I feel that keeping the majority home and teaching them remotely/virtually is the best scenario for protecting our communities. I do not believe that bouncing the children around through different phases or new necessary quarantines is in their best interests. All it takes is one teacher or one student, and the rest have to be quarantined with their families anyway. And what about our subs? Most of them are older and are considered high risk. What sub is going to want to enter a room/building after an instance of Covid-19? Let the children learn from home if they can, and lower the risk of exposure for the rest that must be taught in our buildings.
7/21/2020 9:33:40	Vickie	Hyatte		Kansas City	If essential worker are necessary workers and teachers are considered essential then yes they need to go back to work and wear a mask just like all the other essential worker out there. If they choose not to go back to work their pay should be suspended and they should be replaced by teachers that want to go back to the classroom. Bus drivers are ready to go back to work and are not in fear of getting the virus so teacher should stop using the excuse of the COVID and get back to work.
7/21/2020 9:33:47	Madeline	Cheatham	Olathe Public Schools	Shawnee	Please support Gov. Kelly's Executive Order to delay starting school until after Labor Day. As a fifth grade teacher, I know that my students will have an incredibly difficult time social distancing and wearing a mask. We, as teachers, need to have all of the necessary items (hand sanitizers, masks, cleaning supplies, etc.) and need to be prepared for the most difficult school year ever. If we jump back into the school year without being the most prepared we possibly can be, the students and teachers will suffer greatly.
7/21/2020 9:33:49	Carol	Henson	Parent	Shawnee	Please take the time needed to prepare teachers and other staff for school opening. Leave it past Labor Day.
7/21/2020 9:33:50	Tammie	Shourbaji		Wichita	Yes, please delay the start of the school year.
7/21/2020 9:33:52	Andrea	Dean	Pratt USD 382	Pratt	I support the delay in school, but I think my kindergartener will not wear a mask appropriately on a daily basis, which eliminates the purpose of wearing it.
7/21/2020 9:33:49	Becky	Marin	USD 259	Wichita	It's a good idea. Cases are rising too fast for that many people to be congregating right now. As a teacher, I don't feel safe in a building with 2300 people.
7/21/2020 9:33:54	Jay	Marquette		Overland Park	Miss NEED to return to school IN PERSON!! They are struggling in so many ways!!! Masks are fine!! I also think we need all sports and activities. These kids need their outlets. Too much has been taken away from them!! Please let them have a normal school life w accommodations of masks!
7/21/2020 9:33:55	Kelli	Smiley		Pratt	School needs to open for the children! They need it not only for education but for mental and physical health. We cannot live in fear anymore. We need to show our children that we are brave. Yes this is a nasty virus but if we shut down our lives for every virus or bacterial infection we all would no longer be living life that God meant for us but being defeated in fear!
7/21/2020 9:33:58	Mary	Parke	USD#388	Ellis	I think schools need more time to plan on how to open safely, deliver quality education and get supplies ordered. Some supplies are limited, delayed delivery or out of stock.
7/21/2020 9:34:13	Robyn	Barnett	Olathe Schools	Olathe, KS	I teach kdg. I want to be in the classroom with face-to-face learning. Please allow our district more time to prepare for teachers and students to arrive. Please allow us more time for safety training and instructional training.
7/21/2020 9:34:13	Sheryl	Corkill	Shawnee Mission Schoo	Shawnee	Please delay the opening of schools due to the danger of all involved contracting and spreading Covid 19.
7/21/2020 9:34:19	Hannah	Tjaden	Berean Academy	Newton	Please let private schools resume without masks. Thousands will choose to homeschool otherwise. Homeschool curriculums are already selling out online.
7/21/2020 9:34:20	Dustin	Matzek	My family and me	Kansas City KS	I am in favor of the delay so schools and teachers can be equipped to with extra precautions.
7/21/2020 9:34:21	Kelli	Barker	Parent of USD 382 stud	Pratt	Please leave control with local school districts. Not all districts are in the same boat. Certainly, larger urban districts need to make decisions that are different from small rural districts. Currently the decisions regarding school start and masks should be left to the local organizations who know what is happening in that community and changed as needed. One size fits all decisions are not appropriate and or the most beneficial to do things.

7/21/2020 9:34:21	Mona	Edwards	Blue Valley schools	Overland Park	Please do not overturn Governor Kelly's mandate! Our cases are skyrocketing in Johnson County and we need time to get this under control. I miss my students, but I don't want to risk my life for see then. I am a special education teacher and teach students with significant disabilities. They are immunocompromised. This could easily kill one of them. This is also not just about the children, but about all the teachers, support staff, custodians, bus drivers, etc. Our lives matter! Many teachers are older or have preexisting conditions that could make this deadly for them. Are we really going to risk imperson school, only to have our children have their beloved teachers die? The costs do not justify the means. Please do the right thing and let the governor's mandate stand!
7/21/2020 9:34:27	Sara	Harrington	Parents	Haysville	Please keep schools closed until after Labor Day! The longer people can get used to wearing masks and possibly lower the numbers the better. Also as a parent, still not even knowing what my options are I am already overwhelmed and nervous. I need as much time as possible to weigh my options, prepare, and organize! Please think about the health and safety of everyone.
7/21/2020 9:34:43	Kimberly	Sanchez	Pawnee	Junction	I am in agreement that school be delayed until there is a solid plan for kids.
7/21/2020 9:34:46	Lori	Stratton	High School English Te	Lawrence	On behalf of the safety of all Kansas students and educational staff as well as families of both, I urge the Kansas State School Board members to support Gov. Kelly's Executive Order 20-58. I have worked for three different sized communities in Kansas during my career, and I understand the importance of local control and decision-making. However, this pandemic crosses district and county lines, and is too dangerous to risk taking chances with. We will welcome students back to school this fall in many ways, and we need the time to calm the raging virus in our state right now as well as to prepare safety measures. Please understand that this is just a short delay, but it may save many people from illness and worse. Also, please check the very current statistics on children and the virus. These statistics have changed since the American Academy of Pediatrics released their information in June. Also, the AAP said schools should open "when it is safe to do so." Finally, please know that even small communities area at risk. Look at Logan, Kansas, for example. That community seemed to be isolated and safe, and then, in a matter of just days, it is facing a real threat to its population. There are so many unknowns right now. The governor's EO will just buy us all a little more time to be safe for students, which, I believe, is a common value we share. Thank you for your consideration of my request. I appreciate all you do for the citizens of Kansas.
7/21/2020 9:34:54	Scott	Kedrowski		Garden City	I am encouraging the Board to follow the Governors recommendations and science as we navigate the Covid-19 pandemic. Delaying school until September 9th will allow us time to prepare and have a better plan to start school. This time will also allow us time to look scientifically at the last increase in positive cases.
7/21/2020 9:34:56	Jackie	G	I am a teacher	Lenexa	As a teacher, I am worried about the health of my students and that of my family members. Schools are enclosed places, and we have a lot of students. Even with new guidelines, there is a limit to how much can be done. I travel from room to room in the hallways every day, as well as having lunch, assembly and bus duty. I am afraid that if we start back in-person too soon, I will take covid-19 to my family members. Please wait until it is safe to go back to school.
7/21/2020 9:34:59	Megan	Daniels		Spring Hill	I am an elementary educator and in support of a delayed start. A delayed start would give us the time we need to prepare for whatever school will look like after September 8.
7/21/2020 9:35:02	Angela	Handy	Parent	Shawnee	As a mom with 3 kids who receive special education services, I ask that you find a way that the kids that need extra support and help, can get it. Either small group or one on one. Virtual learning was so hard for my kids and myself. The teachers did their very best and so did we to get through the year. I just know they are already so far behind and I am so worried they they'll get further behind if we have do virtual learning only again.
7/21/2020 9:35:05	Kelly	Thielen	Parent/teacher	Dorrance	I would like to see the EO overturned so local health officers, school boards and administration can make decisions that fit their communities. Rural schools and large schools have different challenges and situations to consider. Please allow local control.
7/21/2020 9:35:18	Ed	Flores	Concerned parent	Salina	I support delaying start of school year per Gov Kelly's exec orders. It is imperative that safety protocols are solidly in place and COVID numbers are declining. Pay heed to science and recommended reopening guidelines.

7/21/2020 9:35:19	Shannon	Glidden		Manhattan	We are falling more and more behind with our children's education. I feel we should start the school year on time and then have a curriculum base so if we need to go to online learning later we have a foundation established from our teachers. This virus is not going anywhere so why wait until after Labor Day when it will still be present? If universities are allowed to start their year as normal then young children should also be able to. It isn't every day that students are WANTING to get back in the classroom and have some normalcy back in their lives but they have been home since March without any structure. Please make the right decision and get our kids back on track.
7/21/2020 9:35:24	Rachel	Reimer-Kouame		Wichita	I agree with Governor Kelly's order to delay the start of school until after Labor Day. Additionally, for the safety of students and staff who work with them, I feel that with the current increase in covid cases, schools should initially start online and remain online until cases have decreased significantly.
7/21/2020 9:35:29	Jamie	Prockish	Education	Wamego	As an elementary teacher, I feel that it is necessary to give teachers time to prepare, receive proper supplies, and see cases reduced before we begin school. Please abide by the governors executive order. Thank you!
7/21/2020 9:35:35	Brittany	Weber	Schools-teacher	Auburn	As much as I would love to go back right away I want it to be safe first. Giving us extra time would allow schools to make the return safer
7/21/2020 9:35:39	Ginnie	Ely	Teacher in usd259, parent	Goddard	COVID-19 is not going away. Let the teachers who are uncomfortable teaching leave their contracts without penalty, let the teachers who are ready to come back to the buildings start the school year with students. parents who want to keep their kids home can keep their kids home, and parents who want to send their kids to school can send their kids to school. Let's also look to the severity of the cases (hospitalizations and ICU capacity/usage) vs just the number of cases as our guide for a move to exercise more caution.
7/21/2020 9:35:33	Mary	Culross	231	Gardner	Please keep the needs of teachers in mind as we support the governors order to delay school. Then, it would be most beneficial to have a staged approach to in person learning. Begin with those with learning needs—IEPS, 504, etc. then slowly add additional students as the virus numbers allow. Teachers have families to protect too! We are not responsible for the economy of Kansas as babysitters.
7/21/2020 9:35:43	Karen	Duffner		Kansas City, MO	Starting after Labor Day gives schools a chance to acquire appropriate PPE and other protective gear such as dividers. It also provides a chance for teachers who will be teaching virtually to make appropriate adjustments to curriculum. With cases rising this close to the school year, admin and teachers haven't had time to make full adjustments to parents choosing virtual learning
7/21/2020 9:35:45	Mary	Fieser	None	8509 Westlawn Circle W	I have no problem with school starting after Labor Day. My biggest issue is mandating elementary students wear masks. I taught K-1 for 40 years and masks will simply not work with this age. They will become such a distraction and students will not be able to attain to their work. So much time will be lost dealing with issues instead of teaching. Thank you for your time and consideration!
7/21/2020 9:35:50	Nicole	Schoonover	Parent	Olathe, KS	I would prefer that we delay the start of school.
7/21/2020 9:35:53	Sarah	Reiss	USD 483	Plains	I am not in favor of the delayed start of schools. Please vote to start in August at our original start date. Thank you.
7/21/2020 9:35:53	Kate	Ruecker		Mission	Please continue to keep the safety of children, teachers and the families (some who may have conditions making them more high risk to complications from COVID-19) in the forefront when making decisions for the state's education to resume. It is concerning to me that numbers of cases in Kansas are on the rise, but we are still talking about opening schools. Please listen to medical experts, such as Lee Norman and take his recommendations to heart!
7/21/2020 9:35:55	Jody	Vowinckel	St. John's Catholic, Bel	Glen Elder	Keep the schools closed until after Labor Day. Give our schools more time to prepare for the Covid-19 recommendations.
7/21/2020 9:35:56	Laura	Hall		Salina	Full and over time working mom to make ends meet. My kids need an education that's more than I can provide. Send them back this fall.
7/21/2020 9:35:57	Meagan	Baldwin		Newton	Please approve Gov. Kelly's delay to the start of KS schools until after Sept. 8th. In Harvey County, our cases are rising and our republican county commission refuses to roll us back into a previous stage of reopening. We have families that are planning to attend a large youth livestock show and the county fair at the end of July. These events will likely lead to Covid clusters. The delay to after Labor Day allows time for these cases to be identified and contact tracing to take place.
7/21/2020 9:35:59	Rae	McDaniel	parent	Olathe	please delay the start of school.

7/21/2020 9:36:01	Jeremy	Stallbaumer		Seneca	I believe that schools should be open at regular time this fall. If an area is experiencing a surge in cases then it should be up to your school district to determine how they move forward. I do not believe a blanket policy is the correct way to move forward in this instance.
7/21/2020 9:36:02	Jennifer	Reling	Self	Beloit	I do not believe masks should be required for students or all teachers. Some counties have very little incidence of Covid. We shouldn't be treated the same as high incident schools. Online learning is ineffective for many (most) students.
7/21/2020 9:36:03	Becky	Weir	Parent if 2 school aged c	Shawnee ks	This is the MOST absurd, asinine, socialist mandate. Children should not be indoctrinated!!!! This is government overreach and i will NOT STAND FOR THIS. There is ZERO DATA TO SUPPORT THIS EO!!! Shame on you Governor Kelly!!
7/21/2020 9:36:37	Karen	Cunningham	Medicine Lodge Grade S	Medicine Lodge	I can handle school being pushed back a couple of weeks for teachers and admin to have some time to make accommodations for this ridiculous mandates that she threw out last minute. My fear is Governor Kelly will continue to push it back because the virus is not going anywhere. I am also very upset about the mask mandate for young children and the extreme social distance measures. At this moment if these extreme measures continue, I will not be sending my kids to school. I strongly believe it will be detrimental to their stress and anxiety levels. I want my children to love school. If you take away the parts that make it enjoyable, then they will hate it. The teachers will be on edge all day long (understandable) and it will be a horrible environment for children. It is proven kids don't spread it. I can't for the life of me understand how it is ok for me to drop my 18 year old son off at a dorm to live in, August 12th in Kansas but not ok to send my younger children to school.
7/21/2020 9:36:43	Casey	Conley		Kansas City	Let at risk teachers run online programs. Let lower risk teachers run in person programs. Parents have a choice and class sizes will be smaller.
7/21/2020 9:36:44	Pam	Walker	Teacher at Sabetha High	Bern, Kansas	Please error on the side of caution and support Governor Kelly's mandate.
7/21/2020 9:36:44	Tiffany	Ayala	USD 418	Lindsborg	I support governor Kelly's action to not start school until after Labor Day.
7/21/2020 9:36:49	Monica	Woods	Parent - USD383	Manhattan	I am in favor of protecting our children and teaching faculty / school staff with a delayed start to the school year. I support the Governor.
7/21/2020 9:36:51	Bobbie	Meier		Tonganoxie	If you can't meet in person as a board- teachers and students should not be in person either. Once the state board starts meeting in person- then you can talk about teachers and students doing the same. If it isn't safe enough for YOU to meet in person- it isn't safe enough for teachers and students either! I support the governor!
7/21/2020 9:36:55	Tracy	Overton	Shawnee Mission Educa	Lenexa	I support Governor Kelly's decision to delay school. I'm an educator and this time will allow our staff to prepare for this unusual school year that lies ahead. Safety of staff and students should be at the forefront of this decision making. Remote teaching is the safest for all involved. If businesses are still keeping employees home, then so should our school employees. Children will adapt and they are resilient. Teachers are highly trained to keep students on track and to catch the kids up who have fallen behind. Let us do our work safely. Please put partisanship aside and make a decision that protects students, their families and school employees.

					<p>Dear State Board of Education Members,</p> <p>I am writing to ask that you vote to approve Governor Kelly's upcoming executive order that will delay the opening of schools until after Labor Day. Given the recent increase in cases in various areas of our state and nation, it seems the prudent thing to do to allow schools extra time to gather necessary supplies and PPE in order to best equip buildings for the return of students, faculty, and staff.</p> <p>We have a child who will be starting kindergarten this year in Olathe, one enrolled in an area preschool, and one on the way (due in November); my husband and I are both educators ourselves. We realize there are no easy choices here. However, as teachers and parents, we know that thoughtful planning allows for more effective implementation. There are so many unknowns right now that opening schools in a few short weeks feels unnecessarily risky.</p> <p>Thank you for your service to our youngest Kansans and those who educate and serve them in our public schools.</p> <p>Take care and be well,          Claire Reagan          Olathe, KS</p>
7/21/2020 9:36:58	Claire	Reagan		Olathe	
7/21/2020 9:36:59	Jamie	Lingner	Spring Hill Middle scho	Paola	Our kids mental health is far more important than the recent covid numbers. We just keep our heads on straight and get our kids back to school.
7/21/2020 9:37:02	Lori	Etheridge	District employee	Overland park	These kids need to be back in school! I have been at the ball fields which are packed and grad parties with hundreds of people. Neither instance involves social distancing or masks. So there should be no reason we can't be back in the buildings with everyone in a mask. And they are playing sports everywhere but for the school so please let them have that back also. Mental health is as important as physical health. And with a median death age of 76 in Johnson county. The data does not support staying home either. Thank you
7/21/2020 9:37:03	Sarah	Mullen		Wichita	<p>I have a middle schooler and we have talked about wearing a mask and they understand why they would need to wear one. I feel pushing school back anymore is going to delay their learning. Online classes last school year were kind of a joke and there was no consistency with the teachers.</p> <p>Have schools offer online learning for those who want to keep their children at home. That will help cut down on classroom sizes. Offer in school learning Monday, Wednesday, and Friday. On Tuesday and Thursday they can do hybrid classes and it gives the school time to sanitize and it still holds children accountable or offer mon-Thur classes and Friday hybrid. If other countries have been able to go back to school successfully why can't we?</p>
7/21/2020 9:37:10	Amy	Jones		Bucklin Kansas	I want school to open for many reasons. Kids need interaction with others. Many kids need school for their safe place. I could go on and on, there have been no children with contact of the virus. Where we live we have only had 4 active cases, all of people over 50 and that has been a couple of months ago. We need to get this kids back in their environment! I vote let's just start school and get the kids started in sports as well.
7/21/2020 9:37:17	Melody	McComas	Parent	Wichita	I think it's dangerous to reopen schools during a pandemic surge. No one wants to sacrifice their child for this when there's no logical reason for reopening right now.
7/21/2020 9:37:22	Mel	Vee		Manhattan	Please open as scheduled, some people are ready and not worried to get back into a normal routine
7/21/2020 9:37:36	Tlrza	Lobato		Wichita	<p>This is an absurd over reach of power. If the virus is spread through droplets and masks and social distancing work to slow the spread then let students learn online. If private schools have adequate space to provide social distancing in the classrooms and can be diligent with cleaning then they should be in school! If schools have individual AC in each classroom, then there is no reason why they should not be in school.</p> <p>Our Students in Kansas will be the laughing stock of the country when they are all behind because our Governor thinks she has the power to stifle their education. This is absolutely NOT ok! Let the BOE make the decisions and keep those executive orders for things that actually require the Governor.</p>

7/21/2020 9:37:37	Jenni	Hipp		Garden City	Delaying the start of the school year only further hurts our children's development as they grow. They have already been hurt the last part of last year and now we are expecting them to start late. Children need to have stability and a strong educational program. I'm sorry but they are not getting what they fully need with online learning and delaying the start of school. Also, school for some of these children unfortunately is their safe place and the only place they get a good meal. I fear so many things that could happen if there is not a teacher or staff member in contact with some of these children.
7/21/2020 9:37:42	Tracey	Fuller	My family	Olathe	I am fully in support of delaying the school year in Kansas, full lock-down quarantine for the next few months until we can get the Coronavirus under control, then send kids back to school physically in January 2021. I will not send my 3 kids to school considering Covid cases are much higher than last spring when classes were canceled. Other countries took the quarantine seriously, who had strong leadership & listened to science experts, are now back to normal whereas the U.S. continues to drag it out. This also shows that we need to do a better job in our schools of teaching science & critical thinking like we used to do. I love our school district, OSD 233. They've done a fantastic job during this time, but kids are kids & it's not safe to send them back to school at this time. This is a global pandemic & it's not worth the lives of our children nor the school staff to return to school right now.
7/21/2020 9:37:48	Stacey	Lukas	Greenbush SEKESC	Merriam	With the spike in cases across the state, it will be like sending our teachers and students to the slaughterhouse if we return to school in-person, on the regular start date, without planning, testing, and mitigation strategies in place. I am at high risk for contracting the virus, and am a teacher and solo parent of a 5th grader. She cannot attend school, because the possibility that I catch covid-19 and die, leaving my little girl an orphan is very real. Show Kansas families that your priorities are in the right place, and delay the start of school.
7/21/2020 9:37:50	Angela	Wagoner	Mother, Teacher, and Co	Quinter	One size fits all doesn't work here in Kansas! Our demographics are too diverse. Schools here in western Kansas need to be opened on time. If anything, we should be starting school sooner. There are ZERO active cases in our county, why wait until fall when we get some?!?! If we started sooner, that would give us time to get to know our students and build relationships before moving to an online format when/if necessary. Those relationships are vital and dare I say more important than the curriculum standards we are upheld to. Parents, teachers, students, and our communities have prepared so that we can open safely. Please, don't deny these students the place that many need most right now.
7/21/2020 9:37:53	Madeline	Cheatham	Olathe Public Schools	Shawnee	Please support Gov. Kelly's Executive Order to delay starting school until after Labor Day. As a fifth grade teacher, I know that my students will have an incredibly difficult time social distancing and wearing a mask. We, as teachers, need to have all of the necessary items (hand sanitizers, masks, cleaning supplies, etc.) and need to be prepared for the most difficult school year ever. If we jump back into the school year without being the most prepared we possibly can be, the students and teachers will suffer greatly.
7/21/2020 9:37:59	Angie	Hutton		Olathe	Please keep the schools closed through Labor Day to try and keep our kids as safe as possible.
7/21/2020 9:38:01	Sylvia	Sawyer	Myself	Minneapolis	Teachers need more time to prepare for their varied classroom environments. Also, it's important to see where the COVID numbers go before school opens. Putting a bunch of kids and teachers/staff together on a daily basis in the middle of a pandemic is surely going to spike numbers even more. It's a dangerous mix. We can't know what the future holds after schools open again, but at least we can delay and potentially give the numbers a chance to go down a bit first.
7/21/2020 9:38:02	Jamie	Osborn	My family	Lawrence	Please keep our children safe by keeping the schools closed!!!
7/21/2020 9:38:03	Stacey	Scott		Concordia	Please vote in favor of Governor's mandates. Adjust the amount of days/hours of school year. Teacher's and students lives are more at risk now, than in March.

7/21/2020 9:38:10	Jerry	Brown	Mr.	Salina	I ask that you follow Governor Kelly's recommendation to start school on Sept. 9 if at all other than virtual school. The reason is our state is now considered in the "Red Zone" by the CDC. If you chose to let each school district do their own thing then you are passing the buck. Leadership is about leading and doing the right thing based on the best science at the time. By Sept 9 we should have much lower COVID numbers if our state really gets into wearing masks. The major chains stores are already requiring masks. Right now there are few stores in Salina that you can enter without a mask. However, the effect takes a few weeks. Now is not the time to put kids, parents, relatives, teachers, staff and communities at risk by a bad decision by the KSDE. This is what is predicted by John Hopkins and HMDI. Kansas should be recording about 20 some new cases a day by then not in the hundreds as in recent days. Do the right thing and put off school opening until Sept 9.
7/21/2020 9:38:13	Jordan	Epler	Kansas Teacher	Columbus	I support Governor Kelly's efforts to safely open schools.
7/21/2020 9:38:19	Jesse	Mechler		Berryton	Do not hold in person class this year. You canceled school when we had 1/4th of the cases we have now, why bring them back while cases are still rising?
7/21/2020 9:38:23	Staci	Payne		Manhattan	I would appreciate your vote to push back the start of school to September 9th. Our teachers need time for training and preparing for whatever the school year may bring! Thank you for your consideration!
7/21/2020 9:38:26	Diane	Rich	Cheney Middle School	Cheney	I believe that we need to delay the start of school so that administration and teachers have plenty of time to think about how to open our schools safely. I am a para at our local school and I would like to go back to school, but I want to go back safely. I want the plans to be well thought through and we'll implemented. I feel that if we rush it will not be well thought out.
7/21/2020 9:38:36	Carey	Walker, Jr		Mission	I am an educator in Wyandotte County. We need to allow schools to delay their openings. This should be determined by each district and county health department. We, educators, need time to plan out what is best for our students. We know what is best for them and our communities. Each district and community has different needs and the delay will allow districts more time to thoroughly adopt a plan that is built for their specific needs. We need to not only think of the students but the district teachers and staff. Just because children have lower transmission rates and death rates (which we shouldn't even be gambling with any death of a student) we need to think about the teachers, staff, parents, siblings, and other individuals the students come in contact with and could pass along the virus. This is not an easy situation for parents struggling to work during this time, but teachers had been under the assumption that we would be back to somewhat normal by beginning of the school year, but we are not and now we need time to adapt and plan accordingly.
7/21/2020 9:38:39	Andrew	Book		Olathe	Please delay the start of school until the spread of COVID-19 is contained, or transition to all virtual school until there is a vaccine. Students cannot learn and adults cannot work confidently when they are worried about catching a virus that could kill someone they love.
7/21/2020 9:38:40	Blake	Krier	N/A	Wichita	I believe schools should be opened on time. Beginning the game of delaying school two weeks will not stop. Nothing will magically change after Labor Day. Schools have had five months to obtain PPE as needed.
7/21/2020 9:38:42	Vicky	Needham		Shawnee	Opening schools too early. I wouldn't send my kids.
7/21/2020 9:38:47	Trisha	Purdon	Montgomery County Ac	Coffeyville	The schools need more time to prepare for in-school sessions. With SPARK funding only being approved on September 15 for funding disbursement, the schools need time to make capital improvements for separation of students, bottle fillers, food distribution, schedules, and education plans. Please support the E.O. in order to allow our districts time to implement these plans.
7/21/2020 9:39:01	Carrie	Paulette		Overland Park KS	I want to thank Governor Kelly for her leadership with this executive order. As an educator, I am eager to be able to continue my work with students, but only when it is safe for our school community to do so. I greatly appreciate the extra weeks to create a safe and effective plan for our students. I also appreciate Governor Kelly's emphasis on the most important point: safely opening schools depends on containing the virus in our communities first. It is my hope that the delay in school opening will spur communities across Kansas to do their part to contain the virus so that schools can reopen.
7/21/2020 9:39:08	Heather	Snyder	Usd 458 and 204	Basehor	I am all for pushing back the start date of school. I am a special education teacher and mother. I have also been on chemo for the past 12 years. If I were to contract this virus it will most likely kill me. My body will not be able to fight this off. I love my job. I love my family. I love being alive. Please let us start the year off safely and with a plan on how to keep everyone safe. This year at school is going to be so hard, we need to make it as easy as we can for all of us. Thank you. ♡

7/21/2020 9:39:10	REGinald	Eggleston	Geary County Schools	Junction City	I support the executive order.
7/21/2020 9:39:36	Kate	Simpson		Newton	The government has no right to tell private schools or homeschools what they can and cannot do. Do not allow this order to pass. This is not an issue of whether or not you think the rules are good ones and will protect people from getting sick. It is an issue of the government sticking its fingers where they don't belong. We send our children to private schools or home school them because we care about them getting a well rounded education instead of just indoctrination by the state. We do this so the government cannot control what, when, or how our children learn. And time and time again this has proven to give kids a better education anyway. The very fact that the EO is trying to not only ban in-person classes, but also forbids online learning before the date the governor has set serves to prove that this is NOT a safety issue, but a control issue. The governor and the BOE have NO RIGHT to do this.
7/21/2020 9:39:46	Jennica	Hammerschmidt	Parent	Olathe	Opposed. Children need the structure of school for their mental health and social emotional well being. The chance of hospitalization for those under age 65 is very low. I encourage you to open.
7/21/2020 9:39:47	Maria	Mills		Salina	I believe decisions should be left to local schools. Some smaller districts may choose to begin early to maximize time with students before possible closures during normal cold/flu season.
7/21/2020 9:39:52	Shane	Wilson		Lawrence	It is absolutely IMPERATIVE to uphold E.O. 20-58 and delay the opening of schools in Kansas. This is a purely data-driven decision that takes into account the rapid increase in Caronavirus cases in the state. THERE ARE MORE THAN JUST CHILDREN WHO OPERATE IN THE SCHOOL ENVIRONMENT. While the fatality rates and rates of infection "may" be lower with children, adults are still very present in that setting and need to be at the forefront of protection as well. This will NOT end well if the approach that is taken is politically-driven. Do the math. Listen to the experts in the scientific fields that are relevant. Please uphold this E.O.
7/21/2020 9:40:03	Ruth	Falls	Not applicable	Olathe	I taught 40 years in high schools in the Olathe Public Schools. I currently have two of my adult children that are carrying on that tradition by teaching in a middle and high school in Olathe. I completely support the Governor's order in delaying opening schools until at least after labor day! I cannot speak for elementary situations, but I know, without a doubt, that large high schools such as those in Johnson County cannot provide sensible space and air flow to keep both teachers and students safe. As we have learned more recently about older students transmission and the realization that upwards of 30 percent of school staff have pre-existing conditions like age, diabetes, autoimmune issues, and cancer survivors to send them in to a building without proper ventilation and space would be uncaring and outright unconscionable. Teachers want to get back to normalcy, but they are scared. No one knows what it is like to spend 7 to 8 hours in a closed building with kids and their behaviors unless they have taught. I implore you to vote to keep our schools closed until at least labor day and realize that masks and spacing will have to be a part of reopening but hopefully thinking outside the box to ensure safety for all. some type of hybrid, creative schedule for high schools and middle schools needs to happen and time to plan for that takes time. Thank you.
7/21/2020 9:40:15	Laura	Milligan		Leavenworth	Don't risk the health and wellbeing of children, teachers, and support staff. KS has a shortage of school employees as it is. Please don't use them as political fodder.
7/21/2020 9:40:14	Chris	Vering	Parent	Lenexa	The need for in-person education is critical to the development of our youth. This can not be stressed enough. The mental health of our teenagers is at much greater risk than the risks to them of not having in-person classes. As a parent of a teenager, I cannot stress how important this is to their development and their continued education. The mental health issues with our youth will be far reaching and a long term impact for years and having remote classes would only make this worse. I may be reached at 913-269-9016 if you would like to further discuss.
7/21/2020 9:40:16	Paul	Gottesburen		Lawrence	I fully support delaying of the 2020-2021 school year to ensure schools are adequately prepared for students to return and/or to allow schools to be prepared for remote learning if schools cannot be made safe for our children amidst the pandemic. We cannot have our children returning to school and furthering the transmission of Covid-19, then bringing it back home to additional family members or risking the health of those who are there to educate our students. Infection (with unknown long-term consequences) and death (of students, teachers, and family members) is not an acceptable trade-off for sending kids back to school.
7/21/2020 9:40:22	Noel	Lucero	Usd259	Wichita	Support Kelly's EO! Stop making this a political issue.
7/21/2020 9:40:37	Ashley	Selfridge	Kansas Connections Ac	Burdett	While I totally understand delaying school to get supplies, I do not think that a 100 percent virtual school should have to wait. This applies to districts also. If they start school online there is no reason to wait.
7/21/2020 9:40:45	Christy	Thomas		Wichita	Start school in August as planned online only and work towards in person by October 1.

7/21/2020 9:40:51	Heather	Gepner	USD 108	Washington	I do not know what the right or wrong answer is. But I do believe that my little school district compared to Olathe, Kansas City or Wichita..or any of those in between will have different right and wrong answers. Washington County only has one confirmed Covid test. Do I think there is other unknowns cases in the county, yep, sure do. Do I think we will get more confirmed cases, yep, sure do. But, I still would like to start school on August 19. We have amazing administration and board members who have been working very hard to make sure our schools will be safe and ready to have our students come back. Our Covid committee (consisting of several staff members), has met several times to discuss our best options. We are ready! I understand that it will be much easier for our little elementary school of approximately 180 students will be much easier to screen than 1000 students. Thanks for the work you do!!
7/21/2020 9:40:55	Mark	Ellner	Parent	Manhattan	I support the delay of school starting for individual districts to more fully prepare to educate students while keeping them and staff as safe as possible in an effective and positive manner.
7/21/2020 9:41:00	Shelly	Stout		Bucklin	Our children need to go back to school for many reasons. They need to get back to structure, many kids need that. They need a safe place to go. They also need interactions with others.
7/21/2020 9:41:02	Karen	Brantingham		Topeka	Please approve Gov. Kelly's executive order to allow students & staff to be as safe as possible as well as provide schools precious time to prepare more effectively.
7/21/2020 9:41:02	Andrea	Cook	none	Olathe Kansas	Kids need to go back to school, our kids are ready to learn, they need to learn. Many kids have been playing sports and with friends all summer. School districts have had the entire summer to create a plan to start back to school in August. More time is not going to change the virus or the lack of a vaccine. It is not going to be perfect or look the way we want to it to, but don't we owe it to the kids to try? I do not want to see kids continue falling behind while private schools have worked through a plan and those kids will be learning while our great public schools in Kansas do nothing. Please vote to send our kids back to school.
7/21/2020 9:41:02	Becky	Racette	District school nurse US	Bennington	I as the district school nurse/only nurse for my 2 school buildings I am for delaying school till September. We need to be able to get our plan set and have staff and parents educated on what we are going to do. We also need to get supplies for the school buildings. Safety of my staff and students is my #1 priority at this moment in time. We can't have school if my staff doesn't feel safe with our plan. I can't keep them safe if I don't have supplies. Please vote to approve this order for delaying school till September.
7/21/2020 9:41:03	Lori	Shobe	Teacher	Salina	Please approve the delayed start of schools so we can better prepare. Thank you.
7/21/2020 9:41:04	Phillip	Payne		Manhattan	The least we can do is push the beginning of the school year back to September 9th. Our teachers meet time to prepare for whatever might unfold this school year!
7/21/2020 9:41:06	Mitchell	Burns	Teacher	Plains	Give the schools the extra time to get there safety measures in place. I can see schools shut down by Labor Day with outbreaks. I pray for you all during this difficult decision.
7/21/2020 9:41:11	Jill	Mady		Seneca	As the only nurse for our school district, I fully support the governor's delay in starting school. Our ability to safely have schools in our buildings depends on being prepared, and with the formal recommendations only having been released last week, that time is critical. In addition, should the governor choose to delay further or require online or hybrid learning based on the increasing COVID-19 cases, I would fully support that as well. School is a safety net for our children and that cannot be ignored. However, the health and safety of the students and staff absolutely must take precedents over a "perfect" learning environment, sports, activities, etc. There are ways to provide that support to at risk students, meals, etc. without endangering the those staff and students. The teachers have been given a profoundly difficult task this year and should be allowed the time to make the necessary changes to their curriculum, not rushed into it. The health staff must be allowed time to make the changes and modifications to keep students safe. I urge you to allow this delay to go forward and give our districts that time.
7/21/2020 9:41:15	Lesli	Cryer	Parent of 8th grader	Wichita	Please start school before Labor Day as planned allowing for more in-person days should the virus worsen in the colder months. It seems like our kids are at lower risks and they need education to be as minimally disrupted as possible.
7/21/2020 9:41:19	Anne	Dresie		Leawood	Please consider delaying school until after Labor Day.

7/21/2020 9:41:24	Brian	Grossnickle	Myself	Manhattan	I'm a high school teacher in Chapman, KS. Although Chapman is in a rural county, Dickinson, even they are experiencing a surge in new cases. This, combined with studies from South Korea suggesting kids ages 10-18 can spread the virus just as easily as adults, make me think it is a good idea to start school after Labor Day like the Governor is suggesting. Even then, we may have to start out with school online and switch to in building classes when possible. The safety of our students is priority number one. The safety of faculty and staff is number two. I will say a prayer for guidance in your decision tomorrow. Thanks for your hard work. Brian
7/21/2020 9:41:26	Kalie	Scanlon		Gardner	When making this decision I feel the special needs kids and how they are affected during the remote learning process has not been taken into consideration. As a mother of an 8 year old child who has overall global development disabilities, she has suffered severely during remote learning. I would like there to be discussions on what this would look like for these kids. I believe at the very least, these kids should be able to come in once a day for 45min-1hour to be able to get the IEP. They can be done one at a time and come in a few days a week. Remote learning is not an option for these kids. They will suffer the most by making everyone remote learning. Please consider setting up exceptions for this group in the event we go to remote only.
7/21/2020 9:41:26	Trevor	Campbell	Parent in Blue Valley Sc	Overland Park	I request that the School Districts and BOEs process refunds for each day that the child is not in school for in-person learning. The school bonds and property taxes allocated for schools were not agreed to on the ballot for remote learning/in home learning.
7/21/2020 9:41:28	Lauren	Goldman	Blue Valley High School	Overland Park	I believe delaying the school year offers a really important opportunity for the community to lower the spread of COVID prior to returning to schools. I am hopeful this most recent increase in cases is the wake-up call we need in Johnson County to pull back our larger events, gatherings and parties, to wear our masks and to get the spread of the virus down to more acceptable levels. I believe that a hybrid-approach to opening schools offers our teachers and our children the opportunity to succeed in school while also maintaining lower numbers of students at one time. But, this is only possible if we are willing to think outside of the box and delay the start of school.
7/21/2020 9:41:28	Justin	Gittle		Manhattan	Do what is best for our students AND teachers, administration, and staff!
7/21/2020 9:41:36	Cassandra	Sines	Parent - My student	Wichit	Do NOT open schools!!!! It's not safe at this time. Numbers are growing in Sedgwick County and other parts of the state. If you open schools there will be a lot of staff, teacher, and children's deaths on your hands!
7/21/2020 9:41:41	Shelly	Widau		Eskridge	I believe the school year should start on time. The staff and students would need to wear masks and continue good hand washing.
7/21/2020 9:41:47	Stephen	Maurer	USD 259	Derby	This measure is the very bare minimum the state can do to ensure the safety of students and staff. I'm a teacher. I'm terrified at the prospect of my immuno-compromised colleagues being at risk or any stakeholder (district employees, student, parent, family members) being exposed to death or long-term health complication. The scientific evidence objectively shows a rising infection rate that will explode if in-person instruction begins as originally scheduled. We cannot afford to open in-person as normal by mid-August only to shut weeks later.
7/21/2020 9:41:47	Caitlin	Bruner		Wichita	PLEASE choose to follow Governor Kelly's E.O.!! My child will be entering kindergarten this year. Kansas is NOT ready to re-open public schools in a traditional format and we will NOT be ready until we have COVID-19 under control. Please, please, PLEASE choose to keep our children and school staff healthy by following Governor Kelly's executive order. Please err on the side of caution. I am more than willing to make up days by adding additional schools days to the end of the year, starting school virtually from the traditional start date (8/15) to the new start date per Gov Kelly's EO.
7/21/2020 9:41:51	Shannon	Bussmann		Frankfort	We need to keep our educators safe. Not many cases here however people are not social distancing or wearing masks at all which is their choice. Our teachers need a voice to combat others lack of respect for our educators health and safety and that of their families. Our building is a K-12 building with our lunch centrally located in the middle. All kids overlap all day long. All focus has been on the kids getting back to school but how about we focus on keeping our staff just as safe. Without the safety of our educators we can't have school period. Everyday I hear people in my community say my kids have drove me nuts they have to be back in school and I know for a fact those same people have not distanced at all and never wear a mask, they have been traveling etc and their child's teacher has social distanced the entire time and by sending those kids into her classroom is a huge concern we have lots of young healthy active teachers with very young children and they chose to social distance wear a mask etc to protect them and their families and now we are telling them they have sit in a classroom with 12-20 students for 7-8 hours a day that have t taken any precautions....that's not right.

7/21/2020 9:41:57	Faith	Brown	Parent of child with spec	Overland Park	<p>School Board, My special needs child with relies on school services to receive the therapy she needs. We have been out of school for four months and the effects of this closure have been most profound on those who are not being heard. My daughter's friend with Down syndrome who has significantly regressed to the point of not being able to look anyone in the eye and crying all day when just months before he was active and socially engaged. The kids who relied on the school for breakfast and lunch and are going hungry because their parents don't have transportation to pick up free meals. Countless kids in Kansas are in homes where they are being abused and if they are not SEEN by teachers they will continue to be abused. I urge you to consider all students, not just the parents who have time, capacity and knowledge of how to lobby the board. Anyone not comfortable sending their kids to school should have the choice for online learning, but if there is not the option of in-person learning for those who need it most, child abuse will get worse and special needs kids will continue to deteriorate.</p> <p>Today it's moving the start of school and tomorrow it will be closing schools again. The school board needs to be allowed to make decisions for the students of Kansas. I urge you to not uphold ANY of Governor Kelly's overreaching orders. Our kids need normalcy and in-person school right away. My kindergartener needs to see her teacher's reassuring smile. Enough with the politics - Governor Kelly may mean we'll but she is out of touch with the working class that doesn't even know who to call or contact to have their voice heard. The school board needs to look at the whole picture and trust that the same system that has dealt with all the viruses and illnesses for decades will be able to handle this new virus that is already weakening. Please don't let these kids pay the price for the Governor's bad decision. These kids need in-person Normal school and they need it now.</p>
7/21/2020 9:42:06	Traci	Ditter	Fhsu	Hsys	Close them until we get a handle on this. Our county commissioners and director of county health tell everyone that masks won't help.
7/21/2020 9:42:09	Christy	Clevenger	My high school age stud	Overland Park	Our children are getting sick. There are high risk students in our schools, not to mention the teachers that are at high risk. What is to stop them from bringing the virus home. I want our schools to open like most people especially for my student who is a Senior. But at what cost. My child is high risk and willing to do whatever restrictions you give just to be able to go back to school for her final year. Give the restrictions. But make sure they are followed to the letter. I'm even if we do partial opening and reassess at the 1st quarter. Worry about the students, but don't forget about the others they are in contact with. Worry about the teachers that the state has failed time and time again.
7/21/2020 9:42:14	Kim	Becker		Conway Springs and Ar	I don't feel that all districts should be treated the same especially in rural areas. I am a secretary in one district and have a 5th grader in another. I prefer to send our child to school for many reasons. I also feel that covid has been through our area starting back in November. Temperature checks are a false sense of security as it can change quickly depending on person and environment. What about those who walk as their temperature will be higher. Who will be taking temperatures and telling parents their student can't attend? The school where I work doesn't have a nurse. I also feel that masks encourage face touching more especially with younger ones. Just look while in a store or other business and see how many times a person touches it then another object. Communication can also be lost. I wish you the best on all these decisions and options/obstacles you are facing.
7/21/2020 9:42:17	Michelle	Mullins		Quinter	Our kids need to be learning from teachers in the class room with peers. It allows them to learn other ways of thinking, other questions to ask, it teaches them patience, it allows them to build their strengths and weaknesses. Children need social skills and interaction. They need structure, and schools are essential to them having that.
7/21/2020 9:42:19	Theresa	Schwartz	self	Lawrence	Thank you Governor Kelly. I'm a grandmother and former state agency attorney (retired now). If children return to in person attendance before the virus stops spreading it's like sending children into a burning building while it's still burning. Even if most children would survive getting the virus some would suffer long term negative health problems and many would infect others whose immune systems aren't able to fight it off. Please put saving lives over every other consideration.

7/21/2020 9:42:22	Elizabeth	Young	Student/Parent	Lyndon, Kansas	I am in favor of delaying the opening of schools until after Labor Day. I look forward to my children (ages 11 & 13) going back to school in-person. However, I want them to do so with proper precautions in place. To my knowledge, my school district would need additional time in order to put these precautions in place and to develop a plan for opening safely. My community/county does not have high numbers of positive cases. However, I believe it would be foolish to think that just because we do not have high numbers, we should not take precautions. In my opinion, putting proper safety precautions in place like masks, social distancing and good hygiene, we will be able to help ensure that our numbers remain low and students can continue with in-person instruction.
7/21/2020 9:42:28	Kelly	Ruiz		Overland Park	Please uphold Governor Kelly's EO to delay the start of the school year. With rising positive testing rates in our area, it is the responsible vote. Schools are terribly unprepared to open in this current situation. To open schools would put lives at risk, and your vote to uphold Governor Kelly's EO is the one thing you can do right now to mitigate the risk to teachers, staff, students, and families. We are all depending on you to make good choices.
7/21/2020 9:42:28	Jennifer	Cairns		Lenexa	Thank you for considering every possible scenario when deciding how our students will attend school in the fall. I sincerely hope you will uphold Governor Kelly's delayed start plan and allow our families and our schools more time to prepare for what this school year might look like.
7/21/2020 9:42:33	Crystal	Yakel-Kuntz	KCKPS	Mission	It is unsafe to go back to school when we do not have containment of a deadly virus that is still taking shape. Supplies and resources are inadequate to safely and effectively educate students in-person. Please do not risk the health of our students and staff in asking us to return to in-person schooling. Thank you!
7/21/2020 9:42:35	Monika	Markus		Emporia	Hello. Please uphold the Governor's order to push back the opening of schools. As an instructor who is at risk, and realizes many of my students have conditions that will affect their health greatly this year, schools need the time to plan for each situation that may occur, gather PPE, and see where our covid numbers are and how they are trending. Many teachers have not been given 'plans' by their administration on how schools will be run yet. Giving districts extra time will allow teachers to prepare to utilize safety protocols in the most effective way possible.  Thank you, and please uphold the Governor's order to push back school openings.
7/21/2020 9:42:45	Candy	B	Our family	Andale, Ks	Please allow districts to make decisions that are best for them. Recommendations are amazing. But each town and district is different. Students have different needs, families and teachers have different needs. Also, please allow districts to make decisions on masks. I'm not against masks, but young children will not wear them in a way that is effective. I have worked in an elementary school. I can guarantee a kindergartners mask will be in the floor at least 5 times a day. How is that sanitary for anyone? I can't even imagine what will happen in a bathroom. Please allow districts to decide what is best for their students.
7/21/2020 9:42:50	Valerie	Slinkard	Pratt USD 382 and Barb	Medicine Lodge	Please support the governor of KS and her orders including the school start delay to Sept. I work in Pratt as a teacher who would appreciate your support in valuing our safety. I live and have grandchildren in Medicine Lodge that attend North Barber schools. I ask that you support the governor's order.
7/21/2020 9:42:56	Donna	McDougall		Shawnee	I believe there should be stricter guidelines, we still do not know how this will effect us in the future. Without young people and students, we have no future.
7/21/2020 9:43:00	Clayton	Applegate		Goddard	I'm in favor of giving the schools as much time as they need to get prepared and to be able to successfully adhere to the mandates the governor has given and to keep our students, teachers and school staff as safe as possible. At the end of the day, if we error on the side of caution and delay the start of school unnecessarily, all we lose are a few weeks of time. If we error on the side of full steam ahead and open the schools in two weeks and kids and teachers and staff start getting sick and dying . . . that's bad. I'd rather take the slow safe bet and be wrong. Give the schools until after Labor Day to be ready. . . thanks for your time.

7/21/2020 9:43:00	Heather	Farha		Olathe	<p>I am hoping our KSBE votes to uphold Governor Kelly's executive order to delay the start of our Kansas school year.</p> <p>I believe we need time to further review the data that is starting to be collected worldwide (i.e., South Korea, Israel, daycare centers in Texas and California) and see that until we can effectively assess and collect more data, we could be putting many, many Kansas families at risk. I believe Governor Kelly is following the science and facts we have so far, and that her decision to delay was not made lightly. I think she is trying to do the right thing by Kansans, and I hope the Board will vote in support of her order.</p> <p>I am a widowed parent of two students in Olathe, one with special needs who is at higher risk. I also teach in the Olathe School District. I want nothing more than to be back at school and to have my daughters back at school - but I think we need to see our Covid19 numbers in steady decline before it is safe to do so. I am hopeful we will all do our part to wear masks and get the virus under control, but until we do, our students, teachers, and all our families should be given more time to ensure our safety.</p>
7/21/2020 9:43:05	paula	kear	Colwich Grade School	colwich	<p>I am a teacher at Colwich Elementary School. I am 56 yrs old, and I am in favor of opening our schools as usual. Each district should have the choice to do what is best for them. There is no one size fits all for this. If a teacher does not feel safe, that is his/her feeling, and they need to make a decision for themselves and their families. But, we have never made the whole system change or close due to the health of some. If someone is high risk, then they need to evaluate for their safety. Our kids need to get back into our buildings and have a little normalcy to their lives. We are their constant in this crazy world.</p>
7/21/2020 9:43:13	Brook	Brubeck	USD 113	Sabetha	<p>I am the director of food services for Prairie Hills USD 113, and I can tell you that we need every single second of the extra time you are considering to prepare for the year ahead. We are still procuring supplies and equipment, still figuring out how to handle all of the possible scenarios, and still awaiting our own local board's recommendations for reopening. We need this time, not just to allow our local case number to decrease, but also to be as ready as we can be. I'm trying so hard to protect my team of extremely dedicated but also high risk ladies. Please vote yes.</p>
7/21/2020 9:43:13	Merle	Schlabauh	Recently retired college	Newton, Kansas	<p>Please delay the start of classes in Kansas public schools until after September 1 and support governor Kelly in her attempts to make schools safe for both students and educators. Masks should be required, as well as frequent health checks, i.e. daily temperature monitoring, social distancing, etc. This is a matter of life and death, not a political game!</p>
7/21/2020 9:43:15	Katie	Blaufuss		Topeka	<p>Please let the kids go back to school in as much of a normal fashion as possible. Do not mandate masks and social distance. If someone chooses to wear a mask let them. These kids need social interaction and a place to learn that makes them feel comfortable. Their immune systems need a chance to build up before cold/flu season as well. Let's get back to norma please!</p>
7/21/2020 9:43:17	Ashley	Wiltse	Andover USD 385	Andover	<p>Please consider to delay the start of school this year! Our numbers are rising by the day, our city is having to move COVID patients to other regional areas to support them. Please let our state get a moment to get our ducks in a row so we can be better prepared for our students so when the COVID numbers are lowered, we are prepared to teach them the best ways we can in the safest, most meaningful way we can. As a teacher and parent, I am terrified of unknowingly passing this along to my own students, let alone my own family members. I have two family members who are immunocompromised, so we have been very careful since March to make sure they are staying healthy and well. Thank-you for your time and consideration.</p>
7/21/2020 9:43:26	Lynnette	Hibbs	Usd465	Winfield	<p>I want to wait to start school on September 9th so we have a better idea about facts and science regarding COVID 19 cases in the state.</p>

7/21/2020 9:43:29	Anita	White	School Teacher	Frontenac KS	Given that cases of COVID-19 continue to rise in our region and state, I encourage you to delay the start of classes as outlined by the governor. Since the amount of classtime remains the same, students will not be losing out on anything other than to give staff time to address potential issues and practice procedures prior to students being in the building. The focus is often on children, as it should be. However, the people who rely on those studies to say that children under 11 rarely develop the disease, they ignore studies that indicate students above 11 are just as likely to be carriers and develop disease as other adults. While I understand circumstances are different in many districts, a statewide policy would do much more to help reduce the number of cases across the state. Failing to maintain statewide policies has contributed greatly to the dramatic increase in cases resulting in deaths and long term medical problems for those infected. I urge you to support the delay the start of school to help keep our students and their families safe.
7/21/2020 9:43:39	Angela	Wiehl		Great Bend	I think it should be left to local areas to decide since not all areas are being affected the same. Our children have been out of school for almost 6 months and they need to be getting a real education. Teachers have worked very hard to help our kids remotely, but we all know that it is not the same and the quality of education is not as good. Students are falling behind and it will be very hard for them to catch up, if they miss any more.
7/21/2020 9:43:44	Anna	Haynes	Olathe Public Schools	Olathe	I do not want to start school until after Labor Day
7/21/2020 9:43:48	Merinda	Iodice	Cedar creek elementary	Olathe	Kids need to go back to school ASAP!
7/21/2020 9:43:55	Adriana	Brittain		Medicine Lodge	Dont think kids or teachers should be forced to wear a mask to school.
7/21/2020 9:43:56	Susan	Evers	A member of the public.	Overland Park	<p>Please support Gov Kelly's Executive Order to delay the beginning of the school year until after Labor Day with flexibility to re-consider based on the status of covid-19 cases, hospitalizations and deaths in our state at that time.</p> <p>It is unwise, in my opinion, to start school when the virus rages in our back yards. Some Kansas areas will be safer than others.</p> <p>Please thoughtfully consider Public Health recommendations, not political interference.</p> <p>Your responsibility is heavy. I send encouragement to keep our Kansas students, teachers and their support staff, school administrators, custodians, librarians, cafeteria workers and front office staff as safe as possible in this time of the SARS-CoV-2 Pandemic.</p>
7/21/2020 9:43:58	Andrea	Wiebe	Derby USD 260	Wichita	As a voting citizen and tax payer, I support EO 20-58 delaying schools until after Labor Day. As a teacher, we need this critical time to make extra plans for a menu of educational options for our families. This is a school year like no other, and it is necessary at this time to make exceptions to the calendar to help school districts and teachers plan for a more safe re-entry to in-person learning. We want to teach students, and we want to do so safely, but we need time to make plans that follow the guidance that has just come from the state in the past week. Our students are this state's future, and in the long run, three weeks' late start will not make a difference. We will still meet the required hours for student instructional time, just on a shifted calendar. Waiting several weeks will give more time to adjust to masks (which we hope will help flatten the curve on the COVID-19 virus), and will give districts more time to acquire materials and make plans to keep our in-person return as safe as possible. Thank you for your service to the students and teachers of Kansas.
7/21/2020 9:44:07	Michelle	McElwee	Pray Woodman	Maize	<p>Hello,</p> <p>My son is supposed to start kindergarten. My husband is currently away for the military and I work full time. How will I have enough time to commit to schooling him from home? Kindergarten is the fundamentals of every topic: English, reading, writing, math, language, etc. Furthermore, he has sensory issues that impacts him wearing a mask. If his teacher wears a mask can it have the clear screen for them to see his/her mouth. My son is already in speech and OT privately. These masks work better as he can see the mouth and tongue position when working on phonetics. Delaying the start of school impacts a wide range of generations to come after us. They will be taking care of us and we are going to reap the delays in the years to come. Daycare's have been taking care of these kids for months with no huge increase. A school environment is no different and the plans drafted were good measures to put in place. Please don't delay school!</p>

7/21/2020 9:44:09	Shelly	Ellis	USD383 Bergman Elem	Riley	I vote in favor of delaying the school start date until after Labor Day.
7/21/2020 9:44:16	Kristi	DeWerff	USD 428 Kindergarten	Great Bend	Please think about the health and safety of our students, students' families, teachers, and teachers' families when making this decision. I will be starting my fourth year teaching and second year in kindergarten this year. The amount of times I was sick this past year was unbelievable. Kiddos can be the germiest little beings around! Think about this spring when we shut down, we are in much deeper situation now than we were and we want kids to return to the building? We have options - do not make this decision harder than it has to be. We are putting thousands of lives at risk by returning to the building. As much as I want to return to the normal setting, I know it's not a good decision. Online learning can be done. If this has to be our new normal, we can do it. People can adapt. TEACHERS can adapt.
7/21/2020 9:44:19	Greg	Strecker	Hutchinson-Trinity Cath	Hutchinson	I agree with delaying the start of school until after Labor Day. More time is needed to plan curriculum/teaching methods and to put into place ways to keep our teachers, staff and students safe.
7/21/2020 9:44:21	Julie	King	Mother of 3 students	Colby	I strongly feel that the health and safety of our children are best protected by delaying the start of school, and feel that 100% remote learning for the school year is the best way to move forward from after Labor Day until there can be complete confidence that any student or staff member will not be at risk from Covid-19. At this point, there is very little to no confidence that there will not only be positive cases, but it is likely that outbreaks will occur if students are in person despite sanitation and mask preventive measures. Please do not send out children back to school despite pressure from those who feel it is an inconvenience.
7/21/2020 9:44:26	Traci	Graham	Myself	Manhattan	I am strongly against the delaying of the 20-21 school year which has been proposed in the Governor's executive order. Our kids NEED to be back in school. School districts are putting together plans so that parents can choose whether to send their children to in person school or remain home for learning. So families have an option to keep their kids home and educate them if they feel that is best for their family. But delaying the start of school doesn't allow anyone to get back into education. I personally feel the job profession of a teacher should be considered essential. Essential workers have been working all through this pandemic. They've followed safety protocols and remained safe. Why do we not have that same expectation of our educators??? Our children need school - not just for the education, they need it for the social learning, they need the structure back in their lives. I am a single parent with no family in the area, without the funds to hire outside help and working full time so I also don't have the time to homeschool my kids or continue to try and watch over them during the day while I try to work. The 3 of us battled some emotional issues when they were forced to homeschool last Spring. We can't go through that again. I was raised by 2 teachers who taught for 30+ years in Kansas and my brother is currently a teacher. He has health issues and would be considered high risk but he still WANTS to be in the classroom with his students. We need more teachers like him! PLEASE do not approve the order to delay school. Our kids and parents in Kansas need schools to begin on time! Thank you for your time.
7/21/2020 9:44:28	David	Silverman	Concerned Parent	Salina	I support the governor's position.  However, other schools have tried to operate under the current circumstances, and found that during this impossible time, it is not possible to do operate in-person classes.  I would urge the BOE to keep school buildings closed until the virus is gone. The science suggests that this is so pervasive and contagious that even the CDC has said that schools represent the "highest" risk.
7/21/2020 9:44:30	Ashley	Woodworth		Clay Center	I have two elementary age children and a baby due in October. I am very nervous about my kids attending school in person due to the spike in cases statewide. I feel delaying until after labor day gives more time for districts and the state agencies to make a comprehensive plan for reopening. My kids need school, just like everyone else, but for the time being I feel they should get it from home via remote learning when the time comes to protect themselves, their teachers and substitutes, as well as our new baby coming soon and the elderly family (grandparents) they spend a lot of time with while their dad and I are at work in between school and when we get off. Thank you for all that you do for our kids across the state.

7/21/2020 9:44:32	Jerri	Kemvle	Retired Assistant Superi	Lawrence	I believe Gov. Kelly is putting the health of Kansas citizens first in delaying the start of schools. The health of our people is our most precious resource. What is the hurry? We have the tools to educate students online until it is safe to return to the school building. School districts can not do this alone. Communities must work together, pivot, and develop a new playbook to meet the needs of the people in 2020. We must all be a part of this solution!
7/21/2020 9:44:36	Heather	Fredericksen	Blue Valley USD 229-S	Overland Park, KS John	Please approve Gov. Kelly's order. As an Elementary Special Education Teacher and parent of a middle school student and high school student I support her decision to delay opening and mandate the guidelines set forth by the CDC and recommendations from the KSDE plan. We need PPE for our teachers and students and by delaying school will allow for districts to appropriately plan and gain resources. I also believe that we need to look at the data and keep reviewing. Take emotion out and let our data drive the decision! We may have to re-evaluate in a few weeks to determine action. Be flexible and think outside the box! Health and Safety first.
7/21/2020 9:44:38	kimberly	williams	Parent	Goddard	I am for delaying the school year.
					<p>I'm in favor of delaying school regardless of the fact that it causes an immediate concern for what to do with our children in the interim.</p> <p>Our schools each individually had plans for reopening - thoughtful plans - plans that were ready by July 1. The guidance given to them by the Kansas Board of Education is welcomed by myself and our family and we appreciate the strategic, widespread efforts to ensure the safety and wellbeing of our children, however after receiving a guide that is more than 1000 pages long with great suggestions that many schools have not yet thought through schools need the necessary time to adjust their plans, to make arrangements &amp; further change their staff (made more complicated by the fact that many new contracts just began this month). They need the time to purchase additional supplies, to distribute them and to work through how to ensure ALL students who have connectivity issues can assess their educational tools the same as others. I want my children IN THE BUILDING just as much as the next person, but giving them the additional 2 weeks before they start can have much more benefit long-term. It allows for the opportunity to get more students INTO the schools in a way that is safe and follows guidelines recommended by health professionals. It also allows additional time to prepare schools' classrooms, workflows and to further test technology.</p> <p>Please vote to approve Governor Kelly's Executive Order. This is not a political issue. My family just came out of quarantine after my 3 year old was exposed to COVID-19 at daycare by another child who tested positive. My 3 year old with asthma - who attends a daycare that has followed every guideline to a tee. If we rush implementation of this plan as we've been forced to do we run much greater risk than if we start school as planned because it's more convient for parents.</p>
7/21/2020 9:44:40	Briena	Parks	Myself	Shawnee County (just o	Please wait to open schools so they are more prepared.
7/21/2020 9:44:44	Melinda	Vizcarra	Parent Blue Valley Scho	Overland Park	I am in favor of delaying school start date. However I think it is critical my children receive in person instructional learning.
7/21/2020 9:44:45	Dani	S	None	Manhattan	<p>In regards to delaying opening my concerns are:</p> <p>A) You are now opening much closer to cold and flu season. Do you know what mimics COVID-19 symptoms? Colds, Influenza, and RSV.</p> <p>If we are able to begin school on August 12 as scheduled, we would likely be able to get in a whole quartet of classes before everyone begins displaying COVID symptoms shared with seasonal illnesses.</p> <p>B) Once planning days, snow days, and a break for Memorial Day are added into the schedule, children would be going to school until the last weeks of June. Would they then be expected to turnaround and go right back top "normal" opening in 2021 in early August?</p>
7/21/2020 9:44:45	Jamie	Rogers	Usd #329	Wamego	I would like for statewide numbers to be given a chance to go down more before school is started back.
7/21/2020 9:44:56	Emily	Straw	Home	Overland Park	We look forward to school opening after Labor Day
7/21/2020 9:45:03	Kristi	Parsons	Parent	Augusta	Stop delaying school! It should start in person & on time. Don't ruin another senior's year!!

7/21/2020 9:45:11	Jonathan	House		Manhattan	I think it's in the communities best interest to delay the school year. Or at the very least continue online learning. It just seems too risky to allow students and teachers to go back to schools. The virus will just continue to spread. Smaller groups would be a different story. But most classes have 20+ people in a classroom at one time.
7/21/2020 9:45:11	Elizabeth	Mauer	Shawnee Mission School	Olathe	School should begin online and not in person due to virus trend increasing, not decreasing. Starting school after Labor Day gives teachers and staff time to put together the best plan for student success. Sending students and staff to school in person only increases the spread among children and the adults who care for them.
7/21/2020 9:45:21	Jessica	Wobus		Topeka	I'm a SPED teacher and I am super nervous about going back to school regularly. I worry i am going to be exposed multiple times. I worry how schools will manage subs when we already have a hard time getting them and have to combine classes, especially in urban districts. Combining classes is an impossible request with social distancing. I have already accepted I will probably get it from school and just am praying that it's not as bad and that I don't spread it to my dad who's older and diabetic.
7/21/2020 9:45:24	Krista	Hoy	usd 497	Lawrence	Please uphold the executive order. It is NOT safe for anyone to return to school in August. I cannot possibly keep 25 kindergarteners socially distanced and healthy yet. Teachers need time to prepare for this! And we need to see a difference in the covid cases. Children are now testing positive. IT IS NOT SAFE, Be human. Be kind. Have compassion.
7/21/2020 9:45:24	Kevin	Makalous	Parent of 3 daughters in	Shawnee	Please encourage school districts to think outside the box. We have to innovate in this moment. It's not an either/or about schools. It can be a both/and. Remote learning and some in person. Hybrid is best for our family. I support the delay. But I also think we need to get school going in September! It's time.
7/21/2020 9:45:39	Heather	Dyer	Self	Wamego	Will we be given the option to educate our children remotely? Especially for those of us who have high risk people living in the home? And for high risk children?
7/21/2020 9:45:41	Beverlee	Brokesoulder	I teach PE in KCK	Shawnee, KS	I feel that if delaying the start of school will help us get make to a more normal school year we should do it. Everyone needs to be physically and mentally safe to teach and learn. A delayed start is a small price to pay for our health.
7/21/2020 9:45:41	Haiyan	Li		Overland Park	Need plan online learning ahead
7/21/2020 9:45:59	Lindy	Blackman	Blue Valley School Dist	Prairie Village	I support delaying the reopening of school.

7/21/2020 9:46:03	Melissa	Schlegel	My family	LA CROSSE	<p>Dear BOE members,</p> <p>I'm writing today as a concerned mother but more so as a concerned teacher. I'm a divorced mother of a 7 and 8 year old who attend La Crosse Elementary School. I have anxiety. I labored with both my boys with no epidural because the thought of a huge needle in my back and my babies being born with that medication already in them set off my anxiety. I worry about everything! They were rear-facing in their carseats until past 3, 5 point harnesses until 6. They wear bike helmets, ATV helmets, don't have sleep overs, don't go to the playground literally across the street by themselves. I research everything! I have 2 bachelors degrees, a Masters of Science from KSU and am nearly halfway through a send graduate degree from FHSU and my research skills have been honed! My family gets annoyed with the things I say "no" to and say I need to lighten up because I don't let them do things like ride on the tailgate half a mile down a dirt road to check the cows "like we used to". All that to say I worry about my kids, a LOT! I wear a "Mama Bear" shirt proudly. So do I worry about my kids or me getting COVID? Yes, I absolutely do. And I will straight up tell you, while I want them back in school MY children will be fine with a delay to re-opening or if we end up virtual again this year. To be quite honest, had my life/marriage turned out differently my children would likely have been homeschooled at least for elementary school so if you are thinking as a teacher I'm a huge "every kid needs to be in a school building every day for 9 months a year with professionals teaching them" that's not who I am. I'm not writing you for my kids, they will be fine either way because I will make sure they are. Like I said, I'm a divorced single mother and when my life took a path I didn't expect I had to change future plans and fell back to a career choice that was a close 2nd place when I was a new adult looking to the future...education. I previously was a county extension agent and then a stay at home mom but I went back and got my teaching degree and have been in the classroom for just a year and a half now, finding my place and true calling teaching Special Education at the middle school level. I'm writing today for those kids who in that short time have opened my eyes, stole my heart and made me an even bigger "Teacher Bear" than I am a "Mama Bear". I am writing for the ones who school is there safe place from the drugs, alcohol, yelling, abuse and hunger of home. I'm writing for the ones who know there are snacks in my closet and 2 hot meals a day at school. I'm writing for the ones who can't stay awake in class because their parents have "friends over" nearly every night. I'm writing for the ones who are adopted from disgustingly abusive places and are just now starting to make academic gains because they have gone through years of learning to trust and their walls are finally coming down. I'm writing for the student who will have a panic attack with a mask on</p>
7/21/2020 9:46:06	Theresa	Sill	Olathe school district	Olathe	<p>I would really like to see schools stay shut down through fall. Or at the very least all 6-12th grade go online and utilize all other buildings to get the elementary school kids back in the classes safely. I feel the older kids are old enough to be home and do online learning. The younger kids need all the instruction at this time and mental learning as soon as possibility. Along with helping parent with the day care issue.</p>

7/21/2020 9:46:08	Ryan	Vessar	USD 377	Cummings	<p>Recovery rate is 94% (worldometer covid data July 21st 2020)</p> <p>Most have been exposed to Covid already look at Attendance records for Nov-Feb 2019. Classes were 1/2 full or less in our school.</p> <p>School must Start on time!</p> <p>Delaying start date only prolongs the issue!</p> <p>Each school has a nurse. Use them or add more!</p> <p>Temp check and pay attention to the students! Mask are not effective and claim not to be effective as written on the box!</p> <p>Those that have Issues with attending school can be offered an alternative. Survey for USD 377 indicates 3 out of 4 parents want to go back to school! 1in4 have issues with it. Majority rules!</p> <p>Look at the numbers on Worldometer.com on July 21st 1% were in critical or serious condition of currently infected individuals. 6% died of those that had an outcome. 94% recovered!</p> <p>Open Our Schools on time! Mask are ineffective and will cause distractions while learning!</p>
7/21/2020 9:46:12	Bretley	Laramore	myself	Derby	<p>Please consider delaying the start of school in an effort for the institutions of learning to acquire PPE for their students and staff. This delay could also potentially give people time to figure out how to properly wear masks and mitigate the spread of this virus, giving more schools a chance to actually open in-person learning.</p>
7/21/2020 9:46:13	Jason	Scott		Olathe	<p>As a parent of a to-be 9th grader at Olathe East, PLEASE DELAY THE OPENING. I desperately want my daughter to be able to make new friendships and get "plugged in" at an entirely new school that none of her middle school friends are attending. But I also want her to be as safe as possible. Until the science is MUCH clearer that it is safe to physically return, we must take the route of caution here. The WORST thing that can happen with this decision would be hindsight that might say, "Maybe we COULD have gone back on schedule." That's it. Futures and career opportunities will not be wrecked by this decision. On the other hand, forcing a physical return too early? I cannot fathom the weight of the "worst case" scenario of that decision.</p>
7/21/2020 9:46:16	Rita	Fu		Overland Park	<p>I think schools should be open on time, and it could start with all virtual classes until the COVID cases are under control. Also, the virtual classes should be live teaching rather than one meeting per week, which was not a good experience for all of us at the end of last school year. Thank you very much for the survey!</p>
7/21/2020 9:46:17	Marissa	Clinton		Scott City	<p>If our schools do not open up completely normal, no masks, no social distancing, normal lunch together in the cafeteria, recess and enjoying school we will be homeschooling our kindergarten and 5th grader. It's a shame we have spent so much on our schools as a community and wont be using them.</p>
7/21/2020 9:46:27	Laura	Breckenridge	Family and USD 512	Leawood	<p>I am in favor of delaying the start of school. Schools need time to organize after recommendations are released from the state. We also need time to lower the number of new COVID-19 cases daily.</p>

7/21/2020 9:46:33	C	Coleman		Junction City	Good Morning! I just wanted to take time to submit a brief comment regarding the delay of school this upcoming year. While I understand the severity of this virus and that there are a lot of unknowns of it's origin I am NOT in favor of the pushback. Children need to return to the classroom, extra curricular activities etc. For some children this is the only safe place they have and the only form of consistency in their lives. I do not believe that by pushing the school year back one month it will make much difference. At some point we have to get back to what we know and parents need to return to work. I believe that with the navigating change document that you all took the time to create and if all schools comply with those recommendations our students and staff will be safe to return in August. Worse case scenario we start everyone online for the month of August and then return those who chose Brick and mortar in sept once all safety measures are in place since all students have laptops from the spring. In order to alleviate confusion, those who wished to do elearning should be placed with teachers who are electing that option and those who requested in class be placed with those teachers so that transition to school is less hectic. I'm truly concerned about the students who are at home not being fed, or even worse being abused during this time. We need to get our students and teachers back to school! Thank you!!
7/21/2020 9:46:38	Natasha	Konrade		Bucklin	Please reject Gov Kelly's executive order to delay school opening. Our children have been out for too long and it is wearing on them. They NEED school and social interaction.
7/21/2020 9:46:39	Kristen	Katt	USD 320	Alma	I urge you to consider delaying the start of the 2020-2021. As a school nurse I am concerned with the health of our students. We all want our students back in our buildings. We know this is where they belong. We want them here safely and in order to do that we must have the time to plan for this and time to train our staff. Please consider delaying the start of school so the proper supplies, procedures and training's can be obtained first.
7/21/2020 9:46:50	Sarah	Rodecap		TOPEKA	Please vote to uphold Governor Kelly's Executive Order. Public health and safety should be more important than the political agenda of those in charge. Those in charge should be making decisions based on science. I know many families are struggling right now, but sending students back to school before schools districts are ready is not the answer. Someone has made everyone believe that the only choice a working family has is to lose their job or send their kids back to school. If we took the time to think about others, we could be doing things to support these families. Other countries suspended or reduced tax, mortgage, and rental obligations to avoid defaults. Or supported low income families for as long as needed with resources for food, mental health and unemployment. We could invest in people instead of bailing out big corporations. This should not be a difficult decision to make. PROTECT OUR STUDENTS, EDUCATORS, AND THEIR FAMILIES by approving the executive order.
7/21/2020 9:47:09	Amy	Schmierbach	Usd 489	Hays	Please delay the schools start. FHSU starts school mid August. There will be an a surge of COVID when this happens. Delaying the start of k-12 will allow us to see what happens when schools open. Staggering could help.
7/21/2020 9:47:13	Nancy	Craven		Wichita	Please uphold Gov. Kelly's executive order keeping schools closed until at least Sept. 9. As a paraeducator at an elementary school, I know that children need to be in school, but I also see how very difficult it would be to keep students, teachers, and staff safe during this pandemic. I am, frankly, terrified at the prospect of putting myself and my own family in jeopardy by returning to my school job while Kansas is considered a COVID-19 hotspot. Gov. Kelly is doing her best to protect the health and safety of all Kansans. Please allow her to do her job!
7/21/2020 9:47:16	Sandra	Birzer		Wichita	School districts need to decide what is best for their students and schools. A state wide mandate is not logical. Numerous studies show that children under 10 do not pass the virus so those children do not need to be in a mask all day! Science should drive this decision. Not fear or politics.
7/21/2020 9:47:30	Aaron	Lang	My family and Gardner	Gardner	Please do not open schools until they are safe for all (teachers, staff, students and their families) to attend
7/21/2020 9:47:30	Sally	Sparks	Teacher in Johnson Cou	Belton	I am FOR delaying the start of school for the 2020-21 school year, due to the need to prepare teachers, staff, students and families for all the procedures and to ensure the safety of our communities. Additionally, the districts will need to prepare the buildings for re-opening, to include proper purchasing of specialized equipment and supplies. This is not possible to do in a few days time! Please adopt and vote FOR the executive order to delay the start of school until after Labor Day.
7/21/2020 9:47:23	Sharli	Richards	Elementary schools	Derby	I think that teachers will need training for the upcoming school year on the new guidelines for Covid and remote learning. School should be open to give teachers the chance to prepare.

7/21/2020 9:47:28	Nicole	Manriquez	Self	Lawrence	I absolutely agree that schools should remain delayed in their opening and I believe they should be online only. We should have never reopened in the first place and by doing so have made a grave situation far worse and we can not recover easily now. My child will not be attending public school if we are forced back to classrooms. I stand with Governor Kelly.
7/21/2020 9:47:35	Emily	Patrick	Kansas City Kansas Pub	Lenexa	I am deeply concerned for my students, other staff, myself, and the entire community. With numbers in Kansas going up with the relatively small amount of opening and exposure people have had this summer I feel that returning to in person learning would be opening the flood gates. I am also concerned that planning is not be done proactively we will end up in chaos like last spring. The responsible (and hard choice) should be to plan to virtual at least the first quarter. This is likely what we would have to do anyway but let's not do this choice in a crisis mode at the last minute. Let's plan for it now and have more time to make solid plans (both for teachers and families.) I am concerned not only about coronavirus. I am also concerned for my families with out supervision options, internet, adequate meals, and childcare. My family is able to juggle my children but not everyone has this privilege. The government needs to set up childcare or supervision centers for students who are doing virtual learning. I appreciate that this is all deeply hard. Making these decisions and then executing them is no small task but I know you all can rise to the challenge of keeping Kansans safe.
7/21/2020 9:47:35	Amy	Frost	Teachers in Kansas	Salina	As a teacher, I do not feel safe in a small classroom full of 25-30 students where distancing is impossible. I am hoping that by sept our numbers will be on the decline and it will be much safer to attend face to face school. I think we need to start strong instead of starting and then most likely stopping again.
7/21/2020 9:47:37	Becky	Barger	Myself	Bonner Springs	I am not in favor of delaying the start of school until after Labor Day. I have a 16-year-old son who will be a Junior in high school this year. He hasn't had an in-person classroom experience since March 13th. His direct quote was, "I just want to go to school." Our district (USD 204 Bonner Springs-Edwardsville) had already been doing a great job of keeping parents in our district informed on their efforts prior to the Governor's announcement last week. Before that, they had already announced plans to offer parents three different choices on how they could proceed with their child's education – in school, remote learning, or virtual school. I feel like all these options give parents plenty of flexibility and address the safety and security of all students. I fail to see how delaying the start of school until after Labor Day does anything to improve upon the plans they already had in place, but only increases the gap in which students have an opportunity to learn. Thank you for your consideration.
7/21/2020 9:47:39	Elisha	Hampton		Salina	I am an educator. I believe that our districts need the time to get things planned and supplies in. Cases in our county have sky rocketed because no one is taking it seriously. Keep schools shut until September. Give teachers and admin time to do training and get protocols in place.
7/21/2020 9:47:40	Cassandra	Wray		Wichita	Delay school!
7/21/2020 9:47:43	Frieda	Tresvan		Kansas City	I support delaying schools reopening.  Wyandotte county has the worst health outcomes in the State and is now tied for the worst COVID outbreak in the State. Our community cannot risk exposing our children to this disease that they will bring home to parents who have health concerns that would cause COVID complications.  Please follow the science and do as other States have done and keep schools online until it is safe to return. If not, I will have no other choice then to withdraw my children and home school.
7/21/2020 9:47:49	Christy	Thomas		Wichita	Start school in August as planned online only and work towards in person by October 1.
7/21/2020 9:47:55	Robin	Butler	USD 320	Wamego	Please support the delay. Teachers and staff need time to plan for hybrid and virtual learning.
7/21/2020 9:47:57	Susan	Hill		Olathe	I feel the decision to wait until after Labor Day to open schools was a wise decision. With that being said, I think it is imperative to have in school attendance be available. I have a granddaughter who will be going to kindergarten this fall and for proper development she needs to be in school!
7/21/2020 9:48:02	Paige	Coffman	USD 259 Wichita Public	Wichita, KS	I believe it is in the best interest for the safety of staff, students, and their families to delay the start of physical in person school, or to start the year online. It is just not safe enough yet to go back to "normal" school.

7/21/2020 9:48:08	Maria	Macoubrie		Shawne	I support the governor's decision to delay school until after Labor Day in order to give school boards additional time to receive the necessary supplies and to determine a plan to comply with her order, as well as to adequately train staff on compliance. I do believe that the delay of the start of school may move the official start of extracurriculars and athletics, although I don't believe that is the necessary result. Most of these activities are already occurring in compliance with the governor's order. It is common for extracurricular to continue during school breaks—holiday breaks, Spring break, etc. so they could begin on this "front end" break. I also do not believe it should have any impact on any summer activities that are already occurring in compliance with her existing orders (e.g., summer conditioning with social distancing and/or masks). Not only are kids better off exercising to stay healthy, but if they will come back to play in September, we need them in shape so they are ready to do so without injury.
7/21/2020 9:48:10	Elizabeth	Messerly		Olathe	My children need some consistency and schedule. They have been out of school since March 13th. If we wait until after Labor Day, they will have essentially been out for 6 months. With the format of the online program through Olathe in the spring, my kids did not participate much in the online learning. Both had all A's and since the high school sent an email indicating if students were happy with grades, they could keep the grades they had for the semester. I understand trying to protect the students from a physical health standpoint, but their mental health needs to be considered as well. Having a schedule, whether it is online or in person, is vital for their health as well.
7/21/2020 9:48:16	Michelle	Carey		Sterling, KS	Decisions should be left to individual districts, all schools and counties are not the same. Schools are struggling with the funding they have, how are they going to pay for all this extra stuff. Wouldn't starting late mean kids would be in school when it is projected to peak at the end of the year, similar to flu season?  Logistically, expecting smaller kids to wear masks is impossible. Teachers will spend more time dealing with masks than teaching. K through 1st or 2nd, should not be expected to wear masks all day.
7/21/2020 9:48:30	Heather	Sramek	Parent and Teacher	Olathe	Please support the delay in opening schools. Too many community leaders across the state are not making safe public health decisions for their communities. If a community is making smart choices, then schools can open safely. If they are not, these measures will do little to stop the spread. As a result some communities will be safe, and the minute athletic competitions and activities with those in other not-so-safe communities begin, all will be lost. Schools and teachers need time to prepare for the implementation of the guidelines, and KSHSAA events can still be played after Labor Day. We can shorten seasons without eliminating them. It is a delay, not a cancellation.
7/21/2020 9:48:35	Kelly	Midgley	USD 340	Meriden	I am respectfully requesting that you uphold Governor Kelly's executive order to extend the start of school until after Labor Day. I think it is important to support fact and common sense based decisions. Please vote in favor of Governor Kelly.  Signed, Kelly Midgley Parent of 3 students in the USD 340 district
7/21/2020 9:48:37	Kristi	Loftus	Olathe USD 233	Olathe	Please follow Governor Kelly's tilling. Delay start of schools!
7/21/2020 9:49:05	Mackenzie	Miller		Olathe	Please support Governor Kelly's order that schools remain closed until after Labor Day. With infection rates rising taking more time to make preparations for the school year is the safest option. I am not ready for my child to go back to school yet under current conditions and fear for the safety of both my daughter and her teachers.
7/21/2020 9:49:09	Molly	Groebe	self	Olathe	The start of school should be delayed. Hybrid models should be considered. Children should wear masks.

					It's time for children to return to class, in person! Our governor closed school state wide in March with few or no cases of COVID-19 in many counties. Now delaying school seems to be more fear mongering. Our children need normalcy, in person education, socialization, and mental stability. Delaying the opening of school only prolongs a fear of the unknown. Governor Kelly presented a plan for schools to reopen in May. It's time to implement that plan. We've done due diligence, closed schools, shut down the economy, and flattened the curve. Of course there are more positive cases now. We are open and trying to function normally and more people are being tested. This virus isn't going away anytime soon, but it's time to get back to living. I feel that continuing to delay the opening of schools is far more detrimental than the virus. Our kids need this, our economy needs this! If school does not reopen, I will not be able to work and do the job that is expected of me because I will need to be teaching my children. Delaying the opening of schools impacts every facet of life and our economy. I appreciate the opportunity to voice my concerns and I hope you will thoughtfully consider the long term harm keeping schools closed will cause.
7/21/2020 9:49:20	Julie	Serati	Blue Valley School Dist	Overland Park	Thank you
7/21/2020 9:49:28	Sydney	Rummery	Self	Andover	I strongly urge the Board to delay school starting until after Labor Day. The increasing amount of COVID cases in KS is staggering and is more than what it was when we closed in the Spring. Please consider doing what is best for student and staff safety and waiting to open.
7/21/2020 9:49:35	Susan S	Cockrell	Grandchildren	Emporia	This year will be full of challenges for everyone. We need to step up and realize this virus is dangerous and most people do not keep their children home when sick with a cold or flu. This is not either of those and we can still educate students with great ability wherever they are safest. We have been teaching and promoting technology for years. Now when it is needed, not just a want, we act like it is the worst development. Children will still have social groups within reason, free lunches have been delivered or picked up all summer and will still continue, teachers have been checking on students, sports can be switched semesters and will be played. But this will not happen unless you do your job and stand up for science, students and staff. I fully support delaying schools starting this fall. I am also begging you to have more science in school. Evidently most of our population cannot logically view this pandemic. It is real, it is a virus that mutates, and it can infect all ages. If we taught more science this would not be a problem. Thank you.
7/21/2020 9:49:36	Kathryn	Close	Retired teacher and cond	Clay Center, Kansas	Please reopen schools as soon as possible (before Labor Day and allow local school districts to make these decisions). A one size fits all policy mandated by one person is not right. Mo masks for children and teachers! (Or make optional!)

7/21/2020 9:49:40	Danessa	Mitzner		Osawatomic	<p>First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.</p> <p>Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <p>Safe School opening following the Board of Education Return to School Plan. No delay to student participation in school, athletics, and activities.</p> <p>In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions. This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense. Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>I am one of the over 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.</p> <p>We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.</p> <p>To view the petition: <a href="http://chng.it/7LG6GzBjqM">http://chng.it/7LG6GzBjqM</a></p>
7/21/2020 9:49:45	Dustin	Day		Lacrosse	I'm all for hand washing and a temperature check but I'm not for a silly mask that kids are not going to keep on their face anyway this virus has little to no affect on our kids if the faculty feel the need to wear one to feel protected that's their right but I'm totally against kids being forced to do something as such because our Democrat governor what's to feel powerful over each and every one of us and this is her last place she can do it and it's totally wrong to pray on our children
7/21/2020 9:49:47	Kara	Abernathy	Blue Valley West	Overland Park	Please uphold Governor Kelly's executive order. Teacher, student, and staff lives depend on it. This isn't a decision to take lightly. We don't want to look back in a year and wonder if our actions could have prevented someone from dying.
7/21/2020 9:49:52	Lance	McDowell	Goddard high school	Wichita	We need to delay opening and be online for the first semester to protect people and still play sports.
7/21/2020 9:50:04	Tamie	Hindman Wessel		Plainville KS	I appreciate all efforts to protect our people!
7/21/2020 9:50:06	Stephanie	Stuhlsatz		Lawrence	Push School back to September 9th.
7/21/2020 9:50:07	Shana	Bender	Employee of USD383	Manhattan	I would like to state that I am in favor of delaying school start dates until Labor Day. I believe that this mandate allows for school districts to prepare for better remote learning options and see the impact of out-of-city students returning to the university on our city health.
7/21/2020 9:50:10	Courtney	Yeoman	Shawnee Mission Schoo	Shawnee	Until the state of Kansas turns the curve in number of cases there is no way we should be in attendance in our buildings. I am a teacher with children of my own. It's too risky.
7/21/2020 9:50:24	Courtney	Semrau	Family	Olathe	I would prefer to delay the reopening of schools until after Labor Day. It would be nice to see if the virus trends go up or down prior to having to make the decision whether my children should go to school physically or virtually.

7/21/2020 9:50:27	Talia	Wright	Parent	Wichita	<p>Hmm... so here's a scenario for you all to ponder. You are allowed to work from home(blessing), but your internet is down and Cox said it won't be fixed until the afternoon. Your boss understands, but tells you to come into the office to work. That's no problem you say, but oh wait you have your child at home and your job has said you can't bring her with you. This is not just a scenario, but real life that just happened to someone I know.</p> <p>Now what??? I know there is no good answer, but the reality is that there are working parents that can't homeschool their kids.</p>
7/21/2020 9:50:32	Barbara	Petracek	myself (I am a teacher)	OLATHE	Open the schools! Kids need school! Daycares have been open all along with few issues. How is delaying 3 weeks going to make a difference? Virus not going away, let's learn to live with it using safety precautions.
7/21/2020 9:50:34	Vanessa	Steinroetter	Washburn University	Topeka	I request that the Kansas School Board NOT overturn Gov. Kelly's mandate on starting school after Labor Day. It is vitally important to the health of local communities to prevent situations where the coronavirus can be spread exponentially, and indoor classes are high-risk environments. The more cases of Covid-19 we have in local communities, the longer it will take for Kansas to feel safe shopping and going about their business in public again.
7/21/2020 9:50:42	Travis	Mounts		Cheney	I strongly believe the State Board of Education needs to support Gov. Kelly's decision to delay the start of school. We are dealing with an unprecedented health crisis while simultaneously dealing with an unprecedented division over basic scientific facts. And the facts show COVID-19 cases rising across Kansas. They will continue to do so until we see more people wearing masks and curtailing their activities. I have strong doubts about our ability as a whole to do that when the Legislature has carved up the authority of the governor to take practical solutions to deal with the health emergency. Many of our county governments are failing in their responsibility due to political pressure, furthering the problem. The governor needs your support in this decision. More importantly, our students, teachers and staff need you to do the right thing and put safety first. This decisions should be based on health and sciences, not politics. Please do the right thing and delay the start of school, and stand with the Department of Education's leaders who are in agreement with the governor. Thank you.
7/21/2020 9:50:44	Meg	Daugherty		Overland Park	The children need school. I have 4 kids ages 6-13 and they are having a massive decline in their socialization, their mental health and flat out WANT to go back to school. We know there are risks, as there are with anything, but its a risk we are willing to take. We know the school year could look different with masks and social distancing but they accept that and still chose to go back to their routine, to their teachers and their friends. They miss their normal. I miss their normal. If we don't go back now, then I fear the normal will never be normal again. Please send them back to school!
7/21/2020 9:51:09	Mary	Malek		Scott City	I fully support Governor Laura Kelly's decision to delay school opening until after Labor Day. I also agree students should wear masks after schools open.
7/21/2020 9:51:11	Holly	Fast	Self - Concerned Parent	Ashland	<p>My children have been out of school for 5 months. They are aching for social interaction outside of our family unit. They are learning to be afraid of something they cannot see, touch, or feel. For a 7 and 5 year old...this will have long lasting effects on their psychology. It is also proven that these are their most formative years of development. Why would we continue to push them back further than they are already looking at? I am blessed to have very intelligent and adaptable kids, but I feel for those that have significantly larger struggles; children that have no safe space and/or are at a learning disadvantage. What will happen to them if this continues? What have they lost already? My husband and I both run Main Street essential businesses. While we are both educated and capable of conducting school at home, why put that on our children? I say this also knowing that my 7 year is Type 1 diabetic. Technically, she is an at risk kid. However, at what point are you doing so much to survive that you forget what it's like to live? Please stop the delay in returning to close to normal. Or at least leave it up to local governments to decide what is best for their district.</p> <p>All of Kansas is not in the same boat. Ashland is absolutely nothing like Wichita, Topeka, or Kansas City. Please remember that the circle is larger than just the urban areas. Thank you!</p>
7/21/2020 9:51:20	Ebony	DuPreep		Geary County	Please vote to postpone school to Sept 8. It is not yet safe for our children to attend. More time needs to be spent putting the necessary safety precaution in place.

7/21/2020 9:51:24	Katie	Roggenbaum		Haysville	<p>I am writing to encourage the BOE to adopt Governor Kelly’s executive order to delay the start of schools in Kansas. As the mother of two medically fragile children and being high risk myself, delaying the start of school would give us an opportunity to decrease cases throughout the state an sortie this the most vulnerable. School districts are struggling insecure the necessary items they need to properly sanitize and protect our students. Continuing down this path as if nothing is going on to make a political statement is not only irresponsible, but juvenile. I have seen things from multiple board members that make me question not only their integrity, but fitness for the job. One stated that she didn’t believe the BOE could tell districts what to do- then why do we have you? Shall we eliminate the state BOE and leave all decisions up to local districts? Harvest was also mentioned. If harvest is such a concern, alter the schedule. Schools in Kansas didn’t start until after Labor Day for decades and they ended before Memorial Day. That argument is a red herring for the majority of our districts in Kansas. It’s literally two weeks! Two weeks! You could make that up in in-service days and conference release days alone. There are teachers that are high risk, teachers that have family members that are high risk. Do you really want the deaths of hundreds or thousands of citizens on your hands? Delay the start of school! Slow the spread! Quit being political and be on the side of science and public health.</p>
7/21/2020 9:51:27	Katherine	Clafin	Personal	Linwood	<p>Please follow the governor’s order for students to wear face masks in schools. Do not make this a county by county or district by district decision. Show leadership. Help communities recover and reopen by mandating face coverings.</p> <p>I am a physician who has been closely watching the data about non medical face coverings. I have totally changed my mind about the effectiveness of home made masks. Pre COVID, there was little data about homemade face masks and disease spread. Medical masks were worn to protect the mask wearer in contact with patients who had a respiratory illness or to protect the patient during surgical/invasive procedures. Patient worn masks were reserved for those with compromised immunity. Mask wearing by the general public was not studied in the USA.</p> <p>Since the Covid-19 pandemic, reliable data has shown universal face covering dramatically stems the spread of COVID. One remarkable example is that of two hairdressers in Missouri -with active COVID disease- exposed over 100 clients. In each hairdresser-client encounter, both wore a face mask. None of the clients became COVID positive. Zero transmission.</p> <p>Kansas currently has only 3 counties without a reported case of COVID. This is the time for those counties to assure they remain clear of the virus. Mask wearing, hand washing and maintaining physical distance are the basic cornerstones for containing this virus. It is NOT “the flu”. It is more deadly, causes more morbidity than influenza, and long term effects are unknown.</p> <p>Covid is now most common amongst 20-40 year olds. While some recover quickly, others die or have long term health problems. We do not yet have enough information about COVID to be cavalier. Please vote to do all we can to protect our children, our elders, our communities. If COVID has not arrived in your area, be grateful and do all you can to remain free of this virus. Mask wearing is no more difficult than wearing a hard hat, steel toed shoes, a safety harness or a seat belt. All these measures were despised when implemented, yet they save lives and have become common place. Face masks will do the same.</p>
7/21/2020 9:51:29	Anastasia	Fischer		Olathe	<p>As a Kansas Citizen and Parent of a High School Student I urge all KSDE Board Members to follow the science and not the politics as you make decisions that will impact every student, family, teacher, and neighbor in our state. This is a time of crisis and we need strong leadership to protect the health of our community. If we do not have our health we have nothing - our students cannot learn, our teachers cannot teach, and our neighbors cannot work if they are sick. I hope my son will graduate from high school as planned next spring and enroll in college in the fall, but modified schedules and modes of learning are a small price to pay for his health and safety.</p>

7/21/2020 9:51:30	Alleah	Heise		Dodge City, KS	It is imperative that our kids go back to school. ASAP. The governor's EOs are a one-size-fits-all attempt at a solution that will do more harm than good. Gov. Kelly's mask EO flies in the face of medical data from both a federal and state level that suggests children under the age of 12 don't need masks as they are not carriers of the virus. In Ford Co, we are now reporting 2-5 positive tests a day compared to the 40-60 positive cases a day at our peak. Please make this a local decision and not another ill-informed policy from Topeka.
7/21/2020 9:51:34	Victoria	Savich	SMSD	Overland Park	The most prudent way to ensure equitable education to all k-12 students in Kansas and a safe working environment for all employees is to delay the start of school indefinitely as long as Covid 19 cases continue to increase.
7/21/2020 9:51:40	Theresa	Leitzel	Parents	Clay Center	I support the delay of school starting until after Labor Day. This will give districts and teachers ample time to be prepared to have the appropriate supplies and procedures in place to proceed safely.
7/21/2020 9:52:01	Jordan	Haldeman	Parent	Olathe	<p>There will always be risk. We cannot live our lives free of any risk. There is risk of riding a school bus. How many fatalities does the cumulative high schools have each year due to car accidents? If we go on the premise that if one child dies we can't open then we will never open.</p> <p>Of course teaching staff would like to stay home but that's in part because they are collecting a paycheck. Take that away or reduce their pay and everyone would go back to work. The damage caused by not resuming school will outweigh the risk of starting. For example, the financial burden that will be placed on parents who rely on school so their spouse can work for secondary income.</p> <p>If we can open casinos, sporting goods stores, gyms, etc, then we can open schools.</p>
7/21/2020 9:52:04	Jennifer	Pinkney		Bucklin	I don't think this should be a state wide blanket decision. Leave it up to the school districts themselves. USD 459 is so small. We can handle it ourselves. Let the school leaders who know the students and the community make the best decisions for us. We have complete confidence in our administration to do what's best for our students.
7/21/2020 9:52:08	Laura	Treeman	Self	Overland Park	It is highly unsafe to open schools at this time due to the level of community transmission (my personal and professional belief as a working RN locally). However, knowing this has serious health, safety, and learning repercussions for some families and children, I think a 50% in person option should be presented at least to some students (perhaps on parental employment grounds {ie kids of essential workers, unable to work from home or kids of parents who face job insecurity w/o childcare}, or perhaps based on IEPs, kids who will suffer w/ out in person instruction). No more than 50% in person schooling should be permissible at this time, until community transmission is at a lower level (<5%) and resources to keep transmission low/ contain outbreaks are put in place. The health of our teachers, support staff, and children should be of paramount importance. Thank you.
7/21/2020 9:52:09	Jessica	Skrdlant	parent	Manhattan	whats the point of the delay? They have had plenty of time to come up with a plan for safety. If we wait until sept cold and flu season hit and then what? Another shut down? I care about my children's education and as a parent am not equipped to provide them with the education they need. 99% of people recover from this! Wash your hands and use common sense but stop shutting the world down!
7/21/2020 9:52:11	Wendy	Cantrell	parent	Lawrence	I am a nurse and mother. With case numbers continuing to climb, I feel strongly that school should not conviene with in-person instruction. Instructors for may safely provide live group and individual instruction- OR- virtual lessons with individual feedback.
7/21/2020 9:52:12	Laura	Michael		Goddard	Agree with delaying!

7/21/2020 9:52:18	Eve	Terrell		Derby	As a teacher I am very concerned about entering the classroom again. Every single year there are kids that miss their moms and dads on the first day of school, usually I give them a big hug and remind them how much they are loved. This year I can't, and that just breaks my heart. I am also very concerned about sending my two third grade twins to school knowing that when they need a hug there isn't anyone who can give them one. Going a whole eight hours without physical touch isn't developmentally appropriate. My 65 year old mother lives in our home, which is a gift, one I am not comfortable giving up. My mother is able to give a different perspective on so many things and offers a level of support that is invaluable. I can't imagine raising five children without her here, knowing that my children or I could bring home a virus that could be deadly is such a scary thought. I am also very concerned about sending my high school junior to school, she has athsma and is a dedicated athlete. Knowing this virus could take her life or forever change the course of it is something I can't risk. I also know that my family depends on my income, to help put my oldest son through college among other things, he wants to be a teacher. He told me when he decided to go into education it was because he saw the difference I made in this world. I am not sure I am done making a difference, but I can't if I am dead, sick or mourning a loss so great that my heart hurts. So I am asking please protect us, the teachers, the changemakers, the ones who are always here for hugs and pencils and working in the summer. Please don't forget that we are people too, we can't go back when the numbers are this high and the risk is this great.
7/21/2020 9:52:22	Linda	Flores	NA	Garden City	I believe the executive order was the right choice and want to express my desire to uphold it. As a first year teacher, the best thing that could be done for me and my students is to only open schools when it is safe and cases have deopped significantly. Please consider reallocating funds to make virtual learning easier on students and their families this year. We need resources to make sure students are taken care of while they are home learning. Additionally, teachers need time to prepare for any "answers" or plans we are given for how the year will go. Many have been unable to plan due to an inability to anticipate what learning will look like in the Fall. Please step up and do what it best for teachers and students. After all, if the select few of you are meeting virtually, what makes you think it appropriate to have a dozen or more people together in classrooms?
7/21/2020 9:52:31	Tammy	Miller	My children who will be	Hutchinson, KS	Please follow the governor's orders. These are teachers and children's lives we are talking about. DO NOT TAKE THEM FOR GRANTED! Open your eyes. When people started gatherings of more than 10 to 50 people the COVID cases started to rise. Children packed in a school building is a recipe for disaster. A child or teacher death due to covid will solely be on your shoulders. Vote wisely....
7/21/2020 9:52:32	Kayla	Flora	Skyline	Pratt KS	We should NOT delay the school year. Open up!
7/21/2020 9:52:32	Emily	Ray	USD 497	Lawrence	Please uphold Gov Kelly's EO to delay the opening of schools, so that we have more time to determine a safe manner in which to re-open schools.
7/21/2020 9:52:33	Rachel	Fisher		Pittsburg	I support Governor Kelly's decision to push the school start date until after Labor Day.
7/21/2020 9:52:36	Kathy	parbs	kckps	olathe	Please support Gov. Kelly's executive order.
7/21/2020 9:52:47	Emily	Bare	USD 377 and Emily's H	Lancaster	I only ask that decisions are made for the safety of our teachers, staff, and our students! Sports are very important but education comes first. I hope judgment by parents and others are set aside and we are putting into consideration enough time for teachers, districts to prepare for our new normal, so they ate ready for the condufusion our kids are going to be in, the questions are children will have. This will not look like any year they have experienced, we need to be ready and prepare for the next step. I am ok with either decision I just ask the decision is made based off of education, staff, and our children
7/21/2020 9:52:59	Tiffany	Johnson	Parent in Shawnee Miss	Prairie Village	Please uphold Gov. Kelly's order to delay the start of the school year until after Labor Day. The schools need more time to plan. Delaying the start of school also buys time for the COVID-19 numbers in the State to improve, making a return to school safer for students, staff, and teachers.
7/21/2020 9:53:03	teresa	Beacham	community member	Kansas City	teachers, staff and students needs to be protected! do not allow schools to resume in person attendance until it is ABSOLUTELY SAFE to do so!!!
7/21/2020 9:53:12	Jo	Marsh	School teachers	Wichita	Please take in consideration our health and well-being of NOT opening schools. I have a parent who is 70 and lost her husband and now I have to take care of her. Also, I had underlying conditions too. I have to be be careful and take precautions. I have been a teacher for 23 years and definitely concerned. I know it is important for children to be safe in our schools and be in them. But, with levels not lowering or in a plateau state we should NOT be going back.

7/21/2020 9:53:14	Kyle	VanGoethem	Parent	Olathe	Please listen to the infectious disease experts at Children’s Mercy Hospital in Kansas City - they are consistently telling us how badly children need to go back to school. Elementary school children will not succeed in remote-only learning and need the structure and socio-emotional benefits of in-person school. Please allow us a choice for remote or in-person learning. We would love to see an in-person option where kids can go for at least a few hours a week and still safely social distance. If the grades are broken up, class sizes can be greatly reduced. Please give us a choice, and then increase more time in school per week as our local area decreases in cases.
7/21/2020 9:53:32	Jenna	Potter		Baldwin City	Schools need to open. Kansas children have been out of school buildings since Mid March. What terrifies me more than this virus, is our governor making these decisions without plans in place on how to execute them. Schools were closed in March with every district to fend for themselves on how to operate virtually. Now, executive order 20-59 is in place with no plan on how to take 100’s of children’s temperatures every morning, the response from Laura Kelly was “they’ll figure it out”. The education my child received for the remainder of the last school year was sub-par and I’m furious at the thought of my tax dollars funding another round of that. Pushing off the start of school for the 2020-2021 school year is just opening the door to more chaos. Children will not be educated as they should and families will struggle with childcare needs of children can not be in school. Paying teachers full salary to do what they did last spring is ridiculous. Schools need to open, we need to start making some decisions for ourselves. If parents want to keep their kids home, that is their choice, but it shouldn’t be mandatory. I feel that delaying school starting 3 weeks will open the door to longer delays and hinder my child’s education.
7/21/2020 9:53:34	James	Moore	Lawrence Free State	Lawrence	Please allow sports to proceed and practice in Kansas!
7/21/2020 9:53:35	Alexa	Buchenau	Blue Valley School Dist	Overland Park	Delaying school opening until after Labor Day is our only option. Covid numbers have continuously fluctuated since after the 4th of July holiday weekend. Understanding that most are experiencing pandemic fatigue & parents need to get back to work but most of all the vital social interaction needed by our students/staff at school - if we rush the reopen we are only helping to ensure another lockdown with premature & elevated exposure. Teachers want to be back with our students & physically teaching back in our classrooms but rushing this set up endangers students and staff at the moment. Delaying school opening will allow some of the appropriate allotted time for teachers and staff to prepare for as many different scenarios to keep our students and ourselves safe. My number one job as an educator is to keep my students safe and protect their wellbeing.
7/21/2020 9:53:40	Donna	Fou		Roeland Park	Delaying the start of school will provide time for educators to prepare and plan for the safe return of students. I believe it is the right thing to do. Please vote in support of this order.
7/21/2020 9:53:43	Michelle	Van Der Wege	NA—parent	Russell	I believe the start of school should be delayed until after Labor Day. This is the best choice to 1) allow educators to plan, 2) allow additional information regarding the trends of infection to be gathered, and 3) delay the inevitable increase in cases we are bound to see.  We need to focus on quality education right now. If we can limit exposures and reduce illness, all kids will receive a better education. If 60% of Kansas kids miss weeks or months of school due to illness, they cannot be effectively educated.  With that in mind, I think the requirements for hour/day completion should be altered to reflect the changes that are needed to keep everyone safe.  Finally, I think graduation requirements for current seniors (and likely juniors) should be altered to reflect the changes as well.
7/21/2020 9:53:47	Braden	Oliphant	Teacher in rural school	Wichita	Please support Governor Kelly's executive order to delay school starting by 3 weeks. By doing so, we will take pressure off of local school boards, administrators, teachers, and health officials and will allow them time to prepare a safe and effective return to the classroom. To come into the school year unprepared can only cause logistical nightmares for just about any aspect of Kansas education.
7/21/2020 9:53:49	Andrea	Marshbank		Topeka	As a teacher at Shawnee Heights HS, delaying school will allow me and my district to better plan for a mix of in-person and online learning for students' needs. It also better respects the needs of teachers who are worried they will contract the virus due to their job.

7/21/2020 9:53:52	Barbara	McCall	My family, Olathe Public Schools	Olathe	Please support the EO requiring the delayed start. I genuinely believe the worst case scenario for children would be to open schools, and then have to close. Our best chance for a CONTINUOUS educational format is to take these extra weeks, do what's right and bring down those case numbers statewide. Please support the EO. Thank you.
7/21/2020 9:53:57	Lori	Fonken	USD 259	Wichita	I feel we shouldn't start school in person until our numbers go down. If we wait till after Labor Day that could help our peak of illness return to a lower curve.
7/21/2020 9:53:59	Marcy	McGuffie		Lawrence	Governor Kelly is looking out for the best interest of Kansans, during this unprecedented public health crisis. With the spike in COVID-19 cases, we must protect our citizens.  Top experts and scientists agree we must actively take steps to prevent the spread. It's sad that a WORLDWIDE, public health crisis has been politicized. This virus does not discriminate based on political affiliation.  It would be irresponsible to start school before Labor Day, given the situation. We must protect our children, educators, and those they come in contact with. I urge you support the Governor's mandate in delaying the return to school.
7/21/2020 9:54:05	Melissa	Gard	Parent	Wichita	I don't think school should be delayed. At least for the younger kids. I have 2 children that go to Maize and one is starting kindergarten this year. She is supposed to be on an IEP program and now she will be delayed even more. My husband and I are both full-time working parents and cannot teach our children at home. Both of our girls have been in a daycare facility full-time since April and no illnesses related to COVID-19 have arose. I believe sanitation practices can be put in place at school. I understand it won't be perfect but can be another learning opportunity for teachers and students.
7/21/2020 9:54:06	Janina	Staniszewski	Part of BVSD	Overland Park	There should be no school delay. Curricula exists that meets the Common Core for years now. Masks mandate should be replaced with face shields. The face shields are a healthier alternative. People with hearing impairments must see the face. As much as 55% of communication is visual. People, particularly with breathing problems, need & should have a clear breathing path. Those with a mental anxiety over mouth/nose cover, have likely a more tolerable option with face shields.
7/21/2020 9:54:08	Amy	Edwards		Wichita	I do not believe our state officials should be mandating how private schools practice. If it is important for certain practice to be put into place, a law should be passed in the legislature. Mandates circumvent the consent of the governed and circumvent the duly elected law-making body.
7/21/2020 9:54:08	Karen	Casebolt		Overland Park	I support the delayed opening of schools for the safety of our children and school staff. We get the virus under better control with more mask wearing and be in a better position to start school.
7/21/2020 9:54:17	Heidi	Linden		Sterling	The governor's one-size-fits-all mandates for Kansas are atrocious. There is ZERO scientific data that says delaying school and requiring my children to wear a mask in my school district is "safer" and "healthier". I am tired of my government over-stepping and telling me what is right for me and my family.
7/21/2020 9:54:18	Danae	Rus		Overland Park	Please let the schools have until after Labor Day to adequately prepare for students to return safely to the classroom. It will also allow more time for our state to work on controlling it's virus numbers. We must all do our part! This is a public health issue, not a political issue.
7/21/2020 9:54:20	S	S		Augusta	Please keep school CLOSED until AFTER LABOR DAY
7/21/2020 9:54:25	Emilea	Harlin	McPherson High School	McPherson	Thank you for all the work you do for Kansas, our students, schools, and teachers. As a high school teacher, a wife of a high school teacher, and a mother of three, I believe our students need to be in school sooner rather than later. While I understand the reasoning behind what the governor is proposing, I also believe that choice should be left up to individual districts. I am confident that districts will work closely with health departments to make the best decisions for their communities. Thank you for your time.

7/21/2020 9:54:26	Jena	Klaas		Basehor	<p>I am a high school teacher in Wyandotte County. I urge the Board to support Gov. Kelly's executive order for many reasons - too many to list in their entirety, but here are a few: 1.) Our student population is very large (~1600 kids last year) and our building is historic with narrow hallways and many small classrooms. If we are going to resume in-person, we need more time to plan and prepare so that students and staff can safely social distance. 2.) Many of our students have asthma, putting them at a higher risk of contracting the virus and experiencing complications. Many kids also live with large families (including multiple siblings) or extended relatives that are older and considered high risk. Many of these family members go to school or work out in the community, and I fear that the virus will spread very rapidly if our students return in August and are exposed to it. They will bring it home to their families, which will go on to impact the entire community. Wyandotte County is one of the hardest hit by this virus already, and I feel that resuming in-person in August will accelerate the damage this virus causes to individuals and communities. 3.) Similarly, many families in Wyandotte County do not have access to quality healthcare, or the financial means to afford it. Contracting covid could be devastating for families if caregivers have to miss work due to the virus, or go into work despite testing positive, or send a child to school who has tested positive, or require hospitalization, putting them into debt. The potential ripple effects of further spreading this virus in already-vulnerable communities keep me up at night. I worry for my students and their families 24/7. 4.) I also worry about teachers/staff and their families. I personally have asthma and recently recovered from an illness that compromised my immune system for most of last school year. I also live with a parent who was a chronic smoker and has an autoimmune disease. Returning in-person to school in early August threatens the health and wellbeing of myself and my family. I know I am not the only teacher who is high risk or has a high risk family member. Delaying school openings until districts are better prepared is one way to help mitigate the negative effects of this virus on teachers and staff. These are just a few of the innumerable reasons the Board should support the Governor's executive order to delay school reopenings. Kids can't learn when they're sick or don't have teachers to teach them. Delaying reopenings is in the best interest of Kansas kids.</p>
7/21/2020 9:54:28	Sarah	Leeser	I work for Usd497	Lawrence	Please back Gov Kelly. Please listen to science. It is not safe to open yet! We need time to prepare and do this correctly.
7/21/2020 9:54:31	Daphne	Reed-Mertens	Parent of 4	Emporia	<p>I am a parent of four children aged 6-12th grade in Emporia Public Schools. I fully support the executive order Governor Kelly made to delay the start of school until September over covid-19 concerns. This will allow schools to be better prepared with PPE as well as make adjustments to better protect students and staff. I can personally say that there are many of us who support this wholeheartedly. It puts our minds at ease knowing that it gives the schools time and it would not harm anyone in the process. The mandated hours can still be met by adding time to the day or the school year if necessary. Many states start school in September with no issue. I myself as a Kansas High School senior started in September and graduated in June. There is not reason NOT to do this. Not only is it the best plan, it is the only plan to avoid significant illness and loss of life. I don't think any of us want that on our conscience.</p>
7/21/2020 9:54:36	Kris	Darrah	Classical School of Wichita	Wichita	<p>I plead for you to look at real numbers and statistics and allow our school districts to decide for themselves on whether or not it is safe to open. There have been 0 Covid deaths of Kansans under the age of 25. Of the 2,913,314 people living in Kansas, there have been only 126 Covid deaths of people under the age of 75. Incredibly low! That means 99.99568% of Kansans under age 75 have survived this virus. (The last flu season saw 4.5 times as many deaths.) Our healthcare workers have done an excellent job of keeping us healthy and alive and I know they will continue to work hard to do so. Moreover, many counties in our state have not been affected by Covid at all. For the past month, my son has been participating safely in basketball training and a soccer league. For the mental and emotional health of us teachers and our students, please allow us to safely and cautiously reconvene in our classrooms and our athletic fields!!</p>
7/21/2020 9:54:36	Nicole	Kenniff	My family	Lawrence	Please keep schools closed until the numbers are lower, keep our teachers avx children safe.

7/21/2020 9:54:53	Jennifer	Fallon	Parent - Blue Valley Sch	Overland Park	Our kids need to be in school on the original back to school date. They are getting more and more behind everyday they are out. The distance learning has been offered and people with concerns or "high risk" kids can utilize that option. Other countries that have gone back to in person classes are not reporting a spike in cases. They were out of school and we all quarantined to avoid overwhelming the hospitals. We didn't do it for the virus to disappear. In our state the hospitals aren't overwhelmed and our children need to get back to their education. Not to mention, the kids aren't social distancing or quarantining anyway. They're all out together living life - they need to be back in school. DO NOT sign off on Governor Kelly's ridiculous mandate to delay school.
7/21/2020 9:54:56	Miki	Bonilla	My children	Wichita and Caldwell	For the love of God my children are not Guinea Pigs!!! Give the school districts time to make adjustments needed to protect our children and the staff!
7/21/2020 9:54:57	Amy	wittig		Pratt	NO DELAY
7/21/2020 9:54:59	Jennifer	Pinkney		Bucklin	I don't think this should be a state wide blanket decision. Leave it up to the school districts themselves. USD 459 is so small. We can handle it ourselves. Let the school leaders who know the students and the community make the best decisions for us. We have complete confidence in our administration to do what's best for our students.
7/21/2020 9:55:01	Rhonda	Stucinski		Overland Park	Our kids need school. The postponement of opening the schools is just political action designed to control people and exaggerate the pandemic. Enough is enough. This is so ridiculous! Open our schools now!
7/21/2020 9:55:12	Peggy	Miles	self	Overland Park	I ask you to stand with the governor to delay that start of school and give schools more time to prepare for the upcoming school year. I also ask that you strongly encourage people to wear masks and practice social distancing/hand washing/etc to reduce community spread of the virus and make it more probable the schools can open in person.  Thank you, Peggy Miles
7/21/2020 9:55:13	Shawn	Curry	Colby high school paren	Colby, ks	Start school, and activities on time. The emotional and psychological damage to the kids will be worse than COVID could ever be!!!
7/21/2020 9:55:17	Cindy	Gonzales		Topeka, ks.	Need to re-open our schools!!!!
7/21/2020 9:55:18	Mara	Frederick		Frontenac Schools	Please support delay in opening and mandate for masks. Please follow recommendations from doctors and scientists.

7/21/2020 9:55:25	Aaron	Betz	USD 293	Quinter	<p>First I want to thank each of you for the task you face. I know this isn't an easy decision and no matter what decision you make there will be upset individuals.</p> <p>I understand the need to have safety protocols in place to protect staff, students and administrators. I believe that the damage done from the shutdown to students mentally is greater than the risk of the sickness based on information from Pediatricians about students being extremely low risk of getting COVID or spreading. Also, remember the fix can't make the matter worse. In young kids wearing mask all they will do is constantly adjust. I know from personal use at work they are difficult for those that wear glasses with constant adjustment and fogging. Kids need to be kids and have social interaction and activities like sports, band, music, play, etc.. It has been almost 5 months since kids had any kind of routine. Online schooling worked to finish the year but locally we had several students struggle. It wasn't just those that you would expect to struggle either.</p> <p>All I ask of you is to consider what is best for students first, then staff. I also ask that a one size fits all approach doesn't get used. I know we have hot spots throughout the state. Most of the hot spots are in larger communities. I know each of you is considering all this and it's a difficult situation. As a parent and school board member I see both sides. For me in the area we are at I believe delaying school damages students more. At the current time we have had only 2 COVID cases locally and the counties around us haven't had many either. Based on this I believe the decision should be made locally.</p> <p>I understand you have to consider the whole picture and respect however you decide.</p> <p>Thank You Aaron Betz USD 293 Board President</p>
7/21/2020 9:55:26	Kai	Wilkerson	Parent	Dighton Ks	<p>If school need to be delayed that is fine. That being said I do not want my kids wearing masks or being separated by plexi glass. Kids need to be kids. Also last year our kids worked their rears off on their education from home and then they weren't even given grades we received a fluff letter saying that it was impossible to grade them. Yet it wasn't impossible for every other district. I would rather do all online than deal with the nonsense our district did last semester. I am certain in all of this no one is actually thinking about what this is doing to the kids ! Lets actually put the kids first for a change they cannot live like this. This is not like a summer vacation and kids are literally killing themselves all over the country over this. If the powers that be cannot see what is best for the kids you can bet that as parents we will.</p>
7/21/2020 9:55:27	Michelle	Clore	Herington Middle School	Herington	<p>Please rescind the governor's order and let us start school on time!</p>
7/21/2020 9:55:27	Jason	Welch	NA	HAYSVILLE	<p>Open it up 100% or not at all. Science is on the side of fully operational schools. Our children have been subjected to enough. Impossible guidelines for teachers and children to follow change nothing. Studies show that children are the least likely to contract cv19. We didnt care when H1N1 hit, we dont care when lice epidemic hits(oh yes lice is epidemic worthy)strep, flu, or common colds hit.</p> <p>Either open up and acknowledge that teachers and schools are essential. Or Close it down and Admit that they are not essential and just in plave to program our kids to take tests.</p> <p>Give them recesses again, outside PE and shop classes.. let's let their bodies immune systems work. Our kids learned more in 1 to 3 hours a day at home than they did in classroom. What they can't learn is social interaction and they need that</p>

7/21/2020 9:55:38	Kimberlee	Anspach	Citizen	Lawrence	Please delay opening of schools at least until Labor Day and preferably until a community has seen no new cases for 14 days. My son is high risk and I will not feel safe sending him until we either have a vaccine or our community has seen no new cases. Please recognize that masks are a health and safety issue, not political and require them in schools. Thank you.
7/21/2020 9:55:41	Eric	Sher	Parent	Lenexa	Please open the schools for in class learning. Their education is suffering from these shutdowns.
7/21/2020 9:55:50	Tamra	Gengler		Beloit	Start school in August.
					<p>I am concerned that the urgency to get kids back to school is causing us to overlook ways to be creative and innovative to change the way we do school to make it safer and less vulnerable to pandemics.</p> <p>This could be an opportunity to create much-needed change in the infrastructures of education: to modernize buildings and better equip them for supporting public health, to redesign instruction and standards to better meet emerging needs. Instead, we seem to be pushing forward with trying to reopen school buildings and “get back to normal.” “Normal” didn’t work for everyone, “normal” wasn’t equitable or sustainable; I am deeply troubled by how we are spending most of our time and energy trying to get back to a system that wasn’t as effective or modern as it could be, instead of channeling our energy and efforts into creating something better.</p> <p>I am concerned that some people are advocating for reopening schools regardless of the data, regardless of the rising cases, regardless of what we have observed when other businesses, organizations, and camps have tried to reopen, even with safety precautions (such as masks) in place. Summer camps are an indicator of what we can expect by reopening schools, except they usually have fewer kids and spend more time outdoors, and yet they have struggled to control the spread of the virus. Kanakuk camp in Missouri had over 80 campers and staff that contracted the virus, even as much of their programming takes place outdoors and they required masks. They also had fewer campers than many schools’ student population. Schools are going to need more than masks and hand sanitizer to be safer. We are going to need outdoor spaces, or better ventilated rooms with windows that can open; we will need social distancing AND masks (as the CDC recommends masks for brief encounters in which social distancing is not possible, whereas prolonged encounters in poorly ventilated rooms even with masks can increase the risk); we will need fewer students in each class or larger classrooms; or, possibly a more innovative approach to education during a pandemic (I will list a few solutions below).</p> <p>To do this, we need time. To reopen safely, we need time. To change course for effective remote learning, which it seems inevitable we will have to do again at some point in the future, we need time.</p>
7/21/2020 9:55:58	Mendy	Hutson	Olathe School District -	Lawrence, KS	As a teacher, of course I worry about my students’ safety AND how any disruptions or loss of instruction will impact
7/21/2020 9:56:09	Emily	Coello		2522 N Greenleaf Ct/ W	<p>I am disappointed and appalled by the governor’s EO. Covid cases are being treated as eventual deaths and that treatment is driving major decisions which impact millions of people (children and working adults). School should not be delayed nor should masks be required. There is no science proving masks work. People are wearing dirty masks which in fact jeopardizes their own health. All of the mitigation measures are based on emotion and fear. Not science. This is alarming. Please overturn school delay and mask EOs.</p>
7/21/2020 9:56:13	Jacqueline	Murray	Wichita Public Schools	Wichita	As an educator , I want to go back after Labor Day if it’s safe. I want our school system to carefully think of the safety of parents, staff and Students. I am a senior citizen with NO underlying medical conditions . I am healthy and want to stay healthy. As with kindergarteners all day long, I don’t see how 5 year olds can keep masks on. I just want EVERYONE to be SAFE. Thank you
7/21/2020 9:56:14	Sheila	Ramsey	N/a	Parsons	My husband and I both support Gov Kelly’s decision about schools. We have children teaching in and grandchildren attending schools. No child’s life is worth chancing. A delay won’t kill us - this Covid very well might!!
7/21/2020 9:56:17	Lora	Stanley		Bennington	Please REJECT Governor Kelly's order to close schools until after Labor Day. Kansans need to get back to work, school, and regular activities. Our Constitutional Rights are being taken away by a governor that is overstepping her duties. So much was taken away from kids and families in the spring and students need to be back in the classroom and learning from a real-life teacher!

7/21/2020 9:56:20	Jessica	Anders		Wichita	I do NOT support the delayed start of schools. These kids have been out of school since March. It is time to allow them to go back!!! Not going to school is far more harmful than this virus.
7/21/2020 9:56:22	Erin	Pfannenstiel	Deerfield Elementary pa	Lawrence KS	We are not ready to open back up yet. The disruption which will occur from opening up and then closing again every single time there's an active infection occurring at the school will be more detrimental than just committing to distanced learning right now. Keeping our children safe should be a top priority (as well as keeping sensitive family members safe and not bringing the virus back home from school). Please consider moving towards distanced learning for our children this year.
7/21/2020 9:56:27	Gail	Woodward		St. John	Start AFTER Labor Day. Give schools time to figure out howto handle this. Give them resources to deal with the extra expenditures that will be incurred in order to manage social distancing, masks, sanitizing, etc., and give parents the choice to keep kids home to do virtual learning if there will be a parent or guardian present in the home with the students. A few more weeks of preparation and good decision making can help tremendously to set up schools for success instead of chaos and failure.
7/21/2020 9:56:30	Julie	Martell		Lawrence	Please delay the start the start of school until after Labor Day. We need this time to flatten the curve and solidify a plan for the safest way to bring children back to school.
7/21/2020 9:56:31	Debra	Moss		Pratt	Definitely in favor of the delayed start.
7/21/2020 9:56:31	Robert	Sawyer	None	Hutchinson	I don't understand why a delay of three weeks to provide some level of safety to students and staff is such a big deal. If the delay could potentially prevent illness and death, why not take the side of caution? I do understand that the students need to have stability returned to their lives too. Will illness, absences, and death provide that stability? I would not be in favor of a further delay. We do need to get back to some sense of normal. My sister is a teacher in Yates Center. She is ready to go back to classwork now. I have other friends that are educators that are looking at safety. The opinion on what you, as the board, should do is evenly split with my contacts. In closing, I will say that for you as a group, no matter what decision you make it will be the wrong one for a large portion of the state's voters. You are wrong already to someone. Only time will be the actual judge on the correct course of action.
7/21/2020 9:56:41	Jill	Thorne	I am a parent	Effingham, attends scho	Let them go back. You are only delaying the inevitable and causing our students even more delay.
7/21/2020 9:56:54	Michelle	Whitesell	Concerned Parent	Marysville, KS	Comment removed due to profanity
7/21/2020 9:57:03	Julie	Anderson		Goddard	Please delay opening schools for 20-21
7/21/2020 9:57:09	Tara	Zelvy	parent in USD497	Lawrence	I'm a parent and a teacher. Luckily, I took a virtual teaching job last April, but I still have concerns for my children who attend brick and mortar schooling, and all of my dear friends who are staff in schools. I do not want schools to open in August. It is not safe. Schools do not have the money to support safety protocols and more importantly, teachers do not have the support from admin and district to enforce necessary safety guidelines. I've been a middle school teacher for 20 years and have seen a significant slide in respect for building and classroom policies. I fear students will not wear masks and keep distance, and teachers will engage in losing battles. Teachers are not babysitters. They are not daycare providers so parents can continue working from home.
7/21/2020 9:57:13	Carah	Emory	Student in USD437	Topeka	Please close schools. Or support Governor Kelly's executive orders to delay achool with strict precautions for students attending. My child's life is not expendable, nor are the lives of any of the teachers, staff or students AND their families.
7/21/2020 9:57:15	Laurel	Farney		Butler Co.	Stay out of Private School business!!
7/21/2020 9:57:17	Katrina	Crites		Olathe	While I want my freshman to go to school after labor day, I'm very concerned there is not enough being done to protect the students and teachers. In my opinion, there should be plexiglass separating student desks.  I also believe the school days should be shortened and only core classes taught during the pandemic (science, math, english, social studies) and electives can resume once this nightmare is over.
7/21/2020 9:57:22	Lynn	Tatlock	None	Wichita	That said, I appreciate everything that you've done to work on this monumental issue.  I support Governor Kelly's decision to delay the start of school until after Labor Day. It would be irresponsible to do anything else. Do not put your political aspirations on the backs of innocent children, teachers and school personnel.

7/21/2020 9:57:24	Krishima	Holley	Parent	Wichita	In order to keep the students and teachers safe please allow some more time to prepare for when school resumes. This situation is new for everyone so the additional time delay may help with that.
7/21/2020 9:57:26	Jordan	Stelter	Teacher	Overland Park	I think delaying the start of school is essential to getting our buildings and staff prepared for this upcoming school year. There are so many unknowns at this time. As an educator, I feel very behind schedule as far as preparing my classroom and lessons because of all the uncertainty. I know that there is a push to have in-person classes again, but why? I think it's insane that we are going back to in-person classes when we shut down schools with far fewer casualties, but if we are going to return, school staff need time to properly prepare. When classes were shut down teachers had to quickly throw together adjustments and the students and teachers suffered. Many of the people that have an issue with this order are concerned for child care reasons, not education reasons. Schools are meant to educate, not babysit. If we rush into this school year the education that so many see as necessary at this time will be below average and thrown together leading to stress from teachers and students. Teachers are expected to do the impossible every day with little pay. Give teachers the time to properly prepare for this unique school year by delaying the start of school.
7/21/2020 9:57:32	Catherine	Tinsley	Shawnee Mission	Shawnee	Please delay the opening of schools.
7/21/2020 9:57:32	Rebecca	Sutterby		Uniontown	Nearly all of the county fairs in Southeast Kansas are proceeding as normal. While masks are encouraged, very few persons are wearing them (Maybe around 1 in 50 persons). Please watch for spikes in COVID-positive persons after the county fairs. That should tell you a great deal about the dangers our students may or may not face. We HAVE to get back to normal as soon as humanly possible. The emotional strain on our students, especially the athletes, is immense.
7/21/2020 9:57:39	Mary-Ashley	Thies	Shawnee Mission School	Lenexa, KS	Please approve the executive order. We are in NO place to go back to school before Labor Day. Please think of the teachers, staff, and students.
7/21/2020 9:57:46	Jerry	Hunsaker	Teaching	Wellsville	I understand that we are uncertain times and we need to be aware of what's is going on. However, as a teacher I fully believe that right now what is best for our kids is to get back into school as soon as possible, not even so much for the learning portion of it but for the social and emotional part of their lively hood. So please do not accept the recommendation of starting schools after Labor Day.
7/21/2020 9:57:50	Kristina	Burmeister	Family	Fairway	I am a resident of Fairway, Kansas, and send my children to St. Ann Catholic School in Prairie Village. I am writing to ask that you reject Governor Kelly's Order to delay the start of school till early September. Although my heart breaks for all children and believe all schools should open in a timely fashion in August, at a minimum this Order should not apply to private schools. St. Ann, for example, has small class sizes and was prepared to open in August. St. Ann should be able to decide for itself if it needs more "time" to plan as Governor Kelly baselessly assumes is necessary for all schools. Governor Kelly should not arbitrarily overturn St. Ann's plans.  I understand this is a difficult decision, but if we are putting our kids first – and that is what we should be doing, this isn't a close call. Kids need to be in school. Remote learning is a disaster, and they need to see their friends. The teachers can find a way to keep themselves "safe." I use the term "safe" loosely because, if you look at the statistics, anyone under 60 is not at high risk. Johnson County has a population of over 600,000 people, and two (2!) people under 60 have died of Covid-19. I suspect more people under 60 have been murdered, drowned, died in car accidents, etc. This risk pales in comparison to the developmental damage caused by preventing kids from going to school.  Thank you for your consideration.
7/21/2020 9:57:53	Stephanie	Kohlhoff		Wichita	Please uphold the Governor's order to delay schools. I have a 2nd grader in USD259.
7/21/2020 9:57:56	Dan	Dickgrafe	Myself	Wichita	I support delaying the start of K-12 school programs until medical authorities deem it safe to do so. Even if young children are less susceptible to serious illness from becoming infected with the COVID-19 virus, they are still likely to be uncontrolled carriers of the virus. I believe they could cause and even more dangerous community spread than we are already experiencing in Kansas. I recognize the economic and political consequences of this decision, however I still feel that the public health is far more important. Thank you.

7/21/2020 9:58:06	Kelly	Robbins	Parent	Topeka	I fear this delay will be followed by further delays. Schools have had 4 months to get used to the new ideas of masks and distancing. I think any further delays further jeopardize children. When I was asked to close my business it was supposed to be for 2 weeks and turned into 8. Please don't let that happen to my 7 year old son.
7/21/2020 9:58:07	Renai	Pierson	USD 293	Collyer,KS	I am opposed to students wearing face masks in school, I have no issue with daily temp checks, proper hand washing, or starting School after Labor Day.
7/21/2020 9:58:13	Rachel	Perkins		I live in Roeland Park ar	I am in favor of the governor's mandate. I have a health condition that puts me at a higher risk of getting sick and being hospitalized if I contract the virus. I am worried about rushing back into school without proper precautions in place. Right now I am able to socially distance myself and protect my health. Forcing me back into a classroom filled with students would put me at a much higher risk. I understand that students are in need of social and emotional learning that schools provide but does that mean that I have to put my health on the line when we could teach online. When the pandemic started lots of preventative action was promised by our district but none of that actually happened. How can I trust that this time the preventative action will actually be in place. The online teaching we did in the Spring was not mandatory or very challenging. I think that we can improve upon this and provide a good education for our students if we are able to hold them accountable. Corporate offices are not forcing at risk employees back to work but it seems like schools will be. How is that right? How many teachers or parents or grandparents might contract the virus if we reopen?
7/21/2020 9:58:18	William	Hageman		Manhattan	I support the delay in school start date.
7/21/2020 9:58:21	Karl	Parbs	wyandotte hs	olathe	please support EO 20-58 to delay the opening of the school year.
7/21/2020 9:58:21	Veronica	Fernandez	N/a	Kansas	Yo como madre de 7 niños la salud es primero pero si puedo decir que hay niños realmente afectados por no socializar como en uno de el caso de los míos se le ha diagnosticado depresión y también en el caso de mi hija con dferent needs Ella no puede aprender por medio de l online.entonces realmente es individual hay niños que necesitan estar en rutinas y mi opinión sería que se les dé prioridad a los niños más vulnerables y los demás pueden regresar a clase después y do online
7/21/2020 9:58:22	Catherine	Bowen		Manhattan	Please support the Governors Order to keep schools closed until September. Give communities time for covid 19 cases to reduce and time for school districts to prepare. Keep the safety of students and staff first. Thank you
7/21/2020 9:58:30	Sheila	Hessman		Dodge City	I prefer to start after Labor Day, as a teacher , I want time to prepare my room, my lessons, and myself for going back to the unknown of what might happen. I need more training on google classroom to be ready to teach remotely if needed.
7/21/2020 9:58:37	Saint George	Saint George	Saint George	Saint George	Please support the executive order to postpone school re-opening until after Labor Day. We are counting on our elected officials to make the right decision and err on the side of caution to protect our children and the thousands of employees of the Kansas Public School System. Thank you!
7/21/2020 9:58:58	Katrine	Copeland		Spring Hill	Delay schools opening until after Labor Day
7/21/2020 9:59:03	Ruth	Cathcart-Rake	None	Salina	We are facing an unprecedented health crisis. Governor Kelly's recommendations make sense! Please support her! Thanks.
7/21/2020 9:59:09	Marci	Wink	Olathe Schools	Olathe	Please vote yes on the executive order so teachers have the time to be trained on remote learning tools, prepare their room for social distancing and be trained on cleaning requirements. It will also give the district time to find current PPE for the staff. Believe me I want to get back to work but not at the expense of my health, my family's or a student's health.
7/21/2020 9:59:23	Diane	Jourdan	Maize	Wichita	I support Gov Kelly
7/21/2020 9:59:31	Valerie	Johnson	Teacher for Northwest K	Monument, KS	We NEED to be back in school. I am all for washing hands and using hand sanitizer more frequently and taking temperatures before school and perhaps during the school day. I am NOT in favor of wearing masks. I don't feel like they are safe to wear all day long day after day. Our kids need to be involved in school activities also. We need school and activities for our youth to help kids become adults that can contribute, and who are well-rounded and productive citizens. Being out of school, social-distancing, and masks I feel are by far more detrimental to our kids than Covid-19. We can't live in fear. Could parents sign waivers saying that they understand the possible dangers and that the schools will not be held responsible? We need to be back in school preferably without masks.

7/21/2020 9:59:35	Renee	Bowman	USD 368	Paola	I appreciate the work Governor Kelly has done through all of this. As an elementary teacher, I want so badly to be back in the classroom. However, I don't feel that is safe at this point. I have yet to be in large groups, closer than 6ft, and I always wear my mask. It scares me to send my own children into a classroom where germs are so easily spread. I also know that parents will send their kids to school even if they are sick or have been exposed. Teachers won't be able to find subs if they need to stay home due to symptoms or exposure.
7/21/2020 9:59:35	Matt	Wray	Berean Academy	Newton	This goes against our constitutional rights and is not ok. The only acceptable learning is face to face for our kids. They need social interaction. We are not ok with the late start or the wearing of masks for kids in school! There is no good result from breathing your own co2 all day! This is playing a risky experiment with our children.
7/21/2020 9:59:44	Jeff	Cunningham	USD 506	Altamont	I support Governor Kelly.
7/21/2020 9:59:48	Ashley	Smith		Wichita but Goddard Sc	Please push back the start of schools so hopefully when they can go back it is safe for them and not have to have mask
7/21/2020 9:59:52	Amanda	Busenitz	Mother of school age ch	Towanda	Please vote no on the governor's order to delay school. Myself along with many parents find it unnecessary to delay schools for the year
7/21/2020 9:59:59	Michelle	Maynes		Overland Park/Spring H	Thank you for taking the time to read these comments about this very important issue. I know you all have a tough decision ahead of you, and one I know you won't take lightly.  Please uphold Gov Kelly's order to delay the start of school until after Labor Day. For many reasons but to give teachers like myself, a 16 year veteran, time to prepare the safest, best learning environment for my high school students. Not only that, data and information are rapidly changing right now and to give us a delay would give us more time to consider the most recent data out there in regards to the impact of kids and teachers in opening schools.  Doing the right thing isn't easy, but please consider making this decision to uphold the order which is the safest (and right) decision to make for KS.
7/21/2020 9:59:59	Emma	Coad	student of olathe school	lenexa	Thank you for your service and your time. I would like to attend school in person this fall. students that don't want to attended in person should stay home!
7/21/2020 10:00:16	Athena	Wainscott	Parent of 3 blue valley s	Leawood	It is completely irresponsible to send kids into a confined populated setting until this virus is under control. Children CAN die, they 100% are spreaders, and sending them back is a risk to every teacher, staff member, parent and human they come into contact with. No in person school. We ALL would like to get back to normal eventually.
7/21/2020 10:00:21	Robert	Pulcini	Blue Valley School Dist	Overland Park	I love what I do. Not being present in school for the last 5 months has been tough. However, delaying the start of the school year will give us time to communicate, collaborate, and plan effectively for when students return to school in-person. They see us as leaders who keep them safe, so let's continue doing so.
7/21/2020 10:00:22	Kelsey	Crawford		Lawrence	Please look at options that would allow students with IEP's to receive in school instruction, while other students receive instruction remotely.
7/21/2020 10:00:36	Craig	Lindeman		Wichita	I support Governor Kelly's executive order to delay the start of school if students are expected to spend any time in the classroom.
7/21/2020 10:00:39	Sara	Rapp	USD 383 (teacher)	Manhattan	With cases continually rising, the delayed start of school will help districts adequately plan and prepare (allowing for the importance of detailed plans and opportunities to run through them before students are present) as well as communities implement good health practices to slow the spread.
7/21/2020 10:00:40	Carter	Coad	Student in Olathe USD	Lenexa	Please let me attend school IN PERSON this fall. I am in 7th grade at PRT
7/21/2020 10:00:51	Emily	Toyne		Spring Hill	Wait until sept to get this under control!

7/21/2020 10:00:58	Melissa	Walker	Ashland usd220	Ashland Clark	We are a very small school. We have had very small numbers for COVID. 4 cases and all have recovered. I do not believe we should be compared to the big school district. We are totally different. I do not want to send my kids to school all day in a mask. They will end up touching their face more than when they do not wear one and it's not healthy to breathe on your own CO2 all day. Please reconsider this. Also in regards to sports please understand how important this is for kids. There are some and mine even included that live for that and that motivates them to get good grades and get their work done. You take that away and it takes away so much from them. It should be up to each district to decide what's best for each school because we are all different. So there shouldn't be a reason why we can't start school on time with normal activities. Thank you for your time
7/21/2020 10:00:59	Bradley	Thomas		Lansing KS	I feel that with all of the recommendations and requirements, it is best to give the school districts the time to create a fully developed plan. And not something that is put together in less than a month.
7/21/2020 10:01:05	Tresa	Boden		Gardner	As a parent of a senior this year I want my daughter in school. Not only does she need to be in school, she needs to be running cross country as she is being recruited by colleges. She so wants to go back to school for social, emotional, and physical stimulation. I highly recommend you read and look into the American Academy of Pediatrics on their recommendations on children returning to school. I am a nurse working in this mess and I strongly recommend kids go back to in person learning with extra curricular activities in place. Thank you
7/21/2020 10:01:05	Summer	McClure	McClure	Manhattan	Please delay
7/21/2020 10:01:07	Cindy	Parker		Vassar	I urge you all to vote in support of Governor Kelly's executive order regarding keeping school facilities closed until after Labor Day. This extra time will be vital to school districts and will provide much-needed time for professional development to ensure a positive public school experience, ample learning opportunities, as well as plans to address equity for the different phases of learning that may happen this school year.  School admins only recently received the lengthy document, Navigating Change, from KSDE and need time to explore it and pass it along to their educators and other staff personnel. It is a lot of information to digest especially when combined with everything else that is being required of our educators and admin.  Please, do what's right for Kansas schools, students, and educators and vote in support of Governor Kelly's executive order.
7/21/2020 10:01:09	Sherana	Becenti	USD 497	Lawrence	Schools should stay shut down until there are no new cases of COVID-19 for two weeks.
7/21/2020 10:01:10	Debbie	May	Retired a Teacher now	Olathe	I can share as a retired teacher, current substitute and grandmother. I am so concerned for my grandchildren and the students who I love and care about. Please do not start in person classes during a pandemic! I taught in a high poverty area. Parents cannot afford to pay high health care bills in the event someone in their family gets ill. Teachers cannot afford to stay home and quarantine if they are exposed with only 10 days sick leave. I have decided that I will not substitute until this pandemic is over. Most retired teachers that I know will not. I believe there will be a severe shortage of substitutes this year. There was a shortage anyway. When there is no substitute teachers have to cover for their colleagues. This sometimes has them dealing with 35 or more students in a classroom. How can that happen during a pandemic? Please, please for the safety of those I love delay in person classes in public school this year! I am so worried.
7/21/2020 10:01:16	Carla	Reynolds	Teacher	Andover	Follow the governor's mandates please!! Delay school opening!!
7/21/2020 10:01:17	Bailey	Weaver		Topeka	Delay schools opening, please and thank you! Schools need more time to get supplies and get prepared.
7/21/2020 10:01:28	Emma	Coad	student of olathe school	Lenexa	I would like to attend school in person this fall. Students that don't want to attend in person should stay home!
7/21/2020 10:01:30	Angela	Fabrycky	Meadow View Grade School	Parsons	Please vote YES for the delayed start of school until after Labor Day.

7/21/2020 10:01:32	Jennifer	Simmons		Leavenworth	<p>As a special education teacher I urge you to uphold the governor's order for delaying the start of school. I understand the need for schools to be open and I want to return to school but I want to ensure it's done in a way that is safe and also meets the needs of all students.</p> <p>Every district and building within a district is different. Staff need time to plan and work together to review the document released by the state to plan for what that looks like in their individual buildings. We also need time to ensure that we have adequate supplies in each classroom to clean and sanitize according to the guidelines.</p> <p>There are so many unanswered questions in regards about what happens if a teacher has to quarantine, a student has to quarantine, how to handle students who show up sick and parents don't come to pick them up, etc.</p> <p>I want to be in the classroom and I wouldn't mind extending the year or shortening breaks throughout the year to make up for the lost instructional time. We need the time to prepare to truly meet student needs with all the changes that are recommended.</p> <p>Please support the governor's order.</p>
7/21/2020 10:01:32	Jenni	Pelland		Pratt	<p>Our district has a good plan ready and I'm disappointed this is becoming a one size fits all plan. It makes no sense to me. I am an educator at the Middle School and I'm ready to do whatever it takes to get our kids back in school. These kids and families are suffering we have already been hugely concerned with the mental health issues on the rise before the pandemic I can't even begin to understand what we will be dealing with now. At the very least we should continue the activities (weights, sports practices, band, theater, etc...) with the precautions we have been using until the possible September start date. These kids need some sense of hope and it is proven that physical activity or even belonging to a group with a purpose increases well being. I am praying for you and our government to come to a joint decision. Thank you so much for your service and your dedication to education. I love my job! Thank you also for a way for the public to communicate with you! These are hard times but I rest on the hope of Jesus Christ and I pray that no matter what you find that hope as well. God bless and rest assured you are serving a group that no matter what will work for the good of their students and their community!</p>
7/21/2020 10:01:34	Kimberly	Neises	USD 497, my family	Lawrence	<p>I am a school teacher and mother. I strongly encourage the BOE to uphold Governor Kelly's order to delay the start of KS schools until after Labor Day. The logistics of meeting the needs of staff and students for in person learning is a huge challenge. Districts and teachers need time to figure out how to implement safety measures. Hopefully the extra weeks will also allow cases to decrease with the added mask mandates. Please support teachers, staff, students, and our families by supporting this order. Thank you for your time and service.</p>
7/21/2020 10:01:38	Megan	Merrill	teacher	Kansas City	<p>I would prefer to delay school until after Labor Day. During those 3 weeks, all of us would have time to see what will happen next with COVID-19 cases in our area and make a more informed decision about what to do next. Additionally, school districts could use that time to train teachers (via Zoom) on the necessary changes for either in person teaching, online, or hybrid.</p>
7/21/2020 10:01:51	Jessica	Wilhelm	Teacher and Parent	Shawnee	<p>Please delay the start of school. It is not safe to have students or teachers return to the buildings in Johnson County.</p>
7/21/2020 10:02:01	Melissa	Wrecke		Olathe	<p>As a teacher, I don't have a choice on whether or not I can keep my children home. I have a daughter with severe allergies and I'm terrified to have her in the school building. With the enormous class sizes now, how can we keep our kids and staff safe? If we lose ONE KID or ONE TEACHER to this...it's too many. Yes, this is not ideal; however, this is not forever. It is a time to teach our children (and ourselves) how to be resilient and patient.</p> <p>I 100% want to teach and work, but not sure it is safe to do in person. I respect Governor Kelly and know she truly is trying to keep everyone safe. If we start before Labor Day, I do not believe it is safe to put us all back in the physical school building. There are too many moving pieces to all of this...</p>
7/21/2020 10:02:09	Jason	Cook		Colby	<p>Not all areas of Kansas are the same. The kids need to be in school for their psychological health as well as social learning. Not all areas of Kansas look the same population wise and the decision about what's best for each school district should be allowed to be decided by each individual district and not made by the governor. The demographics are much different west of Salina than it is east of Salina.</p>
7/21/2020 10:02:24	Melanie	Turner	Parent	Derby	<p>Using proper PPE, Kansas school children should be able to start school in August. I see no benefit in waiting until after Labor Day.</p>

7/21/2020 10:02:34	Joann	Westbrook	None	Valley Falls	First, thank you for opening this to public opinion! These children need to go back to school. So many of them are already so far behind due to the spring semester; postponing school for two to three more weeks will only put them further behind. Not only that, it would force them to go until the middle of June of next year, leaving them with only six weeks for summer break. The consideration to give schools that extra time to come up with a plan and supplies is understandable, but at what cost to the students? Administrators have been closely monitoring the situation since the start, and have been brainstorming and planning with each new change that arises. If they won't be ready in mid-August, how will that extra time make much of a difference? Our children are falling behind, and will continue to do so if we don't take action. Even the straight A students are struggling right now, not to mention those who rely on the school systems for special needs to be met. If the executive decision must be made to keep the buildings closed a little longer, then at the very least let's get the educational materials home to the families again so that we can start the year on time and join the in-person classroom when possible.
7/21/2020 10:02:42	Katie	Jackson		Manhattan	Please allow schools to open before September 8. We support the Governor's order 20-59 to wear masks, social distance, and more to keep schools as healthy as possible. Our school district is offering the option for in-person or remote learning, so parents have the choice not to send their kids in person. Our children learn better in-person, and one has an IEP and is falling way behind his peers due to lack of services that can't be reproduced remotely. It also seems inevitable that schools will close during the winter, making it more critical now to get in as much in-person instruction as possible before closure.
7/21/2020 10:02:45	Christine	Durrett		Manhattan	There is absolutely no reason for a state-wide pushback on the school start date. There are many counties with low virus activity that could safely start in person now. Also, there is no reason that schools could not start virtually, and many are likely to be ready to do so. I do not understand the stated reason that schools need time to prepare, because the schools have been aware of COVID since March and they have had all summer to prepare; I cannot imagine there is any school district that is just starting their COVID plans right now. Many children had limited quality instruction from March to the end of the school year given the short notice on which school closed, and pushing back the start of school by three weeks will only put them further behind educationally. The decision on when and how to start instruction is a decision best left to local school districts.
7/21/2020 10:02:51	Stephanie	Bolay		Maize	school should start on time as schedule
7/21/2020 10:02:58	Teralyn	Cohn	Public school	Sedgwick	I support both the delay and a hybrid return. As a high risk person who loves to teach, please don't put me under a threat to my health in order to pay my bills.
7/21/2020 10:03:06	Keshia	Rogers	Goddard USD 265	Goddard, KS	I agree with delaying school. Keep our kids safe!
7/21/2020 10:03:13	Adrian	Zelvy	Parent	Lawrence	I am in favor of delaying school until September.
7/21/2020 10:03:18	Tiffany	Kargbo	USD 259 teacher and parent	Wichita	School needs to be completely virtual until there is a vaccine and cases are way down and stay down for several weeks.
7/21/2020 10:03:19	Penny	Dorado	Myself	Newton	I urge you to follow Governor Kelly's executive order to delay academic instruction, athletic practices AND the opening of schools until after Labor Day. This is not about politics. This is about the health of our community and state.
7/21/2020 10:03:22	Jennifer	Svaty	Central Kansas cooperative	Kanopolis, but work in s	I do believe that the school board should approve the delay to the start of school, but more to provide teachers a chance to plan and prepare to provide academic instruction virtually that is on par with the rigor that will be provided face to face. Our teachers deserve time to do what they do best.... to teach children. Throwing together a new mode of teaching in a few days is not good for our students, their families, or our valuable educators. In addition, it would give precious time for special educators (speech-language pathologist here) to identify how we can best serve our students with special needs in a way that keeps us both safe. Please accept the executive order.
7/21/2020 10:03:25	Kara	Thomas	Parent	Shawnee	I think delaying instruction in any format hinders our students. If districts are ready to perform virtual instruction, we shouldn't stop that. I also think that sports conditioning should be allowed to continue. The students and coaches are practicing safely. This is good for the physical health of our students. It also helps their mental health by allowing them to see their peers in a way that is safe.
7/21/2020 10:03:27	Taylor	Hartzell		Salina	Please follow Gov Kelly's order to keep schools closed. Keep our children safe.
7/21/2020 10:03:32	Ashley	Coyle		Olathe	There is not any data stating the schools will be a major source for an outbreak. The protective measures in place now that allow restaurants, retail business, etc. should be enough to keep our children safe. Our children obtaining an education is equally as important as the livelihood of our businesses.

7/21/2020 10:03:33	Todd	Gruber		Olathe	I think that we should not have a delay in the school year statewide. Schools should open according to their county health recommendations. If there are high number of cases in one county, they should consider a delay. If a county has a low number of cases, there is no need for delays. I also think it is ridiculous that our governor thinks she can wave a magic wand, send out an executive order, and the whole state has to abide by what she says. The people of Kansas have rights.
7/21/2020 10:03:37	Shane	Harden	Usd 266 patron	Wichita	I feel this is trying a one size fits all and should be left up to individual districts. Prefer school to start normally.
7/21/2020 10:03:44	Dana	Hanley		Overland Park Kansas	Keep the schools closed and let us go remotely u til numbers here go down
7/21/2020 10:03:51	Vikci	Graham	Parent and Grandparent	Prairie Village	Please be the adult and tell parents that school cannot safely open. There are not enough supplies to protect teachers and students. Please tell the people that want you to open, their children are not behind the whole world is behind. As retired; my husband and I would like to be traveling, having dinner out with friends but we're not. It can't be safely done. We're behind what we hoped our life might look like. The school building are old most in the 50 year range the air is already moldy, now covid, my husband did ventilations for buildings, KU, KSU, he says the only safe air is in laboratories and especially not old buildings.  I went to my urology as he is admiring my mask he then tells me in his practices outside KC he can't get his patients to wear mask. This is a doctor people need, he can't get patients to wear mask, it didn't give me hope children and their parents will be cooperative, actually it didn't give me confidence in him.  We are in the SME area you obviously know of the outbreak in their conditioning program if you drove past today you would see kids sitting on the concrete stairs shoulder to shoulder. Teachers, parents, and students, not safe. There is speculation that herd immunity doesn't work, all those students that already had Covid could get it again. Everyone wants their old life back, so do we!  The reason I write I have adult children that teach in Olathe, I have a granddaughter that should be a 1st grader in SM, there is also a preschooler we are the backup for everyone. If the parents die, get sick we're the backup, drama you say, yes, a lot of drama we thought we could avoid by being careful.  Please just take the safe road Governor Kelly has proven wise, Kansas has been a leader in education let's do it again. If covid goes magically alway everyone goes back to school, nobody is suffering with lingering health issues. We will again say Kansas was looking at the future. I can tell our adult LA family see Kansas is more progressive than you give us credit for. Good, safe public schools. Thank you, especially if you read to the end.
7/21/2020 10:03:53	Dawnita	Westover		Wichita	Against returning to school this school year. Voting for online schools or homeschool. I have 5 boys, no way are they going to keep masks on or follow strict distance rules.
7/21/2020 10:03:57	Bryan	Garrison	Southwestern Height	Kismet	I believe the mandate is a power trip. However putting off the start of school may be positive. I know there are teachers that are scared. When it starts if there is a spike everything will be shut back down, which I believe would be traumatic for students. Teachers, students, and parents don't need anymore stress due to this epidemic.
7/21/2020 10:03:58	Megan	Winter	Blue Valley School Dist	Overland Park	I feel having school online is not only the safest choice for our students and staff, but also the community at large and will ultimately prevent this virus spreading even further and preventing an economic shut down. As humans, safety should be our number one priority and although this is certainly not the optimal solution, it is the only solution to continue to do what is best for our communities.
7/21/2020 10:04:01	Gina	Tireman		Olathe	Please keep the governor's executive order in place
7/21/2020 10:04:10	Daniel	Dinkel	KS Citizen	Junction City	I encourage you to support Governor Kelly's executive order delaying the start of school. Our children are too valuable to hastily open schools. Let's make sure teachers have the time and resources needed to open schools correctly.
7/21/2020 10:04:12	Celine	Coppaken		Prairie village	I agree that schools should open after Labor Day, and some version of having kids in classrooms either full time or part time.
7/21/2020 10:04:12	Anne	Parrott	Parent	Overland park	Stay home. Provide childcare for those who need it if possible.

7/21/2020 10:04:12	Jeana	Johnson	USD 450	Tecumseh	I think the executive order should be upheld. Our cases are extremely high and will continue to grow if we do in-person school. I also think requiring student attendance to be delayed will give teachers more time to prepare and learn the new schedules and how to teach online more effectively. As a teacher I am begging you to uphold this order for the health and safety of me and my colleagues as well as our families and students.
7/21/2020 10:04:18	Katie	Coldham		Lawrence	Governor Kelly is looking out for the best interest of Kansans, during this unprecedented public health crisis. With the spike in COVID-19 cases, we must protect our citizens.  Top experts and scientists agree we must actively take steps to prevent the spread. It's sad that a WORLDWIDE, public health crisis has been politicized. This virus does not discriminate based on political affiliation.  It would be irresponsible to start school before Labor Day, given the situation. We must protect our children, educators, and those they come in contact with. I urge you to support the Governor's mandate in delaying the return to school.
7/21/2020 10:04:29	Joshua	Oppenheim	Parent	Manhattan	I support governor Kelley's decision to delay school. We've seen what happens when we can't social distance well. Schools and towns will become completely overrun more so than they did with beaches opening. Studies indicate students 10+ older can spread just like adults. Disruption by opening and then closing is a terrible cost to productivity. Plan for online teaching/learning execute well - and things will get back to normal soon.
7/21/2020 10:04:44	Crystal	mcgee	usd 379	Clay Center ks	I do not feel its safe for our children or faculty members with our numbers going up
7/21/2020 10:04:33	Mark	Gering	Prairie Creek Elementary	Olathe	Please look at the data - we are hurting our kids education, social skills, and well being by keeping them out of school. The data suggest this is political drivel. If our kids can not depend on adults to make the best decision for them and their future, who do they turn to? Please look at the data of age groups and the infection rates, and do the right thing.
7/21/2020 10:04:50	Lauren	Ingraham	Olathe teacher, SMSD p	Overland Park	Please affirm the governor's EO delaying school start until after Labor Day. Teachers and students do not feel safe returning normally while the virus continues to grow and spread all over Kansas. Please do what is right for all children and teachers, not just a few.
7/21/2020 10:04:52	Jessica	Busenitz		Wichita	When I read the reopening guidelines that this board approved last week I was impressed by both the thoroughness and implementability. This plan was well thought-out and correctly balanced the need for students to be in school with guidelines necessary to keep all parties safe. For the governor to decide to override this plan is an abuse of power. I urge the board to vote to resume schools on time with the guidelines in place that you voted on and approved last week.
7/21/2020 10:04:54	Brandi	Parizek		Shawnee	Due to Labor Day being a holiday weekend that can include large gathering of family and friends, I think it would be wise to delay school 14 days after Labor Day to see what the effect of those larger gatherings has on the KS positive COVID-19 numbers.  I also foresee numbers rising after thanksgiving and Christmas break as large family gatherings are a tradition with these holidays. Maybe consider virtual school for 14 days after these holidays.
7/21/2020 10:04:56	Clay	Mayer	Jefferson West USD 340	Ozawkie	I think kids need to get back prior to Labor Day. Delaying until after another major holiday weekend is just kicking the can down the road and avoids nothing. Our district has had a task force group planning for the return since June.

					<p>I am so grateful for you all and for Governor Kelly's leadership and commitment to keep the lives of all Kansans safe. We are in the middle of a pandemic unseen by most living people. I stand firmly behind her decision to postpone school opening and I further implore you to keep our teachers and staff members safety (along with all the children) in mind as you deliberate on the steps to move forward.</p> <p>I have two children with one in grade school in the district. We have several immuno-compromised family members. I would like to comfortably send my child to school in a normal setting, but since this is nothing like normal, I urge you to at the very least uphold masks or clear face shields in school when children and adults cannot be properly distanced. I also urge you to make hybrid and remote Class learning available to protect our children and teachers to the best of the schools ability, while still affording the children interaction with each other through remote instruction.</p> <p>I'm certain we can still bring the children a learning platform they can flourish in while maintaining their safety.</p> <p>Thank you for your time, Vivian Hamilton</p>
7/21/2020 10:05:19	Vivian	Hamilton	Shawnee mission School	Overland Park	
7/21/2020 10:05:19	Michael	Massey	USD 421	Lyndon	Open schools on time. Do not delay the opening. Thanks
7/21/2020 10:05:30	Anne	Martinez	Registered nurse and parent	Topeka	<p>I agree with delaying the start of school. We need to do all we can to keep students, teachers, staff and everyone's families safe. Please don't add to the burden of hospitals.</p> <p>That includes wearing masks and social distancing, cleaning. In counties where there are increased cases, distance learning should be supported.</p>
7/21/2020 10:05:30	Heather	Harris		Junction City	<p>My children need to get back to school. Even though it wont be the normal days we remember from before, MY children want to go back. My son has a learning disability and remote learning at the end of last year brought so many challenges for him. He cried after almost every morning Zoom meeting because it was over. He struggled with keeping up with what everyone else was learning because he did not recieve the extra attention from his para. His para sessions were ONCE a week and no teaching was done. It sas used to check in to see how he was feeling.</p> <p>My first graders teacher struggled with internet connndctions and was rarely on for Zoom meetings in the morning. This was not helpful as my child longed to even see her friends daily. It all made my first grader not want to do her work.</p> <p>I ended up making a homeschool type program that fit my children's needs, which in the end helped them academically but emotionally they struggled.</p> <p>I work in the school so I was struggling with them because I needed social interaction as well. Our school has done an amazing job on planning for next school year and we as staff feel we are ready. We were given guidlines and immediately went to work on plans. I understand not all schools may be like that HOWEVER, we were given the guidlines well before the public and well before things were "set in stone." USD 475 is prepared and all the work that has been done over the last few weeks has finally all come together. Our district meeting last night proved that to me and all the parents watching. We are ready! Yes there are small numbers enrolled for brick and mortar in our schools this ysear but THAT helps when social distancing. We've worked hard to get kids back in the buildings. Let us do this for the children! 3 extra weeks of summer vacation including a holiday weekend will hurt our numbers. Parents are already struggling and working long hours while kids are left home alone, I know this to be a fact. We will look for things to get themout of the house and even take trips during the holiday weekend. This will cause numbers to rise and schools to be delayed again or even shut down again. As staff members, please give us the opportunity to make our plans work. We have worked hard to get OUR kids back in the buildings. School may look different this year but have faith in district employees. Everything we do is always for the kids.</p>
7/21/2020 10:05:32	Katie	Cowan		Leawood	na

7/21/2020 10:05:38	Laura	Blanchard	Parent - Blanchard AE C	Lawrence	<p>I believe that sports are very important to the children in middle school and high school. The risks of outdoor activities are very small due to the fact that with the current humidity that we have, the particulate when exhaled or coughed grabs the moisture and become heavy and falls to the ground. This mitigates the risk.</p> <p>If classrooms were opened up to more outside air, that would also help. As an Engineer, I am working with clients to help mitigate their risks in buildings by lighting and the HVAC systems.</p> <p>As parents, we understand the risks with Covid, but there are also hidden risks with our teenagers That include depression, anger and not understanding why this is happening. Let us try to give our children something to focus on during this difficult time.</p>
7/21/2020 10:05:40	Colette	Graham	Usd 340	Meriden	<p>My concern with starting school is children and drivers having to wear A mask on a 100 degree bus. And the students And teachers having to wear a mask for 8 hours a day.</p>
7/21/2020 10:05:48	Kelley	Hull	Olathe School District	Olathe	<p>I am a Social Worker in the Olathe School District. I am speaking on behalf of the Social Emotional health of our students and my co-workers. I have a group of co-workers that have reached out to me consistently since this began in March. I would say that at the end of May they started to feel comfortable with the idea of starting school on time- but as the virus numbers continue to rise- I have seen the anxiety, depression, and overall concern increasing in the last few weeks. The mental health of our district employees is in a state of crisis. If the adults are overwhelmed, worried, and anxious...I'm not sure how they will be able to adequately teach and make students feel safe if they themselves don't feel safe. I'm not worried about returning but I am worried about how inconsistent the messages have been. Students do best with set expectations and structure. These seem to vary so greatly across the state...and I feel like each building in our district is going to vary in their response to the virus...as well as each teacher/classroom. I think decisions need to be made that can be implemented with consistency across the board.</p>
7/21/2020 10:05:48	Alana	Tubbs	Retired teacher	Colby	<p>All districts should not be given the same guidelines. Our district needs to open as normal with no delay, and NO MASKS!!</p>
7/21/2020 10:05:48	Gayle	Culbertson	Parent of child in school	Lawrence	<p>Please support our Governor in delaying school until it's safe. Please put our children first in all the safeguarding steps possible. Please, please put our children first. Thank you for your time and consideration.</p>
7/21/2020 10:05:55	Braydi	Hishmeh	I'm a teacher	Topeka	<p>I do NOT think we should delay the start of school. I am a teacher and I want to start in person teaching WITH my students in August. Please vote against Gov Kelly's order so that we can get our kids back in school! Teachers and school districts worked ALL summer on a document so that we will be ready for kids to return in August. We are ready, there is no need to delay.</p>
7/21/2020 10:05:58	Gina	Bickel		Overland Park	<p>Schools should not only be closed until Labor Day but until there are solid treatments and/or readily available vaccines in place. This is the ONLY way to protect our staff and students.</p>
7/21/2020 10:06:08	Suzanne	Enright	Parents of Students	Gray County - Cimarron	<p>Delaying the start of school is fine with me. I have other questions/concerns.</p> <p>Will days or weeks be shortened?</p> <p>Will attendance policies be eliminated during the school year?</p> <p>Will waivers be available to parents/students with a preference that face masks not be worn in the classroom behind desk barriers?</p> <p>Has there been any consideration of a longer Winter break to promote health and well being?</p>
7/21/2020 10:06:14	Holly	Decker	Myself?	Manhattan	<p>Please do not open schools until after Labor Day</p>
7/21/2020 10:06:16	Craig	Moss		Olathe	<p>Schools should have the option to, at a minimum, begin the school year virtually prior to September 8.</p>
7/21/2020 10:06:16	Megan	O'Brien	My family - 2 high scho	Lawrence	<p>PLEASE allow sports to continue for our athletes. Ours schools claim to care about social emotional development. If so, you MUST let sports continue. As educators, you KNOW this.</p> <p>Summer conditioning has gone really well and there is no reason to think it won't be the same for fall activities. This is the LOWEST risk group. Please don't let them suffer any more than they have. The risk of denying school and school-related activities FAR outweigh the risks. It's not even close.</p>

7/21/2020 10:06:28	Ashley	Kracht	Parent and healthcare worker	Marysville	I am so impressed with the steps Governor Kelly has taken to encourage good public health considerations with continuity across our state. I have been increasingly disappointed with local governments overturning her executive orders to make them literally no more than passing recommendation. I think it is extremely disrespectful (would these counteractions have been taken if it were a Republican male Governor who made the executive order? I doubt it), and a threat to all of us who are trying to make good public health choices where they are now frowned upon by the local leadership and local people. As a parent of two small children in the school system, and as a healthcare worker in a county where COVID cases are rising daily due to the lack of concern shown by the public/ local government, I hope the State School Board considers enforcing Gov. Kelly's mandate regarding reopening schools. I think an across-the-board delaying of school's start help my community and many others hopefully get to a place where we have decreasing cases, and allow our schools to make the necessary changes to how education will be delivered this year.
7/21/2020 10:06:27	Weston	Cook	Kansas teacher	Kansas City	Please vote to accept the Governor's executive order. Do not put our Kansas kids and teachers in jeopardy. The largest businesses in the US are working from home for the rest of 2020. The public sector should not be the soldiers of this battle.
7/21/2020 10:06:35	Jaimee	Berry	Self	Lenexa, ks	Please give the schools time to prepare and the city a chance to get the virus heading downward !
7/21/2020 10:06:36	Mariah	Sorensen		Pratt	As a school psychologist working for a special education cooperative in rural communities, I please ask that you support Governor Kelly's mandate to delay the start of the school year to after Labor Day. I serve 4 small districts and my husband is a high school math teacher, and for both of us, starting the school year in just a few weeks raises a lot of anxiety. We both strongly believe that our kids should be in the school buildings, but we NEED to make sure our students as well as colleagues are SAFE when we return. Right now we have been fortunate that our community has not experienced community spread, but we also have the highest number of active cases at the moment than we have had since COVID-19 became a concern. This is why the thought of returning to school in a few short weeks raises anxiety because we are seeing an increase in cases, and the general consensus from colleagues are that we do not feel safe to return to in-person instruction at this time. I greatly appreciate that Governor Kelly has been consulting experts, looking at the numbers, and has not been afraid to make the hard decisions despite consequences they may have for her future as a governor of Kansas. I fully support her decision to give districts a few more weeks of time to develop more thorough plans for the fall and ensuring the safety of their students and staff. I ask that you also continue to support her mandate as well. Thank you for your time and service.
7/21/2020 10:06:39	Stephanie	Schneickert	None	Americus	As much as I want and need my kids to be back at school, it's not worth putting their health and the health of our teachers, at risk. School should be delayed until at least Labor Day then phased back in slowly.
7/21/2020 10:06:41	Alex	Dandy	School	Olathe	I feel like delaying the school year is unnecessary seeing how we still have enough time to acquire all the needed equipment to keep our schools safe amidst the pending pandemic situation.
7/21/2020 10:06:44	Mary	Bain		Ness City	Please open the schools! You can surely come up with a workable plan that will benefit our children. They need to be back in the schools as soon as possible. They are the future of this nation.
7/21/2020 10:06:48	Denton	Murray	Americans	Topeka	Open up schools, businesses the deaths have declined since April and the counts have not been accurate. The testing is suspect and already admissions that it is not accurate. Protect Our Rights and Our Freedoms and let us worry about our health. This is nothing but politics.
7/21/2020 10:06:57	Michelle	Hitchings	Family	Manhattan	We support a later school start, let's do whatever's best for our teachers and staff but also the students!
7/21/2020 10:06:59	Karol	Bell		Holton	I feel that we should start school in August as planned. The students should not be required to wear masks. Staff and students who have health concerns should have the choice to wear a mask if they choose too.
7/21/2020 10:07:07	Josephine	Landes		Lawrence	I support schools not starting until after Labor Day or until covid 19 cases stop rising on a daily basis. Our schools have not have enough time to prepare for the precautions they need to take to safely reopen

7/21/2020 10:07:15	Lauren	Waltma	Blue Valley School Dist	Olathe	Delaying the start of schools is absolutely necessary. We need to not only be considering the safety of the children but the teachers, paras, nurses, administrators, janitors and more who work with children every day. We also need to be concerned that children will go home and bring the virus home to their parents and families. Even opening schools with a mask mandate will prove difficult if not impossible. Asking children to wear a mask for 7hrs a day effectively is not a realistic request. While teachers miss our students we need to keep as many people safe as possible and opening schools is not the way to do that
7/21/2020 10:07:15	Lori	Schmitt		Olathe	I am in favor of the delay. As cases rise in Johnson County, I think an extra few weeks to plan for the safety of our children in schools is a good thing. I have a high school student, and there are almost 2000 people in his school building every day for 7 hours a day. Younger children may be less likely to get bad cases of covid, but what about older high school age? And teachers and faculty are at risk, as are parents when their children come home. There must be good plans in place for in-person learning as well as online alternatives and contingency plans for outbreaks. The extra time will give everyone a chance to plan.
7/21/2020 10:07:15	Andie	Millaway		Overland Park-Olathe	When every medical professional on the planet tells us to wait, maybe we should wait. Let's not pretend we know better. There are subject matter experts for a reason. Let's be humble enough to listen and accept what they are telling us. I don't believe medical professionals are in the business of misleading an entire nation.
7/21/2020 10:07:16	Kellie	Cummins	USD 259	Derby	Please allow this order to pass so that we as teachers have enough time to prepare to return to school with proper safety measures in place.
7/21/2020 10:07:25	Stacy	Vandemark	USD 233	Olathe	I would ask that the 20-21 be delayed. This will allow time for the administration and teachers to create the safest and best plans for a successful school year.
7/21/2020 10:07:30	Derek	Newberry	Attica Schools	Attica	I understand the caution that the governor is trying to take. But our #1 priority as a state should be to limit what we do so we can get these kids back to school. Instead we are allowing everything else and delaying education. I was just at a basketball tournament with hundreds of people and only about half wearing mask. Why are we closing schools (which can be better controlled) and allowing this and everything else. I would be all for it if we knew this was it, this is gonna help, and there won't be anymore delays. But I also understood and was fine with the shut down and closures before, and now look where we are. Another point that is obvious is that not all districts are created equal. In my local district there is hardly any cases. Due to lower numbers, our students could darn near social distance even in the classroom. While I understand the issue and unfairness of some schools starting and some not, there has always been advantages and disadvantages that one size school has over the other and vice versa. I do plead that if you do vote for this, at least amend to allow practices for activities to start Aug. 31 with certain guidelines. That way at least the games can get started shortly after school starts and it will limit what is lost. Most kids only get to actually play a couple years (varsity) and if you take football as an example, there are only 9 games. So each game lost is a big deal. So lets limit that as much as possible. Personally, I feel activities should go on even if school is delayed. The numbers are much easier to control and its up to the families to decide if they want them to participate not have it taken away. We have to look at reality. The kids are together outside of school anyways. They are gonna spread it anyways. At least its easier to control in a school controlled team setting. We keep wanting to push the wagon down the road just hoping the vaccine will solve the issue. We don't know when that will be, We don't know if that will even be the case. We don't know if people will get reinfected after some time. We don't know if the virus will just mutate once we get a vaccine. We don't know if this is something we will deal with every year. Point is, we don't know. Lets not take away important years of our kids lives because of something we don't know. Lets take precautions, follow them, and set examples along the way that our kids will be thankful for. Thanks for listening. Derek
7/21/2020 10:07:28	Jerry	Phillips	Personal	Pratt	Re-open schools as normally scheduled.
7/21/2020 10:07:36	Kellie	Brittingham	Parent	Lawrence	Please allow sports practice to continue even if school start is pushed back!! Our kids need sports and it might be the only thing they have they summer to keep them active!!

7/21/2020 10:07:44	Tiffany	Mannes	TLM Childcare	Overland Park	We cannot open schools without proper safety measures for students and teachers. There must be plans in place so our children do not lose a year of learning! We need our leaders who've been elected by the majority to make decisions and then we need to follow those decisions.
7/21/2020 10:07:45	Mary	Rose		LIBERAL	I feel that the Board of Education should NOT approve Executive Order 20-59.  Executive Order 20-59 also states children to wear masks during school year 2020-2021. Yet, this IS an important decision that should be transferred to the county level with the open relationship of the Unified Districts in their jurisdiction. Each county has already placed well educated and knowledgeable people dealing with COVID-19 in their county. I also feel proposing to start after September 7, 2020 is not in the best interest of the children.
7/21/2020 10:07:57	Kristine	Schmucker		Moundridge	I support the delay in opening public schools in Kansas as outlined by Gov Kelly. I support the wearing of masks and other measures to protect our children and teachers when in person school resumes. I also support hybrid options offering a combination of in person and online learning that parents, in consultation with their student's teachers, can choose.  Above all, the health of our children and teachers must be the top priority in this. I will be very disappointed if this becomes yet another political move by the State School Board. Work with Gov Kelly, prioritize the health of children and those that are teaching them.
7/21/2020 10:08:10	Ashly	Watts	Family, students, staff,	Olathe	Dear BOARD MEMBERS,  I want to thank you for the tireless efforts you have made during this unprecedented time for our state and country. I appreciate that you all are working with our students learning as a priority. I do think with the current state of the pandemic we must also be concerned with the health and safety of not only our students and staff but the families they will go home to and our communities as a whole. For that very reason. I urge you to vote yes for the executive order that delays the start of Kansas schools until after Labor Day.  I am a registered nurse and staff member of a local school district in Johnson County, but most importantly I am a parent of school age children, the daughter of a cancer survivor, and the wife of a paramedic. I am incredibly concerned for the wellbeing of my family, the staff, students, their families, and the community as a whole if they return to school before the rate of infection for COVID 19 drops considerably in our county. We are currently at a record breaking high case percentage in our county with no reason to believe it will improve rapidly.  I believe that Dr. Lee Norman presented more than adequate data to show you how Kansas communities are negatively impacted by COVID 19 right now. He further produced evidence that shows that we have the opportunity to lower the rate of infection to bring us back down to flatten the curve before September 9, 2020. He identified clusters associated with schools and daycares. If we have widespread opening of schools this number will skyrocket our already record breaking numbers even further.  Furthermore, I care so deeply about this because it is not only my job to protect the health and safety of my family but as a nurse it is my job to advocate for public health and safety. I believe we should base this decision on scientific evidence which suggests it is not the right time in Johnson County and many other counties in our state.
7/21/2020 10:08:11	Rebekah	Rhoads		Wamego	Lastly, this executive order absolutely needs to stand and be approved by you and the other board of education  I fully support governor Kelly's orders. We do not feel safe nor confident in sending our children back to school full time in the buildings.

7/21/2020 10:08:12	Amy	Curtis	Self/parent	Olathe	I urge the KSDE to adopt Executive Order 20-58. With COVID surging in our state, it is ludicrous to begin school as cases are at an all-time high. I urge the KSDE to let science be our guide. We have to face the realization that Kansans squandered the spring shut down and we are paying for it with a surge now. To open schools without science is crazy. If even one teacher or student dies of COVID as a result would be one too many. Are you prepared for that? Are you prepared for the resultant Workers' Compensation and/or wrongful death suits that will result? If you are not, then please delay school start.
7/21/2020 10:08:18	Amy	Cate		10787 S Cedar Niles Ci	I am not in favor of delaying the the school year. I feel our kids need to be back in school for the sake of their mental health and well being, and their academic progress. Thank you!
7/21/2020 10:08:22	Holly	McCormick	Students	Olathe	We have already been out of school for 6 months and waiting any longer will damage our education that we have been building on. Students also need to be in a routine and school would provide them that
7/21/2020 10:08:24	Jeffrey	Ernzen	Parent	Prairie Village, KS	While I understand the need to be safe, I believe we must also do everything in our power to maintain a normal social order. Any major delay in opening or a majority on-line model, is not acceptable. From our experience this past spring that model is not sustainable. Parents can do there best at home but there is not substitute for the classroom.
7/21/2020 10:08:28	Erin	Messerly	Olathe Public School	LENEXA	I am a teacher in the Olathe public school district and my 3 children also attend Olathe schools. I believe the vote should be NO to delaying this school year. I feel this should be a decision each district needs to make on their own. Yes, maybe that is the right decision for Olathe but I grew up in Southwest Kansas and I do not feel that is the right decision for them. This should not be a decision made for the entire state.
7/21/2020 10:08:48	Judy	Erpelding		Eudora, KS	Please consider allowing individual districts to make the decision on when to begin, how to begin (online, hybrid, brick & mortar), and which activities/sports can be done safely. A blanket decision doesn't seem appropriate with such diversity in the student body size, building size/layout, outside resources, types of activities/sports being conducted. It is possible for some districts to conduct some sports/activities and classroom instruction with restrictions safely for both teachers/staff/and students. We should give any opportunity we can to have even some portion of their education and involvement in activities to be somewhat normal. For the sake of their mental health, I believe this is critical.
7/21/2020 10:08:55	Jody	Grizzell	Pratt USD 382	Pratt	Please consider starting school as originally scheduled. These kids needs to get back to some what of a normal schedule.
7/21/2020 10:08:58	Christy	Thomas	Olathe West High Schoo	Olathe	Please help our kids! If we have to delay the start of school, please promise that our kids will be able to return back to school! Please allow students to return to in person classes. Our kids need the structure that school provides. They need their teachers, they need classroom instruction and interaction that cannot be achieved through online coursework. Both their education and their mental health are suffering. They want to return to school and normalcy. I think parents should be allowed to chose. I would be willing to sign a consent for my daughter to return to school and have a Senior year. It is crucial for our kids to receive the education they need to be prepared for college. And those that don't feel comfortable can stay home and have online learning if possible. Please look at the updated Johnson County statistics which clearly validate why in person classes should resume. The most vulnerable population is the elderly. More kids have been ill from the flu then this virus... Thank you for advocating what's best for our kids and not letting fear from the media influence your decision.
7/21/2020 10:09:05	Laura	Fails	USD320 Food Service	Wamego	I am very much in favor of delaying the start of school until after labor day in order to give schools (admin, teachers, transportation, food service) more time to develop safe BTS plans as well as the time needed to train all staff of new procedures. All of us want to be back in school, but the reality is that this virus is not only not going away, but actually spiking in Kansas. Speaking for food service, we are once again being asked to completely change how we feed kids, except this time we'll be in close contact with students. The amount of planning, testing and training is immense. Please allow Governor Kelly's Executive Order to stand to allow us time to open schools as safely as possible.
7/21/2020 10:09:09	Chad	Lippoldt		Wichita	I agree with Gov. Kelly that the start of the school year should be delayed. This gives school districts time to get all PPE and other protocols and supplies in place and ready. The school day can be extended by 15 minutes to make up any missed instructional time from the delayed start.
7/21/2020 10:09:13	Erin	Toplikar		Lenexa	I don't think they should delay school starting. I ag

7/21/2020 10:09:15	Josh	Hards	general public	Topeka	The local school districts are not prepared to start school. They do not have the medical supplies or action plans in place to safely begin school. Many school districts do not have a plan in place at all. A very generic idea of how you want to start schools back up is not sufficient at this point. There needs to be a very detailed plan before we put our children at risk. This is not the time to take a 'wait and see how it goes' approach. Delaying the opening of public schools is a must.
7/21/2020 10:09:27	Carrie	Gochenour	Home Daycare/ mother	Overland Park	I vote to delay or go online .. do not want to start and then close back down.
7/21/2020 10:09:41	Kaylene	Black		Pratt	I agree with delaying school for the health and safety of teachers, staff and students.
7/21/2020 10:09:43	Serina	Aguilar	Parent and registered vo	Lawrence	Our children should not be used as a political experiment. This decision should be about the public health and safety of our communities. I am in support of Gov. Kelly's executive order and I would hope that all of you would vote the same. Ask yourself if you open the schools prematurely are you ready to accept the consequences of a life lost? Are you ready to stand before God and say you had the opportunity to protect life and you voted to not protect his children? Most of you are conservative and just as you protect life before its born that protection shouldn't end after birth. Our children our innocent and not political. Please vote to delay the opening of schools! Please vote to protect life!
7/21/2020 10:09:46	Roberta	Elliott	daycare	hope	I am for waiting to start school after labor day
7/21/2020 10:09:51	Gina	Nietfeld		Marysville	It should not be a blanket decision to close ALL Kansas schools until any certain date! We have a local BOE that represents our staff and students and we place our trust in them! These kids need to get back to school!
7/21/2020 10:10:12	Dustin	Stucky	USD 420	OSAGE CITY	It is a good idea to delay the start of the school year for a couple of reasons. First, the spread of the virus is at an all time high and open schools now would exasperate that issue. Secondly, schools are not prepared to open with the necessary safety measures in place. The rapidly changing situation has caught the system flat footed, and it will take time to respond adequately.
7/21/2020 10:10:22	Trace	Gibson	Family members who ar	Fort Leavenworth	So many things to prepare for to keep students, their families, and teachers safe (& to prep teachers for all of the changes!). We are hopeful the BOE will SUPPORT & UPHOLD the governor's orders to wait until Labor Day to give time for the necessary precautions to be in place.
7/21/2020 10:10:24	Lori	O'Brien		Saint George	Please support the order to open schools after Labor Day.
7/21/2020 10:10:29	Cody	Fulks	None	Topeka	Vote no schools need to open and we need to educate kids. We are doing more harm than good.
7/21/2020 10:10:34	Emily	Kastens		Atwood	Kids need to be in school. They have been out since March. They need the social aspect for their mental health especially. They are losing more and some are more endangered being held out versus starting school on time.
7/21/2020 10:10:38	Ben	Coldham		Lawrence	Governor Kelly is looking out for the best interest of Kansans, during this unprecedented public health crisis. With the spike in COVID-19 cases, we must protect our citizens.  Top experts and scientists agree we must actively take steps to prevent the spread. It's sad that a WORLDWIDE, public health crisis has been politicized. This virus does not discriminate based on political affiliation.  It would be irresponsible to start school before Labor Day, given the situation. We must protect our children, educators, and those they come in contact with. I urge you to support the Governor's mandate in delaying the return to school.
7/21/2020 10:10:46	Jeffrey	Needham	Needham DBS (private	Olathe	Schools must reopen. Internet learning is a JOKE; no accountability, no grading, no testing. As an alternative, it would be better to postpone school until a vaccine is available and require vaccination before reopening. In the meantime teachers and staff need not be paid.
7/21/2020 10:10:52	Leslie	Lockard	Blue Valley USD 229	Overland Park	I agree with Governor Kelly's order to delay schools opening. As a teacher in her 60s, I'm concerned with the health risk of returning to school with so many cases increasing.
7/21/2020 10:11:00	Stephanie	Krebs		Topeka	Open schools on time! Kids need to be back in school!

7/21/2020 10:11:04	Christina	Middleton	My family	Lenexa, KS	<p>Hello, I don't envy your decision, but I trust you'll vote based on science and data. Community spread of COVID19 is now running rampant across our local communities.</p> <p>I know a lot of you are worried about local control, but what happens to those local communities who are now seeing spikes in cases and soon hospitalizations? What about those small rural communities who have seen hospitals shuttered as virus is faster spread due to having schools open?</p> <p>This article shows that older children spread the virus just as much as adults.  <a href="https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html">https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html</a></p> <p>In my opinion, waiting a few weeks for school is gives us a fighting chance to get the cases on a downward trend to enable our local communities to have the safest start.</p> <p>If a small community like Logan, KS can be overwhelmed by this virus it can happen anywhere. Let's all do our part and work to slow the spread.</p> <p>I also think if you continue to have meeting via zoom you already know the right answer to this question.</p> <p>Thank you.</p>
7/21/2020 10:11:04	Jamie	Leach		Olathe	<p>Please vote no on the governor's mandate to delay the start of school. The decision should be left up to counties or even local school boards. A blanket mandate for the entire state doesn't make sense because not all areas are affected the same. Places with few cases don't necessarily need to delay school if they have proper precautions in place. Also, many kids NEED to be in school because it is the only safe place for them. We have now gone months where kids have been exposed to child abuse and neglect because no one is there to report it and help them. Kids' mental health is also at risk. They need their peers, they need socialization. Kids aren't built to be alone and separated. Their mental and emotional health is important, too.</p>
7/21/2020 10:11:06	Sarah	Secord	Usd251 North Lyon Cou	Emporia	<p>I am an elementary teacher and I would appreciate it if you would vote to keep buildings closed/ delay the start of school until September 9. Our school and I'm sure many others across the state need more time to develop a plan that ensures the safety of staff and students. We also need our numbers to trend downwards before I feel safe going back.</p> <p>Thank you.</p>
7/21/2020 10:11:12	Christy	Gamber		Olathe	<p>I am not sure if graduation is part of the discussion of the executive order from the governor. I am begging you not to cancel Olathe's graduation this weekend. Our kids have lost so much already. Please don't take this away too. You can spread the seats apart and have them wear masks. We have a huge stadium that, if you limit the number of guests per graduate just like inside ceremonies would have, families can also be social distance too. If government and health officials feel that it is safe enough for retail and restaurants to be open by using mask and social distancing then this should also be applied to a graduation. Safety is important, but this can be safely done.</p>
7/21/2020 10:11:16	Heather	Horinek	Parent	Atwood	<p>We either need to start in class school or online. Our kids are missing to much at this point. We are so far behind and losing ground.</p>
7/21/2020 10:11:19	Brooke	Powell		Pittsburg	<p>Please vote to delay opening school. Our children's lives, educator's lives, and communities depend on it.</p>
7/21/2020 10:11:19	James	Bowman		Frontenac	<p>We're in the middle of a global pandemic. Children can be taught safely online. This is a no-brainer. It makes me angry that you're second-guessing the governor. This causes the public to distrust her and be confused about what we should be doing, when every scientist says people in enclosed spaces is a bad idea.</p>

7/21/2020 10:11:21	Diane	Miller	USD 435 and M&M Tir	Abilene	One size does not fit all in Kansas. School districts have been planning for months and the Governor's constant yo-yo effect is not helping. Numerous health officials have said children do not seem to spread this virus. Studies show very good reasons why schools should be open. Teachers are just as essential as the grocery store employees. Our small business has remained open throughout the entire shutdown without sick employees or customers by following basic guidelines that didn't include masking. We are not going to outrun this virus but firmly believe it needs to run its course. Our hospitals and ICU beds are able to handle this pandemic but the goal posts keep moving. Please open schools and let local school boards make decisions based on what's right for their district. They are the education experts.
7/21/2020 10:11:26	Gina	Penzig	Parent	Topeka	Please support Gov. Kelly's work to protect our children. My daughter will be a senior at WRHS this year and plans to graduate after fall semester. While I'm disappointed by the affects the pandemic has had on her high school experience, her health and the health of school staff, teachers and students, is the most important thing. I'm still waiting to hear if our district is providing adequate options for remote learning for parents who prefer that option. I'm skeptical that schools can achieve adequate precautions against the virus spread. This isn't criticism of anyone's work. It's listening, reading and evaluating science-based information to come to a conclusion. Today, Kansas cases are on the rise and returning children to school is only going to make that worse.  I appreciate your willingness to hold public office and make these difficult decisions.
7/21/2020 10:11:29	Kim	Hudson	Parent of students at St J	Overland Park, KS	Please consider allowing private schools to make their own decisions in regards to opening schools. If they are not funded from the state they should have the rights to make their own opening plans be it virtual or in person. My high schoolers continued to have exemplary education virtually and they would benefit from started mid August as planned.
7/21/2020 10:11:35	Sara	Anderson	Olathe West	Olathe	Please listen to our public health officials. We need to delay reopening schools to allow the mask mandate to slow the spread. We are in a public health crises. We must mandate masks AND social distance when we return. These are the two most important steps we can take to mitigate the spread. Thank you for your consideration.
7/21/2020 10:11:35	Candice	Herken		Fort Leavenworth	Please approve the EO. I work in USD 453 and my children go to USD 207. I believe this will help everyone be better prepared to enact the mandates and be properly trained to provide the best outcome for all students.
7/21/2020 10:11:39	Becky	Todd	Teachers	Overland Park	I agree with delaying the start of school until after labor day.
7/21/2020 10:11:45	Lisa	Ifland	taxpayer parent teacher's	Williamsburg, Ks	in full support of Gov Kelly
7/21/2020 10:11:48	Pepper	Allen	Andover KS Middle Sch	Wichita Kansas	I am a para for special needs we need to delay school until September to prepare are students and staff. Our numbers are going up please think about the safety our children and staff.
7/21/2020 10:11:56	Elisabeth	Parlor		Fort Riley, KS	Please delay school.  God speed to all of you for dealing with these horrible parents that will never be pleased no matter what you do!
7/21/2020 10:12:03	Chris	Durham		Garden plain	Start in person school on time as previously scheduled. Children have not been in school for almost 6 months and that is causing farm more harm than the virus.
7/21/2020 10:12:04	Alicia	Alferman		Overland Park	Delay in person school as long as possible. I'd guess for even longer that Sept 9th. Please listen to SCIENTISTS and DOCTORS, not politics.
7/21/2020 10:12:23	Sam	Jack		Goddard	Board of Education members, please uphold Gov. Kelly's executive order. If we're insufficiently cautious about this, we don't get the opportunity to rewind and do it over. Lives are literally on the line. Given that lives are on the line, I believe that if you listen to politicians instead of scientists and health professionals, you could end up regretting it profoundly.

7/21/2020 10:12:26	Mary	Rose		LIBERAL	I feel that the Board of Education should NOT approve Executive Order 20-58.  Executive Order 20-58 also states children to wear masks during school year 2020-2021. Yet, this IS an important decision that should be transferred to the county level with the open relationship of the Unified Districts in their jurisdiction. Each county has already been placed well educated and knowledgeable people dealing with COVID-19 in the counties. I also feel proposing to start after September 7, 2020 is not in the best interest of the children. Each county may have decreases and increases.
7/21/2020 10:12:29	Stan	Anderson	USD 512	Lenexa	Due to the current state of increasing positive tests, students should be in school for short, meaningfully active reasons. For any class that requires a student to sit in class to discuss and work, that is a class that should be on-line during these times. High school students should be in school only for classes that require performance assessments like PE, Choir, industrial arts, auto tech, art, fashion design, and int'l languages.
7/21/2020 10:12:33	Jason	Roe	concerned parent	Lawrence	Although my child absolutely needs the structure and social development he gets with in-person school, I am deeply concerned about the safety of students, teachers and staff. In light of recent studies showing transmission rates among teenagers, and unclear data about this new virus among younger children, I recognize that it will take additional time for Kansas schools to prepare to reopen safely. Also, under no circumstances will it be safe to reopen in the midst of a surge of COVID-19 cases as we have seen in recent weeks. We need to wear masks and suppress the pandemic across the state, so that we can reopen schools safely.
7/21/2020 10:12:43	Pam	Broadbent		Topeka	Please support Governor Kelly's order to keep schools closed! Our staff and students need this time.
7/21/2020 10:12:53	Mallory	Ginn	Emporia USD 253	Emporia	I 100% agree with Governor Kelly's suggestion to delay the start of school. As a teacher, being related to teachers, etc. and knowing what school will potentially look like in the fall, I believe that parents that want their students back in class do not understand what will happen in schools or what schools will look like. Lunch, socializations, specials, etc. will not look the same. The school district needs time to prepare these changes based on everything that has come out in the past few weeks. As a teacher I have not even had the time to set foot in my classroom to prepare, because I don't know what to prepare. Extra time is needed.
7/21/2020 10:12:54	Theresa	Wade	Kckps	Kansas city Kansas	I'm a teacher. We have no suppliers to protect us. We have no plan. Please stop this.
7/21/2020 10:12:54	Rachel	Davis	Parent and employee of	FORT RILEY	I think face masks are imperative for all kids and staff in school. The delay absolutely needs to happen! The district has said the do not have the funds for a hybrid model but we are cramming 25-28 kids in small classrooms. How do we social distance at all with that many kids per class? It's ridiculous. In our school the kids backpacks and coats are piled on top of each other, which is gross to begin with for hygiene. We are to get rid of all fabric furniture but expect our kids to be put in danger by piling their personal items on each others. Putting 1 water bottle filler in for 600-700 kids is not feasible. Remote would be a better option for first semester to let the schools get more water bottle fillers, cleaning supplies and a better plan of action. Putting kids in an environment like that will lead to chaos and not a lot of teaching happening. Teachers having that many kids in a class is horrible to begin with much less having to worry about masks, kids eating in the classroom, no normalcy at all, possibly no music or pe because the can't clean it properly in between classes, and be worried that you could possibly be bringing home covid to the family. Please consider remote learning for 1st semester to put a proper plan in place.  Thank you

7/21/2020 10:13:05	Cara	McNorton		Eudora	It is my request that you uphold the Governor's decision to delay the start of schools. Our goal as educators is to provide quality instruction for our students. The team of educators worked incredibly hard this summer on the document you approved last week. Most educators will have maybe 3 days of Professional Learning when they return to school to prepare classrooms, prepare instruction, prepare for Covid precautions and go through the document. If you really want that document looked at it and used, I would recommend the vote to delay. I can assure you the number 1 thing teachers are worried about is preparing classrooms and taking Covid precautions and getting some basic lesson plans down. They won't even open the document that was worked on this summer if given only three days. That's just the reality of it. There isn't time to do all of it with the opening of schools in August. Please trust the trained professionals to do their job with educating students. We know what we are doing. I would like you to know one more thing. While you are meeting virtually or in person with your plexiglass shields, I've updated my will, bought more life insurance and have my arrangements in order. I've spent \$200 on scrub clothing, face masks and face shields. I'm making a bedroom in my basement for me to sleep in so I can keep my husband and daughters safe. I miss my students. I know they need me. I'm in very high risk schools. I get it. But nothing. Absolutely nothing is worth more than life. EVER! I can NOT believe we are even having this discussion. I didn't sign up for teaching ever thinking I would be risking my life. Thank you for voting to delay schools.
7/21/2020 10:13:11	Darcy	Carlstedt		Lenexa	I support my kids going to school in person as soon as possible.
7/21/2020 10:13:12	Elizabeth	Kinion	Teacher	Salina	Please keep the safety of students and staff in mind. Delaying will give time to make sure all safety measures are in place and ready for students to return. This should be our top priority! Cases continue to rise and must be under control before students can return to school safely.
7/21/2020 10:13:13	joseph	vanderhoof		atwood	I think its in the best interest to delay school until Sept 9 2020 so the schools can get organized and prepared. Further more, young children and children with disabilaties their parents should have the option to do in home virtual schooling.
7/21/2020 10:13:18	Megan	Coleman		Wichita	Let our kids get back in school. My girls are miserable and missing school. We can't hide from this. It's just delaying the inevitable. I feel Maize schools have a great plan and we can do this.
7/21/2020 10:13:21	Cora	Johnston	Wamego Middle School	Manhattan	Hello, I am a teacher at Wamego Middle school but I commute from Manhattan. I am concerned that the Wamego B.O.E. will not take into consideration just how many of its district's teachers are just like me and commute from Manhattan. Manhattan is a more affected area. I would like to see a delay in resuming school so that our district and it's staff and teachers can better prepare to implement whatever guidelines our board approves.
7/21/2020 10:13:25	Mary	Sheldon		Topeka	Support Gov Kelly on school opening delays.
7/21/2020 10:13:29	Libbie	Stover	USD 383 Manhattan Og	Manhattan	<p>Please support Laura Kelly's Executive Order</p> <p>I think it is safe to say that higher education did not prepare teachers for a pandemic. In my opinion, Emporia State University is one of the best teacher colleges in the nation. Seven years ago when I graduated from there I left prepared for just about every crisis. This was not one of them. I point this out to place emphasis on how thousands of educators in our state are preparing to teach during a time that none of them were trained for. I myself am thinking of ways to change my classroom to ensure quality of learning while maintaining proper health standards. Those changes won't come quick or easy. That is why teachers need 3 weeks.</p> <p>As I learn more about the spread of covid and how it will impact our schools it has become clear to me that our master schedule will need to be changed. I will no longer be able to hold double classes in my gym. Monday, Tuesday and Wednesday mornings I co-teach 40-50 students in my classroom. This May, I completed my master's degree in Education Administration from Fort Hays State. I have learned that tweaking the master schedule isn't an easy task. It takes time and patience to be able to organize it in a way that doesn't create a domino effect that negatively impacts other parts of our student's day. That means we have to find a brand new schedule that equitably provides STEM, art, PE, music, computers, library, lunch, MTSS, and recess. On top of that, we have a new principal this year who starts work on July 20th. To do justice for our students' school day we need those 3 weeks.</p>

7/21/2020 10:13:30	Melissa	Hendricks	Parent	Salina, Kansas	<p>Please do NOT delay the start of school. The numbers on the State's coronavirus website speak for themselves. Only 8.5% of positive cases are children under the age of 18. There have been NO deaths under the age of 25, and the overall Kansas death rate of those over age 25 is only 1.3% of positive cases. More and more people are recovering. Death rates and hospitalizations due to COVID have consistently decreased.</p> <p>My children HATED remote learning, and it was a nightmare for me and my job. All children need social interaction, and I want my kids specifically to be given the opportunity to build an immunity to this virus, just like any other virus. Those that are immunocompromised or at high risk should be encouraged and allowed to do what they feel is necessary to protect themselves and their family. Not everyone is in that situation and it feels like the desires of a select few are being forced on the masses.</p>
7/21/2020 10:13:38	Kyle	Groff	Tricounty/Usd447	Parsons	<p>I believe that we should listen to the physicians and delay the start. I also believe we should delay sports but they must happen. Extracurricular activities are almost as important as school. Please don't fall into politics and let the data speak.</p>
7/21/2020 10:13:39	Carrie	Morris	Teacher	Overland Park	<p>I am appalled that this is even a debate. I have taught for 23 years. I know what a classroom looks like. In all of my years of experience, the kids' safety comes first. In this case, it seems people have lost that perspective.</p> <p>I know that my school district is no where near ready for what is ahead. No plans in place for social distancing, masks, sanitizer, etc. The plans are two fold- come full force or stay home. Literally no precautions have been put into practice to keep kids and personnel safe.</p> <p>My own children's assistant superintendent got on TikTok and shamed those kids who may want to stay home by saying they'd be "stuck at home." Additionally, my board member, on this very board, has not replied to my pleas and has a personal fb post about questioning everything. Masks, going to gatherings, etc. I'm disheartened. Who are these people? Why do they get to be so cavalier about life and safety? If a silent gunman was in our building, they wouldn't want their OWN child in there. That's what this is. An invisible threat. And I unapologetically state that these 'leaders' are part of the problem. I'm horrified by their statements made when they thought no one was looking.</p> <p>Giving an additional 3 weeks to prepare seems like a very small sacrifice for lives it might/will save. 3 weeks is what we are asking. Safety measures put into place is what we are asking. It comes down to your priorities.</p>
7/21/2020 10:13:41	Debra	DeRoulet		Hutchinson, KS	<p>Please let science and research guide this process.</p>
7/21/2020 10:13:50	Julie	Weilert	Teacher	Humboldt	<p>Vote 'Yes' to support Governor Kelly's order</p> <p>My concern is if we don't start in August like normal and there is another mandatory shut down, we don't get any forgiveness for days missed. Kids will be in school all summer.</p>
7/21/2020 10:13:51	Andrea	Larson		Overland Park	<p>My kids want to be in school! They are in middle school and need the critical things middle school provides! Online school should be an option, but let those of us who feel comfortable sending our kids to go back! Teachers, medical professionals, EMT, firefighters, police are all essential! Everyone has to adjust and commit to these kids who want to be in person at school! They are missing out!</p>
7/21/2020 10:13:51	Brian	Broadbent		Topeka	<p>Please support Govenor Kelly's executive order to close schools until after Labor Day. Staff need time to prepare for new teaching environments. Our state needs time to handle the virus better.</p>

7/21/2020 10:14:02	Lori	Brack		Salina	<p>I've spent the past week researching the risks to college faculty and students in the upcoming fall semester. I am a former college instructor who was considering teaching again, but the data is clear: cases are rising, children and young people can be carriers and because of their developmental stages can't be trusted to act appropriately to take care of their health and the health of others around them.</p> <p>The governor has access to information and advice, along with her own leadership skills and former work as a teacher. I trust her to make decisions for Kansans in every area, including opening schools. Please do not politicize a public health situation. Listen to the health advisers FIRST, then make decisions that are right for Kansas children and teachers.</p>
7/21/2020 10:14:10	Tara	Oddo		Overland Park	I fully support Governor Kelly's order to delay the start of school. With Kansas infection rates being in the top 14 of all states it would be irresponsible and dangerous to open Kansas schools for in person classes at this time. As a school nurse I am very concerned for the immunocompromised students and staff in my building. I find it ironic that this board is meeting virtually rather than in person when a few members have expressed they feel it is safe to open schools, if it is safe to open schools that have several hundred students why is this board of just a few people not meeting in person and open for all to attend?
7/21/2020 10:14:13	Joseph	Jewett	Administrator	Olathe	As a parent, my own children and my students NEED to be in school for socialization. As a building principal, my own children and my students NEED to be in school for their education. As a parent, my children need to be safe, and my wife who is 8 months pregnant needs to be safe. Unfortunately there are people in each school, district, and city who won't do what is necessary to protect those around them. As a middle school principal, my children need to be safe, and my wife who is 8 months pregnant needs to be safe. Unfortunately we do not have the time to plan, implement, and put in place safety measure to mitigate the dangers that will be present due to the nature of this virus and those who won't do what is necessary to protect those around them. Even more challenging, is the fact that the safety of our staff and students has become politicized by both sides; unfortunately, the boards responsibility as the governing body for education in Kansas is to somehow balance the responsibility of our safety and education. I'm praying for you and the choices you have to make. There is no right choice in this situation, but it's important that we somehow protect our children now (health) and in the future (their education).
7/21/2020 10:14:16	Sadie	Moore		Emporia	The delay is absolutely vital to the health and safety of our community. I understand there are drawbacks, but schooling should also remain online until we are cleared of the virus, or there are at least no new cases for two weeks. You cannot expect children to uphold the safety measures necessary to stop the spread of the virus.
7/21/2020 10:14:19	Erin	Toplikar		Lenexa	I don't feel as though we should delay the start of school. I know there have been an increased number of cases but very few have been children age and it has shown that rate of transmission is low in that age group. I feel like masks are essential but not sure how the younger grades will do with having to wear them all day, I feel it may be more of a distraction than good. The kids need to be back in school learning in the classroom and being around other kids socially.
7/21/2020 10:14:21	Donna	Shubkagel	Teachers	Olathe	Please delay the start on the delay on when school starts
7/21/2020 10:14:40	Kerry	Haley	Usd 259 School Nurse	Wichita	Hello - My name is Kerry and I am a school nurse. I am so attending graduate school for public health nursing. This will be my 5th year as a school nurse for the district but I also have over 25 years of adolescent psychiatric inpatient experience. I understand that mental health is important. I have two boys with depression and anxiety disorders so I understand very well. In my experience, we need to have physical health in order to work on mental health. The rate of infection in Wichita is high and as a school nurse I have some serious concerns on keeping my students and staff safe. I work at middle school with 900 students and 87 staff members. I strongly believe we need to start school after labor day to give the mask ordinance in Wichita a chance to make a difference. As a parent myself I can understand how other parents feel we want our kids to be in school but health needs to be priority. How do we have students learning in the classroom when they are sick? I ask that you follow the science and the health professionals. Please do not take politics into this.
7/21/2020 10:14:41	Vielka	Asbury		Leavenworth, Kansas.	Please support Governor Kelly's executive order to delay reopening schools until September 9 to protect the health and safety of our school communities and give Kansas school districts the time to gather the recently mandated supplies to protect their schools.

7/21/2020 10:14:45	Elizabeth	Parsons	USD 259 (Wichita) 5th	Valley Center, KS	I would like school to be delayed till after Labor Day but have an adjusted school calendar. Meaning, that we have the same required days but we go till June. I want to have in person school but with health precautions in place.
7/21/2020 10:14:47	Carolyn	Matthews		Wichita, Andover 385 S	I support delaying the start of school until after Labor Day. I have two children in elementary school and one child in middle school. With the increasing number of infections in our area, I am not comfortable sending them back to school yet. I assume that the district's opening plans will change because of these rising infections, so more time to prepare is in everyone's best interest. I urge the State Board of Education to approve the governor's executive order.
7/21/2020 10:14:51	Kallie	Burgardt	Self	Salina	Delaying school does not help the economy. Kids need school. The numbers of depression and suicide are higher than corona virus. School is a necessity. The governor is destroying and delaying KS that in turn creates a huge deficit with the impacts being years to recover from.
7/21/2020 10:14:53	Don	Feil		Chase	Yes, the delay is needed. A firm plan that protects the children, teachers, and the house holds they go to each evening. This is virus is real and much more deadly than the rino virus that explodes each year with school open.
7/21/2020 10:14:54	Carrie	Hoger		Wichita	Delaying school is the safest thing we can do for our children & staff. Keep everyone safe.
7/21/2020 10:15:04	Torrie	Battle	Football	Louisburg	These kids have been able to socially distance and be at football scrimmages, weights, and conditioning. They are thriving again!!! Do not delay their season. This is imperative for their physical, social, and psychological health!!!!
7/21/2020 10:15:07	Diana	Fabac	KSPTA	Bonner Springs	I believe that the Governor is correct to not open schools until after Labor Day to let the rise if the virus start to go down.
7/21/2020 10:15:11	Ranelle	Hugunin	USD 325	Phillipsburg	I am a teacher with 24 years experience. Please support the executive order. We need time to prepare for the challenges the upcoming school year present.
7/21/2020 10:15:12	Ericka	Waller	USD 287	Lawrence	I strongly encourage the BOE to vote in favor of the EO to delay the start of school. We need time to implement policies and procedures that are outlined in the reopening plan, and we need to work with our staff to ensure that we are ready for a seamless/immediate transition to online learning in the event of another full scale shutdown. We cannot leave this decision up to the individual counties, as KSHSAA sponsored activities rely on schools operating in the same way in order to set activity calendars. Please recognize the disparity that would be created if individual counties are allowed to make decisions, and how that will impact equity in the long-term.
7/21/2020 10:15:16	Todd	Calhoun		Topeka	Support the mandate!
7/21/2020 10:15:18	Brittney	Westgard	School social worker	Rago	For the safety of students, school Staff and the community more time and preparation is needed before schools open for in person education. Also no staff should be meeting in groups larger than 5 or from across different schools/districts. Not only is time needed to prepare for a safe return but more support and funds from the BOE and government is needed to meet the necessary safety requirements. I.e increased hand washing stations, PPE, health educAtion and awareness training ( i see too many school admin wearing masks only to their mouth and not covering nose they are not knowledgeable on viral diseases and how they spread and are being charged with making decisions for entire schools based on limited know how) . Please prioritize our safety, these are unprecedented times that require bold decisions and actions to keep our communities safe and that is your responsibility.
7/21/2020 10:15:32	Kristen	Scribner		Maize	Thank you Governor Kelly for delaying the start of school to help administrators as well school staff better prepare for the hundreds of children who will walk their halls.
7/21/2020 10:15:32	Johanna	Van Ness		Wichita	Please delay the start of the school year. I do not feel comfortable sending my kids to school with the increase in cases.
7/21/2020 10:15:50	Alissa	Jackson		Mission	As a teacher, I fully support Governor Kelly's plan to delay the opening of schools until after Labor Day. This will give teachers and administrators more time to implement all necessary safety measures to keep kids and the adults that work with them safe.
7/21/2020 10:15:55	Deanna	Trumble	Self	Newton	Please uphold the order to delay school until September and requiring masks for all who enter a school building. Thank you!
7/21/2020 10:15:56	Marla	Hildebrand		Overland Park	Do not delay school

7/21/2020 10:15:57	Nic	Dannevik	Parent of a senior in usd	Lawrence	Please allow sports to practice during the three weeks school has been postponed. Many schools have been participating in outdoor optional workouts successfully. This will allow athletes and students involved in activities to stay involved and allow students back in a safe manor.
7/21/2020 10:15:57	Carol	Hatfield	My family	Wichita, but a Maize Di	Once again a safety issue has been turned into a political one. As a retired educator I think it is imperative that we do what is in the best interest of our students and staff. If you override the governor's declaration in light of the increasing covid19 numbers then you truly are letting us know that you are not basing your decisions on what is best for the students and teachers of Kansas.
7/21/2020 10:15:58	Concerned	Citizen	Wichita children and tea	Wichita	I urge you to do not allow students and staff in school buildings until there have been no new cases for at least 14 days. This is horrible to send them in with these conditions. I continue to Pray you make the right decision.
7/21/2020 10:16:07	Melissa	Grimm	USD 204 Food service	Bonner Sorings	As a parent and staff member, I think it's extremely detrimental for students to not be in school face to face. There are too many kids that need their teachers. Teachers are so much more than a body that stands up in front of a classroom. They are the parent, the nurse, the disciplinarian, etc.
7/21/2020 10:16:11	Jeremy	Robison	Self/ student son	Burlingame	Laura Kelly has a one fit answer for all the children of our state. My child is from usd454 we have zero cases here. We are being treated like a large school . Her actions may have been warranted to shut things down . I felt it was to soon for our school . The size of the school should matter . This one size fits all scenario is un fair to the children. Please take that in consideration..... DO NOT PUSH BACK THE START OF SCHOOLS FOR OUR RURAL AREAS THAT HAVE ZETO CASES....
7/21/2020 10:16:12	Meghan	Shreve	myself	LAWRENCE	Please follow Gov. Kelly's EO. Having thousands of sick children is NOT WORTH THE RISK! Thank you.
7/21/2020 10:16:18	Kristen	Oberzan	LHS parent	Lawrence	I support athletes being allow to play even if school is not in session. I would also love to see family choice on school and athletics. This should be a personal decision not a mandated. If other families don't feel safe then options should be allowed. Virtual school was horrible last year. If we don't open in person classes and keep them I will be in support of taxes being given back to families to choose their school. Thank you.
7/21/2020 10:16:29	Carrie	Van Buskirk	KS school aged parent a	Olathe	As an Olathe Parent of two students, middle school, and high school, and as an advocate for disabled students, I am asking that you encourage votes for the Governor's plan delaying the start of schools. In order to adequately prepare for a safe return and to train/guide our teachers and support staff for new methods of delivering instruction and safety protocols, the schools simply need more time. We desire that our beloved and valued staff and students return; however, we want them to be safe in their educational environment.  With respect, The Van Buskirk Family
7/21/2020 10:16:30	Erica	Huggard	Emporia NEA	Emporia	These last few weeks, anxiety levels for teachers and support staff in my district have been incredibly high. I have been spending an enormous amount of my time fielding questions that I do not have answers to. I've asked them to wait patiently for the state plan, in the hopes that we would be rolling out our district plan shortly after, and questions would be answered. Unfortunately, our plan is not ready and it seems like more questions are going unanswered each day, despite the best efforts of leadership. Thankfully teachers and staff felt a break in our anxiety levels when Laura Kelly showed remarkable leadership and issued her mandate to delay schools and require safety measurers be required, not just recommended. Unfortunately, the lowered anxiety levels for staff were short lived, as we learned that her mandate would only take effect if the State Board of Ed. support the mandate. On behalf of my 275 members, I am asking you to support the Governor's mandates.
7/21/2020 10:16:49	Katie	Beach	USD 482	Dighton	Please consider letting our children start school on August 14 in Dighton, KS. We have 5 recovered cases, and the negative effects no school could have on our children could be so dire. Thanks for thinking of rural western Kansas. Please remember there is much more to Kansas than Wichita and Kansas City. Thanks for your service.

7/21/2020 10:16:51	Jeannie	Houts	The Houts Family	Lawrence	<p>I feel delaying the 2020-2021 school year is the best choice. We do not send our children to school when there is an unsafe amount of snow. We know snow is coming, but how much is never certain until those white flakes fall, and the reason school districts wait to call a snow school.</p> <p>Covid-19 is here. We have no idea how many students, teachers, staff, bus drivers, nurses, administrators, and everyone each individual person is in contact with on a daily basis outside of the school buildings. There is little know about Covid-19. We do know it is highly contagious, and avoiding large group settings is One of the best practices to avoid catching the illness.</p> <p>The 2020-2021 school year needs to be delayed or offered via online only. Keeping OUR students, teachers, staff, bus drivers, nurses, administrators, and everyone each individual person is in contact with on a daily basis outside of the school building healthy is the GOAL.</p> <p>Please help stop the spread of Covid-19 and give the scientists time to develop a vaccine and YOUR former students, who are now the nurses, doctors, hospital staff, time to care for those who are already ill.</p>
7/21/2020 10:16:53	Jeremy	Purdy	USD 480	Liberal	<p>Please support the Governor's EO delaying the start of school. This time is needed to safely and effectively implement strategies and safeguards to keep students and staff safe for reopening of schools. Trudging in without proper systems in place will create issues later where schools have to close due to higher sickness rates and will have a much larger impact on the economy than if we delay now. We often use a phrase in education which represents learning: go slow to go fast. Start slow do as you get into it you have less chance of having to start over and can move quicker through learning because you ensured the basics were learned in the beginning. Go slow to go fast now for students and teachers in Kansas. Support the Governor's EO to delay the start of the school year.</p>
7/21/2020 10:16:58	Forrest	Smith	America	Cheney	<p>Masks should not be mandatory or required. If you choose to wear one great but I do NOT believe they help whatsoever. Multiple doctors have voiced the same opinions. Pushing them on the people is going to cause issues.</p>
7/21/2020 10:17:04	Ashley	Pryor	USD 383 Manhattan-Og	Wamego	<p>I urge you to please support and approve Governor Kelly's EO 20-58. School administrations, teachers and staff need time to develop plans for the school year. Without pushing back the start of school, teachers will have days to prepare for whatever type of teaching they will be doing and also only days to rethink every single aspect of their "normal" school day. Pushing the start of school back to after Labor Day will allow teachers to plan comprehensive, meaningful lessons that can be taught through a variety of platforms (digitally, on-sit or hybrid) and give the students the education they deserve however that may look. Again, please support EO 20-58 so that we can have a safe and successful school year.</p>
7/21/2020 10:17:10	Allison	Day	Teacher in KCKPS	Olathe	<p>The governor's executive order will allow teachers and administrators to better plan and prepare for this year's challenges. Additionally, the state's current COVID numbers require leaders to put safety first.</p>
7/21/2020 10:17:11	Julie	Hamlett		Wichita	<p>I am fine with pushing the start date back, but that date needs to be set and not a moving target. I am ok with hybrid but am not thrilled with the at home log. I have a kid that will breeze thru his work, so making it mandatory that he sit on a computer for 6 hours is asinine. I have read numerous reports that children do NOT spread the virus, in fact that are considered "brakes" Some European countries did not require masks for any students and did not see any uptick. Even here in the US the YMCAs have had zero cases of transmission from a child to an adult. I think masks can be used by adults and those students who wish to do so, but making them mandatory is not necessary and will probably cause other illnesses to spread (stomach bug, flu) from touching and messing with the masks.</p>
7/21/2020 10:17:12	Jenna	Bunting		Ann Mah	<p>Please consider a later start. I don't want my daughter to miss out, but don't feel comfortable sending her with the increased cases. I'm praying you keep our kids, teachers, staff, and families safe!</p>

7/21/2020 10:17:13	Kim	Kickhaefer	My family	Abilene	I believe strongly that we need to start school in August as originally scheduled. I see no benefit to waiting until after Labor Day. The Covid numbers will not change significantly in that time. Most of our children are not able to learn properly at home. They need to interact with other students and the teachers that we are paying. While I believe there should be a virtual alternative available, society cannot function properly this way. Many of us parents work full time , to earn money and pay taxes for things like public schools and proper education for our children. We are not home schoolers, and every parent I have talked to struggled terribly last Spring with the shut down. Our kids are getting further behind every day we delay opening. Our communities also rely on our children having school to grow and learn. Parents that work and contribute to the community through taxes etc, need schools to provide our children with enrichment and social interactions. Many of us have no alternative care and if we cannot keep our full time work will then become more of a financial burden than contributor to our communities. Postponing school starting will only put our children and community further behind.
7/21/2020 10:17:16	Derek	Goon	USD 259	Wichita	Schools should not open up physically until it is safe for all people who would be in a building, both adults and children. Safe means no community spread in a particular city. This decision needs to be based on science and scientific guidance and not how an individual feels or political affiliation.
7/21/2020 10:17:19	Lindsay	Clements	LFHS	Lawrence	Please allow athletes to continue summer conditioning and sports practice during the month of August. I am in support of school not beginning until September, but please allow our athletes to continue working out.
7/21/2020 10:17:25	Anonymous	Anonymous		Overland Park	<p>There are so many reason to reject this order. Our local school boards should be trusted to make this decision.</p> <ol style="list-style-type: none"> <li>1. Many graduations were delayed and scheduled for next weekend. To strip that away from seniors who had the roughest senior year, is wrong. They were patient and waited. To strip that from them 2 days before graduation is cruel.</li> <li>2. Schools and staff have worked all summer just as you have preparing. Graduation plans were just one of many events schools made safe for the public. They had plans they intended on sharing prior to the announcement of this order.</li> <li>3. If schools need more time, it should be up to the schools. Students are not all the same just as school districts are not all the same.</li> <li>4. Why delay even online school? What sense does that make it? If the idea is students CAN learn remotely, why shouldn't it be up to a district to utilize that option in August?</li> <li>5. I am an educator who believes schools should provide an option. I, personally, have no qualms about teaching in-person. We may be silent on social media, but I know many more educators like me than those demanding our lives are at risk.</li> <li>6. Options are key. It is wrong to force everyone to do the same thing. Parents and educators and school boards should not be demanded to do things against their better judgement.</li> </ol>
7/21/2020 10:17:30	Christy	Hammer	Wallace County Schools	Sharon Springs	We do not need state wide mandates for the date of school to begin. We right now have 0 cases and while we know that this may not last forever, we need to be able to go to school while we can. If We are mandated that we start late, what happens if we have an outbreak later and we need days. If you are mandating that we still need to comply with the 1116 hours, how do we adjust our already set calendars? Allow us to use our hours in accordance to how our area is handling the corona. Please stop the madness of state wide mandates. County officials can be utilized to assess our county's situation and make the best decision for us. Sorry, Topeka has no idea what we do out here and how we function. One last point, if we all have to have masks, why are we delaying the start of school? We have assessed this situation all summer. Let's get back to educating students, they are already behind from last year.
7/21/2020 10:17:34	Brandi	Peach	usd262	Wichita	Please vote yes to the EO to delay schools so districts can prepare with the guidelines and numbers can come down. I would rather delay than have to start remote because of it. Go slow to go fast

7/21/2020 10:17:40	Joshua	Funk	MCSEC#617	Hillsboro	I firmly believe that schools need to be closed until we have more time to come up with learning/enforcing our plans.  As someone with previous health conditions that are exacerbated by covid19 I am afraid of starting without more time. Does the Board of Education want to pay my deductible once I'm in the hospital on a ventilator? How would they feel to sign a waiver guaranteeing to pay for any medical costs for me?
7/21/2020 10:17:45	Deana	Shenouda	Parent	Lawrence	Please allow sports practice even if school is not in session
7/21/2020 10:17:45	Marcy	Shirk	Public school teacher, p	Emporia	This is not an easy problem in which to find a solution. Thank you for your countless hours of thought and effort. I know the discussions are not easy to navigate.  Please do not approve mandate 20-58. Please push the choice to individual school boards or county governments. I say this knowing that my district would probably push our start date back to after Labor Day. However, there are towns in Kansas that have never seen a case of Covid. There are towns in Kansas that have had zero new cases in over a month. Please do not force those students and teachers to delay until the rest of the state is safe to open. They are safe, currently, and shouldn't have to delay the start of the year.  Please take it from a teacher; we miss our kids. We want to be in our buildings with our students. We want everyone to be safe. Our kids need routines and stability. I may have to wait longer but don't make others wait on our account. Let the local governments choose what route to take for their own communities and schools.
7/21/2020 10:17:49	Elizabeth	Gilmreu		Overland Park	Please support Gov. Kelly's Executive Order. I am a parent of a high schooler who wants to go back more than most kids and even she recognizes the need for this delay. It is time to put politics asides and let the Governor govern.
7/21/2020 10:17:50	Summer	Moeckel		Madison	Starting after Labor Day will give teachers time to come in on their original contract date to plan for the new competencies model. Grade band teachers will have the time to meet and prep for several weeks in order to develop the best possible plans and procedures that focus on safety as well as a rigorous education.
7/21/2020 10:17:51	Michelle	Anderson	My family	Lenexa, KS	I am in support of Gov. Kelly's plan to delay the opening of schools in KS until our coronavirus numbers are looking better (or no new cases for 14 days).
7/21/2020 10:17:53	Krisri	Ford		Olathe	Please think about not just the students but all the staff. We have so many high risk staff and the numbers are troublesome in Kansas right now. Schools are just not ready to be able to keep us all safe yet. We need more time to get ready. So please, please, please think about the adults in the building and do the right thing.
7/21/2020 10:17:53	Diane	Vaughn	USD 420	Osage City	I have never felt so uncertain going into a school year as I do now. I've always believed the 2.5 days prior to the start of school is inadequate and this year more than ever educators need additional time to plan and prepare for a safe and rich educational experience for our students. We need to support parents whom choose onsite or remote learning and we cannot do this without preparedness. Please support the governor's executive order.
7/21/2020 10:17:57	Madison	Thompson	USD 457 Teacher and P	Garden City, Ks	I believe that we should follow the State Order. This will help ensure a safe plan of education. We cannot "jump the gun". Staring unprepared increases the likelihood that we would have to return to distance learning due to high numbers of Covid-19 cases.
7/21/2020 10:18:04	Maggie	Dieckhoff	USD 232	Shawnee	Schools should be allowed to reopen and not delayed in opening. Children need to be in school. Their mental, emotional, social and academic health depends on it!! We should not be delayed!
7/21/2020 10:18:08	Kristin	Kay	myself	Gardner	I fully support keeping our teachers safe through delaying the start dates of school and mandating masks in school. Please do not waste my tax dollars on workers comp and settling lawsuits for the state's negligence.

					<p>Delay of school okay No Mask options for students Let's get them back to a normal they know and understand kids strive to be social and active - school provides this. If we're sending them back to school without it being normal- than what is the point. If it is going to be all work and no play they might as well stay home- getting our kids back to school and make them feel as if it is a work horse or. Prison is not going to give them any more than what the last 3 months of school was last year. I can teach them more at home myself than they learned on line or will learn in school with no activities or extra curricular classes.</p> <p>Sitting in one class for 8 hours for these older kids is not feesable, they need social activities and friends and regular ability to participate in sports like normal.</p> <p>If we are not showing a huge number or any numbers in kids under 18 than why are we so focused on not allowing them to be normal kids? In school like normal? With friends like normal? Learning like normal? But we can send our kids 16-18 to the work force like normal, but not school?</p> <p>I understand it is a very confusing issues... my 6 kids want to go back to a normal school routine, they appreciate the school life and look forward to it daily, it's a part of their life, socially, activities and education!</p>
7/21/2020 10:18:10	Kristen	Baty	Parent	Goddard	
7/21/2020 10:18:11	Brendan	Jackson		Mission	I am the spouse of a teacher and I support Governor Kelly's plan to delay the opening of schools. My wife needs this time to prepare and plan for all the possibilities of educating her students during this Pandemic.
7/21/2020 10:18:16	Jim	Mitchell	Teacher USD 204	Bonner Springs	Put politics aside and the safety of our students, teachers and school personnel first!!
7/21/2020 10:18:16	Erica	Birney	Self	Lenexa	Do not delay school opening.
7/21/2020 10:18:22	Janine	Kluckhohn		Olathe	I support the delay of school. I don't think it's safe to send out teachers and children back when the numbers are rising. I would support a return with a hybrid instruction to allow time for cleaning and to utilize online remote learning with in person instruction.

7/21/2020 10:18:20	Kelly	Michael		Overland Park	<p>I am extremely troubled by the Governor's executive order to delay the start of school for many reasons, and I think it would do more harm than good. All of our districts had plans to open or were close to having such plans she appears to want to overrule them. Adding a month does nothing for those plans as they are for the most part ready. Schools have had 4 months already to plan and from what any of us can tell have done a great job of doing so. So extending that an extra month does nothing to enable schools to get ready for students or to make it safer, but rather hampers their ability to learn. If schools need more time, let them individually ask for it. And I am fine with schools providing a virtual option, not all parents feel comfortable and not all teachers feel comfortable, but to not allow any schools in the state to open does our communities a disservice.</p> <p>We live in the Blue Valley School system and that could not be more different than the 1A school systems throughout the state, most of which are in rural Kansas. The parents in these smaller communities have much different needs. My experience is that people who live in rural communities have much less ability to "work from home" so by forcing schools to remain closed you are hindering the ability of many with younger kids to earn a living, which is increased in rural communities. And for those that can work from home, you are hindering their ability to work efficiently and grow the Kansas economy.</p> <p>By going virtual for an extra month, you are extending the loss of education across the state even further. Those who are less affluent often don't have access to a lap top and/or high speed internet, so you are putting them even further behind. Virtual learning for elementary and even middle schoolers is also much less effective, so those kids are going to suffer a lot, even from one more month of virtual learning. As you get into high school, it can be more effective to have some level of virtual learning so perhaps some adjustments can be made to how they operate. But again, let the school systems figure that out, don't send commands from Topeka for them.</p> <p>Then there is the risk that students and teachers are in. As has been shown by the CDC stats several times over, the risk of death below the age of 15 is a fraction (1/5-1/15) of what the risk of death from the regular flu is. So for those students this year they will likely be safer because there is significantly more cleanliness that will be occurring. For high schoolers it's probably slightly less dangerous than the flu (<a href="https://freopp.org/the-chances-of-dying-from-covid-19-">https://freopp.org/the-chances-of-dying-from-covid-19-</a></p>
7/21/2020 10:18:24	Shannon	Woods	Teachers	Abilen	<p>First let me say, I WANT to go back! I miss my students and my job! I have years of education experience and multiple degrees and teaching is my passion. However, I want to live through the year with all of my colleagues and students!</p> <p>Please give us the time we need to make the recommendations you have passed! Asking schools to come together and to fine the resources we need in this short amount of time is going to make it even harder!! The kids are not going to fall behind and this is what is best. We need to give time for it to decrease in order to keep the kids in school. Please don't make this a political decision but rather one that will keep our teachers and students alive and healthy.</p>
7/21/2020 10:18:24	Kesha	Peters		Wichita	<p>I do not think it is safe to return to school in person until the Covid-19 numbers are decreasing and/or under control. I teach in Sedgwick County and our numbers are spiking daily. I would love to be back with my students face to face, but I don't feel it is safe for my students, myself or my family. I am not opposed to online school and actually found it to be quite enjoyable when we did it in the spring.</p>
7/21/2020 10:18:37	Karla	Viranda	Teacher in USD 506...	Parsons	<p>Please support our governor. As a teacher, I would love to be able to go back sooner. With that being said, I feel we should not take the risk of going back on original date. I ask you to help keep us teachers, students, and support staff safe. We are very concerned, and our morale will be gone if we are not listened to. Thank you for your time and dedication to education. You are very much appreciated.</p>

7/21/2020 10:18:40	Laci	Babcock	Butler county	Augusta	My husband is a teacher in the bluestem district and I work in the west elk district as an SLP. Please keep up safe as we have, unlike some, experienced this virus first hand as we are from Logan Kansas and know many of that community. It's a real thing and we need to keep everyone safe. Please consider waiting to open schools until numbers decrease. I feel like I will feel more confident doing therapy online at this time so I don't have to worry about the spreading of germs, Which I have already encountered during summer school. There are many medically fragile students who could receive support online-we just need time to educate parents on this. Students of all ages can connect virtually-through classrooms or individually on their own time. We need to use our resources and educate teachers, caregivers, and parents at this time.
7/21/2020 10:18:41	Amanda	Amador	USD 259	Wichita	Covid numbers are still too high to realistically open right now
7/21/2020 10:18:51	Alicia	Koranda		Prairie Village	I think this delay is good and should be used to better prepare and plan. As of right now, there is no plan. Just ideas.
7/21/2020 10:18:54	Kelsey	Easterday	USD 373	Bel Aire, KS	Please honor the Governor's Executive Order. Kansans need to protect each other, and the additional weeks will give us a chance to get cases back down and create the best possible education for the kids. Remember, schools aren't bubbles full of children. And children get sick too.
7/21/2020 10:19:07	Karen	Pittman	Blue Valley School Dist	Olathe	I firmly believe that we need to look at virtual learning for all students. We are putting staff members at a high risk. It is impossible to expect elementary student to be responsible at washing their hands every hour. They can't remember to keep their hands away from their noses,eyes, and mouth. Many students have to be reminded just to wash their hands after going to the bathroom. We don't know enough about this virus to make sure that we don't infect other students and staff. Once Fall comes around many students will also come down with the flu. We need to wait on opening schools! Johnson county continues to soar. Please stop and consider the faculty and students. Let's keep them safe!
7/21/2020 10:19:11	megan	king	None	Lawrence	Kids need to get back to normal. They need to get back to school in person with their peers in a classroom. They need to continue their sports that give them structure, routine, and leadership even if school is not in session until September. We know from facts that the virus does not effect this age group in a devastating way. What is more devastating is the mental depression we are loading on them Punishing them for something that doesn't even affect them.
7/21/2020 10:19:11	Tiffany	Eagle	Usd377	Atchison County	There is no evidence to support the delay in starting school in Atchison county. Less than 1% of residents that reside in the county have tested positive and we have currently 5 active cases and zero deaths. This does not support the extreme measures trying to be set into motion that is going to affect the mental health and social development of our children.
7/21/2020 10:19:12	Stacey	Martin	Elementary Special Ed	Olathe	I've had several teacher friends in other states who have already began their school year, only to stop two weeks in. Students and staff did not feel safe. I love my students, I love my job, I understand parents need to get back to work. I am trusting we will do what's best for Olathe and begin school when we have taken all steps necessary to keep everyone involved safe. Thank you.
7/21/2020 10:19:16	Leanne	Klassen		Newton	Delay the start of school! We are headed in the wrong direction and if we want schools to stay open past Labor Day we need more time. Don't make this decision as Democrats or Republicans make it as Kansans. When the Governor asked us to wear masks we could NOT listen and you see where that got us. Three weeks is a small price to pay if we can slow the spread and protect the thousands of students and staff!! Thank you for listening.
7/21/2020 10:19:17	Daniel	Woods	Parent	Abilene	With all of the differing opinions pertaining to COVID 19, I believe we should side with the medical facts. Not give in to politics. If the medical field recommends strict compliance of mask in schools or later start date, then we should comply. If they eventually determine school should be conducted online then we should do so. We need to remember once a child or teacher has contracted the virus, it will effect many other families along with their own.
7/21/2020 10:19:18	Briana	Salgado	USD 259	In Maize, Ks	Teachers and students should be safe. It is not safe to return to schools without teachers and students exposing their lives. If safety is not 100% guaranteed, then wait to open until it is. Lives are at stake and people needing sitters so they can go back to work should not take precedence over lives.
7/21/2020 10:19:18	Brandyn	McDonald		Manhattan	Please prioritize public health recommendations over public opinion for this decision. We need a decision based on science, not politics.
7/21/2020 10:19:19	Brenda	Bonham	School lunch staff	Mulvane	Please wait till after Labor Day. Listen to the experts. We can beat this if we work together.

7/21/2020 10:19:20	Stephanie	Anglin	Parent	Louisburg	I support opening schools on time this year.
7/21/2020 10:19:22	Ana	Martinez	Parent	Liberal ks	Keep schools closed to early to reopen amidst of all spikes going on! Keep our kids safe.
7/21/2020 10:19:26	Lori	Harlan	self	Manhattan	Please support the governor's decision. Lives actually depend on it.
7/21/2020 10:19:37	Neil	McLeod		Shawnee	I agree with the governors executive order. The measures taken by school districts is not enough to keep students and staff safe. In fact, I believe it may be prudent to resort to remote learning for at least first quarter if not the first semester.
7/21/2020 10:19:40	Jeff	Evans		Pratt	I think the kids need to go to school on time
7/21/2020 10:19:43	Caleb	Stewart		Salina	Please support the executive order. Thousands of lives depend on your actions. COVID-19 isn't going to just disappear. We must all take appropriate actions to help save lives from this virus. School age children and just as likely to spread the virus as adults, so putting groups of them together with older teachers, paras, and other school staff is simply not a smart decision. The governor has attempted to leave some power to the local governments recently (phase out and mask order) but local governments have proven to be unable to make the right call to save lives. I truly hope Governor Kelly will have your support in protecting the future of our state: our students. Thank You!
7/21/2020 10:19:48	Bett	Russ	PTA and parent	Kansas City	Please leave them closed until after labor day and then do online schooling. We can not risk our kids. Let's see what 2021 brings before opening.
7/21/2020 10:19:56	Monnica	Westendorf		abilene Ks	Personally I think that delaying the start is a bad idea. Kids need to go back for not only their education but for the social interaction. For some kids, school is their safe place and where they get food. For kids that have IEPs, they need their services. some don't do well with virtual e-learning for example my son who is autistic could not full complete his work because I didn't understand it. We as citizens pay taxes for their education and I want my child to get his. I am a single parent and was very hard to juggle his m school and my work. Thankfully I had a great boss that understood but not all parents do.
7/21/2020 10:20:00	Allison	Minge	Marysville High School	Marysville	As a RN, we need to open schools for the mental health of our students. We have seen increases in mental health problems with children social distancing at home for so long. PLEASE open schools on time. Give families options to learn in school or remotely. Don't hurt the teachers and students anymore!
7/21/2020 10:20:01	Jake	Klassen	N/A	Newton	This fear mongering has to stop. Get the kids back to school and get people back to work! Experts have said that masks don't even work, this is crazy to try to mandate.
7/21/2020 10:20:03	Michelle	wolfe		manhattan	I believe our children need to be in school. They need the interaction with other children and they need to learn. There is many single parents that work full time that are not able to do the online learning. Why not take a poll to find out how many kids would be coming to the school to learn and how many would be doing this from home. Maybe that would help to have those numbers, so you know exactly how many kids would be in each classroom.
7/21/2020 10:20:05	Amanda	Featherston	I am a parent - Shawnee	Overland park	There are safe ways to begin having school. Kids deserve and need more to guard from mental issues.
7/21/2020 10:20:07	Nancy	Campbell		Manhattan	I support delayed until Labor Day
7/21/2020 10:20:14	Robin	Berrey	USD 233	Paola	I would like for school to start in September allowing school more time to put into place hand sanitizer in classroom, figure out how to make classroom fit the social distancing, school figure out how to handle the mask wearing with kids, and how to get all the kid temperature checks done in a timely manner in the morning. It is too risky for our kids to go back right now.
7/21/2020 10:20:20	Kerry	Mizner	Kansas Public Schools	Shawnee	Please uphold Governor Kelly's executive order to reopen schools after Labor Day. The COVID numbers keep going up in Kansas. Many corporate offices remain closed and employees continue to work from home. Why would we put children, educators, and support staff in harms way? Schools will become revolving doors of open and close with each COVID outbreak. As a parent my daughter will not return to KU for the first semester due to COVID. We have stayed home and away from family and friends. We wear masks. This is the first summer in 34 years of teaching that has been filled with anxiety and stress. I've taught elementary school for 34 years I love what I do and would like to teach a few more years. I'd like to stay alive to enjoy my retirement. COVID is a health crisis NOT a political issue!

7/21/2020 10:20:25	Kristin	McCoppin		Overland Park	I am very concerned about the language barrier for my incoming Kindergarten if he is required to wear a mask all day. Kindergarten is already so over whelming for children and to have to be expected to wear a mask all day on top of everything else Kindergarten brings is unrealistic. Especially since learning to read is such a big part of Kindergarten, wearing a mask will put such a barrier up.
7/21/2020 10:20:27	Margaret	Gugino	USD 259 teacher	Wichita	No in person classes until spring semester. This needs to get under control and placing us and our students back in school is going to create massive spread of the virus and death. I am a special education teacher in Wichita, I have a daughter in USD 266, I want her to have a safe first year of high school. I want to see my students, I miss them terribly. But how can we be sent back under such detrimental conditions? The public is more concerned about professional sports than they are about teachers. Please help us. Please protect us.
7/21/2020 10:20:28	Kerry	Steiger	USD 475: Geary County	Abilene,KS	Please follow the governor's EO to delay until after Labor Day.
7/21/2020 10:20:32	Benny	Teague		Wichita	I am retired, but I have Grandchildren that are just now getting back to work to being a viable part of the work force & taxpayer. The cost for childcare if it can be found is very high. With reasonable precautions, there is no good reason to delay the start of the school year. To delay 4 to 6 weeks will NOT increase our community safety by any significant number.
7/21/2020 10:20:32	Shannon	boone	My home & family	Wichita, KS	Please don't send our kids and teachers to school in September.
7/21/2020 10:20:33	Neal	Whitlow		Augusta	As a parent of two children in public school, I strongly prefer delaying school's start date. With Covid-19 cases trending upward, this would give extra time for put safety plans in place and for new infections possible to begin to trend downward. Outbreaks in public schools would be disastrous. Please, for the safety of my family, delay the start of schools until September.
7/21/2020 10:20:36	Dorothy	Hefner	None	Overland Park	Education is important to both the students and our society and our children need to be in school. Please make decisions after much insight from educators, Parents and informed people
7/21/2020 10:20:40	Shanna	Martin		Topeka	As a parent and public school employee, I'm asking you to uphold Governor Kelly's Executive Order to delay the start of the 2020-2021 school year until after Labor Day. It's the right thing to do for the safety of our children, faculty and their families and communities. Thank you.
7/21/2020 10:20:48	Sheryl	Ragland		DeSoto	Please support Governor's EOs for school closure till after Labor Day and use of masks and temperature taken upon entering school building. I support this for all Johnson County and Douglas County Schools
7/21/2020 10:20:56	Steve	Shanelec	General public	Wichita	As a grandfather of a public school student I fully support the governor's order to delay the start of school year.
7/21/2020 10:21:01	Paula	Davis	School Nurses/parent	Meriden	I agree with Governor Kelly. As a parent, I want my senior to be able to go to school and feel safe. I do not want him to feel threatened because he and his family believe in Science and that a mask is a great way to stop this virus from spreading. We live in a community that rejected the mask ordinance, that has been allowing mass gathering and not following basic protocols. We are at High risk here. Putting children from this population back in school under the current circumstances will just bring our community into its own nightmare. As a school nurse, I have read literature from science professionals and have based my opinion on facts and accurate statistics. My school district ordered supplies in March we have yet to receive the majority of it. I can not keep children safe without the much needed supplies. Secondly, the KSDE recommendations just came out and we will have to revamp the plan we had in place. The added time will allow this to happen. Please take these things into account. The numbers of Covid for this age group is rising. I don't want it to be my child. My staff is at risk, I don't want one of them to be affected. Thanks for listening.
7/21/2020 10:21:04	Chadwick	Sanem	Olathe Public Schools	Olathe	Open schools Sept 9

7/21/2020 10:21:14	Hallie	Beardsley		Blue Rapids	Please dont delay schools and sports. These kids are suffering without their peers. If there are no sports the drop out rate will raise significantly. Im afraid for the kids who turn to drugs or suicide. They need us there teachers and the ones who provide them with love and give them courage. Please let us go back to school on time.
7/21/2020 10:21:15	Erin	Alexander	Teacher	Valley center	The children of Kansas need to be back in school. Their mental health and social health will continue to deteriorate if they stay at home. Think about their future - please don't make them fix what our generation has messed up. And also think about the thousands of kids that live in abusive homes, extremely poor homes with no food, or homes where the parents cannot be with them during the day - their only safe place is school.
7/21/2020 10:21:21	Kristin	McCoppin		Overland Park	Delaying school also delays routines, parents who are working parents and parents struggling to find childcare.
7/21/2020 10:21:30	Angela	Stiens	Parents	Shawnee	I would like for the board to respect and vote local control of our schools. In kids the virus is very low spreading to other children and the death rate is zero. Mandating masks in children under the age of 12 is not even warranted. Please let the school and the parents decide what should be followed. Thank you for your consideration.
7/21/2020 10:21:54	Mallory	Arends		Olathe	I would like to encourage you to approve Governor Kelly's order of delaying the start of school until after Labor Day. I have seen much of the data discussing the effects of Covid-19 with younger children. My concern lies with the young adults in our public schools. As a high school teacher I come in contact with at least 100 students a day. With the increasing trend of infections in the Johnson County area I think it is best to delay. These teenagers can transmit the virus to each other and to other adults they come in contact with. The spread of this disease will run rampant in middle schools and high schools where students change classes and see different peers each period. I don't see how schools can effectively prevent the spread of the virus.  Due to the ever changing nature of this pandemic, I have yet to be able to plan for this upcoming school year. I think parents and teachers alike will agree that the distance learning that took place in the spring was a failure. Teachers, administrators, and support staff need time to plan to make sure when school resumes we continue to give Kansas kids the best education whether it is in the classroom or through distance learning.  Thank you for your time and consideration,  Mallory Arends Concerned Kansan, parent, and teacher
7/21/2020 10:22:08	Betsy	Boyce		Lawrence	Please support Gov. Kelly in delaying the start of the 2020 K - 12 school year until after Labor Day. Our schools, administrators & teachers need additional time to effect the safest possible reopening, to protect both our students and staff from the risks of coronavirus.
7/21/2020 10:22:09	Laurie	Kilgore		Overland Park	Our kids need structure, schedules, normalcy. Please let them resume school at the normal date AND play sports. Their mental health needs it.
7/21/2020 10:22:13	Molly	Parker	Student	Olathe	I agree with governor Kelly's decision to delay school until the coronavirus numbers decrease and it is safe for kids to go back.
7/21/2020 10:22:13	Jennifet	Franco	Marysville High School	Marysville	I really believe we need to delay school. I know we all want to go back to normal and the best thing to do is send the kids back to school right away. But I'm afraid that wouldn't last. We need to delay school and maybe everyone will listen and be more proactive on wearing a mask and do proper hygiene as it's recommended!
7/21/2020 10:22:21	Cynthia	Nitschke	Recently retired teacher	Stilwell	Please delay start of school. Make up much of it by cutting student days off (inservice, p/t conferences, etc.). Community spread of Covid 19 is too high to safely start. Districts have not had time to read and make preparations needed for state recommendations. Appropriate social distancing is not possible in classrooms or on buses.

7/21/2020 10:22:27	Kim	Mitchell	USD 204	Basehor	Please support Gov. Kelly's executive order delaying the start of Kansas schools. As a building administrator, we need the time to plan and the time to secure additional funds to put all of the supports needed to safely open Kansas schools. Everyone desperately wants things to return to normal, but in a pandemic situation, that is just not possible until we can ensure that our students and staffs are safe. I have deep respect for all of you and the work that you do for the citizens of Kansas. I ask that you have the same respect for our Kansas educators and students and put their safety at the forefront of your decision. It's not about making people "happy", restarting our economy, or being a "patriot". It's about keeping our youngest Kansans safe.
7/21/2020 10:22:28	Annett	Amaro		Junction City	I suggest that face to face instruction begin after the end of the flu season.
7/21/2020 10:22:37	Susan	Cunningham	High school	Altamont	I agree with delaying the start of school.
7/21/2020 10:22:42	Ashley	Welsh		Emporia	The vote Wednesday should be to uphold the executive order to delay until after Labor Day. I also feel that we need to be considering virtual learning for a large portion of the school year, and if it isn't mandated at the state level my district may not require it. These are unprecedented times. There has to be a level of understanding of anxiety and fear. My own child said she was scared to go back to school. I am scared to go back and teach. I will have 200 kids in my room daily. I will be a person of huge exposure. If this is the case, how do we handle if one of our students get this - they were all in my classroom at some point that day. Close the entire school for 14 days? So many questions to answer and I'm not sure we can find and agree on the safety factors of those answers by our normal start date.
7/21/2020 10:22:46	Lisa	Martel		Overland Park	I have taught in suburban public elementary schools for nearly 40 years. I LOVE my job and my students. No one wants schools to open more than I do. That being said, given the current state of this virus, I don't know how that can be done in a manner that will keep all safe and give a quality education to kids. For example, plans to reopen say hand washing every hour. Sounds easy on paper, in a classroom with 24 kids, if 3 wash at the same time that will take 10 to 15 minutes each hour out of learning. I agree with Gov. Kelly. Let's delay school and get this virus under control. When I first started teaching school did not start until the Tuesday after Labor Day. No one suffered from a lack of education. As a state, if we are going to make a decision about children and educators please make it on the side of health following the science. Thank you for giving me this opportunity to share my views.
7/21/2020 10:22:49	Elizabeth	Bechard		Topeka	Please support the Governor's executive order. There are too many lives at stake.
7/21/2020 10:22:50	Beth	Hyder	Speech therapist	Wichita	Please do not open schools until after Labor Day! Superintendents, principals, and teachers have not had enough time to sift through the 1100 page document from KSDE and be prepared by August 13. Also, Covid-19 cases continue to rise.
7/21/2020 10:22:54	Julia	Patnode		Olatje	Please keep schools closed until after Labor Day to help the curve flatten again!
7/21/2020 10:22:58	Libby	Ziegler	USD 208	WaKeeney	I am a parent of 3 and a school board member for our district. School needs to resume as scheduled. I believe each district should be able to establish their own precautions on how they see fit for their community. Our children are in great need of socialization and structure for their mental health. It was evident that online learning, for the elementary grades specifically, was detrimental to their learning and frankly a waste of time. We cannot run from this virus, therefore we need to resume school/activities while exercising caution.
7/21/2020 10:23:02	Jill	Hall		Norton	We fully support the governor's decision to wait until after Labor Day to open schools. This allows not only for a better assessment of Kansas state of health but also allows our schools more time to plan and prepare as research is being evaluated. Thank you for your consideration.
7/21/2020 10:23:05	Rexana	Prater	USD 382	Pratt	I feel like our school district (USD 382) is well prepared for the start of school and have already provided parents with their plans to safely bring children back to in class learning. A mandate for the entire state is not appropriate and should be left to school districts and counties to determine what is safe for our kids. I believe that with the parameters set in place by our school district, they can effectively determine when it's the right time for kids to return to school and not a mandate. Our school district and county health department may very well decide that it would be best for our school to push the start date back based on our current active COVID-19 cases, but that should be their decision based on our current circumstances.
7/21/2020 10:23:10	Stacy	Hook		Emporia	I do not think that school should be in person at all this year or until COVID is gone. There is no way possible to keep or expect children, especially young ones, to maintain a safe distance or wear a mask for such long periods of time.

					<p>Please please please delay as long as possible a return to school. While there is conflicting data on how badly and even if children younger than 10 are vectors for COVID-19, even 1 child harmed, 1 family devastated, is 1 too many.</p> <p>Please listen to scientists &amp; doctors about best practices and lean on their extensive expertise. Remember that every single number in the data represents a human being that could have been you, your spouse, your child or your parent, because every single one of them was that to someone else.</p> <p>We can still do the right thing. Mask up, physically distance &amp; shut it down again. Our country and our state have seen increases in cases precisely because previous shut down and mask mandates worked to flatten the curve, but because we are a society that cares far more about convenience than we do about the common good, we now have a spike that is poised to continue trending higher. Do not exacerbate that by putting kids back in schools. Think about the educators, the aides, the staff, the kids parents &amp; grandparents. Those kids may not catch it, but they will surely bring it home on their clothes, their backpacks, schoolwork, etc.</p>
7/21/2020 10:23:11	Heidi	Washington-Akers		Topeka	Be smart about this. Do the right thing.
7/21/2020 10:23:11	TINA	HIGLEY	PARENT OF MIDDLE	GOESSEL	I AGREE WITH THE GOVERNOR, LET TEACHERS AND ADMIN HAVE THE TIME FROM NOW UNTIL AFTER LABOR DAY TO FIGURE OUT HOW WE DO SCHOOL.
7/21/2020 10:23:13	Emily	Meissen-Sebelius		Prairie village	I support delaying until after Labor Day, in particular if it gives the schools and communities time to take additional precautions and mitigate risks. And I prefer in person if possible, so if delaying makes that more realistic I am in favor
7/21/2020 10:23:19	Kathy	Shanelec	General public	Wichita	Please fully support the governor's order to delay start of school year.
					<p>To the decision-makers at the Kansas Department of Education,</p> <p>I implore you to reject Governor Kelly's executive order delaying both academic school as well as athletic/extracurricular activities until after Labor Day. Our kids have already missed out on 3 months of education this Spring and they desperately need the structure that being back in school provides. They need to learn, they need to socialize and they need to participate in the activities that fulfill their social-emotional needs. The facts of coronavirus do not support this delay and school districts have been preparing for months to ensure the safety of both students and staff when classes resume. The mental health effects of this delay will be detrimental to children of all ages. Children in abusive homes will continue to fall victim to their abusers for even longer. Students with special needs will go longer without with their much needed therapies and services. The decisions to start school and how to manage that process should fall to the local districts. All school districts across the state cannot and should not be addressed with one blanket order by the Governor. This is an example of government overreach and it is up to you to stand up for the health and safety of our children and REJECT this executive order! All K-12 students in the state of Kansas are relying on you to do what is right for them ... now is your time to stand against bureaucracy and for the best interests of our future generation.</p> <p>Thank you for your time, Samantha Moore USD 233 Parent</p>
7/21/2020 10:23:24	Samantha	Moore		Lenexa	
7/21/2020 10:23:25	Carolyn	Lathan		Salina	Please follow Governor Kelly's order and keep school starting after labor day.
7/21/2020 10:23:27	Cindy	Willis	USD 469	Kansas City	Yes, keep the schools closed til after Labor Day!
7/21/2020 10:23:32	Brent	Cosens		Pittsburg	If we don't start school as planned in August, then I doubt we will start in September. The virus will still be here and really nothing will have changed. At some point you move forward and deal with consequences as per normal.
7/21/2020 10:23:35	Kirby	Smith	Kirby Smith	NEWTON	Please open our schools on time and let our kids participate in extracurricular activities. The disruption in their lives is not worth the low risk of infection from COVID-19 in this age demographic.
7/21/2020 10:23:35	Brynn	Shideler		Shawnee	Please keep the decision whether or not to delay school reopening at the district or local level. This is not a one-size fits all approach. Leave the power in the hands of the individual school districts!

7/21/2020 10:23:37	Trish	Oviatt		Wamego	I support Governor Kelly. She is not closing school she is delaying the start and offering guidelines for schools to follow. Stop making this political and support the best choice for our children, teachers and other staff.
7/21/2020 10:23:39	Melanie	Musselman	None just my personal b	Clifton, our school distri	I believe it needs to be left up to the individual counties and school districts. This situation is not a one size fits all approach. There are larger cities and communities in Kansas where they do have more cases and they can act accordingly. But for instance in some parts of rural Kansas, the virus is not a widespread problem. I agree with the temperature checks and masks, if it means our children can go back to school on time and not wait until after Labor Day. I have two high school boys who are on special education IEPs and really struggled last quarter with online school at home. I'm afraid they will fall farther and farther behind, if they don't have one on one instruction with their teachers. I understand keeping everyone safe but I feel the costs of starting later outweigh the overall benefits at least for our local community. It has to come back to local governance. Let the local school boards and county health departments decide based on their county numbers of COVID-19. Thank you for your consideration and your concern for our state's school children!
7/21/2020 10:23:41	Jodie	Rients		Andover	I wish school started EVERY year after Labor Day like it used to. As far as Covid, I feel whatever it takes to keep our kids, educators, and our families safe should be done.
7/21/2020 10:23:44	Courtney	Ritchie	Maize	Wichita	Do not delay!!
7/21/2020 10:23:45	Jessi	Armstrong		FRANKFORT	<p>I am 41 year old substitute teacher. I have a 46 year old husband who has had a kidney transplant, cancer, stroke, hemolytic anemia..... and is severely immune suppressed. I have a 13 year old daughter who has a genetic disorder that lands her in the hospital when she is sick.</p> <p>I am covering a maternity leave to start the year out. I am in a small 1A school. We had lots of teachers retire this year. We didn't fill 2 teaching positions and 3 para positions. We have 3 reliable subs, myself, another lady who is also doing a maternity leave and the other took our school nurse job. I get that kids by far fare the best with Covid. The problem is who they infect, whether that is teachers, janitors, bus drivers, parents or grandparents. We need to not rush the situation and make sure we go into this with the best possible game plan. Where the heck do you think youre going to get replacements for these ADULTS when they get sick and have to isolate for 14 days or worse?</p> <p>The governor is not being political for the love of god. Had they not threw a fit about her order to slow the state opening maybe we wouldn't have the surge in cases like we do now.</p> <p>We are a sports family by and large! My 16 yr old healthy son loves sports and is a fantastic player. I don't understand how we are even considering sports when we can't decide how to open schools. The main priority is LEARNING!!</p> <p>Please take politics out of this decision.</p> <p>Thank you</p>
7/21/2020 10:23:53	Jennifer	Collins	Parent	Winona	Please vote NO in regards to the Governor's mandate! These extreme measures are negatively affecting our youth. Not only from an education stand point but from a social & emotional stand point as well. It also is impacting families livelihoods and the ability to be able to properly provide for their families. We have got to get back to living life normally and with common sense. We cannot teach our kids to live in fear!
7/21/2020 10:24:07	Stephanie	Shephard	USD 231	Gardner	I think the smartest and safest decision is to, at the least, delay the start of the school year. I have my 71 year old mom that leaves with me and I will choose my life and hers over the continous rise of cases in our county. If I'll still having to have meetings with my administration through zoom presently, it certainly isn't the right decision to throw all 1800 students plus staff into an enclosed school environment.
7/21/2020 10:24:15	Caitlin	Peterson	Olathe Public Schools	Lenexa	Please uphold Governor Kelly's order. Our cases are continuing to trend upwards. Governor Kelly uses facts and scientific data to drive her decisions, and you should too. 10-19 year olds can spread covid just as efficiently as adults. It's not safe yet.

7/21/2020 10:24:28	Abby	Bock	Cunningham Grade Sch	Cunningham	Please do not delay. The kids are already going to be behind after no school at the end of last year. Our class sizes are 18 at the largest with only maybe 100 in the entire grade school. Let districts choose their calendar, so decisions can be made based off area facts and not state wide outlooks. You can't compare our small 1A school to schools in Wichita or KC and say it's the same. I assure you - they are not!
7/21/2020 10:24:32	Valerie	Waddell		Olathe	As a health care provider, I support the order to push the start date of school to September. Our schools need time to prepare and understand how to make schools safe for not only children but all the teachers and staff. COVID will NOT be going away anytime soon and I do not feel safe allowing my child to be exposed to an unsafe environment just because people do not feel comfortable making changes and hard decisions. It is unfair to say kids will be fine because there are still so many unknowns and potential future implications to their health. Take a step back and make the right decision for society as a whole and protect our kids and teachers. Preventing sickness and death should be the top the priority, not convenience.
7/21/2020 10:24:38	Guy Anne	Hawver	Myself	Hutchinson	Please follow Governor Kelly's recommendation to start school after Labor Day. This is in the best interests of the teachers and students. Unfortunately the health and welfare of our teachers and students has become more political than what is best for them.
7/21/2020 10:24:39	Kraig	Westhoff	Myself/ Concerned teach	Topeka	<p>I wanted to take time and reach out to you about Governor Kelly's Executive Order concerning the safe reopening of schools this fall. I am a teacher in Kansas and have been for the past 8 years, and everyday I enjoy getting to see my students learn and grow in my classroom. I know that there is a daunting task before you and you have to consider the needs of parents, students, teachers, and staff.</p> <p>At this time I am worried about returning to my classroom. With cases on the rise, I agree with the governor, it is not currently safe to reopen schools. If we delay the start until after Labor Day, it allows for schools and teachers to prepare and implement the approved guidelines.</p> <p>To be an effective educator, I know that I am best at my job when I am in the classroom with my students ,but I understand the health risks, and danger that exists for them and their families that comes with the potential exposure to the Coronavirus, and to their teachers as well.</p> <p>I humbly ask that you accept Governor Kelly's Executive Order. Please, give us the critical time we need to ensure that all students are able to learn and grow in a safe environment.</p> <p>Thank you for your time,</p> <p>Kraig T. Westhoff</p>
7/21/2020 10:24:42	Catherine	Erbert	Kansas citizen	Wichita	I am 100% for the school board's approval of Governor Kelly's ordinance to delay the start of schools. I have several grandchildren in the Kansas school system and are very concerned about their health as well as the health of all children, educators, parents and families if school starts before the virus numbers have abated. It would be irresponsible for the board to not approve the Governor's executive order to delay and would put the health and lives of all Kansans at risk! Please vote to approve!
7/21/2020 10:24:42	Sheila	Musil	USD 380 - Vermillion	Frankfort	I am a 1st grade teacher, who is also pregnant and due this fall, which creates even more stress/unknowns. Though we don't have a high amount of cases in Marshall I am worried about the safety procedures with starting school. I will have 22 students in a classroom. I have been very careful since March limiting how many people my family is around and in 3 weeks I will be in a room with 22 students and their families are all taking different precautions and some are probably not taking any. I feel that we need to delay school and give school districts that extra time to make sure we have everything we need and have all of our questions answered, such as what do we do when a student or student's family member test positive? Will my whole class go online? What do we need to do if we go online, etc. I feel that teachers have so many questions and concerns with reopening in 3 weeks, why are we rushing this? I hate that this has become so political. It's not fair to our teachers/families that are high risk.

7/21/2020 10:24:49	Jordan	Barkley	Teacher	Overland Park	Please extend the opening of schools to Labor Day. As a teacher, we need more time to prepare for a safe and distanced opening with our district representatives. Opening school at a normal time makes me fear that certain measures may not be addressed and that we may not be provided the safest work environment possible for staff or students. Administrators and teachers should use this extended time for training and preparation for what may happen in the future. Please delay the openings of schools until September 9th, 2020.
7/21/2020 10:24:54	Renee	Robbins		Wichita	I fully support the delay to reopen schools until after Labor Day. Furthermore I expect a comprehensive, sane plan to protect our teachers and children and by extension, parents and families.
7/21/2020 10:24:55	Lana	Reinhart	Minneapolis High School	Minneapolis	As a teacher in a 7-12 building, I am very concerned about starting school face-to-face with the rising number of Covid 19 cases in Kansas. Wearing masks will help slow the spread, but I'm afraid teens will forget to socially distance—I've already witnessed this with summer conditioning. There is no way to effectively keep them apart. I am in favor of delaying the start of school in hopes the spread of the virus will get under control. Online learning would be a good option for awhile.
7/21/2020 10:24:56	Brant	Peoples	Parent and Pharmacist	Shawnee	I agree with Governor Kelly. Schools need to remain closed until this crisis is showing at least some signs of getting better. It is not. Opening schools will make this crisis exponentially worse and risk the health and future of our children. That is unacceptable.
7/21/2020 10:24:59	Lara	Kaljumaa	My family - we have a c	Valley Center	I would prefer that the schools open as usual this fall, possibly with staggered days to limit the number of students present at one time. If teachers are concerned, they should be provided with N95 masks to wear. This is no different than healthcare workers having to wear masks to work. From what I've heard, the distance learning that happened this spring was very inadequate. If the schools are going to require distance learning, they are going to have to provide a much better platform. I was homeschooled through high school and obtained a bachelor's and master's degree online through Fort Hays. It can be done well but Zoom meetings are not an appropriate format, especially for young children.
7/21/2020 10:25:01	Emily	White-Winter		Lenexa	I agree that schools should be delayed to start until after Labor Day. The outbreaks need to get under control and schools need time to prepare. I also think when they do go back having classes outdoors should be considered. That would keep students at school learning and socializing, and allow their parents to work. It would also keep the students and staff safer than if they were in an enclosed room for six to seven hours.
7/21/2020 10:25:04	Christine	Wiles		Olathe	Please consider delaying schools. This EO is in the best interest of safety for students, teachers, and our Kansas community. This time will allow for safety measures to be executed and time for teachers to plan for a different way of teaching. The governor's order is both reasonable and sensible in this time of crisis. The death of one student is unacceptable. The death of one teacher is unacceptable.
7/21/2020 10:25:10	Samantha	Hicks	St Johns Catholic School	Beloit	K-12 teacher here. I am so proud of all the efforts being made for the safety of kids and teachers. THANK YOU for your tireless work. Here are my observations in my rural community: They fight the masks, they fight the social distancing, and they want to be able to make decisions for our community without "bigger" influence. Here is the problem. They reject ordinances, then we have an outbreak. They don't want masks enforced, but people are not complying! As a teacher, I fear this non-compliance more than anything else. We say masks for teachers/kids. We say social distancing. We say hygiene. If the counties choose not to enforce this, how will we stop parents from sending their kids with no mask? With a temp? After exposure? As the Music teacher, I will come into contact with the whole school. I would feel much safer if I knew that protocols were being enforced somehow. Making parents comply to keep everyone as safe as possible. In our little communities, all of the outbreaks have come from people not following the rules. I'm scared of people who buck the system and call it patriotism. I feel very unsafe when my community has shown very little desire to be compliant to ordinances.
7/21/2020 10:25:10	Caroline	Hobart		Wichita	I support Governor Kelly's order to delay school opening. We need to get this right and get the virus numbers back down to keep our kids and school staff safe and to prevent another shutdown of our economy. I believe our educators will address any loss of student progress with their typical zest, grit, and professionalism.

7/21/2020 10:25:11	Michelle	Palmer	Teacher	Derby	Covid-19 is uncharted territory, in which we need to proceed with a lot of forward thinking. We need to open schools back up, but very cautiously. I think opening schools after Labor Day, allows districts to evaluate COVID-19 and gives a longer time line to have a safe, detailed plan to move forward. As the world has opened up, COVID-19 has hit high numbers and continues to rise. So, slowly opening up schools with a detailed plan is vital. We're not only looking at the safety for students, but for staff as well.
7/21/2020 10:25:12	Ramon	Chavez	private citizen	Topeka	I urge the KSBOE to follow the mandate of Governor Kelly. While without a doubt inconvenient (as almost everything COVID-19 related has been), I certainly would prefer adjusting the start (and possibly end date) of academic year as opposed to risking the health, lives, and safety of every student and every staff member in order to make things more convenient by starting the school year on time.
7/21/2020 10:25:13	TRUETTE	MCQUEEN	MY FAMILY	BARNARD	DO WHAT IS BEST FOR CHILDREN AND THE COMMUNITY. DELAYING TILL AFTER LABOR DAY IS NOT SUCH A TERRIBLE IMPOSITION. CHILDREN ARE NOT PAWNS FOR ECONOMIC DEVELOPMENT. THIS IS ABOUT COMMUNITIES AND KIDS NOT POLITICS.
7/21/2020 10:25:21	Katie	Glasscock	Olathe Public Schools	Lenexa	Please delay school starting until Labor Day. Please let districts decide what works best for them. Sports and activities should be allowed to continue as these students are working toward college scholarships and shouldn't be denied that opportunity if they volunteer to keep participating in sports and activities.
7/21/2020 10:25:21	Nicole	Coons	USD 475	Junction City	Let us start school in August, please.
7/21/2020 10:25:26	Amy	Burrill	McPherson USD 418	McPherson	Please open schools on time! Thank you
7/21/2020 10:25:40	Rachel	Porter		Fontana, KS	Yes - delay; virtual learning
7/21/2020 10:25:41	Jane	Doe		Spring Hill	Deny
7/21/2020 10:25:45	Amber	Navarro	USD 253-Teacher	Emporia, KS	As a teacher, parent, and citizen of Kansas, I am writing in support of Governor Kelly's executive order to open schools on September 9th. I believe that she has created this mandate in order to protect the school communities of our state. I hope you will support her by voting yes to the executive order.
7/21/2020 10:25:55	Sara	Gerner	Teacher	DeSoto	BOE needs to support the governor's executive order. Schools should be delayed until cases see a downward trend.
7/21/2020 10:25:56	Racheal	Weaver	School	Salina	No to in person. Work with Special needs. Not okay for them.
7/21/2020 10:25:57	Yvonne	Walter	Parent/District Employee	Fort Riley/Junction City	Face masks should be a must. Yes, the district should stay closed till after Labor Day. Water bottle stations need to be more than 1 per building. Water fountains should be removed. Bus aids need to be reliable and consistent in attendance.
7/21/2020 10:25:57	Timothy	Moser	Wilbur Middle School;	Wichita, KS	I am a teacher and at high risk for COVID-19. I have twice been to the emergency room for asthma, each visit saving my life and costing thousands of dollars after insurance. I care for my Grandmother who is over 90 years old and on oxygen. I do not want my professional life to endanger her, my family, or myself. I do not want our community to experience needless pain and suffering. We do not need to rush back to school.  We can make decisions which will lead to an objectively better future. As a science teacher I know that medical science works. We should listen to the advice of medical professionals when making decisions about the spread of a pandemic! It is essential that students and teachers delay the start of school until the virus has decreased substantially in Sedgwick County for 14 consecutive days and all necessary protective actions have been taken including reducing class sizes, physical distancing, and hands off curriculum. A plethora of PPE and protective equipment should be provided free of charge to all students and staff.  We should take the time to ensure the safety of our students, our families, and our teachers. I support Gov. Kelly's executive order to delay the reopening of schools until after Labor Day.
7/21/2020 10:25:59	Lisa	Wicoff	USD 257 parent and teacher	Iola	Please support Gov Kelly EO. We need time to develop the best plan for our district, but we also need some basic safety issues to be rules not guidelines. I support masks over 5. Kids can do this, we just have to make that the expectation. I DO NOT want students in my high school class without masks unless they are medically not recommended for that student.

7/21/2020 10:26:10	Whitney	Harvey	Usd259 high school teach	Wichita	<p>I feel completely comfortable returning to work and want to get back into the classroom. All of my coworkers I personally talk to over the summer feel the same. I do understand some might have medical conditions that would make it more difficult, but these conditions should be approved by a doctor. I do not think teachers should be allowed to not come to work just because they are scared. I feel that we are essential to the students. If they are too scared to work in person then they cannot fulfill their contracts. I have bad asthma, but have no concerns myself. I have a few points I would like to bring up.</p> <ol style="list-style-type: none"> <li>1. I am worried that if we do go straight into online students will have no training. I feel that is VERY important to at least get some time in the classroom with students to teach them how to use the online programs and their new computer devices correctly. I used google classroom pretty consistently in my class the past two years and some students still struggle on accessing and submitting while in the classroom! When we went to online in the spring I still had issues with this even though we had been using it in class for 2 months already. I teach seniors in high school so I can only imagine issues that can happen with younger students. If the plan is to go straight to online I really stress we need some in person training for students somehow.</li> <li>2. Last spring I know many teachers and myself faced a huge issue of students not doing online work until evening and the night. Many students won't wake up to do online school by 8 am or probably not even 11 am.</li> <li>3. I feel that it is important to get students to school for their mental, emotional and often time physical well being. I have had many students reach out to me about their struggles at home.</li> <li>4. Finally, I would like to suggest if we do online schooling or hybrid I would like to be able to access my classroom to do my teaching. Working from home is difficult and I know hard on me mentally. I really would like to be able to get back physical to school and on a schedule.</li> </ol> <p>Thank you for taking the time to hear my thoughts!</p>
7/21/2020 10:26:18	Caelee	Lehman	n/a	Gardner	<p>Please take into consideration what is best for our children, teachers, administrators, and other staff at schools. While children are less susceptible to COVID-19 illness, they aren't exempt and they are interacting daily with teachers and staff who are susceptible. It is unreasonable to ask someone who is trying to make a living and support their family to sacrifice their health and safety to rush back to school. Delay it, make students go next summer, they will live and eventually they will learn from this experience as well. Uphold the executive order to delay schooling until September 8 or later if necessary.</p>
7/21/2020 10:26:25	Angela	Stiens	Parent	Shawnee	<p>Our school is ready to start. They have been preparing for 6 months. My children are ready to go back to school now. Delaying this is psychologically draining. My children did not do well with online learning. Our teachers are ready to teach. My son whose graduating is so disappointed with the way all of this has been handled. He said most of his friends don't even care about the ceremony after the way this has been so poorly handled by the adults in charge. COVID is nothing compared to the psychological effects this has placed on our kids. Please put Kansas kids first. They should be put priority. Not mandates. Thank you.</p>
7/21/2020 10:26:31	Sean	Murphy	LEAVENWORTH USD	LEAVENWORTH	<p>please honor the delay per the Governor's EO</p>
7/21/2020 10:26:33	Andrew	Sher	Parent	Olathe	<p>Kids need classroom learning. Educators have had plenty of time to prepare (since last March). There is no excuse for further delay. It is abundantly clear that Olathe schools do not know how to do virtual learning based on our experience last spring. The district provided nothing to keep the kids engaged and teachers basically got an extra two months added to their summer vacation. Kids education needs to be a priority. Wear masks, social distance when possible but resume school.</p>
7/21/2020 10:26:34	Melissa	Allard		Sedgwick Co.	<p>Please delay the opening of school, with cases on the rise the only reason our children are safe are because they are not in school right now. Please allow the teachers and admins more time to get more prepared and allow the city numbers to fall before putting our children, our future into the fire! Thank you!</p>
7/21/2020 10:26:40	Cindy	Huckvale	Citizen/Parent	Winfield	<p>I urge you to support Governor Kelly's Executive Order of delaying the opening of schools until after Labor Day! This should not be a political decision as some in the state are pushing for. This should be a decision about what will protect our students, teachers and staff in the school buildings. This in turn helps to protect our Kansas communities. It will also give the local school districts more time to prepare for the opening. Thank you.</p>

7/21/2020 10:26:43	Joshua	Garcia		Junction City	The global pandemic that is COVID-19 is dangerously out of control all across the country. Opening schools now is reckless and creates an opportunity to spread the virus throughout the population. While I understand that education is important, so too is following the advice and guidance of the scientific community borne of that very same education system. The schools should remain closed, or at most hold to virtual or distance education.
7/21/2020 10:26:44	Christine	Lawson	Parent/paraeducator	Wichita	I would feel less apprehensive if we started school after Labor Day. I feel this would give the districts more time to finalize their plans. I feel like a plan was put in place but no details regarding that plan. As parents there are things we need to know not just assume will take place.
7/21/2020 10:26:46	Rose	Padilla		Edgerton	<p>The health of the children isn't the most important, which is why we need to open schools. Children are not dying from this. If we are worried about teachers, only 10% of Kansas teachers are above the age of 50. If the job is too risky for them, that is their choice to make. The flu is far deadlier in children and we do not take these precautions. I urge you to open schools. These children need normalcy and structure. I'm an SLP for a school district, so I have been able to stay home for an extended time. There is a young girl that now comes to my home daily asking if she can stay for lunch/dinner and if we have had our "snack time" yet. I am certain her parents do not know where she is, nor do they seem to care. When did "flattening the curve" turn into let's stop this virus in its tracks? This is simply not realistic. There are far more children suffering in other ways including child abuse, than this virus is affecting.</p> <p>Thanks for your time.</p>
7/21/2020 10:26:49	Tarica	Lare	Let parents and commu	Manhattan	<p>I feel that our school district had a great plan in place to allow parents that option of sending their children to school or use distance learning if preferred. This allowed for each family to decide what is right for their specific needs. In my family, both parents work full time. We have three children, two school-age and now have the burden of paying for three children in daycare. I understand I chose to have children and they are my responsibility, but I also chose to spread them out knowing the financial burden of having 3 daycare payments. We will be fine and we will do what is necessary to take care of our family, but not all people have that luxury. Not all people can go from paying \$800/month for child care to paying \$3000/month. Having our school-aged children in school is a way to release some of that financial burden.</p> <p>I very much understand the risks of schools opening again. My child will return to school when they open. My child has been educated on hand-washing, distancing from others, and we've practiced wearing masks for extended times. We are prepared. The school district has put plans in place to prevent the spread. Obviously, we can't 100% prevent anything, but all tangible ways of keeping our children safe while still allowing them to get a proper education are being taken. I am proud of our educators.</p> <p>I also see rural communities with very little cases being effected greatly by the delay. There is no reason this state should have a one size fits all policy, because all communities in Kansas are not the same. Every county and community should have the opportunity to do what's right for their specific needs.</p> <p>I understand you all have an impossible decision. I also don't think you have to be the ones making the hard decisions. Being a leader doesn't always mean making all the decisions. Sometimes it's better to trust the leaders below you who know their needs maybe better than you do.</p>
7/21/2020 10:26:51	Marlo	Bratton	Parent/taxpayer	Overland Park	School must start on time and in person. The social, emotional and educational damage that's already been done is overwhelming. PLEASE stop using our children as political pawns! The medical experts have made it clear that schools opening is best for our kids.

					<p>I STRONGLY feel that school reopening should be delayed! Until ATLEAST after Labor Day. I supported our early closure of the schools in the spring, and I believe it prevented more cases. But as we have reopened the state cases are climbing out of control and if we send our staff and students back to school in less than a month we will surely have problems.</p> <p>Your plan calls for 14 day quarantines if anyone in the school tests positive, but that will lead to a horrible merry-go-round of closures. One student or staff testing positive could result in additional weeks or months of closures due to the spread from just one possible case. Why take that chance?</p>
7/21/2020 10:26:53	Jolie	Gerding	Parent and grandparent	Wilson	PLEASE KEEP OUR SCHOOLS CLOSED FOR NOW!
7/21/2020 10:26:55	Christine	Moser		WICHITA	I support Gov. Kelly's order to delay the start of school.
7/21/2020 10:26:56	AJ	Brenn		Lawrence	Please support the governor's guidelines and don't play politics with the lives of students, teachers, and support staff. Decide using facts and science which are being ignored inexplicably by all levels of government right now!
7/21/2020 10:26:56	Tyler	Clements		Lawrence	Please allow student athletes to continue summer conditioning during the month of August.
7/21/2020 10:27:02	Julie	McLaughlin	Teacher/parent	Topeka	If the delay is to give schools a few extra weeks to prepare for a safe reopening of school, I think a delay until the day after Labor Day is wise. However, if the delay is only to see if we should then delay longer, I do not agree with that. School needs to start again for the welfare of all of our children. We need to stop reacting out of fear. We took the necessary precautions in the spring, and a short delay may be wise; however, we need to start teaching our children how to face difficult times by adapting and acting courageously, rather than acting out of fear as well as political expediency. If state and local SCHOOL authorities feel a short delay is beneficial, then by all means wait until after Labor Day. But if not, schools need to reopen. I would further argue that if school is delayed, let the sports associated with school continue on time, especially for those outside sports that can easily follow the protocols of social distancing.
7/21/2020 10:27:04	Leanna	Coons	Usd475	Junction City	Let us start school in Augs Please
7/21/2020 10:27:07	Katie	Morris		Holton	I have no problem with the start of the school year being delayed and feel like districts could make good use of that time preparing teachers and staff for the possibilities this school year brings. It would also give the areas with high infection rates time to bring those numbers down so that we can start safely.
7/21/2020 10:27:08	Vicki	Hale		Columbus	<p>I am a parent and my two sons graduated from USD 493 in Columbus. I now have four grandchildren - three already in school, and one preparing for kindergarten next year. I would not wish this situation on anyone, parent or otherwise, who has children, who realizes the need for children to be in school but at the same time, knowing the devastating effects that COVID has on its victims.</p> <p>Our children deserve the best we can offer. They deserve a safe place in which to learn, to grow, and to succeed. Do we, as a state, as a nation, really believe that our children are expendable, used as pawns in a political arena?</p> <p>I urge you to support the school opening delay that is being put into place by Governor Kelly. One child sick, one child on a ventilator, one child dead, is one child too many. We can't take chances with the lives of our children.</p>
7/21/2020 10:27:10	Hanna	Eastin	Myself	Newton	There should be community supports in place to help families navigate a delayed start. And there should be a delayed start.
7/21/2020 10:27:28	Emily	Dore	Self	Overland Park	Please uphold Gov Kelly's Executive Order delaying school.

7/21/2020 10:27:29	Katy	Shultz		Kechi	<p>Delaying school opening until September 9 is prudent and keeps the well-being of the students, teachers and staff at the forefront of this decision (where it should be.)</p> <p>This is a proportionate response to the pandemic. Probably most of you making this decision didn't start school years until September! The teachers I have spoke to want to be in school and want the best for our kids. Teachers very much need extra time to prepare their classrooms for necessary changes. For instance, kindergarteners through second graders all sit at community tables. They need time to figure out and implement different seating arrangements.</p> <p>Additionally, numbers of cases are rising in Kansas right now. As a parent, I would feel much better if the number if cases were leveling off or trending down. With the increase in mask wearing, we have every reason to believe they will be in three weeks.</p> <p>I do wish the mask mandate started with 6th graders (or even 4th or 5th.) It will be very tough to require young children to wear those hours a day.</p> <p>Please do what is right, not what is politically expedient. Thank you for your service.</p>
7/21/2020 10:27:36	Trichia	Penner		Ingalls	<p>These kids need to go back to school. The school districts should be allowed to determine when their start day is. Some schools are already more prepared to begin school than others are. A school in Kansas City cannot be held to the same standards as a 1 A school in Kansas. You can't make all kids wear masks, they are just going to be a problem for teachers. And you cannot get temperature checks for every student. There is no way you can get temp checks in schools with 500+ kids, it would take all day. Make the teachers wear masks. Kids are said to not be passing it on to each other, so we need to stop freaking out.</p>
7/21/2020 10:27:41	Travis	Callaway	USD 381	Spearville	<p>The decision to open schools needs to be left up to local authority and not a state wide decision. What is safe to do in Spearville may not be in Wichita or Kansas City. This doesn't mean we shouldn't allow schools in the areas it's safe to open. Kids have been thrown in to an uncertain time and school and being there is a good way to offer then a sense of security and normal, even if it won't be the normal they know. Also, I know this isn't a deal breaker but I'm a football coach and I have already had one kids tell me he would drop out if there is no season. I fear we will see a higher dropout rate if we don't get kids back into buildings and with positive role models.</p>
7/21/2020 10:27:46	Joanna	Scharschell		Kansas City kansas	<p>You guy should listen to the parents its not safe you guys want to use our kids as test dummies did you guys stop to think that some kids cant wear a mask cause of health issues and that they have parents at home that has a compromised immune system. And taking a temperature can be normal duh. You guys need and listen to us parents and offer online learning for parents that dont feel safe sending that lids back just yet mom26030608@gmail.com 913-832-2351</p>
7/21/2020 10:27:48	Melissa	Leavitt	my kids NWKS	colby	<p>our kids are our future...our districts need more freedom to choose what's best for our own community...we cannot one size fits all--approach this.....please in this unprecedented time in our country...make big moves! Make choices you never thought of before...break it down to help every single district if necessary....find in your heart leaniance for those who are working so hard to jump hurdles we never thought we would navigate!!!! We will not return our children to public schools until masks are removed from the equation...also i should add that i respect the board...please hire a constitutional lawyer....mandates are not laws and playing politics w our kids is not acceptable. Regardless of opinion or medical recommendation people of this country deserve to choose...and we must stand our ground...that the government works for us...not the other way around.</p> <p>PLEASE...do not let our kids see us bow down to things that cannot be dictated by law....please just go an extra step to make sure that no rights a enfringed....we must teach our kids how important their rights are and support parents with this as well...</p> <p>GOD BLESS YOU ALL...AND PRAYERS THAT GOD GUIDES YOU AT THIS TIME!</p>
7/21/2020 10:27:48	Sarah	Hancock	My family (Rock Creek	Westmoreland	<p>I support the governor's order to push back the start of school and activities. This will give districts time to plan and communicate and to help teachers feel a little calmer. The teachers I know are not feeling good about starting school right now, and districts are not prepared to communicate clearly and consistently to their audiences. They need a lot of help preparing to meet the challenges ahead. More time is a good thing when peace of mind and safety are at stake.</p> <p>Please do not let a bunch of sports-obsessed parents convince you that sports are more important than safety.</p>

7/21/2020 10:27:49	Morgan	Allison	None	Greensburg	Our kids are already falling behind and out of school for far too long. The longer school is delayed, the more stress it puts on them emotionally and socially. Isolation is hard mentally, and I also worry for children in unsafe living conditions that are slipping through the cracks due to not being in school, which for some, are the only safe place they know.
7/21/2020 10:28:05	Mary Ann	Burris		Oakley, Ks	The kids need to go back to school as regularly scheduled in August. They need the normalcy and structure. They are missing out on social time and learning valuable life skills. The temperature checks, hand washing, and social distancing are feasible. The masks are not feasible.
7/21/2020 10:28:13	Sarah	Alexander	Self/school counselor	Louisburg	Fully support the decision to postpone for the health and safety of students and staff
7/21/2020 10:28:14	Jessica	Alexander	None, just a parent.	Olathe	Start school at the regular scheduled date. In person for the bus riders and free or reduced meal kids. Everyone else learns on-line. That way the number in the school is reduced and you feed the kids who need it.
7/21/2020 10:28:15	LaShonda	Hinson	Wichita DHH	Wichita	What is going to happen with Deaf and Hard of hearing children that have autoimmune disease and deficiencies? Yet they need the learning atmosphere because they have to have structure daily.
7/21/2020 10:28:23	Leann	Osner	Teacher	Kingman	Yes - give us time to prepare and make a plan
7/21/2020 10:28:23	Denise	Monson		Johnson	I believe the executive order should stay in place. Delaying school until after Labor Day isn't that long and it gives schools time to get supplies and support in place for a safe transition back. Going back right now with numbers climbing is also irresponsible.
7/21/2020 10:28:31	Nevada	Runnebaum	USD 469	Lansing	We want to come back to in person school when it is safe. I agree with Gov. Kelly that after Labor Day would be the soonest in person schooling can happen. I hope The Board votes in favor of that. And please keep in mind that some staff maybe unable to work in person due to family obligations so on line learning needs to be an option. The parents I've talked to want to have a choice of in person or online. Thank you.
7/21/2020 10:28:40	Kari	Mueller	Usd 457	Garden City	I implore you to Let these kids go back to school it has been six months and the online learning was pathetic our kids are going to be so behind not to mention in our community there is a large number of children that will be unsupervised they are going to fall so far behind! I have an active parent in my child's education and I am concerned with the level of quality education I can give them at home these children need to be out moving around getting to play sports and do all the things they were doing last year at this time covet is not going away we are going to have to learn to live with it locking these children up at home is not in the best interest of our children emotionally or educationally.
7/21/2020 10:28:45	Cari	Andrews	Holton USD 336	Holton	I currently teach fifth grade in Holton and have worried about my students all summer long. I miss seeing them and did not particularly enjoy working with them on-line. I would much rather be there in person to teach and make connections. With that said, I do worry for their safety as well as that of my colleagues and myself if we would start school in August. We know that COVID-19 is very detrimental to adults, but we really don't know what it will do to children. We are seeing reports now from all around the country that younger and younger people are contracting the disease, even those less than one year of age. I could site many more reasons and studies to support my position as I know those who take the opposite position could. The bottom line is we really don't know how this disease can or will affect our children.  I love my students and do not want to take any chances on their health and safety. Delaying school until September when the number of active cases will hopefully be under control is the only decision that makes sense to me. Thank you for taking the time to listen to my concerns. I pray for guidance as you and the leaders of our state and country have to make these difficult decisions that affect so many.
7/21/2020 10:28:45	Kathy	Damron	Parent	Topeka	Please protect public health & SUPPORT the Governor's executive order delaying start of school. Thank you
7/21/2020 10:28:51	Kyle	Peters		Overland Park	It is imperative that my children get back to face to face learning in the schools beginning August the latest. I have noticed the adverse effect on my two daughters both mentally and emotionally since schools were closed in March. I believe that negative affect is lost on some the adults that are deciding this issue. If in class learning is pushed back indefinitely like what is being talked about, then does the state want/expect me to quit my job or leave them home alone? Forcing parents to leave children home alone or making it so parents can't provide food, shelter, and security flies in the face of what the American education system has always stood for.
7/21/2020 10:28:59	Frances	Graves	Parent of USD 506 student	Bartlett	I believe the correct decision is supporting the executive order and delaying the start of school.

7/21/2020 10:28:59	Lynette	Engelken	Shawnee Mission School	Overland Park	Please uphold the Governor's mandate to delay the start of school this year until after Labor Day. Teachers and students are in a uniquely dangerous situation while COVID is running wild in our communities. Nowhere else is someone expected to be in a small, poorly ventilated room with 25-30 other people at the same time for hours each day. Middle school students will NOT keep their masks on and will NOT social distance. Remember we are not just exposed to our students but also to all of their family and friends as well. That is how this virus works. Online learning can be extremely successful with adequate preparation and accountability. Give our schools this extra time to prepare so that hundreds/thousands of teacher and students lives are not lost needlessly in Kansas. HUGE and popular annual events all across Kansas are being cancelled -- how does that ever imply to you, the KBOE, that we should be safe going back to school?
7/21/2020 10:29:03	Hannah	Womack		Chanute, KS	Please do NOT delay the start of school! Our children have been without proper education for long enough, not to mention there are many other safety concerns of our students that aren't related to COVID-19. Many of our students rely on the staff at schools to provide them with a loving nurturing environment and many are suffering while waiting for our return to school!
7/21/2020 10:29:13	Melissa	Johnson	USD 253	EMPORIA	I do not believe we should delay schools!
7/21/2020 10:29:27	Nicole	Frank	parent of USD 489 student	Hays	How long will it take to run out of substitute teachers, with sick teachers quarantining for at least 14 days? How likely is it that a school will close, when a certain threshold of its student or faculty body is sick? Ethically speaking, we owe our students and teachers the safest environments we can create, following masking and social distancing recommendations from Dr. Fauci and the CDC. Practically speaking, our economy will crash if schools have to open and close repeatedly, due to sick teachers and students. With infection rates at their highest point yet, delaying the start of school is the right decision, no matter how tough of a decision it is. Please pass Governor Kelly's executive order so that our schools can prepare their plans and local city and county commissions can revisit masking ordinances to contain this virus.
7/21/2020 10:29:32	Randy	Winchester		Olathe	Follow Governor Kelly's executive order. Don't be stupid, a few weeks delay will not hurt anyone or thing, but may improve school safety for our children and teaching professionals and staff.
7/21/2020 10:29:33	Patty	Ware	Students in Olathe	Olathe	I am in full support of Gov Kelly's mandate to postpone school until after Labor Day. We all want our children to get back to the classroom, but we need to look at the numbers right now and wait to see if the masks help the numbers. We also need to ensure that the districts have ALL necessary protective gear and materials. We believe strongly in masks and social distancing and do not have faith that districts are ready. We also want teachers to have time to prepare for the changes that will have to happen in and out of the classroom. I urge you to listen to CDC guidelines as well as local and state health officials. Our children should not be involved in politics, this is about their safety and the safety of the teachers and staff.
7/21/2020 10:29:37	Kelly	Clodfelter		Olathe	Thank you for your time.
7/21/2020 10:29:38	Stephanie	Perry		Baldwin City	I support Gov. Kelly's decision
7/21/2020 10:29:53	Tami	Vanlerberg	Mill Valley High School	Shawnee	Delay school year for planning, require face masks when not socially distanced
7/21/2020 10:29:57	Lindsey	Respress	Goddard School district	Goddard	I think it is going to be horrible if we start school... Especially with the flu coming in October... You will have a combination of Covid and the flu... Not a good mix! It could be a very deadly winter if we start school... Let's wait until after the first of the year and see how everything looks
7/21/2020 10:29:58	Michael	Scott	Special Education Teacher	Newton	I agree with the delay in school starting, but I don't agree with masks being worn all day long while in school, especially the younger ages.
					Please uphold Governor Kelly's mandate to delay the start of school.

7/21/2020 10:29:58	Carmen	Benson	My child.	Stilwell	I want the political bickering to stop immediately and for you to prove that the ONLY thing you all care about is the well being of children, teachers and school staff. I am a single, working mother with a lot on my plate. I don't relish homeschooling but I also can't afford to get sick and take a couple of weeks or more off of my life. Since we abruptly ended the stay at home order and the majority of Kansans decided not to bother being careful anymore I have had 2 friends gravely ill in the hospital and several of my employees have either tested positive or have been exposed to Covid. These are enormous disruptions in business. Use science and common sense in your decision making. My preference is to have a hybrid. Split classes into 2 or three groups and rotate the days making remote viewing of class possible on days that kids aren't there. My daughter's elementary school has over 600 kids. It is physically impossible to create enough distance with everyone there to be safe. There isn't enough work in lower grades to keep kids busy for 6 hours a day if they aren't shuffling around the school or going to recess and the less they move around the less able the teachers are to control them. I want a normal return to life right now but not if that means wishful thinking our way back to "normal" and making a complete shutdown more likely.
7/21/2020 10:30:01	Jeff	Saenger		Bennington ks	Open schools on schedule!
7/21/2020 10:30:03	Staci	Hash		Olathe	I am a teacher and a parent in the Olathe district. I struggle with asthma and a auto immune condition. One of my sons also struggles with asthma. I teach special Education K-5 so remote teaching will likely not be an option for me. This being said, I will not have the option for my kids to do remote learning. I want to go back to work and I want my kids back in school, however, I am VERY nervous about the ability of districts/individual schools to be prepared by mid August. I believe we need the additional time that the governor has ordered to be better prepared for a safe start for all! Thank you for accepting comments and allowing us to voice our concerns!
7/21/2020 10:30:06	Kari	Eastes	USD 382	Pratt	I urge you to please open up schools back up. I am a stay at home mother of 3 and my kids need school. I can tell that they are missing a huge part of what makes them happy and what they look forward to everyday. I totally understand that our numbers in Kansas continue to go up but what did you expect??? You can order everyone to stay at home for months and then expect numbers to stay low when you open back up. Common sense says numbers will go up when people start going places again. And still as these numbers continue to rise the rate of death is actually going down. My fear is that is we postpone school start date it's just going to be the start of never going back. Why not leave it up to each school Distict. I know ours has a great plan in play that they presented to us last week. You can't treat all schools the same. KC schools are much different than rural schools. My oldest has been doing summer sports through leagues and we have been at the gym 2 nights out of the week with surrounding school kids....not one has had an issue, or even a spectator at these events. These are the same kids that will be around each other come school time. Give people the option to to distance learning, which ours has, and open school back up. There is a very high percentage of kids in our area that school is their only safe haven. It the only place they get attention, love, food, and many other things. They need the schools to reopen now more than ever. I fear what those kids have gone through the last 6 months. I am a cancer survivor and if I thought that me and my children were in danger going back to school than I wouldn't send them. I don't feel this way at all. Honestly my kids have never gotten the flu vaccine and when the Covid vaccine comes out...won't be getting that either. The world is a scary place right now, let's teach our kids not to live in fear and trust our own school system. Let them be young and enjoy their school days, not fear them! I trust our local school board with all my heart and know that they will do what it takes to protect the kids if schools are allowed to reopen. I urge you to stand up for the kids, teachers and parents. Let's reopen and continue their education instead of focusing on Covid, get their minds off of Covid. It's pretty sad when my 4 and 5 year old play "Infected with Covid" instead of "tag". Kids shouldn't be talking about it, they should be playing with their friends and learning how to read like a normal child. Thanks for your time and I trust that you will trust your school systems. Proud to be a Kansas and even more proud to be a Greenback. Kari Eastes

					Please allow outdoor conditioning to continue in August for athletes preparing for fall seasons that will hopefully still be happening in some capacity. It is important for these kids to have something to continue to focus on as they wait for school to start and our coaches have been doing an excellent job of following social distancing protocol.
7/21/2020 10:30:07	Kristel	Lewis		Lawrence	I am fine with school being delayed if it will hopefully get us back in the buildings. Thanks!
7/21/2020 10:30:25	Ashley	Schlecta		Olathe	Delay
7/21/2020 10:30:27	Rhonda	Sayles	myself	Meriden	I don't mind waiting until after Labor Day to give districts time to prepare safety protocols, but I do think it would be a big mistake to mandate the wearing of masks. Let local districts make that, and other decisions. Our district is in Jefferson County where we currently have two active cases and have had zero deaths. Children and teens should not be forced to wear masks all day. I believe they will do more harm than good.
7/21/2020 10:30:31	Jessica	Britton		Cherryvale	I believe school should start at the original start dates with online learning only. I feel that knowing at some point, the school will be forced to close with positive cases, virtual learning should start from the beginning with the possibility of in person learning once covid is under control. I also feel The option of in person/virtual should be given to every parent for those not comfortable with their children attending in persons.
7/21/2020 10:30:32	Jennifee	Standley	Parent/teacher	Garden City	Our kids need to go back to school as normal as possible. No masks for kids K-6, only masks in the hallway for 7th-12th. Resume all sports and activities.
7/21/2020 10:30:32	Jaron	Thompson	Holcomb public schools	Garden City	Then executive order to suspend the start of the school year will give adequate time for teachers to understand the Navigating Change document and create a safe learning space for students.
7/21/2020 10:30:35	Jeremiah	Brown	Parent	Plainville	School should start at normal time. Rural Western Kansas is NOT the same as Urban Eastern Kansas and SHOULD NOT be treated as so. We have minimal COVID cases out here and should not have to abide by the same restrictions as the higher populated areas. Remote learning is also NOT an option for ANY family with working parents. My home has 1 kid starting college, 1 kid in high school, 2 kids in elementary school, 1 kid starting preschool, and 1 kid not yet ready to start school. Online learning DOES NOT WORK for your working families. Online learning DOES NOT WORK for lower elementary students. FACE MASKS for teachers in lower elementary is a HORRIBLE idea. Those kids need to be able to see their teachers mouths move to enunciate letter and number sounds when learning to read. Remote learning was a waste of a parents time. Our children did not learn anything in the few months that school was cancelled and it felt like the teachers received extra summer vacation. 2 weeks is not going to make a difference, school systems have had plenty of time to be prepared and ready to start school at normal time. I for one, REFUSE to participate in any form of online or remote learning. Local Counties and School districts should be able to proceed as fit for their area. COVID is nothing more than a virus the same as influenza or the common cold. This is out of control.
7/21/2020 10:30:45	Megan	Bannen		Overland Park	Thank you to Laura Kelly, whose leadership throughout this crisis has been stellar. Given the increasing scientific evidence that the virus is airborne--making large indoor gatherings (such as school) extremely dangerous--we must at least wait until our infection rates in Kansas are declining before we attempt to open schools, for the safety of staff and students. I understand that reopening the economy is important, but we cannot do so at the risk of people dying. We must get the virus under control before we can safely open schools again.
7/21/2020 10:30:45	Buffi	Brimm	Usd 457	Garden city Ks	I vote to follow governor Kelly's order
7/21/2020 10:30:52	Sarah	Huebner	Parent	Olathe	I do not support opening schools before Labor Day. Please vote to hold off school until after Labor Day weekend. I do not feel confident that my school district is ready or prepared to have teachers, staff, and students return to in-person. I am not ready to send my kids back in-person based on the case numbers of Covid rising and not being under control.
7/21/2020 10:30:57	Daniel	Snyder	Private School	Wichita	I must be misreading your order which seems to prohibit distance learning and private instruction before the Sep. date. Can a despot actually effect such a thing in this state, or in this republic? I'm pinching myself during this latest non-covid related fever dream.
7/21/2020 10:30:58	Asia	Gormley-Siemens	None- private citizen	Wichita	Not only should the school year be delayed, it should be primarily online for the majority of students. Don't put the burden of our floundering economy on children and educators. Even 1 death due to schools reopening is too many.

7/21/2020 10:31:04	Drew	Bartel	KCK USD 500	Lenexa	Please support the order Governor Kelly submitted. It is not safe for teachers, staff, their families, and students. It is not ideal, but would provide quality time for schools and districts to prepare accordingly. Virtual learning may be the safest option, even though I teach primary and the students rely on physical instruction, as do I. Lives are at stake and one outbreak could spread and effect numerous families and communities. Thank you for your consideration.
7/21/2020 10:31:07	Michelle	West	Boys & Girls Club of M	Manhattan	Governor Kelley is doing amazing and I fully support her decision.
7/21/2020 10:31:11	Shannon	Kincaid		Oakley	No to delaying school.
7/21/2020 10:31:14	Michelle	Alvarez		Goddard	Open schools with safety measures put in place. Invest in the materials needed for all schools. Single working mom of two kids need it! My kids NEED it! I shouldn't have to decide to put food on the table or school my children. How long do we wait, how behind do the kids get? We need to learn to live safely with this virus. Our future and our children depend on it
7/21/2020 10:31:16	Megan	OBrien		Emporia	I support the governors EO. I believe it is important for families to have options and for schools to have adequate time to prepare those options.
7/21/2020 10:31:17	Matthew	Crane	Student usd233	Lenexa	I would like school to start after Labor Day in the building with masks, temperature checks, and socially distant when possible because I feel that it is easier to learn in person rather than through a screen.
7/21/2020 10:31:17	Kelly	Hickam		Lenexa	School opening should be delayed. It's not safe for kids or teachers.
7/21/2020 10:31:24	Christina	Alvarez		Sedgewick	Do not open school before labor day
7/21/2020 10:31:28	Tonya	Riepe	Myself and my family	Wichita	I think that school should always start after labor day. Most places around the U.S. already do. If, for reasons due to harvest, this causes problems, I think that is understandable to change back in future years. But as of right now, there would be no way to lower our numbers by August. Of course, at the rate most Kansas accept science and are willing to mask, it may make absolutely no difference as the numbers will just continue to climb.
7/21/2020 10:31:35	Keely	Tolbert		Wichita	As a teacher and parent, I am deeply concerned about the opening of schools this fall. I fully support Governor Kelly's executive order that would delay school openings until after the Labor Day holiday. Why? It gives schools time to order, install, and implement the safety procedures that will be required to protect the health of students, their families, and staff. It gives districts time to offer meaningful professional development to teachers as to what safety protocols are required as well as giving time to adjust schedules, classes, technology needs, and allow teachers to prepare for a very different start to our school year. Not to mention being able to secure our own materials for PPE as required to keep ourselves safe (being the ones at highest risk of contracting and becoming seriously ill from Covid 19). My sincerest hope is that the BOE will make their decisions based on sound science rather than on issues steeped in politics. Let's move away from rhetoric that says masks are an infringement on rights and realize that masks are a courtesy and kindness we afford to those around us as we work as a community to keep each other safe. I hope the BOE considers recent studies that highlight transmission rates as being just as high if not higher for children ages 10-12 and up as adults and focus on how we can operate schools to keep them and us safe. I hope the BOE realizes that we closed schools in March when Covid numbers and spread was exponentially smaller in our communities across Kansas and that now, we're contemplating opening schools when spread is much more likely to negatively impact all communities. I hope the BOE considers that we honestly don't know how/if spread will occur at our schools because they have been closed since March and the increase in spread we see now is without the huge community grouping of students and adults in school buildings. I hope the BOE considers the safety of the adults involved in our schools as much as they consider the safety of our students. Please do your due diligence and make a sound choice based in science. Governor Kelly has given Kansans the chance to do our part to decrease the spread of this dangerous virus. Those three extra weeks do not endanger the education of our children, but they could endanger the lives of many children, adults, and their families if there is a push to open schools in August. I implore you to support Governor Kelly's mandate for the good of all Kansans.
7/21/2020 10:31:42	Kelly	Seibert	Parent SMSD	Mission hills	The death rate is less than 1%. I just don't understand why everything can be open except for our schools? If masks work, why can't they go back with masks??? The kids education needs to be essential. Just as essential as the grocery store.

7/21/2020 10:31:44	Jamie	Mast		Shawnee	Please support Governor Kelly's Executive Orders delaying the start of the school year in Kansas to after Labor Day. I feel this will give administrators and teachers additional time to prepare a safe environment, adjust to the changes in requirements for in-person school, and plan for creating quality remote learning plans for those families who choose not to send their children to school in-person. If in-person school is going to be offered, I think it is worth spending the extra time to ensure that everyone is as safe as possible.
7/21/2020 10:31:45	Mary	Noll	Burlingame Elementary	Topeka, Kansas	Please support Governor Kelly's delay mandate. I now personally of a family with 5/7 COVID positive. Two are elementary children with mild symptoms. The mother was very ill, but not hospitalized. The 89 year old grandmother came through fine with very mild symptoms. The other family members had mild symptoms. The two children had NO temp. at all, so the premise of taking temps. at the door is a weak detector at best. New studies are saying that 10-19 year olds are the greatest transmitters. I love teaching, children, and schools in general. I would love to go back to in person right now, but the data shows that cases are on the rise in KS. We need to get it under control before going back. This mandate will allow us time to do that. Most teachers I have talked with feel the very same. We would be very open to adding the days at the end of the year to provide the lost instruction right now. There is promise of a vaccine by spring. All the state schools should be opening at the same time for many reasons, not the least that travel between/among neighboring counties is very fluid. It only takes one person to spread this. Let us be humble and realize that we know very little about this virus yet and not gamble with the health and lives of the educational communities in KS. Please support our Governor with this very reasonable and well- thought out mandate.
7/21/2020 10:31:46	Cara	Loneragan		Overland Park	Our kids need to go back to school!!!!!! They need in person learning and social interaction with each other and caring educators! They need structure, routine, and education!!! Many students are home alone- many are depressed, bored, and isolated!!! Daycares are open! Restaurants are open! Stores are open! Camps and sports clubs are open! Schools must open for the health and well being of our community and kids! They need school activities and things to look forward to and be a part of! We are going on month seven of the kids at home - please open our schools and extra curricular activities!!!! It's time to let our kids live their lives!
7/21/2020 10:31:46	Shawnie	Schields	None- I am a parent of s	Goodland Kansas	I strongly disagree with school starting late and masks being required. If parents want to keep their children home and homeschool until covid is gone then the school system should support that. If parents want their kids to wear masks then those kids should be allowed to but it shouldn't be required for all children. If masks are required for school aged kids a lot of parents will homeschool, including myself. Give responsibility back to the parents.
7/21/2020 10:31:48	Jeffrey	Haaga		Abilene	I support the Governors order to keep schools closed until September for the safety of the kids, teachers, and Kansans as a whole. Please support the Governor so we can make one step forward and not continue to go backwards. I have 4 siblings that attend public schools in Abilene and Iola schools and their health is important to me.
7/21/2020 10:32:02	Danele	Wendland		Greenleaf, KS	Our county has only had 1 case of Covid. It makes more sense to start school in August then later as we start getting closer to flu, strep, more sickness season. The students social and emotional needs have been jeopardized since last March. It is time to get them back in the schools.
7/21/2020 10:32:03	Sarah	Uher	parent	Manhattan	I support the EO to delay school opening. We need to have a downward trend in COVID-19 cases. Also, many towns, like MHK, will have large population migrations for college and University openings. Delaying K-12 reopening will help to stagger disease spread.
7/21/2020 10:32:13	Peggy	Murnahan	My family	Topeka	If the Governor has already mandated that everyone has to wear a mask at school, which is going to be a FIASCO in itself, then I see no feasible reason why the kids have to be delayed and stunted even further by delaying school another 4 weeks.
7/21/2020 10:32:17	Jamie	Graham	Parent to two Blue Valle	Overland Park	I fully support Governor Kelly's order and our family is fully prepared to do whatever is the safest thing, not just for our family, but for those teachers, staff and others who may be most vulnerable. We feel strongly that this is a short amount of time in the big scheme of things and that the data (hopefully numbers will go down with mask wearing) will help guide the experts as to when is the best time to resume in person learning. It isn't easy teaching a 1st and 3rd grader from home, but something we will do proudly if it keeps others safe and well. Please make the right choice, and help keep our loved ones and vulnerable populations well. We can all do this together. Thanks for your thoughtful consideration and service. Jamie Graham

7/21/2020 10:32:21	Janice	Cunningham		Shawnee	Extend the Public schools start date until the Covid virus is at a "safe number" for all to return to normal activity.
7/21/2020 10:32:22	Kimberly	Martin	USD 447	Cherryvale	I would like to see the start of school delayed because we have rising cases in our county and surrounding counties. The last thing we want to do is go back only to be shut down.
7/21/2020 10:32:28	Lydia	Ottley		Oakley	I think the delay start is good idea as the virus is running high right now. I also think that it doesn't matter if we start in August or September it's still going to be around! I don't want my child to have to wear a mask! He's only 5 and hates it, it's also going to be a huge distraction for him and other.
7/21/2020 10:32:29	Tammy	De La Rosa	USD 204	Olathe	I support delaying the start of school until September 9th, but having admin and teachers return in August. This time could be put to great use for planning and involving teachers in the return to school procedures and planning.
7/21/2020 10:32:31	Glenn	Brands	Parent and Coach	Almena	Open school on time and as scheduled or allow local boards to decide.
					<p>Good morning,</p> <p>I am writing to ask you to support Governor Kelly's mandate to delay the opening of schools until after Labor Day.</p> <p>I am a school psychologist in Blue Valley, as well as one of the leaders of our district's crisis team. I want nothing more than to support my students and school community in person this fall. I want to look my students in the eye and ask them "how are you?" I want to hug my co-workers whom I miss immensely. I want to meet with parents in my office and help them navigate their teenager's mental health needs.</p> <p>However, I vehemently feel that we, the state of Kansas, are not at a safe place to do any of the above listed things. Numbers are surging daily. The state is on several other state's quarantine lists. The data is repeatedly demonstrating, day after day, that we are not prepared to safely open schools.</p> <p>We cannot ask our staff and students to risk their lives, or long term health, in order to meet a timeline. As a coordinator of my district's crisis team, I can tell you first hand that the death of a staff member or peer significantly effects the whole school community in so many ways. It's devastating beyond words. I am fearful of the long term impacts on our schools when members of the community (staff and/or students) die due to COVID-19 complications.</p> <p>I'm also a mom to an 8 month old and the wife of a pediatrician. I don't want to choose between the safety of my family and a career that I love so much. I have witnessed all of the safety precautions and PPE that my husband has had to incorporate into his practice. I am thankful the medical community is making choices that are best for their staff and their patients. I am not confident that school staff will be protected in the same ways, when in all actuality, we will be at a much higher risk based on face-to-face time with students and other staff.</p> <p>Please make the safe choice for Kansans and continue distance learning for our students until a vaccine or approved treatment is widely available.</p>
7/21/2020 10:32:32	Emily	Demo	I work in Blue Valley US	Overland Park	
7/21/2020 10:32:43	Morgan	Rochel		Gardner	<p>I have thought long and hard about school and how the rest of this year is going to impact our family. Brutally honest....my family is suffering. I have 3 boys (9, 5, 5), they are social bugs. Since March I have watched my boys change from happy social kids to unhappy frustrated lonely kids. My boys literally cried when they found out they wouldn't get to finish out their school year and had to learn from home. That was another struggle all together. We have the resources to do it from home....my kids just don't learn well from the home environment. They need school, friends, and activities.</p> <p>I am ok with school being pushed a few weeks but I don't want it to be pushed to September. I also don't want to see it get pushed to a new start date then we arrive at the start date and we are right back here fighting to get school started again.</p> <p>I am however AGAINST mandatory masks and hand sanitizing. What happened to building children's immunity? I haven't made my boys wear a mask this whole time...nor do I bathe my boys in hand sanitizer when we are out and about. I don't want my boys being afraid to go to school because they are spoon fed masks are the only thing saving them and hand sanitizer what's best for them. I know what's best for my children and if masks are made mandatory they will be home schooled until masks are no longer required.</p>

7/21/2020 10:32:43	Matthew	Crane	Student usd233	Lenexa	I would like school to start after Labor Day in the building with masks, temperature checks, and socially distant when possible because I feel that it is easier to learn in person rather than through a screen.
7/21/2020 10:33:01	Matt	Bailey		Wichita	Open the schools. Society will have to learn to live with virus, like we have with other illnesses
7/21/2020 10:33:06	Maurya	McLellan		Leawood	Schools should be able to start on time with virtual learning option for those that do not want to attend in person.
7/21/2020 10:33:08	Amber	Pankratz	USD 253–Emporia Sch	Emporia	Please support our Governor in delaying the start of school until after Labor Day to give more time to better prepare for schooling during this pandemic safely. The safety of all is most important. We should not be going back to in-person until it's actually safe to do so. We can do remote learning until it's safe to do so.
7/21/2020 10:33:13	Melissia	Go	Blue valley school distri	Overland Park	Our area has been hit hard by the virus. As a secondary special education teacher I am concerned about my school's preparedness to go back safely while cases are surging. My hope is that cases will begin to decrease, I will receive additional training on the districts cleaning agents and will have additional time to rearrange my classroom in order to promote social distancing. Many of my students are unable to wear masks because of their disabilities, therefore their health and safety lands on myself and my staff's ability to run a clean efficient classroom. I do not want myself, my staff or students to die due to unpreparedness. Thank you for your time.
7/21/2020 10:33:17	Catherine	Pauscher		Wichita	I support delaying the opening of schools in Kansas until after Labor Day for the safety of all people involved—students, teachers, custodians, office staff.
7/21/2020 10:33:24	Elizabeth	Crane	Student USD233	Lenexa	I would like school to start right after Labor Day in the school building with masks, temperature checks, and socially distancing when possible. Learning in a school building in the presence of others with live instruction is very helpful to me and I feel that I get a better education when I am in school.
7/21/2020 10:33:24	Derek	Goon	USD 259	Wichita	Schools should not open up physically until it is safe for all people who would be in a building, both adults and children. Safe means no community spread in a particular city. This decision needs to be based on science and scientific guidance and not how an individual feels or political affiliation.
7/21/2020 10:33:25	Ana	Houghton		Meriden and Topeka	School should not be in session if it is not safe enough for children to go without a mask. This is absolutely ridiculous. Sending children back would be a complete disregard for their mental and emotional wellbeing, not to mention the obvious health concerns. If our children come first, as they should since they are THE FUTURE, we need to keep them out of school until it is safe to do so without a shield or covering. Small children will not follow a mask rule. What will the punishment be for children not wearing their mask. What about exposures? If a teacher is exposed and doesn't find out for 2-3 days, an entire school would have to quarantine. It is best to wait until it is safe to return to life as normal.
7/21/2020 10:33:29	Melissa	Hamel	usd 305	SALINA	please follow the governors order to delay school until after labor day
7/21/2020 10:33:42	Cara	Coleman		Sunnyside School	I agree with the mandate and believe schools should be postponed until after Labor Day with further review at that time. We need to keep our children and teachers safe and healthy. We have a responsibility as a community to do this together!
7/21/2020 10:33:42	Caitlin	Thompson		Wichita	I agree with delaying school. I do not agree with children wearing masks for 8 hours a day. That in its self is not sanitary.
7/21/2020 10:33:43	Jeri	Cochran	Head Start	Basehor	I believe waiting until after Labor Day to open schools is a safe and smart proposal.
7/21/2020 10:33:47	Chad	Schilling		Hesston	I am not opposed to the delay in school starting. However, I don't understand why that needs to delay activities practices. Summer conditioning has been happening all summer already with little incident. If the delay happens I would like to see practices being able to happen as normal.
7/21/2020 10:33:52	Joel	Weide		Lindsborg	Please delay schools and give teachers and staff a chance to put together a good plan in order to teach kids during this pandemic. This is a public health emergency and should be treated as such.
7/21/2020 10:33:53	Lingling	Zhang		Hiawatha	We prefer online school to keep my kids safe
7/21/2020 10:33:59	Chrystiana	Miller	Goessel Elementary Sch	Goessel	I support the delay in school starting. We need the extra time! Staff hasn't had a chance to meet together to get on the same page to have consistent, building wide expectations. This will allow us to make decisions based on the health and safety of students AND staff, not just quick decisions because we're crunched for time. Not to mention we have a new Principal/Superintendent who is trying to sort thru it all and make decisions for our district. I would prefer we not have to add two weeks to the end of the school year in May, but would make it work if that is our consequence.

7/21/2020 10:34:01	Tina	Bellows	Parent	Garden City	Schools should open at their scheduled time. Districts have made plans and your board has given guidance to open safely. Children need to be in school for their mental, educational and physical health. Teachers are essential workers just as healthcare worker and many others that have worked through the whole pandemic. Activities should also start on time. This is a ridiculous power grab by the governor. Please stand with the kids of Kansas. Thank you for your time.
7/21/2020 10:34:08	James	Keeler	Concerned parent	Wichita	Delay and/or find a hybrid solution to use current staff and facilities in crucial ages or a rotating basis while others complete online.
7/21/2020 10:34:11	Melissa	Jacobs	Skyline Schools	Pratt	I full agree to halt all school activities until after Labor Day. Thank you for considering the students' well being. Have a great day.
7/21/2020 10:34:12	Misty	Mildenberger	Public schools	Oakley, KS	Late start is a great idea but to make our children wear masks will be devastating to their learning! I think we should take each and everyone's temperatures EVERY DAY and promote each class to wash hands before and after each class!!
7/21/2020 10:34:15	Robyn	Hilt	Garden City High School	Garden City	I am a high school teacher we need time to plan & adjust curriculum, clean & organize our spaces for distance learning. I am pleading for the board to vote for the executive order. This is definitely a voting issue for me.
7/21/2020 10:34:17	Hannah	Reichert	USD 308	Hutchinson	I think schools need the extra time to prepare. An extra two weeks would give schools adequate time to prepare the best possible conditions for students and teachers.
7/21/2020 10:34:20	Jane	Fergus		Lawrence	I fully support Governor Kelly's decision to delay the start of school.
7/21/2020 10:34:32	Jerrilyn	Hendrickson	My family	Clifton	We are in favor of delaying the start of school.
7/21/2020 10:34:41	Katie	Hartley	USD#465	Winfield	As both a teacher and a parent to a preschooler and 2nd grader I sincerely hope that you will support our governor by voting "yes" to delay the opening of the state's K-12 schools until after Labor Day. With Covid-19 cases currently increasing, I do not feel it is safe for the health of our students or staff to return to school in person at this time. More time would allow us to hopefully flatten the curve. Please do not put our families and our communities at risk until we have a plan and time to get supplies needed that will guarantee the safety of all involved in our schools. Our schools are the center of our communities and it is vital for them to reopen safely for the sake of our communities and state!
7/21/2020 10:34:42	Eddy	Wibright		St. John	I am a retired, forty year teaching veteran. I stand with Governor Kelly on her decision to delay schools starting now and/or in the future. She is doing her best to keep all Kansans safe in spite of many obstacles. This will not be forever, but for now, it is not possible to open schools safely!
7/21/2020 10:34:43	Jamie	kessler		olathe	Please support GOVERNOR KELLY'S executive order and protect my children and their teachers.

					<p>I will keep this short:  Please follow the guidance of the Governor in delaying the start of school. Let's not open schools for the sake of opening when we have rising cases in our state, even in rural communities. I understand &amp; agree that there should be local control, however, these are unprecedented times that call for leadership. Allowing districts to make their own decision on whether to open as planned or not does not work in this situation. There are school districts that have buildings in multiple counties. Those counties follow different rules. Which county should the district follow? There are districts that have students that reside in different counties within the district boundaries. These counties follow different guidelines. One county is phase out, another with more restricted guidelines. Students are coming from different environments and would be integrating with others. The ones who were following stricter guidelines are now around those who were not &amp; now bringing exposures home. An argument for that could be that families can choose to learn remotely. To be honest, I don't want to have to make that decision. If there are students going back in person, I don't want to further restrict my students. It will be a battle of "that's not fair, so &amp; so gets to". I also feel in an ideal situation, that in person would be best. I don't WANT my children to learn from home. I WANT them to be at school with their teachers &amp; peers. I just don't feel right now is the right choice. We all need to be on the same page doing the same thing. You also have parents that live in 1 county, kids go to school in another county, but then work in a completely different county. If you let districts choose when to start school with advice from their county health officials, you could potentially put families in a huge scheduling nightmare. They can have children attending different school districts. So one child has this schedule &amp; another child has a different schedule. Please make this more streamlined &amp; everyone starting together....later. We need to get cases down across the state so it becomes (or stays depending on your situation) safe. When you have families operating in multiple counties, the virus will spread even more across county lines. So now, a less populated county with less case numbers will see increases. Please consider the safety of your staff, students, and families these children will be exposed to. Please delay the start of school.</p>
7/21/2020 10:34:51	Amy	Meyer	Parent, related service p	Rural Kansas town	
7/21/2020 10:34:54	Stacey	Donahue	Teacher	Wichita	Please delay school until after Labor Day. It will give us time to figure things out. Thank you.

					<p>COVID-19 cases in the state of Kansas are at an all time high. Despite state mandates, many people are refusing to wear masks, and the spread of this virus has not slowed. Even considering the newest mandate from Gov. Kelly regarding masks in school, there is no way to guarantee that every individual will wear their mask constantly or correctly - as already seen by citizens everywhere and every day.</p> <p>Parents are notorious for sending children who are sick to school. With the highly contagious and rapid spreading virus of COVID-19, this is a particular concern for the 2020-2021 school year - especially with the extreme damage to health caused by the virus.</p> <p>Though typically children have a slightly lower rate of spreading or contracting COVID-19, they are not immune. There are several considerations with allowing children to return to school including endangering school staff such as Teachers, Administration, Custodial Staff, Food Service Staff and most importantly - the children. Classrooms in Kansas have a very large number of students already (especially in USD 259). There is no way for the students to social distance in the classroom, much less in passing periods, lunchrooms, gyms, assemblies, and after school activities. Additionally, trying to get children to consistently adhere to pre-existing dress codes is a known constant struggle.</p> <p>There is no guarantee that each and every student would wear their mask constantly or correctly - especially Elementary school students. Due to the asymptomatic nature of COVID-19, any of the students or staff could be spreading the virus completely unaware. Parents could send children who have tested positively to COVID-19 without informing the school. Kansas schools should not open until the Board of Education has a plan in place that would guarantee social distancing throughout the entire school day, including hallways and classrooms. Additionally protections need to be in place for teachers having paid sick leave if they are forced to quarantine due to one of their students testing positively for COVID-19. Schools of students who test positively for COVID-19 should be notified immediately by the healthcare facility that did the testing so that parents can not just take their child to school anyway. If you cannot enforce each and every one of these safety considerations (and most likely add more) then it is the responsibility of the Kansas Board of Education to postpone or cancel, or greatly alter, in classroom teaching for the 2020-2021 school year.</p> <p>Thank you for your time</p>
7/21/2020 10:34:58	Alexis	Goldwater		Wichita	
7/21/2020 10:35:01	Ben	Hammock	None	Shawnee	Governor Kelly is making great decisions for Kansans during this pandemic, I completely support her and so should the board.
7/21/2020 10:35:04	Emma	Coad	student of olathe school	lenexa	I would like to attend school in person this fall. students that don't want to attend in person should stay home!
7/21/2020 10:35:10	Danielle	Rebant		Sabetha KS	My kids (grades 4, 2 and K) are excited for school to start up and get back within the walls of their buildings. Especially in a small, rural community where there have been less than 40 cases in 5 months, I feel safe sending my kids to school. If the teachers need more time in our district to prepare and put regulations into place, then I see no harm in delaying school a week or 2. I do fear that the longer we delay, that the Governor will continue to make mandates and try to keep kids out. The teachers need resources - in many forms - that is my concern more than Covid. Do they have the right supplies, do they have mental health support, do they have resources for online learning (because it has to look different than last spring)? Thank you for your time.
7/21/2020 10:35:11	Susan	Aulgur	Me a Kansas resident	Overland Park	We should follow the order provided by Governor Kelly. I appreciate this order as thoughtful and based on facts and science. While we all would like for our children to return to school we have to ensure the conditions are safe. Cases are rising and this not only impacts children but teachers and school employees. Do the right thing!
7/21/2020 10:35:20	Angela	Krueger	Public School Teacher	Topeka	Please do what must be done to get ALL children back in school full time to preserve their emotional and mental health, as well as meet their social and academic needs! Their parents are overwhelmed and unprepared to meet these needs. Families are hurting and need the support of their government and schools! They NEED these two institutions to function as they were designed to!

7/21/2020 10:35:20	Lisa	Kolm		Pratt	<p>Our Kansas leadership talks about keeping kids 'safe'. Certainly, we want to keep kids and teachers safe from covid but at what price? Data shows the transmission rate is low from child-to-child; low from child-to-adult. Given that the transmission rate is low, the unintended consequences seem a very high price to pay. Those unintended consequences of school closures to include: food insecurity, abuse, trauma, obesity, loneliness, mental health issues. If one is truly concerned about safely, it should encompass the overall well-being of a child--not just 'covid safety'. It feels like we're 'sacrificing' our kids in other ways in order to keep them covid-safe.....though transmission rate and risk is low for the K-12 age group.</p> <p>Reference presentation by Children's Mercy Kansas City:  <a href="https://www.youtube.com/watch?feature=youtu.be&amp;v=WNh_D2a-VJk&amp;fbclid=IwAR3TP0LhypL03ZxZI54-qAUoIIDSxeWhygX9B46T2DO2QkiVC7gF6qnL_AE&amp;app=desktop">https://www.youtube.com/watch?feature=youtu.be&amp;v=WNh_D2a-VJk&amp;fbclid=IwAR3TP0LhypL03ZxZI54-qAUoIIDSxeWhygX9B46T2DO2QkiVC7gF6qnL_AE&amp;app=desktop</a></p> <p>In Gov. Kelly's July 15 press conference, she stated, "the board (Kansas Board of Education) and I are united in prioritizing the health of our students....". Certainly, that would be the mission, however, no one seems to be talking about the unintended consequences part---which is part of their overall health. As you consider your vote to approve or reject the governors order, I humbly ask for you to make a FACT-BASED decision that considers the non-educational and social-emotional impacts and weighs that price tag against the covid risk factors for children.</p> <p>Kids need school SO much. In delaying and without in-person school and activities, I do hope the Kansas Board of Education considers ways to mitigate and 'flatten the curve' on the mental health risks our youth may be further experiencing. Many youth are already really struggling right now.</p>
7/21/2020 10:35:20	Guy	Martinat	Blue Valley School Dist	Overland Park, Kansas	The delay of Kansas schools until after Labor Day is a decision that must be passed. It would allow sufficient time for school districts to prepare for the new mandates that were put into action Monday. Getting the required resources, training teachers, and developing protocols is key for the successful reopening of schools. If schools reopen in August without time to adequately prepare, they will be closed again by Labor Day. Students and staff safety must be a priority. Learning can only occur in an environment which students feel safe.
7/21/2020 10:35:32	Tia	Massey	USD 262	Valley Center	Please APPROVE schools starting AFTER Labor Day!! Our district needs time to plan and prepare and our county needs our numbers to decrease.
7/21/2020 10:35:45	Sylvia	Polly		Salina	I feel like with the proper safety measures school can re-open. My students need not only the education but socialization and many other benefits gained from attending school. They do not benefit from staying home and doing online classes and I feel those who do not feel comfortable sending their students have been offered to allow them to continue their education online. I work in the medical field and I know with proper cleaning and precautions there is minimal risk to students and their families, no more than when we go to the grocery store.
7/21/2020 10:35:50	Cindy	Kearns	Meadow View USD506	Parsons	Please support Gov. Kelly's order to delay the start of school. She is considering the safety of both students and staff with this decision. It also allows time for teachers to better prepare for this unusual school year. Local school boards do not always have members with enough knowledge of school systems to make such important decisions.
7/21/2020 10:35:54	K	D	self	Colby	DO NOT DELAY OPENING SCHOOLS!!!! KIDS WILL HAVE BEEN OUT FOR 6 MONTHS!!!! This is NOT a blanket approach. Leave it the COUNTIES!!!
7/21/2020 10:36:02	Jitka	Durman		Pittsburg	I'm against delaying school. Kids need to interact with peers. Depression and abuse is on the rise. For a lot of kids that grow in poverty and others school is a safe place where they get breakfast and lunch. Please reopen the schools without delay
7/21/2020 10:36:04	Erin	Meile		Olathe	As a teacher who is at high risk of COVID complications, I appreciate this order and the fact that it gives schools the time to do the things they need to do to keep teachers, students and families safe.
7/21/2020 10:36:10	Sarah	Barkley		Overland Park	I support Governor Kelly's decision to delay the start of school. She clearly has the safety of our most vulnerable in mind as well as the safety of teachers and school staff. We are in the middle of a surge that is far worse than it was back in March when schools closed initially. While I would love my incoming first-grader to start learning with her friends and new teachers safety is the top priority!!!
7/21/2020 10:36:13	Elizabeth	Brake	Parent	Wichita, Kansas	Yes! Please open schools with safety procedures in place!

7/21/2020 10:36:19	Maya	Williamson	Williamson Family	Wichita	I strongly oppose the bill mandating that my children wear face masks in school all day. This will be more detrimental to their health than any chance of getting sick all year. We do not know the long term effects of breathing in our own CO2 constantly, day after day! Studies have also shown that cloth masks start to build up bacteria and mold within 30 minutes of constant wear. Studies also show that masks are largely ineffective of protecting us and others from the Corona virus. I feel that school should start on time and in person with out the restrictive use of face masks!!!
7/21/2020 10:36:24	Deena	Lampe		Kingman	VOTE NO TO FACEMASK IN SCHOOL
7/21/2020 10:36:27	Pam	Wolford		Parsons	I wholly, fully support the Governor's Executive Order to delay the opening of school.
7/21/2020 10:36:34	Lisa	McGowan	Parent	Pratt	Send the kids to school
7/21/2020 10:36:35	Marcy	Gansel		Hill City	I believe it is in the best interests of our children and their teachers to postpone school until after Labor Day.
7/21/2020 10:36:35	Ryan	Imhof		Colby	Don't delay start. Get them back in school per regular schedule.
7/21/2020 10:36:50	Brian	Bollinger	me	Paola	As you decide whether or not to allow schools to open on time, please consider all of the factors. As a teacher, I feel that it's important that the kids in our state are able to receive the best instruction available. I believe that getting kids back into the schools will help that to happen. The sooner the better. Districts have been working since March to put plans in place so that they can serve the students and parents in their communities best. By mandating that schools not open, that will require districts to, once again, adjust what they have been preparing for 5 months. Please, let the plans that the districts have been working on play out. Most, if not all, districts have been working on plans for in-school and distance learning options that would serve their communities best. They put these together knowing the specific needs of the students and parents in their communities. When you vote, please trust that the people making decisions about education in every district in Kansas are making the best choices and offering the best options for the people of their communities.
7/21/2020 10:36:53	Briana	Shepard		Hoisington	Our kids need to get back to school and to "normal routine". Some of these kids only get love, attention, and food at school. We are not benefiting our children in any way by keeping them out of school longer. Please consider getting back in school before September.
7/21/2020 10:36:57	Debbie	Gravenstein		Ness City	Open the schools. Be attentive to the requirements being made... our district/county have had only 5 a symptomatic cases; all that should be taken into consideration when recommending/mandating rules. It's sad to see the kids so down because they can't go to school or be with their friends! And I hope high school sports can return to our 'community'. We can't stop living and live with fear! Fear or faith.....and common sense.
7/21/2020 10:37:00	Dustin	Mullin	USD 379	Clay Center	I would like to express my opposition to the governor's executive order delaying the start of school until Sept. 9. The board needs to make a risk/benefit analysis of this decision and in doing so I believe must come to the conclusion that any benefit associated with a 3 week delay in the start of school does not even come close to out weighing the difficulty that this places on districts. I would ask that you please vote to not approved the Governor's Order. Thank you for you consideration.
7/21/2020 10:37:07	Rabecca	Henderson		Junction City	Our family is in agreement with the Governors decision to delay school until after Labor Day. Also we would encourage you to possibly extend that time past that. Our Schools still are not ready to implement the safety requirements you are setting forth. More time means more safety for our Schhol staff and also our children.
7/21/2020 10:37:13	Shelby	McBride		Basehor	I am not opposed to postponing face to face school until Sep 8, however I do not feel it is necessary to restrict fall sports from starting practice/competition. Most districts, ours included, have successfully been conducting practices since the beginning of June with no community spread. We had one coach test positive, was exposed in a social setting, but due to proper safety protocols, masks and coaches social distancing, there was no spread. We have been at basketball camps & tournaments for several weekends, also with no problems. To put a halt to something that is already operating successfully, just doesn't make any logical sense. Postponing school starting may make sense just to make sure schools are fully prepared, however I tend to think this should be decided at the district level. Some have been preparing for this for months and are positioned better to open now, while others may need the extra time.
7/21/2020 10:37:20	Matthew	French-Bravo		Andover	I strongly encourage the Board to support the Governor's recommendations to delay the start of the K-12 school year. Thank you for supporting the health and well-being of Kansans.

7/21/2020 10:37:23	Lisa	DeFever		Overland Park	I do not see the value in delaying school. I would like to see us adopt to a similar schedule as the colleges have planned. I understand it's a difficult situation but we have to do right by these kids in a lot of different ways. Let's get them back in a safe learning environment.
7/21/2020 10:37:23	Melissa	McGill	USD 348 & resident/par	Gardner	I am in total favor of delaying the start of academics to allow us time obtain the proper ppe and plan for our own and students safety and health. That being said, our district is doing great at keeping the HS students distanced during workouts. Please delay competition, but do NOT cancel these workouts. They have been vital in helping the mental health of my children. Thank you!!
7/21/2020 10:37:24	Sierra	Landoll		Marysville	We truly feel like it is a great idea to wait to open schools as covid is making a huge strike again. I have 2 kids in school and one at home. Both kids will attend different schools this year and be exposed to so many different people and at home my two-year-old has a compromised immune system so it greatly scares me as to what they could bring home.
7/21/2020 10:37:37	Robi	Murray	Parent	Lawrence	Please let the kids continue to practice sports even if we are not in school
7/21/2020 10:37:39	Cathy	Holtorf	Blue Valley School Dist	Overland Park	I am a 4th grade teacher and mother of 4 school-aged children. I am very concerned about the possibility of being fully open as originally scheduled. My 4 kids are at 3 different schools (Elementary, Middle, and High) and their step brother is at a different elementary school. Their dad teaches at a different high school, and his wife is high-risk (Cystic Fibrosis). My boyfriend teaches at yet another middle school in a nearby district and is also high risk (high blood pressure). Between all of us, we will be exposed to countless people on a daily basis. Due to the current upward trend of cases in the area, I think it is unwise and downright dangerous to put every one (students, AND staff) back in to schools this early. I am asking that we wait for the curve to flatten out before going back to schools in person, and that we have access to better safety measures before we think of putting all of these people together. It is my understanding that BOE meetings have been conducted virtually. If the board sees it too dangerous to put a small number of people in a room for a brief meeting, it should not be okay to put hundreds or thousands of people back into schools. I ask that you please listen to teachers' legitimate concerns over parents who just want to "take a break" from their kids. WE are the ones who will suffer. Who will take care of us when we get sick and die from this? Thank you for considering.
7/21/2020 10:37:46	Michelle	Friedrich		Clay center	My child needs to go back to school even if they need to wear a mask
7/21/2020 10:37:52	Meredith	R		Andover	I support all delays to the school year or switching to online learning as long as necessary
7/21/2020 10:37:52	Shafeek	Blackwell	USD259	WICHITA	Schools should remain closed until public health officials can provide more evidence of keeping Students, Teachers, and Faculty safe. Covid numbers are high and continue to rise in Kansas. Safety should be the main priority.
7/21/2020 10:37:57	Ruth	Goertzen	Concerned community r	Goessel	Yes, by all means, delay the start of school until September 8! Give schools time to reorganize and this virus time to slow down. This is a no brainer! Please follow the governor's recommendation to delay the start of school.
7/21/2020 10:38:02	Bethany	Jessup	USD 325	Phillipsburg	I am not concerned about hold off school until after Labor Day other than how it will effect the students taking dual credit college classes. With colleges starting sooner and extending breaks how will that work with K-12 being pushed back? Also, if the governor pushes it back once will she continue to do so? Our kids need to be in school if at all possible with state safety recommendations, not mandates. Kids are going to play with masks no matter how old they are. We have a small enough school social distancing is possible. The hand sanitizer mandate is going to cause dry, cracked, and bleeding hands besides the issue of allergies that cause allergic reactions. If we are putting in all other kinds of recommendations it would be more beneficial for the kids overall health to change the mandates to social distance without masks unless 6ft cannot be maintained and hand washing. Each school district needs to be able to do what is best for its area.
7/21/2020 10:38:03	Jennifer	Cody	Educator	Rose Hill	I hope we are able to get school started (as regular as possible with precautions to keep everyone safe) as soon as possible with a back up plan if numbers get worse. Kids have been gathering all summer in groups, at ball tournaments, etc and need to be in school with as normal of a schedule as possible.
7/21/2020 10:38:08	Melody	Cole	Self-Employed	Lenexa	I have my Masters Degree in Public Health and understand that we are in a health crisis and agree with Gov Kelly's recommendations to delay the opening of Kansas School's until after Labor Day giving school officials more time to develop a learning plan that keeps our children, their families and school staff safe. Please vote in favor of her recommendations.

7/21/2020 10:38:13	Patricia	Klima	USD 453	Olathe	Delaying the start of school only makes sense as we try to get this pandemic under control. When school begins however, we must either begin with a hybrid model or completely online. We cannot resume as "normal".
7/21/2020 10:38:17	Bill	Fargo		Colwich	Let school districts decide start date. HS kids have been practicing together all summer. No need to have a 3 week break and delay competition.
7/21/2020 10:38:20	Fiord	Sorell		Olathe	I don't want the school year delayed. I want my kids to be able to go to school.
7/21/2020 10:38:24	Shannon	Stuckert		Hutchinson	Please support our governor and our state teachers by voting yes to delaying schools opening until after Labor Day for the safety and health of all involved.
7/21/2020 10:38:27	Nancy	Nicolay		Prairie Village	Please delay in person school until numbers have decreased for weeks
7/21/2020 10:38:35	Jamie	Ross	BVSD	Overland Park	My son will be in 1st grade and I am scared to send him back to school so early. Please take the health of our children seriously during this time.
7/21/2020 10:38:38	Kelly	Crane	Parent USD 233	Lenexa	I would like to see in school learning resume after Labor Day, with masks, hand washing, hand sanitizer and social distancing (when possible). Even if it means a staggered or modified schedule. The value of live instruction is immeasurable. Thank you for taking my and others responses into consideration.
7/21/2020 10:38:38	Amy	Schmidt	Parent	Overland Park	Please open the schools;
7/21/2020 10:38:41	Pam	McGlynn	self	Manhattan	<p>I am in full support of Governor Kelly delaying the start of the school year until after Labor Day. Here in Manhattan we are experiencing a spike in cases. It is the worst situation we have been in since the pandemic started back in March. Communities need time to try to get the cases down before opening the schools. We now have a citywide mask order in place which should help us.</p> <p>USD 383 is still formulating their plans for the academic year and parents are faced with choosing 100% in-person instruction or 100% remote learning. This is a gut wrenching decision for a parent. Having more time to bring the local cases down before opening schools is a good thing. The extra time gives me hope that we can safely send the kids back to in-person classes.</p> <p>Do not override the Governor's Executive Order on delaying the start of school. Do not take away our chance at safety.</p>
7/21/2020 10:38:44	Stacia	Baer	USD 336	Topeka	As a teacher and a parent it is beyond me how we, as Kansans, can even think to take a chance with the lives our children. So much is still unknown about this virus, but we do know that cases are on the rise. Students will not be harmed in delaying the start of school by three weeks, but they could very well be harmed by rushing them back into a place of learning we know to be unsafe. I work in Holton and live in Topeka. I have a son with asthma, a mother with diabetes, a father with heart disease, and I have asthma myself. I beg you, please do the right thing and give schools the time needed to open safely.
7/21/2020 10:38:45	Gloria	Jacob	none/ retired teacher	Lawrence	I support Gov. Kelly's plan to re-open school after labor day. Hopefully, our numbers of new infections will be going down by then. As a retired teacher with 30+ years of experience in elementary education, I know first hand the amount of preparation and planning it takes to open schools each year. Many teachers will start weeks ahead of time getting their classrooms ready, because meetings and conferences will take up much of the time during the work days teachers have before school starts. All summer I have been thinking about how today's teachers will prepare covid safe classrooms. It is overwhelming! So much planning and physical classroom changes, My heart goes out to all school personnel. Such difficult decisions must be made. Please remember, many staff members were not allowed in the school building when they were closed in March. Also remember that our teachers worked so hard with little prep time to manage on-line teaching. Please- allow school to be delayed until after labor day so that all can return safely and we a little more prepared for what will be an extraordinarily difficult opening.

7/21/2020 10:38:53	Michelle	Alquist		Clay Center	I personally think we need to start school when we were supposed to because if they are correct we do not need to be delaying school starting and end with a short semester when the cold and flu season starts up. If we get started then the kids have a chance to get as much as they can in the classroom. Holding off the start is just going to cause increased problems. Being a nurse I hate to see what the issues will be when the flu/allergy seasons hit and everyone jumps to the conclusion that the child has COVID. We need guidance on how that will be handled. My son is a SR and has severe asthma and allergies and I still feel the best place for him is to be in school to be educated in person not on line and to participate in the activities sports and clubs he loves.
7/21/2020 10:39:06	Lindsay	Hodapp	K-12 parent	Atchison	<p>Atchison is a small college community. Benedictine College will welcome about 1,800 students back to campus on August 8th. These students come from states all across the country including Florida, Arizona, and Texas.</p> <p>In the last week, our county has seen an increased in the number of community spread related cases. Delaying the start of the public schools will allow all college towns across Kansas to assess the situation in each community before adding to the problem. We are lucky to have a small hospital in our county. However, the number of college students who will be moving in this August and possible bring new cases of the virus to our community could easily overwhelm their services. Stressing the system and limiting resources for our community.</p> <p>Over 65% of the students in USD 409 district receive free and reduced lunch. Meanwhile, our local community health clinic, who meets the health needs of many of these families, has been unable to acquire Covid-19 testing supplies to this date (July 21st).</p> <p>As cases continue to rise, teachers and school need extra time to prepare for the multiple ways education could proceed this fall. This is not situation as normal. Local plans must be made in an ever changing environment. Teachers cannot be expect to come back from break ready to make all of these adaptations on a moments notice. Many teaching strategies and lessons will need modifications to meet the needs of social distancing.</p> <p>I noticed in a picture of the State School Board meeting room that all board members are separated by plexiglas. What will classrooms look like? Are we willing to protect our children and teachers in the same way? A rush to return to normal in a degrading situation is a pipe dream. Protecting our children and teachers should be the priority at this moment.</p> <p>I call on the board members to support Governor Kelly's Executive Order 20-58. Give the schools time to do this right. The risks are too high. The death of one child or teacher is too high a price to pay for pretending that everything is back to normal. The children will be ok if we delay.</p>
7/21/2020 10:39:14	Jasmin	Beckman	Parent	Manhattan	I'd like to wait and see until after Labor Day. Cases are rising. Schools in Europe only started with 50% of students and had way lower cases then here. Let the mask mandate work and see if cases go down. Give schools more time to work out specifics. Watch other states that did open before us to see what worked and what did not.
7/21/2020 10:39:16	Leeann	Peck	Blue valley schools	Kansas city	I urge those voting to uphold the governors mandate to delay the in person opening of schools. Until our cases are trending down for a significant duration of time, being in a school building with hundreds of people is not a safe place for anyone to be. Also as a special educator who serves students who often tear my clothing, spit on me, and aggress towards me, I don't feel safe returning in person until we have a better handle on the virus.
7/21/2020 10:39:17	Dixon	Jowers		Emporia	There is currently a 50x greater chance for a person under the age of 25 to die by drowning as opposed to Covid-19.
7/21/2020 10:39:19	Kathy	Barnett	USD443 District 5	Dodge City	Do not delay school until after Labor Day. School won't get out until June and we will be in harvest by then. So many families will be affected.
7/21/2020 10:39:24	Hannah	Dreiling		Wichita	I'm a teacher and I am in favor of reopening after Labor Day, not only for the safety of my students, but also the safety of my 3 year old and newborn at home who could potentially be the recipients of whatever germs I bring home.

7/21/2020 10:39:25	Kimberly	Munk	Hoxie USD 412	Hoxie	I believe that the Board of Education should NOT delay the start of school. Lumping our small rural school in with big school districts is not the answer. Our local governments should have the power to make those decisions based on our community needs and how prevalent the virus is in OUR area and not just the rest of the state. Students need to return to school. Delaying the start of school is not going to do anything to slow the spread of the virus.
7/21/2020 10:39:25	Leah	Heskett	USD 412 Parent	Hoxie	Open our school on time. The kids deserve it! What's good for the East side of the state is not always good for the west! Tired of being lumped together. School 40 miles from Denver are having face to face school. They were hit harder than our area. Stop playing politics and let our local health department and school board decide.
7/21/2020 10:39:25	Kristy	Winter	Mom teacher	Olathe	If Gardner teachers have to teach virtually in their classrooms, please consider allowing us to bring our own children into our classrooms to help them with their online schooling.
7/21/2020 10:39:33	Mary	Cook	Substitute Teacher USD	Wichita	We must consider the safety of ALL students, teachers, staff and other district employees. The state of KS currently has a high rate of Covid within its larger cities. That rate is growing daily. I do not feel we are adequately prepared to stop the spread of Covid19 within these large group settings at school. Our hospitals are currently nearing capacity. Although it is paramount that our students return to school and their education, we must take ALL factors into consideration or face another large scale closure of schools. Above all, let's do this safely. I have Substituted for nearly 15 years. However, if schools are not opened in a safe manner, I will not be returning to Substitute. Many I have spoken with are in agreement.
7/21/2020 10:39:38	Fran	Moley		Unincorporated Johnson	The legislative branch exists for a reason. The executive exists for a reason. The governor taking legislative action is not a valid path in our republic. That being said, opening the schools should not come from the governor. The parents and teachers should be making this decision. My desire is to see the board reject this egregious action by the governor, but in turn pass the power to reopen to the individual districts with strong guidelines backed by valid science and interpretation of that science. The hype and misinformation is running rampant, and as such the truth is somewhere in the middle.  We are a government for and by the people, not by one person. The impact of this pandemic needs to be evaluated locally.
7/21/2020 10:39:38	Juli	Brown	Teacher	Basehor	I would like to see the delay in order to prepare our schools for a safe return. This 3 week period allows us to plan and implement what is decided. Please think of all of us!
7/21/2020 10:39:39	Kasey	Hostetler		Overland Park	Blue Valley families want IN SCHOOL SCHOOLING at the START OF THE YEAR. As long as it is IN SCHOOL by August/early September, that is what matters. IN SCHOOL SCHOOLING WITH OPTIONS FOR THOSE WHO DONT WANT TO GO. PERIOD. Thank you for hearing the voices of the families!!
7/21/2020 10:39:40	Zabrina	Maynard	Myself	Wichita	Please delay! Our household has several at risk people. We would love to be able to send our kids back, but only if cases are under control. We need that time!
7/21/2020 10:39:43	Janice	Carmichael me	Me	Olathe	Startschool now. For kids sake.
7/21/2020 10:39:44	Jason	Parmer	Colby public schools	Colby	Please do not delay the opening of schools if you allow this to happen what will the governor do next? Let them go to school and start sports!!
7/21/2020 10:39:49	john	puhr	ALLOW	kanopolis	ALLOW 20-58
7/21/2020 10:39:52	Natalie	Woods	Sunnyside elementary	Olathe	Please delay until Numbers go down
7/21/2020 10:39:57	Jolene	shove	uas 345	2030 NE MADISON 66	I am ok with delay as long as teachers/buildings are allowed (required) to be doing preparations. I think we need the extra time. Figuring out set-ups, practicing routines, we could have ALL of our PD days up front.

7/21/2020 10:40:02	Megan	Hagaman		Salina	<p>Please set politics aside and vote to uphold the executive order put forth by Governor Kelly. If we want to ensure that the Kansas economy can recover, schools can fully prepare to deliver instruction safely, and we have time to stop the spread of this virus it is essential that schools get the extra time to prepare and our state gets the extra time to try and flatten the spread. I see many people expressing that this should be a local control issue, however, pandemics don't just stay in one location. Part of the reason the virus has spread so far and so fast, is that different towns and cities have chosen different responses and that has enabled the spread. Extraordinary times call for actions that are uniform and that can best preserve lives. I for one, do not want to have students, staff. And teachers featured in memorium pages in their school yearbooks. I also understand that parents are frustrated because of their work schedules and child care needs. I too, am a parent, however it's going to be much more frustrating when schools have to close complete if we do not delay the start of the school year.</p>
7/21/2020 10:40:05	Fire	OP	EMS	Overland Park	<p>The ordeal started in March with one of Green's daughters, then the other shortly contracted it after they returned from a volleyball tournament in Colorado.</p> <p>"There was no test available for my daughters. They were sick but not near as sick as me and my wife," Green said.</p> <p>Green is also on the Johnson County Emergency Medical Science Advisory Board. It was before the shutdown, but he knew enough about symptoms to wonder if his daughters had come in contact with coronavirus.</p> <p>But soon, for him and his wife there'd be no doubt.</p> <p>"I was on a ventilator for 18 days. I was in the hospital for a month. When I woke up, I was unable to stand or walk," he said.</p> <p>He started physical therapy and about a month later was well enough to thank his caregivers with his family by his side. He returned to work about three weeks ago.</p> <p>"When I got COVID, I actually was working on departmental plans of how we were going to handle this," Green said.</p> <p>And three months later, perhaps because they saw their boss literally on what doctors thought was his death bed, he said the department is taking what he called very aggressive measures to stop the spread of the virus.</p> <p>"One of the first things that we do when we walk in the door, if you don't have a mask on, all of our patients, we are going to hand you a mask," he said.</p> <p>It's what they've always done for respiratory illness, but now it's a policy for patients citywide. The department is doing its own contact tracing for anyone who calls in sick with possible symptoms.</p>
7/21/2020 10:40:08	Michelle	Schmieding	Usd 259	Wichita, Ks	<p>As a parent and a school Speech Language Pathologist I'm concerned for my health and my kids health returning to school admits current Covid-19 numbers. In Sedgwick county the health official is looking at decreasing group size back to 15 and closing things again. It's easier for me in my position to do therapy virtually than try to do things with a mask on.</p> <p>Please consider the health of both staff and students in your decisions. Those of us who work in education are depending on you to keep us, our students and our families safe at this time.</p>
7/21/2020 10:40:09	Kaila	Schmidt	USD398	Wichita	<p>Please make the choice to keep us safe.</p> <p>Please approve the delay of K12 schools until after Labor Day! Protect our students, teachers, and school staff!</p>

7/21/2020 10:40:19	Stephanie	Simon	myself and my children	Syracuse	I have never understood why school starts so early here in the first place, as far as this year is concerned I believe it would be gross negligence to start any earlier than Sept 8th. The schools and teachers need time to prepare for the new guidelines set forth, not to mention needing to see if cases will still be going up or settling off. I am very worried about spread once school starts but I am also worried about bullying due to children hearing their parents views taking that to school and bullying kids for wearing or not wearing masks. Teachers need to be prepared to put their opinions aside and be ready to put their foot down on some issues they may not agree with, but now have to for the safety and mental stability of our youth, their families and the community we live it at large. Especially since most local governments and state governments will not. That is the truth of what has been laid on our teachers and school systems backs.
7/21/2020 10:40:22	Rachel	Brown		Basehor, KS	Do NOT open schools with rising cases! It's unsafe and will result to students and teachers dying. Please keep us safe. Our lives are in your hands.
7/21/2020 10:40:26	Nicole	Bollig		Lawrence	Please vote yes on 2058. Schools need the time to put their plans together to keep staff and students safe.
7/21/2020 10:40:37	Andrea	Scarborough	Educator - KCKPS	Lenexa, KS	Vote YES. We need the extra time for our districts to source PPE, Sanitizers, cleansers, etc. We also need time to train everyone to safely educate our kids if we have to be in-person. If we are to be teaching remotely, we need time to learn how to do it correctly - the stop-gap "teaching" we had to do in the spring was inadequate and most of us felt like we were drowning while we tried to keep up with the new platforms, technology, and responses from kids. We need more time than the four days of pre-service learning provided in our contracts to adequately prepare because this situation is so incredibly different from anything we have ever done in the schools. We just need more time to make learning meaningful for our kids. We need more time.
7/21/2020 10:40:40	Debbie	Fontana	Kansas School	Overland Park, KS	Please respect Gov. Kelly's input and keep in mind that we need to make sure we are hearing from teachers and staff on reopening. We are not in school a lot the first semester because of holiday breaks. Virtual learning can be done. Most of the ones making the decisions are not teachers, custodians, secretaries, etc. What about busing? Do you truly think taking temperatures everyday for 500-1,200 students is feasible. I don't care how many entrances you have. Do you think social distancing will not happen without mask in a high schools? Teachers will be fighting that, more then teaching. Plus students get side tracked with trying to focus and wear mask. Schools are a whole other animal. This happens once in a century. I know students need to be in school, but if it is not safe for anyone the need doesn't make sense. Please listen. Schools are so different from other businesses. If one child or one faculty member is lost, it's too many for such an unnecessary situation. Even if you offer both, in-person and virtual, it is going to be a mess. The parents will be outraged thinking the virtual are getting more then the in-person. The in-person is getting more then the virtual. This is a no win situation in my opinion and working in district for over 20+ years and 15 family members teachers and/or staff. There is so much more to this then just saying wait until September 8 to open. It gives three more weeks. It's not just about supplies. It's much, much more then that. Subs, teachers getting ill, students getting ill, busing, etc. Does the whole class quarantine when a teacher or student is positive? This is not easy. It is a life and death virus and happens once in a century. This is the time. Thank you.
7/21/2020 10:40:46	Tim	Hickman	Parent of student, spouse	Overland Park	Please uphold Gov Kelly's executive order 20-58 to delay starting school until after labor day. Teachers, staff and admin absolutely need the suggested additional time to make necessary preparations to keep our kids and our loved ones safe. This is not a political issue, this is a safety issue that helps protect our most vulnerable. Please vote to uphold delayed start to protect our kids and their teachers and admin who work incredibly hard every day. We owe it to them.
7/21/2020 10:40:48	Josie	Bahr	Parent of Kansas Student	Wichita	The BOE needs to comply with Governor Kelly's directives. She has our health and safety forefront on her mind. Her previous wise decisions regarding COVID have been excellent. The Kansas Legislature cares nothing for their constituents and seek only to oppose Gov Kelly at every turn for their own political gain.
7/21/2020 10:40:48	Elizabeth	Contreras		Wichita	I do not agree to delay school any longer, the children have asked for many classes, the children have the air to learn to live with this pandemic, and what they have learned is forgotten. Because online classes are not the same, they do not have the same interest, I agree with the plans they have and make sure as much as parents and teachers to which the students use the mask u all the time and correctly
7/21/2020 10:40:52	Cassie	White		Overland Park	I appreciate Governor Kelly pushing back the start of the school year. This gives the mask mandate time to work in decreasing cases and giving schools more time to prepare for kids coming into the school buildings.

7/21/2020 10:40:55	Kelly	Glanville	Parent & Teacher	Cottonwood Falls	Please support our Governor gives us 3 weeks to let masking take place for parents to fully prepare our children and allow the schools to fully prepare for the KSDE recommended changes to be safe. We as educators can the time that is required, I know this but I know preparation should not be rushed and time is on our side in this issue. Let us all prove we are the best for our children.
7/21/2020 10:40:57	Leah	Taylor		Prairie Village	My family is in 100% support that K-12 schools should hold off from in person classes until minimally 9/8 if not longer.
7/21/2020 10:40:58	Beth	Bacon		Wyandotte County	Please consider concern of large gatherings and travel over Labor Day Weekend. What about 14 day quarantine after last major holiday of the summer.
7/21/2020 10:41:05	Bruce	Lanter		Atchison	Schools need to be open.
7/21/2020 10:41:11	Austin + Sarah	Bruss	Secondary Educator In U	Overland Park	Good morning, Kansas State Board Members. I've appreciated the time you've taken to be thoughtful in your approach to giving us guidelines for the 2020-2021 school year. Education implementation is not the type of thing we want to rush, as our decisions will literally affect the lives of our students and their families. That being said, my wife and I are both secondary educators who support Governor Kelley's executive order to delay schools. Just as you have taken much time to be thoughtful in your guidelines, our district leaders and staff would greatly benefit from the extra time to be thoughtful in our implementation of those guidelines. Thank you for all that you do.
7/21/2020 10:41:14	Alichia	Van Slyke	Mother of student USD	Pratt KS	Please let school reside as usual and let the children practice and strength train. They need this physically, mentally, and emotionally!!!
7/21/2020 10:41:16	Kristin	Strathman		Centralia, Kansas	I believe the kids need to be in school. My kids do not learn at home. I am scared they will fall behind. I'm also totally against a mask. I feel it will do more harm for them than good. Thank you
7/21/2020 10:41:32	Billie	Esser	Self	Topeka	You want children to return for an education, but by voting down the order, you aren't listening to the educated.
7/21/2020 10:41:40	Sylvia	Holmes		Norton	I personally feel we are taking this to far. The kids have been out of school since March. It's time to stop sacrificing our children and get them back in school. They need to get back to a "normal".
7/21/2020 10:41:42	Nan	Renbarger		Lawrence	Until the curve is extremely flat and/or a vaccine exists, it is not safe for anyone to go back to school-preschool to college. Lives of all ages are too precious. Please don't rush it. Let's see how it looks second semester.
7/21/2020 10:41:51	Deb	Wertin	BV Schools-Retired teac	Olathe	Thank you for all your hard work in making sure our schools and teachers are safe and ready for students to return. I think it necessary to delay the start of schools in order to have a strategic plan in place. In addition, supplies and protective gear will need to be purchased and a well thought out plan in order to move this forward. Please, give districts, administrators, teachers and staff a chance to do that. Proper safety and planning will give parents students and staff a better chance to feel confident and safe sending their children to school.
7/21/2020 10:41:53	Christa	Ziegler		Topeka	Delay the start of school
7/21/2020 10:41:56	Darcy	Busch	Teacher	Wichita	We need to postpone our startup date of August 17 to September. Our Covid-19 numbers keep increasing. If we are to return to in person teaching, we need to ensure that students and staff are safe.
7/21/2020 10:42:04	Whitney	Endres	The Endres Famil	Overland Park	As a parent of both elementary and high school students, these kids need school. The American Board of Pediatrics says so, and I stand with them. The emotional toll it is taking on teenagers specifically is high. I am not whining about childcare, but just the well being of their mental health. Even if it's not every day, they need some time at school each week. Even well adjusted teens were struggling with online school. Praying for you all in your decision making.
7/21/2020 10:42:06	Courtney	Dold	USD 259	Wichita KS	Delaying the start of the school year will give teachers time to plan for the unknown and hopefully help some numbers godown. Teachers like myself need time. I support the delay.
7/21/2020 10:42:07	Mary	Mellen	USD 265	Clearwater	Please delay the opening by these weeks. As educators we work hard to provide stability and structure to kids. We love these kids. They mean the world to us. Please allow us this additional time to prepare for the school year.
7/21/2020 10:42:12	Dave	Kerwood		Arkansas City	As a parent and a teacher, I urge you to confirm the governor's executive order. Normally I agree that local control is paramount to our society, but our school districts are too interconnected for each to act independently. Districts might have to forfeit high school games, face a three week disadvantage in state tests, and find a way to tack three weeks onto the school year, all under immense local pressure from both sides.  This pandemic isn't a district level issue, nor is it a county level one. We rely on you to help Kansans navigate a pandemic that is truly worldwide. Thank you!

7/21/2020 10:42:19	Julie	Hughes		Clay Center	I am a high school teacher who teaches in the public schools in our district. I am not afraid to return to the classroom, but I do want to have adequate time to prepare myself, my lessons, and my classroom space itself for all of the changes we will be facing. It is extremely frustrating to be forced to wait for outside organizations to make decisions affecting my students and my job. I am tired of being in limbo. Normally I would start preparing for the return to school July 1st. We are already at July 21, and we are still waiting for direction from the state. If you choose to uphold the governors order, please define what this means for the remainder of the school year. Will these days just be eliminated from our school calendar, or will they need to be made up in May? I know it is incredibly difficult to prepare for every scenario, so I am not blaming you or the governor or anybody... I am just expressing my frustration with the entire circumstances.
7/21/2020 10:42:32	Edith	Paredes	Lawrence High School	Lawrence	Please, for our teachers and children's sake....let's not open schools! It is too soon!
7/21/2020 10:42:34	Jennifer	Puhak	Parent	Olathe	Please keep our kids safe. Offer virtual education this year. The lasting effects of this virus are unknown. If we expose our kids in 2020 what will they suffer from 2030, 2040?? It is OUR jobs to keep them safe. To keep staff and students safe please listen to the scientific evidence and medical professionals.
7/21/2020 10:42:44	Tricia	Simpson	Blue valley wolf springs	Bucyrus	I wish for the school to open back up.
7/21/2020 10:42:44	Mary lou	Dunn		6325 SW 27th Street, To	I support gov kelly's mandate to delay school till september..
7/21/2020 10:42:50	Alexander	Olinger	N/A	Garden City	I support the executive order.
7/21/2020 10:42:54	Amanda	Renner		Overland Park	I would like to voice my concern: my fear that postponing of school will result in increased social delay and the emotional consequences far outweigh the risks. Delaying school is not the right choice. We have two children in elementary education and We have been participating in youth sports this summer without health consequences. The risk for our youth contracting Covid is something that we are aware of and we trust school Officials will take the necessary precautions in order to keep our children safe. Canceling or postponing school is not the right choice.
7/21/2020 10:42:56	Nancy	Smeltzer	Educator and parent	Derby	When students are picked up by bus, are they being temperate screened before they enter the bus? I believe I'd we put this into place, it can reduce the amount of contact before a student gets to school as well as reduce person to person contact for students riding the buses with whom are in close contact to each other.
7/21/2020 10:42:56	Sarah	Malcolm	USD 251	Rural Emporia	Please follow the governor's recommendations and delay the start of school until after Labor Day. This will give teachers and coaches adequate time to plan how to provide our students with the best education and experiences possible whether their families are choosing in person or remote instruction. We want to return to school, but we want it to be safe and educationally appropriate for our students.
7/21/2020 10:43:05	BJ	Samuelson		Overland Park	Please keep Kansas kids out of schools until it is safe for them, the teachers, the staff, and everyone around them to be there.
7/21/2020 10:43:06	Tonya	Williams		Rantoul	I live in an area where the majority of people are not supportive of any type of mask wearing. I have witnessed different school activities happening this summer with no regard to trying to enforce social distancing or mask wearing. One administrator stated that he would not make his players wear masks during his practices or summer conditioning because "he can't enforce it". I find it highly disappointing that someone who has a high level position in the school isn't even trying to enforce it or model the behavior because he feels it's a lost cause. Now at least one of his students had become positive and the programs have been suspended because everyone who had attended have to be tested and quarantined. I worry this will become an even larger issue once school begins because each teacher will have their own opinions on the enforcement and I feel that our community is more supportive of going with out and laughing at those who wear masks. I do not know what the right answer is for school this year but I am very concerned about trying to do full time school and having our children remain safe.
7/21/2020 10:43:10	Ali	Marchant	Self	Wichita, KS (Goddard S	The Board should approve the Governor's mandate to delay the start of the school year by 3 weeks. Doing so would provide time for the skyrocketing number of new Covid-19 infections to level off as well as allow our schools an opportunity to review your recommendations and develop appropriate plans for reopening. Please don't let lobbying groups and politicians take over this issue. This is an issue of public health and the safety and well-being of our students and teachers. They are counting on you to make the right decisions.
7/21/2020 10:43:13	Trisha	Capps		Olathe	I agree 100% with the delay in school starting until after Labor Day
7/21/2020 10:43:16	deb	keary	counselor usd497	Lawrence	please support the delay of school so we can properly prepare for students and hopefully get things under better control.

7/21/2020 10:43:17	Jentry	McDaniel		Wichita	As an educator, I feel it is necessary to delay the start of school to ensure that districts have enough time, especially districts as large as Wichita and KC, to adequately prepare for students and staff. Safety has to be the top priority! Districts need time to acquire cleaning supplies and appropriate PPE, and to prepare for whatever type of learning that will occur.
7/21/2020 10:43:18	David	Coffman		Clay Center, Kansas	Do not delay the start of the school year
7/21/2020 10:43:20	Ashley	Freeman		Lawrence	I do not agree with delaying schools. My son has already missed a substantial amount of instruction even with the activities done in the spring. I don't understand what district work groups have been working on since the spring and why things need to be delayed further.
7/21/2020 10:43:28	Jessica	Cole	Parent in SMSD/Pre-K t	Overland Park	I urge you to support the governor's plan to postpone school openings until after Labor Day. As an educator and a parent, I have many concerns about reopening our schools while Covid-19 cases in Kansas continue to rise. This extra time would allow school districts, individual schools, and teachers to secure more PPE, sanitation supplies, and other necessities to keep students and faculty safe and healthy. If cases continue to rise without abatement, I also support virtual schooling into 14 days with no new cases. Please protect our state's youngest citizens.
7/21/2020 10:43:40	Kacie	Hastings	Teacher/Parent	Emporia	I support both of the Governor's mandates for the school year 20-21. The order to delay schools will allow me time to create more robust curriculum plans that can be taught online and in hybrid school settings. Without the preparation time using the Navigating Change document, there will be no growth between the spring semester and the fall semester in efficiency and effectiveness of instruction. As a parent of a new Kindergartner, I want my child's teacher to have the same time to prepare for both safe face to face instruction and possible distance learning. He will adapt to any learning environment we provide as long as it is well prepared for but I want to do my job as a parent and protect him from the possibility of severe illness or the underlying long-term health conditions this virus could cause.
7/21/2020 10:43:43	Kirk	Boster		Overland Park	I am writing to support the decision to delay the start of school as described. I feel that all school personnel need and deserve more time to prepare for what is bound to be a most unusual school year. This delay won't magically solve all issues but it is a common sense move that will assist people dealing with this once in a lifetime issue.
7/21/2020 10:43:45	Kay	Thompson	School	Concordia	I am in support of the governor. I feel we can use this extra time to get prepared. No matter where you are in Kansas it will look different. Yes, the schools are all different, but that should be the reason we follow this order so we all don't become overwhelmed with this virus. Then all the school districts will look the same.
7/21/2020 10:43:47	Mollie	Mills-Weis		Newton	I'm a high school teacher and support the delay. We need time to plan to have a safe environment for our kids to return to.
7/21/2020 10:43:51	Zachary	Sellers		Altamont	Schools should stay closed until after the pandemic has subsided.
7/21/2020 10:44:01	Jessica	Murray	Myself as a parent	Goodland	We have had a SUM TOTAL of NINE cases in our county. Delaying start of school might be a good idea for eastern Kansas... but there is more to Kansas west of Topeka. Here.... you're just hurting our youth.
7/21/2020 10:44:04	Dylan	Stang	Parent	Lawrence	I do not feel comfortable sending my kids back to school in person until there is a vaccine. If the state board of education can't meet in person, how can they expect students and faculty to?
7/21/2020 10:44:05	Sarah	Palikij	School Teacher USD469	Lenexa	I fully support the governor's executive order. It is a well thought out plan with the safety of all students and staff in mind. Thank you.
7/21/2020 10:44:09	Diane	Bain	Parent of students in ele	Paola	I am in full support of delaying the start of school to give districts more time to train and buy supplies to keep everyone safe during the pandemic.
7/21/2020 10:44:16	Tara	Davis	Emporia Public Schools	Emporia	I agree with the delay.
7/21/2020 10:44:20	Tonya	Quattlebaum		Wichita	I support delaying the start of school until after Labor Day. It is the right and sensible thing to do. Please protect our kids!
7/21/2020 10:44:29	Stacy	Doyle		Prairie Village	I absolutely believe the executive order should be held as it stands with a delay in opening school. We need much more aggressive mitigation efforts. The science is clear that wearing a mask and social distancing helps to prevent spread. The entire state of Kansas needs to get on board with this and we need to see a decrease in cases before we send our children back to school. I applaud Governor Kelly's efforts to keep our state safe. She is doing a fantastic job.
7/21/2020 10:44:31	A	Sayre	NA	Olathe	Ok with school starting after Labor Day. Need to hire more janitors and support Staff to keep school clean and students and staff healthy.

7/21/2020 10:44:40	Jamie	Young	Parent of Olathe School	Lenexa	The lives of our teachers, staff and students should not be used as political game. Our districts should be FULLY prepared to bring everyone back into the building. This is not something to rush into. This is something we must do carefully and with respect to science. Honor Governor Kelly's executive orders for the sake of the lives filling those school buildings this fall. Listen to your heart...you know that's the right thing to do.
7/21/2020 10:44:44	Tammie	Schaffer	Myself	Richmond	I urge you to support Gov. Kelly in giving educators more time to prepare - and the public more time to act responsibly and wear masks to help stop the increase in cases. Please make the health and safety of students and staff a priority.
7/21/2020 10:44:49	Terra	Herring	Parent of school aged ch	Ozawkie Kansas	I support delaying school . Our schools haven't had a chance to prepare the buildings or get necessary supplies to meet the guidelines . The 3 weeks will give them the extra time to help make the kids safe . Please vote to support our schools and vote yes on the order !
7/21/2020 10:44:49	Julie	Tipton	none	Topeka	Please approve the executive order to delay the opening of school until after Labor Day. The safety of our children, those they live with, and the school staff must be the top priority. Think of the catastrophe that will occur if schools reopen and it's wrong that "kids aren't affected" and we see our children and teachers start passing away. You really want that on your conscience? Our kids aren't going to "be behind" if we're all in the same boat. School can go longer into the summer next year to account for the delayed start. Strong safety measures and masks must be put into place if you are even going to consider opening schools after labor day. Someone my daughter is in contact with in summer sports activities tested positive and dealing with the lack of information from the school and the confusion and fear we've gone through since then have been terrible. Multiply that by thousands of people dealing with that if more than 1 kid gets sick. Think of the children that could be orphaned if they take the virus home to their parents. Do what is right for the children and citizens of Kansas and delay the start of school until after Labor Day or longer if necessary.
7/21/2020 10:44:51	Kari	Baker	Self who is a teacher	Topeka	Please delay opening schools. My 6 year old son already lost his father to the coronavirus. As a teacher I am very worried I will be exposed too. My son needs me. Both of our schools need to be safe before we can return.
7/21/2020 10:45:03	Kelli	Ruder	Blue Valley High Schoo	Stilwell	The infection rate in joco is .4% The mental health of your teen communities is at stake. Kids need to be in person in school and fully participating in all activities...sports, choir , band and clubs.
7/21/2020 10:45:05	Jeri	sickels	my family	lawrence	It is not safe for the kids or their families. There is no possible way to socially distance 30 kids in a classroom. Wage and company would rather see citizens dead or impaired than see Kelley lauded for doing her job. Wagle is a disgrace.
7/21/2020 10:45:18	Deanna	Clark	self	Garden City	Approving the Governor's executive order to delay public schools is the intelligent thing to do. Don't politicize it. Don't listen to anyone except the health experts, who are the only ones who really know what's going on. Don't turn this into an us vs. them situation, when it's about public health and safety. We are doomed to a repeat of May if you don't vote yes on the executive order. As a teacher, I shouldn't have to worry about getting sick and dying because of my job. I've accepted I may have to take a bullet for my students someday. Don't ask this of me, too.
7/21/2020 10:45:21	Richard	Dodd		Wichita	Open schools after Labor Day if cases are decreasing
7/21/2020 10:45:27	Rachel	Wannamaker		Hutchinson	Please stand with the governor on the executive order.
7/21/2020 10:45:36	Jill	Tanner	USD 320 Teacher	Rossville, KS	Teachers, school staff, and students lives matter. Our Governor realizes this, thus she has postponed school opening. Leave that as it is. As a teacher I will help my students regain academics but I cannot do that if I am ill or dead. This a pandemic and we will get a handle on it when science has a vaccine for it. I have been staying at home since March to help keep the numbers down.....you are asking me to throw all of that away and just start teaching as if there is no pandemic. Why? Do I not matter?

7/21/2020 10:45:40	Mark	Adams		Madison	<p>There are a couple of different concerns I have with this specific executive order. Children's Mercy recently held a conference highlighting the need for kids to be in the classroom, and the low risk carried in schools for passing this virus. With that in mind, I do not believe forcing a state-wide mandate is needed at this time. Instead, give schools the opportunity to adjust their own calendars to give them the time they need to prepare to open. In a county like mine, with low numbers of infection and enrollment, they may not need the time to prepare. In larger cities and districts, they may need more time to prepare. Setting benchmarks for reopening (and closing) schools make far more sense than a one-size-fits-all approach to a highly contextualized situation.</p> <p>I would encourage the board to examine the current infection trends in each county, and ponder the question "Is the strategy that works for Johnson Co. going to be the same strategy that works for Wallace, Rawlins, or Greenwood Co.?"</p> <p>I implore the Dept. of Education to use benchmarks as a guide to reopening instead of a universal mandate that risks hindering education of students.</p>
7/21/2020 10:45:41	Jaici	Simon	USD 489	Hays, KS	I support the Governor's Executive order to delay the start of school until after Labor Day. This gives our school district time to plan how to implement the Navigating Change guidelines to the best of our ability. Thank you for your dedication to our schools in Kansas.
7/21/2020 10:45:47	Leslie	Rahn		Laurence, KS	I am a teacher in a public high school in Kansas. We have approximately 1700 students, and a staff upwards of 250 people. We all want to go back to school in person, but we want to do it safely and with a clear, effective strategy in place. Governor Kelly's School opening delay will allow us to do this. Please vote to ratify her executive order so we can start school after Labor Day with a clear, safe plan.
7/21/2020 10:45:47	Michael	Kennett	Teachers/parents	Topeka	Please accept and allow the governor's EO to pass. As a parent, I desperately want my child to go to school, but I'm even more concerned about his safety and my family's safety. We shouldn't be rushing children back to school when our state is among the worst in terms of virus spread. All we will be doing is shutting down again if we can't first slow the current spread. Give schools more time to think out how to best mitigate the spread of COVID within their schools.
7/21/2020 10:45:48	Stephanie	Myers		Ashland	Comment removed due to profanity
7/21/2020 10:45:51	Pam	Switzer		DWIGHT	With all the wishy-washy and back/forth with decisions, at this point districts need the extra time just to be prepared. I can only imagine the strain this has put on district officials to get all necessary changes put in place in order to be ready for students. Please think of those in the trenches scrambling to make it work.
7/21/2020 10:45:56	Dec	Moran	Belle Plaine Elementary	Douglass	Please vote to extend the start of the school year until after Labor Day. Schools need extra time to implement procedures and policies that will keep students and staff safe. Right now, when teachers have questions about the beginning of school, the answers from administration have been; "I don't know", "We can't answer that, yet", or "We'll have to get back to you on that". So many things have to change for us to have in person school, and we need time to implement those changes. I would appreciate your vote to give us that time. Thank you.

7/21/2020 10:45:56	Nicholas	Semrau		Olathe	<p>This is a very difficult situation, and I really appreciate that you are accepting feedback from Kansas residents regarding the potential delay to the start of the school year in our state.</p> <p>First, I want to be clear that I think it is very important for our children to resume in-person education as soon as safely possible. There is no question that in-person learning is superior to remote learning, especially for those under 18 who are still learning time-management skills. This view is supported by the AAP.</p> <p>Unfortunately the worldwide pandemic presents important health concerns, not just for our children, but for their teachers, all of the supporting staff in the schools, parents, and vulnerable relatives. It is obvious that the rush to return to normalcy after the shutdown this spring has resulted in a strong resurgence of the pandemic nationwide, and mounting evidence supports the observation that the resurgence is significantly worse in areas where the recommended guidelines (distancing and face covering) were not followed well or at all.</p> <p>The board of education has done a great job providing instructions to the districts for what must be done to follow these guidelines in an attempt to safely transition back to in-person learning. Unfortunately those instructions were very recently provided to the districts, and there is a significant risk of non-compliance if you do not allow ample time to review and implement these instructions.</p> <p>The delay proposed by this executive order, in my opinion, provides two benefits:</p> <ol style="list-style-type: none"> <li>1. Districts will have more time to purchase or procure supplies, rearrange classrooms, and perform other necessary tasks to appropriately follow the guidelines needed to resume in-person learning as safely as possible.</li> <li>2. Despite the best efforts of all involved, there is a good chance that these instructions may not be sufficient or may not be followed appropriately, resulting in a much more severe resurgence of the pandemic this fall. As selfish as this may seem, delaying the start to our school year will allow you to observe the results of other states resuming in-person learning in August. By doing this, you can gather and evaluate real data without subjecting our children, teachers, and families to what amounts to an experiment that may have devastating consequences.</li> </ol> <p>In summary, as a parent of two children in the Olathe school district, I ask that you support this executive order to delay the start of the school year, because I feel that the benefits outweigh the risks.</p>
7/21/2020 10:46:07	George	Johnson	Self	Overland Park	<p>Children ages 5-17 do not pose a threat to the transmission of the virus according to the American Academy of Pediatrics. <a href="http://aapublications.org">aapublications.org</a> The teachers/adults in the buildings are the ones who pose a threat. They should follow Social distancing and wear face masks when not social distancing from other adults or moving about the campus. The threat of our children's well being is at stake if they don't go back to school. Follow the science, not the media.</p>
7/21/2020 10:46:11	Lynn	Kruse	Retired teacher	Junction City	<p>I believe delaying the start of the school year is a first step in determining whether students should attend school on site or virtually this year. It will give the districts the opportunity to develop an instructional process to meet the needs of the students in the district. If instruction occurs at the school building, preparation of the building will be a process that needs to be developed. Once the building is prepared for students, teachers, and staff there will need to be a process developed to maintain the environment in a way that will be safe for everyone involved. Creating an effective instructional program while students are in restricted environments will be a daunting task for all teachers involved; it will take time and collaboration to complete. Please give educational professionals the time they need to make this school year as effective as possible for the students.</p>
7/21/2020 10:46:24	Emily	DeVore		Kansas City, Kansas	<p>Hello, I understand this is an overwhelming decision with many facets. But I believe sending our children and teachers back to School is an unnecessary risk to our children's and teachers' lives. Additionally it would undoubtedly increase exposure to other members of the community and thus risking others not in the schools. Please delay opening the schools and work toward online alternatives. Thank you.</p>
7/21/2020 10:46:28	Joel	McClenahan	Parent	Newton	<p>The idea of delaying school is ridiculous. If you look at the data kids are not spreaders of the COVID-19. Every pediatric society in America is saying that kids are safer at school than at home. Every other country in the world has gone back to school successfully. Kids need structure, routine and education. This does not happen outside of school. The online platforms that were implemented last spring were very ineffective and many kids simply gave up. I can't imagine how many kids have been through severe trauma, starvation, and abuse since the schools have been closed. As far as teachers are concerned, there are thousands of "essential workers" who have faithfully been working and serving their communities since this began. ....I would tend to think that a teacher should be considered and essential worker. OPEN UP ON TIME!!!!</p>

7/21/2020 10:46:37	Norma	Bruning	Myself	Wetmore	Support Gov Kelly
7/21/2020 10:46:47	Dawn	Pyle	Kansas educator	Olathe	As a teacher, I am not comfortable with returning to school for in person classes at this time. Once the numbers of positive cases are declining, then maybe we can return to school.
7/21/2020 10:46:50	Kimberly	Harvey		Olathe	Please delay the start of the school year.
7/21/2020 10:46:53	Brett	Wolford	Children's Mercy Hospi	Parsons	Please delay school as long as possible. Our teachers and their families deserve to be safe too. You can't ask teachers to take a bullet for their classroom and also to die in a pandemic for those children while making 48k a year. They have their own children too.
7/21/2020 10:46:55	Bruce	Deters	Parent	Harveyville	We need these kids back to school as soon as possible. Face to face learning is the only way school works for these kids. They need social interaction and sports as well to remain mentally healthy. Delaying the start only increases their anxiety that school will be taken away from them once again. Open schools face to face on time. Let these kids heal.
7/21/2020 10:47:00	Nicole	W	Parent	Manhattan	I think the delay is fine. However, parents need more options besides in class or online. A good alternative would be alternating days of classes. Less time in the classrooms around other kids, less kids in the same space together. I think it's a win/win. Also, masks should be optional and up to PARENTS!! You will lose a lot of public school enrollment on this issue. I have seen it discussed in many online groups. This absolutely MUST be optional and a decision for PARENTS!
7/21/2020 10:47:04	Anastasia	Mellott	Self	Bonner Springs	Please delay start, and consider hybrid learning options. Alternate days for students and allow online learning to supplement. Kids were the first demographic to quarantine (schools, parks, activity all shut down) so their numbers of covid cases will naturally be lower. Please care about our kids and teachers lives.
7/21/2020 10:47:07	Chani	Perret	Usd 259	Wichita	Open schools with masks
7/21/2020 10:47:07	Amanda	Post		Scott City	Please consider that not all communities in Kansas can be treated the same. A small town in Western Kansas should not be mandated the same as the Kansas City area. Our children need their normal lives back. They have been through enough and mine in particular are too young to understand what is going on all they know is they miss school and their friends. We have witnesses the decline of my daughter's emotional health through this whole process and now we have the opportunity to correct this for all children. Wearing masks in classrooms is asinine and I think every parent agrees with that. Our children deserve better, we are setting them up for failure in life as they will be behind. In March we didn't know the risks, so closing schools seemed to be the only "logical" option. Now we have people in the advanced medical field saying they would send their children back to school, no problem. Regardless of political affiliation or stance on the accuracy of this pandemic, our kids don't deserve what they are being put through. Give them their lives back.
7/21/2020 10:47:07	Anne	Robidou		Council Grove	Schools need to be closed until after Labor Day to allow the safety for students and all school staff. This would give appropriate time to get supplies and educate teachers on their unexpected responsibilities. Teachers are risking their health and making sacrifices with their families to return to work as all essential workers are. One classroom of 20 kids with two parents exposes a teacher to the germs of 200 people, then we carry those germs home to our families. This isn't a choice we get to make, but we should be allowed to go back with all safety precautions in place. Thus giving everyone the best possible chance of staying healthy and safe.
7/21/2020 10:47:11	Amir	Bahadori		Saint George	I am strongly in favor of the governor's proposal to push back the start of the school year. It makes sense to give time for the incidence rate to decrease or transition to fully online should the incidence rate hold steady or increase. Our first priority must be the safety of children and staff. I urge you to approve her proposal.
7/21/2020 10:47:12	Deb	Graham		Nickerson	Yes, please delay until Oct/Nov - no masks. Have class outside, in gym, spread out when possible. Utilize hallways, gyms, outdoor tents, etc. Get creative.
7/21/2020 10:47:13	Elizabeth	Crane	Student USD233	Lenexa	I would like school to start right after Labor Day in the school building with masks, temperature checks, and socially distancing when possible. Learning in a school building in the presence of others with live instruction is very helpful to me and I feel that I get a better education when I am in school.
7/21/2020 10:47:19	Claudia	McAlister	USD 320	Wamego	I feel the delay is needed to give admins and teachers time to prepare to implement the 1100 page guidelines issued by the KSDE.
7/21/2020 10:47:21	Chris	Weidert	High schools	67002	Don't open the schools and propagate the spread of COVID-19. Politicians have failed us and here is a chance to save Kansas

7/21/2020 10:47:30	Samantha	Schweinfurth	So if my kid dies from c	Odessa	If I lose my child because our president just wants money and doesn't care about our kids then who do I sue if my child dies from covid at school. Please take schooling online. Don't risk our children's lives.
7/21/2020 10:47:35	Sarah	Gideon		Holton	Please vote in favor of the Governor's EO to move the beginning of school to September 8th. Allow our schools to prepare fully to keep their students and staff safe during the current pandemic.
7/21/2020 10:47:41	Gary	Sneed	None	Lebo	This virus is serious and it is good to error on the safe side. While we all want our kids back in school it seems to me the Governor is on the right track and the additional time can benefit everyone.
7/21/2020 10:47:51	Randy	Lowe	Parent/Teacher/coach	Overland Park	Please consider allowing school and athletics to start on time. At the very least please allow athletic conditioning to continue as It is currently happening. The kids need these things for their social and emotional wellbeing. I fear we are going to have way more suicides and emotional issues if keep kids home.
7/21/2020 10:47:55	Cole	Turner	Olathe west	13185 s lakeshore dr	School should not even be considered of being canceled l. Our generation is already behind with not completing our full year this past school year. Online school is dumb you learn nothing, not all kids have wifi and it is honestly a waist of time. Us seniors have worked out asses off the past 12 years to get where we are today and I'm not gonna let you just strip that from us. Governor kelly is dumb she is not a doctor she knows nothing about the virus. Let's face it most of the world is going to catch it and 2% will die and in some cases even lower chances. Mask will help nothing. Teachers will no longer be teaching but "teaching" kids to social distance and to make sure they keep their mask on. Instead of learning about math the little kindergarten kids are going to here "oh no put your mask on". "Do t take your mask off". "Don't touch each other's faces". All you are doing is making the generation behind us dumber and do nothing for them. Please take this all into consideration with your choices as I said before us seniors didn't come all this way just to be stripped of our last highschool sports, dances, bonfires, events in general, and most of all our last school year with people we could never see again. Be careful with your decision.
7/21/2020 10:47:55	Susan	Simmons		Maize	I am a nurse para in a school with 650 students. I'm 61 years old with a husband of 71. I'm worried about starting before our school had time to prepare. I'm worried about being around someone who gets COVID and being sent home to quarantine along with my RN. Who would run our office? We have a diabetic. I'm worried about getting COVID. Please do the right thing for everyone's health.
7/21/2020 10:48:00	Emily	Ragsdale		Topeka	Please leave decisions regarding school reopening and regulations up to local school boards. Kansas's is too diverse for a one size fits all decision.
7/21/2020 10:48:01	Amy	Faunce		Olathe	Please vote in favor of delaying the start of school due to the rising numbers of covid. Our students and teachers deserve to be safe and in light of the health departments recent recommendations, I believe opening school for in person classes is irresponsible. We must protect our children from the unknown long-term impacts of this virus. Thank you!
7/21/2020 10:48:01	Mandi	Anderson		Olathe	If we delay start until Sept, why is it not possible to start online education sooner!?! We are doing our community AND students a GREAT disservice by delaying start. Is it not even considerable to do a slow roll into a full day and start with half days? Students with free or reduced lunch could be handed a sack lunch while headed out the door. If we cannot start face to face, why can we not start fully online? Our community has the RIGHT to EDUCATION and our teachers are fully capable of working with flexibility. Let's get this year started strong, and sooner than later!

					<p>As a parent I feel that it is imperative that more time be given to help school districts to help ensure the safety of children, staff, and ultimately communities from the Covid 19 pandemic. Also I feel there have been questions that have not been answered and until answered we can not allow in house school to start. Questions such as: If you can answer all these questions, you can let kids back in school:</p> <p>If a teacher tests positive for COVID-19 are they required to quarantine for 2-3 weeks? Is their sick leave covered, paid?</p> <p>If that teacher has 5 classes a day with 30 students each, do all 150 of those students need to then stay home and quarantine for 14 days?</p> <p>Do all 150 of those students now have to get tested? Who pays for those tests? Are they happening at school? How are the parents being notified? Does everyone in each of those kids' families need to get tested? Who pays for that?</p> <p>What if someone who lives in the same house as a teacher tests positive? Does that teacher now need to take 14 days off of work to quarantine? Is that time off covered? Paid?</p> <p>Where is the district going to find a substitute teacher who will work in a classroom full of exposed, possibly infected students for substitute pay?</p> <p>Substitutes teach in multiple schools. What if they are diagnosed with COVID-19? Do all the kids in each school now have to quarantine and get tested? Who is going to pay for it?</p> <p>If your kid, or a student in your kid's class tests positive, does every other student and teacher have to quarantine? Do we all get notified who is infected? Or do HIPAA regulations mean parents and teachers just get "may have been in contact" emails all year long?</p>
7/21/2020 10:48:03	Daniel	Metcalfe		Minneapolis, Ks	What's the stress going to do to our teachers? Their health and well-being? Their ability to teach? How does it affect the
7/21/2020 10:48:04	Jessica	Walles		Hillsboro	We need to have online, hybrid and in class options. For parents who can support their children online, they should do that and that clears up class space for the kids whose parents both work or have special needs.
7/21/2020 10:48:05	Cynthia	Liggett	Parents	Overland park	Please open schools ! Our children are suffering emotionally . Those who don't want to be exposed can have accommodations !
7/21/2020 10:48:07	Loree	Hisken		Belle Plaine, KS	Please approve Executive Order to delay start of school until after Labor Day. Our county is seeing a large rise in cases over the last two weeks and having such large numbers of people in enclosed spaces is not ideal to prevent the spread of COVID-19. If school is able to have a delayed start we can have more time to prepare staff and buildings for school, as well as determine the direction that cases are going and if school needs to start virtually. This would also give preparation time for virtual options and training for staff in the event that school must continue in a virtual format. Thank you for doing what is best to keep the most people healthy and stop the spread!
7/21/2020 10:48:09	Jill	VonFeldt	Blue valley school distri	Overland Park	I would still like to start in school instruction after Labor Day for my Kindergarten and second grader. I am comfortable with them wearing masks and getting their temperature taken. These kids need their peers and a real teacher teaching them. Thank you.
7/21/2020 10:48:13	Pam	Moser	USD 315	Colby KS	They need to get school back in session. I am a grandparent of two grade school kids. They are bored due to cancellations this summer. They are starting to hate things. The kids have had no interaction with other children due to closure of things. They live on a farm and have had no interaction except with parents. That will be 5 months without interaction and learning. Please open school on time along with sports.
7/21/2020 10:48:19	Jeremy	Michelbook		Emporia	As a teacher, I am concerned that districts are being rushed to figure out a way to service our students safely. We need this time to prepare for the uncertainty of this upcoming school year.
7/21/2020 10:48:20	Tess	Leach		Salina	Please keep school closed until after Labor Day to allow districts to prepare
7/21/2020 10:48:20	Amy	Watkins	USD 439 Teacher	Sedgwick	Please consider delaying the start of school until September 9. That will ensure all schools are on the same schedule and local school boards are not forced to make decisions that could jeopardize their schools. It is not fair to make school start dates an influence of student enrollment.

7/21/2020 10:48:24	Bridget	Troyer	Usd 323	Manhattan	Please consider the safety of students, teachers and other school personel. Start school after Labor Day.
7/21/2020 10:48:37	Martha	Clemens	Auburn Washburn Scho	Topeka	Kids NEED to be back IN school!!!
7/21/2020 10:48:39	Christina	Schuster		Oakwood Dr	I vote for us to have a delayed start. After Labor Day.
7/21/2020 10:48:40	Melissa	Grimm	USD 204 Food service	Bonner Sorings	As a parent and staff member, I think it's extremely detrimental for students to not be in school face to face. There are too many kids that need their teachers. Teachers are so much more than a body that stands up in front of a classroom. They are the parent, the nurse, the disciplinarian, etc.
7/21/2020 10:48:56	Jim	Howard	USD 412	Hoxie	Don't take away local control. Hoxie is not Topeka and we can make choices that best meet the needs of our students. Thank you for all your service to the state of Kansas
7/21/2020 10:48:56	Christina	Benjes	Parents	Olathe	I support sound decisions based on science and medical opinion. There is not true right or wrong answer; however I do hope that there is adequate time to plan and provide thought out details for return to education. Children need consistency. Is spending half the day washing hands and sanitizing surfaces a good use of educator and study time. Will there be gym/recess/field trips? Does the district have enough subs to handle teacher absences for illness or exposure quarantine. Will classes be starting and stopping with multiple substitute changes and as the virus ebbs in severity through colder months. For older students how will passing periods work and quarantine when a teacher or student tests positive knowing the large number of potential exposures. How will measures the districts and state put in place be enforced? We have seen workers who lack insurance attending work after testing positive and causing clusters so what is the response/reaction to ensure staff and student safety. Will teachers who are not comfortable come back and be lackluster teachers who are resentful? (I have seen this in some teachers close to retirement).  I do not envy the job of administrators now. I see social media posts of staff saying they don't feel safe yet they are posting pics at parties and BBQs. I also see teachers and parents who have not left their homes in 4 months genuinely fearful for their health. Where is the balance? Whatever the plan please be considerate and thoughtful and ensure all districts have robust plans for scenarios prior to starting. AS parents we need this to make informed decisions for our families and each family will have different needs.
7/21/2020 10:49:00	Sandra	Orellana	Teacher	Junction city	I would prefer to have a delay start of the school year. I would like our schools to be ready if we must teach in schools but preferably teach remotely.
7/21/2020 10:49:01	Kate	Burrow		Olathe	Please uphold Gov. Kelly's executive order delaying start of school. Additionally, please consider beginning the school year virtually.
7/21/2020 10:49:03	Kristi	Shingleton		Hutchinson	Please do not open schools yet. Three safety of our children is of the utmost importance.
7/21/2020 10:49:09	Sarah	Mitchell	USD 345 Middle Schoo	Topeka	Please delay the start of school. With cases rising we need to take precautions to keep our kids, families and staff safe.
7/21/2020 10:49:19	PJ	Matulka		Olathe	Uphold Gov Kelly's executive order; it's the minimum you can do to protect our children, teachers, and school staff; will you deliver the news to relatives of people who die because their kids brought COVID home from school? Do the right thing. This is our modern-day war on the homeland. Protect Kansans.
7/21/2020 10:49:31	Katherine	Kashka		Overland Park	Please approve the mandate to have school reopen after labor day. As a teacher, we need this time to better prepare for whatever school will look like. We need more training on LMS as well as rearrange our classrooms for safety. We want to see our students back in the classroom, but we want to do it safely. This extra time will give us the opportunity to properly prepare as well reevaluate the situation before making a final decision.
7/21/2020 10:49:39	Deanna	Gaither	Myself	Derby	Don't start until after Labor Day
7/21/2020 10:49:46	Keegan	Hanson		Kansas City, KS	I think it would be safest to delay the start of the school year considering the current situation. Whether we do school online or in-person, it will be beneficial to give teachers more time to prepare. The virus is too prevalent. If we go back to school buildings too soon, I worry that we will just have to immediately go online due to an outbreak.
7/21/2020 10:49:50	Kayla	Eldridge	USD 260	Derby	Please uphold the executive order.

					<p>Greetings to whom it may concern,</p> <p>In no way do I underestimate the weight of the decisions before you. I know there is information overload and a great amount of stress for you all right now. However, as a parent of four children, a physical therapist, a small business owner in Wyandotte County, and daughter of a life-long educator, I feel my perspective appreciates many aspects of the challenges in returning to school and sports.</p> <p>In March I too was in panic mode, like many teachers and administrators may be today. My heart rate hovered in the mid-90s for weeks as my business was deemed essential, patients wanted uninterrupted care, and staff was scared. I had patients and 12 staff members awaiting my leadership and direction in uncharted territory. We made it safely work in a profession of hands-on treatment with 40-minute sessions. We triaged, phased down, and eventually phased back to 75% capacity. Childcare facilities have safely made it work, and dental offices have reopened and safely made it work. There is so much we can learn and apply from these environments and their safety practices.</p> <p>Each school district has unique needs and situations. Please let them navigate these individually vs a state mandate. Teachers have the capacity to keep distance, wear PPE, and enforce safe practices for kids with sanitization and wearing masks. Though 6-foot distancing may not be applicable in a bus or classroom, the other practices can be applied. Please see the commentary /link below which cites a variety of studies on this topic.</p> <p>Hybrid and online options should absolutely be made available for at-risk staff and students alike. However, schools NEED to open for the safety, nutrition, education, and mental wellness of our children, community, and future. At-risk children may never recover academically or mentally if they do not have a safe, nurturing environment to learn. Not opening schools could be detrimental to each child, and our future as a community and state.</p> <p><a href="https://m.facebook.com/story.php?story_fbid=10219475853940261&amp;id=1030763365">https://m.facebook.com/story.php?story_fbid=10219475853940261&amp;id=1030763365</a></p>
7/21/2020 10:49:52	Beth	Hofer		Basehor	Thank you for your tireless work and efforts. Blessings and prayers to you all this week.
7/21/2020 10:49:52	Sharon	Kuchinski	USD 453 - Leavenworth	Lansing	Please support Governor Kelly's executive order delaying the start of school in Kansas. A delay to the school year will give us the opportunity to plan effectively for multiple opening scenarios, observe what is happening to cases in our region and learn from what is happening in other states where the school year is beginning in August. I fear for students, fellow teachers and staff members throughout the state of Kansas if we don't assess what is happening in our communities and do everything we can to protect our students and ourselves as educators. We need time and the governor is giving it to us.
7/21/2020 10:50:06	Stephanie	Strange		Overland Park	Please honor Gov. Kelly's Executive order to delay the opening of schools to provide a safer environment for students, teachers, and all staff.
7/21/2020 10:50:16	Becky	Lacey		Plainville	<p>Opening the schools is necessary. To so many children all ages, schools are a safe place. With so many disfunctional families, the children need school. Will they get taught by absent parents?.will they be safe from abusive parents or siblings? And while at school they are fed, noticed of any emotions, injuries.</p> <p>And what's going to happen with Special needs children, speech , social behavioral issues, autism, ?? Just don't ignore these needs of ALL children and teens.</p> <p>We cannot let our children slip through the cracks with lack of Education!</p> <p>We must keep going as usual, trusting in God!</p> <p>Thank you, Gods blessings,</p>
7/21/2020 10:50:19	Jenni	Ness	Olathe School District	Olathe	Please delay school until after Labor Day and consider making first semester online for us to all figure out how this will all work this year.

7/21/2020 10:50:21	Victoria	Shelton		LaCygne	My husband and I are both working parents to two middle schoolers. We work opposite schedules, meaning he sleeps when I work and vice versa. In addition, we live in a rural community where internet availability is limited. Our children suffer when school is done online, both intellectually and socially. Our kids need to be back in schools to continue to gain the necessary skills to become functional members of society. If we continue to let this virus control our lives we will never get back to "normal". The virus presents no additional harm to our students / facility members than it does to "essential worker", which my husband and I both are. We are required to be at work everyday, as should our teachers. There are numerous reasons why our students should be back in school and why we need to present them with a version of normality.
7/21/2020 10:50:22	Brandi	Barney	USD 410	Tampa, KS	Please do not allow schools to wait to open. Our children have already lost enough of a proper education with the closing of schools last year. Children need a structured learning environment. And please for all that is holy, do not require them to wear masks. There are enough distractions as there is.
7/21/2020 10:50:34	Mary	Holsworth	Shawnee Mission School	Overland Park	Please support the governor's delay of the start of schools until after labor day so we can properly prepare for school to reopen. As a state we are not ready particularly in light of the 10.7 percent positive cases. Additionally while kids are of concern so are the many adults who work with students every day in close proximity.
7/21/2020 10:50:38	Patti	Hendrickson		Oberlin	I think it is a good idea- it gives the districts time to come up with their plans for how school will work for them.
7/21/2020 10:50:38	Rachel	Sewell		Prairie Village	I am in favor of delaying school reopening until at least after Labor Day or until positive test rate is 2% or less
7/21/2020 10:50:40	J	Adams	none	Topeka	Please delay school and make as many varieties of distance learning available as possible -- including for IEP students. Such as that child is doing distance learning except for entering the building to obtain IEP related services/classes.
7/21/2020 10:50:40	Jenna	Michel		Fort Riley	I think it was a great idea to delay the start of school to let the schools figure out how to manage the reopening. I hope you are not going to extend the school year to try to make up the time. We are in unprecedented times and I am sure exceptions can be made.
7/21/2020 10:50:47	Rita	Phillippi	high school	lawrence	please support Governor Kelly's decision to start school after the Labor Day weekend.
7/21/2020 10:50:48	Anne	Herbert	Self	Wichita	Please think long term on this decision. Three weeks gives schools more time to prepare and do this right. More importantly, it may save lives.
7/21/2020 10:50:49	Julie	Klahr	Holton USD 336	Holton	I hope and pray that all of you on the Kansas State Board of Education, will consider postponing school.
7/21/2020 10:50:52	Kate	Bayhille		Olathe	Our family implores the Board of Education to uphold the governor's order to delay the start of school. Test results simply are not being returned quickly enough to be able to identify and contain the virus. Outbreaks in the school will be potentially devastating to the health of at-risk adults in the community. While we recognize the emotional benefit to returning to in-class learning, the potential grief children will face if they lose teachers, or God forbid peers, outweighs that positive.  Thank you for your consideration.
7/21/2020 10:51:00	Julie	Martens	USD 309	Inman	As much as I want to keep all people safe, I feel we might be delaying the inevitable. I'm wondering if this delay takes place if we will be able to return to the school buildings at all. I cannot imagine, as a teacher, teaching students that I have never seen in person before. I will not be able to create the most beneficial relationships with them that I could. I realize not all people and families are taking precautions, but I am staying home all the time and only leaving for groceries and our outdoor church service. I know there will be challenges to in person school, but I think it needs to be left up to the counties/districts. Our state ranges so much from KCK to tiny Weskan. A state-wide mandate doesn't not seem like the right answer to me. I pray we can leave this up to the local level. Navigating change seems to have that laid out nicely for us with options. I'm not saying a delay isn't needed, but for that to be decided state wide seems overreaching and not the best decision for all Kansas students and teachers.
7/21/2020 10:51:03	Travis	Zirkle	I am a teacher.	Barnard, Kansas	Please keep schools closed until after Labor Day or later. We need time to prepare and train our staff on COVID-19 safety procedures. I am a special education teacher in Glasco, Kansas. All of the staff in my room are either high risk or live with those that are high risk. Thank you.
7/21/2020 10:51:04	Connie	Colson	USD#336	Holton	Support Gov. Kelly!

7/21/2020 10:51:03	Sarah	Hess		Shawnee	Please keep schools closed.
7/21/2020 10:51:08	Laura	Devereux		Prairie Village	I believe that opening of schools should be delayed until cases are again under control and lower levels maintained. While the risk to kids might now be as great, they will come home to others who might be at greater risk. Additionally there is so much we don't know about long term effects or who is at greatest risk. Also the environment of masks and distancing is not ideal for kids to thrive. So much will be lost in this form of education especially with younger kids. A warm smile and connection with their teachers and peers is such a huge part of the experience and that will not exist under this new normal.
7/21/2020 10:51:15	Jennifer	Topliff		Wamego	As a mother of a senior and 8th grader, wife of a teacher, and a teacher entering my 23rd in the classroom, I am writing to ask you to put the safety of students and educators above politics and parent pressure. While I believe local control is important, I also acknowledge that some local control has turned into a political war, and decisions are being made without regard to public safety and welfare. I'm also deeply concerned that decisions about education locally are being made by people with little to no working knowledge of how the education system works. The health and safety of our children and school staff are not at the forefront. Personal freedoms without responsibilities and politics should play no part in the decisions being made by county officials, yet that is what you will allow if you don't support our governor. Please put partisan politics aside and support Governor Kelly's efforts to protect children and all of those working to educate them and keep them safe. Districts need time to gather necessary safety supplies and train teachers on life-saving procedures. Districts need time to work through complex regulations and find practical ways to implement them. Districts need time to support teachers as we will need to develop robust online learning platforms because this virus will continue to spread in its current uncontrolled manor. Districts need time. Please don't take that from us. It will be a matter of life and death, not Republicans and Democrats.
7/21/2020 10:51:16	Salena	Orr	USD 233 & USD 512	Olathe	I live in Olathe where my children attend school. I also work for Shawnee Mission as a middle school teacher. Please consider delaying the start of school. This extra time would allow districts, schools, and teachers to properly prepare our rooms and schools for sanitation, social distancing, and any other new protocols you have put in place with the reopening document. While I do not feel it is safe for everyone to go back, this delay would at least give us the chance to better handle the situation.
7/21/2020 10:51:22	Leticia	Pitman	Olathe North	Olathe	Delay for safe return to school or plan for remote learning.
7/21/2020 10:51:26	Cindy	Buentello	Wichita Public High Sch	wichita KS	I do not think delaying school until September 9th will make any difference at all. The virus will still be here on Sept. 9th. Just get the kids back in school. Their well being depends on it!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
7/21/2020 10:51:26	Lisa	Ray		Overland Park	Open schools!
7/21/2020 10:51:32	Abbey	Thomas	Olathe teacher/Shawnee	Prairie village	Please uphold the governor's order to delay schools. Schools are not prepared. As a teacher I have received no information on how we will teach this year. As a parent I have received some options but nothing concrete. I do not feel it is safe for my daughter to attend in person school. We will opt for virtual learning because our health is more important. Please give the schools time to make plans. Thank you.
7/21/2020 10:51:37	Brian	Ruder	Blue Valley High School	Stilwell	Get ALL kids back in school in person with their teachers and coaches. More damage is being done by not having teens fully engaged than this virus is doing to their health. Kids and teens should be back in person period...My tax dollars pay for the schools and online learning is not teaching. Teens in particular are suffering greatly with mental health by having school, sports, choir, band, theater etc taken from them. In Johnson county we have 3200 cases out of over 602,000 residents ...math doesn't add up. Open the schools and all activities and give me a wavier to sign...I'm not afraid of this virus and will not be taking a vaccine for it either.
7/21/2020 10:51:44	Judith	Dutton		Lawrence	I support Gov. Kelly's order to delay the opening of schools. As the number of covid 19 cases increase, sending our children back to school is extremely risky. At least allow time for the teachers and administration to put the best possible procedures in place. This should not be a partisan issue. We elected Gov. Kelly and she is doing her job well in an extremely difficult time.
7/21/2020 10:51:47	Julie	Kircher	Self	Prairie Village	As a teacher in KCKPS with family in Shawnee Mission, Blue Valley and Olathe schools I support the delay in starting the school year to be sure teachers and staff can be best prepared and to keep staff and students safe.
7/21/2020 10:51:48	Allison	Vandall	Parent of elementary stu	Lansing, Kansas	I am strongly in favor of school starting after Labor Day.

7/21/2020 10:51:48	Jana	Houston		Lenexa	Please accept this. We need time and more sufficient answers for how this is going to work. We have already seen what happens when important decisions are made as suggestions or recommendations. They are not followed. People Cary masks in their cars with them and try to go places only to be told they need their masks, which they already had but wanted to see if they could get away with it. This will continue to happen and school will be even less safe. We need the extension to make better decisions and plans for this year. Please support the delay.
7/21/2020 10:51:51	Aaron	Holsworth		Overland Park	please support the governors executive order to delay school openings
7/21/2020 10:51:53	Melissa	Howard	Broken Arrow Elementa	Eudora	As a teacher and parent I am very worried about K-12 school reopening for "business as usual." I also help to care for my elderly mother that lives by herself. I do not feel there is a way to safely reopen school buildings for in person instruction while our COVID-19 cases continue to climb in Douglas County. Please don't misunderstand my worry for my safety and that of my family and students for a lack of empathy and wanting to be back in the classroom. If I am forced to work in person, I won't be able to care for my mother, as I cannot risk taking this virus to her. I do feel that the best way to instruct elementary students is in person, and I deeply miss seeing my students in person and giving them big hugs when they need one. But, this cannot be done safely. I work in a building that still has open concept classrooms. That means two teachers and upto 50 or more students in one space. I often have to turn sideways to squeeze between students seats. So, spacing students 6 feet apart will never happen. Reducing class sizes, where will the funds come from to hire the extra teachers? Frequent hand washing, yes a great practice, but will cause little instruction to happen due to the transitions. I do feel that students can be trained to wear face masks, but there will always be some that will not follow the rules. Asking families to keep kids at home when they are sick is already a part of education, but I have had students napping in my classroom because they don't feel well and their parents won't come pick them up. Or students that have told me their parents told them to come to school even though they threw up the night before. We do have the technology for online learning, which is a great alternative, as long as we are given some leniency for what we expect this to accomplish. I had 2nd graders that had the technology and internet access as well as a parent home with them that did not participate in any online learning last spring when we had to change to online instruction. This was a choice. A choice that the parent made, not the student. I had parents doing the online work for the child. I know these are arguments for going back to the buildings, as that is what is best for learning and equaling the playing field for most students. But again, I remind you this is not safe for my health, my families health and the health of my students. I know you have a very hard decision to make. I don't envy your position right now. I do ask that you keep the health and safety for everyone as the deciding factor for how you vote. We cannot afford for lives to be lost because we cannot make adjustments during this pandemic. These are exceptional times and require adjustments to expectations and how we deliver education. I would also encourage you to look at the required minutes for the 2020-21 school year as we move forward. Thank you for your time.
7/21/2020 10:51:53	Chad	Kelly	blue valley southwest	Overland Park	kids need to be in school. There has been adequate time (since mar.1) to come up with plans a,b,c,d and e... with proper policies in place we together as a community can do this.
7/21/2020 10:51:55	Kaitlyn	Longbine		Pratt	I am firmly against the delay of starting school! September brings cooler temperatures and cold and flu like symptoms and possibly more COVID. As an essential employee as a registered nurse, I do not hesitate to send my child back to school. I believe each school district has been planning, for months now, to establish a safe plan to reopen on time. Let's trust them! I worry about the education our children are not getting by delaying school. I also believe if you let the governor have her way and delay school until September, she is just as easily able to say it needs to be delayed again. How can our children thrive without school. In my opinion, school is an essential activity. If sports were allowed to resume this summer then I think school should start as planned in August. I also have a child that needs a speech therapy evaluation and if school doesn't start until September the help he needs is getting delayed as well. Daycares have remained open during the entire pandemic and I have not heard of any daycare having to shut down or any of the kids testing positive. I have heard of several families deciding to homeschool their children this year and that is their right. Enrollment numbers may be lower due to this. My family does not have the opportunity to homeschool as both parents are full time (40+ hours/week) essential employees. Please consider all options and make the best decision based on a district by district basis. Kids need school!

7/21/2020 10:51:58	Cassandra	Ballentine	Parent	Wallace, KS	I feel that the governor's order makes sense. The schools need time to prepare items to keep kids safe. Small schools in rural areas such as where I live need to get schedules rearranged for social distancing. All these extra precautions take time to implement. This would also give time to hopefully see our numbers go down as they have been on a sharp rise the lady couple weeks.
7/21/2020 10:52:00	Sara	Pottorf	USD 345	Topeka	I have a special needs son and 2 other little boys who need to be in a structured environment with their teachers and peers. My husband and I both work full time and this has already been detrimental to their education as it is. This cannot go on any longer! Please allow these kids to return to school!!
7/21/2020 10:52:03	Janel	Shultz		Elwood	I believe waiting until after Labor Day to start school is the most prudent thing to do at this point. Numbers are on the rise in Kansas. I have a son who will be starting kindergarten this year and I am a teacher myself so I see the situation from both points of view. While I want my son to be back in the classroom, I want to know for 100% sure that every precaution has been taken to keep him healthy and safe. That time is needed to prepare and come up with the safest plan for our students, our teachers and all of our other staff members.
7/21/2020 10:52:07	Darin	Malcolm	USD 251	Emporia	I support delaying the start of public schools until trusted health officials determine it is safe for students and faculty to return.
7/21/2020 10:52:13	Jamie	Cox		Baldwin City	Please vote to uphold the executive order and delay the start of schools. Remote learning would be good for first semester.
7/21/2020 10:52:15	Shonesia	Lindsay	Kansas City KS Public	Slee's summit	Please consider having schools in KCK NOT open in person. The loss of life outweighs the social-emotional impact. Also do we have the financial resources to repeatedly purchase masks for our students, hand sanitizer and have we considered the social-emotional impact on staff and students if we do return.
7/21/2020 10:52:38	Joseph	Norman		Goddard	I believe that the extra 2 weeks is a prudent a respectful way for teachers and administrators to plan for this difficult situation.
7/21/2020 10:52:42	Diane	Landers		Abilene	School need to start on time. Kids have been together all summer, therefore putting them back in school on time as opposed to late is a smart move. They are delayed academically as school was not in session I. The buildings since March. They need to be in school.
7/21/2020 10:52:46	Mary	Pantle	Concerned parent	LEAVENWORTH	Please delay the start of school until after labor day. Our schools need more time to prepare and make the schools safe. The acceptable amount of staff and student illness and deaths are ZERO. Please think about our children and our communities and not your pocketbook.
7/21/2020 10:52:52	Megan	Mascorro-Jackson		Merriam	COVID-19 cases are on the rise so dramatically that Kansans traveling have been placed on state quarantine lists. There are several counties with no hospitals, even more counties have no ICU beds. To open environments that are notoriously overcrowded and underfunded is irresponsible. Keep schools closed past as long as needed.
7/21/2020 10:52:54	Jessica	Lyman	Kansas resident and school	Overland Park	Please uphold, this is a good option on ensuring an equitable school experience and allows for a better chance to start school in person again in the future as we drive cases down in our communities
7/21/2020 10:52:57	Jolene	Durler	teacher	Dodge City	Thank you for all your hard work. I trust you will do what is best for the students, teachers, and families. Please use good judgement and not go for just a political push.
7/21/2020 10:52:59	Jacob	Payne		Hutchinson	I don't think schools should open until masks can safely not be worn.
7/21/2020 10:52:59	Alan	Lehman		4205 West 71 St, Prairie	I believe the schools should obide Governor Kelly's order and not open until after Labor Day, or later if needed.
7/21/2020 10:53:12	Carrie	Alton		Clay Center	School should start in August
7/21/2020 10:53:01	Tina	Mowrey	my house hold	Olathe	In person class needs to happen
7/21/2020 10:53:20	Mary	Clark	Private retired citizen	Olathe	Given the current increase in the COVID 19 cases in KS, I concur that the school year needs to be delayed if not postponed indefinitely. It's my opinion, that several districts in Johnson Co do not have specific or thorough plans to deal with this epidemic.
7/21/2020 10:53:21	Lindsey	Faber	Catholic Schools of Wichita	wichita	please open schools as originally planned!
7/21/2020 10:53:24	Lori	Wilson	parents/community men	Zone 9 (Cherokee Count	I fully support Governor Kelly's restricts and proposal to delay the start of school/athletics, as well as the guidelines for safety.
7/21/2020 10:53:25	Tracy	Leopold	Parent	Andover	School needs to start as normal, kids need to be in class if they want and if parents don't want to send them they need to have homeschool options.
7/21/2020 10:53:32	Jessica	McDow		Mound Valley	I feel they should postpone until after Labor Day, this is a lot of lives to think of both staff and children.

					Before you rubber stamp the governor's executive order to delay school opening, please consider the health of all involved. There is no factual scientific basis for the order. There have been studies in several countries proving that children don't spread covid to adults, nor do they (with a VERY minute number of exceptions) require hospitalizations or other treatments. The mental toll on children's health by NOT being in a social environment, as well as the toll on parents health and wellbeing, are astronomical. Please consider the consequences. I understand that teachers might be concerned about the spread, but again, there is no evidence that children transmit it to adults. Many countries, like Germany, have had school without ANY restrictions, such as masks, even. Those are also not necessary, but that is a whole separate matter. Please listen to the scores of medical experts who suggest schools need to carry on as close to the way they previously were, prior to March. I could continue for many paragraphs, but I will not. Do what is best for your constituents.
7/21/2020 10:53:32	Erik	Bendorf	None	Leawood	Thank you!
7/21/2020 10:53:37	Lisa	Bauman	Blue Valley teacher, Sha	Overland Park	Please support Gov. Kelly's order and mandates. Our kids' lives are at stake.
7/21/2020 10:53:49	Darren	Epping		Manhattan	I fully support the decision to delay opening schools. Educators need time to prepare for in person instruction. The delay allows them time to do that. With cases increasing in the state it is irresponsible to start school before Labor Day.
7/21/2020 10:53:51	Joel	Eberhart	USD 204	Lenexa	I have major concerns about the validity of bringing students back to school. First off, there is limited ability to effectively social distance in a classroom setting. A majority of our classes have over 25 students per class. I have concerns that even if a student is exhibiting symptoms parents will still send their child to school or refuse to come pick up their student from the district. It will be difficult to rely on parents to temperature check their student every single day. I have concerns about what the process will be if there is an infection in the school that I work at and how that will alter the learning environment for both students and teachers. I know the majority of teachers and parents I have spoken with do not feel comfortable at all in a classroom setting at this point. I think pushing back the start date at least gives us more time to find a way for this to be come a more comfortable option to return students to the classroom or to find a way to be successful with virtual learning.
7/21/2020 10:54:03	Amy	Morales		Shawnee	Delaying school is ridiculous. These kids NEED to be in school. This is delaying their mental and cognitive health with no logical reason to backing it up. Schools have been shut down now for 4 months. Our school is small and private and have expressed they are ready and that it will cause more harm than good to keep them away. This is not a decision for a governor who is well past the age of raising small children in school and delaying for rural counties in Kansas. This should be left up to the schools. This is just another beating of the chest to prove she has control. She is a disgrace.
7/21/2020 10:54:10	Olivia	Hensley	Self	Wichita	The start of school should not be delayed. Students need to return to school.
7/21/2020 10:54:24	Farrah	Schmidt	USD 382	Pratt Kansas	Please allow districts to make their own decisions based on data within our counties!
7/21/2020 10:54:31	Mary	Deters	Parent of a Senior	Harveyville	My senior is facing a tough year already having to navigate changes in the school setup as well as her school national competitions having to take place virtually instead of reaping the reward of getting to travel to Washington DC and several trips to places like Ohio and Denver. She worked extremely hard for these trips only to have them stripped away. Now she faces new uncertainty with school being delayed or possibly not opening at all!! She didn't learn anything in the shut down this spring. She tried to learn Chemistry remotely but it was clear to her teacher that this cannot be taught that way. She has 'assignments' that were literally busy work. They wanted her to send them a meme about the virus as an assignment. Once she had to make a tiktok video about making pancakes. How is that learning?! Open school and let these kids see that somebody cares about them and their future. Thank you.

7/21/2020 10:54:35	Amy	Wildeman	Mother to My Children	Colby	Allow our local administrators, health officials, and school boards determine what is best for our kids and our district. Let them implement a plan using the plan they were provided from you the SBOE to work from to get our kids back into school without any further delay. Delaying further means it will be 6 months that my kids and husband, who is a science teacher/coach, have been allowed to step foot in a classroom. THIS IS WRONG! PLEASE do not continue to deny my kids access to a quality education simply because there are other larger cities or school districts in the State of Kansas that maybe seeing a higher number of cases or their teachers are not comfortable with returning to an in-classroom setting. Don't allow the "One Size Fits All Approach" to be forced upon ALL Kansas Kids! They are the ones suffering from it and it's not fair or right!
7/21/2020 10:54:37	Marisol	Santiago	Teacher Parent	Wichita	As a parent I am scared to put myself into the situation to bring it back to my sons. My oldest son has allergic asthma and this virus could be fatal. For my student many of my asthmatic kiddos their parent can't afford their inhalers. They don't need to be exposed. The kids don't have the maturity to go back into schools and understand isolation or quarantine when a fellow student leaves or myself. Students needs to understand hygiene and the severity of this virus. With the tear between which parents believe this virus verses the ones that don't is going to be an obstacle.
7/21/2020 10:54:38	Stacey	Noble	Seaman USD 345	Topeka	I agree with postponing the opening of schools to kids, but only until September 9 at the latest. Teachers will need some time to sort out how to teach both face to face and online at the same time.
7/21/2020 10:54:38	Jaime	Kitzmann	Classroom teacher/paren	Garden Plain	I want to see the kids back in person as soon as possible! That being said, I personally am in favor of the delayed start....as a teacher, I appreciate the extra time to prepare for safety measures, instruction planning and technology training that we may need to do our job to the best of our ability. I just don't think the traditional 1 week start before the kids begin, is enough to get all of our ducks in a row. I support the decision to delay the start of school until after Labor Day. Thank you for your time and efforts to do what is best for kids.
7/21/2020 10:54:39	Jana	Peters	Retired 2020 School Nu	Manhattan	As a RN for 43 years and a school nurse in Kansas schools for 26 of those years, please approve Governor Kelly's recommendations on schools. She is looking out for the health and well being of all Kansans. Our children and grandchildren are our most precious commodity. Please do not allow them to be guinea pigs by opening schools too soon. Let's wait the extra 3 weeks before starting schools. Give schools a chance to have the best plan for our children in place. Please do not allow them to be guinea pigs. Let's see what the covid numbers are and open schools to in person education ONLY when cases are on a steady and consistent decline. Let's use masks in schools following her order for the protection not only of our children but our teachers and other staff. One of the reasons for in person school is the social experience for kids. That experience will not be there for them this year with social distancing, etc. The other reason is daycare so parents can work. Schools primary job is to educate, not be a daycare. One child's life lost, one teacher's life. It's a high price to pay.
7/21/2020 10:54:41	Staci	Frick		Hesston	Our kids needs to be back in school sooner rather than later! Mental health is the biggest worry for them Right now. Kids are showing more resilience to this virus and their mental, and emotional state needs a sense of normalcy. Getting them back to school is so crucial! Also, mandating masks for all kids in school is dangerous! Studies done overseas are showing severe issues with kids and wearing masks all day at schools! That poses more risk to them than the virus itself.
7/21/2020 10:54:41	Billi	Wilson	USD 412	Hoxie	I am writing to encourage you to leave decisions up to local districts. This country is built upon the freedom of choice and the governor is trying to take that freedom of choice from the citizens of Kansas through her mandates. She resides in Topeka, a city where there are more citizens to be concerned about. We are a small community and the issues faced by bigger cities are not the same that we face here. Decisions need to be made at the local level only. We know our community better than you do, so please allow decisions to made by those who live within our county borders.
7/21/2020 10:54:46	Melissa	Loper	JOCO resident and smal	Overland Park	Thank you for making the hard decision to postpone the school year. As someone who was a teacher for over a decade, I appreciate you doing your best to keep the children, teachers, and staff safe as covid numbers continue to rise in our state.

7/21/2020 10:54:49	Sara	Anthony	None (Parent)	Spring Hill, KS	Really disappointed with the delay. Schools should have been more prepared and able to adapt under the circumstances to start on time, even if remotely. Things aren't going to get better in 2-3 weeks. Also -- More thought and planning is needed for full-time working parents of young children. The government is mostly acting and assuming parents can quickly adapt to different plans. This is not the case. Parents who had summer care through mid-August are now left without care for many weeks. If school starts remotely, parents who can work from home cannot also adequately supervise young kids' distance learning. Also, more care needs to be made towards household's technology and internet capacity. Also, kids on IEPs needs access to people and facilities. Lastly, if remote learning becomes more prevalent in the future, more consideration should be given to year-round school so our kids don't fall any further behind, and have more consistent touchpoints.
7/21/2020 10:55:14	Jessica	McDow	Myself	Lawrence	As a registered nurse, I support delaying the start of school until after Labor Day. Students have not physically been in school since March. They are used to not being in school physically. Postponing the start of school for 3 weeks will be nothing to these kids. The proposed social benefits of going to school for 3 weeks will pale in comparison to the negative effects of a disease outbreak. With an additional 3 weeks, the state has more time to combat the spread of COVID-19. The case count needs to begin decreasing, not increasing, in order for large groups of people to gather safely. It will be much more disruptive to students and parents to start the school year and then have to abruptly change plans after a few weeks because of an outbreak. We are not asking to postpone school indefinitely, just for a little while until we get the current outbreak under control. Additionally, if schools become super-spreader locations, that is going to put an additional strain on our healthcare workers, who are already doing all they can to help combat this virus. By keeping students home for another 3 weeks, that's 3 more weeks that health care professionals have to prepare for another outbreak.
7/21/2020 10:55:17	Rhonda	Weber	Pratt High School	Pratt	Let kids have school let them play
7/21/2020 10:55:24	Jacinda	Weat	KCKPS	Overland Park	Please uphold the governor's request to delay school opening until after Labor Day. Give our schools more time to put a safe plan in place for the return to school and make decisions based on the science and medical needs of our communities.
7/21/2020 10:55:25	Jordan	Garcia		Overland Park	As a classroom teacher I can confirm with certainty there is absolutely no way we can have in person school in a safe way. There have been studies shown that in order to do so public school would need upwards of \$245 billion in funding, and this year we've already cut the education budget by ~\$7 Million and Trump threatens to cut it further. I come into contact with 140-160 kids a day in my classroom alone, and knowing I am not equipped to be safe, I do not feel comfortable teaching. With my anxiety, and all the restrictions, stress, and fatigue we will ALL be experiencing, I know the kids will not be able to get the socialization and/or personal interaction that they so need. Personally, I have 10 family members diagnosed with Covid, and an uncle in the ICU on a ventilator, and 2 autoimmune disorders of my own. I know I won't be able to go back and put all my focus and love into those kids like they deserve. If we closed schools at such a small number of cases of Covid and effectively ended the school year, why would we rush back in when cases are 4x more than that point, and only rapidly increasing every single hour? It seems incredibly counterproductive and illogical to me. Also the fact that the board is meeting VIRTUALLY instead of IN PERSON gives you all the context you need. If you all don't feel safe meeting right now, how/why would you send me back to in person learning with 800 kids? What a shameful thing to do.
7/21/2020 10:55:36	Elizabeth	Cathcart-Rake		Prairie Village	As a physician and a mother, I implore you to support Governor Kelly's order to delay school opening. We are seeing higher and higher levels of coronavirus infections every day, and strong medical evidence suggests that opening schools will be another way infections will spread. This threatens everyone's life. This virus kills - I have seen this first hand. In Texas, hospitals and ICUs are full. Our hospitals and ICUs are filling fast and I am concerned that we will be in this position soon. Another opening will only worsen this significant issue. I understand everyone wants to get back to life as usual, myself included. But, we cannot and should not allow for the death toll to rise in the pursuit of this impossible hope. Please focus your efforts into how to support children and their parents in the pursuit of more equitable and engaging remote learning.

7/21/2020 10:55:38	Zachary	Dreher		Emporia	If executive order 20-59 is truly something districts must abide by I see no reason why we must as a state delay. This is a decision that should be made by individual districts based on the plans they have created and on how Covid is affecting their local areas. The needs of each district can vary drastically based on those two variables alone, not to mention the multitude of additional factors that are currently being monitored by each district and also used to help make their decision. Thus there is no "one-size-fits-all" plan. Please vote to against Executive order 20-58 and leave the power to decide where it belongs, with the individual districts.
7/21/2020 10:55:38	Nicole	Peters		Hays	Please get these kids back to school. If it is delayed another 3 weeks, that is almost 6 months of them being out of the classroom. I feel like the local districts will do everything they can to keep kids and educators well. Kids mental health is suffering because of this.
7/21/2020 10:55:45	Stephanie	Ashford	Parent of usd232 studen	Shawnee	Please do not delay the start of school! My child wants to go back ASAP! He misses school and his friends and activities. He did not learn much in the spring. He need to get back to learning!
7/21/2020 10:55:46	Cindy	Malay	NKESC 602	WaKeeney	I believe we should start school after Labor Day
7/21/2020 10:55:50	Aimee	Poore		Andover/Wichita	No masks for children under 10! There will be increased illness d/t mask misuse, loss, face touching and lack of concentration d/t minimized fresh air and heat. Additionally, has our governor considered the mental ramifications of her "ruling"? She is not the queen. This overreach will not be forgotten.
7/21/2020 10:55:52	April	Crosser	High school	Prairie village	Please do not delay school or sports and activities.
7/21/2020 10:55:52	Shawn	Seematter		Pittsburg	As the head football coach at St. Marys Colgan High School in Pittsburg, Kansas we have been safely conducting summer strength and conditioning workouts, as well as sport specific workouts, since June 1. We have made several adaptations to what we have done in past summers to account for social distancing. If the executive order were to pass, it would not allow coaches to work with our student-athletes (as we have for the past 8 weeks) for 4 weeks leading up to the start of practices; essentially wiping out the gains and progress we have made to get them in shape and prepare them for a season. While I agree that a shortened season would be better than no season at all, I am worried for our athletes health and safety if we don't have enough time prior to season starting to get them in shape, which is what we have been doing for the past 8 weeks. That is just the physical detriment caused from this executive order and doesn't even touch on the mental/emotional drawback. Physical fitness and healthy habits are proven to improve mental and emotional health, especially in children. Removing the ability of the student to have adequate and safe workout facilities could also be very detrimental to their mental and emotional health. Athletic activities such as Baseball, softball, basketball, and volleyball tournaments have been taking place across the state for months now, and removing that physical stimulus and natural stress reliever could be costly to our students who need it the most. Not every child has the ability to play travel/club sports and school sports are their only outlet. After having to stay at home for two-and-half months this spring, our students craved physical activity and have benefited greatly from it this summer, especially those not fortunate to be on travel/club teams. Removing it from them again will hurt those who Have not had the fortune of playing this summer.
7/21/2020 10:56:02	Cierra	Gawith		Hillsboro	It is in the student's and staff's best interest to delay the start of school to atleast after Labor Day. I am truly concerned about my kids-all ages- going back.
7/21/2020 10:56:06	Jennifer	Johnson	Teacher-Fort Leavenwor	Leavenworth	Please support the executive order from Governor Kelly delaying the start to the school year. I'm a teacher and I feel like this time is necessary to prepare for students. I don't feel as though this should be kept on a local level, as I feel like there's too much pressure on local officials. I also don't trust them to do what is right.
7/21/2020 10:56:08	Jennifer	Barnhart	Retired administrator	Osage City	I support the Governor! 1. Keep students and staff safe. 2. Give educators more time to prepare.

7/21/2020 10:56:10	Devon	Vickers		Olathe	<p>I believe that postponing school is ridiculous and unnecessary. It is my opinion that schools should be able to reopen on time with proper precautions (whether online or in person). The extra 3 weeks do not offer any benefits. There is simply NO reason why schools who have properly prepared for online schooling should not be allowed to start on time as planned. ZERO reason.</p> <p>Additionally, private schools, which are much smaller (which includes homeschools in our state) should NOT be included in the mandate whatsoever. It makes no sense.</p> <p>The governor has, once again, overstepped her bounds and needs to be reigned in. She is not taking education seriously and is only cow-towing to her political party. Our children NEED to be educated. They NEED to get back with their peers...even if it is only virtually. My children NEED interaction and they need their minds challenged.</p> <p>As an educator myself, I know that we are harming our children's future learning. We are going to have to backtrack drastically to get our students' learning back up to age-level. We will be teaching children all across the spectrum from those who have been neglected/abused/left hungry to those who have just had an extra long summer to those who have parents who have kept their brains engaged in learning throughout the past 5 months. The first two groups are the ones who NEED to get back into academia. They need their minds challenged once more. They NEED learning.</p> <p>PLEASE consider all of the factors here and not just the "it's not safe to be in person in school" factor. There is SO much more at play and we need to be concerned about the WHOLE child...not just the somewhat minimal risk of COVID.</p> <p>And don't get me started about the thought of us teachers trying to regulate masks all day... That's a whole different conversation...</p>
7/21/2020 10:56:12	Keith	Miller	Self	Westmoreland	The Kansas City Star had an article today about teens spreading the virus. In the decision to open schools or not, it is important to consider effects on teachers. How many teachers in Kansas are over the age of 50? If teachers are killed off, what young person will want to take their place in the profession? A much more effective way to begin would be for the board to say that when the citizens of Kansas decide to take this seriously and wear masks, then we will take a look at opening schools.
7/21/2020 10:56:23	Kate	Mulligan		Lenexa	School should start on time. My child has been away from the classroom almost six months. Not acceptable. Children should have temps taken at door and mandatory hand washing. NO MASKS K - 8!!!
7/21/2020 10:56:23	Naomi	Wyatt	USD 270-Plainville	Plainville	I DO NOT feel like it will solve anything to delay the school year
7/21/2020 10:56:24	Karen	Kressin		Lawrence	I support Gov. Kelly's postponement of school opening until after Labor Day. Let's give school districts more time to prepare to open schools safely.
7/21/2020 10:56:25	Deanna	Castilla	Blue Valley School distri	Overland Park	Delay start of school at least until after Labor Day 2020 and Reduce class sizes in elementary to 18-22 students per class. Thank you.

7/21/2020 10:56:25	Heather	Newcomb		Manhattan	Our school district has already prepared multiple plans for moving forward with an opening on the regularly scheduled opening date in August. Gov Kelly is attempting to micro manage smaller government who have already made the same decisions and prepped and planned to be ready on time. Their plans meet her criteria and they should be allowed to open as scheduled. I watched both Gov Kelly's press conferences and I am greatly disappointed by her becoming emotionally reactive. She literally said because you opted out of the mask mandate I'm delaying the opening of schools. I'm disappointed she's trying to punish the parents and in turn the students of this state. This decision should be left at local levels and not dictated to by her. I hope she can put on her big girl panties and see that even though power feels good emotionally it doesn't serve her constituents. And THAT is truly her job. Our children already lost months worth of education. Stop the insanity. The children deserve to learn. Leave the decision to open in the hands of those who locally have been working their asses off to have the plans and ability to open safely. Instead you should be asking what the districts who aren't ready need to become ready. That would be a brilliant and productive use of your time.
7/21/2020 10:56:27	Kailee	Dettmann	Parent/staff	Olathe	The safety of our students, staff and families are at risk. Many staff work in multiple buildings and will have exposure to upward of 800 or more individuals. We need time, and a solid plan. Not just words and hypotheticals.
7/21/2020 10:56:37	Klayton	Wilk		Topeka	Ok to delay until Sept 9th, but we need to have some form of in person schooling.
7/21/2020 10:56:39	Jody	Schmidt		Goessel	Please delay the start of the 2020-2021 school year. I am a teacher and we are not ready. With the increase in cases statewide it does not make sense to go back now. Teachers need time to come up with a COVID plan of action. Thank you for caring about teachers and students!
7/21/2020 10:56:40	Irish	Bussmann		Beattie	I agree with Gov Kelley, delaying school until after Labor Day will allow teachers and school staff to better prepare for the new challenges this year will bring. Teachers will also be better prepared to provide remote learning to students that will not be on site. We cannot expect excellence with no time to prepare!
7/21/2020 10:56:53	Jody	Metcalfe	Colby Public Schools Pa	Colby	I feel very strongly against young children wearing masks as it would prevent them from learning Social and Emotional clues. I certainly am not opposed to an adult wearing a mask if they feel uncomfortable without BUT it should have to be a clear mask so students can see their face!
7/21/2020 10:56:54	carlie	scheer		lenexa	As far as start date, I feel after Labor Day. i'm a sophomore in high school and would like to start school whether online or in person
7/21/2020 10:57:06	Todd	Burroughs	Myself	Williamsburg	I do not believe that Governor Kelly should have the final say over the education of our children. That authority should rest with the local school boards.
7/21/2020 10:57:21	Staci	Lowe	Parent, Secondary Teac	Overland Park	I believe that starting school in August needs to be strongly considered. All of the isolation is hurting our adolescents, many of which were are already struggling. They need to get back to some "normalcy" of life, with preventive measures of course. If they aren't going to start until September we need to allow them to continue their current sports conditioning, which also helps their mental health. We absolutely need fall sports!
7/21/2020 10:57:23	Chiffon	Beasley		Wichita	I personally feel the delay is necessary, because the children are the priority here. Yes I'm ready for my children to go back to school but I'm not trying to lose my children because I want them to have an education
7/21/2020 10:57:24	Chris	Weber		Wichita	I support Gov Kelly's proposal to start after Labor Day. It seems like a reasonable compromise.
7/21/2020 10:57:30	Chala	Roberts-Fife		Lawrence	I believe the start of the school year should be delayed until after Labor Day.

					<p>Well, this is real! I'm a woodworking teacher. I have some chapter work the students can do online. Safety can not be done online. Most all my students have project unfinished which needs to be in the lab. With there being said, How am I going to masks on students when it is 100 degrees plus in the woods lab.</p> <p>So if students are allowed in the building and little Susie comes down with COVID 19 but didn't know it. She has exposed the students in my class but has exposed all the students in the other classes for 7 class periods...so the school is shut down for 14 days...we get back from that 14 days and now little Johnny comes down with it....</p> <p>I drive a school bus morning and night as well...what students are getting on and off...I need to be watching the road...are students keeping the masks on??</p> <p>Is there a good solution? Please think about the teachers being exposed from many different directions. The other thing is the liability? What lawyer is going to jump on this the say it is the teacher's fault there child got exposed.</p> <p>I do not know the answers but it is not a time to say, "Oh, there is nothing to it"</p>
7/21/2020 10:57:43	Mark	Lockhart		Ramona	Please make a very careful decision.
7/21/2020 10:57:49	Kaley	Jones	Chisholm Trail and Allis	Park City	Schools should open as usual this fall. Children need the interaction for mental, physical and emotional stability.
7/21/2020 10:57:58	Kelly	Franke	USD 368 Paola	Paola	Delaying the opening of school until September will give faculty and staff the time needed to prepare lesson plans for both in-person and online instruction as well as finalize plans for transportation, janitorial/maintenance and food service. This will also give us time to secure the much needed PPE and cleaning supplies that will make our buildings safer once they reopen. I firmly believe this is a public health issue and not a political issue-we should be working together to ensure that our children and employees have what they need to make this year a success, no matter what that looks like. I urge you to approve the governor's executive order allowing for delayed school opening. Thank you.
7/21/2020 10:58:08	Sloane	Sandmoen		Overland Park	I am a teacher and think that delaying the start of school would give schools more time to prepare and make sure that they have the necessary supplies to help keep everyone safe and provide more time for teachers to figure out how to support our students best with all that is going on. Right now we still don't know enough about how COVID effects students to say that they are safe going back and if they are able to really spread it among their peers and the staff they interact with. These are real concerns for a lot of teachers who are at high risk or live with people that are. We don't want to bring it home to our families or infect our students either. Waiting would give the districts more time to follow the suggestions that KSDE just put out since it's hard to plan when you don't have those recommendations and they just got them last week.
7/21/2020 10:58:13	Bryan	Scruggs	Citizen	Wamego	I stand with the governor's decision to delay schools until after Labor Day. As a teacher and a parent, I believe it is the safest option for our students and our community. I hope that you stand by the governor is well as you look to protect the health and welfare of those Kansans you represent. Thank you for your time.
7/21/2020 10:58:14	Kyle	Ruder	BV high school	Stilwell	Open the schools in person with all sports and activities. Enough is enough...this is not any worse than the flu and learning virtually is not teaching. I'm an essential worker and have been working this entire time. Teachers can go teach in person as that is what is best for kids. Mental health is suffering with teens in particular ...open the schools!
7/21/2020 10:58:21	Jodi	Rice	Parent	Wichita	Please delay school and do a hybrid model
7/21/2020 10:58:26	Kathy	Price		Howard	Please allow the schools the extra time they need to make our schools safe for our children and our staff. We are anxious to get back on campus. I miss my students very much, but I can't stand the thoughts of losing one of them or a co-worker. Ignore politics and listen to the Dr's and scientists. Bring us back when its safer...please. You will be held responsible for the consequences of your actions so please if you are going to err do it on the side of safety. Thanks for listening.
7/21/2020 10:58:27	Whitney	Benson	Desoto USD 232	Shawnee	Kids need to be in school. Let's start Then IN PERSON with safety precautions in place.

7/21/2020 10:58:31	Jeff	Page	Family in USD 308	Hutchinson	It's my opinion that further delays to school and associated activities is not warranted. While we have a health issue with COVID-19, setting this precedent will potentially open the floodgates for delaying for EVERY health situation in the future. This isn't a good plan for the state's students or schools. Precautions need to be taken, but in-person learning needs to return as soon as possible.
7/21/2020 10:58:32	Brooklyn	Klahr	Holton USD 336	Holton	I support Gov. Kelly's decision to postpone school. For the safety and health of our students.
7/21/2020 10:58:35	Paige	Stallings		OVERLAND PARK	Please follow Governor Kelly's order. I have so many relatives that work for Kansas public schools or attend public schools, and I want them to remain safe and healthy. Pushing back the start date will enable them to be better prepared.
7/21/2020 10:58:41	Kelle	Oestreich	None	Bucyrus	Follow the Governor's lead.
7/21/2020 10:58:48	Virginia	Kiltau		Hayville	Other countries over seas have their schools open. I pay very high taxes for schools and teachers to teach our children in person. I feel that if our schools remain closed, then I should receive my taxes back for the time they have been closed. The teachers union should NOT control when schools should open. Maybe taxpayers should start refusing to pay school tax.
7/21/2020 10:58:52	Heather	Sims	KCKPS and SMSD	Overland Park	I understand the why for school being delyed but what about those people who work for school districts that are classified/non teaching positions? I'm glad the governor took a stand on this issue but worry about some of our staff in our school districts will be left out in the dark with no income.
7/21/2020 10:58:55	Alejandra	Contreras	Teachers	Overland Park	It would be irresponsible to open school with the current trend of COVID spikes. Think about the teachers and the adults who would have to quarantine against everyone they love simply because they're teachers. Teachers can't hide their fear. Their fear of dying. Their fear of their loved ones dying simply because they were forced to work too early and against the advice of those knowledgeable enough to predict what will happen if schools open now. Look at the different countries that have opened with the spike of COVID still trending: they have all shut down within a week of opening. Do this for teachers and students and everyone we care about.
7/21/2020 10:59:05	Kay	Blattner	Usd475	Manhattan	Please follow the governor's recommendation and delay the beginning of school.Going back when the virus is at the highest number of cases yet in KS. Is so scary. My cousin is on a ventilator in western Ks. Hopefully he is on the recovery list soon but he has been very ill for a long time. TRUE Ks doesn't have as many deaths but this is very serious. I am an SLP and I work with many students who have compromising health issues. Please keep us safe. THANK YOU.
7/21/2020 10:59:06	J	Boster		Overland Park (Olathe S	<p>Please do not overturn the governor's order. We have been given the gift of time. Please allow time to see if numbers begin to trend down. A large number of students and staff gathering indoors for 7+ hours daily is exactly what the medical professional have been advising against. Also, I fear many experienced teachers will quit if school begins while the numbers are high. How will we ever bounce back from that?</p> <p>Another thing to consider: I have heard that virtual learners will be banned from sports and extracurriculars. Please reconsider - this is a punishment. If you are truly worried about students social/emotional health, students should be allowed fo participate in what they feel comfortable with.</p> <p>For example, an individual might choose virtual learning based on the fact that his mother has cancer and they do not feel comfortable with 35+ hours spent gathering indoors weekly. But, they might feel comfortable with an outdoor individual sport such as cross country. Don't we want all learners to engage as able?</p> <p>Questions: Will the KS legislature show flexibility in the number of hours for the year? Should there be a waiver for required state testing?</p>
7/21/2020 10:59:14	Hillary	Farmee		Winfield	I believe that postponing opening school is what is best for our students and the faculty of Kansas schools. Our state has unfortunately not been able to control the spread of this virus, we are far worse off than we were in March when we were closed originally. Even with the best safety measures and the "recommended" social distancing in place, it is basically just a waiting game until someone gets sick, and we are back to where we were in March anyway. Why are we willing to wait and see how many kids get sick? Are we really willing to let educators die because the public feels like they need to go back to normal, even when there isn't even a normal to go back to yet?

7/21/2020 10:59:18	Eric	Seyb		Derby	I feel starting the school year after Labor Day would be a good thing. It will give school districts and staff time to get plans in place for the upcoming school year. Since the state BOE just released guidelines last week districts need time to plan appropriately for all scenarios. It will also give time for positive cases to go the other direction hopefully.
7/21/2020 10:59:21	Heath	Ostmeyer		Spring Hill	The delay of school starting is a great idea. Teachers need time to prepare for what is coming.
7/21/2020 10:59:31	Deanne	Mcgreg		Wichita	Please allow online and virtual schools to continue
7/21/2020 10:59:45	Michele	Schumacher	Oak Hill Elementary in 15045 W 128 Terr Leawo		I feel that KS children and teachers have no business being in the classrooms this fall. Since Kansas COVID numbers are on the rise, it would be foolish and irresponsible.
7/21/2020 10:59:49	Ashlee	Towery		Leawood	I don't really see the difference in pushing back the start date of school. I would prefer to start on time and require masks for students.
7/21/2020 10:59:49	Sandy	Trott	Kansas City Christian sc	Overland Park	Please start school. The kids will not do well emotional or physically without the discipline of going to school. There is no evidence that kids are getting COVID or spreading COVID
7/21/2020 10:59:50	Mark	Weatherford	Labette County High Sc	Oswego	No matter where people stand on this issue, there is not a more obvious common sense approach to let each local school district set their own reopening plan. Each local community has its own dynamics that can't be met by a statewide cookie cutter approach. You would do rural Kansas a huge disservice by implementing big city policies in counties that have little to zero active cases. Local districts know what is best. For school districts who believe they the best thing to do is delay reopening, that would be left in their power. The local decision making is THE most fair decision. Don't let one government official reign over the whole. Thank you.
7/21/2020 10:59:51	Fred	Fergus	Student in USD 497	Lawrence	Accept Governor Kelly's executive order to delay the opening of Kansas Public Schools until Labor Day. Please support the health of all Kansas students and teachers.
7/21/2020 10:59:54	Caitlin	Guarnero		Leavenworth, KS	I am extremely worried about going back to school. We have less than a month left and I do not believe my district is equipped to purchase all necessary equipment and PPE in a 3 week time frame. My district loves their teachers and will do anything for us but 3 weeks is not enough time to procure thousands of dollars worth of prevention. I urge the board to not vote on their feelings toward the governor but to vote on their feelings on teachers and students perishing based on the fact that Americans need babysitters.
7/21/2020 11:00:00	Anastasia	Prettyman	none	Louisburg	This decision should be made by each school district. The impacts are the not the same everywhere and some schools are already prepared to ensure the safety of children. Let our children return to a learning environment where it is safe to do so.
7/21/2020 11:00:02	Daphne	Lehman	None	Manhattan	Living in Manhattan, home to KSU, it is reasonable to wait until after Labor Day for the start of school. As a community, we saw COVID-19 cases rise drastically after bars opened and the football team returned to town in June. With KSU students arrival in August, our community will likely again see a dramatic rise in cases as that age group comprised over 50% of our cases and that age group tends to hang out in large groups with alcohol involved which leads to less adherence to the CDC recommendations to stop the spread of the virus. With community transmission, our children will be more easily exposed and it's worth waiting until after Labor Day to give our schools a chance to have onsite learning.
7/21/2020 11:00:06	Lucas	Melvin	My children and my con	Norton	Hello, my name is Lucas Melvin and I am a VERY concerned parent and teacher. My concern is for the health and well-being of our young people. School needs to OPEN on time! I saw the many negative effects that not having school in the spring had on young people, including one of my own. The mental, emotional, social and physical health of our students is being destroyed by reckless policies and edicts. Right now, young people across our state are playing baseball, softball, basketball, going to pools and etc and all seems to be fine. Students need structure, education and socialization. They need interaction with each other, teachers, and coaches.  For our young people, I am pleading with you to please strongly consider starting school ON-TIME!  Thank you,

7/21/2020 11:00:07	Donnett	Streeter	Grand children	Mayetta	As a health care worker I understand the concern but also there are safety precautions that will allow kids to go to school just like going to dance, sports and the store. These kids have spent the summer around friends and family so what is to be gained by keeping them at home but making uneducated kids. I would recommend that my grand kids go to online home schooling and stop supporting public school if you continue to delay school. Thank you
7/21/2020 11:00:08	Brett	Scarborough		Lenexa	As a teacher and a parent, I urge you to strongly consider pushing back the opening of the 2020-2021 school year. This will allow the necessary time to purchase additional equipment, provide staff with additional training, and to hopefully see the increased mask-wearing make a positive impact on the numbers of new infections in our communities.
7/21/2020 11:00:10	Elizabeth	Aldridge		Wamego	Please vote in support of the governor's executive order to delay the start of school until after Labor Day. This would give school officials and teachers time to plan and prepare safe measures to get kids back in schools. This preparation period is crucial to ensure a safe learning environment for our children. Thank you.
7/21/2020 11:00:19	Deb	Zumwalt		Shawnee, DeSoto School	very much agree
7/21/2020 11:00:29	Jenny	Stewart	USD320 - Wamego	Wamego	I'm truly in shock that this has become such a huge issue. Covid case numbers are rising throughout the state! They are much higher than they were back in March. Waiting until after Labor Day gives time for the state to get these numbers under control! It also gives teachers, administrators, nurses and staff time to prepare for on-line learning on top of classroom learning. In our district, 20% of the families have already indicated that they will not be sending their students, so we need to provided both in-class and on-line learning at the same time!!! This takes time for preparation much of which will be completed on our own time. Now we are told that if we all have masks social distancing doesn't matter. What??? I'm praying it won't matter in my district, yet am preparing for the school to close repeatedly. Please push back the start date as far as possible!!! Please do everything you can to get people to wear masks, social distance and stay home over the next weeks, so the children and teachers in our state may return to school safely! Thank you!
7/21/2020 11:00:31	Tyler	Harvey	Olathe School District	Overland Park	Please move forward with Gov. Kelly's order to push school to starting after Labor Day. It is CRUCIAL that schools be given this extension to adequately prepare for new healthy and safety measures for the sake of students and teachers.
7/21/2020 11:00:35	Martha	Baker	Myself	Wichita	School should be in session.
7/21/2020 11:00:36	Paula	Vulgamore	Scott City public school	Scott City	I have a daughter that is a senior and a son that is in 8th grade. I have witnessed the heartache, emotional distress, frustration, and lack of purpose/drive among students in our community without the presence of in-person school instruction and activities. Without a doubt, this virus is going to spread. But the number of sick or hospitalized individuals in our community is so low as in many areas in western Kansas, it does not make sense to punish families for large spreads in other parts of the country. We have to let our children get back to living. We cannot continue to take away so much and force them to sacrifice when it's just not necessary or fair. The hardships greatly outweigh the risks. Even with a delayed start, so much will be postponed, cancelled and lost. They already lost a significant portion of the previous school year - we cannot continue to take more classroom time away from them. We need to have options for families to participate in online school if they are afraid or do not want their kids exposed. But we also have to allow in person school and activities for those that are comfortable with the risk. It's the only option that makes sense. Let the local districts choose what is best for their communities. Please do not take all the joy and sense of achievement away from kids that only comes through socialization and the ability to participate in activities. Kids will not remain engaged in education if we don't let them back in the doors. The longer we delay, the more harm we are are doing. Please allow us the ability to choose what is right for our community, our school district, and our children.

7/21/2020 11:00:45	Michael	Ritzel	Teachers	Roeland Park	As an educator, I am lucky that my private school has been planning how to safely return to the school campus since the end of May. However, in correspondence with friends in the field across the state, I am of the opinion that many school districts are woefully underprepared and continue to bury their heads in the sand. It is unacceptable that members of the State BOE have been responding to emails from their constituents by sloughing responsibility off on local boards of education to determine how and when it is safe to return to school by parading about civics philosophies as if they will protect the public health of children, families, and communities in the Great State of Kansas. As the overarching elected authority it must be the responsibility of the State BOE to rely on science and public health guidance to create a threshold and standard of operating quality in Kansas schools. This means following the lead of our governor and delaying the return of persons to school campuses and implanting safety standards as mandatory. Anything less will be blood on the hands of your office. I will be voting. My family will be voting. We are watching. We will remember.
7/21/2020 11:00:46	Trina	Ramirez Stephens	Self	Lawrence, KS	I have two elementary children enrolled in USD 497, Lawrence, KS. I am writing to encourage you to support both executive orders recently submitted by Governor Kelly. The uptick in cases in Douglas County is concerning and I would be more comfortable sending my children to school after Labor Day. As a community we need time to get our schools prepared, allow us more time to make smart, data-informed decisions, and heighten our ability to keep our school community (students and staff) safe. Most importantly, we need time to get the spread of COVID-19 under better control. With masks being mandated in our community now, I believe that will allow us to slow the spread of the virus. Please, I urge you to consider the health and safety of my 7 and 10 year old and the health of safety of our school staff. We need more time at home. My students will be better learners and I will be better able to support their learning if the stress of starting school in August is alleviated. Let's start school in September! And let's be masked and have our temperatures checked! Let's exhaust the ways in which we can mitigate the spread of COVID-19. Thank you for your consideration and for your service.
7/21/2020 11:00:48	Keegan	Fischer		Olathe	The supposedly intelligent politicians of our nation have made the same mistake repeatedly for months on end. Time and again the statistical analysis of world health experts is ignored by those who are clearly either incapable of understanding an exponential curve or are putting the economy or some other issue before the health and wellness of their people. The United States was founded on the idea that the government would be for the people and by the people. The decision to repeatedly endanger the people that has been made by the representatives meant to be serving them is proof that they are not invested in the idea of equality and fair governance. I implore the members of the board to not make the same mistakes that have been perpetuated in this broken system. It is up to you to break the cycle and re-institute the idea of a government that serves the people, not just those in power.

					<p>I think school should be delayed. My local community is seeing an increase in cases. Our school district is also NOT being transparent with the community as to our options for school, and are only offering parents two options: 1. Sending children to school in the building or 2. Doing virtual learning. Either decision we make, we are locked into that decision for the entire semester and cannot switch if necessary.</p> <p>NEITHER of these options work for my family, or most family's judging by the comments on the district announcement. I would prefer a hybrid school schedule, especially for my kiddo who has severe allergies in the fall... which include Covid symptoms (sneezing, coughing, congestion). If he's forced to "quarantine" for allergy symptoms, he will fall behind in the school building. But at the same time, the virtual learning in the spring was a joke! Our district uses schoology, which is trash! It is NOT easy to navigate for parents let alone children! On top of that, being home but doing school did not work for my kids. They were not focused or self directed in any way. In addition to my 2nd grader and kindergartener, I also have a toddler who is out of daycare due to Covid (our daycare is closed). I myself am also in college and work from home. My kindergartener has an IEP for speech, and NOBODY has been able to give me information on how his services will be administered in the building or online. Our district also hasn't sent out any information about what the virtual learning will entail as far as curriculum, materials provided, etc. We've just been told students will have to be learning for 6 hours per day and a daily log will need to be kept and submitted to the district to comply with the required hours for the Kansas State Board of Education. The deadline to choose in school or online learning is July 31, the district won't push it back even if school doesn't start until September. I would like the district to allow parents to switch to online learning if after a few weeks or a month that in person learning is not working for our family.</p> <p>Also, why are we talking about sending THOUSANDS of kids back to school when our school board of 10-15 people are still having meetings virtually on zoom. If ADULTS are choosing to protect themselves by meeting virtually, how can we expect CHILDREN to be sacrificed by opening schools? Children cough, sneeze, and are still learning basic hygiene. Schools are already Petri dishes. Anyone who thinks Covid will not spread in our schools like wildfire is clearly not a parent! To be honest, I don't see school opening this year, because people refuse to wear masks, wash hands (eww), or take safety precautions because "freedom".</p>
7/21/2020 11:00:53	Kindra	Smith		Fort Riley	
7/21/2020 11:01:08	Mallory	Rosenstiel	USD 265	Wichita	Do not delay schools opening
7/21/2020 11:01:08	Amanda	Daniels		Bonner Springs	I understand this is a serious situation and we need to keep people safe. If we could trust sick people to stay home that would be ideal. On the other hand I am seeing people and kids going into depression because of stress or not having jobs to support families. I know this seems silly but having a child with social anxiety this is effecting him. Not being in school is making it worse for him and if we go to online this will have long term effects.
7/21/2020 11:01:11	Jennifer	Brown		Perry	I support the delay of students starting school. The additional time will allow faculty and staff a chance to adequately prepare lessons in various formats, as well as, fully understand how to execute safety procedures.
7/21/2020 11:01:11	Natalie	Boone	Quinter Schools	Quinter	It is imperative the decisions about schools be left to the local board and community. Our entire county has only had 2 cases (people over 45) and one recovered fully and the other is recovering. Our Constitutional freedoms are being destroyed by Governor Kelly. She has become a dictator and needs to be recalled. I am a teacher and a parent and an extremely concerned about children's education and all of our freedoms as Kansans. Please vote against these socialist measures. We must start in school and not be forced to wear masks and make young children wear them. There is no proof it is effective with children. There is very little data to support its effectiveness in adults. Please listen to the Kansans you represent. Our future depends on common sense and Constitutional law! Thank you!
7/21/2020 11:01:12	Stephanie	Confer		Lecompton, KS	Schools should be closed at least until after Labor Day. Cases of COVID-19 continue to increase in the state because of the refusal to wear masks and social distance. Honestly, until there is better control of the situation we should not even be asking teachers, students, support staff and administrators to risk their physical and mental health. Please do not play politics during this time.

7/21/2020 11:01:15	Kevin	Pham		Hays/Kansas City	At the very least, schools need to be delayed for proper planning if they are not online. Students, Teachers, and Building Workers need to be protected. We need to treat this as planning for the worst and hoping for the best until treatments and vaccines are improved and created. Like I stated, delaying is the very least schools can do. Reevaluation on how to open can be made once more data is collected. Please make the correct decision for the safety of everyone. Why open up when numbers are worse than when we closed in March?
7/21/2020 11:01:23	Mason	Springer	Student Athlete	Neodesha	If school gets postponed till September, how will the schools be able to host all sports and activities? If fall season is delayed a few weeks to a month, that'll push winter sports back, then that'll push spring sports back. If they decide to flip fall and winter sports, that will give athletes less time to recover from the roughness and physical strain of the season and will have to go right back into Weights and Conditioning. Also if they get an athletic scholarship to college, all the weights and football activities start during the spring and early summer. Our school starts weights June 1st plus some camps and activities then and there. If parents and students are worried about going back to school and getting sick, could all schools offer online learning until they feel comfortable attending in person. Why could the face mask, social distancing and hand washing not be mandatory but be up to the students and faculties decision? Kids will feel pressured and overwhelmed if they have to be distanced from their classmates and friends, and want to be home rather than in school. All of this can be decided by the school boards.
7/21/2020 11:01:25	Pam	Mattheis		LeRoy	Please vote AGAINST Gov. Kelly's "mandates"! Our kids have gone thru enough having part of last year's schooling cancelled. Yes, Covid may be deadly, but we've probably all been exposed to it already, and the death toll from it isn't nearly as high as they're trying to get us to believe. Our kids NEED to be in school: for social interaction, sports, not just education... some NEED it for safety and food. Suicides, depression and child abuse have soared under these restrictions and closures and it needs to stop. Open up the schools with NO restrictions! PLEASE!
7/21/2020 11:01:43	Theresa	Gillespie	Army	Ft Leavenworth	I am in favor of starting school with as many precautions in place to minimize disease spread. I feel the emotional, mental and physical health of children is so important and attending school supports their growth and well being in all of these areas. Life just involves risk, and so I know there is some risk in attending school in person but at this point I feel the benefits outweighs the risks as long as everything is being done to minimize disease spread.
7/21/2020 11:01:46	Elizabeth	Johnson		Newton	Masks should not be required for every school. There is no one size fits all option.
7/21/2020 11:01:51	Thomas	Mika	Kansas citizen	Junction City	No. Start school asap.
7/21/2020 11:01:55	Kristin	Wiebe	Teacher and parent	Whitewater	Start school and NO masks.... it's a violation of our rights.
7/21/2020 11:01:55	S	S	olathe public schools	olathe	in person school is a deep need for my children. the ability to learn, in person, from teachers AND a diverse social group of peers is necessary for their development. sickness will come and go, and we will take measures to protect everyone, but further delays are not the answer. let's get back to IN PERSON school sept 9th and NO LATER!
7/21/2020 11:02:00	Alaina	Kreft		Leavenworth	I believe the delay of school is a wise decision to protect all of our students and staff. I also worry about school opening two days after a holiday where people gather just like they did for the 4th of July and how cases peaked again due to those social gatherings. Masks need to be made mandatory when schools reopen or school needs to be held virtually for the fall semester. I have children that are both considered high risk so they will be virtually learning or hoping for a hybrid setting. After socially distancing since March and taking all the precautions necessary for myself and family, I can not imagine going back to work and school and contracting the virus. I serve six different schools in my district and love my job, but I do worry how traveling to all of these school buildings can affect my health or the health of others and my family. I am praying that health officials and school boards weigh in the possibilities for all involved and make the best possible decision where teachers, students, and parents don't have to worry about their children and their own health.
7/21/2020 11:02:19	Sarah	Kueser		Ellsworth, KS	Delaying school will allow for proper preparation for safety in health as well as for robust learning opportunities. So much information has been thrown at educators and administrators, please allow us time to take our plans to our needs and effectively implement plans for all stakeholders.

7/21/2020 11:02:23	Becky	HILLMAN	ST PAULS LUTHERAN	CHENEY	I understand that we are facing some huge challenges as we consider heading back to school. However, I feel that a "one size fits all" order is unacceptable. Our school serves less than 30 students and we should be able to open with safety procedures in place. There are other counties and school districts that would also be in a position to open safely. I would also like all the decision makers to spend an our with a group of young children in masks. Please reconsider all the directives from the state without really knowing what my school is like!
7/21/2020 11:02:28	Matt	Rush		Pittsburg	As a parent, I saw first hand the "plan" for distance learning that was in place from Spring Break until the end of the school year. It was not the best plan and my child suffered a set back and regression in his learning. We were forced to supplement with teaching of our own. I personally have a few friends that are seriously considering home schooling. I would like for there to be a plan set in place either way. Allow the parents to adjust to the plan in place. Extending until Sept 9 without explaining what happens on Sept 9 is just postponing the inevitable. Will the extra three weeks be extending into the summer of 2020? Why not start off on distance learning to begin with, that way the children aren't missing out. What is going to happen if there is another uptick in cases? Extend again? This is all very confusing and I am aware that information changes daily, but that is what the school districts have had until March to do. Formulate a plan and go with it. Stop all the unknown and change.
7/21/2020 11:02:32	Connor	Christensen		Goddard	Ladies and Gentlemen of the Board,  I would like to thank you for your guidance and leadership through this turbulent time. I can understand that tough decisions have to be made, and that is why I am reaching out to you tonight. As a citizen of Kansas and a teacher, I ask that you support Governor Kelly's Executive Order mandating a delay in the K-12 school year until Labor Day. I want to return to school to see my coworkers and students, but I want to do it safely. I miss nothing more than the hugs and smiles from my 5 and 6 year olds. I am extremely scared of returning to school as scheduled and the impact that could have on my peers and my students. By delaying the start of school, districts will have much more time to strategically and explicitly plan for our new normal. This decision is difficult, but I believe that the safety of our stakeholders should be priority number one.
7/21/2020 11:02:45	Pam	Fortun-Young		Olathe	Thank you for your time and service.  PLEASE vote to adopt the governor's executive order for the safety of all children. Stop making this political!!

7/21/2020 11:02:42	Heidi	Sher	Parent of Student in Olathe	Olathe	<p>As a parent, I am concerned and disappointed in how our state and nation is handling education in the midst of COVID-19. I fully recognize the challenges that our schools and their employees face. However, we must rise to the challenge and find ways to overcome the hurdles. Our children are too important to be left on the sidelines.</p> <p>This past spring, when COVID struck and schools were closed, the online education that was offered by the Olathe school district was an utter disappointment. My daughter completed each weeks' assignments for all core courses (Math, Science, ELA &amp; Social Studies) within 2 hours. While I appreciate the supplemental curriculum offered, I was disappointed there was not more offered. With curriculum being shared across the district sharing (i.e. there was only one sixth grade science lesson offered for all Olathe students vs one sixth grade lesson per teacher per school), it seems each teacher could have each contributed one lesson per week and that would have allowed for one lesson /day vs one lesson/week. I recognize that teachers, must like the rest of us, may have faced childcare issues. But, many other people faced the same situation and had to find ways to still work (and we would not be paid if we did not work). I even got the impression in some cases teachers wanted to offer enrichment but were prevented from doing so by the district.</p> <p>I will note that we have another child who is in private schools. Her experience throughout COVID was a shocking contrast to our student in Olathe public schools. Her school, which has a fraction of the resources our public schools have with teachers who are paid much less, continued to conduct teaching via Zoom. Students continued growing - the curriculum was not just refresher content - and received grades, motivating them and holding them accountable to put time and effort into their work. It is unfair that our daughter has such an experience just because we can afford it. Every child deserves a solid education.</p> <p>It's not just the academic progress that our children need. It's also the meals for students who do not have food. It's a safe place for children who have nobody at home during the day because their caregivers don't have jobs that can be done at home. It's the extracurricular activities that our children can do that give them a focus and purpose, keeping them out of trouble they might otherwise find if they become bored. It's learning how to interact with others in person where emotion can be seen and heard vs relying on devices where kids which allow kids to become emotionally desensitized. School is essential to our children's mental and social health.</p>
7/21/2020 11:02:49	Emily	Nelson		Overland Park	<p>It seems a bit ridiculous that KS stakeholders have to beg you to uphold an Executive Order that is intended to protect the safety and well-being of Kansans, but here we are. There's a running joke that common sense isn't always common. This is where we are. Science is all but screaming at you to delay the start of school and yet some of you are choosing to place your political careers first. If that's you, then you need to question your role as an elected official. Do the right thing. Uphold the KS Governor's Executive Order.</p>
7/21/2020 11:02:58	Mary	Clow		Shawnee	<p>As a substitute teacher I am concerned about opening schools while cases are still on the rise. Currently we cannot open schools safely and we should not be forcing teachers into an unsafe environment. We must delay opening schools until cases are dropping and we have more time to train teachers, acquire PPE, etc.</p>
7/21/2020 11:03:00	Amanda	Pastore	Parent of k-12 student	Gardner	<p>Our children deserve to have the opportunity to learn amongst their peers. We are approaching 6 months of our children being out of school and they need to the structure of learning that they had prior to covid. Many children do not have the option of having a parent teach them effectively by staying home and proctoring their learning online. To ensure our children continue to prosper and achieve there knowledge base we need them to return to in person instruction. Please vote to send students and personnel back to school in person after labor day.</p>

					As a teacher, I want to be in the classroom with my students, learning and growing together. However, I want to be in the classroom in the safest way possible. In March, when we began online learning everyday was an adventure and I treasured the moments I got to spend with my students and colleagues on Zoom. However, we know online learning as we did in the spring was not effective in progressing learning. This means our district has spent many hours this summer preparing for how to educate our students successfully no matter what scenario we fell into, including preparing for a "jump start" summer school program to try to get students prepared ahead of the school year. This pandemic has lasted longer than originally thought and has started to spike in my area. We were planning to start our summer school program on July 20th and we still had many questions about safety. The answers to those questions were changing daily. With the unknown of Governor Kelly's order, we canceled the summer school program. My heart broke along with many parents that I had to contact. However, they all understood that we were taking the safety of their children seriously and would continue trying our best to connect with them. Thankfully, my district has been proactive in planning, communicating with both the county health officials and staff in the district, and being flexible with the continuous changes. There are still a lot of unknowns out there. I know that three more weeks won't necessarily give us any more clarity on the pandemic, but it will allow us time to nail down our safety procedures and prepare for our students in the best way we can manage. With Governor Kelly mandating the safety guidelines, our school districts need time to get caught up. Things like wipes, hand sanitizer, computers, dividers, masks, and thermometers are all going to continue to be scarce. We need to create clear-cut guidelines for things like lunch, recess, specials, small groups, SPED, and so much more. I understand that the downside to this order is treating the pandemic and school districts as "one size fits all". This situation does vary from place to place, but the importance of safety for our students, staff, and family members does not change. I hope you will consider upholding this order for the safety of all Kansans.
7/21/2020 11:03:04	Marie	Stoss		Salina	
7/21/2020 11:03:04	Brooke	Cook	Self	Ellinwood	I am worried about how far behind the kids are already getting with how the end of last year went. I am also concerned about IEP testing falling further and further behind schedule because of if we go online this can be difficult. Also, on the IEP testing, how would the observation pieces of the testing go if we did go online? This can't really be done online that I can think of. I wish to remain anonymous please.
7/21/2020 11:03:05	Eric	Van Becelaere		Topeka	I have a special needs child and this has hurt his learning horribly... kids gather on ball fields, play grounds, pools and many other places and have for months!! Please stop this political madness....
7/21/2020 11:03:10	Amy	Bartle	Free State	Lawrence	Please allow sports and other activities to practice even if face to face school is delayed. My child needs this interaction.
7/21/2020 11:03:16	Heather	Wetzel		Kansas City	Please keep schools closed till September 8,2020. Please present a calm and United front with schools and government. Hopefully masks in public will flatten the curve again, and help teachers feel safe. Please consider Teachers first in all this. How sad will a community or school be if a teacher dies due to Covid? Please have a good plan for substitute teachers for when teachers do get sick.
7/21/2020 11:03:22	Alex	Klales	None	Lawrence	Do not open schools in person. It's unsafe and a public health risk. One person dead is too many.
7/21/2020 11:03:25	Lisa	Stoller		10918 W. Maxwell Circ	Yes, I agree we should hold off in-person classes and take this time to set up parameters for when we open, when we close, how long we quarantine, etc.
7/21/2020 11:03:29	Janelle	Hernandez	No organization	Salina	Please support the governor in delaying school start. We have a daughter who is a teacher and another who is a school therapist and have grandchildren in school. Please put aside politics and put first the well being of children, school staff and their family members they will come in contact with. When the pandemic is over it won't matter that school started late...it will matter if they became ill or infected others. Please delay school opening.
7/21/2020 11:03:34	Nate	Hostetler		Overland Park	School needs to be IN SCHOOL for kids. By August // EARLY September at the latest. In school schooling is critical for the kids in our district and even the KS AAP recommends BEING IN SCHOOL. Put the kids IN SCHOOL SCHOOLING.
7/21/2020 11:03:38	Megan	Keener	Parent	El Dorado	Our children are in need of returning to school. They need socialization and homeschooling is not feasible for our household. My oldest daughter has ADHD and social anxiety and since she has not been in class she has really regressed in the improvements that we have made.

7/21/2020 11:03:39	Joey	Wood	Free State Football	Lawrence	As a high school student, and part of the football team, leaving us to do nothing for 2 months is bad on our mental and physical health. If you truly believe is making every kid better and mentally stable in Kansas Education, then this is not a step in the right direction. Without school or sports for 2 months, kids will be left to make bad decisions and lead them in the wrong path.
7/21/2020 11:03:48	Amanda	Davis	USD 497	Lawrence	VOTE YES TO GOVERNOR KELLY'S EXECUTIVE ORDER! Keep our students and school staff safe!
7/21/2020 11:03:52	Sarah	Mackey	Teacher	Hays	Being a teacher 🙄 Plus having a daughter going into middle school with type 1 diabetes, I'm very concerned going back too soon!! With the rising cases in our county I do not want my compromised daughter to become a statistic because we are too proud to put safety first!!
7/21/2020 11:03:53	Jennifer	Monaghan		Wichita	Delay School. Better yet close it for online learning. Give us a chance to prepare for school and to do what is necessary to keep our kids and community safe from the virus.
7/21/2020 11:03:59	Rachel	Steenbock	Auburn-Washburn USD	Topeka	I will be supportive of either decision, but I would prefer that our children return to school as scheduled on August 13; if not in person, virtually. They need to get back to the routine and structure of a school day, even if it's not a typical day. I agree that all precautions, including masks, sanitizer, and temperature checks (upon arrival) should be taken.  Thank you for your consideration.
7/21/2020 11:03:59	Kelly	Elsten	Usd497 school district	Lawrence	Our sports teams are now safely conditioning in hopes of being able to play this year. They are doing a fantastic job of monitoring (potential) illness and instilling protocol (masks, social distancing) so our teams can remain safe. I ask that teams be able to continue to practice to get ready for a season. Even if the season is delayed or canceled the physical and mental positives should be enough to keep the students working towards their sport(s)
7/21/2020 11:04:06	Kimberly	Kelley	None	Hiawatha, KS	I feel it is extremely important to keep schools closed to in person classes for the safety of our students, school staff, families of students at this time. Until we see a significant improvement in the number of covid 19 cases I feel it is too risky. Even a small number of cases can quickly spread. This virus may have lasting negative health impacts even after recovery. Please support the delay to the start of our school year and keep our community healthy.
7/21/2020 11:04:24	Cory	Cochran		Olathe	There is absolutely NO reason the schools should open prior to labor day. None. Schools change the start day every single year. some are a little early and some years start a little later. This year, starting a little later will not change the outcome of any student or family. Starting earlier will kill people. There is zero downside to starting after labor day. The downside of potential death by starting prior to labor day.
7/21/2020 11:04:27	Ron	ELDRIDGE	USD 260	DERBY	Please uphold Governor Kelly's executive order pushing back Kansas schools start date to after Labor Day. Covid numbers in Sedgwick county are higher now, then back in March and April when the original shutdown occurred. This will give school districts time, three more weeks, to provide flexibility in learning plans, allow professional development for staff, allow PPE to be purchased for school districts. There is so much value in this extra time we can use. Please vote to confirm. My wife and I are both educators. We love our students and their families and have their best interests in mind. Thank you.
7/21/2020 11:04:43	Juli	Jones		Spring Hill	Open schools and sports
7/21/2020 11:04:49	Lisa	Downey	concerned parent	Shawnee	no delay for start of school!!
7/21/2020 11:04:53	Jammie	Atkins	Parent	Goddard	Wanting to know why we are still paying teachers and educators or anyone that have anything to do with each district. Every job I know not working not getting paid. Teachers haven't worked for almost 6 months. All of them complain not wanting to go back. My husband hasn't been working since day one. It ridiculous what teachers are getting away with.

					<p>I strongly suggest that the State BOE adopts the governors EO regarding schools remain close until after Labor Day. A unified message must be sent out to set clear guidelines and expectations of what a successful reopening will look like statewide. With the recent rise of COVID cases in Kansas it is no brainer to delay the start of school to ensure the health and safety of not only our student, but their families as well. As many of you know our students come from many different home structures and a COVID outbreak in the home could cause significant issues.</p> <p>This is not a Republican vs Democrat issue like many paint it out to be. This is a common sense decision that protects the health of our entire state.</p>
7/21/2020 11:04:56	Joseph	Franzitta	Teacher at a Kansas sch	Ottawa	Thank you for the time!
7/21/2020 11:04:57	Stephanie	Arbogast	USD394	Rose Hill	We should open schools on time and offer the accommodation to wear masks etc as an option not a mandate. We have got to use our heads and proceed cautiously, but leave room for parents to decide on what is best for their children.
7/21/2020 11:05:05	Kristopher	Krayca	Football	Edson	Start school and sports on time!!
7/21/2020 11:05:09	Pam	Matulka	Self	Olathe	I support the order. Teachers need it to hone their instructional material for classroom and hybrid distance learning. Give them time to get their ducks in a row for this unique challenge and adequately prepare.
7/21/2020 11:05:21	Denise	Sultz	Myself	Overland Park	I believe that schools should be closed for a few more weeks. We want to do EVERYTHING for our children, teachers, school administrators, custodians, lunch ladies, counselors, nurses, bus drivers to keep them safe. This extra time gives our local school boards and superintendents the ability to be prepared for whatever happens in the future. Not every county has the same rate of COVID cases but we need to make sure that ALL children have the same academic possibilities.
7/21/2020 11:05:22	Kevin	Harrington	America	Wichita	open school as normal, no delay at all.
7/21/2020 11:05:29	Joseph	Marx	Blue Valley Schools	Lenexa	I am not eager to disrupt the education of my students, neighbors, or other Kansans. I do not want developing children to miss out on opportunities to develop social and emotional competence. Nevertheless, our schools are not designed to combat pandemic. Most classrooms have 20-30 students in 300-400 square feet. Secondary schools have these students moving throughout as many as eight of these classrooms a day, with different populations in each and a not-insignificant proportion of vulnerable adults, with their own families and some with school-age children moving in yet other populations, at the head of the room. The price for delaying school or moving it online may be great emotional and financial hardship for many families. That cannot outweigh the cost of resuming face-to-face instruction before introducing practices consistent with our best epidemiological recommendations, which is nothing less than the serious illness and, indeed, death of hundreds of Kansas educational staff, perhaps as many Kansas students, and the thousands outside our schools who would be exposed to SARS-CoV2 through the vectors we, as Kansas educators, carelessly provided. We would be mostly culpable for their deaths, to say nothing of the legal liability. Please don't ask students, staff, or their families to resume contact until you can guarantee their safety beyond reasonable doubt.
7/21/2020 11:05:37	Christin	Wise	USD 259 teacher	Wichita	Title kids need in person!!! Limit the number of kids in class!!! Staggered attendance. Use all support certified teacherS (like myself) as classroom teachers (could even pair up with regular classroom teacher). One can do online and one can do in person. Attendance will drop. Can pair up two teachers per "class" but only half are in person. Thank you for all you do. Shields for teachers not masks. Title kids have different needs!
7/21/2020 11:05:38	Shelli	Jones		WaKeeney	Delay. People's lives are more important. It is a teacher's job to educate, but that can be done in different ways if necessary. It is not their responsibility to look at it from a "keep the economy going" stand point.
7/21/2020 11:05:44	Dan	Frisby	USD 483	Plains	As the superintendent of our small district, 630 students K-12, I understand the governor's concern and call for a delay to the school year. We are a small consolidated district, which encompasses two counties. Each of our communities populations are less than 1,000. My families have not questioned or taken concern with this decision. The concern that is consistently brought to me is the issue of mandating masks. In our counties, we are not experiencing the type of numbers as larger metropolitan areas in the eastern part of the state. Our people feel that rural communities should be under the guidance of local counties.

7/21/2020 11:05:49	brandi	lewis	Tonganoxie Elementary,	Tonganoxie	Our kids are resilient. Our kids need normalcy. I think with proper hygiene, just like FLU SEASON.. our kids will push through this and be just fine!!! Let our kids go back to school. Let our kids have some normalcy! I can tell you that my 1st grader and 5th grader will never last all day with a mask on. It will be more of a distraction!! I can not see this virus being any different than the stomach flu or influenza that is passed around EVERY YEAR and school is never shut down!!!
7/21/2020 11:05:53	Rachael	Pratt	none	Olathe	I think the very least anyone could have done was to allow students and parents to begin home schooling their kids just as they did in March. I am torn between allowing my kids to do in person schooling even when that may be an option due to concerns with how COVID or those showing signs of COVID would be handled. Even with having precautions in place, we cannot control when someone has actually been exposed and carried it into the school prior to showing actual symptoms and having infected ALL kids and staff within the environment. Same as the flu, stomach bugs, head lice and etc. If those have not been contained I am not certain that COVID would be any different.
7/21/2020 11:05:58	Frankie	Huerter	Usd322	Onaga	Keep closed until after labor day
7/21/2020 11:06:04	Katelyn	Pattison	Blue Valley School Dist	Overland Park	I am a mom of two young boys, my husband is also a teacher. We don't feel comfortable teaching in person to risk our own little lives and our own. We need virtual distance learning at least first quarter or until the cases of COVID in Kansas decrease or we go in another quarantine. Teacher lives and student lives matter! Please consider the lives you are putting at risk, thousands!!! It's not worth it!
7/21/2020 11:06:10	Whitney	Baker	Parent	Lawrence	Please delay school until after Labor Day. I'd actually prefer we keep schools online this fall. I don't see how we are going to open safely, but the more time teachers and administrators have to prepare if in-person school is required, the better. Thanks!
7/21/2020 11:06:21	Laura	Blickenstaff		Lenexa	Please keep the schools closed like the governor requests. The safety of the staff and children should not be risked.
7/21/2020 11:06:23	Tiffany	Gapske		Shawnee	To whom it may concern:  As a parent of 3 kids, I want school to reopen just like everyone else. However, I want it to open when it is SAFE and not just when it's convenient. I support Governor Kelly's delayed mandate to delay school until after Labor Day. It only makes sense to have an extra 3 weeks for people to get it together and wear masks and allow schools to get all necessary supplies and prepare themselves physically and mentally.  Our teachers and staff did NOT sign up to be frontline workers. They are not paid to be and that expectation is simply unfair. They have families, too. Their safety is just as important as the safety of my own kids. Please do not open school because you feel pressured. Reopen it when you yourself would feel safe enough to endure school days right alongside the teachers and staff. Do not ask them to do something you're not willing to do yourself.
7/21/2020 11:06:26	JESSICA	VENNEBERG		ONAGA	Thank you for your consideration. I trust human lives and well-being will rank above all else in your decision making.  YOUR JUST DELAYING THE INEVITABLE. KIDS NEED TO BE IN SCHOOL. IF THE PARENTS DON'T FEEL SAFE THEY CAN DO VIRTUAL LEARNING OR HAVE THEIR KIDS WEAR MASKS. EVERY SCHOOL DISTRICT IS DIFFERENT. KIDS NEED TO BE IN SCHOOL!
7/21/2020 11:06:31	Lisa	Colletti	Mill Valley High School	Shawnee	Start school in August and sports as notmal
7/21/2020 11:06:41	Robin	Roberts	Mill Valley High School	Shawnee	I think we need to be back at school
7/21/2020 11:06:42	Sharon	Karns	I support Gov. Kelly ipe	Holton	Follow Gov. Kelly's guidelines
7/21/2020 11:06:44	Laura	Murkin	Basehor Linwood	Basehor	Please vote to delay the start of school and keep our students and staff safe
7/21/2020 11:06:49	Lisa	Colletti	Mill Valley High School	Shawnee	Start school in August and sports as notmal
7/21/2020 11:06:57	Carly	Varner	Parent of school childre	Topeka	Our kids need to be in school! Please let local districts make their own guidelines, one size does NOT fit all
7/21/2020 11:06:58	Rebecca	Saldivar	Teacher	Derby	Please vote to wait to open schools until after Labor Day. Numbers of cases keep rising every day. We need to keep everyone safe. Thank you.

					<p>Please give the choice of when to open our schools back up to the local communities and school districts. We are not a "one size fits all" state. I am fearful that this push to start schools later may continue to be pushed back as Governor Kelly deems fit - not giving parents, schools, and local leaders the control to do what is best for their individual communities.</p> <p>I am a RN working in an inpatient setting similar to a school - ages 5-17 years old. We have kids from all over NE, Central Kansas and sometimes further eating 3 meals a day together, going to group activities, having free time playing games or coloring at tables in a living area and sometimes even having roommates depending on the need. We have not closed our doors yet through this pandemic and have not had an outbreak within our staff or patient population.</p> <p>I am also confused with her choice of start date. She is choosing to open us after a holiday weekend. Based on her prior decisions and executive orders I feel that we are being "set up" to have yet another executive order fall on us deeming the number of people celebrating the holidays has once again made school too dangerous.</p> <p>Had she let the school districts follow the Navigating Change as planned our school district would have been prepared to start in August. They gave the choice to parents to decide whether the PARENTS are comfortable with virtual or face-to-face classes. They were ready.</p>
7/21/2020 11:07:11	Maddin	Lockwood		Hoyt	
7/21/2020 11:07:13	Jacob	Demitre		Hays	It is of paramount importance that we get the safety part right. If we do not get the safety piece right that it will only result in more school closings down the road. The delayed start gives schools the chance to build a solid safety plan, have plans to address potential problems in their plan, and coordinate resources to enable its success. We should support the leadership of our governor, who is working hard to give Kansas schools what they need.
7/21/2020 11:07:13	Jill	Holder	Former USD 204 second	Bonner Springs	Dear State BOE: I am writing to URGE you to support Gov. Kelly's executive order to delay the start of school in Kansas. As a 34-year teaching veteran, I know full well that our schools are not ready to open in the face of this pandemic. They need the extra time to get the supplies needed to keep students and staff safe. There is much that would be needed to make my former journalism classroom safe during the Covid crisis: for example, how to disinfect computer stations and digital cameras for use by multiple students. My husband is a 63-year-old secondary teacher and I terrified for him to return to work. Please support Gov. Kelly and give schools the extra time to open safely.
7/21/2020 11:07:14	Natalya	Lowther	Pinwheel Farm	Lawrence	Please delay the start of school until after Labor Day to allow more time to put safety precautions in place for student, teachers, and staff. Also, please do not expect teachers to pay for protection measures out of pocket.
7/21/2020 11:07:15	Donna	Boyd	Valley Park Elementary	Fairway, KS	<p>I am a 2nd grade teacher at Valley Park Elementary in Leawood, KS. I urge you to support our governor in delaying the start of school this year. Teachers very much want to teach our students again in-person, but when it is SAFE. Right now, it is NOT SAFE! Covid-19 is spreading rapidly, and we need to protect our students, their families, and the teaching staffs. Please, please think of the citizens of Kansas and what is best to save their health and lives!</p> <p>Sincerely, Ms.Donna L. Boyd</p>

					<p>I am writing to ask that the State Board of Education approve Governor Kelly's mandate to delay the opening of schools until September 9, 2020. Due to the spike in COVID-19 cases in our state since July 4, I believe this to be the safest course of action for our teachers and students. We, as teachers, want to see our students, but in the safest fashion possible. Waiting a few more weeks gives our districts to receive necessary safety equipment and to finalize school planning.</p> <p>Thank you for your service on the State Board of Education. I know that you have our teacher's and children's best interest at heart!</p>
7/21/2020 11:07:15	Summer	Miller	USD 457	Gsrden City	Thank you
7/21/2020 11:07:25	Kelly	Demo	Parent	Lenexa	I support the governor's order!
7/21/2020 11:07:28	Joel	Colletti	Mill Valley high school	Shawnee	Start school and sports as normal
7/21/2020 11:07:30	Jill	Hendry	i am a teacher!	Emporia	<p>I support a school delay! We must keep our students and educators safe! Teachers need extra time/training to prepare quality remote learning instruction. Face-to-face instruction should not happen until this virus dies down. If that doesn't happen soon, then I believe remote learning should start. I am both a teacher, and a parent. My son had the virus, before we knew what it was. It was horrible to see him so sick. I don't want my students to suffer the way he did.</p> <p>Thank you@</p>
7/21/2020 11:07:31	Sara	Garrett		Wichita	Please, Please delay schools starting until at least Sept. 9th. Give parents and teachers time to prepare ourselves for the upcoming school year.
7/21/2020 11:07:36	Julie	Fern	Myself	Fairway	Please uphold the delay. We absolutely need to flatten the curve and allow schools time to acquire needed PPE
7/21/2020 11:07:39	John	Myres		Shawnee	Start school on time! No more delays.
7/21/2020 11:07:43	Janice	Olker		Lawrence	I think schools should not open for in person classes before Labor, or maybe even 2021
7/21/2020 11:07:45	Jane	Doe		Spring Hill	Deny
7/21/2020 11:07:46	Erin	Farber		Hoxie, KS	Please vote no to extend the start of school! Our kids deserve to get back to normalcy. We have to break the cycle of fear and teach our kids to live life instead of living fear.
7/21/2020 11:07:46	Adam	Clark		MANHATTAN	<p>I wanted to voice my support the school year delay. There are so many reasons why this is a good idea:  Allows our teachers greater time to prepare for the year.  Will give use more insight into how safe if will be on reopening school.  It has been shown that children aged 10-19 spread the virus just as easily as adults.  <a href="https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html">https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html</a>  We need to think about the safety of the staff as well. Almost one third of teachers have a pre-existing condition.  <a href="https://nces.ed.gov/pubs2020/2020142.pdf">https://nces.ed.gov/pubs2020/2020142.pdf</a>  This would put the school opening behind college openings, which from what we have seen has caused a spike in cases. I've heard from so many teachers recently how scared they are about going back to school. So many of their family members have pre-existing conditions.</p> <p>It appears we are close to a few different vaccine candidates for the end of this year or sooner. Why are we not taking the safe approach and then with these vaccines we can fully open safely?  <a href="https://www.research.ox.ac.uk/Article/2020-07-20-new-study-reveals-oxford-coronavirus-vaccine-produces-strong-immune-response">https://www.research.ox.ac.uk/Article/2020-07-20-new-study-reveals-oxford-coronavirus-vaccine-produces-strong-immune-response</a>  <a href="https://www.statnews.com/2020/07/14/moderna-covid19-vaccine-first-data-show-spurs-immune-response/">https://www.statnews.com/2020/07/14/moderna-covid19-vaccine-first-data-show-spurs-immune-response/</a></p> <p>For this decision I ask that we listen to the health experts. losing one person, be it adult or child, is one too many.</p>

7/21/2020 11:07:59	Tyson	Eslinger	USD 216	Deerfield	As the new Superintendent of USD 216 I first want to thank all of you for your work and time as a board member. We know that if we are talking about best practice when it comes to education that we would not be talking about a one size fits all approach. I understand that certain parts of the state are seeing a rise in case numbers and that they might not be ready to open schools just yet, as other parts of the state have seen very little to no cases or no new spikes and are ready to get our schools open for our students, staff and community. Districts have been working hard all summer to be ready for August and to get our staff and students back in the building learning, being with friends, socializing, participating in activities and playing sports. As you make your decision I would encourage you to go back to what we know to be best practices in our school districts and that is to meet our students where they are at and this is no different we need to meet each district where they are at not a one size fits all approach. Thank You.
7/21/2020 11:08:02	Erica	Hopwood	Myself	Manhattan, KS	Delaying the start of the K-12 school year will give the schools in the state of Kansas a benefit by being able to see how schools and districts in other states not only re-open, but also what plans seem to work to slow the spread among students. This would give our state a chance to learn from others' mistakes and hopefully have enough time to put together a plan that will keep our young children and all of their family and friends safe and healthy.
7/21/2020 11:08:07	Brianne	Smith	USD 501 Jardine Eleme	Topeka	I agree with postponing school until September. We have to protect our teachers. If they are exposed, we won't have any in-class opportunities. Please, lets check on our data
7/21/2020 11:08:10	Kaitlyn	Pressnall		Winfield	I am in favor of pushing the start date back. As an educator and a mom it gives us time to make sure all safety measures are in place. It also allows us to monitor the rise or fall of Covid in our communities and across the state.
7/21/2020 11:08:16	Kristin	Velicer	Shawnee Mission Schoo	Overland Park	Delaying the school year is the absolute right thing to do. Keep politics out of this decision. We must look at science and do what is best for our kids and teachers. Allowing flexibility for families to decide which model is right for them and enabling students to move back and forth between distance learning and in person class, as it is safe to do so is going to be essential for the coming school year. Requiring masks, temperature checks, and regular hand sanitization is 100% non-negotiable.
7/21/2020 11:08:21	Angela	Goodner	USD 258	Humboldt	I do not agree with the mandate to postpone school opening. I believe we need to return things back to as close to normal for the good of our children.
7/21/2020 11:08:31	Erin	Clark	Parent	Olathe	Delay School until numbers are DECREASING
7/21/2020 11:08:31	Colleen	Meyer	Kansas City, Kansas Pul	Kansas City	I am a teacher for KCKPS. I want to see my students and get back to "normal" learning, but not if it means risking my life or a student's life to do it. This virus is not something we should take lightly, and the infection rates are getting higher every day. I do not want to have to see a memorial page for students and staff that were killed by this virus in our yearbook for the 2020-2021 school year, especially when utilizing remote learning for a while would protect people. Seeing their teachers and/or peers die will traumatize our students exponentially more than delaying our school year will. I teach in a school with 900+ students and staff where the idea of social distancing isn't possible anywhere in our brand new building. My music classes are large classes, and it will be impossible to distance 50 kids in one class. Please take politics out of this decision and vote to delay our school year to protect the staff and students that you speak for. No one should be thrown into an experimental Petri dish without the proper protection.
7/21/2020 11:08:33	MJ	Issa	Freestate Football Team	3300 Westridge Ct, Law	This is paying for my college. Choose wisely
7/21/2020 11:08:33	Bill	Arnold	Hayden Catholic	Topeka	Even if school is delayed let us begin sports practice before so the kids don't lose part of their season
7/21/2020 11:08:44	Loretta	Buser	Special Education	Sabetha	Please do not delay the opening of Kansas schools. These kids need to see their teachers in person and need a sense of normalcy as soon as possible. If delayed, students would be going to school into June. Thank you for all you do for Kansas students. You are appreciated!
7/21/2020 11:08:57	Courtney	Ash	Parent of students	Mission, KS	Please ensure your decision reflects science, as presented by experts. This decision will impact the current and future health of nearly all Kansans. Use science to make safe decisions for students, teachers, school staff, the community and the elderly. Opening schools with no plan for safety is a death sentence for many people. Please don't make a callous decision about our future.

7/21/2020 11:08:59	Britny	Wood	Parent of free state high	Lawrence	The gov should not be canceling all extracurricular activities between now and sept 8- that is terrible for their mental and physical health- they have been following all of the guidelines (face, mask, temp checks, social distancing) while participating in outdoor workouts in preparation for fall sports In high school - there is NO reason to shut this down - it is a huge disservice to these kids to do so
7/21/2020 11:08:59	Michelle	Cunningham		Wichita	<p>Please keep the delay and if necessary move to online/remote only instruction. It is wonderful that we have medical experts to listen to please heed their recommendations. We also have an advantage to see that some schools in other countries which re-opened have seen outbreaks in schools (<a href="https://www.wsj.com/articles/israelis-fear-schools-reopened-too-soon-as-covid-19-cases-climb-11594760001">https://www.wsj.com/articles/israelis-fear-schools-reopened-too-soon-as-covid-19-cases-climb-11594760001</a>), this MUST give us pause. We also now know that children can spread, carry and be impacted by COVID-19 (<a href="https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html">https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html</a>). In Florida, 31% of children tested were positive for the virus (<a href="https://www.npr.org/sections/coronavirus-live-updates/2020/07/17/892427161/what-accounts-for-high-coronavirus-positivity-rates-among-florida-kids">https://www.npr.org/sections/coronavirus-live-updates/2020/07/17/892427161/what-accounts-for-high-coronavirus-positivity-rates-among-florida-kids</a>). We must not ignore these facts.</p> <p>I am a child therapist (LCP) and I realize that there could be some social/emotional impact on kids' who don't return to in person school but this is a far better alternative to the social/emotional impact of losing students and staff. I also recognize there could be a learning delay for some kids if they don't have regular instruction, this is still a better alternative to anyone falling ill with potential permanent damage (that the scientific community now believes to be true about victims of this disease <a href="https://news.berkeley.edu/2020/07/08/from-lung-scarring-to-heart-damage-covid-19-may-leave-lingering-marks/">https://news.berkeley.edu/2020/07/08/from-lung-scarring-to-heart-damage-covid-19-may-leave-lingering-marks/</a>) or worse, death.</p> <p>Aside from the risk of losing friends, teachers and staff in their schools, part of what helps kids is to have stability. A decision to return to in person classwork only increases the risk that we'll have to abruptly shut it down. Create stability for teachers and students by only offering remote learning.</p> <p>I do not envy your process or decision in this matter, it is am impossible one. There will be people who dislike any decision made. I also realize the impact that staying home will have on parents who have to return to work. It is clear that if we had more help from the federal government for families to not return to work we may not be having the same discussion. So I ask that you also consider writing our congress members to implore them to create further stimulus for our citizens and I'll do the same again.</p>
7/21/2020 11:09:00	Kim	Ralston		Wamego	The delay will give school time to prepare and will give the state time to lower COVID-19 cases. Please pass this order and give our students, faculty and admin staff a fighting chance to reduce and prevent as many cases as possible. As a parent I can't imagine having to not know when my kid comes home sick, for any illness, having to think about who they may have spread to at school or through contact to other families. We should do everything possible to fight against and prevent this virus from spreading through our communities through our children.
7/21/2020 11:09:03	Robert	Sherwood	parent	emporia	I support the delay. Keep kids safe. There are still too many unknowns, and things are moving in the wrong direction.
7/21/2020 11:09:11	Jennifer	Benner-Willis		Lawrence	Absolutely delay opening schools at least until after Labor Day. We cannot keep our communities safe if we are ignoring all the guidelines and the current trajectory of Covid in Kansas.
7/21/2020 11:09:11	Jeffrey	Flinn	Parent	Valley Center	Get these kid's back in the classroom! You will not expose my children to the toxic chemicals found in hand sanitizer every hour! My child will not wear a mask all day! Teachers don't want go teach they need to find a new job! Public schools need to watch out. There are far more parents than teachers. We will find a way for our kid's. With or without public education!
7/21/2020 11:09:12	Michelle	Oettmeier	Prairie elementary paren	Mission hills	Please reopen schools in person as planned without delay.
7/21/2020 11:09:12	Sarah	Cordell		Overland Park Kansas	Please consider the health and well being of all students and teachers and vote to approve the start date after Labor Day.
7/21/2020 11:09:17	Amy	Wilson	Topeka Public Schools	Topeka	Please follow Governor Kelly's executive order to delay school. It is essential to keep both students and teachers safe and allow time to get procedures in place.

7/21/2020 11:09:19	Tricia	Myers	Mothers	Salina	I do not agree with forcing children to wear masks all day, to the point to where I am going to look into the option of homeschooling. Im afraid it will upset and bother my 3rd and 4th grader so much they will shut down and not learn as much as they could otherwise. As much as my children need the social interaction I am so worried about them falling behind. I think there can be ways to social distance throughout the day and not have to wear a mask. Teachers will be getting onto kids about wherein them and not messing with them more than being able to teach.
7/21/2020 11:09:20	Julie	Smith	My high school child	Topeka	By shutting down everything for a month including sports you are basically putting these kids back on lockdown when they haven't been the problem! They have been playing organized sports and having weights/workouts all summer long without any significant outbreak of Covid! So why are they being punished? Because taking away not only school, but also all activities will mentally break down many of these kids! I'm scared for their future and what the decisions adults are making for them will do to them! I'd love to know who decided that school and school activities were not essential!!
7/21/2020 11:09:25	Claire	Blessing		LEAWOOD	Safely is a concern, and all precautions should be taken. However, as a Grandparent living with teenagers I'm especially concerned, but in person classroom education is necessary in my opinion! It's not only about education, but mental health is also an issue.
7/21/2020 11:09:27	Shawna	Bowden		Lawrence	Please allow sports practice even if the start of school is delayed. Sports are essential for kids to be involved in for multiple reasons.
7/21/2020 11:09:29	Briana	Lewallen		NWK	This Virus isn't going away so why are we delaying education. What purpose does this help? We are only hurting our children! We have never in history stopped education when we were faced with worse diseases and we sure in the heck didn't make our kids wear masks. There are facts proving that masks do not even help so what is the point! Also good luck in getting the younger kids to keep their mask on. 90% of what the teacher will get done everyday is trying to get the kids to leave the masks on. I agree with using the hand sanitizer or just having kids in general wash their hands more throughout the day! This is something that can be done more often! Do not take away our kids chances to be kids! Do not hinder their education because the only thing you are doing is hurting their future but doing this!
7/21/2020 11:09:32	Michelle	Hooper	Kids in desoto district	MTMS MVHS	Send our kids back to school!!!
7/21/2020 11:09:42	Neva	Rowland		Girard	Please approve the delay to the school year. School districts need time to organize the safest back to school plan.
7/21/2020 11:09:54	Lisa	Gwin	Parent of Students	Great Bend	Our kids have been out of school for far too long. Please do not extend this out any longer. These kids need to go back in August and they need to go back with out these dictatorship restrictions. The masks are extremely unhealthy for any child to wear. There is a lot of information out there supporting this and no good source supporting the use of a mask. Please do not let our Governor flex her overreach any further. This woman has no background in education or medicine. She has no educational support to make these decisions. You as educators know what is best for our students. I think you can agree delaying education and masking everybody is not in our students best interest. Please allow school to start in August with no masks. I beg of you do start showing the true Midwestern and Kansas support and no longer allow a New York Native to keep her overreach. Sincerely a very concerned parent!
7/21/2020 11:09:56	Courtney	Roberts		Shawnee	No - keep the decision at the district level
7/21/2020 11:10:00	Jeffrey	Prothro	Family	De Soto	For the health and well being of children, teachers, staff I urge you to follow the Governor's requested mandate and move the opening of school to after Labor Day. I am the parent of a fourth and sixth grader and am concerned that not all the necessary safety measures are in place to ensure the health and we'll being of all involved. This would allow further necessary steps to be taken by school districts. Please approve the mandate.
7/21/2020 11:10:03	Monica	Serrano	Parent	Abilene	Irresponsible to delay children's education for a virus with such a low death rate. Majority are being treated and recovering at home. Working parents cannot afford to stay home and educate their children. It is unreasonable to expect children to advance their education to the next year without being in the classroom.
7/21/2020 11:10:04	Marni	Mills	Myself	Olathe	Please do NOT delay the start of school! Students want and need to be in the school with their friends and teachers! There has not been ANY deaths from school age children in our state. The Governor is playing politics and the children are the losers!

7/21/2020 11:10:05	Deb	Murray	I'm a school psychologist	Leawood	We really need to not have school opening pushed back. We either need to make a decision to proceed via online or in person, and do it on time. Delaying makings everything harder. There are many parents and students depending on special education services and evaluations. I am not advocating for necessarily reopening in person, because that brings about a whole host of problems. For example, when teachers get sick in a normal year, there are just not enough subs to cover sometimes. Teachers will get sick and subs will be needed even more this year, everywhere. There will not be enough subs to sustain schools. There simply is not enough room to socially distance in schools. If it is decided to do online, we MUST allow staff to enter the buildings. Staff must be able to access their supplies and files on a regular basis, and they can do that safely with social distancing.
7/21/2020 11:10:13	Jessica	Gigstad	USD 430	Everest	I would urge the State BOE to consider those children who are already behind from the spring in their decision making. I know there is awareness about those parents who don't care to teach at home or ensure that their student is sitting down to complete virtual classes. Please consider those students for whom public school is their only realistic option of a decent education. I urge you to make children, not parents, not teachers, the priority. Let's consider those least fortunate.
7/21/2020 11:10:15	Greggretta	Voth	My children	Sterling	Please show your support in delaying school until September, do not politicize this natural disaster at the expense of the staff and students of the state.
7/21/2020 11:10:19	Amy	Cline	Teacher/ self	Topeka	Please support and uphold Governor Kelly's order to keep schools closed until after Labor Day. As a teacher and parent of school children, in person instruction, while there is still an abundance (and rising amount) of community spread, makes in person instruction seem incredibly dangerous and Even irresponsible. I don't believe we should put lives on the line. I agree education is important, but public safety must take precedent at this time.
7/21/2020 11:10:19	Tabatha	Granado	USD 253	Emporia	Please start school on or after sept 9th. I fear for myself, my students, my own children and my family who I could potentially expose!
7/21/2020 11:10:23	Jennifer	Hooper		Derby	I think students should remain out of school until positive cases are on the decline and much lower. I think they could start the year learning online and transition into buildings once we have a handle on the virus. I think it's irresponsible to put not only students, but teachers and staff at risk and allow them to be guinea pigs when there really is no way to know what will happen when we allow schools to open. I'm all for getting everyone back to school and return to normalcy, but think we must do so in a responsible manner.
7/21/2020 11:10:24	LACEY	FINLEY		SHAWNEE	Please vote NO to keep the prevent additional delays from the state level.
7/21/2020 11:10:29	Erin	Kuefler	Parent	Olathe	Delay school for safety resaons
7/21/2020 11:10:32	Daniel	Riley	Retired ATT EMPLOYEE	Kansas City Kansas	I agree with postponing the schools until September or until the infection rate comes down to 5%
7/21/2020 11:10:40	Angie	Evans	USD 435	Abilene	I firmly believe it is in the best interested in our children to get them physically back into school sooner rather than later. Again and again Pediatricians and Epidemiologists have stated that transmission of COVID-19 from child to child and child to adult is very rare. Please follow the science here and get our children back into school. Delaying the start of school from the get-go will provide a dangerous precedence. We need to stop this yo-yo that our Governor has us on and stick to a timeline!
7/21/2020 11:10:54	Christopher	Delay	Parent	Dickinson county	Please support the executive order to delay the start of schools statewide.
7/21/2020 11:10:58	Jamie	MacLaren	My family	Junction City	Thank you for keeping our children safe. Is there any way we can extend the safety measures until October?
7/21/2020 11:11:01	Nancy	Dettmer		Junction City	I support the governor. Please delay the start of school until after Labor Day.
7/21/2020 11:11:09	Travis	Hecht	Wamego Schools, Wamego	Wamego	Open schools as normal. Kids need to be in school and the Cornavirus is being used a political tool at this point. Look at the other countries and see that kids are least affected. Get them in School!!!
7/21/2020 11:11:13	Sherri	Austin	My family!!	I live in Kingman but work in Wamego	I've worked for Maize School District for 35 years. I have seen personally that grades K-5 don't follow protocol for covering their coughs, sneezes nor washing their hands! Parents send kids to school sick until they ultimately get the call to come get their sick child! I homeschooled my 9 year old grandson during the outage starting in April. He did fine. As much as I realize the important factors of kids being in school, this is NOT the time, with numbers rising! We are the adults here that should be protecting our children. As well as, protecting staff and families that children could take the virus home too. Why subject our children, staff and families to a deadly virus that even the experts don't have the answers for! It's a game of Russian roulette if we open schools now. Are you willing to take that risk? I pray not! Thank you for standing up for our children!!

7/21/2020 11:11:34	Shawna	Miller		Baldwin City	The delay in opening schools is necessary and may need to be extended to protect students, their families, teachers and staff. Upon reopening, there needs to be a solid plan in place to mitigate any issues and provide protection for all involved as well funding to support the plan. My niece is being treated for breast cancer and her son, a high school student, should not be placed in a position where he risks bringing home a potentially deadly disease to his mother. Poll your students and their families to see how many are in similar situations. How many elementary school students have vulnerable grandparents who care for them after school? These are things that need to be taken into consideration.
7/21/2020 11:11:37	Corey	Rozean	I am employed by the C	Wichita	First I want to reiterate that the views and thoughts in this comment are mine and fo not, nor should they reflect upon the views of my employer. I have chosen to take part in the survey on my own free will, and my employer can not and should not be held liable to my point of view.  I think the executive order should be followed. Especially in Sedgeick county where we have a much denser population that most of western Kansas. I think logically it would be irresponsible for schools in sedgwick county to open before September 9th.  We need to focus on the social emotional effects COVID has had on all of us, and me must make the choose based on what is right for our communities and our families. I would love to start school in August, and I'm ready to do so. But I think it is the wrong move.
7/21/2020 11:11:37	Kimberly	Gray	Parent - USD 343	Perry	I firmly believe it's in the best interest of the children of our State that they return to school as scheduled with no delay. These children deserve to return to some sense of normalcy. I believe we have all learned a lot about social distancing and how to protect ourselves and districts will be prepared to handle this as best as possible. Children need structure and need activities, as well as the social benefits of being among their peers. The facts of this "pandemic" are so distorted by the media. Let's quit making this Virus a political game and take our children's best interest into account. And to me that means school should start on time . . No delay!
7/21/2020 11:11:39	Christi	Hoke	Parent	Manhattan	Please delay the opening of schools until after Labor Day so we as parents can make an informed decision about the fall session. Our enrollment doesn't close until August 12 and we have little information on what school will look like in the fall if we chose in class options. Please consider that this is a tough decision for parents and we just don't have enough information at this point to make a decision.
7/21/2020 11:11:49	Britny	Wood	Parent of free state high	Lawrence	The gov should not be canceling all extracurricular activities between now and sept 8- that is terrible for their mental and physical health- they have been following all of the guidelines (face, mask, temp checks, social distancing) while participating in outdoor workouts in preparation for fall sports In high school - there is NO reason to shut this down - it is a huge disservice to these kids to do so
7/21/2020 11:11:52	Stephanie	Ferney	USD 453	Leavenworth	Please support Governor Kelley's executive order to delay school openings. As a teacher, I do not see how we can safely open schools now, with cases continuing to rise daily, and I am asking the Board to make their decision with everyone's physical safety foremost in mind. Thank you.
7/21/2020 11:11:52	Yadira	Pedroza	Parent	Pratt	Delay better be safe then sorry my kids are not worth proving a point to see if the Covid is real or not
7/21/2020 11:11:53	Sarah	McCarty	My family	Hays	I absolutely support Governor Kelly's recommendation to keep schools closed until after September 9, 2020! Our children are not guinea pigs. I have a child with Type 1 Diabetes and asthma. I also have an immune compromised mother and mother-in-law that I do not wish to become ill. We are all very strict with mask-wearing and social distancing so my children are still able to see their grandparents. If schools are allowed to reopen with cases spiking, this will no longer be possible. I have several close friends who are teachers who have immune compromised children. How are they supposed to protect themselves and their families if schools are allowed to reopen? Please protect our community and allow schools to reopen at a later date!

7/21/2020 11:12:00	Lisa	O'Donnell	Parent and employee in	Shawnee	I don't feel this virus is going away anytime soon so we need to live with it which means including human interaction in our lives. I would prefer to start the school year as normal, on time as we are truly not going to be in a different situation 3 weeks from now. Kids need direct interaction with friends for their social well being. In addition, many kids rely on other parts of school for enjoyment, learning and future livelihood including band, choir, shop classes, all of which cannot be done well remotely. I am all for precautions if that is what it takes to open but with science driven precautions that make sense. We need MORE THINKING AND LESS REACTING. Adults have a choice on where they work. If I don't feel safe going back into my building to work, then I can find other employment. Please get our kids back into the school buildings!
7/21/2020 11:12:01	Matt	McElwee		Maize	Follow the guidelines schools have worked on all summer and allow kids to go back to school on time. I'd rather homeschool till 9/8 then delay all kids an education. I'd rather drive my kid to school than delay because of busing fears. I'd rather work up to in class than make kids wait and get behind in education even further. I'd rather them do in classroom PE/ music/ recess/ lunch than just stop education all together. Provide clear mouth masks to teachers and don't make young kids wear them. It will be a distraction to the little ones.
7/21/2020 11:12:02	Jessica	Stoll	Free State Football	McLouth	As a State, we have a long list of many talented and decorated programs that exist both in and outside of the classroom. Many students are allowed the opportunity to stay mentally engaged in order to return to the classroom with consideration to the delayed start to the school year. Each student is owed the same consideration outside of the classroom. They take immense pride in representing their school and State. I urge the consideration for ALL fall activity workouts and practices, even with the delay of the school year. In order for the student athlete and student participants to be ready to compete, it is critical they have practiced and are physically and mentally prepared. I ask this in support of sports, marching band and any other school organization. Let's please keep our students engaged and allow them the opportunities to prepare; regardless of when in-class attendance would begin. Thank you for your consideration.
7/21/2020 11:12:05	Breanna	Blackhart		Hoxie Kansas	Please let these kids get back to their normal lives! We NEED to start their education and athletic abilities back as soon as possible! Do not delay this anymore!!
7/21/2020 11:12:06	Jessie	Cummings		Topeka	Please support the Governor's order to delay the start of in person schooling
7/21/2020 11:12:13	Julie	Schultz	Blue Valley PTO	Overland Park, KS	School is essential. We have learned how to adapt in all other essential environments during these unprecedented times. We need to define in-school learning as ESSENTIAL and build a plan to get students and faculty back safely in the Fall.
7/21/2020 11:12:15	Chandra	Doane	USD 272 Board Membe	Downs, KS	Opening schools is a NEED. This has passed the point of want. We all understand the risks are prepared to do whatever is needed for our kids. There are too many children that NEED to get out of their homes for safety, consistency, mental health, socialization and physical well being. Whether you start as normal or after Labor Day doesn't matter...it just matters that we do. Learning should be available in whatever format a family chooses. Whether a child physically walks into a school should not be a concern, that's up to their parents. We just need make sure they get their education.
7/21/2020 11:12:39	Dylan	Ashford	Student	Shawnee	I want school to open regular time
7/21/2020 11:12:44	John	Rather	Parent	Wichita	We have 4 children who attend Andover Schools. We feel strongly that school, including extracurricular activities, should start on schedule in August. We trust our local administrators and teachers to provide a safe environment. Of far more concern is the academic, emotional and health toll on students as a result of a continued delay of their return. Its already been 5 months since the kids have been fully engaged in everything our great schools have to offer. We love our wonderful teachers and believe many of them are ready and willing to undertake some risk to move forward, as many in our community are already doing by returning to work.
7/21/2020 11:12:46	Raynee	Beaty	High School , Sports, an	Lawrence ISD. (Usd497	These kids need to be active and be able to continue their learning, sports, and activities they love. They have already had too much time away from their normal lives and being stuck on their phones and not socializing and being active is not good for them mentally or physically. These kids need structure, activity, socialization, strength, and teamwork. We are letting our youth down by not keeping structure and activity in their lives.
7/21/2020 11:12:49	Teresa	Whearty		Randolph	I am scared to send my 3 children back to school, even in our small rural community. I support the delay.
7/21/2020 11:12:49	Jill	Worl	Usd #327	Geneseo	Please keep schools closed to students until after Labor Day in hopes the virus spread will have slowed down by then. This delay will also allow teachers more time to prepare their classrooms for students as well as plan for a year like no other year.

7/21/2020 11:13:05	Tricia	Simpson	Blue valley wolf springs	Bucyrus	I wish for the school to open back up.
7/21/2020 11:13:09	Sara	Hale	Parent	Topeka	Please keep kids out of schools. Let's protect everyone: teachers, staffs, etc. What happens when a staff tests positive? Do we have enough teachers in place to sub? What about custodians...what if one gets sick...how will this work. It would be safer to keep kids out of schools.
7/21/2020 11:13:18	Katie	Good	parent	Barnard, Kansas	My kids need to be in school. We live in a rural and shouldn't have the same rules as bigger cities. Start on time and with masks and see how it goes. The kids are already behind from last spring online learning. Please get the kids in school where they belong. They're our future!
7/21/2020 11:13:26	Danielle	V		Junction City	Delaying the opening of schools is a great idea. It gives our educators and administrators time to prepare for the return of our children and staff.
7/21/2020 11:13:36	Crystal	Stewart	Blue Valley School Dist	Overland Park, KS	I support delaying school opening until 9/9/2020, in addition to social distancing, masking of all students and staff, and hand sanitizing every hour.
7/21/2020 11:13:39	ALEXANDRA	ROME	Holy Family Elementary	HAYS	I am a music teacher in Hays, and I FULLY support Governor Kelly's executive order to delay the start of school. It is far too risky to send kids and staff to school in-person right now with as exponentially as COVID-19 has increased. - There are so many things to factor in: Getting PPE equipment, gathering sanitation supplies, masks for students who cannot afford them, people who will be in the school who then go home to high-risk family members, staff who come into contact with EVERY student in the building - or even multiple buildings, bussing students socially distanced, food service, etc. -Delaying the start of the school year would allow us more time to create a solid plan for how to keep our students and families safe. With the state only just releasing their guidelines and some schools scheduled to start in just a week or 2, that is not NEARLY enough time to get procedure and equipment in place. It would also allow the numbers of positive cases to trend downward.
7/21/2020 11:13:41	Alex	Hertel	Parent	Goddard	I support governor Kelly's order to delay school until after Labor Day. The reason I think this because COVID -19 is surging and if you fill schools up with students and school staff I feel there would be a potentially dangerous situation with a lot of different clusters. Please wait until after Labor Day to open schools
7/21/2020 11:13:44	Christie	Jones		WaKeeney	Please delay school and do whatever you must do to keep our students and staff safe. The loss of lives would be foolish when there are alternatives.
7/21/2020 11:13:50	matt	henry	taxpayer	wichita	Open the schools you bunch of lazy poopyheads. The children, mine and others, aren't learning anything from home. Their only hope is that other states are just as incompetent and lazy in their leadership so the bar is lowered universally.
7/21/2020 11:13:53	Alexandria	Pasquale		De Soto	The State Board of Education needs to prioritize the health and safety of its students, families, and staff by delaying the start of school until at least after Labor Day in accordance with Governor Kelly's order. Not doing so would greatly increase the infection rates amongst the children in our communities. Please make the safety of our children your priority.
7/21/2020 11:13:53	Tina	Palmer	Usd 367	Osawatomie	Do not delay schools, it will cause more harm than good
7/21/2020 11:13:57	Melissa	Barnhart	Working Mom's everyw	Hutchinson	I understand and fully desire the need to keep our teachers safe. That should be number one priority. I do not think, however, that delaying the start of school is going to help this. The longer we delay, the closer we get to fall which is the start of other seasons of sicknesses like the flu. It would be nice to start it earlier in order to get the kinks worked out of the day to day changes that way we are ready to combat not only Covid but the Flu, Fifth's disease, Hand foot and mouth, etc. If an immune system is slowly attacked by something, it is more likely able to fight it off. But if teachers are getting bombarded by all the sicknesses at the same time, they will have a harder time staying strong against them. Covid is not going anywhere, just like the flu. The best thing we need to do is TAKE THE PROPER PRECAUTIONS but move on with our lives. Our bodies need to learn how to fight it. They will not so this by sitting at home not being exposed. Thank you.

7/21/2020 11:14:01	Carolyn	York	USD500	Raytown, Missouri	I have been a special education school social worker in the Kansas City, Ks school district Wyandotte county. Kansas is now a red zone and Wyandotte county is one of the worst in the state. KCK is a high risk area due to the population. I am now 65 and my husband has health risks. I do not believe that staff or students should return in person at this time. We need to start online at the beginning of the school year and keep students, families, and staff safe.
7/21/2020 11:14:06	Annie	Christesen	Ottawa USD 290	Lawrence	I am a teacher and I support the delayed start of the 20-21 school year. I am very anxious about returning to school while our Covid19 numbers are continuing to rise. My entire 26 years of life I have battled with my health. In my three years that I have been teaching, the only time when I'm not sick is during the summer. I teach first grade and I don't know how we can reasonably expect these kids to adapt to so many changes. Even though I very much support mask wearing, I don't know how it will be realistic with six year olds for eight hours a day. In my personal opinion, I think we should do remote learning for the first half of the year/until numbers go down significantly. If that's not an option, then I think we should do half day sessions in elementary schools since my school district has stated the focus is math and reading. Half day sessions would ensure smaller groups of kids, time in between to sanitize, and teachers actually getting a break for lunch and being able to use the bathroom (I got my first kidney stone during my first year of teaching because I stopped drinking water due to no bathroom breaks). It would also cut down the hours that kids would be required to wear a mask, which a lot of parents are voicing as a reason they don't want their child at school. Please consider these suggestions from a teacher that just wants her students and teachers to be safe.
7/21/2020 11:14:17	Kristine	Burke	KCKPS USD 500	Olathe	I am a passionate and dedicated elementary school counselor. During the summer I remained in contact with a few families who needed extra support. One of our students contracted COVID. She was asymptomatic. Her grandfather on the other hand was not so lucky. He went into the hospital and after weeks of being on a ventilator he died. I am sure lots of people have similar stories. But here's the thing- my spouse is a dialysis patient and is immunocompromised. All I kept thinking was: this student had no symptoms, no fever, nothing. They would be in my school building, in the classroom where I teach my social emotional lessons, in my office. I am not just thinking about me and my family. Many of the students in my district live in homes with extended family who are at greater risk (grandparents, aunts, uncles). I think that it is unsafe and would be a huge misstep to have students return to our school buildings at the current time.
7/21/2020 11:14:18	Ellen	Backus		Topeka	As an elementary teacher, wife of a high school teacher, and mother of a 3 month old, I understand the dangers that come from unprepared school openings. Whether schools plan to open mask to mask or remotely, there is a great deal that needs to be prepared before then. Please vote to push back the start date so that schools can be more prepared and to give our community a chance to lower transmission rates.
7/21/2020 11:14:19	Stacie	Ogborn Turner	EDUCATORS	Wichita	It is not safe to reopen schools at this time. Gov. Kelly's delay order is the most prudent thing we can do to protect students and staff. It will give districts the gift of time to implement the plans needed to provide safe options for parents. It will also give our communities time to get Covid cases under control.
7/21/2020 11:14:20	Sarah	Lawlor		Lenexa	I'm in agreement that delaying the school year is a good idea. There is a breakout in our community and an extra few weeks will help. Also giving the district the added time to ensure the distance learning option is great is important. As a society we need to follow the science and not allow a minority of alarmists control debate.
7/21/2020 11:14:21	Regina	Erickson	Kingman High School K	Kingman	Open our schools with NO masks and NO restrictions. Or I'm suing for my tax dollars to be refunded to me for all the time you're closed. ☹️
7/21/2020 11:14:30	BRIAN	BREWER		Olathe	Please honor the executive order and delay school until after labor day. Please help our students and teachers come back to a safe environment. Delaying until after labor day will allow the mask mandate a few more weeks to work throughout the communities and bring the numbers back down.
7/21/2020 11:14:30	Phoebe	Brummett	USD 217 Rolla Schools	Rolla	Thank you for your time in serving our students. I serve on our local school board and realize not every decision that is made is popular with the constituents. I believe the decision on whether to open schools should remain local. What works for larger districts does not make sense in smaller districts. Our largest class size has 18 students and our superintendent already has made his plans on how to open safely. Our county has had only 9 cases of Covid so far and the majority of them have been in the older community members. Please leave the decision to those who are closest to the problems. Thank you!
7/21/2020 11:14:45	John	Woods	parent	Manhattan	school needs to start as originally scheduled with all students in attendance seated in the classroom.

7/21/2020 11:14:47	Jennifer	Carter	USD 232	Lenexa	Please vote to pass the executive order. We as teachers need TIME to create new learning activities in two different learning environments!!!
7/21/2020 11:14:54	Erica	Wheat	USD 497	Lawrence	I would like to recommend sports practice continue even if school is delayed. They are using masks and practicing social distancing. Let's not let these kids lose anymore.
7/21/2020 11:14:56	Laura	Fix	Grandparent of free state	Lawrence	The governor should not be cancelling all extracurricular school activities between now and sept 8- children need to feel a part of something especially now- coaches have been following all of your rules - masks, temp checks, social distancing - taking this away from them At this time is irresponsible to their overall mental and physical well being - DO NOT let the governor do this to these kids
7/21/2020 11:14:58	Sarah	Landry		Lawrence	School should be delayed until after Labor Day. If we would not send our children when cases were much lower, it makes no sense to send them now. We have no idea what long term effects are from the virus and current evidence suggests it's not good. Exposing our children raises the risks for all of us with potentially devastating impact. We need to keep everyone safe to the best of our abilities. Please align with the Governor's guidelines.
7/21/2020 11:15:01	Kelly	Wall	Myself	Lawrence	I work as a contract employee, a speech language pathologist in the Topeka Public School system. If our communities aren't safe for large groups, then our schools can't operate safely either. We all know that social distancing and following other rules, including wearing masks and hand washing, will be challenges for students. When we have positive cases, we will need quick, effective testing. Who will provide that for teachers or families of students? Who will cover the costs? How will teachers be expected to go back and forth between virtual and face-to-face teaching with these changes throughout the year? Will there be enough subs and support staff, as many subs, food service workers and bus drivers are elderly? Please support Gov. Kelly's decision to delay the start of schools until after Labor Day and help prepare schools to address these issues, as well as provide a plan for addressing the anxiety and fears many students and staff will be experiencing.
7/21/2020 11:15:03	Kerie	Barnett		Oakley	No mask required, let them start in August. Keep things as normal. Do temp checks,
7/21/2020 11:15:07	Michelle	Crook		Fort Leavenworth	Open school and have everyone wear masks and frequent hand washing and sanitation done.
7/21/2020 11:15:08	Craig	Schmidt	Parent	Goessel Ks	As COVID-19 cases in our Country, counties ,and surrounding communities spread I feel that it is unsafe at this time to start school. I think we need some extra time to figure out recommendations and regulations on how we will handle the school year for the safety of our teachers kids and community members.
7/21/2020 11:15:10	Emily	Rountree		Pittsburg	Please support the delay of reopening schools. As a teacher and a parent, going back to school is very overwhelming since we have been very careful. The risk of going back to school and potentially infecting staff, students, and families is not worth the reward.
7/21/2020 11:15:13	Hanna	Anderson	Emporia schools	Emporia	Don't open schools and put children and teachers at risk until Kansas is 14 days with no new cases!! This is so unpredictable and the outcomes and potential harmful effects should outweigh schools starting back up when cases are soaring!!
7/21/2020 11:15:15	Janna	Frydendall	Meade County, Kansas.	Meade, Kansas	I believe that the schools in Meade County should open before Labor Day. Our citizens have common sense & have been diligent in being safe. Our kids are ready for school & some normalcy. Yes, precautions have to be followed & will be. Please vote ☺ to start school BEFORE Labor Day. Our kids & administrators are ready!
7/21/2020 11:15:19	Jennifer	Wedman	Maize USD 266	Wichita	I support the delaying of school openings. I am a teacher in the district. I am worried that without proper time to sufficiently and effectively prepare a plan for safety that this situation will get worse. Teachers are going to need time to prepare and rework classroom management systems so that we may feel assured that we are doing the absolute best we can for student and staff safety.
7/21/2020 11:15:24	Dylan	Ashford	Student	shawnee	I want school to open at the usual time in August. Don't want to wait 3 more weeks. I want soccer season to start.
7/21/2020 11:15:29	Tamara	Ehr		Emporia	I am in support of delaying school openings. However, if districts are ready to open up with virtual learning prior to the delay, I see no problem with that. I also agree that all contact sports/extra curricular activities (unless they can be done online) should also be delayed. There are also exceptions to a few districts in counties where there are no current active cases; if those districts are prepared to open with a well thought-out reopening plan, then I feel exceptions could be made.

7/21/2020 11:15:51	Emily	Schmidt	Olathe School District	Shawnee, Kansas	<p>I write to you in hopes you vote to approve Governor Kelly's executive order. I am a proud Kansas educator! I am a High School Family and Consumer Science teacher at Olathe West High School in Olathe Kansas. I have lived in Kansas my entire life. I am a graduate of the Olathe School District and have both a bachelors and masters degree from Pittsburg State University. All of my education has been centered around our great state. I love being an educator and enjoy making our great state better by teaching students. During my teaching career I have always vowed to live by the following "do what's best for kids"- today I ask you to do the same.</p> <p>The executive order Governor Kelly has created gives a valuable resource to our education system, time. Time for the virus to slow, time for our districts to plan accordingly and time for parents to make the right choices for their family. I was incredibly impressed with how our state handled student learning back in March. Voting yes to this executive order will once again show our country how much Kansas values not just education but people. Please value the well-being of our schools staff and students. While I would love nothing more than to be back in my classroom, I can't in good conscience say that I'm not scared. I write this to you 6 months pregnant with my second child. I am not alone in my fear. Help make our schools staff feel safe in the midst of this pandemic. Demonstrate again to our nation that Kansas is the gold standard in both education and valuing human life. Please, do what's best for Kansas kids and vote to approve Governor Kelly's executive order.</p>
7/21/2020 11:15:54	Sara	Naaf	Parent in USD 364	Home, KS	<p>Good morning!</p> <p>While I realize you are likely getting a ridiculous amount of emails about the school situation, I would also like to give you my input.</p> <p>First, thank you for giving your time and energy to serve our students and our community. I am a constituent in Marshall County's Marysville School District, parent to 2 school aged daughters and try to be an advocate for their educational needs and those of other students in our district. I would not wish the difficult decisions you will be making upon my worst enemy...officials are in an impossible situation this year.</p> <p>My thoughts on opening schools on time versus delayed starting is convoluted, at best. I cannot say for certain where I stand. Which may lead you to wonder why I would write you a letter. The answer is, I don't think I'm alone in my hesitancy with my opinion on what needs to be done.</p> <p>On one hand, I am very concerned about staff and student safety if an outbreak were to occur in a school. I have very dear friends that are educators with compromised immune systems, as well as having friends with children who are at high risk of becoming gravely ill should they be infected with COVID-19. As a small business owner, I work with the public every day and know how difficult it is to get adults to wear masks, and worry how that will occur with children (not to mention, some adults). I appreciated the recommendations put together by the State School Board for schools to implement a safer approach to re-opening, but wish there was more clearly defined boundaries. (And maybe there are, I haven't finished reading the entire document...yet!) Such as having a percentage mark of community infection that allows schools to be open, or go to online instruction.</p> <p>On the other hand, I am deeply concerned about our most vulnerable students and their needs. Our special education students who have gone months without direct instruction or therapy services. Our at-risk students who have gone months without their school supports to check in on their emotional and mental well-being. Who is looking out for their best educational interests? How much farther behind will these students slip? Who will be their voice of advocacy?</p>
7/21/2020 11:16:06	Jessica	Thomas		Topeka	Schools should stayed closed until the virus isn't spreading as much as it currently is to keep teachers and students healthy!
7/21/2020 11:16:09	Jennifer	Tilley	USD 232	Shawnee	I believe it's the right thing to do to postpone the start of in-person classes as we are currently seeing an uptick in Covid cases. As a licensed and former state school administrator I am all for classes starting when we can do so SAFELY. I am not willing to risk my children's health, or ask that of the staff of the schools.

7/21/2020 11:16:11	Dolores	Brown	Schools	11563 W. 146th St. Olathe	Are you thinking about teachers and employees who are over 60? Are you going to throw them into harms way? Let's go back to school when Trump sends his son and and grandkids back to their schools.
7/21/2020 11:16:15	Mary	LeGresley		Lawrence	For the safety of our children and the staff and teachers, please approve the Executive Order delaying the School Year.
7/21/2020 11:16:29	Lindsey	Hatesohl	USD 108 parent	Washington	Do NOT allow the governor to overreach in her authority. Open schools on schedule as they had already planned, operating NORMALLY (no masks!).
7/21/2020 11:16:30	Brandy	Hoffman	Usd 232	Lenexa	Please have school start at the regular scheduled time and let our kids play high school fall sports.
7/21/2020 11:16:37	Jeremey	Wilcoxson	Parent	Wichita	Delaying the start will keep teachers and students safe. Perhaps try giving local school districts the option to opt out.
7/21/2020 11:16:41	Jenny	Frandsen	Teacher/mom/daughter	Olathe	Thank you so much for taking time to listen to the public. As a mom, I worry about my kids social needs. As a daughter of a teacher, I worry about my 60+ dad testing positive. As a teacher, I worry about having the responsibility of students lives in my hands. I see both sides, I really do. I want to be in school. However, I can live with the fact that my kids will miss out on a few more weeks with their friends. I'm afraid if we did start losing our children, that the teachers that poor their hearts and souls into their students will never recover. I can't live with that. Please give the districts some time to best meet the needs of our kids and some time for the positive cases to go down.
7/21/2020 11:16:46	Gretchen	Banks		Pratt	IGNORING Covid-19 will not make it go away! Do the right thing for our children! Delay in person classes!!
7/21/2020 11:16:47	Jami	Simmons		Bennington	Please do not delay schools. The kids & teachers need the structure & socialization that being on school campus provides for them. This is a virus & delaying school 14+ days is not going to make it go away.
7/21/2020 11:16:48	Brent	Wood		Lawrence	All studies show teens infected with Covid 19 have mild to moderate symptoms. Why would we shut down these structured sports practices when no problems have been demonstrated to necessitate a full closure? Without structure these kids will find other avenues in a not controlled environment to spend their time.
7/21/2020 11:16:53	John	Stefanik	None, I'm a parent	Olathe	I don't see the need for any delay but so long as the September 9 return is a hard and fast date, can accept that as a way to ensure all parties are prepared to educate our kids.
7/21/2020 11:16:54	John	Devereux		Prairie Village	School opening should be delayed until cases are again under control and can be maintained at a low level
7/21/2020 11:16:57	Terin	Walters		Manhattan	For communities with high virus numbers, please continue with the Gov.'s recommendation to delay until September.  However, I think you need to give communities discretion as metropolitan areas and college towns are much different than smaller rural communities. It may be best for some districts to get school started ASAP before COVID-19 hits their communities.  Also, thank you for your service and your effort to choose the best path for students and their families. You're in an impossible position and there will be complaints no matter what you choose. Please know you are appreciated. You are serving in the toughest of times.
7/21/2020 11:17:01	Gina	Riffel		MANHATTAN	I agree with the Governor, in person school should NOT start until the virus is controlled. If it is not safe for adults to gather in groups there is no reason for our children to.
7/21/2020 11:17:03	John	Doe		Coffeyville, KS	As both a parent and public school employee, I urge you to delay the opening of schools. I believe more time is needed to both prepare schools for the reopening and to allow the curve to flatten both locally and statewide. We were making progress months ago, but the reopening seems to have happened too quickly and ineffectively and now we're right back where we were when this all began. Schools closed initially to help, but I and those I work with believe that more is needed before we can get back to it.
7/21/2020 11:17:08	Lane	Bigge		Scott City Kansas	I believe the choice to open schools should be left up to individual counties and school districts. A 1 shoe fits all policy is sometimes not the best for rural western Kansas. I agree that schools need to have sanitizer and measures in place, but let each school decide when it is safe to open.
7/21/2020 11:17:15	Cathy	Hess	Grandparent	Lenexa	I support keeping schools closed until after Labor Day. Educators are working overtime to figure out how opening schools MIGHT be possible and safe. Give thrm the time they need.

7/21/2020 11:17:17	Jennifer	Bauman		Olathe	Please uphold Gover Kelly's mandate to delay the start of school. I would also ask for you to encourage schools to go online for the first semester this year. As a parent I do not feel it is safe to have school in person given the current path of the Covid19 virus. I know this is a very difficult decision to make. Please follow the path of science rather than politics.
7/21/2020 11:17:25	Sydbey	Topliff	De Soto High School	Kansas City	As a coach and an educator for multiple districts in Kansas, it is appalling that we are considering starting school on time with no training, no plan, and no funding for necessary equipment. Medical professionals are able to be provided with tools to keep themselves safe, as should students, teachers, and other staff.
7/21/2020 11:17:30	Elizabeth	Arnold	myself-parent of childre	Leawood	It's ridiculous to cling to an arbitrary schedule with so much at stake. As the situation with the coronavirus pandemic changes rapidly in Kansas, districts need extra time to respond appropriately. Please uphold the governor's decision to delay the start of the school year so we can do this right.
7/21/2020 11:17:32	Brandi	Norman		Olathe	I urge you to delay the start of school. I have 3 elementary school children and I fear for my entire family's safety if they must return to school while cases continue to rise. With 3 children in different grades and both my husband and I working full time we are not in a position to educate our children full time. The idea that it would be safe to have large numbers of children back in school at that time is alarming. I know this puts a strain on families but the safety and well being of our community must be the priority.
7/21/2020 11:17:33	Katie	Ollenburger		Hutchinson, KS	The governor has backed her decision by science and has made a decision to protect students and staff. As a teacher, I do not want to return with students if it is not in everyone's best health.
7/21/2020 11:17:46	Sophia	Rylko	USD 450	Lawrence	<p>I support Governor Kelly's executive order to delay the reopening of schools.</p> <p>I am employed as an occupational therapist for a rural district in Shawnee County. We are in a unique situation in that we also serve students that reside in a neighboring county, Douglas County. I think that it is important for the state to determine uniform guidelines for returning to school safely because one school district may serve different counties that have implemented different guidelines and mandates.</p> <p>I am also very concerned for my own safety and the safety of my students. As a itinerant staff I feel that I am at increased risk for being exposed to and spreading COVID-19. As one of two occupational therapists serving my school district, I serve 6 different schools from a variety of age groups, from kindergarten through high school. In a majority of the schools that I work in I do not have a designated space to work with students and work with them in whatever space is available on a given day. This could include the gym, cafeteria, school psychologists office, special education resource room, or orchestra room. This provides me with less control over maintaining a safe and sanitized environment for my students.</p> <p>During the summer breaks I work as an occupational therapist in a long term care setting which is currently one of the most high risk settings for spreading and contracting COVID 19. I currently feel safer working in that environment than going back to my school based job because there are specific protocols and guidelines in place developed by medical professionals experienced in preventing transmission of the virus. My school district needs the extra time to develop these protocols, to obtain necessary PPE, and ensure that they have the necessary staff and supports in place to safely reopen. It is for these reasons that I ask that you support the Governor's order to delay reopening of schools.</p>
7/21/2020 11:17:49	Christine	Tholen		Iola	I don't mind school starting after Labor Day. That's when we always started school and I was a kid. However, the kids do not need to wear masks. They should engage in all normal aspects of school including Sports recess Art band Etc. Science shows that kids don't get it as much nor do they pass it on as much. And one size does not fit all. We have had in our County only a handful of cases that are now mostly recovered. They come from people going to Wichita or Kansas City and getting it, not from Community spread. Let us here in rural Kansas go back to relatively normal because we can.
7/21/2020 11:17:49	Troy	Hoppes	My kids	DeSoto	We need a solution to open schools not cower to fear. Our children deserve better than to just say no school.

7/21/2020 11:17:50	Tuffy	Taylor	Colby Dodge	Colby	This order should not be allowed. I very strongly recommend that schools open on time and all sports and extra curricular activities be allowed to happen as they have in the past. Our local school system and parents can handle this situation without the governor's interference. These young people should not be pentalized because some people make bad decisions. We have no outbreak in this area. We have 10 different businesses with over 50 people working and every body is working. We have to move forward. Don't let this destroy our youth's future. We have several grandchildren involved with one going to be a senior. We are also former teachers and understand how the education system works. Do not let the teachers union control our schools.
7/21/2020 11:17:51	Cassandra	Swenson		Wichita/ Goddard	I dont feel we can safely send teachers, staff, and children back to school in person unless we model the state after New Zealand and lock everything back down for 4-6 weeks. Everyone's salaries that could not work from home would need to be subsidized during that time, and food assistance would need to be provided. That being said, I would rather my tax dollars be spent this way in a heartbeat. I think we need a 100% online school plan during this time, and again with school breakfast and lunches provided to the children at various pick up locations that are socially distanced. The Goddard school district did an amazing job of this during the spring semester. Other districts should follow suit.
7/21/2020 11:17:51	Susan	Newman	Retired Kansas teacher	Olathe	Delay the start of school for the safety of students, staff and families
7/21/2020 11:17:56	Meagan	Cramer		MANHATTAN	I'm in favor of delaying the start of the school year. With the current information we have, it makes sense to delay starting until after Labor Day. It gives schools more time to prepare and it means people can travel if they'd like over Labor Day and then have time to quarantine before being around a large group of people. We're all learning as we go and there is no training booklet to prepare ourselves. The best we can do is look at science and plan for safe openings.
7/21/2020 11:17:58	Vern	Andrews	Teacher at North Jackso	Holton	Please support Governor Kelly's executive order to delay the start of school. We all want to start school this year, but we want to do so safely for students and staff. Thanks you.
7/21/2020 11:18:04	Cathy	Robert	Brown County Interloca	Hiawatha	Our facility provides a safe learning environment for behaviorally, psychiatrically, and sometimes violent students for the school districts in Horton and Hiawatha. We have excellent leadership in both these districts, but especially in our STYLE school's situation, administrators need to be given more time to address the myriad of concerns that come with face-to-face education during this pandemic. I want to be feel safe teaching and caring for them; they need us desperately. Most importantly, I want our students safe at school. Many come from homes that are already compromised in every regard... economically , socially, parentally, etc. Give our leaders the gift of time, because the ramifications otherwise will trickle down to us all. It's a small, small request and it comes from the heart.
7/21/2020 11:18:05	Ashto	Hoffman	De Soto high school	Lenexa, Ks	Please have school start in August as planned and have high school sports played for the fall.
7/21/2020 11:18:06	Lindsay	Hartman	USD 241	Sharon Springs	School needs to resume, I have 2 of 3 kids with IEP's and mom is not a teacher along with working and running a business my kids need the teacher interaction and need a schedule that cannot be provided at home. It will be detrimental to my kids health and emotional well being if school does not resume in session, delayed after labor day doesn't hother me but then School needs to start in person teaching so that kids have a better chance at learning parents that want to homeschooling can but parents that have no desire to want their kids in school and they don't close schools for flu, etc so why should this be any different.
7/21/2020 11:18:06	Renate	Rea		Lawrence	Open School asap and start Fall Sports
7/21/2020 11:18:11	Jessica	Garrison	Parenthood	Olathe	I fully support postponing the start date of the 2020-2021 school year. This will give Kansans a chance to reverse the upward climb of COVID-19 and protect not only our children but the teachers and staff of schools as well.
7/21/2020 11:18:18	Jake	Ashford	Brother of student	Shawnee	My college in Nebraska is opening in August. I believe Kansas schools should open in August too. Need to get back to learning.
7/21/2020 11:18:29	Carrie	Skorupan	Teacher	Overland Park	Kids need school! parents need to return to work and if we make good choices with smaller class sizes and think outside of the box. We can make school work. Online school does not work in Kindergarten for students/parents/teachers
7/21/2020 11:18:38	Strphen	Cadwallader		DeSoto	Please delay the start of school to protect our children and families from the spread of covid!!!

7/21/2020 11:18:50	Chaz	Spedding		Wichita	Thank you Governor Kelly for delaying the start of the school year. I know children's safety and that of the teachers is your primary concern and we've discussed this in length lately also. What to do when a teacher or student tests positive is it a mandatory 2 week quarantine for everyone in the class? I don't have answers and am glad I don't have to make those decisions, so thank you Governor for doing the right thing.
7/21/2020 11:18:55	Kathy	Croy	Myself	Liberal	Please let us have our kids back and provide them Emotional, Educational support. Give us the means to provide what we need and keep them safe.
7/21/2020 11:19:02	Amanda	Ford	Blue Valley Schools US	Lenexa	Please vote to uphold the executive order. Schools and teachers desperately need this time to plan, evaluate options, and get our affairs in order. Starting school "on time" would be haphazard, ineffective, and potentially disastrous. Leaving decisions up for local control is what got us into this mess in the first place. Stop playing politics with people's lives.
7/21/2020 11:19:04	Theresa	Henderson	Non	66002	Keep schools closed
7/21/2020 11:19:06	Kimberly	Sturtevant	USD 497	Lawrence	Please vote in favor of the Governor's mandate to give school districts the added time to prepare safely and effectively for the return of students and staff. Put the safety of students, teachers and their families first!
7/21/2020 11:19:06	Ralph	Lilja	Parent	Zenda	I feel strongly the Governor has overstepped her hand. She can mandate all she wants but common sense would seem to me that getting young kids to wear a mask will be all but impossible. This nonsense has gone on long enough. We need to get the kids back to a normal routine and back to school!
7/21/2020 11:19:13	Kent	Brown	Citizen	Olathe	I urge you to support Gov. Kelly's executive order to delay the start of the school year until after the Labor Day holiday. Also, I urge you to consider carefully the measures needed to ensure teacher safety, in addition to student safety, especially for those teachers in one of the high risk categories.
7/21/2020 11:19:14	Jennifer	Schermerhorn	parent at USD320	Wamego	I fully support the Gov delay of schools and mandatory mask wearing. I believe schools should actually be online for the fall semester, because we should not be risking the health and safety of children and teachers. Any death is totally unacceptable.
7/21/2020 11:19:23	Jason	Nitz		Cummings	Open schools
7/21/2020 11:19:25	Ruth	Heppel-Werner	USD 402	Augusta	I would prefer the delay to adequately prepare for all of the changes for my students. I want to make our environment as safe as possible for myself, my students, and my paras!
7/21/2020 11:19:26	Dea	Birmingham		Lawrence, KS	We need to have in person school options. Online only is not good for mental health, socialization, and physical health of our kids. It is also detrimental to working parents.
7/21/2020 11:19:30	Jennifer	Wenger	Parent of 2 kids in USD	De Soto	I believe we should push back opening schools to attempt to get numbers down. I believe it is the safest option at this time to protect our children, teachers and families. Thank you for considering all of our comments and concerns. I feel like our district's hybrid option is the best for most students/faculty to limit the number of people in the buildings at one time.
7/21/2020 11:19:30	Tracie	Betz	Parent/Teacher	Quinter	We currently have no active cases and have had a total of 2 cases. We need to be in school ASAP as we may not continue to be that lucky. Our students/children need structure, to be able to build a relationship with their teachers, be with their peers and participate in activities. They NEED this for their social emotional health. I have seen the social emotional needs increase with my own children throughout this situation. Having school with some safety provisions provides students with a safe, consistent and positive environment!! If we don't start until after September 8, that will be almost 6 months of not being in a school building! As you know, schools provide so much more than just academics!! I am a special education teacher and the gap I work so hard to close will only continue to widen if we wait an additional three weeks. And who knows if we would even be able to start then, there's a chance we could have an outbreak here and still not be able to be in the school building. That's another reason we need to start ASAP; so that children can begin to develop relationships which will be imperative if we have to go to distance learning again. I appreciate the opportunity for planning with a late start. However, a district the size of mine does not need three weeks to prepare. Local control will give us the flexibility in determining what is best for our students, staff and community!! Thank you for asking for our input and representing us on the state school board!! You are appreciated!!
7/21/2020 11:19:40	Linda	Smith		Independence Kansas	In my opinion our schools need more time to work on reopening. Protection supplies need to be provided to all districts. As a parent of two teachers I am as concerned for their safety as I am for the students. With the surge of cases in our state we can't think of moving forward next month. Too many precious lives at stake.

7/21/2020 11:19:47	Amy	Theiss		Shawnee	<p>Please consider excluding small schools from this order. Small private or public schools with small class sizes have significantly less exposure and risk than a bigger school. Consider also, that the entire state isn't in the same situation. A rural Western Kansas school and an Urban Eastern Kansas school will have different risks and benefits when it comes to safely dealing with educating our students in a school environment. There should not be a "one size fits all" solution to this school year.</p> <p>I would also ask that if you do agree to delay the start of the school year, that you please allow sports (especially outdoor) to begin. Many of these children have already begun practicing for their fall sports. We've seen club and recreation sports continue throughout the summer. It would be beneficial for school teams to be able to play just as the club and rec teams have played these past several months. It is in our student's best interest to be able to interact with their peers in safe ways.</p> <p>Thank you for your time and consideration. I acknowledge what a tough decision this is for you all and we appreciate your service and consideration of our students overall well being.</p>
7/21/2020 11:19:50	Renee	Miller		Hutchinson	<p>Please listen to the Governor and keep schools closed until after Labor Day at least. We have to keep our teachers and our children safe! Now is not the time to be sending anyone out into gatherings! This virus is still uncontrolled in Kansas! It's not safe yet!! My daughter is a teacher and I have 7 grandchildren who go to school. I feel like it's until this virus is controlled it's not safe for any of them to have to be putting themselves and their families in jeopardy. We have to protect all the teachers and children as safe as possible. Please listen to Governor Kelly!!!!</p>
7/21/2020 11:19:53	Alicia	Cameron	My Children	Wichita Ks	<p>Please stay closed till after Labor Day and Please do online classes till it is truly safe to go back to school. One life lost to virus is to many.</p>
7/21/2020 11:19:53	Rochelle	Tramp		Lawrence	<p>Please allow students to continue their sports workouts with the proper protection they have been using. It is important for kids to be able to get back in the classroom as well. Please open schools and in person learning. Those that don't feel comfortable should have an online choice. Many students want back in classrooms. Can teachers wear masks and social distance.</p>
7/21/2020 11:19:54	Wes	Lewis		Lenexa	<p>I am the parent of an 11 year daughter, who will be starting middle school this coming school year, and a teacher in a district in which I have been serving 5 different school buildings. My daughter loves school and her teachers, even aspiring to be a kindergarten teacher someday. She wants to return to the school building, make memories with friends, and open the next chapter of her K-12 education. I am a 5-12 band director in a 5A urban school district and have large class sizes, in some buildings over 100 students at a time. The growth and development of my students means the world to me. I love giving these students the opportunity to travel and have experiences that they would otherwise not receive. All of that said, the current rate at which new cases are being reported in our state, and specifically in our area, is incredibly troubling. Health department officials are urging us to delay the opening of school buildings and I believe that we should heed their warnings. While the developmental concerns of our students not being in the school building are valid, the safety and physical health of our children, faculty and staff should take a higher priority. Please uphold the governor's executive order and postpone the beginning of school to allow Kansas necessary time to prepare for the coming school year, enact safety precautions and plans, and slow the spread of the virus as we had done months ago.</p>
7/21/2020 11:19:58	Jenny	Skillman	Public school parent	Lawrence	<p>Please vote to APPROVE Governor Kelly's order to delay the start of school. While districts may ultimately approach education delivery differently based on local circumstances of the pandemic, Kansas AS A UNIFIED STATE needs this time to try to slow the covid spread and for educators to appropriately prepare for what is certain to be a challenging school year. Thank you for your service.</p>
7/21/2020 11:20:11	Stewart	Trowbridge	None	Lecompton	<p>Please don't ignore the science and the numbers. Delay the opening of schools and protect the students and the staff.</p>

7/21/2020 11:20:24	Sara	Meyer	Parent	Menlo	My children attend USD 412 in Hoxie, KS. I do not believe that the school year for Hoxie should be delayed. The state of Kansas is very diverse and it is wrong to make an order for the state across the board. Communities and schools in northwestern Kansas greatly differ from eastern Kansas. I truly believe that children need to attend school in the classroom. The last weeks of the 2019-2020 school year were really hard for my children and I, and I believe they did not get the quality education that they could have by staying in school. Even though I think all children should get to go to school this August, I do understand that some districts are having more issues with COVID than others. Therefore it should be left up to the school districts to decide as they know their communities and students better than the Governor does. Delaying the school year will only compound the mental, emotional, and educational issues that have already taken place upon my children. Thank you for your time: Sara Meyer 107 F Ave Menlo, KS 67753
7/21/2020 11:20:25	Tanner	Cadwallader		DeSoto	Do not start school due to the high number of cases in Johnson county. Please give children and families a chance.
7/21/2020 11:20:25	Brian	Vulgamore	Vulgamore Family Farm	Scott City	We need to open schools and have sports at their normally scheduled time this fall. We have learned that Covid is not a threat to young people. Poor and disadvantaged kids will be hurt the most by delaying school reopening. They Have already been out of school for nearly 6 months.  Continuing to live in fear is causing much more damage to our country than the coronavirus could have ever caused. We have to stop this nonsense and get back to living life normally! Our country can't afford this any longer. It will take some strong leadership on the local and state level to go against the Governor. I hope you are willing to step out.
7/21/2020 11:20:27	Lisa	Terrell	USD204	Linwood	I do not believe, with Coronavirus numbers higher than they have ever been since this global pandemic started, that this is the time to become aggressive in our approach to reopen schools. I truly believe that you will be putting the lives of students, teachers and staff at risk. The lives of every student, teacher, custodian, para and other staff And their families rest in your hands.
7/21/2020 11:20:29	Holden	Kraus		Ottaws, KS	i am a teacher in Lawrence Public Schools. Delaying the start of school will allow local districts time to develop, supply, and implement safety plans in accordance with the Navigating Change document release last week and the Governor's EO released yesterday.
7/21/2020 11:20:42	Scott	Petry	Teacher	Lawrence	Schools need time to ensure safety all around. Do not open schools until it's safe to do so.
7/21/2020 11:20:44	Amanda	Eilders		Saint George, KS	Please leave these decisions to the local school boards! Each community can decide for themselves, based on spread and risk factors. For instance, we have zero current hospitalizations in our county - and zero deaths. It has been this way for us for quite some time!
7/21/2020 11:20:45	Leia	Anderson		Shawnee, KS	I would like to see the start of school delayed.
7/21/2020 11:20:46	Christine	Workman	None	Concordia, Kansas	Please start school at home, then check health department as to when to open!
7/21/2020 11:20:47	Ben	Phelan	Lawrence	Lawrence	Please uphold governor Kelly's executive orders to delay school until September
7/21/2020 11:20:48	Brooke	Leahy	Aunurn-Wahshvurn USI	Topeka	Please vote YES to the Governor's EO! We teachers need time to plan, redesign, and incorporate the KSDE guidelines and our district expectations. This cannot be done in a week's time. Also, the extended 3 weeks will give us time to see how other state's reopenings go and what their numbers look like after the first few weeks. I feel our Governor gave recommendations to Kansas citizens and those went ignored. We are woese off now more than ever. I support Gov. Kelly in her efforts to keep Kansas Schools safe!
7/21/2020 11:20:53	Jenna	Fiala		Wichita	We need to get kids back to school, and get them as much class time as possible before the seasonal flu season starts. Things are not going to be much different by September.  Expecting children under age 10 to wear a mask is unreasonable. They are going to be constantly touching it, their face, and licking it from inside.

7/21/2020 11:20:58	Katlyn	A		Haysville	<p>I am a teacher and a parent. I live in Sedgwick County but work in Sumner country. Both areas are seeing rapid growth in cases. Please support Governor Kelly's order. As a teacher, I feel that I need the additional time to prepare my lessons and curriculum to adjust to the recommendations and create adaptability. We need to gather needed supplies and train staff on proper protocols.</p> <p>As a parent, I am scared as cases rise that either my daughter or I could infect my high risk mother who lives with us and is my child care provider. I would like to see cases decrease consistently before we resume traditional instruction.</p> <p>Kansas has become an example of one of the worst states in terms of rapid growth. We are better than that statistic. As a state, we can still flatten the curve, but we need time to do that, as well as our leaders and citizens making the right choices, even if they are tough. This is the socially responsible decision. Please vote to delay schools. Kansas Strong.</p>
7/21/2020 11:20:58	Roxanne	Hicks		Lawrence	<p>When you vote tomorrow, please consider the students and what they need. The high schools have done a great job with all the protocols in place and teams need to keep practicing even if school isn't in session. After being cooped up for 5 months, kids need to be able to get back into a routine. Make a decision thinking of their mental health, physical health, and their sense of community with their peers. Sports and extra curricular activities are much more than a trophy or a status, its belonging to something much bigger, it's a family of friends. School and friends is their life right now, it is very important to them. Right now, they are the only ones who don't have a voice. Please let them continue to practice and condition even if school doesn't start until after Labor Day.</p>
7/21/2020 11:20:58	Michael	Comer	My Family	Shawnee	<p>My family and I are strongly in favor of returning our kids to school and in-person learning as soon as possible. Agree on requiring face masks in schools and rotating teachers and not students. Our future is dependent on our kids education and some kids (mine included) will not take online learning seriously and my wife and I both have full time jobs. If kids stay home, they will end up spending time together anyways. Look at end of last year and entire summer, kids are hanging out together anyways. Giving 3 extra weeks does nothing. My wife is school nurse and the districts sound like they are already prepared to open the schools. I would guess that Dr. Lee Norman would say that nothing will likely change in regards to COVID-19 in those 3 weeks unless we do a complete shut-down or have a vaccine, which both sound unlikely. Let's protect our kids education and get them back to school and declare Teaching as an essential service. In my opinion teachers are more essential than many other trades that are still working.</p>
7/21/2020 11:21:08	Troy	Blasi		Wichita	<p>I do not feel delaying reopening is appropriate. These kids need structure back in their lives. The risks for mental well being are more detrimental with more delay than risks of Covid-19. They have been out of school for far too long. I am fine with requiring masks but let these kids start school on time and get back to school activities.</p>
7/21/2020 11:21:10	Kara	N	Parent	Hamilton	<p>As a parent, I am torn on what is "right" or "ethical". These children need to be in school. I am college educated And a daughter of a retired educator. I am in NO WAY qualified to educate my children properly. I feel that my kids have already missed out on adequate education after schools shut down in March. The virtual was a joke! One child's teacher was active in doing something virtually and my other child got to listen to the teacher tell another guardian how to work zoom. For 2 months!! There was no "teaching" going on. My oldest will be second grade and it was hard enough teacher 3D and 2 d shape concepts. Schools need to reopen, with adjustments. There's no way my 5 year old will leave a mask on. It can be attempted, but will it stay on all day? Proper hand washing, hand sanitizing. We live in a small school district that has SMALL class sizes (most less than 10 students). Proper social distancing can happen. Maybe school nurses and county health nurses need to start pushing cleanliness again! Our district has no in house nurse and I can count on one hand the amount of times the county nurse has been involved with the school since my kids have been going.</p> <p>I get that this could be an issue With close contact of kids but we can't live in fear. Virtual school is hard for rural kids who don't have the resources not access to internet. Especially in our area.</p>
7/21/2020 11:21:19	Jessica	Sherman		Overland Park	School, no masks
7/21/2020 11:21:26	Trevor	Cadwallader		DeSoto	Please no school to help protect children

7/21/2020 11:21:26	Rita	Lungwitz		Wichita	Please open schools on schedule in August. We must get back to some sense of normalcy and rhythm. I ask God to guide you as you make this decision.
7/21/2020 11:21:29	Katherine	sanneman		Wichita	I don't think delaying school makes sense. The death rate in Sedgwick County is almost 32 and hasn't increased with the rate of positive cases.
7/21/2020 11:21:30	Karla	Viranda	Teacher in USD 506...	Parsons	Please support our governor. As a teacher, I would love to be able to go back sooner. With that being said, I feel we should not take the risk of going back on original date. I ask you to help keep us teachers, students, and support staff safe. We are very concerned, and our morale will be gone if we are not listened to. Thank you for your time and dedication to education. You are very much appreciated.
7/21/2020 11:21:43	Ryan	Essman		Grantville	Delay the opening of schools to give them time to prepare to have the kids in school.
7/21/2020 11:22:04	Donnita	O'Guin-Spickler	Shawnee Mission School	Overland Park	If the school districts and/or the Kansas State Board of Education decide that we need to go back to in-person school in August or before the COVID-19 cases are showing little to no cases within a 2 week period, are they prepared for the possible ramifications? Will the districts or the state pay for teachers, nurses, specialists, staff and students medical bills (not paid by insurance or for the uninsured), time off when our accrued time runs out. Will they pay for the funerals of teachers, nurses, specialists, staff and students? This virus could be devastating for some individuals and families financially and emotionally. Remember, when a person is hospitalized they can have no visitors due to the virus. A person can die in the hospital and never see their family. This virus is not like an illness that you may or may not get. It doesn't have a vaccine yet that can immunize at least a good portion of the population. This virus is in pandemic proportions that we are all likely to get. Because it's so new we have little knowledge of the symptoms and effects on each individual person. We do know however that people can get very ill and can die. Some individuals of all ages have been hospitalized for weeks. This can cause a huge burden on families. Sending students, teachers, nurses and staff back to the classroom at this point when this virus is out of control is irresponsible and could be devastating.
7/21/2020 11:22:06	Nathan	Rewerts	Personal	Topeka	Open schools now!
7/21/2020 11:22:07	Raven	Lauber		Great Bend	By no means should this extend out any farther than it already has. Our children need to be back in school and have the structure that school offers. They've already missed out on so much. Please do not prolong this any farther for our children's sake.
7/21/2020 11:22:16	D	Kornfeind	Parent/Taxpayer	Leawood	Our kids need to go back to school! My son, who is diagnosed with learning disabilities, developmental disabilities, ADD, OCD, and anxiety did not receive Special Education services, that are mandated by the state of Kansas, from March until May. For 3 months, he struggled with completing his assignments and did not understand them since he didn't have a Paraeducator in his reg Ed class or additional help in the resource room. He had to learn a new way of learning since it was online and also had difficulty even trying to figure out how to get his online assignments and tests. I spent several hours with his teachers trying to figure out how to make this work for him. His teachers are top notch, especially Mindy Kochuyt, and they deserve the highest praise for working with all of the families whose kids receive these services. He is just one child that receives Special Education services, and many parents that I talked to were in the same boat as we were and were so frustrated. I understand that school needed to temporarily close to keep everyone safe. But now, as the start of school is approaching, I'm afraid this is going to happen again. My daughter is at the opposite end and is in all honors classes and she did get her work done, but said it was busy work. In addition, the students were told their grades could only improve, but not get any worse. So that's not a motivation for kids to complete their assignments. In my opinion, education is of most concern to me. However, sports and activities are important as well. Here kids feel accomplished, feel part of a group, feel needed and important. Please consider kids starting on time this school year. I understand there are positives and negatives to both situations, but the detriment of kids staying at home outweighs the low cases of COVID. Thank you for listening!
7/21/2020 11:22:16	Lynne	Lundberg		Manhattan	Please delay - it gives a chance for the masks to help control the virus and for schools to develop their plan.
7/21/2020 11:22:22	Lindsay	Hamblin	Parent	Goddard	Please delay the opening until it is safe. As a mom of an immunity compromised child, going to school full time at this point is extremely terrifying.

7/21/2020 11:22:24	Linda	Mitchell	usd 335	Circleville	I hope and pray all of you on the Kansas State Board of Education will consider postponing school. Please support Governor Kelly's executive order: 20-58
7/21/2020 11:22:30	Penny	DeBaere		Topeka	I believe that delaying the start of school allows schools to obtain the supplies they need to keep students and staff safe.
7/21/2020 11:22:32	Christal	Davis	Parent	Dighton	I don't want to wear masks it should be a choice!
7/21/2020 11:22:33	Amber	Weve		Kiowa	I work with Special Education students. My students need to be in the classroom when the school year starts again. They are already nine weeks behind due to the school shut down in March. These students are unable to flourish in an online learning environment. If we do not return to school this Fall, I am afraid my students will not pass this school year.
7/21/2020 11:22:33	Pam	Kelly	Retired teacher	Overland Park	Please delay schools opening until there is a vaccine!
7/21/2020 11:22:37	Jill	Nolkemper	Parent at Blue Valley Sc	Overland Park	Please delay school opening. It is not safe right now and schools need more time to prepare.
7/21/2020 11:22:38	Amanda	Porter	Topeka 501	Topeka	As an educator, I appreciate the concern and support Gov. Kelly has for the safety and health of our students and staff. I fully support the EO signed to delay school until after Labor Day and urge you to sign. It is in the best interest of our students and staff as well as our community to allow more time for our state to flatten the curve so that we can safely open schools. Allowing a few extra weeks for this will go a long way in ensuring the safety of citizens across the state. Thank you.
7/21/2020 11:22:40	Shana	Stephens		Wichita	Postpone, our children deserve to be safe and teachers and staff do too.
7/21/2020 11:22:42	Gwendolyn	Macpherson	self	Lawrence	Keep schools closed until after Labor Day, and maybe even longer. Keeping schools closed will help reduce the spread of the novel coronavirus, and reduce the incidents of COVID-19. This pandemic is not over, and will not be under control unless we stay the course.
7/21/2020 11:22:42	Megan	Doffing	Lawrence Unified Schoc	Basehor	As a public school educator in a fourth grade classroom I am worried about many various aspects regarding what education will look like this year. One thing is certain we are not ready to open. We are not ready because we have not had enough time to plan for whatever method of schooling we will be doing (virtual, hybrid, or in person). A definitive answer has not been given and we are now down to two weeks before teacher's have to return. THIS IS NOT ENOUGH TIME TO ADEQUATELY PLAN AND PREPARE! THIS IS NOT ENOUGH TIME TO BE ADEQUATELY TRAINED TO RETURN! This is also not enough time to order and implement all safety equipment and guidelines. This three weeks will provide the time for all of that. We know that it is best for students to be in school, as a teacher in a title I building, no one knows that more than us. Virtual learning was not equitable for our students. However, as educators we know we would make this shift again if it was best for students, but we need MORE TIME to improve upon what was implemented last year, and refine it so it is BEST FOR STUDENTS. Lastly, it is NOT SAFE to return to school for both teachers, staff, and students. My life is important, and my life has value. Please do not continue to reinforce the "do what is best for kids" mentality. We matter too! Let's steer Kansas in the right direction, politics aside...
7/21/2020 11:22:47	Lacey	Chalfant		Atchison	I am not for the delay of the school year completely. Start school as normal but do so in an online capacity as we finished out the school year in. Children don't deserve to lose out on their summer next year in addition to the summer they already lost out on this year.  In addition I also do not agree with requiring kids to wear masks they are proven to cause more harm than good because of the fact you are not getting the oxygen you need and are just breathing back in the same bacteria that you exhaled.  Allow the kids and their parents to decide if they want their children in the class room or learning from home like Missouri is.

7/21/2020 11:22:50	Nancy	Hammond		Overland Park- go to Ok	<p>I fully support of Governor's Kelly's executive order to delay school opening until September. I have 2 children who attend Olathe public schools who will be entering 4th and 7th grade this year. I am also a physician. With the rising case rates of COVID in our area we must take practical steps to reduce community spread. One of these steps is keeping schools closed. I understand that this is not convenient for parents who work outside the home, including myself. COVID response should not be a political issue. It is a public health issue.</p> <p>This has been a trying time for Kansans and I understand there are numerous opinions about what the best course is regarding schools. I urge you to listen to public health officials and their recommendations. These dedicated people have been studying ways to mitigate an infectious disease and keep the public safe for their entire careers.</p> <p>The SARS-CoV2 virus that causes COVID is so new we do not yet know the full scope of how it spreads and what the long term consequences of infection will be. People are dealing with symptoms for months after getting sick with this virus.</p>
7/21/2020 11:22:51	Marilyn	Breitenstein	Grandparents	Shawnee	We fully support both of Governor Kelly's executive orders to delay the start of school and to mandate masks and other safety measures.
7/21/2020 11:23:04	Jacque	Schwarz		Olathe	We were not in agreement with the governor announcement yesterday and feel like it is a misuse of authority.
7/21/2020 11:23:04	Breana	Urrutia		Emporia	How can we expect children to attain 1000+ hours at home in front of a screen if they have to transition to online? How are we protecting our teachers? Are teachers getting hazard pay for being exposed? How will we make sure children are still having a positive education? Will there be more mental health services available?
7/21/2020 11:23:05	Lisa	Loeppke	my kids	Lakin	Let our kids go back to school normally. You are causing more health and mental concerns the more we delay school and activities for the kids. No masks!!! Unless you feel safer having one. I am so done with our Governor thinking she has the right to make our decisions about our lives and health. Our kids need to have some normalcy. They have been swimming, baseball, basketball, summer weights already and are fine so let them get back to school
7/21/2020 11:23:06	Sheila	Vander Tuig	East Central Kansas Cod	Baldwin City	My husband is a high risk if he contracts the virus. I would like to see a delay for school to start. In my opinion, we are seeing a big rise in the number of cases and we need to allow time for the virus to slow down. I think delaying school starting until after labor day would help us achieve this and keep everyone safer.
7/21/2020 11:23:12	Barb	Muench	Self	Emporia	<p>I am a youth director at a church. We have been waiting for decisions from the school to help guide us on fall programming. As much as I want to get back with my youth, I think it is critical we do so in a safe way. Delaying the start of school gives everyone involved more time to work through the huge amounts of details required to do this safely. As we are dealing with many of the same issues (on a smaller scale) I do understand that many factors go into these decisions. Physical, mental and emotional safety all need to be considered. There is not a perfect solution and that is stressful everyone. I strongly disagree with overturning the governor's decision to delay the start. Students, teachers and parents have all been through enough changes and ups and downs. Another change and the uncertainty that would come with putting this decision back in the hands of counties or districts is not what anyone needs. Allow our governor to lead. We were in relatively good shape when that was happening. A delayed start just allows us to do things better.</p> <p>Thanks for your work on this issue.</p>

7/21/2020 11:23:13	Amy	Maddy	I am a parent of 2 children	Chanute	I am in favor of schools delaying opening until after Labor Day. With the increasing number of cases, I think this is a necessary measure to keep students, teachers, and school staff safe and healthy. I do not think schools need to do online only as we did in the spring; that was not helpful for either of my children. And while I feel teachers and staff did the best they could with what was thrown at them, I think overall it was a flop. I also think that if schools delay opening and all Kansas districts start on the same day, then all districts should end on the same day as well and school should end before Memorial Day (and ONLY go the number of days required by the state). Our school district starts earlier than any other school in our area and ends AFTER other area districts that start later than ours (and we go more days than what is required). In the midst of this pandemic, the 2020-2021 school year will not look the same as a typical school year and I think everyone just needs to realize that. Once the number of cases begin to level out or decrease, then we can go back to a more normal school year. However, this is not the year to go back to "normal." Let's think of the best interest for our students, teachers, and staff. I believe that Gov. Kelly's Executive Order 20-58 to delay the start of schools is in the best interest of students, teachers, and staff, and will allow for everyone to be prepared for what this school year will bring with masks, social distancing, extra cleaning, etc. Please do the right thing and delay school opening, while also mandating a set end date for all Kansas school districts that doesn't have anyone going to school after Memorial Day.
7/21/2020 11:23:13	Lanea	Losson	Parent	Carbondale	I ask that you keep schools closed as long as possible. There is more and more research coming out that there could be lasting effects in children, and I fear for our teachers and support staff. The more time we put between this virus and knowing more about it, will be critical to the health of all.
7/21/2020 11:23:13	Stacie	Adams		Lecompton	<p>Delaying the start of school gives districts (teachers) the time they need to open the doors in a safe way AND be ready to focus on social-emotional needs as well as education. Not all districts have been communicating with teachers over the summer. We need this time to get up to speed so that we are not "flying blind" at the beginning of the year.</p> <p>With the delay include a timeline for when and what districts should have in place, of you feel we must be held accountable for that time. Do NOT throw us in to the start and then be angry, disappointed or surprised when the number of COVID cases in teachers is greater than the number of subs available for a district.</p> <p>Stand-up for what is right! Parents and teachers alike want to get back to school - but there is a safe way (safer way) and then there is ignoring the science and tying our hands.</p>
7/21/2020 11:23:15	Rebecca	Funke	self	Goddard	Vote to delay! Delay the start of school for the health of the greater community
7/21/2020 11:23:16	Larrah	Bills		Salina	As an educator, my students' safety and well-being (physical, emotional, and mental) is always at the center of my work, regardless of all circumstances. I can't fathom bringing my students, whom I love so deeply, back into school buildings before health officials, school personnel, and families know exactly what procedures, protocols, and practices will be successful in keeping students and school personnel healthy and safe. By upholding this order, you will be allowing school districts to gain extremely valuable time to fine tune plans surrounding student and staff safety, provide educators the opportunity to begin to understand the ins and outs of what will be required of us and how we can still let our students know we care about them while having new guidelines that may be scary for them to see and experience, and give schools the opportunity to give ourselves a fighting chance in successfully loving and teaching our children this coming school year. While tensions and anxiety is running high for all, and decisions are increasingly difficult to make, please know that by upholding this order and giving schools the gift of time, you will be making the difference between what could be a very scary and life-altering year for students and school personnel versus a different, sometimes difficult, but SAFE and fruitful (emotionally, mentally, academically) for all.
7/21/2020 11:23:31	Erin-Louise	Chapman		Gardner	While I agree that we need more time to prepare for school in the area that I love and teach in, I think that individual school districts should be able to make that decision individually.

7/21/2020 11:23:40	Alison	Jack		Goddard	Please uphold Gov. Kelly's executive order. I am a public school teacher, and I believe that this delay will give us a chance to plan and perhaps hold school safely with some sort of in-person component. If we rush this, there's a possibility that we will end up with fewer overall days of in-person instruction, or perhaps no in-person instruction at all this fall, because we will have to backtrack. Please don't risk my health or the health of my family or students.
7/21/2020 11:23:45	Lindsey	Roberts	USD 483 teacher and pa	Plains	Delay start of school until after Labor Day
7/21/2020 11:23:50	Jessica	Stoll	Free State Football	McLouth	As a State, we have a long list of many talented and decorated programs that exist both in and outside of the classroom. Many students are allowed the opportunity to stay mentally engaged in order to return to the classroom with consideration to the delayed start to the school year. Each student is owed the same consideration outside of the classroom. They take immense pride in representing their school and State. I urge the consideration for ALL fall activity workouts and practices, even with the delay of the school year. In order for the student athlete and student participants to be ready to compete, it is critical they have practiced and are physically and mentally prepared. I ask this in support of sports, marching band and any other school organization. Let's please keep our students engaged and allow them the opportunities to prepare; regardless of when in-class attendance would begin. Thank you for your consideration.
7/21/2020 11:23:55	Sharon	Graves	N/A	Lawrence	I see no problem, and many advantages, with delaying the start of school until after Labor Day. It is ridiculous to rush kids, teaches, staff, etc. back without the proper PPE and with the virus out of control. You are even having this meeting by video conference, not in person! How do you think that makes teachers feel when you don't want to do in-person sessions. Let Governor Kelly's order stand and stop making this a partisan issue. This is a health issue. PLEASE delay the opening of schools!
7/21/2020 11:23:56	Keri	Welch	Burlingame Jr/Sr High S	Burlingame	Please delay the start of school until after Labor Day
7/21/2020 11:23:56	Raegann	Berger	Lawrence Free State Hig	Lawrence	I'm sympathetic to the need to delay school, but please don't shut down out sports conditioning. Sports has given my son the structure he's needed during an uncertain time.
7/21/2020 11:24:15	Greg	Vogrin	Parent of a 5th and 8th g	Lenexa	No, do not delay start. Continue with normal school year. Do not force virtual learning. Leave virtual learning as an option for those who are concerned about sending their children to class.
7/21/2020 11:24:15	Tim	Watta	Parent in USD 450	Topeka	It is in our students best interest to return to school full time and in the classroom.
7/21/2020 11:24:16	Laurie	Pieken	parent and educator	Overland Park	Please support this!! Allow schools the time to open safely!
7/21/2020 11:24:18	Rachel	Pickering	Parent USD259	Wichita	We feel it is safe for our children to return to the classroom in the traditional fashion.
7/21/2020 11:24:30	ANDREW	LONG	LONG FAMILY HOUS	CHERRYVALE	PLEASE DELAY THE OPENING OF SCHOOLS FOR THE SAFETY OF OUR TEACHERS AND CHILDREN. THE LAST i CHECKED TEACHERS DON'T MAKE ENOUGH AS IT IS.
7/21/2020 11:24:35	Terri	Stein	Olathe School District T	Lenexa	As a highly committed educator, I 100% support the delay of school until after Labor Day. This will allow a little more time to see if COVID cases will begin to decline once again. If not, I support virtual learning. Not only is there concern for students, but many live with extended family or grandparents. I also share concern with many colleagues over the safety of staff. Any death is another too many and the long term effects of the virus are still unknown. Thank you.
7/21/2020 11:24:48	Kristine	Wesner	Washington Elementary	Olathe	school needs to be postponed until we have all the necessary PPE to do so and we can do so safely! I am a Para and who has a high risk condition and I am afraid to start back currently with the cases in the rise. Please think about the safety of everyone involved and go for a later start date or remote learning. I MISS the students I work closely with on a day to day basis but in order to do do my job efficiently I need to feel safe! Right now people are pushing for a September start date. Please do not make me choose between doing what I love and staying home with my children cause cases are rising in Kansas. Politics have no business in school !
7/21/2020 11:24:50	Sarah	Barnett	Emporia high/a parent	Emporia	I feel you should delay school or have students to remote learning with just the core curriculum.
7/21/2020 11:24:56	Baylee	Wisley		Wichita	I think delaying is the correct choice and that starting online makes the most sense to protect the kids and teachers
7/21/2020 11:25:02	Anita	Christian		Hutchinson	I strongly support the governor's executive order delaying the start of school.
7/21/2020 11:25:06	Seana	Kimzey	High school sports	Lawrence KS	Allow high school sports practice when school is not in session. These kids need outdoor activities and the feeling of team.
7/21/2020 11:25:17	Diann	Criss		Overland Park	I would like to see schools open and have students in class

7/21/2020 11:25:22	Becky	Good		Beverly	Essential workers-grocery store workers, truck drivers, people who work in manufacturing businesses, nurses, doctors and the list goes on and on. These essential workers go to work every day and have been through this entire pandemic and schools should be no different. They are essential to our kids just like the workers mentioned above are essential to adults. Parents know this and pediatricians are advising that kids need to be in school. The alternative is far worse than the pandemic. These other businesses have figured out ways to keep employees as safe as possible and there is no reason schools should not be able to do the same. Online classes for young children are ineffective. Kids struggle to maintain focus online. The world isn't a safe place, but that doesn't mean we stop living. It means we take as many precautions as possible and we push forward. No one is guaranteed tomorrow and we can't let fear control the world. We need to open schools. Thanks!
7/21/2020 11:25:23	Nicole	McBee	USD500	Merriam	As much as I want to be in the classroom, we are NOT in a place to safely do so. Other than teachers and students, this decision effects our students' families, custodians, bus drivers, secretaries, school nurses, instructional aides, nutrition service workers, and the list goes on. Their safety is important. I am HIGHLY concerned the safety protocols necessary to open school are not currently feasible. On a regular day, pre-pandemic, disinfectant, Kleenex, and sanitizer were provided by me or students' parents. Now those items are hard to access, and I can't fathom asking teachers to provide all this repeatedly during a pandemic. Until there is a clear, FUNDED plan, we CANNOT physically open our schools.
7/21/2020 11:25:24	Kenneth	Jack	Davis & Jack, LLC	Goddard	Please vote to accept the governor's order to delay the opening of school. Overturning the order would produce chaos, uncertainty and acrimony, and could well result in tragic health consequences, including deaths of students, parents and staff. This is a serious, worldwide health crisis, and we all need to do our best to protect each other.
7/21/2020 11:25:29	Andrea	Humerickhouse	Manhattan Catholic Sch	Manhattan	I feel that the delay of school opening may be necessary to allow the state time to get case numbers back under control as I know Mahattan's numbers began a steady increase after the Memorial and 4th holidays and lessened restrictions. While I do not want the delay, I feel reopening prematurely could cause a huge spike and puts our children at risk.
7/21/2020 11:25:35	Sean	Lange	USD232	De Soto	As much I would love for our kiddos to get back to school I fully support the decision to delay in person schooling for as long as needed to provide as much safety for the students and faculty. This pandemic too shall pass.
7/21/2020 11:25:34	Jennifer	Miller		Mulvane	I just think that if we aren't allowed to gather in large gatherings in the state of KS then we shouldn't be sending our students and staff into large gatherings in school buildings. My sister is a nurse and Kansas and went over and beyond with precautions - and yet she ended up catching this virus anyways. I worry what might happen if an outbreak occurs in a school.
7/21/2020 11:25:48	Kim	Barnett		Colby	Please open schools back up in August. The kids have been out far too long. The case numbers in counties in our part of the state are so low that the risk does not outweigh the benefits of reopening. Please do not allow the governor to make one decision for the entire state! Our situations are all unique. We can do this safely!
7/21/2020 11:25:54	Shaphan	Staats		Pratt	Please do not delay schools opening. . Mental health issues need to be addressed. Many children need school for their basic needs to be met.
7/21/2020 11:25:56	Allie	Bratton		Leawood	<b>DO NOT DELAY SCHOOL</b>
7/21/2020 11:25:57	Laura	Stumbo	Olathe Schools USD 233	Olathe	Please support Gov. Kelly's executive order to delay the start of the school year. I feel this delay is necessary to allow our school districts time to secure materials and to train staff on the safety measures needed to keep all persons safe within our school buildings. As a middle school teacher, I want to feel confident that school is reopening safely and can stay open!

7/21/2020 11:26:03	Tiffany	Stepien	Wichita	<p>Dear Mr. McIniece and Mrs. Hill,</p> <p>I am a mother of a childhood cancer survivor, and my husband and I work in healthcare in Wichita, KS. We are acutely aware of the dangers of COVID-19 as well as the risk to our family. Both my husband and I have master of health care leadership degrees from Friends University as well as more than 20 years in healthcare each. Please consider this letter in deciding the safety of Kansas schools.</p> <p>As of today's <a href="https://www.coronavirus.kdheks.gov/160/COVID-19-in-Kansas">https://www.coronavirus.kdheks.gov/160/COVID-19-in-Kansas</a> the trending rate of COVID-19 is up for Sedgwick and Butler counties, the counties that make up my daughter's school district in Andover, KS. Also, the hospitalizations in Wichita, KS hospitals are the highest they have been since COVID-19 began in our communities in March. I am concerned that opening schools in live classroom formats will be unsafe for children, staff and parents in our community. I am uncomfortable with large numbers of people gathering indoors due to noncompliance in mask wearing and the inability to stay 6 feet apart. This is a safety issue for our schools and our community.</p> <p>I do understand the American Academy of Pediatrics recommends children going back to school <a href="https://services.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/clinical-guidance/covid-19-planning-considerations-return-to-in-person-education-in-schools/">https://services.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/clinical-guidance/covid-19-planning-considerations-return-to-in-person-education-in-schools/</a>.</p> <ul style="list-style-type: none"> <li>• "Universal face coverings in middle and high schools when not able to maintain a 6-foot distance (students and adults).</li> <li>• Particular avoidance of close physical proximity in cases of increased exhalation (singing, exercise); these activities are likely safest outdoors and spread out.</li> <li>• Desks should be placed 3 to 6 feet apart when feasible.</li> <li>• Cohort classes if possible, limit cross-over of students and teachers to the extent possible.</li> <li>• Ideas that may assist with cohorting: <ul style="list-style-type: none"> <li>• Block schedule (much like colleges, intensive 1-month blocks).</li> <li>• Eliminate use of lockers or assign them by cohort to reduce need for hallway use across multiple areas of the building.</li> </ul> </li> </ul> <p>(This strategy would need to be done in conjunction with planning to ensure students are not carrying home an unreasonable number of books on a daily basis and may vary depending on other cohorting and instructional decisions</p>
--------------------	---------	---------	---------	--

7/21/2020 11:26:03	Russell	Swanson	N/A	Emporia, Lyon County	<p>While it's true that during the spring semester we had no idea how COVID-19 would affect the population, I believe we have sufficient evidence to conclude that, in general, K-12 students of good health and standing wouldn't be subject to any more danger due to COVID-19 than they were during a flu season in 2018.</p> <p>In regards to options that parents should be able to have with students who are immunocompromised or families that are wary of contracting the virus due to their immunocompromised nature, there should be hybrid options for student attendance to meet the needs of these few families. In general, this last semester has increased the usage of online tools by teachers that would allow such a hybrid classroom setup to be extremely easy to utilize.</p> <p>In regards to teachers and other educational professionals that are ill-equipped to deal with a possible infection and are therefore wary of coming to class, there should be options for them to organize and plan instructional activities with the implementation being done by qualified long-term substitute teachers. While not optimal, the in-person instruction and social interactions between students and a facilitator of instructional activities will have a greater effect on student success in the most diverse of family and socioeconomic student situations than remote learning would.</p> <p>Anecdotally, to help illustrate this point, I taught 6th grade science last year, and found that, with remote learning, the families who were invested in their child's education earlier in the year and had extra support were the students who had success in remote learning while, in general, those families where both parents are working and students are now babysitters and learners (which was a large percentage of my students) end up suffering because their home duties are now split between taking care of siblings and doing schoolwork. This performance was no fault of the students, but a result of taking away the access to food programs and activities for family members that would help these students focus more clearly on their individual educational growth.</p> <p>In conclusion, the psychological, social and cognitive ill-effects of isolating students ages 4-18 and substantially limiting their educational interactions will outweigh the ill effects from the inevitable contraction of COVID-19-not only this year, but every year as the instructional gap compounds. On a legal note, if this reaction to new and unfamiliar microbes (or any unfamiliar situation) becomes precedent, there will be no telling how often we will be coerced to shut</p>
7/21/2020 11:26:05	Charity	Huhman	Maize district	Wichita	<p>Please please please let our kids go back to school in August!!! I have 3 kids (11,13,15 yrs) and they are all begging to go back. They need to be with their peers, they need socializing, they need normalcy! They have been out for almost 6 months since this all started and I can see how the distance has started to affect them mentally. Kids aren't good with isolation, they need each other, they need IN PERSON learning. They need sports and extra-curricular activities to resume also, these activities help them belong, learn who they are, and gain confidence in themselves. PLEASE let them go back and vote against the governor!!! 🙏</p>
7/21/2020 11:26:10	Shane	Hipp		Garden City	<p>Schools need to be open. Kids need the social interaction with other kids and in class teaching to help them develop socially and so they have a true understanding of the lessons. Many parents will continue to struggle trying to work full time and teach their kids when they are not at work. This is putting a huge burden on teachers, parents, and kids. As long as the schools follow the CDC guidelines students and faculty will be safe. I base this on my experience with my employer as we are screened, sanitizing processes put in place, and the actions/follow up when someone may be having symptoms. The government should not have a say in this decision, it should be left in the hands of the school districts</p>
7/21/2020 11:26:09	Lauren	Burgess		De Soto	<p>Delay school as long as needed in order to keep covid-19 from spreading.</p>
7/21/2020 11:26:11	Maggie	Goldsborough		Prairie Village	<p>Please vote in support of Governor Kelly's executive order outlining school opening requirements. Kansas does not want to become another Florida where 31% of the children have contracted COVID-19 or have died.</p> <p>We must all do everything in our power to ensure schools are safe for students to attend. I live in the Shawnee Mission attendance area where all professionals are extremely concerned about our children's health.</p>

7/21/2020 11:26:12	Nicole	Galley	Olathe 233	Olathe	I support the governors executive order. I of all the exposure with the numbers so high. I am also very concerned how my son's HS will function with 1800 students in classes, arriving, dismissing and being on campus at the same time. Since a hybrid program is not an option in my district, there will essentially be gatherings of 1800 students 5 days a week. They're not enough bathrooms for kids to wash hands between classes, nor is there time. Since children do not get COVID as severe what measures are being put in place to protect the teachers? Businesses don't have meetings with more than a few people, yet schools are supposed to throw caution out the window cause kids need to go back. Please help protect my family. I work in an Elementary with all students in the building. Between the high school, middle school and elementary school my family will be taking on a lot of risk. Educators need the option to teach online. Just like families are able to chose online. Thank you for your time, Nicole
7/21/2020 11:26:18	Deana	Hagan		Pittsburg	I work at a hospital I believe covid effects people older please let our kids go back to school I've seen so many kids depressed going without food they need interaction with one another my grandkids all want to go back to school they can't do anything go anywhere please please open up there schools
7/21/2020 11:26:25	Madison	Nolt	N/A	Goddard	Delaying school or not will probably not matter, because waiting a few more weeks rather than starting early will not make a difference. The numbers will probably still be rising so it doesn't make any difference to start early or start late. No matter what someone is going to come in with COVID (staff or student) and the schools will have to shutdown again. Online school would be the best option until spring semesters. I'm currently a college student and we have to go back the 10th face to face and I'm just waiting for them to say someone has COVID and it will be converted back to online. I understand for the little kids not being able to do online school but I believe no matter what this will not be resolved until a vaccine and probably after this year.
7/21/2020 11:26:44	Justin	Goldsborough		Prairie Village	Please vote in support of Governor Kelly's executive order outlining school opening requirements. Kansas does not want to become another Florida where 31% of the children have contracted COVID-19 or have died.  We must all do everything in our power to ensure schools are safe for students to attend. I live in the Shawnee Mission attendance area where all professionals are extremely concerned about our children's health.
7/21/2020 11:26:47	Chelsea	Klahr	Holton USD 336	Holton	I support the delay of school starting to protect the ones that attend and work there.
7/21/2020 11:26:59	Kara	Jackson	USD 268	Wichita	As a teacher I support the late start. I think this will give our district time to plan for these new regulations and standards. Collaboration is going to be so important this year and we need extra time to do this. As a parent I don't feel comfortable sending my kids back to school when the covid numbers are so high right now.
7/21/2020 11:26:59	Tonya	Ragan		Olathe	I would like online options to start at the regular date along with sports and extra curricular activities.
7/21/2020 11:27:00	Philomena	Leo		Walton	Please support Governor Kelly's mandate. I work at USD 373. Please give administration, maintenance, and teachers have this time to make it safe to return to school. Hopefully the numbers will flat line by then and at least a hybrid will be possible. Thank you for looking at science before making this decision.
7/21/2020 11:27:03	Carrie	Crouse	Usd458	Basehor	Delay school opening for the safety our students, educators and staff. Everybody seems to think they are expendable. But they are not. They are somebody's child, somebody's mother, father, somebody's wife, husband. They are our family and they matter. Two to four more weeks for their safety is not too much to ask. It could be worth someone's life.
7/21/2020 11:27:05	Hillary	Emerson	Parent	Great Bend	I feel like this was a good decision for the health of our kids and educators. I was having a lot of anxiety, weighing my kids mental well-being vs. their (And mine and my husband and my parents) physical well-being in regards to in person school or home learning. The anxiety will come back as Labor Day approaches and the decision will once again have to be made, but it has been nice to "kick the can down the road" for a bit longer. Gov. Kelly has Kansan's best interests at heart and it's refreshing.

					<p>As a teacher and parent of three boys in Olathe Public Schools, I ask you to please follow Governor Kelly's orders. Our numbers are higher than ever, and my children and I would be exposed to thousands of students and staff every day. I want to get back into the classroom as soon as possible, but the lives of my children, students, coworkers, and family members are far too important. Putting all of these people back into large gatherings is irresponsible, and will only put us into a position to where we need to shut down again. I want to avoid another shutdown as much as possible.</p> <p>We work hard to provide the best education for our students. Our schools are not prepared for the guidelines required for large gatherings. Please step into a school to see how this will not happen safely. Our schools are already overcrowded. Our hallways are masses of children getting to their next class. It would be impossible to socially distance at this time.</p> <p>As Governor Kelly said in her news conference, this is not and should not be about politics. This is about protecting lives of students, families, and staff.</p>
7/21/2020 11:27:17	Lindsay	Blanchard	Olathe Public Schools	Overland Park	
7/21/2020 11:27:19	Lanette	Stegman	Pratt USD382	Pratt	Please follow Governor Kelly's Executive order to start school September 9th.
7/21/2020 11:27:21	Maria	Magdaleno	Usd259	Rose Hill	Delay school openings until safe for staff and students. I agree to wait until after labor day.
					<p>Here and thank you for reading this. I am Dan Pollitt, and I believe I am highly-qualified to speak to the issue of closing / opening schools related to covid. I hold a PhD from KU in special education, am a public school administrator in a large urban school in Kansas, father to three children ages 6 and under, and am deemed high-risk to an autoimmune disease. As a career educator, I care deeply about my 750 students. I am knowledgeable regarding their social-emotional well-being, economic needs, and home situations. There are few things in this world that I want more than to see my students and spend time with them. However, schools and districts are not equipped or provided the necessary resources to open and as such, should not provide in-person schooling until significant health metrics decrease. I urge this state board to carefully weigh the cost of human life--both child and adult--and realize that an endeavor to open schools at this moment is ill-conceived and will result in death. The board should hold steadfast until covid cases are both steadily decreasing and schools are properly funded to install trustworthy safety measures. My rationale is three-fold:</p> <p>First, covid cases, including the frequency and % of positive tests, are significantly higher today, July 21, in the state of Kansas than they were in March, when schools were initially closed. It is illogical to think that now is a safer time to open schools when in reality, it is less safe than ever. For instance, the study out of South Korea reported by NYT this week cites that middle school students transmit the disease as well as if not better than adults. Children are not safe from this disease--and they transmit it to adults and family members alike.</p> <p>Second, many schools are poorly funded and ill-prepared to be burdened with yet another "hat" to wear and serve as medical professionals. My school is poorly ventilated, includes multiple fake classrooms without windows, and already has difficulty funding things like copy paper and hand sanitizer. How will schools fund covid-related expenses?</p> <p>Third, the CDC reports that covid "spreads mainly among people who are in close contact (within about 6 feet) for a prolonged period". My school has lines for the restrooms, crowded hallways during passing periods, and includes &gt;200 students at a time during lunch. Most hours, we have zero empty classrooms or open spaces. It is not possible to educate students safely in the current environment.</p>
7/21/2020 11:27:21	Daniel	Pollitt, PhD		Mission	
7/21/2020 11:27:22	Suzanne	Yunker	Grandmother	Caldwell	Please consider delaying the opening of our schools until after Labor Day. I am raising my 12 year old grandson, and I am thinking of my safety as well as his.
7/21/2020 11:27:22	Mandi	Wilczek		Gardner	If delaying the start of school will make it safer for my children to attend school in person, then that is what needs to happen.

7/21/2020 11:27:23	Cheyenne	Bitts	Emporia State University	Emporia	I believe that this is a wonderful idea but I also think just doing online would be beneficial as well. The delayed start helps teachers prepare more to become more proactive in the odd times that we are facing and it also allows schools to gain some time in deciding how best to do things. Going to online for the semester or whole year is also beneficial because that will show less of a chance to infect everyone. And it will get things going a lot faster. If you have students in the school face to face setting, there is just going to be a lot of time delayed due to cleaning and sanitizing after each use, limiting classes/subjects or time for subjects, trying to limit the amount of things a teacher and student can do, and so many other things. Yes I know that most parents won't be able to stay home and monitor their children but for the sake of them and the teachers and staff, whom all go home to family, their own children, their parents, and then those people go somewhere else and could further pass something along, it is for the better sake of everyone.
7/21/2020 11:27:23	Carrie	Lieneweg	Parents	Kansas City KS	Yes, delay. There is not question we should protect lives of teachers and students. Delay.
7/21/2020 11:27:26	Nicole	Van Denabeele	Parent	Shawnee, KS	Please help us get our kids back in school, in person, 5 days a week. The AAP supports this decision and younger kids especially struggle with on-line learning. Our kids being home for this extended period is having a negative impact on their emotional and mental health and putting strain on our jobs. Our offices are expecting us to return full time in September. I have kids in K, 3rd, and 6th. My middle schooler will do okay with on line learning but my younger 2 will not. Linking opening our schools to a decline in cases is futile and arbitrary at best.
7/21/2020 11:27:41	Michelle	Gentsch		Lenexa	Please uphold the delay to start school. The districts have no way to do so safely and time is too short now.
7/21/2020 11:27:42	Ermagene	Kraft	Colby public schools	Colby	Our community has had minimal cases of covid and have banded together to keep this at bay...with the proper plans there is no reason our schools cannot start as normal. I can understand in larger areas with more exposure and active cases but we need to be looked at individually and not lumped in with these larger cities. Please consider overriding the governors mandate.
7/21/2020 11:27:47	Jennifer	Jewers Bowlin	Myself	Lenexa	As a parent of an elementary aged kid, please do not overturn the governor's executive order. I want my child to be back in school, but not until it is safe for both him and his classmates, but also all of the wonderful staff and teachers at the school. And frankly, it's not safe now, nor will it be safe in August. It's far better to give the kids a shorter winter break, no spring break, or extend when the school year ends than the needlessly send kids back to school sooner than it is safe to do so. Science doesn't lie, and we should be following the science in this matter.
7/21/2020 11:27:49	John	Hofer		Basehor	<p>I believe the KDOE proposed plan to allow the school districts the flexibility on their schedules and reopening strategies is point on. We know this is not a one size fits all for school restarts.</p> <p>I do agree with the governor that masks, social distancing, etc.. needs to be part of the schools plan. Basehor-Linwood has set a great example of this all summer long, as we have continued to host strength and conditioning for over 600 kids (2nd to 12th grade) both inside and outside. They have also continued with Basketball, Football, Soccer and Volleyball camps, practices and games. This activity has not lead to any surges in cases. They properly social distanced, wore masks when needed and sanitized properly.</p> <p>To my knowledge, 1 student athlete and 1 intern strength coach tested positive. Both cases were not traced back to any school activities. Once those cases were identified, due diligence was completed but the activities still proceeded, and kids continue to show up.</p> <p>We all know the benefits of going back to school and activities, our kids need it!! Delaying 3 weeks and possibly longer is not in the best interest of the kids. My family hopes and prays that you vote against the delay of school, athletics and activities.</p> <p>Thanks</p> <p>John &amp; Beth Hofer</p>

7/21/2020 11:27:50	Ivan	Madariaga	Citizen	Dodge City	Delaying schools makes no sense! I mean you're still requiring kids to have masks on just a different month. Also social distancing in these schools especially high school? I went to DCHS and I couldn't even move an inch without hitting someone else.
					<p>I have been writing to my school district as a parent to learn more about the learning options available to our family. I am writing to let you know that they are NOT prepared.</p> <p>School was supposed to open for us in 3 weeks, and they cannot describe what the online curriculum would be for our family. My husband and I cannot make a decision about where to place our children this year, because our district has not yet planned for next year. Our district and our families absolutely need more TIME to figure out a real plan with a real curriculum.</p> <p>On a related note, is there any way to mandate that students can homeschooled while being a part of the district? If for one semester or one year I wanted to homeschool my kids, could we still enroll and simply align our curriculum to their standards? It would allow me to start sooner rather than later and to fit the curriculum to my childrens' needs but also have access to resources and the advice of educational experts.</p> <p>Thank you. And I do not envy you the responsibility you have in such uncertain times. Keep doing the best you can for the kids in this state.</p>
7/21/2020 11:27:51	Lisa	Mahler	parent	Salina	
7/21/2020 11:27:52	David	Schwenk	N/A	Sedgwick county	Please follow our govenors order for schools to remain closed till 8th Thank you.
7/21/2020 11:27:56	Tara	Tiernan	USD 473	Abilene	Delay the opening of schools! I am the only school nurse for a district of over 1000 students in 6 different schools, our district is 550 miles wide. We do not have the resources or support staff in place to meet the demands/needs that will be required to start on time!
7/21/2020 11:27:58	Jennifer	Taloney		Overland Park	Please use science and medical data to decide the best time to reopen schools for in person learning. Please don't put our students, families, teachers and school staff in harms way for political theatre or pressure over child care. School starting later after virus numbers are done is a good compromise. Safety first for all decisions!
7/21/2020 11:28:00	Amanda	Winch	Parents	Overland Park	State board members - please uphold Governor's Kelly EO to delay the start of school. School districts need time to prepare and we need a chance to see a decrease in cases statewide. We are asking our school staff - teachers, bus drivers, maintenance, administration - to take incredible risk. We need to do right by them. Families also need the time to obtain some peace of mind that schools are doing their due diligence to open safely. Please consider those most vulnerable when making your decision and make the responsible and safe choice to uphold the EO. Thank you.
7/21/2020 11:28:00	Peter	Leyva	Teacher	Emporia	I support Gov. Kelly's order to delay school until September and the Surgeon general recommendation to wait until we have this virus under control before opening schools.
7/21/2020 11:28:01	Trisha	Delong	BV high school, BVN h	Overland Park	As a teacher I want to be back in person with my students. Virtual learning isn't working and school is more than an assignment. Middle school and teen students need connections in person with peers and teachers. It is more important at their age to development. Missing activities that give kids sense of self, teamwork and accomplishment and bring part of a team or activity provides valuable life lessons that aren't learned in a screen. Even kids in Johnson county are living in bad situations with school being their only escape. Please get kids back into school...teachers want this so stop letting the union vote for all of us.

					Individual counties and schools should be able to pick how they want to open.  It's also not practical for young kids / adolescents to wear a mask. We are seeing adults who are unable to obey by these guidelines.  We need to follow the European / Asia model that has been successful  Also kids need to be able to have recess, PE and elective courses.
7/21/2020 11:28:14	Kyle	Herspring		Wichita	This situation could provide more mental damage than anyone could think of.
7/21/2020 11:28:17	Kara	Henry Fortier	Public school teacher.	67203	Uphold the order. My life isn't a game.
7/21/2020 11:28:20	PJ	Matulka		Olathe	Uphold Gov Kelly's executive order; it's the minimum you can do to protect our children, teachers, and school staff; will you deliver the news to relatives of people who die because their kids brought COVID home from school? Do the right thing. This is our modern-day war on the homeland. Protect Kansans.
7/21/2020 11:28:21	Alexis	Peden		Mulvane	School starting needs to be delayed until our case numbers start approaching zero. It is true that children will likely not have any symptoms if they contract COVID-19, but the teachers, support staff might, as well as the children bringing the virus back into their homes, putting their parents, grandparents, and any other immunocompromised family members all at risk.
7/21/2020 11:28:22	Angie	Hammerschmidt		Hays	Let our local boards to decide for our communities. This is not a 1 size fits all.
7/21/2020 11:28:26	Aryn	Duncan		Wichita	Governor Kelly made the right choice in closing school buildings during the spring. This choice helped to delay the wave of infections that we now see. Governor Kelly's choice to delay the beginning of school is again, the correct one. We cannot within reason push for hundreds to a couple of thousand people to be placed in badly ventilated buildings while COVID infections are spiking. Do not use Kansas's students, teachers, and school staff as test subjects to see how well students transmit this virus.
7/21/2020 11:28:29	Laura	Norwood		Topeka	Please approve governors executive order. Teachers need time to prepare and understand the plan and schools need time to prepare facilities
7/21/2020 11:28:33	Jane	Eshelman		Wichita	I support delaying school openings. Active cases need to go down in Wichita & Sedgwick County before schools open here. I question whether there is enough funding & other support (staff, supplies, adequate space) to allow the schools to open safely. USD259 starts the typical school year without all of their teaching positions filled.
7/21/2020 11:28:37	Barbara	Austin		Neosho Rapids	Please delay starting school
7/21/2020 11:28:43	Brady	Stoy		Overland Park	I believe you should leave it up to the school districts. Not all areas are going through the same thing. One plan does not work for the entire state. I believe we need to protect our children, but if we keep delaying it we'll just end up online again which if they do, should start at regular time not after Labor Day.
7/21/2020 11:28:51	Taylor	Warren		Belle Plaine	school needs to be delayed or it's gonna shut down in less than a month
7/21/2020 11:28:54	Sarah	Ackerman	Shawnee Mission School	Olathe	Please wait to open schools until September. Teachers need more time to plan and prepare. We also need time to see if the mask order makes a difference and to see if our Covid cases go down.
7/21/2020 11:28:59	Coleen	Floberg	N/A	Berryton	I prefer to delay face-to-face/in-person school until such a time that we have NO LESS than 14 days (in a row) of decreasing cases of CoVid-19 in Shawnee County. In the event that does not happen, I prefer virtual learning education for all students. Any and all extra-curricular activities should be canceled/postponed until such time also.
7/21/2020 11:29:03	Melissa	Wishart		Wamego	Please, please consider special needs kids separate- my son NEEDS to go to school and learn, my other kids could survive doing distance learning (although not mentally) but my special needs son needs to go to school. His teachers want to teach him, and will take every precaution possible to ensure his safety. Please don't just close schools to everyone, close them to those who are able to learn at home, but leave it up to the districts if they want to provide in school learning for the special needs kids. PLEASE don't allow my kid to fall farther behind. Thank You

7/21/2020 11:29:26	Laura	Holloway	parent of school child in	De Soto	<p>The idea that we should be opening schools while COVID-19 cases are actively breaking records in Kansas is unacceptable. The dangers to our communities far outweigh the benefits of starting school "as normal". If cases are bad now, they will be so much worse if you open school buildings.</p> <p>Nearly 2/3 of teachers are uncomfortable coming back into classrooms where very little is planned for their protection. Communities need time and funding to find safe solutions. If not, we might not even have enough teachers willing to return. Consider how much more money they'll make in the booming private sector, where parents will also be more willing to accommodate their needs than the school board seems to be.</p> <p>It should furthermore be a serious consideration of the board to offer funding for districts to begin building robust remote learning plans as well, similar to that of USD 497 (Lawrence Virtual School). Even before COVID-19, their ability to serve every student a meaningful educational experience through technology and learning, no matter their learning style or home situation, should be looked to as a road map during these difficult times.</p> <p>I am asking that you all please approve Gov. Kelly's mandate. Her decision is well researched, based on data and not anecdotes, feelings, or politics. It might seem politically risky to approve the plan, but based on the facts we currently have about the virus, particularly the news we've had over the past week regarding its impact on children, we need this plan to be enacted for us to move forward with this school year.</p> <p>It is important for Kansas government officials to stand together right now to protect the residents of our state. The patchwork approach is failing. With the mess we've had regarding the mask mandate approval, misinformation has spread rapidly with nothing to check it, and with that spread of misinformation has come additional spread of the virus. Localities have chosen to ignore science to the detriment of the health of all Kansans, not just those residing in those areas, because Kansans travel, and misinformation travels faster. If the school board rejects the governor's order, it will lead to more chaos--confusion and frustration regarding widely varying policy and mass disbelief in public officials who are trying to do the right thing--and I'm not sure how much more of that our state can take under these current conditions. A unified message would be so helpful right now.</p> <p>If some of the school districts open up when they aren't really prepared and conditions are poor, that virus will do a number on the surrounding community *and* spread elsewhere, even where public officials have actively been trying to quell the virus. With the option to open early on the table, you have to know that some schools will open up that shouldn't, either due to high numbers of the virus in the community or due to a lack of preparedness, and when they do, there will be consequences for all of Kansas, not just that district. Other districts who try to keep kids safe by delaying opening will face backlash from misinformed families who look across the district border to other schools that are open. We need to be united here—switch to an offensive strategy to win the fight. Reacting defensively is not working. Give us a few more incubation periods for this virus to slow spreading, hopefully.</p> <p>I am a teacher and understand better than most how much kids need school. I love my job. I sincerely hope we can do school in person sooner rather than later, but I'm afraid if schools open up right away here in August, we won't have time to put necessary safety measures in place. With the numbers of the virus rising so rapidly at present, I truly believe those schools will have to shut down soon after opening, at which point we will have put kids and staff at risk just to</p>
7/21/2020 11:29:31	Sarah	Huppert		Olathe	
7/21/2020 11:29:33	Anne	Dewvall		Derby	Please delay in person school opening until at least Labor Day. Focus time and resources on preparing alternative delivery models and addressing disparities for underserved students.
7/21/2020 11:29:43	Michelle	Schrag		Goddard	I think we should start normal.
7/21/2020 11:29:45	Sage	Sandelin	Roosevelt elementary	Hays	I think it's best to wait to open school as I would hate to have it start normal Time and then have to close shortly after because numbers keep going up.
7/21/2020 11:29:51	Sara	McAllister		HESSTON	The kids need to be in school as soon as possible
7/21/2020 11:29:59	Laurie	McLane-Higgins	Retired art educator-US	Lawrence	Please honor Gov. Kelly's orders to start school after Labor Day at the earliest.
7/21/2020 11:30:01	Nick	Knight		Leavenworth	I support the delay in opening of schools and sports even longer
7/21/2020 11:30:04	Stephany	Harris	self employed	Caldwell	I feel the schools should delay opening until after Labor Day to get this virus under control.. I have school aged child and he would benefit from this delay.

7/21/2020 11:30:04	Andrea	Reece		Olathe	I am a parent of an elementary student in Olathe, KS and a school social worker/behavior specialist who travels between 3 school districts in Douglas County, KS. I fully support Governor Kelly's decision to delay school so that districts can be fully prepared with all the necessary supplies and precaution in order to open safely. I hope the state BOE will also support and follow her decision. Thank you.
7/21/2020 11:30:08	Stacey	Popejoy	Self	Wichita	Please postpone school opening until there is a two week decline in cases statewide.
7/21/2020 11:30:23	Megan	Epperson		Lawrence	I strongly urge our board members to vote in favor of upholding Governor Kelly's executive order delaying the start of schools. As teachers, we desperately need this time to plan and set up for students this fall and this buys us invaluable time in order to do so. Thank you for putting safety as the first priority.
7/21/2020 11:30:24	Brandi	Stockebrand	Mom and USD 259 Teacher	Haysville	As a Mom and a Teacher I would like to urge you to vote in favor of keeping schools closed until after Labor Day. As a teacher I am always using data to make informed decisions about what is best for each student. Right now our numbers in Sedgwick county are continuing to rise at an alarming rate. I am aware that is not the case for some places in Kansas but I feel the EO is the best thing for all our Kansas kids. Our district has presented 3 options for learning, 2 of which are at home options. The community I serve in Wichita is a low income community and those two options are really options for them. They either don't have the means (internet, devices, knowledge of technology or capacity to help their children) or they are working and have no other choice but to send their students to school. By delaying school it gives them the ability to keep their kids safe and forces employers to be more flexible because it is not a choice the employee is making. Sending kids back to school is necessary, but not with the rising numbers and hurriedly developed plans to meet new guidelines. To do what is truly right and safe takes time and planning.
7/21/2020 11:30:28	Dan	Wooge	Self	Overland Park	As a teacher it is poor judgement to put us in danger. It is true that students may not show symptoms. But the result will be suck teachers with nowhere for students to go. The only responsible answer is to follow governor Kelly's order.
7/21/2020 11:30:34	Nathan	Rightmire		Overland Park	I fully support the Governor's proposal to delay the school year, however I don't think it goes far enough. I would like to see no in-person schooling until such time as there is an effective vaccine or treatment for COVID-19. Not only to protect children, but also to protect teachers, staff, and parents. While it is true that children appear to be less affected by the disease, they can still be carriers, and thus will increase the probability of community spread. The Board should also increase resources for schools, teachers, parents, and students to help facilitate and improve the quality of virtual learning.
7/21/2020 11:30:36	Trevor	Campbell	Parent in Blue Valley School District	Overland Park	I request that the School Districts and BOEs process refunds for each day that the child is not in school for in-person learning. The school bonds and property taxes allocated for schools were not agreed to on the ballot for remote learning/in home learning.
7/21/2020 11:30:40	Casey	Kelley		Park City, KS	I support the Governors orders and urge the Kansas BOE to approve both executive orders regarding Kansas schools. I understand the point that one size does not fit all, but in this matter, we need to be united and one. We can not leave it up to individual districts because even though we hope those individual communities will make the wisest decision, we can not leave this up to chance. When only some are following restrictions or some delay school openings, it is a mixed message and people loose confidence in what works to control the spread of the virus.
7/21/2020 11:30:40	Angela	Marcotte		Lyon County	I support Laura Kelly in starting after labor day. I do not support masks for younger grades in elementary.

7/21/2020 11:30:40	R	Michaels		Wichita	<p>The state BOE needs to (either-or / both-and) respect the governor's direction to delay the start of school for students and have school district employees start working on time to ensure virtual learning elements are high quality; AND have schools launch virtually for the year until Kansas gets the spread of the virus under control (no new cases, hospitalizations, deaths). Otherwise, simply choose to start school on time virtually for all students (regular, SPED, ESOL, etc.) until the rates all decline appropriately. People say that kids will be behind if they learn virtually . . . even in a worst case scenario, what will they be behind? Our arbitrary expectations of where children should be in their learning, even knowing that each person learns differently??? It's meaningless to worry about them being behind an arbitrary level of our own creation. We should be worried about them just being ALIVE. That's all we should want—for kids and teachers and Kansas families to stay alive. Will you feel comfortable with children's and teachers' and their extended family members' deaths on your hands if you vote to launch school in person anytime soon? If you direct starting on time with a virtual-only mandate for all students, You. Will. Save. Lives. Period. That would ensure we save not only kids' and teachers' lives, but it would save the lives of family members and reduce the spread of the virus throughout entire communities. The most powerful way to curb the spread of disease is to shut down in-person schools in favor of virtual schooling.</p> <p>School districts figured out technology to get devices to students, so they could do it again, and they helped with internet access for those without the internet. These aren't barriers to a virtual learning plan. They figured out getting meals to kids who need them. That's not a barrier either.</p> <p>Respect genuine, real science—talk to epidemiologists who don't have a political agenda or responsibility. Get smart on all the facets and make the appropriate decision to launch all schools virtually, either on time for employees and delayed for kids or on time virtually for all.</p>
7/21/2020 11:30:47	Amber	Whisler	Teachers and parents	Overland Park	<p>As a teacher and a parent, as much as I think in person classes are the best, I don't feel it would be wise. We have people moving across county and city lines to work, creating a larger area of possible exposure and spread. The metro and surrounding areas, as a whole, need little to no cases before we can all be safe to return.</p>
7/21/2020 11:30:50	Morgan	Willingham	parent	Emporia	<p>I support the governor's order for schools to open after Labor Day. As a parent, an educator, and also someone who is immune compromised due a chronic condition, any steps that schools can take to keep people safe I support. I think this is also the right thing to do as it appears as those my school district, USD 253, has yet to make any final decision about protocol or to preparations for the upcoming school year, which was originally set to open in a month.</p> <p>If meeting face-to-face, what precautions will be taken? If meeting online, how will the school ensure that students are staying engaged and that they're meeting the necessary goals for their grade in all areas of learning? If meeting in a blended format, will this still allow students to appropriately social distance when most classrooms are already overfilled? Will students have to wear masks? Will plexiglass barriers be installed? As well as many, many, many more questions that have not been answered, much less decided upon in my district, and I assume across the state.</p> <p>Give schools the time they need to prepare. Open after Labor Day.</p>
7/21/2020 11:30:50	Katie	Just		Emporia	<p>THANK YOU for delaying the start of school! I am a music therapist who enters the schools in my community. Your delay of start is allowing my students in special education more protections and opportunities for their teachers to determine how best to serve them, whether they are in-person or virtual. Thank you for choosing the health of our schools and pushing back the start of the school year!</p>
7/21/2020 11:31:02	Misty	Mccurdy	Usd309	Nickerson	<p>I want to teach...in the classroom as soon as possible!!!!</p>
7/21/2020 11:31:23	charles	Breitenstein	Grandparent	Shawnee	<p>I support Gov. Kelley's decision to delay the opening and to require enhanced safety measures until a vaccine can be distributed.</p>
7/21/2020 11:31:24	Alyssa	Hunter	Parent	Olathe	<p>I believe we should push school opening until after Labor Day.</p>

7/21/2020 11:31:25	Pam	McIntyre		Salina	Why would you not delay the opening of schools til after Labor Day? The mask mandate is relatively new, and if we can bring down the numbers by Labor Day, it seems that would be a very good thing. Please put the health of our students, staff, and faculty first in your considerations.
7/21/2020 11:31:27	Michelle	Kelly		Overland Park	If the mandate is upheld, please make sure it allows for school staff and teachers to return to work so that they can use the time to prepare. I would prefer the kids start on schedule. Kids under 10 are not considered to be big spreaders of the virus and kids over 10 can Follow social distancing protocols. I consider teachers to be essential workers and that they should be seeing this need for them to return to the classroom as recognition of their important role in society. We have asked daycares to be open throughout the pandemic and schools are just, if not more, important.
7/21/2020 11:31:31	Gae	Phillips		Columbus	I feel individual districts should have the right to open and close when they see fit based on the particulars of their community. Local districts should also reserve the right to set the health guidelines concerning temp checks, masks, etc. Every community and district is different and a state-wide mandate is not necessary. Trust the local school boards to handle their own district's needs.
7/21/2020 11:31:35	Michelle	Goodpasture	USD 409	Horton	I would prefer to open after Labor Day due to the increase of co-vid cases in our local area that is deemed community spread. Also to allow more time to follow the guidelines that were just released.
7/21/2020 11:31:42	Kristina	Bartlett		Emporia	Online please
7/21/2020 11:31:43	Allison	Lehman		Overland Park	PLEASE do not base funding on attendance this year! I'm the parent of an incoming kindergartener and second grader. Distance learning went very poorly for us in the spring, and I am leaning toward homeschooling this year. However, we plan to be back in public school as soon as possible and do not want the schools to lose funding. Schools need MORE funding this year. I'd also ask the BOE to call on legislative bodies to provide financial support for families with increased childcare costs or inability of one parent to work if children are at home.
7/21/2020 11:31:43	Julie	Cruz		Leawood	Our kids need to be in school in person! I am a former teacher. We have 3 kids one is off to college. One has IEP For learning and needs someone to work with him in person for him to learn and be a successful student. Our high schooler has a 504 for processing. Watching him try to navigate online school in the Spring was heartbreaking and frustrating for him and us. Many teachers were not motivating him to learn or motivated to teach. Online school was a total failure. Kids feel isolated, lonely and depressed. They need social interaction with peers. In person school needs to happen. They have not had a great education for 6 months and continuing on this path is a disaster for our students.
7/21/2020 11:31:46	Kristen	Ellender	Neosho Rapids Element	Hartford	I think if we are going to postpone schools for that long, we need to be thinking about if we are going to shorten the days required to attend, or think about how long the school year is going to last. I also think it's ridiculous to have students who are 2nd grade and younger to wear masks. It's hard enough to keep their hands to themselves. I also worry about the cleaning supplies and the rooms for these kids. Will we as teachers be expected to pay for them? In conclusion, I PRAY we do not go back to online learning completely because as a teacher I severely worry about my students well being, as well as the learning gaps they are going to experience due to lack of support from parents.
7/21/2020 11:31:49	Janet	Zimmer	SMSD	Roeland Park KS	Open schools please. No further delays!
7/21/2020 11:31:51	Teresa	Shippy	none	Manhattan	Please vote to delay the opening of Kansas schools until after Labor Day. As a parent, I feel strongly that the current COVID-19 situation is too uncertain to consider starting school sooner. Moreover, the school districts and individual teachers need more time prepare for the required changes.
7/21/2020 11:31:51	Joe	Hildebrand		Overland Park	Our kids need to go back to school as soon as possible. The data of this virus is available and it's a virus that isn't any worse than others we have faced in the past. The damage being done by politicians is treasonous. This needs to stop
7/21/2020 11:31:53	Julie	Clark	USD 362	Lacygne	I have a 14 year old returning (hopefully) to be a sophomore, and I don't want him to wear a mask. If delaying school until after Labor day makes it so masks won't be required that would be worth it. Please, please make school normal as possible, if masks become mandated, I will remove my son and homeschool him. Thank you for listening.
7/21/2020 11:32:08	Dayle	Dryer		Lawrence	Please postpone school until AT LEAST after Labor Day. By then we can start to gauge Covid numbers after college students return. It will be safer for students and teachers if we wait until numbers are going DOWN.

7/21/2020 11:32:10	Whitney	George	Teacher	Manhattan	I am okay with the delay on schools. However, I am not okay making masks mandated in our schools for all ages. It should remain grades 5 and up, especially because so many communities have zero cases.
7/21/2020 11:32:11	Nic	Dannevik	Parent of a senior in usd	Lawrence	Please allow sports to practice during the three weeks school has been postponed. Many schools have been participating in outdoor optional workouts successfully. This will allow athletes and students involved in activities to stay involved and allow students back in a safe manor.
7/21/2020 11:32:13	Betty	Yung		Lawrence	Please approve Governor Kelly's order to delay the start of school until Sept 9th. We need more time to prepare for school and to see how the virus is spreading or if masks and social distancing is reducing the spread of the virus
7/21/2020 11:32:16	I will not allow i	Thomas	Stay at home mom	Wellington	I will not allow my kids to attend how dare you put them in danger when this is something we know nothing about
7/21/2020 11:32:21	Kelly	Batten	Blue Valley School Dist	Overland Park	I hope they support Governor Kelly's decision to delay the start of the school year. As a teacher, I do not feel safe returning to the classroom until cases are going down and we have the proper safety measures in place.
7/21/2020 11:32:23	Krystal	Frank		Scott City, KS	<p>We need to be in school with as little restriction as possible! I hope you are taking the kids social and emotional health into consideration. As a parent, a registered nurse, and now an elementary teacher I can tell you our children need to be in school. The expectation of children ages 5-9 wearing masks throughout the school day is unrealistic, let us sign a waiver.</p> <p>Have we looked at the mental welfare of our children? Instead of just worrying about covid statistics, we need to consider getting these kids back in school (to some of our students this is their safe haven)!!!</p> <p>Keep sports- these kids will find other avenues to socialize and be together. I'd much rather see them doing sports than experimenting with drugs and alcohol after school at someone's house!</p> <p>Considering the phase two I hope you take into consideration the number of parents with 5-8 year olds whose parents work. Daycares will be overran and parents will be very stressed paying thousands in childcare (myself included).</p>
7/21/2020 11:32:25	Sarah	Slaughter		Shawnee	It is necessary. I work in healthcare and my patients are dying. Masks should be required for ALL students going back to school. It is the only way to protect everyone. My 4 year old wears a mask better than most adults. No distraction, no touching her face, she has no problem wearing it. I have 3 children needing to go back to school but for the safety of everyone I will not be sending them this fall especially without a mask requirement for all students.
7/21/2020 11:32:33	Dayna	Breitenstein	Parent	Leawood	The fact that you are meeting virtually really says it all, doesn't it? You are literally meeting via Zoom for your safety to determine whether or not you should send hundreds of children to school in person together. Think about that. There is a reason a very red state elected a Democrat for a governor and a senator. The people of Kansas are tired of business before people.
7/21/2020 11:32:43	Hollie	Niblett	N/A	Overland Park	I think it would be irresponsible to send kids and staff back to school buildings this fall. Our decisions should be based on science and expertise, not politics.
7/21/2020 11:32:49	Kari	Hicks	Parent in USD 259 scho	Wichita, KS	I support the school start delay and support the use of masks and other safety measures. Thank you.
7/21/2020 11:32:56	Galen	Yunker	retired	Caldwell	Due to my age, 69, I am at risk for the virus.. I think a few weeks delaying school might help get the covid virus under control and I could be around my grandkids.
7/21/2020 11:33:00	Carol	Stockton	me	HUTCHINSON	I applaud our Governor for standing her ground. This is NOT a political issue! I am a teacher. Do I want to be in school,? YES! Do kids need to be in school? YES! But does the Covid risk outweigh all of it? YES! Not one life is worth it! Please sign to give us more time to prepare. Thank you!
7/21/2020 11:32:57	Stacey	Harper	Winfield Early Learning	Winfield	I am a teacher and mother of a senior in high school. We need to get back to school BUT as administrators and educators we need time to do it safely. There is much to adjust and lots of training to implement. Please support this order that gives our district the time it needs to look at all of the guidelines and open safely and correctly so that we have more of a chance at staying open, thriving and educating our precious children for the year. Thank you!!
7/21/2020 11:33:05	Angie	McGuire	Cunningham Jr/Sr High	Cunningham, KS	As a teacher, a coach, and a parent I believe it's time to get back to school and activities. Please, don't delay.

7/21/2020 11:33:07	Amy	Gehlbach		Paola	I would like to encourage the Board to go with their original plan for reopening schools. This plan was a workable option for everyone-parents who were concerned could keep their children home and those who wanted to send children to school in person could do so. Numerous experts spent hours coming up with plan, and each district is different. Let those districts decide what is best for them-not a one size fits all. Keeping children at home really hurts those in the most vulnerable situations. Not all families have parents who can stay home with their children indefinitely and another month of child care is unaffordable. If children being in an indoor facility together is a problem, then why are day cares able to be open? Let parents, educators and districts decide for themselves-which is exactly what the plan was before Governor Kelly discarded all the hard work of those involved. One person does not need to be the deciding factor and be able to override the expertise of all the people who were on the reopen committee. Please do not let the children of Kansas fall further behind. In addition, if teachers are not going to return to school, they should not be paid. This is how it is for all other "essential" jobs.
7/21/2020 11:33:14	Deborah	Kreie		Ulysses	It only makes sense to wait until after labor day, if students and teachers have no safe way to attend/ hold school. Based on the online options and safety precautions we can take, it does not make sense to wait three more weeks. There is no guarantee that the numbers will be less at that point.
7/21/2020 11:33:17	Justin	Varnes		Sewaed	We MUST open schools. Our children are suffering and online learning is not working. There was nothing sent home over the summer of where my student was academically and what they needed to work on. I tried doing basic arithmetic flash cards and she couldn't even do 3+2. Our children are failing. It is not a death sentence to put them back in the classroom. Do the right thing and open the schools.
7/21/2020 11:33:27	Austin	Burke	Lawrence Free State Foc	Lawrence Kansas	Please do not cancel the season, wait it out or if you have to move the season to winter/spring . Thank you and please consider
7/21/2020 11:33:34	Kelly	Rasmussen	My family	Pratt	Each school district should be able to determine what works in their district based on a multitude of reasons. One size does not fit all- to do that makes it appear political. Don't make it political- thank you.
7/21/2020 11:33:34	Amber	Lawrie	My Kids	Haysville schools	My son and I have asthma so please think about remote learning and providing laptops/computers. I don't care when school starts as long as he doesn't have to physically go.
7/21/2020 11:33:34	Josh	Runyan	Usd 383	Manhattan	I would like more time to get ready to be online. We are not a 1-1 district
7/21/2020 11:33:37	Elizabeth	Cathcart-Rake		Prairie Village	As a physician and a mother, I implore you to support Governor Kelly's order to delay school opening. We are seeing higher and higher levels of coronavirus infections every day, and strong medical evidence suggests that opening schools will be another way infections will spread. This threatens everyone's life. This virus kills - I have seen this first hand. In Texas, hospitals and ICUs are full. Our hospitals and ICUs are filling fast and I am concerned that we will be in this position soon. Another opening will only worsen this significant issue. I understand everyone wants to get back to life as usual, myself included. But, we cannot and should not allow for the death toll to rise in the pursuit of this impossible hope. Please focus your efforts into how to support children and their parents in the pursuit of more equitable and engaging remote learning.
7/21/2020 11:33:41	Bryan	Rickard	Pike Valley USD 426	Scandia	I ask that the State Board of Education not vote in favor of delaying the start of the 2020/2021 school year until September 9th per the Governor's Executive Order (E.O.). The Governor's E.O. is not supported by science. The science (AND THE DATA) shows that the infection rates and subsequent transmission rates from children are extremely low. While the death of one of our citizens is one to many, by delaying the school year, we would be greatly adding to the duration that Covid-19 has a strangle hold on our State.
7/21/2020 11:33:41	Shay	O'Brien		Monterey, CA	I love several children, teachers, paras, and counselors in your district. Please protect them all by at least delaying the start of in-person school. Be creative. We can educate AND support AND save lives.
7/21/2020 11:33:42	Chad	Tremain		Shawnee	I find it extremely important that school opening is delayed to allow districts to get their plans in order. It seems everyone spent the summer waiting for Federal guidance (which never came) and are now scrambling to get something put together. Also, given the news that Sedgwick County is limiting gatherings to under 15 people, I don't see how it make sense to shutter children into schools, especially when it is starting to become evident that older children are vectors of the virus.  Please take the responsible approach and use this extra time to get this right so we can get children back to school safely. A failure to do so almost ensures we will be back to full time remote by the fall.

7/21/2020 11:33:43	Donna	Burchfield	Blue valley school Distr	Shawnee	Please consider the impact opening schools will have for teachers at risk. One student Or teacher dying from COVID is not acceptable.
7/21/2020 11:33:47	Michelle	Vink	Parent	OTTAWA	<p>First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.</p> <p>Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <p>Safe School opening following the Board of Education Return to School Plan</p> <p>No delay to student participation in school, athletics, and activities.</p> <p>In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.</p> <p>Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>I am one of the over 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.</p> <p>We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.</p>
7/21/2020 11:33:54	Jeremy	Long	My daughter	Great Bend	This new order is absolutely ridiculous. Looks at the research that has been presented about the extremely small changes of children transmitting the virus. You have zero ways of enforcing who has legit exemptions and who has made up exemptions. Also how are you going to control allergy season with kids wearing masks taking them off and on all day to blow or wipe their noses. Also who is paying for multiple masks each child will need. Who is going to enforce the child's mask to be cleaned everyday? Exactly no school has the time to do all the things required to mandate masks.
7/21/2020 11:33:55	Laurel	WoodwardBreckbill		Newton	I fully support Governor Laura Kelly's executive order to delay the start of schools for fall 2020. This delay is critical is allowing schools to evaluate the safety of their communities and acquire materials or plans needed to insure safe schooling going forward. Kansas is experiencing a distressing increase in coronavirus cases and sending kids to school before schools have adequate time to prepare is not only dangerous for those working with the students but for our entire community outside of the schools (families, at-risk community members, health care workers, essential workers). Thank you for taking the time to review feedback.
7/21/2020 11:33:59	Carrie	Halbert		Marysville	Please realize that just like every child is different so is each county and school district. Please allow the schools to reopen as normal in August unless the specific county and/or district feels that the school should be delayed. Our district has in place a plan for those who are concerned with their child returning to in person classes. So please vote to allow those who are comfortable with their children to return without any additional delays.
7/21/2020 11:34:06	Milissa	Brunetti	Teachers	Topeka	Schools should delay start untreated 1 after Labor Day per Governor Kelly's order. She is looking out for the students and staff.
7/21/2020 11:34:08	Amber	Duensing		Olathe	Schools need to be virtual joco is a hotspot and has been since the beginning
7/21/2020 11:34:19	Randi	Dumler		Westmoreland	Please allow our kids to start school and without the requirement of masks. I have 4 children in public school and will homeschool if they are forced to wear masks all day.
7/21/2020 11:34:26	Rachel	Rosell	Yes we need time to kee	In Wichita	Thank you
7/21/2020 11:34:29	Jewell	Radke		Great Bend	I believe we should wait until at least Sept 9 to allow numbers to go down. I want my children and myself to be safe.
7/21/2020 11:34:30	Katherine	Carey	Teacher	Kinsley	I think school should be delayed to ensure safety. Teachers may be immune compromised like myself. Children can get the virus and spread the virus as well as adults. Our lives are important and matter. Let us feel safe. Other activities that are in groups have been canceled or postponed but not school and WHY?? Life's are important!!
7/21/2020 11:34:33	Becky	Brown		Prairie Village	Support delayed start and remote

7/21/2020 11:34:34	Wendy	Miller-Tarlos		6306 W 149th St. Overl	Do not agree with a delay of school. Let's processed as planned. We've been out of school way too long already. Kansas kids are going to fall behind.  Schools should be allowed to start on time online.  Students should be allowed state sponsored extra curriculum such as theater, music, and sports even if they choose remote schooling. It's the difference of hundreds of kids versus tens. Otherwise it feels like schools are strong arming residence of school aged kids to go back to brick and mortar by denying all state funding activities.
7/21/2020 11:34:44	Lori	Bigler	Self as a teacher and hea	Meade	Please vote to delay school openings and mandate face coverings in schools. Though we all appreciate the idea of local control, our school board has already refused to take into account the safety of our students and teachers in refusing to enforce any mask mandate, even for teachers. They refused to consider having fewer people in any one room and refused to enforce temperature taking. We need common sense safety measures by those who know. The US Surgeon General TODAY said schools should NOT open. Please let politics go by the wayside right now and know that students and teachers are depending on you for our safety. Thank you.
7/21/2020 11:34:47	Don	Ross	Hilton	Wichita	I feel that the decision should be based on spikes in Covid and with the new spikes we are experiencing, school should have on line classes until the first of the year.
7/21/2020 11:34:54	Kim	Dean		Hardtner	I just want to voice that I think the delay of school opening is a great idea and would help to appease people on both sides of this subject. For me personally, I know it will help me breathe a little easier for a period of time. As a parent, and full supporter of a strong education, I'm extremely hesitant to put my child back into a school full of people. In many instances, the meetings in which decisions are being made regarding putting our children into a school building, are even held remotely, so it makes me extremely uneasy to think it to be wise to put our children in buildings with many people. And not just for the children's sake, but for everyone involved. Previously we weren't even allowed to bring our children to the grocery store. We live in a rural area and although our numbers are low, surrounding counties are higher, and I've read somewhere that in the smaller areas, even a small increase of numbers of cases can be alarming. Although I am aware it is difficult to find the right answers as no one can possibly get everything correct amidst a pandemic from a new disease, so I do take any information I can find lightly, so I'm not saying that statement is accurate, there really is no way to know it seems. As a parent, trying to make the right choice of what is best in this situation is extremely difficult, and I can only imagine how difficult it is for all of our leaders such as the KS Board of Education. Thank you for your time. Have a good day.
7/21/2020 11:34:56	Annetta	Hurt	Teacher and grandparen	Lyndon	I support Governor Kelly's mandates. I feel giving the schools two-three weeks will help them prepare and hopefully get the state to decrease the amount of COVID cases by following the safety guidelines. With the increase of cases it would be dangerous to put the students and staff in an enclosed classroom.
7/21/2020 11:34:58	Kyle	Unruh	McPherson High School	McPherson	Please vote to APPROVE the Governor's executive order. The policy will give Kansas schools the best opportunity to provide quality education this semester while maintaining the greatest probability of health and wellness in our communities. Those who oppose the order, do so (I believe) for commendable reasons, but I with faulty logic. Like them, I ALSO want to get back to teaching students, and I ALSO am concerned about their social/emotional well-being. I ALSO believe in-person schooling is most effective, and I ALSO believe that the structure and opportunities our schools provide are irreplaceable. HOWEVER, if we push onward with starting school on time, and refuse to acknowledge the growing dangers in our communities, we may quickly find ourselves back where we were last spring, or worse. To ignore the medical and scientific community at this critical time is distinctly contrary to the values and ideals we claim to strive for in Kansas public education. It is high time we see proactive leadership, rather than inactive deferral. Please do a brave thing, and set partisan loyalty aside to support educators and students in a safe return to the school year on Sept. 8.
7/21/2020 11:35:03	Ariel	Starr	Elementary School Teac	Johnson County	I believe that schools should be delayed until after Labor Day. We need to get this virus under control before we jump into congregating children in the same space.
7/21/2020 11:35:03	Rebecca	Osborn		Wichita	I have a child in USD 259, and I'm deeply concerned about sending my daughter to school while numbers are on the rise. Please delay the start of school so she has a chance of being able to attend in person.

7/21/2020 11:35:12	Sara	Garza		Abilene	<p>Schools should open as normally scheduled, in August. Not even taking into account that kids are less susceptible and generally get better faster, take into account is single parents. I already had to wipe out all my savings to pay for a sitter for the extra 8 weeks when school was at home last school year, but to have to find money for another 6+ weeks?! Where is that money supposed to come from? I HAVE to work to pay our bills.</p> <p>As for the masks, I think you should definitely take into account that they're not safe for anyone, especially kids. Mine won't be wearing them.</p>
7/21/2020 11:35:12	Mark	Bowden	Freestate HS	Lawrence	<p>I feel that mental health Of our youth is being overlooked during these challenging times. With Covid numbers no stronger than they are I feel we need to Way out the long term affects of mental health with our youth being robbed of everything they have worked hard for. Things such as graduation, senior year of high school sports that is a once-in-a-lifetime opportunity and most importantly spending time with their peers. Let's get these kids back on the fields and back in the classrooms ASAP! Thank you for allowing me and my family to have a voice</p>
7/21/2020 11:35:17	Shelly	Weir	Teacher - NEA	Overland Park	<p>Follow the science. My class sizes at BVN High are 28-30. If you can't reduce my class size, there can be no social distancing. I am 56 and have asthma. I fear that I will get Covid from students who aren't social distancing. I understand that parents want there kids back in school, but let's get a handle on the Covid spread before we meet in person. Also, if I am sick, do we have substitutes to fill in for all of sick teachers. Lastly, we cannot sacrifice safety and have a student die, have teachers die. Our profession is about compassion, empathy. We need our board to look out for all students, there families, and every BV employee.</p>
7/21/2020 11:35:26	Jennifer	Stock	Teachers	Topeka, KS	<p>As a special education teacher, I work with some of the most vulnerable students in schools. Learning is difficult for many of them, and learning during a pandemic can be nearly impossible. I want to be in the best possible position to help my students while keeping everyone safe. As cases in Kansas hit new highs, beginning school as previously scheduled is the wrong thing to do. Even the extra 3 weeks allotted by Governor Kelly are not enough to do all of the things we need to do to keep Kansas kids and school staff members safe. Schools should not reopen until we see a steady decline in the number of new cases for 14 days. I want to see my students, but I also understand that to take care of all of their needs cannot be done in the current situation. I urge you to vote for the delay, so teachers can do everything in their power to make classrooms safe, nurturing, and empowering spaces in this unprecedented time.</p>

7/21/2020 11:35:51	Julie	Irvine	BVSD 229	Overland Park	<p>Our world is at war--with a virus--and we are presently losing. During active war times in our country, education was interrupted. School needs to be interrupted now as a matter of life and death. I work in 3 buildings with high school and young adult populations. We have 1600 high schoolers squeezed into tight quarters (all of our mobile units were taken away this spring and all of those classrooms are now squeezed into already over-crowded quarters to allow for an extension to be built.) Many of the students with whom I work have the cognition of a 2-6 year old and constantly hug staff and students, pick their noses, sneeze all over people, stick their hands in their pants, etc. regardless of how many redirections, prompts, social stories, etc. are given to them. I am a huge proponent of working on social skills with our students. However, what do we think 'social' will look like? There aren't going to be any lunch table groups, lockers, recess games, study halls, sitting next to friends, talking to people in the hallway, dances. So, when we say that we want the kids to benefit from the social experience of school, we must realize that there will not be in-building socialization. Kids and Parents want to return to "normal" but there will be no "normal".</p> <p>We do not even consider putting our office employees into the same situation we are contemplating putting our children into. There are instances when commanding officers will not put actual soldiers into the kind of indoor environment we're contemplating for our children. How do we work from home because buildings with recycled air are not safe, because we don't trust other people to not spread the virus, and then with the same breath send our children into buildings?</p> <p>My district alone has 22, 907 students. At a death rate of .0016 (although recent studies are showing that the percentage, in reality, is MUCH higher than that for the age of students with whom I work) we are looking at 37 students dead. What if one of these students was YOUR child or grandchild? Would you vote for school to resume? With 3436 employees in the district, assuming most adults will become infected given the situation we are being placed in, even with an adult death rate of 3.4%, we are looking at 117 dead employees. 154 people dead in one school district alone because the decision was made to barrel on while numbers continue to exponentially rise. That's the number you're talking about for ONE district. It's very easy to sit behind a keyboard and diminish and dismiss the risk you're advocating other people assume. Take a breath and think about that. This doesn't take into account the number of people who will get this and die from the exposure to their children who will be carriers of the virus. Johnson County</p>
7/21/2020 11:35:58	Valerie	Patterson	Emporia Public Schools	Emporia	<p>As a teacher, if our districts are planning on going even partially online, teachers need time to prepare. All teachers have spent the entire summer in limbo and haven't been able to properly prepare for the upcoming school year. If we do postpone to September 9, all district student hours missed should be forgiven and the year should not be extended. Let teachers use this time to collaborate, plan, and prepare a solid plan that would help our students. This would allow teachers time to prepare. I don't want this year to be like the ending of last year. We took the approach, "something is better than nothing" and that isn't beneficial for anyone and is stressful for everyone.</p>
7/21/2020 11:36:00	William	Johnson	Teachers	Valley Center, Kansas	<p>Sedgwick Co. is now limiting gatherings to 15 and closing any public festivals, parades, or public gatherings. Kansas is in the middle of an outbreak because people refuse to stay home and wear masks. Where is it logical to open any public service at this time much less school where children that have been home for six months are suddenly seeing each other? I understand that children need to be back in school and I am wanting to be back in the classroom as well. Forcing this during a pandemic is infantile and will warrant an extreme backlash possibly leading to more school closings with staff and students paying for political games. Please support the delay and look at the data and science to decide when it is safe and proper to open.</p>
7/21/2020 11:36:12	Kendra	Witthuhn	USD 303 Ness City	Ness City	<p>I do not support opening schools later! We need this instructional time with our students.</p>
7/21/2020 11:36:14	Marci	Schaal-Roark	Blue Valley NW high sc	Overland Park	<p>I am concerned about the late start of school and the potential for sports to be taken away from these kids. This is how the connect in the school and is very important for mental and physical health.</p>

7/21/2020 11:36:16	Melissa	Wiltrout	USD 320	Manhattan	I am in support of delaying the school year. Teachers need time to adequately prepare for the expectations we are given as it relates to a safe reopening approach. I would rather have more time to ensure our school is ready, than to start on the "normal" date and potentially end up closing a few weeks later, because we weren't prepared and case numbers went up. Starting the school year without having a detailed plan will put teachers in "emergency teaching" mode, which does more harm to staff and students than good. We also need to consider (and keep at the forefront of our minds) that many teachers travel for work. This fact affects the ways in which districts should be looking at infection numbers and risk factors.
					<p>Our communities have not taken the necessary precautions to control and mitigate the spread of coronavirus. There are many people still refusing to wear masks, still hanging out in public places in large groups and the recent increase in cases has shown this.</p> <p>We are expecting the impossible of our already fragile teachers and school ecosystems. We are asking our teachers to put their own families at risk, to write wills and districts are drafting letters for potential loss of staff and students.</p> <p>We know that teachers will be the ones providing the PPE to the students that have none, the teachers will shoulder the responsibility of deep cleaning their spaces at the end of each school day and the teacher will be expected to conduct in person learning while providing enrichment to those students whose parents have chosen to keep their students home.</p> <p>This is an impossible task, the risk of burnout is high and unfortunately I don't see tons of new teachers lining up to take their place when our current staff resigns or retires early due to lack of support.</p> <p>Our students will bring this virus home to their families. Many students live in multi-generational households where older relatives will be at risk. Those students who live in multi-generational homes often are those that lack access to the most basic medical facilities and primary care.</p> <p>We should have been better prepared to start this year virtually, but rather than allow teachers to come to the drawing board the opportunity was squandered this summer. If we won't listen to our teachers regarding what is best for kids then where are we as a society?</p> <p>I hate this virus, I wish it would go away, I hate how it has divided our great country. We need to come together to beat this thing, and having 1000+ kids in a building is NOT a step in the right direction.</p> <p>Make the right choice on Wednesday, vote to support our Governor in starting school after Labor Day, and then back it up by supporting our teachers in planning for the next phase of what education will look like in Kansas this fall.</p>
7/21/2020 11:36:20	Alexander	Cook	Past employee of KCKP	Overland Park	
7/21/2020 11:36:30	Rachel	Basden	Shawnee Mission School	Olathe	I live in Olathe and teach for Shawnee Mission School District. I know that tomorrow's vote for or against the governor's Executive Order is important and probably weighing on you, as it is on all educators along with staff related to the running of our schools, families and students. It is cruel to consider that those who work in education in any way and students may have to return to school buildings before it is safe to do so, risking our lives, our families lives and countless others. We are not expendable. I have never experienced so much stress in my life, and I have been through A LOT in my lifetime. I implore you to do the right thing and vote for this Executive Order for the sake of thousand upon thousands of lives. I trust that you accepted your position in education to do what is best for us all. Now is the time for you to do what is right. Education can move forward safely in other ways, especially with what we've learned from fourth quarter and since then. Tomorrow is your moment to step up and let us know that we matter, that we are heard, seen and understood. Our lives matter.

7/21/2020 11:36:36	Erin	Perkins		Topeka	There are too many students state wide who would be done a disservice if schools are delayed in starting, mainly students in rural areas where cases are not high and students with disabilities who can't get their full educational needs met virtually. School is a place for socialization as well as education, and if we are living in a world where socialization is going to change due to pandemic illness, then students will need to learn that and practice it. Learning isn't just "sitting and getting." It has to be put into action for it to stick. Delaying a start date is just delaying the inevitable. Maybe with the next few weeks we cut case numbers, schools can create back ups to their current plans, but I can say with confidence that districts have been working hard to put solid plans in place to start and start safely. At some point we need to let it happen, let districts, administrators, and teachers show that they are ready to help students navigate this new world. Waiting increases the anxiety and apprehension that things will ever be perfect or safe enough.
7/21/2020 11:36:40	Cindy	Hertel		ELLIS	I am member of the USD 388 School Board, but I am speaking from a personal perspective. When we began discussing reopening schools, I was of the opinion that everyone should wear a mask at all times in school. However, last week I attended a meeting at 10 am at our elementary school during which we were social distancing. Thirty minutes into the meeting all of us adults were struggling with keeping our masks on due to the heat in the room. Even with the window AC unit running, the masks became wearisome very quickly.  I propose that students wear a mask when they cannot social distance, such as passing in halls, inside recesses, or working in small groups. When students can social distance by 6 ft, they should be allowed to hang their masks on a lanyard around their neck. Maybe floor tape or signage can also help remind students of the six foot spaces. I have seen plexiglass partitions divided into quadrants for round classroom tables. These would also allow students to interact without masks. Please consider.
7/21/2020 11:36:46	Sage	Sandelin	Roosevelt elementary	Hays	I think it's best to wait to open school as I would hate to have it start normal Time and then have to close shortly after because numbers keep going up.
7/21/2020 11:36:58	Megan	Winter	Blue Valley School Dist	Overland Park	I am fully in favor of delaying the start of the school year. Governor Kelly cares about our communities and has our best interest at heart!
7/21/2020 11:37:01	Jay	Young		Tribune	Don't force our kids to wear masks. My child has autism spectrum disorder. He has a hard time understanding social cues. Making him wear a mask will hinder his development. He also has issue with being over stimulated and sensory issues. He will freak out if he has to wear a mask. Also if he is exempt from wearing a mask he will get picked on. Please don't force him to do so
7/21/2020 11:37:03	Sandra	Urban	Children	Lawrence	Keep our kids and teachers safe. Do not open schools at least until after Labor Day.
7/21/2020 11:37:08	Diana	Coster	Wichita Public Schools	Wichita	As a school nurse in a school with a population that is 100% students with special needs, I urge you to approve our Governor's EO to delay the start of school. In a time when COVID cases are increasing in Kansas and especially Sedgwick County at the highest rate yet, we need this extra time to put measures in place to ensure that our students, our staff and our community stay safe. This is not a political decision, it is a health and safety decision. We all know that kids need to be back in school, but we are bound to provide educational services safely and responsibly.
7/21/2020 11:37:09	Sue	Bain	Teachers	Lenexa	School openings need to be delayed until the numbers are staying down. There needs to be 14 days of no cases. If schools need to open, it should be online only for the 1st qtr. Teachers cannot teach in person and online at the same time. In the spring, it took me 3 full days to complete my plans and record for the following week. That did not include faculty meetings, parent meetings, grading, zooming with my class. I would work 10 to a 12 hours a day. Show respect for the teachers, paras, aides, and all the other staff it takes to run a school. Value the teachers and their families. Help keep everyone safe.
7/21/2020 11:37:13	Amy	Roadhouse-Swind	Pratt High School	Pratt	Delay the 20-21 School Year, it should be College as well.
7/21/2020 11:37:15	Joleen	Hertzenberg	Retired teacher	Olathe	Thank you Governor Kelly for making the decision to protect our students, teachers and families by delaying the starting date Of our schools until after Labor Day. I totally support her decision and wish we had other politicians that put our health and safety first.

7/21/2020 11:37:18	Mandi	R		Leawood	Children enrolling in school are required to have vaccines for illnesses that aren't posing immediate threats. Therefore, it is unconscionable that anyone would require them to return to school during the height of a highly contagious & deadly virus pandemic, with no known cure or vaccine, that's passed around in groups even from those who show no symptoms. The domino effect goes far beyond the day to day ... who pays for sick leave for teachers if they catch COVID? Their families would be at risk. It would be another rapid school closing. Would districts even be able to find substitute teachers? What happens if they get sick? This is a no-win situation ... but there is a way to mitigate the inevitable crises ... keep kids and staff at home as long as possible.
7/21/2020 11:37:20	Kelly	Kemp	Parent and coach at Trip	Winona	I disagree with the delay. When I told my daughter there was a chance school would be delayed, she broke down in tears. Since the start of the initial shutdown, her anxiety and depression have become almost unmanageable. Not because of the fear of COVID, but from the lack of social interaction. Since she's been able to spend some time with friends again, her mental health has improved somewhat. I fear delaying now will open it up to further delays and will negatively affect the mental health of not only my child, but many others like her.
7/21/2020 11:37:21	Michael	Herbert	Self	Wichita	I support the delayed opening of schools based in the advice of healthcare professionals. This should not be a political issue but a health issue.
7/21/2020 11:37:29	Gerri	Lawson		Shawnee	Please vote against the governor Kelly's order. These kids need to back to school, whether it be online or in the classroom. I have 3 kids in the desoto district.  A survey should be sent out to each parent and teacher. Match the students with teachers who feel comfortable in the classroom. Then match the students and teachers who want to do online school. This will help keep the numbers low, and more people will be happy.
7/21/2020 11:37:32	Dani	Hartwell	Norton Community High	Norton	Kids need to be back at school. A normal day if school.
7/21/2020 11:37:37	Tristen	Denham		Salina	What could 2 weeks possibly do? Please let us open on time. The students need more time because of their "shortened" year last year. Especially the elementary students.
7/21/2020 11:37:40	Parikshya	Bhattarai	Single mom	Wichita KS	Open school on time not delayed, bills don't stop coming and children's future is on the line.
7/21/2020 11:37:45	Michael	Rea	Parent	Leawood	I believe the benefits of in person education outweigh the risks and that children should have the option of attending school as they normally would. For those families that are uncomfortable, stream video from the classroom and allow them to participate remotely at the level they are comfortable with. Just don't penalize the children who need (and want) social interaction as part of their learning journey.  For those teachers that do not feel comfortable or have a restriction that prohibits them from teaching in person, provide options for furloughs or jobs they can do (one-on-one teaching via videoconference) remotely.  I'll gladly expand more via phone if helpful.
7/21/2020 11:37:47	Lori	Stahlman		Concordia	School should start in August. It should be based on individual towns as the numbers of Covid vary across the state. It is a greater risk for our families that children are not in school due to education and social emotional growth and well-being. Our summer programs have been running successfully without considerable spread of Covid and our school system has shown that if cases come up they are capable of dealing with it and stopping the spread already.
7/21/2020 11:37:54	Cheyenne	Bartz		Lawrence	We cannot put the brunt of our terrible economic situation on our children. We have to stop in-person classes until our local leaders are willing to step up and enforce the safety procedures necessary to keep our communities from continuing to spike in cases. I understand there are counties with numbers that are reducing, however there are still far too many cases. Our children will not be returning to anything that's resembles a routine or normal, so I can't fathom how social skills is even on the list of reasons to return. We had months to work out online education and get up to date in new technologies, which quite frankly should already be in place, instead we refused to listen to science in hopes that everything will be fine in the fall. It is beyond inconceivable and an absolute outrage that we would even have to voice our opinion to NOT risk the lives of our children, our teachers and faculty, and quite frankly the rest of the community. Stop this nonsense now, NO IN-PERSON CLASSES until we are able to comply with the recommendations of the CDC.

7/21/2020 11:37:58	Tammy	Reeves		Basehor	The negative mental/psychological impact of not getting children back into school far exceeds their risk of contracting COVID-19. Teachers and their work are ESSENTIAL and if they wear the appropriate PPE and perform hand hygiene they will be fine just like health care workers, truck drivers, grocery store clerks, etc. Our children need to get back into the classroom sooner rather than later and resume a normal, educational and socially interactive environment
7/21/2020 11:38:00	Rebecca	McBroom		Newton	Please open the schools back up in August. Our kids have already lost so much valuable time. Don't make them pay the price of missing out on much needed time. Other states are opening. Kansas needs to as well.
7/21/2020 11:38:00	Kristine	Meyer	Self/Taxpayer	Chapman	As a past BOE member, I strongly believe the Kansas Board of Education should follow the Governor's order and delay the opening of school, at least.
7/21/2020 11:38:02	Toni	Kefffer	USD405	Lyons	Delay school start
7/21/2020 11:38:05	Julie	Riffel		De Soto	I do support local control BUT...with a pandemic and the fact that people are sooo mobile my husband and I (both retired school teachers of 34 yrs each) support the Governor's decision!! AND YOU SHOULD ALSO!!
7/21/2020 11:38:13	Melissa	Barnett		Coffeyville	I support the governor's decision to push back the start date of schools. I can't believe we are playing politics when it comes to safety.
7/21/2020 11:38:16	Shelbe	Smith		Wichita	Online school only.
7/21/2020 11:38:18	KaiLei	Petz		Pratt	Send the kids back to school!
7/21/2020 11:38:18	Gretta	Hug	None	Scranton KS	I would hope there is some consideration given to shortening the required length of the school year.
7/21/2020 11:38:19	Melissa	Welch		Junction City	I have two children that attend high school in Junction City and as a parent I think we should open the schools on time. I know my children need to be back in school but I know that they will adjust to what happens. The ones I am worried about are the younger children that have not been in school since March. The ones that need the extra help that are being left behind because as much as I hate to say it the online schooling was a joke. This summer has had baseball playing tournaments and traveling to different towns and not one of them ever showed signs of the virus. The faster we can be back into school the faster we can teach the safety precautions in place for the students. The children need to be in school and it is hurting them more to be out of school.
7/21/2020 11:38:27	Julie	Quakenbush	Catholic schools	Hope to have schools go	Like to have schools open on time but understand the start date, both parents in the house still work and it's very hard for us to homeschool them and not have them fail In there work and knowing what they need to be doing.
7/21/2020 11:38:28	carl	kissell	self	Pratt	<p>Covid is real, no question about it. It is highly contagious, no argument about it. But since it has been around for months, it is pretty much everywhere. It is likely that everyone has come in contact with it. So, many would test positive for it. It is something we all must be aware of.</p> <p>However, it is not something we should have a knee-jerk panic over. It has nearly a 99% survival rate so nearly everyone who does catch it will survive – it may be tough, but they will survive. The flu is sometimes tough, but we are not panicking over it. Pneumonia is tough, but we are not panicking over it. People have died from Covid, but in no greater numbers than from the flu or pneumonia; so what makes Covid so different?</p> <p>Truth is that nearly all of us have already encountered the Covid virus. We can't avoid that and no amount of social distancing, wearing of masks, or any other "solution" will change it.</p> <p>Our children are suffering more than anyone over this adult panic. They don't understand and react emotionally different than adults. This fear will be engendered into them for the rest of their lives and no one knows what the eventual results of that will be. Children are social beings and denying the opportunity to socialize with other children can have devastating effects on them.</p> <p>We hear about "flattening the curve" and over-and-over have postponed many things for the 14 days requested. How many times do we have to do the 14 days thing to flatten the curve? It seems that such a plan has not worked except to keep everything in turmoil.</p> <p>Let's get back to life. Let's start by letting our children get back to school. If 14 days delay has not helped much in the past, what is another 14 days delay opening our schools as our governor has implemented going to help?</p> <p>I encourage the Kansas School Board to reject Gov. Kelly's executive order and allow our schools to open as scheduled!</p> <p>Thank you.</p>

7/21/2020 11:38:29	Justin	Summers	Hays high school	Hays is	My three kids were devastated last year missing the last few weeks. I beg you and my kids beg you to open up schools on time never have is seen a senior, sophomore, and 8th grader wanting to go to school. Please open up with out mask, just look at the stats of kids getting this virus...
7/21/2020 11:38:35	Katie	Jackson-Stenlund		Salina	I think we need the extra time to get supplies and prepare for students. Starting this early with this type of uncertainty is irresponsible.
7/21/2020 11:38:35	Laura	Archer	Olathe moms	Olathe	My high school student NEEDS to go back to school for his educational needs and social interaction.
					<p>The Kansas State Board of Education needs to support Governor Kelly's mandates regarding the delayed start of school. The present levels of Covid-19 are only going to rise over the next few weeks.</p> <p>But that is only a start. The Board needs to follow the guidance of health professionals, not the wishes of politicians who think that the best path forward is the quickest return to "normalcy". I do not see how the Board can expect schools to reopen to in-person instruction, even with a delayed start. History shows us that this pandemic will claim many more lives. The Board has the power to determine just how many innocent people will pay the ultimate price.</p> <p>We do not yet know the full extent of health damage caused by the SARS-CoV-2 virus, nor the long term effects. We do not yet know it's impact on children. We do know how it will affect the adults who manage our schools. Teachers around the country are already dying from SARS-CoV-2 exposure in school settings.</p> <p>Not having in-person instruction is not ideal, but it is far more preferable than the cost of its implementation during this time. We can make up for lost time once schools can safely reopen. We won't be able to do that for children who suffer from life-long disabilities as a result of Covid-19. It will be a more difficult task if we don't have the experience of teachers who die, or are unable to return to work.</p> <p>We are challenged by circumstances that last occurred during my great-grandparents' lives. We must make decisions based on long-term goals, not short-term desires.</p>
7/21/2020 11:38:39	Clark	Peters	myself	Manhattan	
7/21/2020 11:38:40	Carrie	Paschke	Mom of 3 athletes	Overland Park	With all due respect, Executive Order 20-58 is not, at all, 'in the best interest of the students' as it states. Our students need to be back in school, they need to be allowed to play sports and participate in activities for their own mental health and overall well-being. The sole factor to justify keeping healthy kids at home can not be a number of cases of Covid in Kansas. There is so much more to the story than that as study after study is showing us. Kids are not getting very sick if they are getting sick at all. They are not found to be major spreaders either. Keeping them from participating in life right now does a greater disservice to them than anything. They can go to school and they can play sports TODAY safely. Dozens of countries around the world are showing us that through their numbers and statistics. Iowa and Nebraska said they will start school in August and play sports. Let's make that same choice here in Kansas. Let's not get fooled into thinking we don't know anything more about the virus now than we did in March. Let's not continue to think we have to make the same choices today we did months ago with the presence of new information. Let's not let fear drive the decisions that will impact our kids for the rest of their lives. Thank you for your consideration.
7/21/2020 11:38:41	Elke	Lorenz	Self	Manhattan KS	Please respect the decision as announced on July 15 by Governor Kelly, Commissioner of Education Watson, and Head of KSDH Norman. These three experts have the insight, knowledge and expertise to make decisions in the best interest of All Kansans. Thank you.
7/21/2020 11:38:47	Allyson	Jasper		Olathe	Delay of school re-opening is essential and the only sensible choice. I should not have to compromise on the health and safety of my children. Kansas has more positive cases per capita than almost any other state. With cases growing by the day, I cannot make an informed decision on whether to select in-person or online learning for my children given the uncertainty. School districts and parents need more time. I have always placed my trust in the school system. Now, I'm not so sure. Please do the right thing and do not politicize my children. Vote to support the delay.

7/21/2020 11:38:49	Alex	Avey		Atchison	<p>As a parent and an educator, I respect all the different views and opinions that are currently out there in regards to the upcoming school year. I want my children to be able to go to school but at the same time, I want them to have the best chance at a "normal" school year as they can.</p> <p>I know with the extra time the governor is trying to give us, it will allow school districts, administrators, and teachers the time to gather supplies and ideas/procedures that will be necessary to start the school year. It's my understanding that my school district has items ordered but we are still awaiting their arrival. We aren't going to be able to begin the year as we normally do and this is un-chartered territory for all of us. We were thrown into distance learning back in March without the training or experience and did the best job that we could. Now we are given the chance to take the guidelines/recommendations/mandates and get together the best plan for our school districts to give all students a quality education while keeping everyone as safe and healthy as possible.</p> <p>We are in education and although we are "in it for the kids", it is very disheartening that is the phrase I hear to justify why teachers should be ready to go back in August without the worry or fear of the unknown. I want to be back with my school family but I don't want it to come at a cost of my own family. I want to be prepared to take on the school year and I believe these extra couple weeks will give us a chance to do that. We are teachers, we are flexible, we always expect the unexpected and we love our kids.</p>
7/21/2020 11:38:52	Deanna	Dunlap		Wichita	Opening schools just seems to have "disaster" written all over it for our community. I know the importance of learning, the role the schools play in the lives of both our children and their parents. However, if we do not get this pandemic back under control, none of us will return to work or school for any meaningful time period without being shut down again. Businesses will suffer when an outbreak occurs that impacts even more people than we have seen thus far. Science is providing information that children, especially middle school up, are just as likely to spread the virus; children can become very ill from this virus. Listen to science.
7/21/2020 11:38:53	Sheila	Johnson	Pratt High School	Pratt	Please don't delay!
7/21/2020 11:38:58	Brandi	Griggs	Clay center community	Clay center	Please do not require our kids to wear masks. My child has an IEP and already struggles enough as it is. Requiring him to wear this will be detrimental to his ability to learn and function during the day. People are making this much more serious than it is. Fight for our rights and don't approve the order to wear masks.
7/21/2020 11:39:02	Whitney	Howard		Alma	I believe this should be left up to the school districts and counties as a blanket coverage will not fit everyone. We have counties who have been very diligent and have very minimal cases where this would just add hardship to families. There are other counties where this could be the best option, but to me this feels like a one sized fits all approach that does not fit and is not best for our entire state.
7/21/2020 11:39:03	Kishan	Hall	None	Shawnee	Vote no to Governor Kelly's Executive Order.
7/21/2020 11:39:04	Alisa	Branham	The University of Kansas	Lawrence	Please delay the start and encourage online classes for the safety of everyone, including teachers and staff!
7/21/2020 11:39:04	Stacy	Robins		Shawnee	I would rather start virtually in Johnson county as planned then go start after Labor Day. Because there is such an unknown what it's going to be like after Labor Day. Let's at least get started. I do not want to go to school in June next year.
7/21/2020 11:39:08	Janelle	Brower	Blue Valley Schools em	Overland Park, KS	Please support executive order 20-58 and delay the start of school to allow districts to put uniform safety measures in place to protect students and adults and slow the spread of Covid-19 in our state. Thank you for your work to protect our communities.
7/21/2020 11:39:17	carlie	scheer		lenexa	i'm a sophomore in high school and would like to start school whether online or in person
7/21/2020 11:39:20	Deborah	Montgomery		Olathe	I am in full agreement with delaying the school year and moving away from in-person learning to keep our children safe.
7/21/2020 11:39:22	Diana	Tapp	Blue Valley school Dist	Overland Park	I would appreciate having more time to safely get prepared for students. I have a spouse who is at risk, so any protective measures I can take would be appreciated.
7/21/2020 11:39:24	Nora	Perry		Shawnee	I agree with Governor Kelly and delaying the start of schools
7/21/2020 11:39:28	Paula	Sears	Cheney USD 268	Cheney	Please use the adopted plan in the Navigating Change document! It is a safe, good plan and LOCAL districts should decide how they'd like to proceed with school based on their spread. It should NOT be a statewide decision. Thank you for your time and consideration during this difficult time. Sending prayers!

7/21/2020 11:39:28	Clayton	Bradley	Elementary School Para	Wichita	Making masks a requirement will cause more problems for the teachers and staff of all levels. In elementary, they would be whining about wearing them and constantly messing around with them. In high schools, it would allow the students to get away with more things like talking back, and using chewing tobacco and this may not be a big problem in big city schools, but out in the smaller schools, this would become a major problem.
7/21/2020 11:39:36	Taylor	Scrivner	Blue Valley	KC	Please don't open schools. Even if students are less likely to die from it, we have to move away from thinking of cases as exclusively "deadly" or "mild." We don't know the long term ramifications on a child's health, and what we do know is that it will have a distinct negative effect on mental health if students feel like they've accidentally killed their parents, teachers, staff, or loved ones.
7/21/2020 11:39:42	Brownie	Simpson	Kansas City Catering	Shawnee	We need to get our children back in schools. Everyone is at risk but we need to think of our children first. If a teacher is uncomfortable they can stay home. We put our emergency workers on the front line teachers need to go there too. Children are loosing ground daily by not being in school. We have lost our business and are trying to rebuild it. It will take a lot of sacrifice to get through this. Everyone needs to be on the front line.
7/21/2020 11:39:44	Callie	Danner		Gardner	Please keep closed until after Labor Day
7/21/2020 11:39:46	LaDeena	Johnston	Oaklawn, Wichita and A	Wichita	I watch and help transport my grandkids in the above districts when there is no school and before/after school. They range in age from 5 years to 15 years. I am an RN and I have an autoimmune disease [RA]. I watch the children so their parents can work. If/when one of them transfers Covid-19 to me, their parents will be out of work and I could die. As a health professional who has little faith in non-health professionals determining the safety of children returning to the classroom, I would suggest on-line lessons continue until there is a successful vaccine or viral spread has been significantly lessened. That would benefit the business world and the people like myself who have vigilantly social distanced and avoided this plague.
7/21/2020 11:39:47	Anonymous	Anonymous	Teacher	Kansas City	Please back up the governors executive order to delay the start of school until after Labor Day. Please continue with remote learning (with updated expectations that will be formulated during August) until the confirmed case numbers steadily decrease for at least 2 weeks.
7/21/2020 11:39:49	Jae	Kim	Parent of Blue Vallye Sc	Olathe, KS	Hi. I am a mother of two boys, upcoming 5th and 2nd grader and my youngest is special needs with autism and gifted. Please consider to reopen school in person especially for special need students. My special need son has struggled with online learning and it's not possible to get the IEP services online. I am so afraid he will regress if schools continue to close and delay his IEP services. Thank you for your time and consideration.
7/21/2020 11:39:49	Little	Barlow	None	Hutchinson	According to the science, this virus is equal to or less deadly than the seasonal flu. According to the science, thus virus isn't as dangerous to younger people. According to the experts, all we need to do is wash our hands and wear a mask. If I can go to Walmart, Home Depot, Lowe's or the local liquor store, then why can't kids return to in school learning and sports? These teachers that are concerned about returning to class do not seem to be as concerned about shopping in the local stores.
7/21/2020 11:39:51	Deb	Lewis		Lenexa	I support the governor's Executive Order. As the mother of an incoming 6th grader and the wife of a high school educator, I believe that delaying the start of school will give schools more time to get plans in place to protect the student, faculty, and staff. Please uphold the governors order so that families across the state can stay safe and healthy.
7/21/2020 11:39:51	Amanda	Arevalo	Emporia Public Schools	Emporia	The delay of school is important to the health of our students, teachers and staff.
7/21/2020 11:39:53	Angie	Thissen	Maize	Wichita	Open schools!!
7/21/2020 11:39:53	Jenny	Skillman	Public school parent	Lawrence	Please vote to APPROVE Governor Kelly's order to delay the start of school. While districts may ultimately approach education delivery differently based on local circumstances of the pandemic, Kansas AS A UNIFIED STATE needs this time to try to slow the covid spread and for educators to appropriately prepare for what is certain to be a challenging school year. Thank you for your service.
7/21/2020 11:39:55	David	Comer	Self	Overland Park	Kids need go back to school in August as scheduled.
7/21/2020 11:40:00	Christine	Woods	Teacher	Overland Park	For the safety of our students and staff we need to delay the start of school til after Labor Day

					<p>It is imperative that the board accepts governor Kelly's executive orders as they relate to schools. School districts like ours have small administrative teams and need time to ensure we are opening our buildings in a safe fashion. We need time to engage our staff and community so we can be sure to have plans to open our facilities that meet the specific needs of our community. If we do not delay the start of the school year, we will have to rush to put a plan in place which is not ideal given the magnitude of this pandemic. Kelly is providing much needed guidance for schools using outstanding sources for her decision making. It would be counterproductive for our leadership to contradict those who are making these recommendations. Leaving politics out of this is absolutely essential. I can tell you I am no democrat, but I support this decision. Private businesses have the right to make appropriate decisions to keep their environment safe, and we should have the same right as our own entity. The fact of the matter is that if this is left to individual school districts to decide, we will have a mess on our hands keeping the students in Kansas safe. Right now, public education is its own entity, just like Walmart, and our leadership is recommending the same things governor Kelly is ordering. I urge you to approve these executive orders so we can safely serve our communities in these difficult times.</p> <p>Steen Danielsen CJSHS Assistant Principal and Athletic Director</p>
7/21/2020 11:40:01	Steen	Daniele	USD333	Concordia	
7/21/2020 11:40:08	Anthony	Lewis II	Free State High School	Lawrence	Allow all sports. The staff and coaches are doing a good job from stopping the spread. Let the kids play
7/21/2020 11:40:10	Kristin	Westgard		Wichita	<p>Please do not support this proposed Order. It is harmful to children and their families to preclude them from any academic instruction through a public or accredited private school until after September 9. The proposed order is not in the best interests of Kansas children or their families. This proposed action is unwarranted given the studies from other countries that have reopened schools showing the low risks to children of COVID and the lack of "hotspots" triggered by re-opening of schools. You are forcing working parents into an impossible situation by postponing school and harming the mental and physical health of our children as well as their academic progress by denying them academic instruction and school sports for a month. If you insist on taking this action, please exclude licensed private schools from the order. Further, you should exclude sports from the ban. Our children have been practicing safely through their schools since May. There is no valid or reasonable basis to deny them access to school sports practices from August 10 through September 9.</p>
7/21/2020 11:40:14	Rachel	Chushuk	Teacher - Blue Valley S	Spring Hill, KS	<p>I encourage you to uphold Governor Kelly's executive order. At 30, I would, on paper, be in the "safer" age group. However, I have a compromised immune system, putting me at higher risk of complications from COVID-19. We teachers want nothing more than to be back in the classroom teaching students. But, with the cases rising, I do not think it is currently safe to do so. If schools open on time, I believe you will have many teachers retire early or leave the profession. Since we struggled to find subs pre-pandemic, I cannot imagine we'll be able to fill in all of the gaps returning too soon will cause. Please approve Gov. Kelly's order. This will give districts and teachers time to prepare as well as giving us more time to slow the spread.</p>
7/21/2020 11:40:26	Brenda	Benter	USD 259	Wichita	<p>I think the start of school should be delayed. Teacher lives and student lives are more important! COVID cases are higher now than when we shut down in March. The school board is sitting there between their partitions but we won't have that in the classroom. The virus is too out of control right now to do face to face learning. Start online!</p>
7/21/2020 11:40:27	Kathryn	Schroeber		Olathe	<p>I feel strongly that we should hold off until after labor Day. Any extra time to get Covid or even get it so it's going down instead of up is a plus. I'm sure they can figure out how to make up the days if that's an issue. We have family that is very compromised one just had open heart surgery last week and the thought of putting anybody at risk for the sake of 3 weeks seems idiotic. Teachers didn't get their teaching degree with the knowledge that they would be told that they had to put their lives in danger unnecessarily they don't get paid enough in all reality no one gets paid enough for that. To make this a political battle and not about people's health and safety is so selfish and unfathomable I just can't even comprehend why we even have to discuss this. I am hoping and praying that everyone will be able to put politics aside and try to keep everyone safe healthy without the worry of having to pick between kids learning their safety family safety and Friends safety.</p>

7/21/2020 11:40:27	Amy	Maskil	parent of a K-12 student	Kansas City	For the safety of our community, we need to delay the opening of any and all schools until we see consistent decrease in CoViD-19 cases. Schools should have the same capacity, social distancing, masking requirements as any other business or organization. Right now, we would not allow any other indoor event with hundreds of people in an enclosed space with poor ventilation and no ability to appropriately social distance. Opening schools will create such an "event" for 7 hours a day, 5 days a week. Leaders who allow schools to open are negligent in their responsibility to help ensure safety of their communities, counties, and state if they allow schools to open before we have a consistent reduction in disease spread for at least 14 days.
7/21/2020 11:40:32	Toni	Berrie	My family- Olathe Public	Olathe	I think it is a great option to delay the start of in-person school to after Labor Day!! We are not having gatherings over 40-50 people, but you want my kids to be indoors with 400+ elementary kids, 800+ middle school kids and 1700+ high school kids!?! Each district needs to have time to adjust their plans, especially since all of guidance is slow and ever changing!!
7/21/2020 11:40:32	Kelly	Seward	Olathe School District	Olathe	Please do not start school until after Labor Day!!
7/21/2020 11:41:04	Shauna	Rinearson	I teach high school in the	Overland Park	Given the increasing number of positive COVID 19 cases in Johnson County, as well as the data finding that young people 10 years old and over, I do not feel safe returning to in-person classrooms. I typically have 30 (or more) young adults in my classes, and we do not have the physical space to distance ourselves by even three feet. Additionally, I expect it to be very difficult for students of all ages to appropriately wear masks all day. Although I miss teaching face-to-face, delaying the start of the school year and/or beginning virtually will help protect students, parents, teachers and other school staff, the community—and, in turn, the Kansas economy. Please support Governor Kelly's executive order.
7/21/2020 11:41:05	Bobbi	Enneking		Sabetha	Please follow Gov. Kelly's order and keep schools closed at least through Labor Day. As a Mama of school aged children and an educator of 20 years I am begging you. I know parents want our kiddos back in school, I know children NEED school. But, I can catch them up when they are safe. I cannot bring a child back to life or heal life-long health issues caused by this disease. Also, teachers basically learned a new profession in a weekend back in March when we told them to move all teaching online. Give them a few weeks of breathing room to get everything figured out while they're "on the clock" instead of working for free during their uncontracted summer.
7/21/2020 11:41:08	Casey	vohs	Louisburg usd 416	louisburg	I believe individual school districts and counties should have the right to make the decisions that are best for them. Every district will take multiple things into account and do what is best for their students and staff. Governor Kelly isn't personally involved with the different schools and there for my not know what is best for each school. Please consider overturning her bill and allowing school districts to choose what is best for their schools.
7/21/2020 11:41:16	Myka	Albert	Goddard High School	Wichita	I don't feel school should be delayed. The same safety protocols will be in place now versus later. The kids need to get back. School officials have been working all summer on plans. already.
7/21/2020 11:41:16	Catherine	Coulter	Usd361	Wakita, OK	If delaying school starting helps keep our staff and students safe, perfect!  The one thing we need to keep in the very fore front, regardless what we do or offer, is public health safety. We need to be very flexible around this primary contingent. (Constantly paying attention to community numbers etc.)  Wether we offer on site, online, or a blended curriculum is really secondary, don't get lost in all those details.  Everyone must feel safe, even staff. There must be processes in place to allow breathing room. If someone is not sure about their health, they need the space to quarantine (or test). We tend to just plunge on when staff don't feel well, in this situation that can't be the norm! How do we know if our fatigue is from a busy day or corona?  Schools need to be clean! With so many bodies sharing facilities day in and day out, this is an absolute necessity!! There needs to be iron-fast rules about school cleanliness!

					<p>I am writing to urge you to vote to uphold Governor Kelly's order to delay the start of school in Kansas until after Labor Day. I am a teacher and parent in the Olathe school district. I love my job. But I am scared to death to go back to work. Johnson County continues to trend up in the number of new Covid infections. I love spending my days with teenagers, in fact, the kids are by far the best part of my job. However, kids are not exactly famous for their ability to think about the consequences of their actions. Teens by nature feel they are bullet-proof. That's a normal part of development and growth for them. How are kids behaving during this pandemic? Look around on social media - overwhelmingly, kids are not wearing masks or social distancing. I don't want to risk my health based on the behavior of teens.</p> <p>I signed up to teach kids. It's a hard job and I am good at it. However, I did not sign up to put my family and myself in a position where we could become gravely ill or even die from exposure to a virus in the workplace. It is unfair and unreasonable to ask teachers to make the choice between work and health. We are in a global pandemic and must do our part to control the spread of this virus, i.e. suspending in-person school until this virus is under control in our region.</p> <p>Even though we want to go to school, and in spite of the burden on families, students, and the economy, opening schools safely is not possible when the number of infections is rising. My hope is that the members of the board will base your vote on the data from our infectious disease experts and delay the start of school.</p> <p>Thank you.</p>
7/21/2020 11:41:24	Christine	Setley	Teachers and parents	Lenexa, Kansas	
7/21/2020 11:41:26	Stephanie	O'Sullivan		Overland Park	Please do what's necessary to keep students, staff and families safe. Err on the side of caution and safety. Pay attention to CDC guidance.
7/21/2020 11:41:29	Patrick	Wheat		Lawrence	Please allow sports to practice even if school is not in session.
7/21/2020 11:41:31	Cindy	Blagg	USD 260 Derby	Derby, KS	Each decision that we have to wait for from BOE and, in turn, our county health commissioner, causes a delay to our timelines for enrollment, teacher training, and transfer meetings. We need the extra time to implement all of these mandates in mindful and safe ways for students and staff.
7/21/2020 11:41:31	Jessica	Karr	USD 261	Wichita	Please continue to keep our students and staff as safe as possible by extending the order of school buildings closed until it is safe to return. If people continue to be reckless with mask and social distancing mandates, keep buildings closed until there is a vaccine.
7/21/2020 11:41:36	Manjaree	Lavers	Parent	Lenexa	KEEP SCHOOLS CLOSED! Do not endanger the kids, school staff, parents and relatives. Listen to what is being recommended by scientists; the risks outweigh any benefits. Focus instead on providing quality online instruction.
7/21/2020 11:41:42	Elizabeth	Krumins		Topeka - grew up in Sta	<p>I hate that this pandemic has become political. I hate that people are talking about a percentage when they talk about kids dying. Any kid dying from this will be awful and any teacher dying will have a devastating effect on a whole group of kids. I understand that there are counties with very few cases and I truly hope they stay that way. I grew up in St. John in Stafford Co. My graduating class was 45, the largest class to pass through there for some time. I see that they have only had 2 confirmed cases of COVID so I understand why they, and counties like them, want to get back to in person school. However, what worries me is that it is these counties especially that do not have the infrastructure to deal with more than a couple of severe cases of COVID, if any. When I was young my mother had an infection that required hospitalization. The community hospital in St. John was able to take care of her for that as all she required were IV antibiotics, monitoring, and rest. However, I highly doubt that little community health center can handle a case of COVID that requires an ICU or intubation. Where do people go who need care? Great Bend, Hutchison, Wichita? Those cities would soon see their ICUs full. As a teenager in a small town my friends and I were always going somewhere. Great Bend, Pratt, and Hutchison were always good choices. Now with the talk of kids going back to school we are at higher risk of community spread in those larger towns, the very same towns that small towns residents rely on for their shopping. If counties were self-sufficient and residents didn't have to travel 30 miles for groceries or a Wal-Mart for basic supplies, I could get behind them starting school in a few short weeks. Unfortunately, they aren't, and viruses don't care what county you live in. Please protect all of our students and teachers and vote for Governor Kelly's Executive Order.</p>

7/21/2020 11:41:57	Jessica	Danford		Emporia	The dangers of the covid19 pandemic are more uncertain now than ever before. For the safety of our students, our teachers, and our community at large we need to delay opening schools.
7/21/2020 11:41:58	Jessica	Dome	Woodland Spring Middl	Gardner Ks	As a teacher in a Kansas public school, I ask the State BOE to please support the governor's EO. I feel if we are to give students quality education, either in person or remotely, the teachers and staff need adequate time to prepare. If my district were to return on Aug 12th as planned, and teachers Aug 7th, we would not be prepared. 3 days is a crunch to prepare under normal circumstances. It is all but impossible with the new regulations and guidelines. Student education will suffer. I worry if staff is not trained and ready we will inevitably be in another shut down situation. When schools do open, I want them to stay open to provide a stable learning environment for all students. Thank you for your considerations.
7/21/2020 11:41:58	Kim	Lee	Skyline Schools	Pratt	<p>I urge you to vote no to the Governor's executive order to keep all schools and activities closed until September 9th. First of all, my biggest concern is that schools and school districts don't lose our local control. School calendars can not and should not be dictated by the Governor. They should be left up to local control.</p> <p>As a teacher, I have absolutely no problem with waiting until September 9th to start classes so that we are more prepared, but again, that should be a local decision that works for each district and not a blanket state-wide order. I do have a huge problem with letting all our kids continue to do sports and activities now and waiting until August 10th to shut them down and then delaying all the school activities until well into September. If circumstances are that bad, shut them down NOW and let us be ready to begin all those activities on August 17th as planned. THAT IS STILL 4 WEEKS AWAY!!! If we shut all activities down now for 4 weeks, why couldn't we be ready to go on August 17th!?! The kids have been playing and competing all summer. If we are so co concerned, why are we letting it continue until August 10th? Why do we continue to ignore the statistics about our students mental health and their great need to be involved in school activities?</p> <p>Again, I urge you to vote no on the Governor's executive order and return the control to the local schools as it should be!</p>
7/21/2020 11:42:02	Beth	Behrens	School bus employees	shawnee	<p>To whom this may concern:</p> <p>Governor Kelly is requiring students to have a temperature check to enter the school. Since Covid 19 is this serious, the children need to be checked before entering the bus as well. The checks at school are after the fact. If a child has symptoms, can we not allow them on the bus?</p> <p>Beth Behrens 10706 W. 72nd St. Shawnee, Ks 66203</p>

					<p>We have always asked our teachers and educators to do a tremendous amount with very few resources: very few funds, very few hours, very few amenities, very few supplies. We cannot ask them to now risk their lives daily with potentially high exposure and prolonged contact to COVID-19 with even less.</p> <p>As the wife of a music educator and the mother of two children in the school system, I URGE the Board to APPROVE the Governor's executive order to postpone the opening of schools. This delay will allow the educators time to prepare their curriculum and classrooms to adapt to the critical environment for maximum safety for both themselves and their students.</p> <p>I understand the pressure placed on the Board to start school as close to normal as possible - many families depend on schools as a safe place for their children during the day while they work - not every family has the luxury of working from home. Other families express their inadequacy as homeschooling educators. However, this should not be the only factor considered when opening schools. SAFETY, above all else, is essential; opening schools in a dangerous situation of rampant infection is risking lives unnecessarily. COVID-19, unlike the flu, causes lasting physical damage to those infected. Survivors may incur disabilities that take away their abilities to work and provide for their families. As a community, we need to demonstrate that we care for these valuable members of society: educators and children.</p>
7/21/2020 11:42:05	Elizabeth	Love	My Family	Olathe	APPROVE Executive Order 20-58 (Delaying the 20-21 K-12 School Year).
7/21/2020 11:42:11	Aimee	Minnich	my family	Lenexa	Please allow elementary and middle school students to start school in August. Scientific studies show these young children are viral dead-ends. There have been zero cases of the virus being transmitted from pre-pubescent children to adults. Furthermore, the kids need to return to learning and routine.
7/21/2020 11:42:22	Joseph	Fix	Self	Lawrence	I understand holding school until Labor Day. But extra-curricular work for sports should absolutely be allowed to continue. These are being run in full compliance with guidelines including masks, separation, etc. physical and mental exercise is critical for these kids - and they face less risk than older people. The governors blanket approach to everything is the "easy way to avoid criticism". Keep the kids involved or you will lose them
7/21/2020 11:42:27	Marsha	Howard	usd259	Wichita	please keep schools closed till September 9. Don't play Russian roulette with the teachers lives or the students lives. If they catch the disease they bring at home to their own family. We have lost enough lives during this pandemic please don't make teachers and students a political issue bringing them back to school too early.
7/21/2020 11:42:29	Tammy	Karin		Manhattan	If the schools want to start before September 8th, then start with distance learning. Please do not put our children, their teachers, and the school staff on the front lines of this war. The extra time can be used for the teachers to be better prepared and to see what happens at schools in other states after they've been open for 2 weeks.
7/21/2020 11:42:34	Kara	Gourley	Parent of student	Lawrence	Please, Let the kids get back to school!
7/21/2020 11:42:36	Stacy	Anderson	Parent	Baldwin city KS	<p>I'm a very concerned parent and would like to Express my views on the reopening of school. I know that school is to open after Labor day and I'm thankful for that. I am high risk, my immune system doesn't work and I have respiratory failure. I fear for my child getting sick and bringing it home. I fear for teachers, staff and others children and their families getting sick</p> <p>I'm writing this because I would like online learning to be an option for this school year.</p> <p>During the winter months schools can barely contain the spread of the common cold or the flu. I'm worried there wont be enough supplies or staff to sanitize the school. I'm afraid the burden of ensuring students follow mask rules will be too much for the teachers and staff. If I were to get sick I probably would not survive. my child excelled doing homeschooling so I would like to be able to continue that. I also feel kids want to go back to school and I know socializing is important but it won't be what they had. I'm not willing to risk my child, myself or my family to this ever changing virus</p> <p>Please consider homeschooling for those families who feel the same way as myself</p>
7/21/2020 11:42:39	Julia	LeFevre	LeFevre household	Goddard	Thank you Sracy Anderson Please let the kids return to school.

7/21/2020 11:42:41	Gloria	Johnson	TPS 501	TOPEKA	Please approve Governor Kelly's executive order to have schools start on September 9th.
7/21/2020 11:42:43	Jon	Bigler	Self and family	Meade	I agree with Governor Kelly's mandate. Moreover I think the Kansas state senators should let her do her job! We didn't vote her in to have the Republican senators tie her hands!!!!
7/21/2020 11:42:45	Stephanie	Dein		Olathe	I am the parent of an incoming kindergartener and a relative to two teachers. I am asking that you please vote to follow the Governor's executive order to delay the start of school. Please put politics aside and think of the well being of teachers and other faculty as well as students. This delay allows school districts additional time to fully prepare buildings and classrooms, as well as put in place safety guidelines, so that everyone can have a safe return.
7/21/2020 11:42:49	Susie	Wilson	Parent of high school stu	Lawrence	Thank you for this consideration.
7/21/2020 11:43:09	Emily	Smith		Pittsburg	Please delay the start of school. We need more time to prepare and bring our numbers down. I want to keep students AND staff safe and feel we need more time.
7/21/2020 11:43:10	Amanda	Johnson	Pawnee Heights School	Rozel	I wholeheartedly support Governor Kelly's decision and would even like to see a virtual only or even longer delay. As a teacher and mother of four, I'm worried about my older kids or myself exposing my newborn to the virus. Our first concern has to be everyone's health and well being and providing a safe space for kids and faculty and I don't think we are capable of doing that at this point.
7/21/2020 11:43:12	Poop	Piss	Reddit	Flavortown	I think it is critical to agree with our governor!!! Schools need the time to figure out how to teach school amid this crisis. Our numbers are climbing every day. We need to buy supplies, receive professional development on social emotional needs of our students and families and we need to develop plans to how this will look in each of our buildings. Please delay the reopening of schools. And yes everyone should mask up!
7/21/2020 11:43:14	Chris	Exum	Washburn Rural High S	Topeka	No comment
7/21/2020 11:43:22	Karrie	Biggs	Wilbur Middle School	Wichita	I think school should open on time, but with mandatory mask and other precautions.
7/21/2020 11:43:25	Tula	Shamhart	Usd 435	Abilene	Schools needs to stay closed until after Labor day, or online for the fall semester. As a parent, I don't feel like sending my child to school to wear a face mask for the entire day is the best way to go. How are kids going to hear/understand the teacher, how are you going to keep kids 6 ft away in the halls during passing period. I would feel better if schools went online for the fall, and evaluate for the spring depending on if we have a second round.
7/21/2020 11:43:27	Jill	Haack	Jeds	Olathe	I think it is necessary to close schools to prepare for the new accommodations. I dont think schools should open until the rate of transmission has lowered. We don't know enough about covid 19 to know the long term chronic health risks to students, staff, and families. I also have a lowered immune system, how are you and the district going to keep me and others like me safe. I am far more likely to contract the virus and die from it. My doctor told me to act as if everyone around me has it and take every precaution. I work with 4-7 year olds, they are far more likely to spread germs then an older student or adult. These are my concerns. Also, please remember closing school does not mean no school. Children can learn and will learn remotely. It is not what any of want but to keep everyone safe it seems to be the best alternative.
7/21/2020 11:43:35	Kelsey	Baker		Scott City	Please delay school until last Labor Day for our children and teachers safety. Online would be preferable through the year or until safe.
7/21/2020 11:43:35	Michelle	White	Jefferson West	Meriden	Do not require kids to wear masks!
7/21/2020 11:43:36	Tonya	Applegarth	the children of Kansas--	Pratt	I think each district should have the ability to choose to open in August Or wait until September using the ksde recommendations on staying safe.
					Please fight to keep local control with the local school boards. Every community is different and each student population is unique. This is not a one size fits all--never has been and never should be. I am saddened that this governor has deemed herself the "keeper" of everything and when people do not succumb to her demands, she rules where it hurts all of us the most--with our children. She has separated the two EOs for a reason and it is upsetting that she has put schools in this position. Please vote "NO" on EO 20-58 to give control to local schools to make the decisions based on their own student population and communities.

7/21/2020 11:43:42	Michelle	Sours	Parent if USD250 student	Frontenac,ks kids in Pitt	I am fully in support of Gov. Kelly's order to delay start of school. As a parent and as a paraeducator, I understand that these are extraordinary times and we need to err on the side of caution. Since our county re-opened cases have continued to climb. PHS alone has over 900 students- plus the staff- in one poorly ventilated building. Lakeside Elementary has over 400 students, plus staff. According to research by Georgia Tech, gatherings of those sizes have a greater than 99% chance of at least one person with COVID-19. In years past, I have watched how quickly cold and flu viruses can tear through a school even with the most stringent preventative measures. I am frankly terrified of what could happen to the rate of community spread if we rush into mass gatherings of this size. I am also seriously concerned about availability of the cleaning and sanitation products necessary to contain this virus. Again, we need to err on the side of caution to keep students, staff, and the wider community safe. If we fail here at this point, we risk another broad, devastating shutdown. We also risk our own health and lives.
7/21/2020 11:43:47	Laura	Fix	Grandparent of free state	Lawrence	The governor should not be cancelling all extracurricular school activities between now and sept 8- children need to feel a part of something especially now- coaches have been following all of your rules - masks, temp checks, social distancing - taking this away from them At this time is irresponsible to their overall mental and physical well being - DO NOT let the governor do this to these kids
7/21/2020 11:43:47	Deanna	Perkins	Parent	Wichita	Please do not delay opening schools. My son is severely autistic, barely verbal and was just starting to make huge gains when school closed in March. We tried distance learning but were not successful. He learns in ways that we as parents are not equipped to teach. He has regressed in many educational areas since school closed. Delaying school increases the possibility of further regression for my son. Delaying the school year would also cause districts to redo their already approved calendars, and force families to modify vacations already planned, possibly eliminates much needed breaks during the year, or extend the school year which would shorten summer break in turn. Please do not delay opening schools.
7/21/2020 11:43:47	Kerri	Zorn		Emporia	I support the delay in schools opening. They need more time to prepare and gather information in order to keep everyone safe. We have one son who will be a Junior at Emporia High School.
7/21/2020 11:43:49	Dani	Bichelmeyer		Shawnee	I am hoping to delay the start. I have a new baby at home who I need to pick up from daycare by 4:30. I won't have time to go home and shower. I worry I will carry/spread.
7/21/2020 11:43:55	Sarah	Miller		Abilene	I think public schools need to get back into session in Aug to give our kids the education they deserve as well as the social interaction they need. These kids have been in groups all summer going to sports tourneys, etc, so what's different about them being in a controlled classroom environment? There are measures that can be taken to keep them safe, but keeping them inside for another month gets us nowhere. Parents are already back to work for the most part, so homeschooling isn't an option during the day, which means hours spent in the evenings on schoolwork. We tried this in the spring and the dedication and commitment to it was less than stellar. These kids need to move forward with their education. Let's get them back in school on time. Thank you.
7/21/2020 11:43:59	Bradford	Elsten	Family USD 497	Lawrence	The sports teams have demonstrated strong oversight and controls during summer conditioning. I feel that it is important to allow the sports teams to continue to practice for the mental well being of the high school kids. There are certainly more oversight and controls at the high school facilities then there will be if the athletes are all left on there own.
7/21/2020 11:43:59	Malinda	Just		Hillsboro	In favor of executive order 20-58 (delaying the 20-21 K-12 School year)
7/21/2020 11:44:05	Randall	Miller		Gardner	Open school.
7/21/2020 11:44:08	Troy	Gourley		Lawrence	Covid-19 isnt going anywhere. The mortality rate small and going down. Kids arent at risk. Delaying a month will accomplish what? The need to be in school.
7/21/2020 11:44:08	Twaila	Wiley		South Haven	Delaying the start of school during the warmest 3 weeks left of this year does not show forethought. Viruses typically show themselves in winter months and you are leaving no room for this. Nowhere have I read that you are reducing the number of contact hours students are in school, so this makes no sense. Also, masks only work if worn properly which includes not touching the face. People, including children, touch their masks constantly which only serves to spread concentrated contact from the hands!

7/21/2020 11:44:20	Angie	Ratcliff	Sekf	Wellington	<p>Yes please give the schools a bit more time to come up with a good plan that will keep students, staff, and the community safe.</p> <p>Parents want kids back in school. Teachers want kids back in school and I believe kids want to be back in school but we MUST provide a safe environment for them. The Covid cases are on the rise in our county and the age of the persons affected is getting younger and younger.</p> <p>Just give the districts time to get their plans in place. So they need to go three weeks longer in May. Is there anything wrong with that??</p>
7/21/2020 11:44:31	Katelynn	Brown	Edwardsville Elementary	Kansas City	<p>Thank you Governor Kelly for putting aside politics and putting our educators and children first. As a teacher, I am in favor of Executive Order 20-58. In my district, teachers have traditionally reported to work one week before school starts. I don't believe that providing teachers only ONE week to rearrange and for some completely re-think how we teach will be enough. Before students even step foot in the building, teachers will have to be trained on COVID-19 protocol, completely rearrange classrooms and plan out classroom procedures to comply with COVID-19 protocol, as well as complete our yearly mandatory professional development (Bloodborne Pathogens, mandated reporters, etc.)</p> <p>After not being in my art room since March and being told I will most likely be on a cart, I personally need more than a week to fully prepare to educate my students and learn how to properly sanitize supplies to keep my students safe. What I am saying is that teachers are going to need more time for education and guidance on how to teach in-person in a pandemic. Delaying school until after Labor Day, will allow districts more time to get necessary materials to keep students safe when they return, allow teachers more time to receive education on COVID-19 protocols, and will allow superintendents and health officials to continue watching the COVID-19 statistics to make the best decision possible for their district. We CANNOT go back to in-person schooling when the number of cases is increasing at an alarming rate. I desperately want to see my students, but not at the risk of students, staff, and parents getting sick. Thank you for realizing we need more time to prepare for the school year.</p>
7/21/2020 11:44:44	Crista	Dorsey		Emporia	<p>My husband and I are both healthcare professionals and are very concerned about what is being suggested by the governor concerning education. Please vote to uphold your original recommendations and allow districts to go forward with the plans they had worked all summer to implement. This is an extreme over reach by our governor and we believe you, as a body of professional educators, know what is best for the children of Kansas. It makes no sense to delay the start of school and upend entire calendars. Our kids need to be back in school and sports and return to some kind of normalcy and education above all else must be valued again. There is no scientific or medical data that supports this delay. We also ask that you remain committed to no masks for the younger grades. Again as healthcare professionals we think that mandating masks for this age group is ridiculous. Daycares, YMCA's, CDC's across the country have been operating without masks or social distancing throughout this whole pandemic without any outbreaks. Children are extremely unlikely to spread this virus.</p> <p>We would appreciate you taking a stand for the children of Kansas!!</p>
7/21/2020 11:44:48	Melinda	Ham		Clay Center	<p>While I understand parents need to get children back to school, I feel that the safety of staff and students should come first. The thought that children are going to return to school wearing masks is a joke. The masks will be a huge distraction that will actually hinder learning. Children are not going to social distance. If there is concern about spread, this needs to be taken into consideration.</p>
7/21/2020 11:44:49	Lisa	Deal	Teacher	Dodge City	<p>Please keep school closed til Sept 9. Give us a chance to have the best plans in place for our students so we can teach them live or virtually, their choice. Give us the ability to get all safety procedures in place and train all teachers how to respond to cases or quarantine. We want to be back—but we want to be back safely and prepared for our kids!!!!</p>
7/21/2020 11:44:51	Lori	Halfhide		Concordia	<p>Please delay school until after Labor Day. It's not worth risking our children.</p>

7/21/2020 11:44:52	Rachel	Reisig	Geary County Public Schools	Junction City	I support executive order 58 from Governor Kelly to push back the start date of schools. As a public school teacher in Kansas, watching the number of COVID-19 cases rise is very worrisome. We know that COVID spreads easily and will spread in schools to not only kids, but the teachers and staff as well. While the mortality rate is low for kids we need to think about them spreading it to the school staff and their loved ones who may be older and/or immunocompromised. Mortality isn't the only thing we should be worried about. We have seen cases where individuals have very long, tough recoveries with a chance of lifelong ailments as a result. I urge you to support this executive order and protect Kansas kids, families, and school staff.
7/21/2020 11:44:52	Dena	Johnston	Parent	Lawrence	I approve of the delay, if not continued delay of schools until safety measures and or a cure is in place.
7/21/2020 11:44:53	Wadona	Henson	USD 226	MEADE	I stand with the governor. As a parent and a teacher, I want to know that the safety of my self and my students are top priority. Masks and social distance measures need to be enforced. The school delay gives us as educators time to learn the measures and prepare our classrooms to be the safest we can make them.
7/21/2020 11:44:54	Chris	Hamman	Parent (SMSD) Instructor	Lenexa	VOTE YES!! I implore you to sign off on the executive order delaying schools. As a parent in Shawnee Mission and an educator in Kansas City, KS I am very concerned about bringing everyone together even with precautions (which we all know won't happen as they should). We need more time to prepare for this. Please vote yes on Governor Kelly's order.
7/21/2020 11:44:59	Robin	Grathwohl		Hiawatha	Please get these kids back to school. They mentally need it. We are so far behind because of the shut down last year. If we don't get them back to school they will just keep falling behind.
7/21/2020 11:45:07	Brock	Gann		Lenexa	Put our kids back in school ASAP
7/21/2020 11:45:12	Todd	Caudle	Students of Atchison Co	Atchison	<ul style="list-style-type: none"> <li>•Local school districts are better positioned to know if they should start on time</li> <li>•Kids need to be in school, there are many negative consequences to not going back. (Depression, lack of supervision, lack of motivation, etc.)</li> <li>•It could be better to start early, to give the flexibility to wind up classes by Thanksgiving</li> <li>•Many surrounding states are going back at normal time or giving kids an option and Kansas can accomplish this too: <ol style="list-style-type: none"> <li>1. Colorado Aug 17th In-Person or virtual</li> <li>2. Iowa July 1 Normal activities</li> <li>3. Missouri Local level, encouraged to open on time</li> <li>4. Nebraska, Local level, Omaha starting on Aug 11th</li> <li>5. Oklahoma, Local Level, OKC on time and virtual choice.</li> </ol> </li> </ul> <p>Kansans can adapt and overcome the challenges of being ready for a normal August start time. Trust the people of Kansas to rise to the occasion. Remember that "Kansas leads the world in the success of each student."</p>
7/21/2020 11:45:17	Sarah	Wernecke		Talmage	Online school until it blows over
7/21/2020 11:45:19	Houston	Clearwater		Emporia	Do not open schools until there are at a minimum 14 days of no new cases of covid 19. Alternatively if you do open schools, teachers should be compensated with some form of hazardous environment pay.
7/21/2020 11:45:24	Zetta	Harshaw	Self	Lawrence	The kids are going crazy with all the social distancing and not being able to really hang out. It's causing a lot of major depression and some kids and also suicide. Wearing all the mask in the world doesn't matter because if we're still going to get it then we're going to get it. It can't be prevented. This is just a time for everyone to eat healthier and take better care of themselves. But school should start back regular as it always has. Because Even being quarantine people still have to go to the store and in that moment they could catch the virus and bring it home so either way we're not gonna be safe completely. It's better to just go ahead and live life, and try to be as normal as possible. I think school should open right back up the way it always has for years. Sports should go forward, Because with or without this virus life will still go on.
7/21/2020 11:45:27	Lori	Rowe		Topeka	Please support the governor's order for delaying the start of school. I don't think it is safe or wise to start school while our state's cases are rising. The later start date will also give the teachers and the entire staff time to get things ready for the students.

7/21/2020 11:45:28	Storm	Shaw	Blue Valley Southwest	Overland Park	As much as I love being with my students, I am terrified of being in a room with potentially Infected people. If we are expected to go back to school then a delay would at least allow us to be better prepared to handle things safely once we do return. Please consider the safety of the adult teachers that have to be in close quarters with the students who could be infected.
7/21/2020 11:45:45	Bryn	Mosbarger		Goodland	We do not support the decision to delay school. I am not going to ramble on about the low percentage of children affected by coronavirus because you already know this. These children need to be in school.
7/21/2020 11:45:46	Harmony	Gerlach		Newton	I think delaying the start of the school year is not only best for the safety of our students, teachers, and school staff but it also allows for schools to truly find out what their residents want and need and can work to make it happen in a way that is best for everyone. If we push to start on time schools will be scrambling to make any adjusted schedules work and that puts more unneeded stress on teachers and parents (who will need to come up with childcare for any kind of hybrid schedule).
7/21/2020 11:45:47	Donna	Calderon	USD 497	308 Sharon Dr.	We need to have physical contact with our students. We need to have brick and mortar schools. This is how my students learn best. This is how they engage in learning and form relationships with their teachers.
7/21/2020 11:45:55	Natalie	Hopper		Overland Park	Please do not delay let's get started
7/21/2020 11:45:56	Emily	Crabtree	USD 257	Iola	I get that there are no good options when facing the school year. As a teacher I want my students safe but I know that home is not safe for many of my students. I want them to feel safe but online learning is not feasible in a district where 40% of our kids do not have access to internet. My district leaders often take to heart the guidelines that are provided to us (we were the only district locally that prescribed to the less is more and grades not dropping advice during continuous learning) as such they have been waiting until we received guideline to start mailing final plans for the year. Leaving teachers and staff with 2 weeks to prepare for all scenarios before our regular start date. All I ask is that if your votes are against the delay please make it possible for those that need to delay if needed.
7/21/2020 11:45:57	Katie	Loughmiller	My family	Manhattan	I fully support the delayed start of school to allow our teachers and staff the time to develop effective ways to teach our students during this pandemic.
7/21/2020 11:46:04	Lacy	Ralston		Colby	I am a teacher, and I fully support delaying the start of school. I understand how important it is for students to be in school. However, I also feel it is imperative that our doors not open until we can insure that all schools can provide a safe and healthy environment for our students, teachers, and staff. The delay will give adequate time for schools to put safety measures in place as well as allow teachers time to adjust their learning plans and classroom design to better support those safety measures while still providing the learning experience our students need. Thank you.
7/21/2020 11:46:05	Dorian	Graham		Wichita	I believe schools and school activities should begin and proceed as planned. The implementation of masks, hand sanitizer and social distancing should be the measures put in place, not pausing school. At the least, private schools should be allowed the freedom to operate separate from the order, should it pass. Freedom of choice for our children's education is one of the reasons we choose private school. It should apply to this order as well.
7/21/2020 11:46:19	Sherry	Eklund		Kingman	No you CANNOT make me or my kids wear a mask! It is not safe!!!!
7/21/2020 11:46:33	Rhonda	Teater	Grandparents for normal	Kansas City ks	Open school on time and stop pushing it back. Let each school district decide what to do. Enough of this nonsense-educate our children and stop teaching them fear!

					<p>As a teacher, I have been apprehensive about returning to school. When Governor Kelly announced the postponement of school until after Labor Day and mandated safety precautions within schools, I breathed a sigh of relief. When I realized the following day that the state school board could reverse Gov. Kelly's orders, my anxiety returned.</p> <p>The delay makes sense. The required safety precautions make sense. School district administrators, teachers, and other district employees need the time to make sure their schools can open safely and implement KSDE's guidelines to the best of their ability. Now that the guidelines are available, schools need time to effectively implement them. This is not a situation that we can enter into without proper planning and preparation.</p> <p>I care about my students and look forward to seeing them again, but it is because I care about their well-being that I want to return to school only after proper safety precautions are put in place. Doing otherwise would risk the health and lives of all who enter the doors of our Kansas schools.</p> <p>Please support Governor Kelly's executive orders.</p>
7/21/2020 11:46:42	Rebecca	Knowles		Kansas City	
7/21/2020 11:46:43	Stacia	Weilert	School teacher	Hutchinson	<p>Our schools have no way to realistically keep students apart, therefore, we KNOW people will get sick and some will inevitably die. You wouldn't let other crowds congregate, why us? We closed school in March with far fewer cases, why open them with more?</p> <p>Thank you for your time.</p>
7/21/2020 11:46:44	Lisa	Glover	Wichita Public Schools	Wichita KS	<p>Numbers in Sedgwick Co are continuing to climb and our hospitals are filling up. I am a teacher recovering from a serious cancer diagnosis and my husband is also high risk. I do not believe delaying school will be something kids cannot recover from but being exposed to covid will be something they or their families may not recover from. Please listen to common sense - there is enough trauma in schools already without adding more stressed out children to what we already have. Academics don't mean more than the lives of students and staff. We as a society need to step up.</p>
7/21/2020 11:46:46	Erika	Saleski	Parent of public school	Prairie Village	<p>I fully support the Executive Order to delay the start date of schools. Our public health - the health of our teachers, students, families and all KS citizens - must be our first priority. With rising infection rates in KS, the state and local school districts need more time to plan and prepare for opening schools safely. This is the best course of action right now.</p>
7/21/2020 11:46:52	Alcinda	Daniels	Myself	Near Lecompton	<p>Thank you so much for your wisdom and care when dealing with our loved ones during this pandemic. I value and trust your judgement. Thank goodness you side with science and facts and care more about human life than our current president.</p>
7/21/2020 11:46:52	Kristina	Roberts		Junction City	<p>Thank you for protecting our children and our teachers. We closed school when there were far less cases than now and it seems so unsafe sending them in the middle of a pandemic for a full week 7 hours a day.</p>
7/21/2020 11:46:53	Jamie	Gabriel	Free State High School	Lawrence	<p>2020 has been tumultuous. Our student athletes have been disappointed and discouraged. But these teens remain patient and hopeful that they will have a fall sports season. I support the governors plan to delay in person classroom instruction until Sept 9th but ask that you please consider allowing fall sports teams to practice ahead of the school start. Staff, coaches and players all understand the seriousness of Covid 19 and are being careful and vigilant about screening and health. Please allow fall sports teams to meet for conditioning, workouts and practice. Thank you.</p>
7/21/2020 11:47:08	Stefani	Prieto		Garden city	<p>I think school should be online until after christmas break. It will help everyone get over flu season as well. It may also give everyone time to adjust to new rules schools will have.</p>
7/21/2020 11:47:12	Darlene	Koger		Lawrence	<p>Schools should stay closed. Eventually opening in stages. Small groups of at risk students first, then add half sized classes of primary grades only, add half classes intermediate grades, etc. Middle and high school should only be for at risk, special education, and courses that require hands on like labs .</p>
7/21/2020 11:47:16	Angela	Rogers	Parent of two students.	Shawnee	<p>I am writing to ask the board members to support the delay of opening K-12 schools until after Labor Day.</p>

7/21/2020 11:47:16	Lisa	Gering		Lawrence	I fully support the governor's order for schools to remain closed until at least September 8th as well as the safety procedures she recommends that need to be in place to reduce risk for our children, educators and school employees.
7/21/2020 11:47:17	Sarah	Kloster	Do not delay the school	Fort riley	SEND THE KIDD BACK TO SCHOOL
7/21/2020 11:47:23	Sara	Barber	KCKPS	Kansas City	I think an added three weeks not only gives school time to prepare but also allows the mask mandate time to see if it can mitigate the spread of the virus. At this point we are only going up in not only positive cases, but also deaths. It seems absurd to push students and staff of schools to put themselves at risk when there is clearly an evidence-based precedent that masks can, and if adhered to, will reduce the spread of Covid 19.
7/21/2020 11:47:27	Melissa	Dempsey		Lawrence	Please do NOT start school in the fall! For the sake of the teachers, children, and our families, USE SOME SENSE. Do what is RIGHT, for goodness sakes!!!
7/21/2020 11:47:29	Kathryn	Nielsen	myself	Sylvan Grove	I think that waiting until the rising of cases has slowed down is a good idea...and hopefully that will work for 9/8...I am tired of the most important part of school being sports and those schedules...would rather kids be doing more in humanities and so forth...what about more history so they aren't idiots like the president on this subject. I think students could do for one year without sports or just do winter semester sports this year. Seems like Football and Volleyball are more dangerous for sharing Covid. I'm a grandmother and I would like to see testing before people have to go back to school. If the President and sports players can have tests, then students, teachers and other school employees should be just as important if not more so...these people are our future.
7/21/2020 11:47:29	Joni	Braddock		Manhattan	I can't possibly understand why the school's starting after labor day would be a problem. It gives Manhattan a chance to see what the covid numbers are after all the college students return. We have a 10 yr old grandson living with us and we both have underlying conditions. I worked at our high school until Jan 2020 when I retired and I know from experience that it's impossible to keep that big school sanitary. Way too many students and way too much space. How are the desks going to be sanitized between every hour so that they are safe for the next student coming in. Seems like there is going to be more cleaning than class time!
7/21/2020 11:47:30	David Day	Day	Usd 453	Leavenworth	Students need to return to school sooner rather than later. Online learning does not work for all of Kansas kids. Many low income students don't have access to internet or parent to help them. It's not because parents can't but because they don't have the time with returning to work.
7/21/2020 11:47:44	Robert	Davidson	Self	Ottawa	Dont open until there is a vaccine or no new cases for two weeks.
7/21/2020 11:47:46	Carrie	Reece		Rozel	With an extremely low rate of child to adult and child to child transmission, there is NO evidence to support forcing our children to wear a mask. This is not feasible for students. If you have ever set foot in a classroom, you know this to be true. The evidence on the effectiveness of masks is also not clearly showing justification for wearing them. Please let our children have some normalcy in their lives. The risks of Covid to students is MUCH less than what we are doing to them with all this nonsense.
7/21/2020 11:47:46	Alicia	Stremick	my family	Overland Park	I hope that the first day of school is delayed. I believe the schools should have to show how they are going to accommodate social distancing and other guidelines to prevent the spread of covid-19 prior to the schools opening. I am especially concerned about my middle school child- students at that age may purposefully try to break the guidelines. He has relatively severe asthma and would be at a higher risk if he caught a respiratory disease. I am also concerned about students bringing home covid-19 to family members. I do think in-school education is needed, but it also must be safe. I think a part-time option would be a good way to mitigate the risk. My daughter is supposed to have 27 students in her small classroom this year which very much concerns me.
7/21/2020 11:47:47	Whitney	Endres	The Endres Famil	Overland Park	As a parent of both elementary and high school students, these kids need school. The American Board of Pediatrics says so, and I stand with them. The emotional toll it is taking on teenagers specifically is high. I am not whining about childcare, but just the well being of their mental health. Even if it's not every day, they need some time at school each week. Even well adjusted teens were struggling with online school. Praying for you all in your decision making.

7/21/2020 11:47:49	Sherry	Wolf	USD 293 public school,	Quinter, Ks	Please let the school year be a normal one, the kids are the ones who are suffering the most and yet the least affected. They will have been out of school for 6 mo if wait til after Labor Day to start, that is WAY too long. Just doesn't work for a lot of moms to do virtual school so let's just get back to a normal year. Our community is small, 900 people and we haven't been affected much at all, don't treat us like the big areas, it's different here, we are already isolated. Thank you!!
7/21/2020 11:47:56	Cynthia	Tilden	USD 480	Liberal	I am very glad the governor is delaying school opening until Sept. 9. Liber has seen an increase in the virus as well as the entire state as I understand it. It will be hard enough packed in to rooms with kids and getting them to comply with masks and such as it is without exposing is all before need be. Yes, the kids need to be back at school but not at the expense of student or staff lives.
7/21/2020 11:48:01	Karen	Henderson		Salina	Start school on time!!!! I do not support delaying the start of schools. They have had since last school year to start making accommodations for extra safety measures and different learning platforms.
7/21/2020 11:48:02	Patricia	Gau		13901 Flint Street, Over	Thank you for your service to Kansans and our community.I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening. I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following: Safe School opening following the Board of Education Return to School Plan No delay to student participation in school, athletics, and activities. In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions. This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense. Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.
7/21/2020 11:48:04	Kathrine	Tuiasosopo	My family	Manhattan	I am thankful for the leadership you have provided in leading us through the Covid-19 pandemic. Please delay and allow this spike to plateau
7/21/2020 11:48:09	Beth	Beall	Myself	Wichita, KS	Has anyone thought about outdoor classes? Instead of making kids sit behind plexiglass and wear masks, maybe have class outside? I don't like the fact that kids will not have any type of outdoor time at all. Is this something that can be considered since we are being told when you are inside, the virus spreads more than outside? They can still physical distance the kids, even have classes 3 days outside, 2 days online. Or even have classes inside but have all windows and doors open? Just a thought.
7/21/2020 11:48:11	Robyn	Gennett		Abilene	Hello, I am writing to you on the Governors' orders to mandate masks in schools. This is the first year my child will go to school and I am terrified of these mandates for them. I am terrified for the kids who are already shy and are now being told to wear a mask, how are they are going to speak up in class when called upon. How is a teacher supposed to teach 1st grade when kids playing with their masks and constantly touching there face, removing it, it'll be a huge distraction in school as well.We are treating children like they are our biggest threat when in fact they are not a threat at all. We are causing more harm to our children than this virus could ever do. I think people are forgetting that last year was one of the worst flu seasons in our schools but until the media came out and put fear into our lives and started to talk about COVID did the panic start. Last winter schools had a month where attendance was low due to the "flu" and we didn't need to put any extreme measures into places like masks or temperature checks. Please stand against this dangerous agenda which is being pushed upon the children and the whole population. There is NO need for our children to have these extreme mandates by our governor in our schools. Let school start on time, let the kids have some sort of normalcy. If you push back now who's to even say if they will allow our kids to go to school at all this year.
7/21/2020 11:48:16	Katie	Mitzner	None	Osawatomic	I believe the schools need more time to safely prepare the schools and develop a plan that will be successful for all kids attending whether that be in-person or home-based.

7/21/2020 11:48:23	Rebecca	Harris	None	Spring Hill	Open schools with a normal mid-August start date with both in-person and on-line options. This preserves the constituents rights to select the best option for their family and allows for the best educational opportunity. Thank you for your consideration.
7/21/2020 11:48:30	Deena	Sharpe		Scott City	We can't keep sacrificing our children's educations! They need the social interaction and physical interaction with their peers and teachers! It has not only affected my kids but several others emotionally, psychologically, and mentally! And physically! If you keep children out any longer thing of the ones who don't have loving homes! The ones who have been subjected to abuse for the past 4-6 months. Or have gone without food because their parents simply do not care.! And DO NOT REQUIRE masks!!! If you require masks the school districts shall be responsible for supplying them! As not all families have the means to afford them. Or simply put. I'm not going to make my children wear masks at school!
7/21/2020 11:48:37	Jennifer	DeHaven		Olathe	I am a first grade teacher and a parent. I'm scared. Please, I beg you to honor the Governor's proposed delay to the start of the school year.
7/21/2020 11:48:45	June	Trieb	Substitute teacher	Wichita	Schools need to open. Teachers and students who don't feel safe have the freedom to stay home.
7/21/2020 11:48:46	Angie	DalBello	USD232	Prairie Village	Delaying the start of the school year until matter Labor Day is the SMART and SAFE thing to do. The health of students and faculty at schools IS NOT worth the risk of starting schools in Kansas too early. Covid cases are increasing in Kansas, we should not be putting large numbers of people together in indoor spaces. Use science to guide decision making about when and how to open Kansas schools.
7/21/2020 11:48:48	Melissa	Hebron		Wichita	Open schools after Labor Day
7/21/2020 11:48:50	Ashleigh	Darnell		Emporia	Please don't open schools without 14 days no new cases to further ensure the health and safety of staff and students. Teachers are scared.
7/21/2020 11:48:52	Jessica	Michaelis	Mother of USD 329 stud	Maple Hill	I am ok with delaying school opening until after Labor Day IF the main reason is to help schools better prepare themselves for reopening due to increased restrictions or requirements due to COVID. I am not ok with delaying school simply because positive cases have increased. My kids want to go back to school but not if it means it will be like being in a prison!
7/21/2020 11:49:06	Nicole	Caravella	SMSD Parent	Prairie Village	I completely agree with the delayed start of school. We need to see these numbers going down before we can even consider any version or variation of in person schooling. I'm %1000 in favor of remote learning. Even if numbers start going down there are too many unknowns and it's not worth risking the lives of our children or our teachers and staff. I do feel that private schools should be included in this mandate as they are in Texas.
7/21/2020 11:49:07	Andrea	Young	Usd 305 and parent	Salina	As an educator and parent, I want school to begin and be done with Covid. However, I do not feel safe myself nor safe sending my kids. This public health threat is not going away and my 2 kids and I will be in the mix of 1,000+ people everyday.
7/21/2020 11:49:11	Jodi	Dineen	Lawrence Frer State Foo	Lawrence, Ks	I would like the kids to be able to practice before school starting in Sept. if parents are comfortable with it then I think kids should be able to practice! If there is going to be school then there should be sports and fall sports kids can be ready so the whole sports schedule doesn't get messed up! If things change then we can be flexible! Thank you!
7/21/2020 11:49:14	Jason	Cohorst	Shawnee fathers	Shawnee	We'd like the kids to go back to school sooner than later! They need it

7/21/2020 11:49:14	TERRA	MOON	PARENT	DERBY	<p>I THINK THE DELAY IN THE START OF THE SCHOOL YEAR ALLOWS FOR SCHOOLS TO PREPARE FOR SOCIAL DISTANCING AND REQUIRING PPE. IT ALSO ALLOWS FOR TIME TO IMPLEMENT THE ONLINE SCHOOL PROGRAM, ALLOWING THOSE WHO FEEL UNSAFE, OR IMMUNE COMPROMISED, A CHANCE TO LEARN FROM THE SAFETY OF THEIR HOMES. IT CAN EVEN ALLOW TEACHERS WHO ARE ALSO AT HIGH RISK TO CONTINUE TEACHING REMOTELY FOR THE ONLINE KIDS.</p> <p>I BELIEVE THE HYBRID SYSTEM SHOULD BE SCHEDULED. IF WE USE STATISTICAL DATA, WE CAN ROUGHLY ESTIMATE THIS TIME AND LET PARENTS, EMPLOYERS, AND TEACHERS PREPARE. IF WE DON'T NEED IT, WE CANCEL HYBRID AT THE SCHEDULED TIME OF. IMPLEMENTING A HYBRID SCHEDULE LAST MINUTE CAUSES WORKING PARENTS TO SUDDENLY REDUCE THEIR SCHEDULE AND POSSIBLY EVEN LOSE THEIR JOB. HIGH STRESS AND LOW PLANNING ON THE TEACHERS. MAJOR STAFF SHORTAGES AT EMPLOYMENT SITES, INCLUDING HEALTHCARE LIKE MYSELF WHERE OUT OF FIVE OF US THERE WOULD BE 3 NO LONGER WORKING A FULL WEEK IF AT ALL. WE HAVE SPECIALIZED CAREERS PREVENTING ANYONE UNLICENSED OR WITHOUT TRAINING TO STEP IN AND DO THIS JOB EASILY. A SCHEDULED HYBRID ALLOWS FOR PLANNING AND HIRING OF ADDITIONAL STAFF, MAYBE MOVING JOBS THAT WORKS WITH HYBRID HOURS, OR EVEN PLANNING FINANCIALLY TO BE WITHOUT AN INCOME. I AM FORTUNATE THAT WE WOULD LIKELY GET BY JUST FINE BUT MANY WONT WITHOUT INCOME. A SINGLE PARENT CAN NOT NAVIGATE A SUDDEN CHANGE SUCH AS THIS. WE NEED TO BE INFORMED AND PREPARED. THANK YOU FOR THESE CONSIDERATIONS.</p>
7/21/2020 11:49:16	Shawna	Allen		Olathe	Please delay school to allow teachers and staff to prepare to safely reopen. As a parent, I do not feel confident that the school districts have fully prepared to safely reopen and am concerned about the safety of my children, their teachers, school staff and their families. As a substitute teacher for the Olathe school district, I will not feel comfortable returning without some sort of training on how to keep myself and students safe. At this time Olathe has not offered any such training.
7/21/2020 11:49:19	Alexa	Jimenez-Juarez		Topeka	I think the interest of teachers and students need to be kept in mind. I urge you to delay the opening of the 2020-2021 academic school year.
7/21/2020 11:49:22	Eric	Rogers	Parent of students	Shawnee	I think the school delay should stand, and be extended until the health & safety related to covid can properly handled for all those in the community.
7/21/2020 11:49:23	Ally	Galbraith	Olathe moms	Olathe	Don't postpone school.
7/21/2020 11:49:23	Mallory	Lovell		Basehor-Linwood	I urge you to side with the Governor on delaying schools until after Labor Day. I am concerned as a mother, wife, and teacher. My husband is at a higher risk due to his autoimmune disorder. His office is not allowing people in the office until after January of 2021. I wish schools would follow a similar suit. Thanks for your consideration.
7/21/2020 11:49:28	Angela	Shaw		Pittsburg	As a medical professional, I advise that school opening be delayed. It makes sense to allow time for appropriate planning. Rushing to get school started in a haphazard way, is not a good idea for anyone.
7/21/2020 11:49:32	Laura	Leeper	Parent	Overland Park	Please delay opening schools until it can be done right. I know that most of you are conservative and feel that you will best represent YOUR voters by opening on time. But it is your job to represent EVERYONE. Imagine how you will feel WHEN the first person dies because you chose politics over logic and science.

7/21/2020 11:49:35	Ryan	Disbrow	Class of 2020	Garnett	<p>First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.</p> <p>Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <p>Safe School opening following the Board of Education Return to School Plan  No delay to student participation in school, athletics, and activities.</p> <p>In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.</p> <p>Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>I am one of the over 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.</p> <p>We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.</p>
7/21/2020 11:49:40	Katherine	Olson	Middle School Teacher	OLATHE	<p>Dear School Officials,</p> <p>I have stood by and supported all of your decisions the last 25 years of my career, even those which I may have seen as questionable. Now, teachers and students need you to support them and keep them safe. I fear teaching only via remote, but I fear dying or being isolated from my family due to exposure more. My mother lives with my husband and I, and my brother who visits is high risk. We have spent the summer keeping safe, and in one move by you, I may be spending the school year in our basement isolated to protect them. Please delay school and give our state time to figure it out. Teaching is my passion, but illness and death are not worth the risk.</p> <p>Educator, Mom to 3 teenagers, wife, daughter, and sister,  Kathy Olson</p>
7/21/2020 11:49:41	Jaysen	Prophet	My Family	Wichita	<p>Do not delay public schools from opening in August! Our kids are not in a high risk group for this virus and studies have proven over and over again that they not at risk.</p>
7/21/2020 11:49:41	John	Williams	Public School	Wichita	<p>I believe that this situation cannot have a one-size-fits-all approach. Every district is different and every district is facing their own problems. Counties like Harvey cannot be treated or punished because of Sedgwick county mistakes. Let every district decide for themselves when they can see students.</p>
7/21/2020 11:49:49	Tiffany	Smith	Tracher	Olathe	<p>Please delay start of school for the safety of my newborn baby, my husband with a compromised immune system due to cancer, myself, and my students and their families.</p>
7/21/2020 11:50:06	Amanda	Nelson		Benton	<p>I do not support executive orders that cover all areas regardless of specific risk factors or other considerations.</p>
7/21/2020 11:50:13	Eden	Detrixhe		Lawrence	<p>Many parents are thankful for the extra weeks Governor Kelly has given school districts to prepare plans, staff, and supplies for school during a pandemic. The time also allows the contagion rate to decrease where it has spiked. Her decision was a good one.</p>

7/21/2020 11:50:14	Brooke	Clements	My children and their te	Olathe	I am FOR delaying the opening of school. Cases in Johnson County are currently on the rise and we have been given no information on a plan for what should happen when cases are on the rise in certain areas. We have also been given little to no information on what in person school will look like and what remote learning will look like. I am very disappointed in many of the leaders in Kansas right now. Why has no plan been put out to the public yet? Why are we not listening to science? Why do rising numbers of cases seem to not matter to people? These are our kids and teachers health that seem to be on the line! My own children are all aged 10 and older, which from some research I've read recently is the age that is more likely to pass Covid to adults. Do teachers and their health not matter to people? Cases should be on a downward trend before in person school takes place. Thank you for your time.
7/21/2020 11:50:14	Frances	Garman	My children	Spring Hill	I urge you to please uphold Governor Kelly's executive order to delay school openings. My daughter is a senior this year and also has special needs. I am hoping this time will give the schools the opportunity to get things in place and also that the wearing of masks will help numbers start to drop so that I feel comfortable sending my daughter into the school to enjoy her SENIOR year.  I just want to add that I have not had a lot of confidence in our school district and their plans to start school on August 12th. With Governor Kelly's Order, they have the teachers still starting in August and I feel this extra time will give the teachers the time to safely set up their classrooms.  On top of all this, our school district has already send out an email saying that September 8th will be the start date and now they are saying that it could change back. That is completely irresponsible and inconsiderate! Please give us the extra time for the masks to take hold and teachers to get their room set up.  Thank you for your consideration!
7/21/2020 11:50:25	Chloe	Skidmore	Berean Academy	Newton KS	The governments job is to protect my freedom not to protect my health. This is an abuse of power.
7/21/2020 11:50:30	D	Smith		Gower	Either delay the start of school or do distance learning for first quarter. That is the third option. It does not have to be either we start if delay. We could start as planned but only online with the hopes that the health situation will improve.
7/21/2020 11:50:51	Kari and Eric	Hess	USD253	Emporia	Staged approach with science based decisions. Please take into consideration not all buildings are equipped for social distancing options. I believe Eastern District needs to take this into consideration when making the decision.
7/21/2020 11:50:52	Angela	Zugelder		Spring Hill	Keep schools closed until it is safe for them in the classroom!

7/21/2020 11:50:52	Robin	Wolgast	My children	Topeka	<p>While there are some unknowns regarding the lasting physical/neurological effects of Covid-19 on recovered children and adults, we know that such long-term damage is occurring. While there are some unknowns regarding a child's ability to contract and transmit Covid-19, we know (through a recently released study of 65,000 people in South Korea) that children aged 10 and older transmit the virus as efficiently as adults. While there are still some unknowns regarding the transmission of Covid-19 through surface contact, we know that the virus is primarily an airborne disease, and that its active particles linger in the air long after an infected individual has left the area. I have yet to see a school-opening plan that includes HVAC upgrades; I suspect most school facilities in our state have HVAC systems that would need to be completely replaced in order to ensure that we aren't simply re-circulating Covid-19 particles. I have yet to hear what level of hazard pay and other disability allowances will be made for teachers and staff – how will you replace them during their 2-week quarantines? Our local ERs were at capacity last winter with influenza patients – how will they handle Covid cases on top of that? (And how does Covid-19 interact with Influenza in those who are exposed to both? I fear we will find out in a few months.) Finally, how do we reassure taxpayers in these school districts -- many of whom are elderly – regarding the nightmare scenario of our children carrying the virus back to their neighborhoods? As a mother of 3 school-aged children, I know kids learn best with in-person instruction; but Kansas school districts are simply not prepared to welcome students, teachers, and staff back safely to brick-and-mortar school sites.</p> <p>Thank you for your thoughtful consideration of this difficult issue.</p>
7/21/2020 11:51:08	A	W	USD 232	Overland Park	<p>Delaying school until after Labor Day would allow school districts to purchase the necessary PPE equipment to keep school staff safe. Even by delaying this decision until July 22 you have inevitably set school districts back by yet another week. That is a week wasted, which could have been used for ordering supplies and finalizing district plans. Unfortunately, several of the people making these huge decisions haven't been a teacher, let alone in a school for a number of years. PLEASE, listen to the teachers. We are certified professionals, we know what we need in order to be safe at work, and it's time we are taken seriously. It's time we are allowed a voice when it comes to our health and safety, instead of being treated like submissive robots who "do it for the kids".</p>
7/21/2020 11:51:26	Fernanda	Jasso	parent	olathe	i do not feel safe with sending my kids to school with the covid situation i feel like it way to soon to be sending our kids to school
7/21/2020 11:51:32	Cj	Stremick	Concerned Parent	Overland Park, KS	Please do not rush opening schools.
7/21/2020 11:51:35	Shirley	Brogna	Myself	Olathe	I support Governor Kelly's mandates to delay opening of schools until after Labor Day & to implement safety protocols.
7/21/2020 11:51:38	Tabitha	schlack		fort riley	I am wondering why remote elearning cannot begin for everyone on aug 17th and the brick and mortar classes be offered in Sept as instructed by the governor? I feel there's no reason at the very minimum that the elearning cannot begin. Most students still have their laptops and for any new students needing one, y'all could set a date and time and have a drive up to sign one out. No one would even need to set foot inside the school, masks and gloves worn for distribution. Yes its ONLY 3 weeks difference but I think that 3 weeks of atleast elearning would help the kids so more much than just waiting and not doing anything.
7/21/2020 11:51:42	Kathy	McBride	USD 447	Cherryvale	Please support & approve the executive order to delay the start of school.

					<p>I am in favor of Kansas schools not starting until after Labor Day in accordance with Governor Kelly's executive order. I plan to send my child to in-person school, but it's neither prudent nor smart to send students or teachers and staff back before we can safely do so. One child, teacher, or staff member ill or is dead one too many. From a Kansas State Board of Education perspective, it seems that the overall Board would agree that it is not yet safe to have school in-person as the Board's meeting tomorrow is a remote meeting, and the group is choosing not to meet in-person.</p> <p>I hope that you and the rest of the Board continue to put everyone's safety and health as a top priority by keeping schools closed for a few more weeks, and allow the school districts to use the added time in August to unpack the latest information and guidance on how to open safely. Each district will be different, and while there must remain local control, the opening must be well-planned and take into consideration all controllable aspects of a pandemic that is out of control. I urge you to please support the Governor's recommendation.</p>
7/21/2020 11:51:53	Robert	Bowlin	myself	Lenexa	
7/21/2020 11:51:59	Ashley	Fagan		Topeka	Schools should not be delayed. This is a disservice to our children.
7/21/2020 11:52:07	Taryn	Whitmore	USD 475	Manhattan	As a second grade teacher I ask you to please delay the opening of schools until after Labor Day. I feel this is what is needed to keep students and teachers safe during this time. Thank you.
7/21/2020 11:52:10	Susie	Gilson		Olathe	<p>PLEASE keep the schools closed for at least the fall semester --- re-evaluate in late October for the spring. My daughter is a teacher and already has severe asthma, if she contracts this disease, it would most definitely land her in the hospital. My mother lives with me, shes 78 and has COPD. If my daughter is in a school classroom everyday, I will not be able to see her at all due to the threat to my mother.</p> <p>PLEASE keep the schools closed this fall!</p>
7/21/2020 11:52:15	Meghan	Evans	Parent of a usd 450 stud	Topeka	I support the EO made by the governor to delay the start of school until after Labor Day. Our teachers, administrators and us as parents, need that extra time to get plans in place and work all the kinks out. Not only is it not safe to return to school right now, but even if it was, school districts are not ready to go "live" with their "draft" plans. They (we) all need that extra few weeks!
7/21/2020 11:52:25	Taunya	Westerman		Isabel	Our kids need to be in class learning and being with their peers. They need sports and education and being IN the classroom. We do more harm with their mental health by keeping them out. We do more harm to high schoolers by them not being college ready because they will be behind or overloaded at home with no help. We happen to have very slow internet because we only have 1 option for internet because we live in the country. We have trained our kids into sitting in a classroom and having access to teachers in the room. Changing that on high schoolers isn't helping them its hurting them. I want my kids in class. I watched them the last 8 weeks of last school year. For kids that do fairly well to struggling and wanting to throw in the towel. I know my kids aren't the only ones who felt that way. Kids need to be with other kids. The low numbers of cases in kids shouldn't prevent opening.
7/21/2020 11:52:25	Lesley	Dillon		Fort Leavenworth	I fully support Governor Kelly. She has handled the pandemic response remarkably well. When things go south in Kansas, it has only been because of interference from the far-right political wing. A virus shouldn't be political and I appreciate how Governor Kelly makes decisions based on science and advice from medical experts. She has Kansans best interests at heart, even when the decisions are difficult and unpopular. I could not be happier that she is at the helm during these unprecedented times.
7/21/2020 11:52:41	Brittney	Scott		Goodland	I would like to see each school district decide what is best for them. I think sometimes people in Eastern Kansas, don't realize that it's not the same as Western Kansas. Sherman County only had 9 cases of COVID-19 and no one was hospitalized or passed away.

					<p>I have many concerns about delaying in-person school, several of which I will very briefly lay out below.</p> <p>First, COVID-19 simply doesn't pose the risk to children that it does to other Americans, nor do children spread COVID-19 to adults like adult-to-adult contact does. Thus, especially for K-5 children, the risk of transmission is quite low if schools take appropriate precautions to distance staff from one another.</p> <p>Second, the children need the structure, support, and education they receive from in-person learning. Not only are they missing academics, but they are missing crucial other contributors to their development while not in school – gross motor, fine motor, social development, and emotional development. While some of these can be done at home, the reality is that many working parents do not have the time and/or resources to devote to full-time homeschool and supervision, nor are there nearly as many opportunities for socialization and play right now due to COVID-19 shutdowns.</p> <p>Third, as an attorney who has significant experience in child welfare law, I know that there are many children who are being abused and neglected in their homes without the watchful eyes provided by school mandated reporters. Without that regular “welfare check,” I am very concerned that many children will suffer and/or die. I am already concerned about the potential influx of child-in-need-of-care cases that we will undoubtedly see when school does resume. These children need to be back in school.</p> <p>The American Academy of Pediatrics states that it strongly advocates that all policy considerations for the coming school year should start with the goal of having students physically present in school. Please check out the resources below for further support of how this may be accomplished. I know first-hand that our local Bel Aire/Wichita schools had plans in place consistent with these suggestions, prior to Gov. Kelly's mandate.</p> <p>This article published and supported by the Kansas chapter of Academy of Pediatrics, Kansas chapter of American Academy of Family Medicine, and KU Wichita Pediatrics is worth the read:  <a href="https://drive.google.com/file/d/1FdwPFA8jMZQYGfPCmaxwO7R4ybKYFVX6/view">https://drive.google.com/file/d/1FdwPFA8jMZQYGfPCmaxwO7R4ybKYFVX6/view</a></p>
7/21/2020 11:52:44	Jordan	Kieffer		Bel Aire	
7/21/2020 11:52:48	Will	Henderson	Parent	Prairie Village	I am very much in favor delaying the start of school to try and get the outbreak under control to allow for the potential hybrid approach to schooling (if the data and science supports the hybrid approach).
7/21/2020 11:52:53	Audrey	Goebel-Hall		Topeka	I'm a teacher who's at high risk for contracting COVID. I love my job, and I miss my students. However, I shouldn't have to risk my life in order to do my job. With cases on the rise in Kansas, opening schools right now would put the lives of thousands of Kansans at risk. Please, allow schools the extra time for cases to drop. Give educators and county health departments more time to figure out the best and safest plan for students and staff to actually return to buildings and learning. Don't make people decide between their lives and the lives of their loved ones and their jobs. We already have a teacher shortage in this state. Sending teachers back to work in deadly conditions is not going to encourage educators to stick around.
7/21/2020 11:53:09	Julie	Zollinger	Usd489	HAYS	Please accept the governor's mandate to delay the opening of school until after Labor Day. School staff, parents and community members need time to review the KSDE Navigating Change document, determine what is needed for their school, make plans for implementation and communicate and educate all stakeholders.
7/21/2020 11:53:27	Blake	Hodges	Olathe School District	Overland Park	I am not sure delaying it is necessary if we go remote. I am personally terrified of returning knowing how schools and students actually work, not ideally work. The questions regarding protocol of when someone tests positive seems like enough to realize an in-person return at this time is irresponsible. Assuming numbers continue to rise, I am not sure how anyone can justify putting lives at risks. Testing is a mess right now as well... if that was working better I think going back to in-person learning would be a lot easier.

					<p>I know that you have tough decisions to make this week in regards to our children going back to school. My husband and I feel strongly that the closures in March were to ensure that all of us did not contact the virus at the same time, thus overwhelming our hospitals nationwide. This was achieved and it seems that thankfully we will not see the projected 2 Million deaths that were feared in March.</p> <p>Throughout this pandemic there have been millions of American's that have continued to work. In talking with several friends that are USD 232 teachers, I have heard overwhelmingly that they are ready to go back and feel comfortable doing so. There are 2 teachers in my personal neighborhood that are choosing to leave the teaching vs. teaching in this crazy masked environment. Not because they are afraid, rather because we are making this more difficult and political than they feel it should be.</p> <p>Every year we face illness in our schools. It is not uncommon to have outbreaks of Influenza, strep or mono that can be deadly to some, especially the immunocompromised. While Covid-19 could be different from other contagious diseases, it also appears to have many similarities in that for the vast majority it's a very minor illness.</p> <p>It is our opinion schools should continue on as planned by each individual district. Keeping the decision local makes the most sense for many reasons in a state with such diverse population densities as Kansas. Disinfecting could be increased, but other than that life needs to move forward. Further, the physical and mental threat of this virus to our children and teachers will not be mitigated by adjusted schedules.</p> <p>If teachers don't feel comfortable being in the classroom then they should be given the option to be furloughed just as a worker in the private sector would be. As a tax-payer funded business in a state where budgets are already stretched, our schools can not continue to pay salaries to employees that are not working full time.</p> <p>We feel confident that those families that feel strongly about not returning to the classroom physically can find other systems to plug into. There are already many homeschool and virtual programs throughout Kansas. It isn't your job to create unlimited options for families, your job is to provide the best education experience possible in a safe learning</p>
7/21/2020 11:53:28	Shannon	Doser	my family	Shawnee	
7/21/2020 11:53:33	Vanessa	Watkins		Overland Park	Agree with Gov Kelly's order to delay start until after Labor Day. Thank you Governor for your strong leadership at this time.
7/21/2020 11:53:33	Jane	Moore	Self	Topeka	I support Governor Kelly's decision to delay the start of the school year.
7/21/2020 11:53:34	Joel	Cachero		Haysville	Vote yes for the delay of school to keep teachers/staff and students safe.
7/21/2020 11:53:39	Alex	Chen	Parent	Overland Park	Given the current scientific uncertainty into how Covid affects young children and their ability to transmit it to others; given the rising number of Covid cases throughout Kansas (in fact, there have been no indications that the trend will actually improve on the near future), I am in support of delaying the start of the school year as a first step in doing what we can to protect children, teachers, school staff and the overall community.
7/21/2020 11:53:47	Hilary	Fuller	Blue valley school distri	Overland park	Please continue to put safety first as we gather scientific data
7/21/2020 11:53:50	Denise	Hoffmann	USD233	Overland Park	I believe opening schools should be delayed until at least after Labor Day. I have Grandchildren in the district, and am extremely concerned with their health and well-being. Obviously I understand the need for social interaction, however, I don't feel that it is safe, nor is it in their best interest, or, in the teachers best interest. Teachers and school staff need to have time to plan and make appropriate arrangements to effectively provide a safe learning environment during this difficult time.
7/21/2020 11:54:02	Elizabeth	Tinsley	Parent	Olathe	Please delay opening of school until Labor Day for staff and children's safety!
7/21/2020 11:54:03	Linda	Nealy	USD 412	Hoxie	Please get these kids back in school where they belong. I do not believe they should be given an option of classroom vs viral education as the educators spend enough time preparing and teaching for classrooms for the pay they receive. I also believe there is no reason for school to be extended out into June.
7/21/2020 11:54:08	Bobbi	Hunt	District USD 232	Shawnee	Our kids should start school after Labor Day!! They all need their education!!
7/21/2020 11:54:09	Anya	Arnold	Shawnee mission school	Prairie village	I'm in favor of the delayed start.
7/21/2020 11:54:13	Edith	VonFeldt		Manhattan	I strongly support delaying the beginning of the school year. The health and safety of our children and USD faculty and staff should be our top priority.

7/21/2020 11:54:18	Anita	Wendt		Ulysses	Please start school with precautions as scheduled in August. Let our very capable school districts do what they do best and decide what is right for us.
7/21/2020 11:54:20	Aaron	Brett		Wichita	The health and safety of teachers and students should be #1 priority and bases on the case increase and not political driven. I will not send my kids to school and risk them, teachers or my kids brining the virus home to me or grandparents. Make the right decision and delay school reopening until we have better control of the virus.
7/21/2020 11:54:25	Kyle	Shively	USD #315	Colby	I support the governor's mandate to begin school after Labor Day.
7/21/2020 11:54:30	Teri	Welker		Scott City	Please leave the opening of schools up to the individual counties. Western Kansas should not be treated like the metro areas in the east. Our kids have been together all summer training and conditioning for fall sports and we have no major outbreak of cases or any hospitalizations. To tell them no school or sports til after labor day or maybe never will be devastating to them. We can not continue to let them live in limbo. Business are back open and moving forward so how can we keep our kids for doing the same. The governor says keeping them home is for their safety. I disagree. Leaving kids at home with no socialization and access to the internet is not safe! They need to be in school and all the extra activities that come with it. And if you dont let them start in August do you really think things are going to be better in 3 weeks to start in September? We will get to Sept and she will say the numbers are still not good enough. When will they ever be good enough for her? She shut school down in march with no cases and I am afraid if you dont override her order she will not allow them to open at all this year.
7/21/2020 11:54:30	Kim	Orth	Parent and Teacher	Lawrence	Please support Governor Kelly's mandate for a later start to the school year. Schools need to start after Labor Day in order to give districts to plan for what is happening in their counties. It would be unwise and unsafe for districts to push for a sooner opening when Covid-19 cases in the majority of the counties are rising. Districts can use this extra time to get appropriate safety measures in place, get PPE for staff members, and plan for what to do for activities like emergency drills, transporting students to and from school, transitioning students from classes to lunch, recess, etc... There are many aspects to this non-typical school year that need to be addresses and districts need this extra time to figure it out. Thank you.
7/21/2020 11:54:31	Jessie	Thompson		Hill City	I wholeheartedly believe the Governor's executive order should be adopted and school openings should be delayed. Even in my small community, the effects of COVID are beginning to show and it would be catastrophic to allow schools to reopen without the appropriate precautions in place.
7/21/2020 11:54:32	Lora	Winters		Pittsburg	I support the delay of school starting. As a parent, I want to keep my kids as safe as possible.
7/21/2020 11:54:47	Taylor	Hoffman		Lenexa	Schools SHOULD be delayed in order to prevent the spread of COVID-19
7/21/2020 11:55:02	Candice	Hamilton		Kismet	I fully support both of Governor Kelly's executive orders to delay the start of schools and to enforce necessary safety precautions.
7/21/2020 11:55:09	Audry	Flores	Usd 312	Hutchinson	I believe school should be delayed!!!!
7/21/2020 11:55:10	Anna	Foote	(self/community membe	Lawrence	I implore the Board and its members to set aside politics and bear in mind the health and wellness of our state's students, families, teachers, librarians, administrators and staff. The governor's order is an important way to protect the health of Kansans. Thank you.
7/21/2020 11:55:10	Gina	Pearce	My 89 year old yoga pra	Wichita	Out of my mother's 4 kids I am the one who lives closest and helps her as needed. She still lives in her own home, pays her own bills, practices yoga with her teacher twice a week and is unable to drive due to foot drop. She manages her heart disease and was told by her cardiologist that she was the patient that made him love his job. I want to go back to school but only when I know we have made it as safe as possible. Please give us that time. Please don't put me in a position to potentially bring Covid to my mother or myself. Just give it some time.
7/21/2020 11:55:11	Ruth	Foster		Lawrence	I believe we should start Lawrence schools and sports ASAP.
7/21/2020 11:55:25	Katie	Perez		Hutchinson	As an educator and a parent, I urge you to vote to support EO 20-58 to delay the start of the school year. This will allow more time to monitor the curve of the virus as we hopefully move it toward a downward trend. Perhaps more importantly, this will allow schools a longer period of time to plan for this coming school year. While it is vital that our students return to school as soon as possible for social-emotional needs, it is also imperative that the school is as prepared as possible for their return.
7/21/2020 11:55:31	Renee	Worthington	USD 416	Louisburg	I'm ok with delaying until Labor Day but don't want it to be delayed beyond that. I think teachers should be allowed to start working early in August to get their classrooms prepared though.

7/21/2020 11:55:40	Crystal	Aceves		Emporia	I support the delay in starting the school year. I have a senior and a 2nd grader. I support remote learning for those who have health concerns or fear (my 2nd grader gets sick every fall due to allergies and faces respiratory asthma) and I'd like exposure to the virus minimized as much as possible in our household. I feel options should be available and children should not be put at risk. Let's keep our children and families safer by waiting.
7/21/2020 11:55:42	Sarah	Samuelson	Private K-5th grade sch	Oakley	Please do not mandate and force our children to wear masks all day! I have a child with breathing issues, and 3 others who I do not want to force to wear a mask for 6-7 hours per day! I encourage temp checks and hand washing, but please reconsider the mandatory masks!
7/21/2020 11:55:43	Tara	Eichorn	Emporia High School	Empiria	Please do not delay the school year. The kids need to be back in the schools. Online classes do not work! Teachers are essential workers and should be required to go back to work.
7/21/2020 11:56:00	Christopher	Blanchard	Parent of children in Ola	Overland Park	Please follow the governor's executive order and the recommendations of public health officials and wait to open schools until safety measures can be implemented adequately and effectively. The safety of our children and teachers should be the number one priority of the district and the state board of education.
7/21/2020 11:56:01	Keesha	Hervey		Frontenac usd 249	There is absolutely no harm in delaying the start of classes. However, there is a possibility of great harm to students and teachers by starting classes without proper caution. School board members who are woefully uneducated inatters of science should be required to LISTEN to medical professionals over politicians. If they don't and children or teachers die, they are responsible for those deaths.
7/21/2020 11:56:01	Kevin	Gaeddert		Goessel	please support the governors Executive order delaying school until after labor day
7/21/2020 11:56:02	Carrie	Poersch	Parent at USD 253	Emporia	I am a parent of a 9th grader in Emporia Public Schools. I fully support Governor Kelly's executive order to delay the start of school. I feel this is the best action to give schools, teachers and staff the time to create a plan and prepare to educate our children while still keeping them safe. The mandated hours can still be met by extending the year in the spring. In fact many schools in other states already have a schedule like this. Right now the priority needs to be making sure the schools have everything they need to keep our children safe. In addition I believe the fact that you are having this special meeting over video conference gives you the answer you need in whether or not its safe to open schools in two or three weeks and have hundreds of children gathered in person.
7/21/2020 11:56:05	Stephanie	Katzer	USD 497	Lawrence	Data needs to be used to reopen schools safely. Other states have laid out a clear cut plan for reopening schools. In some states, schools are in brick and mortar only if they are in phase 4 and the designated transmission period has a 5% transmission rate or less. If it goes over 5% for the given data periods, schools are back online. In Kansas, the opening date of schools would affect everyone. However, as an educator and parent, I support Governor Kelly's decision. The extra time would give hard hit areas of the state time to better prepare safety foundations for students, staff and all we go home too. It would also give all districts tine to discern the 1100 page document given to school districts just recently. With the current early return to school dates, school districts and school boards do not have adequate time to address this document and the information within. Safety if all should be the number one priority. As educators, we are challenged constantly to provide optimal learning environments. Safety and time to prepare are enormous pieces in this equation. Despite districts working throughout the summer to help with these, increasing rates and recent direction from the state warrant more time for all involved.
7/21/2020 11:56:09	Mary	Holland		Fort Scott, KS	Please act in a way that ensures a safe way forward for our students and staff. Please delay the opening of school until it is safe to do so. I am asking you to follow our governor's order for the safety and health of our entire state.
7/21/2020 11:56:12	Robert	Hisle		Topeka	Approve the order. Districts need more time then 3 weeks to plan and prep for situations they don't even know will arise. Teachers will most likely have to do double duty of online and in person lessons, they need time to plan, they hardly get enough time during the week as it is, having to plan/grade on nights and over the weekend.
7/21/2020 11:56:14	Pam	Engelken		Overland Park	Please delay opening schools for in person classrooms. Put more consideration into alternative teaching methods that will lessen the risk to teachers, school staff and students. My daughter is a high school teacher and is scared to return to classroom teaching. You may lose a lot of great teachers this year, if not to COVID, just to changing professions.
7/21/2020 11:56:20	Elizabeth	Handley	none	Hiawatha	As a para in the elementary school here, I'm very concerned for the safety not only of our students but the staff as well! We all know how children are, nose picking, finger licking, germ spreading little people. I'm not certain we will be able to adequately provide a safe and clean environment for ourselves because we will spend the majority of our time monitoring the students to be sure proper guidelines are being followed during the school day.
7/21/2020 11:56:23	Bonnie	Gaeddert	Usd411	Goessel	I think it is a great idea to at least wait until Labor Day to start school. I support the governor's recommendations.

7/21/2020 11:56:31	Patrick	Kobylinski		Roeland Park	Support the governors EO delay start of school and then do virtual until no new transmissions or vaccine.
7/21/2020 11:56:43	Zachery	Nowels		Olathe	There should not be a return to regular school for the first semester.
7/21/2020 11:56:43	Bethany	Thimesch	Self	Kingman	Let schools make decisions to best suit them and their students. The corona virus is here and if a vaccine is developed, it most likely won't totally prevent it. That being said, kids mentL health needs what school can provide. There are so many illnesses/viruses that could cause a temperature. So are you going to require they be tested for Corona virus every time they have a fever? You should concentrate your efforts on trying to figure out wht tests results are scewed and why people that left the line before they got tested somehow got a positive test result. We have to learn to use safe practices, but continue to live because what is the purpose of life, if we don't contine to move forward. Corona Virus is here and most likely won't have a cure. So now what... is what we should be concentrating on.
7/21/2020 11:56:45	Michelle	Nix		Scott City	Please open schools and allow sports to start at its originally scheduled time. Delaying the start of school hurts our children, by effecting the level of teaching and learning they can acquire. The family life is impacted greatly due to the amount of stress this adds to parents to not only be the providers for the family but also now the educators as well. Families that have multiple children and both parents working or those single parent household will greatly struggle. Please vote against Governor Kelly's order for the wellbeing of our children.
7/21/2020 11:56:47	Mildred	Howard		Coffeyville	I think that the safety of students and staff should be utmost priority not when school actually begins. Time is needed to properly ensure the safety of everyone during this unprecedented time. If we cannot ensure that everyone will be safe from covid 19 then we should take the time to make sure that all are safe with social distancing and face masks and disinfecting the school on a daily basis then we should postpone the start of school. Contact sports is another issue that is a potential hazard for our children and staff and should not take place this year.
7/21/2020 11:56:47	Jayden	Hunt	District USD 232	Shawnee	I want school to reopen so I may continue my education/ sports my senior year instead of being robbed of it!!
7/21/2020 11:56:49	Aaron	Tompkins	USD435	Abilene	<p>Giving local control over this decision will be another botched mistake that will cost so many lives. People (local BOE's) will disregard common sense - this is a pandemic! Don't meet in groups! SendIng kids to be the catalyst in herds to bring it to all of the rest of their communities and either kill or permanently negatively impact so many people, for what?</p> <p>One size doesn't fit all... WHAT? It's a pandemic!! The only reason it isn't EVERYWHERE is because school isn't in session yet- that is the #1 way it will spread to parents then to workplaces.</p> <p>Face masks temp checks and hourly hand washing won't make a difference when superspreader events are statistically forced to happen at every school in Kansas by putting normal temp asymptomatic carriers into the same building. Masks help, washing helps but they are no match for being together for 7 straight hours with an asymptomatic carrier. If you've watched the biggest findings in the last two days, and give local control, shame on you for all of the deaths Kansans will face.</p> <p>I'm a teacher, I love to teach, I'm compromised with lung issues. I will die this fall, and I'm only 46 and could passionately teach for 2-3 more decades if you don't make this choice to kill me, as well of tens of thousands of others with many more permanently impaired by it.</p> <p>Kids are resilient, they will be fine. It's foolish to let local control in areas that are hardly impacted so far be the conduits that light the biggest virus fires. It's sure to happen, and only you can stop this nonsense before it happens.</p> <p>Thank you for making this hard decision. Virtual learning isn't perfect or any substitute for in-person learning. This is clearly not the time for in-person school anywhere in this country with the virus raging like it will be shortly after schools open.</p>
7/21/2020 11:56:56	Jennifer	Power Steketee	Blue Valley Highschool	Overland Park	School needs to begin on time— look at the stats— the deaths around Covid are not around kids of highschool or elementary age— they are around LTC facilities and older populations!!!!

7/21/2020 11:56:56	Tabitha	Pavlik	Parent and educator	Emporia	I support the governor's decision to wait to start in person school. As a parent and an elementary school counselor, I fully understand the ramifications of not having children in school. However, as an educated person, I also understand the possible ramifications of spreading the disease are also strong. Our community had already had deaths. I am not as concerned about the children's health as I am the adults' health. Staff contracting and spreading covid, as well as families, may lead to loss of staff members, parents and grandparents. I don't want to lose my friends and colleagues. My husband is also an educator. I don't want our children growing up without a parent. The stress on teachers has never been higher. Consider what you are asking them to do. You will see a mass exodus - from illness or burnout. Please honor the governor's request.
7/21/2020 11:56:56	Katherine	Trout	USD 466	Scott City	Please do not delay school. I do not think pushing back school is going to change the numbers. Kids need their schedule and as a teacher I want as much time as possible with my students In the classroom. We need to bridge the gap between last years online instruction and now. Do not make our time for instruction even shorter!
7/21/2020 11:57:07	Andrea	Seimears	Parent	Lenexa	Please vote against the governors executive order (BOTH OF THEM!).
7/21/2020 11:57:08	Debbie	Martin	none	Wichita	As a grandparent that helps to raise 6 grandchildren ranging in ages from 3 years old to 15 years old, I think it's a bad idea to start school at the normal time. I feel it's in the best interests of the children, families and the teachers and staff to delay the start of school until the covid numbers are flattened over a reasonable amount of time. My healthy 35 year old daughter was one of the first in Sedgwick county to have covid and after several months, she still suffers effects of this disease. My household has a 73 yr old grandparent as part of our home and he has serious health issues. Our grandchildren will be exposed to this virus and then will potentially bring it home. Online schooling, remote learning will not harm our children's learning process for a short time. Please consider the repercussions of the vast exposure this can have upon our entire community.
7/21/2020 11:57:08	Elyse	Bigler		Liberal	Parents out here are not going to make their kids wear masks unless it's required. Please keep our schools safe and require kids to wear masks. I'm a physician assistant and have been caring for patients with COVID. It's a nasty horrible illness. It has hit our meat packing plants out here hard. Health over politics any day.
7/21/2020 11:57:08	Anna	Mitchell	USD 385	Benton	Please delay the school start date to provide safety for students and staff.
7/21/2020 11:57:09	Jodi	Heim		Olathe	I feel school should be postponed until Sept. 9th. It will give districts time to get the needed supplies, formulate a plan for the Governor's mandates, and time for teachers to be better prepared. And hopefully the positive Covid numbers will start trending down before Sept. 9th!
7/21/2020 11:57:14	Jessica	Paxton		Kansas City	Please support Governor Kelly's executive order to delay school openings until 9/9 in order to keep Kansas teachers, students, and families safe. This will also give teachers and educational professionals more time to review the guidance document you recently approved and plan for how to most effectively provide high quality instruction to Kansas students.
7/21/2020 11:57:23	Beverly	Presley	Northeast USD 246	Arma	I think delaying the opening is a good idea. Perhaps with a little more time people will have the chance to process all the changes necessary to keep us all safe. Children need to see us all working together for the greater good.
7/21/2020 11:57:29	ZAC	WILDER		Haven	Please, if you must delay the start of school, allow athletics to return on time. For some of these kids athletics is an opportunity for them to help pay for college that they otherwise can't afford. Don't take away their futures. These kids need to be active.
7/21/2020 11:57:35	David	Harris	None	Spring Hill, KS	Open schools with normal August start date, providing both in-person and on-line options. This allows families to choose what is best for them and provides for the best educational experience.
7/21/2020 11:57:38	Ron	Crow Jr		De Soto	I support Governor Kelly's action to delay school till after labor day. If cases keep surging I support a total virtual school year.

7/21/2020 11:57:43	Shandra	Woody	Parent of a student	Pratt	No. Please get these kids back to school! The emotional damage that has been done to these kids already is is going to have repercussions long past this virus. Pratt Community College is located in our town and my daughter will be taking College classes while attending high school. PCC begins August 19th. PCC has found a way to fumigate after each class. Why can't the high schools do this as well? My daughter is a three sport athlete who is now in in mental health therapy She is not being coddled. She witnessed the death of her friend who attended a party and fell and died. All the kids were drinking unfortunately and several witnessed this tragic accident. The use of alcohol and drugs is escalating due to all the high school kids being out of school for six months already and no certainty when or if school will start again. It is our belief that if school is extended it will be again and again. Just like before. It was one week, then two, then no school at all. Please find a way to give these kids their desire to get up in the mornings and accomplish something instead of hiding in their homes deteriorating and abusing alcohol.
7/21/2020 11:57:45	Cherilyn	Dahlsten	My family	Hesston	<p>This is not a pandemic response. This is over-reaching to the extreme. To ban online and home education and tutoring is preposterous!! Local school boards are aware what is happening in their county. All counties are not the same. Get out of the way and let school boards do what they need to do. And leave the homeschoolers alone! You have no authority to dictate how parents educate their children in their own home. What is your motivation Governor? It certainly is not safety or health and well being.</p> <p>The data is clear. This is not spreading through athletics or through kids. Quit punishing our children and start leading with vision and honor, not fear!</p>
7/21/2020 11:57:50	Katie	Berkley	Teacher	Tescott	As a teacher it would be nice to start after Labor Day to make sure we as a school have all our safety protocols in place. We also need time to receive materials to help prepare our classrooms for the social distancing and other measures. It would be very beneficial for schools to have this time to acquire materials that are needed.
7/21/2020 11:57:50	Ashley	Poland	West Park Elementary	Kansas City	I agree with the decision to delay the start of in-person school. My parents will be watching my 8 month old and I do not want to expose my family to anything. Virtual is not the best for engagement teaching, but it is the safest option. I hope that is taken for consideration.

				<p>Hello and thank you for this dialogue. As a history teacher, I implore my students to use facts to support their arguments. I teach them that historians argue what happened, not what they hoped, or thought should happen. Following this ideology, the school year should begin after Labor Day.</p> <p>By no means do I want schools closed, in fact, I opted for in person teaching. It is the best way that my passion for teaching about economics, race, gender, technology, politics, and government is expressed to my students. With that said, hopefully, a fifteen-day delay will keep me and my students in the classroom by suppressing the virus. A new study, just released out of South Korea, found that those between the ages of 10-19 transmit the virus like adults. To be fair, those younger than age 10 transmit it less (<a href="https://www.baltimoresun.com/coronavirus/ct-nw-nyt-older-children-covid-spread-study-20200718-5q5eo4ylibcwppd2haxwvdp6re-story.html">https://www.baltimoresun.com/coronavirus/ct-nw-nyt-older-children-covid-spread-study-20200718-5q5eo4ylibcwppd2haxwvdp6re-story.html</a>). Furthermore, the American Academy of Pediatrics (AAP) which has been cited for advancing the idea that schools should work to reopen “with the goal of having students physically present in school” has, in fact, clarified their statement. Working with the American Federation of Teachers (AFT), National Education Association (NEA), and The School Superintendents Association, the AAP has made it clear that “Returning to school is important for the healthy development and well-being of children, but we must pursue re-opening in a way that is safe for all students, teachers and staff. Science should drive decision-making on safely reopening schools. Public health agencies must make recommendations based on evidence, not politics. We should leave it to health experts to tell us when the time is best to open up school buildings and listen to educators and administrators to shape how we do it.” (<a href="https://services.aap.org/en/news-room/news-releases/aap/2020/pediatricians-educators-and-superintendents-urge-a-safe-return-to-school-this-fall/">https://services.aap.org/en/news-room/news-releases/aap/2020/pediatricians-educators-and-superintendents-urge-a-safe-return-to-school-this-fall/</a>) Therefore, Dr. Lee Norman, Secretary of the Kansas Department of Health and Environment, should be an expert you turn to. Unfortunately, he indicated that schools should start after Labor Day and that Coronavirus cases, in Kansas, are going in the wrong direction. In dealing with the virus, he stated, “We have fumbled the ball. . .”</p> <p>For those making this critical decision about when schools should start, I hope that you do not argue what you hope should happen. Instead, use facts, evidence, and science to best determine what is happening in the state concerning the virus and let that guide your decision making.</p>	
7/21/2020 11:57:52	Anthony	Ruiz	PRAIRIE VILLAGE	Thank you.	
7/21/2020 11:58:00	Amanda	Barnum	Rural Teacher	Meade	We need extra time! And a push from the state to take COVID-19 seriously. Many rural schools were currently NOT planning on taking any precautions. Teachers and students need the state to watch out for them, because it won't happen on the local government level in rural areas. I am not necessarily advocating for a complete shut down again, but there must be options and a way to stay safe. **more options than just all or nothing-- online or in class. Need to have hybrid options available
7/21/2020 11:58:04	Brett	Skiles		Wichita	As a parent of 4 children, 3 of school age, schools should be opened and starting on time this August. Children are substantially less affected by COVID-19 and there are studies that show, children may not even transmit the virus to another child or adult at the same rate as adult to adult transmission. Education is one of the pillars of our society and delaying or having mostly remote learning would be extremely detrimental to our young people. There are many children that, school is the only structure and sense of normalcy that they get. There is also another segment of the child population that I don't think many people are thinking of. That is the children with special needs and learning disabilities. Many of these children cannot function in a remote learning environment. I have a child that fits this category. She is extremely smart, but she cannot stay focused for an extended period of time on a computer screen to do the majority of her learning. This would cause her to fall behind and will affect her future, not just the here and now. Also, older kids who are preparing to go to the next level of education, not opening schools can have a negative impact on their ability to achieve academic or athletic excellence, which could affect getting scholarships that kids need to be able to afford to go to the next level. There are many educational reasons to open up schools, but also kids need the peer to peer socialization. If a parent doesn't want to send their kid to a school building because they feel the risk of the virus is too great, then that needs to be their choice and there should be online options for them, but, let us parents decide what is best for our kids!
7/21/2020 11:58:05	Dot	Powell		Norton	Children should not be political pawns! That is what this is about, opening schools to make TRump look better. Should kids be IN school? Yes, BUT NOT UNTIL IT IS SAFE FOR THEM AND ALL SCHOOL PERSONNEL!

7/21/2020 11:58:12	Kerry	Loewen		Cimarron	I believe children need to get back into the classroom. They need to feel like things are going back to normal, like everything will be okay. They are starting to stress out, wondering if things are ever be okay again. They need to be their friends & classmates. They are starting to feel isolated.
7/21/2020 11:58:26	Brittany	Garcia-Espinoza	Kansas City Kansas pub	Kansas City, MO	Please extend the start of the school year until after Labor Day. We need time to prepare our rooms and get training to be as safe as possible during the school year. As cases of Covid 19 rise, I believe in addition to the extension of the start date, school should be conducted completely virtually. We can always recover a child's education but we cannot recover a child's life or a teachers life.
7/21/2020 11:58:27	Katie	Tadtman	USD 379	Clay Center	I feel like every family has a different set of circumstances and that schools need to be back open as soon as possible. My kids have a pretty great home life but even with that they need to be back in routine, they need to have the influence of other adults in their lives. They need to grow socially, and emotionally and with those aspects of their lives we have hit a wall. My husband and I both work outside the home and we were both considered essential so our kids have had to be home since March and it has taken a huge financial tole on us. It's time to get back to the schools. I feel like this should be by county like everything else is.
7/21/2020 11:58:28	Darren	Baker	USD 383	Manhattan	Reopen school now. USD 383 will be prepared.
7/21/2020 11:58:33	Lindsey	Hulbert	Kansas State University	Manhattan	Teachers need extra PAID time to adjust course curriculum. I had to redesign ONE course of over 7 years for hybrid and to do a good job it takes MONTHS of work. Kansas teachers need our support!
7/21/2020 11:58:40	Jamie	Davis		Louisburg ks	Please reopen schools. We can not continue to dammage the economy and short change our children. The goal of the shutdown was to flatten the curve not prevent every single person from getting the virus. This is completely impossible to do. This virus lives amongst us now and we will all be exposed at some point.
7/21/2020 11:58:42	Carolyn	Hall		Topeka	This has to stop, get the kids back in school.
7/21/2020 11:58:45	Moriah	Obermueller		Overland Park	No need to delay the start of school
7/21/2020 11:58:47	Amber	Scott		Pomona	Allow school to start with no mask
7/21/2020 11:58:49	Nicole	Dooley		Lawrence	Please consider revising the mandate to allow athletics/activities to safely continue during the proposed shut down. Our city, along with many others, have successfully run our outdoor summer athletic programs all summer. Please consider allowing our kids and coaches to continue during this time period. It would be negligent to the health and well-being of our students to stop for a month prior to the start of school. Thanks for the consideration.
7/21/2020 11:58:50	Jon	Bigler	Self and family	Meade	I agree with Governor Kelly's mandate. Moreover I think the Kansas state senators should let her do her job! We didn't vote her in to have the Republican senators tie her hands!!!!
7/21/2020 11:58:50	Janelle	Riedy		Hope	I am retired and a substitute teacher who is to do a maternity leave when school starts! I would prefer that school not open until after Labor Day to keep kids and staff safe!
7/21/2020 11:58:53	Michele	Hill	Daycare provider, parent	Olathe	Please delay schools opening this is too risky of a situation for our families!
7/21/2020 11:58:56	Randi	Martin	Parent	Colwich	No delay
7/21/2020 11:58:57	Matthew	Gerlach	NA	Newton	Pushing the start of school back a few weeks only helps to ensure safety of students and teachers. It also gives more time to implement quality plans for the 2020-2021 school year.
7/21/2020 11:59:11	Kaitlin	Jaramillo	Parent	Lenexa	With the spread of covid on the rise please delay school starting until it's safe. I support governor Kelly to the fullest extent.
7/21/2020 11:59:32	Tammy	Shively		Olathe	NO
7/21/2020 11:59:32	David	Williams	Usd 373	Newton ks.	Please delay the start of the school year as the governor calls for in the executive order. This gives schools time to prepare for the new guidelines. Please protect students and teachers based on actual science
7/21/2020 11:59:32	Mary Januea	Fleck	Teacher	Wichita	Schools should be delayed to help prepare for proper safety procedures as well as training for teachers Incase schools have to return to remote learning. Cases are too high and too risky to start in August.
7/21/2020 11:59:35	Drew	Zimmerman		Hays	Delay school openings. This is imperative to make sure our children will not have a higher than usual chance of being infected with SARS-CoV-2 (Covid-19). The science is clear on the adverse outcomes of this disease. Not giving ample time for our schools and teachers to prepare is pure ignorance.
7/21/2020 11:59:36	Elizabeth	Kosko		Bonner Springs	I think in person schooling should be delayed significantly, if not prevented at all. Why are so many events and music venues canceling when they are only in enclosed spaces for a few hours at a time, not 40 hours a week if this isn't a real threat?

7/21/2020 11:59:42	Jamie	Oettle	Parent/Teacher in Kansas	Goddard	<p>As the parent of a high risk student, I support Governor Kelly's EO to delay the start of school until after Labor Day.</p> <p>*My child would like to attend face to face instruction, but the covid19 infection rate is growing too rapidly. Delaying the start of school allows the mask mandate to take effect and the spread to slow down.</p> <p>*Schools are naturally a place for the spread of viruses and bacteria due to proximity and shared spaces/materials. Delaying the start of school while the infection rate is high will allow schools to rearrange classrooms and for teachers to recreate lessons to avoid activities that might not be safe.</p> <p>*There are too many unknowns at this point for parents to make informed decisions about whether or not to send their children back to face to face instruction. Districts are scrambling to formulate plans and communication has been spotty for some districts with so many unknowns. Delaying the start until September will allow districts to share their plans and for parents to make informed decisions.</p> <p>*Some educators and school staff work in districts much larger than where they live. The virus could spread quickly to these smaller districts where they might not have the medical resources in the community to safely handle a pandemic. Having a state wide order proactively protects communities that might not see the danger yet.</p> <p>*There is a growing body of evidence that Pediatric Inflammatory Multi-System Syndrome is on the rise in otherwise healthy children who have come into contact with the virus. As the wife of a childhood Kawasaki Disease survivor from the 1970s, I can testify that inflammation in the body can cause life altering long term damage. Assuming children who don't show immediate symptoms of Covid aren't affected is putting children in danger.</p> <p>*Many states start school after Labor Day and delaying the start of the school year by a few weeks will cause districts to alter their calendars, it is not unrealistic.</p> <p>* As a teacher, I am confident that I can adjust to starting school after Labor Day if the infection rate is declining and will in turn be better informed, prepared and set up for success.</p> <p>*As a state, we need to do what is best for children. Right now parents have plans in place to take care of their children while working over the summer. Delaying the start will allow them to extend those plans. Starting school when numbers are rising and then having to switch to online instruction due to school exposures will cause more of an upheaval for parents who must change their schedules or scramble to find last minute childcare.</p> <p>*There is no decision from the state or locally that will be right for all families and educators, but delaying the start of school allows for more informed decisions and proactively protects communities that have not yet been affected by the</p>
7/21/2020 11:59:42	Linda	Taylor	Southwind Plaza etal	Colby	<p>Please do not pass this Executive Order. Our schools need to open, sports and all activities need to happen on time. Our students need to go back to as normal a life as possible. What is happening in Kansas and nationwide will have a tremendous negative impact on our youth for along time. This is exactly what China and the liberals want to have happen. Please do not allow our children to go down that path of self destruction. Our local school districts, our teachers, our parents and community are very capable of keeping our children safe and healthy. Let them do their jobs. Start school on time and don't shut us down. Also don't let the teachers' unions and other political group rule our Kansas education system and this board.</p>
7/21/2020 11:59:44	Melanie	Hammer	USD 447	Cherryvale	<p>Yes, I think we need additional time for planning the return of students.</p>
7/21/2020 11:59:49	Mark	Meyer	None	Olathe	<p>I am in favor of keeping schools closed until September 9 as long as... SCHOOL EMPLOYEES CAN RETURN TO WORK ON TIME SO THAT THEY MAY PROPERLY PREPARE FOR THE SAFETY AND INSTRUCTIONAL REVISIONS THAT WILL BE REQUIRED. THIS WOULD REQUIRE SCHOOL TO END AS SCHEDULED IN MAY AND FORGIVENESS TO THE STATUTE MANDATING A MINIMUM NUMBER OF DAYS/HOURS FOR ATTENDANCE.</p>
7/21/2020 11:59:59	Daniel	Ruda		Topeka	<p>Please support the governor. I am a teacher and a parent. I want my kids in school, but I want them to be safe first. Governor Kelly's order allows for the necessary changes to be implemented correctly and effectively. Delaying the start of school is not a political move it is a safety move for the people of Kansas. We need one uniform voice in this unsettling time not 100 voices.</p>

7/21/2020 12:00:10	Jenna	Casteel	Flinthills Intermediate S	El Dorado	<p>I am in favor of delaying the start of school and/or moving to totally online school for 20-21. Thank you Governor Kelly for mandating masks and believing in common sense science. Thank you for moving to push back the start date, I fear however it is prolonging the inevitable. It's not a matter of "if" people will get sick and die but a matter of "when and how many." As a teacher I'm taught to make DATA DRIVEN decisions. The data tells me someone in my family, my class, or my staff WILL get sick. Someone I know WILL likely die. This data should not be ignored. KSDE has a responsibility to make data driven decisions too, especially when it is LIFE OR DEATH.</p> <p>Some more data affecting my personal livelihood: my husband and I are both teachers. We have a 9th grade boy, a two year old girl, and a newborn baby boy. I believe my husband, 9th grader, and I will do whatever is possible to stay safe and well when and how ever school starts. But I am very concerned for my two small children to be back in daycare. The last day my daughter was in daycare was March 6th, she's set to start August 1st along with our newborn that was born May 4th. For our two children to attend daycare full time it costs \$1,300 a month (that's the cheaper center in town). As a teacher after taxes and insurance my paycheck alone is a little less than \$2,000 a month. (My husband's paycheck alone would be similar). If one of my family members gets sick and dies (especially my husband) I would no longer be able to afford my house, our daycare, my student loan payment, or many of our basic needs. I know at this point many of us are considering leaving teaching to stay alive. There will be no school with no teachers and I can't teach from a hospital bed or a coffin. Please listen to us. PLEASE take care of us.</p> <p>Thank you for your time, Jenna Casteel</p>
7/21/2020 12:00:14	Glenna	Reinert	Myself and my family	Great Bend	<p>We really don't want to start school after Labor Day because our kids will still be in school in June. However our bigger concern is the wearing of masks. Our kids are under 10. If we require these kids to wear masks, it will be pointless to send these younger kids to school. All they will be doing is playing with the masks and complaining. The teachers aren't going to be able to get anything done. Our schools shouldn't be a prison. Please think of our kids mental health at this time as well.</p>
7/21/2020 12:00:14	Elizabeth	Koon	Usd 309	Nickerson	<p>Schools districts need the delay to be able to figure out how to get all questions and concerns addressed the best we can. But I do not agree with the order where no extra curricular activities can happen. The students have been training all summer and activities have been held. I believe that practices and training should be held, that auditions for musicals should still be held, that marching band camp should still be held. Our students need these activities. Our school districts need time to make the classrooms safe for all, but our students should be allowed to continue summer scheduling.</p>
7/21/2020 12:00:20	Neil	Siemers		Lawrence	<p>Please do not re-open in-person schools after Labor Day. We are still in the middle of a pandemic. Our leadership should be supporting us, not forcing us to end quarantine early.</p>
7/21/2020 12:00:23	C	B		Lawrence	<p>No in school after Labor Day, online only. Not safe for kids to be surrounded by other kids whos families are not practicing safe measures and our kids bringing the virus home to other members who have health issues.</p>
7/21/2020 12:00:24	Ji	Spencer		Olathe	<p>School should resume as planned.</p>
7/21/2020 12:00:27	Shannon	Johnson		Shawnee KS	<p>I think the safety of our kids and teachers has to be our #1 concern. I want the kids back in school too, but safety is the priority, and if waiting a few extra weeks gives our schools more time to make proper preparations and precautions, it is not going to set our kids back significantly from an education standpoint. I support the governor's order and there is no easy answer. Also, our kids get SO MANY random days off (3-4 day weekends) during the school year - we could take away some of those days to make up for the late start.</p>
7/21/2020 12:00:31	Jim	Shively		Olathe	<p>NO</p>
7/21/2020 12:00:31	Michelle	Kile	Usd232	Shawnee	<p>I say postpone school til it is safe for everyone. INCLUDING STAFF!</p>
7/21/2020 12:00:38	Christian	Ammerman		Wichita	<p>Pass this. This is not only safe for our students, but every other person that works in a school building. Human health and safety should not be a political issue. I know more than anyone that students and staff want to return to schools, but it shouldn't be at the risk of their own lives to do so.</p>

7/21/2020 12:00:38	Kathryn	Tolle		Wamego	I support the governor's decision. I don't understand why this has taken so long to address, but if schools need more time, let's give them the time to do this in a responsible and thoughtful manner. Please consider closing bars and restaurants so that we can more safely open schools. They should be the priority.
7/21/2020 12:00:41	Ellen	Goode		Pittsburg	Please support the governor's order! Our schools need time to prepare for a safe and effective return!
7/21/2020 12:00:44	Dana	Reinecke		Seneca, KS	I vote our school districts are given the option as to when schools start rather than being forced to delay their start.
7/21/2020 12:00:49	Melinda	Jurczak	My child	Overland Park	OPEN SCHOOLS IN AUGUST. Our kids NEED to be in school. My son will be a junior and takes honors classes. Despite our teachers best efforts, he learned NOTHING from March to May. He NEEDS school for ACT testing. I'm begging you, put these kids back in school. He's been depressed without social times with his friends. These kids mentally and emotionally and physically NEED school and their teachers. Please please send them to school. They'll wear masks... ANYTHING... just send them back to school. Please.
7/21/2020 12:00:52	Terri	Dunstan		Beloit	Please overturn the Governor's executive order and let the decision be made at the local level.
7/21/2020 12:00:56	Whitney	Black		Olathe,KS	I am a high school math teacher. I ask that you approve the order for the late start to the school year. This will allow us as teachers to have more time to actually examine and utilize the document that the task for was so kind to put together for us. This is a major curriculum piece that will take time to look over and make any changes needed. We also need time to figure out how we will run our classrooms in a way that keeps everyone as safe as we can when doing in person instruction. If you don't approve then teachers everywhere will be overwhelmed with the changes that need to be made and they won't get done as well, this will happen even if it's in a district that has few COVID cases in the area. Also if you don't approve the order teachers, who already spend some of their summer vacation planning, will feel that to do a good job they need to start super planning now and actually working when they aren't paid to be. Teachers should be allowed to spend these last few weeks of summer with their families spending good quality time before the scariness of the school year begins. Don't leave this up to local districts to do because we have see what happens when it falls to the local level with the mask order, they won't do it.
7/21/2020 12:00:56	Emily	West		Manhattan	I think sending kids and teachers to school this fall would be sending them to the slaughter house. We are in the middle of a pandemic, if we pulled them out at the beginning of the pandemic why would we put them back in at the peak of it?
7/21/2020 12:00:58	Kay	Drews	Grandma	Larned	Please follow governors guidelines
7/21/2020 12:01:02	Christian	Martinez		Pittsburg	As an educator I miss working with kids very much. However, if we are forced to go back I truly don't know if I can return to teaching if it's going to put my family at risk. Please do the right thing and wait a few weeks to at the very least see the curve go down. Thank you.
7/21/2020 12:01:03	Jenna	Krehbiel		Salina,rural (USD 306)	I am a parent of two children that attend Southeast of Saline Elementary. I am also a child mental health therapist in Salina that works nearly exclusively with school age. I feel the best option of school for this first semester is a hybrid learning model. Most children need to be in school but I feel it unreasonable to be able to meet all the health requirements (hourly hand washing, etc) with a class of 20+ children. I also have no issue with the governor's order of suspending class until after Labor Day. Our Covid cases continue to increase in the community and if everyone was back in school, the cases would rapidly rise. I have much more to comment on but this is the basic.
7/21/2020 12:01:10	Peyton	Hunt	District USD 232	Shawnee	I want to continue my education/sports! I should have the right as a student to further my education etc.
7/21/2020 12:01:12	Allison	Armstrong	Piper USD 203	kansas city	Governor Kelly's order 20-58 should be upheld. Lives are at stake. I appreciate her leadership.
7/21/2020 12:01:16	Jill	Tatum	USD #383	Manhattan	I don't see how postponing will help, it just delays the inevitable. I'd like to see more information presented on what happens when/if we shut down again, how are hours made up by postponing, or if we have to shut down, and if kids are absent. Also, kids have been out for a long time, now we're postponing the start and therefore adjusting PD days to make up for the move, possibly taking those days off away from the kids and pushing them to makeup the time that has been taken away from them. I always hear kids are resilient but this seems a little overboard. Also, historically we've seen a spike after every holiday - Memorial Day, 4th of July, why would we believe Labor Day would be any different?
7/21/2020 12:01:26	Natalie	Aramburu	self	Wichita	Please approve the Governor's EO regarding a late start for schools. The current rate of infection in Wichita is 12.5%. She genuinely has the best interest of students and staff in mind. Due to politics this has been pushed to you. It shouldn't be about politics.

7/21/2020 12:01:26	Tara	Smith		OVERLAND PARK	I have 2 kids in public school. I support delaying the beginning of school. The schools will have more time to prepare and hopefully the Covid cases in our state will begin to drop so school is safer for everyone.
7/21/2020 12:01:29	Caitlyn	Donahue	Blue Valley	Kansas City	As an educator, I am fearful of returning to work in Johnson County as the number of COVID cases continue to rise. Please consider supporting Governor Kelly's executive order to delay the start of school. Thank you.
7/21/2020 12:01:29	Brandy	Nicholson	Parent	Emporia	I strongly suggest each district to make their own choices regarding in person/online/hybrid.  Each superintendent/ principal knows their buildings best and can determine if social distancing is possible or if it would be a hardship.  I would appreciate my teens getting access to more online class setups so they can complete some classes that wouldn't need a teacher's guidance.
7/21/2020 12:01:30	Audrey	Heyl	Wallace County	Sharon Springs	We live in a county with ZERO covid cases. I think the best solution would be to leave it up to the local school boards. It is not a one size fits all type of situation. This is not fair to the kids.
7/21/2020 12:01:31	Duane	Banzet	None	Neodesha	A two week delay in the grand scheme of things is not a big deal. I believe this to be an appropriate measure to allow the school systems more time to prepare for and receive supplies for dealing with the pandemic. I know first hand how hard it has been to get supplies. I am still waiting on PPE I have ordered for my employees last March and April.  I personally would like to see this change permanently. Starting the school year before labor day has always been stupid. Costing schools high cooling bills and giving students a break just as they are getting settled in to a routine. The school year could then end closer to Memorial Day.
7/21/2020 12:01:38	Elizabeth	Dexter		Rural Emporia	I do not believe that opening schools late will do anything to improve our circumstances due to Coronavirus. Starting now, or starting in September, will not be any different. We will still be required to deal with our state of affairs in the same manner: social distancing, sanitizing and mask wearing. It will, however, delay learning, incapacitate working parents, cause young children to be left unattended, lengthen our imprisonment to this virus and solidify our loss of freedoms.
7/21/2020 12:01:43	Molly	Claassen		North Newton	I would encourage you to change the wording to allow online and virtual Kansas public schools to start before September
7/21/2020 12:01:48	Stephanie	Katzer	USD 497	Lawrence	Data needs to be used to reopen schools safely. Other states have laid out a clear cut plan for reopening schools. In some states, schools are in brick and mortar only if they are in phase 4 and the designated transmission period has a 5% transmission rate or less. If it goes over 5% for the given data periods, schools are back online. In Kansas, the opening date of schools would affect everyone. However, as an educator and parent, I support Governor Kelly's decision. The extra time would give hard hit areas of the state time to better prepare safety foundations for students, staff and all we go home too. It would also give all districts time to discern the 1100 page document given to school districts just recently. With the current early return to school dates, school districts and school boards do not have adequate time to address this document and the information within. Safety if all should be the number one priority. As educators, we are challenged constantly to provide optimal learning environments. Safety and time to prepare are enormous pieces in this equation. Despite districts working throughout the summer to help with these, increasing rates and recent direction from the state warrant more time for all involved.
7/21/2020 12:01:54	Leila	Coester	Emporia State University	Cottonwood Falls, KS	PLEASE delay the start of the school year for the sake of the students, teachers and staff. Let us get a handle on this pandemic before "opening up" too soon brings on a new wave of the virus. We have learned this lesson in general - why on earth would we not benefit from what we know and not make the same mistake again.
7/21/2020 12:01:56	Dana	Thompson		Pittsburg	School should be online only till vaccine
7/21/2020 12:01:57	Susan	Sherry	Needham DBS	Overland Park	I would hope that the schools would be able to open on time safely (with masks and the appropriate protocols) and allow the kids to participate in sports. If opening on time is not an option, I would hope that we could delay opening schools until there is an option to learn at the schools at least part time. Distance learning should not be seen as an answer. It was a failure for Kansas.
7/21/2020 12:01:59	Antoinette	Covington	Parent	Merriam	Open the schools for in person learning option.
7/21/2020 12:02:01	Susan	Sanny	Me	Wichita	School should not open until there is a drop in cases or a vaccine.

7/21/2020 12:02:06	Tatiana	Schafer	I am a teach and coach a	Topeka	I am looking forwArds to getting back into the classroom and Coaching. I hope we are allowed to have fall sports.
7/21/2020 12:02:13	cynthia	carlson	sedgwick county residen	wichita ks	I absolutely do not want school to be delayed or displaced in any way. I have been a teacher and a substitute teacher for over 30 years. I continue to volunteer in two schools. The science shows that kids do not get the virus and do not pass it on. We are the only country playing around with our kids and their futures. More damage is done when children do not return to school! And masks are definitely unhealthy for children to wear for any extended period of time. So a mandate on that will drive even more parents to consider home schooling. Our economy needs working moms to return to work and that means their children need to return to school and very soon. I sincerely hope you do your own research and see that science backs up the safety of children being in school. Just look at the lack of sickness in daycares all summer. And these children were not wearing masks! They are a prime example that children gathered together are safe and so are their teachers. Please fight against our governors very political mandates and instead do what is right for our children. They really are our future.
7/21/2020 12:02:17	Claire	Cici		Lawrence	If teachers start out behind, they will never catch up. And the consequences of that will be borne by the students and their families. Give teachers a fighting chance to support actual learning. Many teachers did a TERRIBLE job in NORMAL times. Let all teachers adapt to the very agile task at hand by giving them paid time to prepare.
7/21/2020 12:02:26	Maggie	Berning		Cheney	Focus more on the how instead of the when. We need to put in more effort on how we are going back, protocols to follow, instead of kicking the tin down the road. That's all Gov. Kelly is doing - delay, delay - but we all need to move on with life even in a pandemic. Optimism and adaptability are all important especially for a child to learn. Do not delay opening and focus on plans, protocols instead.
7/21/2020 12:02:27	JR	Hunt	District USD 232	Shawnee	My children deserve to have an education and play sports!
7/21/2020 12:02:30	Katherine	Lesando	Blue Valley School Dist	Olathe	As a high school teacher I supposed the delay of opening schools. I currently feel as though I am be tasked to put my life on the line just as cases start to spike again. I personally would be much safer going back to work if the delay stays in place. I commend and appreciation Gov. Kelly's decision. Clearly she has the health and safety of the future of our state in mind.
7/21/2020 12:02:30	Erika	Durman	SMSD parent	Prairie Village	Please vote to keep Governor Kelly's order to delay the school start date. I have two children in public school and feel the delay is important to mitigate community spread of COVID and to allow the district time to fully prepare for both on site and remote lessons.
7/21/2020 12:02:35	Leah	Heinen	None	Seneca	I want to see our kids go back to school in August as planned. I have 4 children in school and believe our district has already taken great measures to make our school a safe environment. They have much to catch up on and need this time. Please don't delay.
7/21/2020 12:02:41	Andrew	Bauer		Halstead	There are some things that are best left to local control. Combating a global pandemic is NOT supposed to be one of them. Please show some leadership on this. Schools are a petri dish of infection. Kids WILL get sick, they WILL infect their parents, and the spread will not simply respect one district's boundaries.
7/21/2020 12:02:51	Kristi	Breese	USD 214	Ulysses	I believe we should follow what Governor Kelly decides on this. Many students, parents and teachers are already concerned with the opening of schools. A few more weeks will not hurt anyone. The health and safety of all those that will be in the school buildings should be first and we need to have every precaution and safety measure available. Delaying it is in the best interest for everyone right now.
7/21/2020 12:02:54	Susan	Peters	Teacher USD 512	Shawnee	Please consider waving 3+ weeks of attendance requirements to allow districts flexibility for in-school attendance based on local COVID needs.
7/21/2020 12:02:55	Judith	Vulgamore		Scott City ks	Please do NOT accept the governor's executive order to not start school until September. Our kids need to be in school especially in counties that do not have very many cases. Maybe the Wichita and Kansas City districts need to wait but our counties in rural Kansas need to get the children back in school. Please over rule her executive order or at least make it that each school district can decide for themselves. Thank you.
7/21/2020 12:03:02	Stacy	Sanger	Home	Larned	Ok

					I believe each county and each school district should be able to make their own decisions regarding when and if their school should open. Not every county has the same count. In-fact I am a nurse at a health department and at our local hospital. Out of the 105 counties in this state 10 of them contribute for over 18,000 of our 23,334 cases. That's not made up that is facts! There are some counties that don't even have cases and to make them wait to open their schools because of a county across the state is crazy. Furthermore daycare's have been open all summer and they don't wear masks and social distance when possible but unable to at all times due to them being kids and there is only 38 cases across the state that are attributed to daycare's and around 40 that are related to sports and most the time the sports cases came from a person traveling out of state to a hot spot. We have had our pool open all summer, we have had basketball camps, we have had a softball/baseball season and many other activities for kids and no out breaks in our community. Our cases in our community are all adults with very mild symptoms . We at some point need to all do whats best for our children and if people want to keep their kids home to home school them that's fine but when parents work all day in health care then we are unable to do that and our children still deserve an education. If my school board met and said they thought we should delay school because they weren't comfortable starting yet then I would respect that because they are my local officials having to guide through this but to have a governor make a mandate for the whole state is not acceptable. This is not a one size fits all approach. Each county and each school district has their own needs.
7/21/2020 12:03:11	Katie	Nicholson		Beloit	Thank you for your time.
7/21/2020 12:03:15	Robyn	Dreher	Parents	Wamego	Delay start of schools to keep kids and teachers safe.
7/21/2020 12:03:18	Calvin	Davis		New Cambria	Need to open things up and let kids get back to being kids this is destroying our economy and more importantly our children's emotional and social health
7/21/2020 12:03:19	Dan	Knight		Holcomb, Ks	Please open the schools, and begin activities as originally scheduled. Do not delay.
7/21/2020 12:03:35	Trish	Batemon	Atchison Middle School	Oskaloosa	I believe it is important for students to return to school, but we have to do this safely. I am in favor of Governor Kelly's executive order of pushing back to start of school and activities till after Labor Day. This will allow school districts and teachers to plan for students return to the buildings or learning online (whichever is best for the students and their family). Thank you for supporting this order.
7/21/2020 12:03:41	Lisa	Meise	none	Baxter Springs	Our schools need to be open now. We should not be delaying the opening of them. Teachers and students should not be forced to wear masks. Research has proven it is not good for ones health!
7/21/2020 12:03:45	Melinda	Gilman	Shawnee Mission School	Independence	Please support Gov. Kelly's proposals to kepp our students and communities safe.
7/21/2020 12:03:48	Heather	Smith		Wichita (Goddard School)	Please open schools! We need to continue to live!!
7/21/2020 12:04:01	Abby	Smith		Salina	With the number of cases in Salina, I believe it is not responsible to open schools until we start to see a decline. Teachers also need this time to fully understand and plan for the different modalities of teaching that will be utilized during this pandemic.
7/21/2020 12:04:08	Taleshia	Arnold	Educator	Kansas City	Delay or No in person school!
7/21/2020 12:04:11	Jayson	Smith	Myself	Kingman, KS	I object to Governors issue of mandated masks and delayed school start up. I feel it's a one size fits all decision as well a power move to appease the political powers that be above her. I feel, and I can't prove this, that her aspirations to stay in politics after her term expires is what's driving her decisions. I also think she doesn't look at all the data before making these decisions. We aren't all blessed with common sense...
7/21/2020 12:04:16	Michelle	Webber		Liberal KS	I am a teacher in USD480, I don't represent anyone but myself. I believe waiting until after Labor Day is prudent as it will allow school districts some extra time to make sure they have masks, gloves, hand sanitizer, plans for lunches, and so on.  Our schools do not have room for 20+ students to be properly social distanced in classrooms. We are used to having our students work in groups of 2-4 at least. In my classroom, if I place desks at 6ft apart, I can have about 12 students. On average classes are 20-25 students.  Please help us to remain healthy and serve our students. We want to teach. We want to help our students. Our mental health is suffering just as much as our students are, but we are scared. The worry about their health, their families, our health and our families is overwhelming. We need help and guidance.

7/21/2020 12:04:25	Becky	Finck		Lawrence	As a parent in the Lawrence community and a teacher in the Topeka community, we need the delayed start to give schools an opportunity to make preparations to return to learning. Returning to school will not be the same as in the past and buildings need the opportunity to ensure they are able to logistically implement health safety protocols. With some schools still not having a plan released, teachers also need this time to develop and create lessons that will work best to educate students within the structure presented. The delay also gives communities an opportunity to use recommended safety measures to get spread of COVID in check and make it safer for students and staff to return to in-person learning.
7/21/2020 12:04:28	Alyssa	Dawson	USD 388 Ellis	Ellis	As cases in Western Kansas and Ellis County surge, I asked the BOE to please consider the public health issue at stake here. We need a unified state response, not a piecemeal county-by-county one that is doomed to fail (like the mask mandate, which was rejected, and then we watched cases continue to rise like crazy). Please take a strong stand to help get COVID-19 under control in our state and support the governor's delay of school until Sept. 9. Many businesses are also contributing to this effort by requiring masks, like Walmart, Dillons, and Walgreens. Education can do their part, too, and voting to uphold the EO will do just that.
7/21/2020 12:04:32	Kathryn	Whitcomb	USD 252	Emporia	WE NEED TO GET KIDS IN SCHOOL
7/21/2020 12:04:33	Michelle	Gaddis	Parent	Smith Center	I appreciate all your efforts to keep my daughter and myself (as a Food Service Worker), safe. We will do whatever we need to do to make safety a priority. Thank you!
7/21/2020 12:04:34	Christy	Trinkler	My sons	Overland Park	Please uphold Governor Kelly's order to postpone school and give educators the chance to plan effective distance learning that ensures the safety of everyone involved. Distance learning with teachers from my kids' school that know and love them will be better than district virtual teachers. A hybrid 2 days in class with smaller class sizes and 3 days virtual would be a great approach for social and safe learning.
7/21/2020 12:04:38	Tara	Lehrman		Goessel	I agree with the delay of school. I think numbers should go down before the student's return.
7/21/2020 12:04:43	Kandice	Crawley	373, Harvey county	Newton	School needs to start a little later and we need every other day in school after that.
7/21/2020 12:04:44	Linda	Morse	Individual Citizen	Manhattan	This is to request that you as members of the SBOE support Governor Kelly's efforts to keep Kansas children as safe as possible by delaying the start of Fall semester. Please support the Governor's Executive Order. Pandemic measures should not be politicized. As your professional background is in education, her background is in public health. Please respect that you are not experts in science or in pandemics. Thank you.
7/21/2020 12:04:44	Jennifer	Foltz		Manhattan	Please open up schools for this school year. My 3 children really struggled with online schooling and they are honor roll students. It was hard for them to be motivated and they were so isolated at home. Even if the in person time is reduced it would be much better than no in person school at all. Since they have gotten to do some summer activities there mental outlook has been much better.
7/21/2020 12:04:46	Ryan	Braddock		Manhattan	As a parent, I feel very strongly that with the current situation, it is not only unsafe to allow students to return to classrooms, it is highly irresponsible. The safety of all involved is at risk. From the students to the teachers, to parents and grandparents, and from family members to the general public. Put aside political differences of opinion and think about the general welfare of our society. I have no problem paying taxes to ensure that the buildings remain in good order and salaries are met as usual. My children not be attending in class but will choose a virtual option. To shut down the schools back in March when the cases of covid-19 were not what they are today and then consider reopening when numbers are much higher, is laughable. Getting children to social distance, sanitize, and wear a mask for an entire school day is quite a tall order. Adults seem to be having a problem with this very request, how can we expect K-12 students to do any better? Thank you for your time and consideration of my comments.

7/21/2020 12:04:58	Amber	Weigel	Hays High School & Ha	Hays	I would love for the kids to be back in school BEFORE Labor Day even if this means requiring them to wear masks. I cannot go through the "homeschooling" option again. I work full-time and find it extremely difficult to keep my child, who has ADHD, motivated to complete his schooling after I get home from work. He takes his medicine in the morning and by the time I am home from work the medicine is starting to wear off. While I am at work, I am not there to help with questions about this course work. I usually am not home until 5:30 or 6pm so that leaves 2-3 hours to do a lot of homework in one night. When it comes to my high schooler, he became lazy and did not think he needed to complete his assignments. It took a LOT to push him to finish his homework. Please consider opening schools before Labor Day... a lot of parents rely on the in school option as they are not cut out to be home-school teachers, myself included.
7/21/2020 12:04:59	Stefanie	Hinman	Parent Blue valley schoo	Overland park	Please open schools on time and allow the kids to play sports. Our kids need to be back in school!
7/21/2020 12:05:02	Kelly	Vuong	Parent of a SpEd child in	Overland Park	My son has had to work twice as hard to become anywhere close to his peers educational level. Through the school closings we have watched him lose the skills that he and the SpEd team at CPE worked so hard for. He is losing confidence in himself as well. Online learning was not a good, comparable or reasonable match for a child with a learning disability. Please allow parents to make the decision on what feels best for their family situations. Rely and look to reputable and knowledgeable sources within healthcare spectrum to help make a decision. Please do not continue to allow people with no medical or healthcare care knowledge make the choice for our children. There are many studies that have proven children who continue to struggle to read in middle school do not graduate high school and make other bad choices due to their struggle to learn. Please give our kids every chance possible for them to learn and grow.
7/21/2020 12:05:11	Douglas	Frederick	Parent	Auburn	Please open the schools on time
7/21/2020 12:05:13	Laura	Sapp	Manhattan High School	Manhattan	As a high school teacher, I encourage the board members to vote "yes" to Governor Kelly's executive order delaying the start of the school year. In Manhattan, we have begun to see serious Covid-19 cases involving individuals in their teenage years.
7/21/2020 12:05:13	Lori	Trow		Salina	I have no problem with delaying the start and I understand the need for protection. However children with special needs or anxiety disorders are not good candidates for mandatory masking or at home learning. I know my grandson who will be starting kindergarten has anxiety and needs routine and structure. At home instruction or online instruction is not beneficial for him nor is mask wearing. What do we do for him and for children like him?
7/21/2020 12:05:16	Lisa	Beilman		Hays	<b>DO NOT DELAY OPENING SCHOOLS AND REQUIRING OUR CHILDREN TO WEAR A MASK IN SCHOOLS! ITS AGAINST OUR LIBERTY AS AN AMERICAN!</b>
7/21/2020 12:05:19	Susan	Peterson	Private citizen	Manhattan	I do not envy your positions during this time of public health emergency. But keeping schools closed and providing the best online educational practices would seem best for our state. We would be endangering many school personnel and many students families by opening. We must create a new normal during this time of pandemic duress. We and are institutions will be and are resilient. We should reopen when are cases are falling and we have a better understanding and better followed health practices in place. Thank you for allowing public comment. Stay well and healthy.
7/21/2020 12:05:20	Julie	Waterhouse	Educators in Topeka	Topeka	Please follow Gov. Kelly's recommendation for the health and safety of teachers, staff, and student's families.
7/21/2020 12:05:25	John	French	Self	502 South Neosho , Cou	I think public safety is Paramount of importance but I don't agree with delaying or canceling School.I also feel that school children are at a very low risk and the risk and the impact that it has on families is far greater if they don't go back to school in a timely manner.
7/21/2020 12:05:29	Jenny	Viernes	Mom	Wichita	I firmly support keeping schools closed until this pandemic is beyond resurgence. Regardless of the BoE decision my husband and I choose to homeschool. We do not believe the state has the best interest of our children and the community.

7/21/2020 12:05:43	Tabbatha	Householder	Lawrence	<p>I support Governor Laura Kelly's executive order to delay K-12 public school until after Labor Day. This gives districts and educators more time to make schools safe for everyone. If you force schools to open in August I want to know what your answers are to the following questions.</p> <ul style="list-style-type: none"> <li>•Are you telling school districts that you're okay with teachers coming back at nothing less than 100% safety levels? 80% safety? 50% safety?</li> <li>•Will elementary specialists be offered hazard pay for being exposed to hundreds of students since it is likely they will have to go to every classroom in the building and be exposed to more students/staff?</li> <li>•Why are school board meetings still virtual if it's safe to have kids in classrooms?</li> <li>•How will it affect students and faculty when the first teacher in their school dies from COVID-19? The first parent of a student who brought it home? The first student?</li> <li>•Will the state provide testing for all employees and students returning to work as we know 40% of all cases are asymptomatic?</li> <li>•Are Kansas schools really not going to require children under 12 to wear a face mask or facial covering? If so, that's terrifying.</li> <li>•Are we going to restrict travel of our teachers, students, and parents?</li> <li>•Is there any kind of hazard pay for those teachers that are willing to teach face to face because there is a need and they need their job?</li> <li>•If a teacher tests positive for COVID-19 are they required to quarantine for 2-3 weeks? Is their sick leave covered, paid</li> </ul>
7/21/2020 12:05:47	Shane	Hipp	Garden City	<p>Schools need to be open. Kids need the social interaction with other kids and in class teaching to help them develop socially and so they have a true understanding of the lessons. Many parents will continue to struggle trying to work full time and teach their kids when they are not at work. This is putting a huge burden on teachers, parents, and kids. As long as the schools follow the CDC guidelines students and faculty will be safe. I base this on my experience with my employer as we are screened, sanitizing processes put in place, and the actions/follow up when someone may be having symptoms. The government should not have a say in this decision, it should be left in the hands of the school districts</p>
7/21/2020 12:05:51	Anne	Harvey	Goessel	<p>I'm a special ed para, married to a middle school teacher. Delay is great to give our schools time to make plans and then for teachers to figure out how to teach given those plans. Teaching remotely doesn't just happen! We prefer to start with distance learning -- cases keep rising and we are both over 50 and I'm compromised. We love our jobs AND need the insurance! Please keep us working safely!</p>
7/21/2020 12:06:08	Jamie	Heydenreich	Rossville	<p>Please either require online learning until COVID decreases or delay the opening of schools. This isn't political. This is a matter of life or death for our children and loved ones. Respectfully, I thank you!</p>
7/21/2020 12:06:08	Travis	McMillan	Parent Bel air	<p>If we are really concerned about children and the economy why are we racing to open schools. 1. Schools for the first 2 months are petrie dishes of sickness. 2. Children will not abide by the practices that will help keep everyone safe as they are children. 3. If counties and cities are closing bars and limiting the number of people gathering how will this be accomplished? And 4. Why are people not listening to medical professionals who have been saying for months that masks and social distancing work?</p> <p>But the nincompoop politicians who know more than Drs. That specialized in these fields. Want to force our children into a situation that the outcome is unknown is dumb.</p>

7/21/2020 12:06:10	Heather	Fusilier	Wichita Public Schools	Wichita	This delay until September is a good thing. It will give districts much needed time to process your guidance and to see what case numbers do in the interim since, as long as cases are rising, we really should not have in-person classes.
7/21/2020 12:06:12	Carol	Shimeall	School District Patron and	OLATHE	I support Governor Kelly's order to start school after Labor Day. Students and staff must be safe.
7/21/2020 12:06:13	Jamey	Hancock	public citizen	Eskridge	don't delay..you killed the economy, now you are going to kill schools
7/21/2020 12:06:39	Crystal	Finnegan		Garden City	No delay in opening schools and NO MASKS!!
7/21/2020 12:06:44	Dana	Barrientos	Teacher	Wichita	I would Like to voice my support of each individual Board of Education making decisions about the start of school for their own community. A school district the size of Wichita with 50,000 students versus a town in western Kansas with maybe 2000 students do not have the same needs and cannot be treated the same.
7/21/2020 12:06:46	Kayla	Stigge	KNEA	KCK	This delay is our best chance to return to the classroom safely and prepared.
7/21/2020 12:06:50	Benjamin	Reiswig	Kansas City University of	Wichita	DO NOT DELAY SCHOOLS. It will put a rift in our education system and have detrimental effects in the long term. We have medical care and healthcare teams in place in the event that someone that contracts the virus actually needs hospitalization and ICU care. WE ARE READY and ABLE to help. DO NOT overreact and delay schools. The FLU has caused more deaths and infected more people than COVID has... We are simply losing sight of this statement.
7/21/2020 12:06:55	Kim	Mitchell	USD 204	Basehor	Please support Gov. Kelly's executive order delaying the start of Kansas schools. As a building administrator, we need the time to plan and the time to secure additional funds to put all of the supports needed to safely open Kansas schools. Everyone desperately wants things to return to normal, but in a pandemic situation, that is just not possible until we can ensure that our students and staffs are safe. I have deep respect for all of you and the work that you do for the citizens of Kansas. I ask that you have the same respect for our Kansas educators and students and put their safety at the forefront of your decision. It's not about making people "happy", restarting our economy, or being a "patriot". It's about keeping our youngest Kansans safe.
7/21/2020 12:06:56	Aimee	Hennigh	Parent and teacher	Hillsboro	Normal start time-Aug 20, no masks for K-6
7/21/2020 12:07:01	Brittany	Hauck		Wichita	Please delay school and think about our safety . I have an autoimmune disease and going straight back to school has me worried.
7/21/2020 12:07:10	Travis	Witte		Lawrence	I support delaying the start of classes until after the Labor Day weekend. With returning to in-person instruction as the goal for the good of students, waiting an additional number of weeks will allow for more prudent decision making in planning a safe return to instruction.
7/21/2020 12:07:12	Brenda	Breese		White City	Please delay the start of school until after Labor Day. This gives communities time to review and plan based on the State Board's recommendations. It allows time to acquire all items needed for safety and for needed training. It provides teacher's more time to put in order anything that needs addressed (health, legal, etc.) as they are going into an environment where social distancing is not required and not all people will be wearing a mask (based on health, medical, etc.). Recommendations say to do all of these: face mask, social distance and hand washing not just one or two of these things. Taking temperatures will not identify all individuals who may be sick as an asymptomatic person may not present with a fever. This will also allow time to flatten the current surge. Allowing counties/cities to make decisions obviously does not work as once they were given control the numbers began to rise when they chose not to follow executive orders given by the governor. I realize that kids need to be in school. I want kids to be in school however, with a surge in numbers I do not feel that is the best decision for students and staff at this time. Also, starting after Labor Day is not that far-fetched as many places throughout the country start school right after Labor Day. Please do not make the lives of kids and staff political.
7/21/2020 12:07:14	Jolie	McDaniel	Parent and school employee	Elkhart	I am in favor of delaying school to give Administration and staff time to coordinate efforts for implementing the new school year. When we went remotely in the spring semester it felt like we were just trying to stay above water. This will give us time to implement the plan appropriately. As a parent I also feel that our state needs to get a better handle on cases and how we can keep our children safe.
7/21/2020 12:07:18	Kellie	Bivens	Parents	Overland Park	I support delaying school until after Labor Day. I also support increased funding for schools to ensure they have the resources to buy things to help With social distancing measures. More teachers, smaller classes!

7/21/2020 12:07:22	Calysta	Macdonald		Shawnee county	I support delaying the start of school and redesigning the structure of the school day in order to meet the needs of families who are not able to accommodate learning at home. Students should be distance-learning if they are able until infection rates have stabilized. If school buildings could be used to facilitate supervised distance-learning in small groups for students who are unable to learn at home, teachers could better plan and prepare lessons to meet the needs of all, and higher-risk teachers could teach safely. The needs of teachers and students cannot be met while providing in-person class at this time. Students and staff will be required to quarantine, perhaps multiple times through the year, and policies for leave and attendance are not adequately understood. We have no idea what to expect in this scenario. Distance learning provides some stability. Thanks very much for your time.
7/21/2020 12:07:30	Emily	Millspough	Myself, and teachers	Wichita	Please keep schools closed until after labor day. As a teacher who is also married to a teacher, who has a first grader, I am fearful for my safety and my family's. More than that, I am concerned about the kind of environment our students would be returning to - nothing about this world would meet their social-emotional needs.
7/21/2020 12:07:32	Erika	Saleski	Parent of public school	Prairie Village	I fully support the Executive Order to delay the start date of schools. Our public health - the health of our teachers, students, families and all KS citizens - must be our first priority. With rising infection rates in KS, the state and local school districts need more time to plan and prepare for opening schools safely. This is the best course of action right now.
7/21/2020 12:07:33	Jared	Viernes	Parent	Wichita	Delay opening.
7/21/2020 12:07:41	Therese	Finan		Shawnee	as a physician myself, i without a doubt believe the power needs to remain on the local, not state level. Our governor is overstepping her power as well as not listening to our local health care systems (children's mercy) on recommendations for our children's return.
7/21/2020 12:07:43	Christy	Moore	Parent	Emporia	In person classes should be delayed until no new Covid-19 cases are detected for 14 days or more.
7/21/2020 12:07:55	Carson	Shively		Olathe	No
7/21/2020 12:08:01	Buck	Rogers		Hutchinson	Need to start sports on time
7/21/2020 12:08:08	Kari	Griffis	Pawnee Elementary	Overland Park	Thank you for allowing public comment. This virus is too new for us to open fully with children at risk. There is absolutely no way to adhere to social distancing or mask wearing guidelines for a full day in the classroom. It would be reckless to try. For one, the building I work in is too old to rely the HVAC system sending out clean air, we have a moldy basement that floods when it rains and only 4 sinks available for every 6 rooms and that includes two bathroom sinks. Teachers cant afford to buy cleaning products and hand sanitizer. If we wash hands every hour there won't be much teaching going on anyway. I have children at home too and struggle with the home-work environment but this is a pandemic, not just a bad flu season.
7/21/2020 12:08:10	Lynn	Wilson	USD480	Liberal	Please do not open schools until after Labor Day. Additionally should the risk of COVID19 continue please provide instruction when possible via Zoom or other avenues of online learning. Thank you.
7/21/2020 12:08:10	Genilyn	McCaffrey		Manhattan	Please allow individual school districts to make the decisions that best fit their circumstances. Kansas is not a "one size fits all" state and should certainly not be governed as such. Please do not allow political power-grabbing attempts to override the realities of day-to-day life for the citizens of this state.
7/21/2020 12:08:13	Mahleah	Lavin	Parent of USD 260 stude	Derby	As a parent and teacher, it has been very stressful trying to plan for what is happening this fall. Things seem to be changing almost daily. Delaying school will allow parents and teachers to make and test a plan for how procedures will change. Specifically for teachers, some are having to change their whole way of teaching curriculum because of this. Extra time will allow us to implement new technology and modify teaching to accomodate students in school and those learning remotely.
7/21/2020 12:08:14	Jessi	Wigdahl		Wichita	I support Gov. Kelly's order. It is in line with the latest recommendations from the medical/epidemiological communities, and gives us the best chance at the possibility of sending students back in person when the school year does start. This should not be political. It should be based on science and public safety, pure and simple.

7/21/2020 12:08:21	Sharon	Milligan		Olathe	I think it is fine for schools to not open until after Labor Day. HOWEVER, schools need to be ready to resume then. They need to use the extra time to prepare. Teachers need to be using this time for Professional Development on setting up a classroom with the new protocols. The end of the year was a disaster and students basically missed out on school. If teachers aren't in the classroom then classes need to be set up like Zoom meetings. District office staff should have this in hand with a concrete plan in place with actual teachers having input. I DO NOT think students should be out of the classroom for the entire year or semester. I know the governor is using this as a backdoor around the legislature and teachers are lobbying hard to stay home. I know it will not be easy but students deserve an education. Fear mongering is rampant right now. I suggest clear faceshields for all in the building at a minimum. There are a lot of options instead of just keeping schools closed indefinitely.
7/21/2020 12:08:25	April	Ramos		Lawrence	After reading about Israel's back to school issues, we definitely need more time and probably need to look at online only for the near future.
7/21/2020 12:08:29	Kelly	Rippel	concerns citizen, spouse	Topeka	As a spouse of an early childhood educator, (both of us with compromised immune systems, and both of our sets of parents do as well) I would like to submit the following comments to the Board of Education regarding the school plan for this fall. I am not an expert on epidemiology, but I did work in public health for over 4 1/2 years, served as a contractor under KDHE and have been trained by CDC in risk communication. Having known teachers who led summer camps this year, I have been made aware of multiple risk factors that cannot be guaranteed if schools were to open on time. These include of course wearing masks, physical distancing, and washing hands. Especially when talking about younger populations there is no 100% guarantee these behaviors can be controlled. What this means is the only way to completely mitigate or eliminate risk is to not allow the opportunity for the potential of the virus to spread. Therefore, I strongly urge and recommend the Board of Education to uphold the governor's plan to start school at least by Labor Day, and if need be evaluate the situation at that time to see if an extension is warranted. What we have seen over the summer is if it has been this difficult to ensure adults follow these risk mitigation behaviors how can we expect students to do the same? And the question the board has before them is: Is it the most responsible thing to protect public health to force schools to open, potentially endangering our communities & future generations? The answer is not political and should be clear. Thank you for your time and consideration.
7/21/2020 12:08:31	Rachel	Szmed	Teacher at usd469	Lansing	Delaying the start of the 2020-21 school year until after Labor Day is the safest decision for all parties. Last week Kansas was ranked #2 on the list of most irresponsible states supported by the number of COVID-19 increased drastically. We must limit contact until the number of infections declines drastically or stops completely. Forcing schools to open before this happens is dangerous and irresponsible.
7/21/2020 12:08:43	Molly	Cornell		Shawnee	I absolutely disagree with the executive order to delay all Kansas schools. This overreach by the governor disgusts me. The counties and local boards are best equipped to make decisions like this. Absolutely nothing prevents an individual district from delaying school if it is appropriate. There is no benefit from issuing this order. It only serves to further strip local power. Our children need to get back to school. I believe the governor plans to continue delaying the start of school until it forces schools to use a remote learning model only. Please, prioritize our children! By and large, the benefits of in person learning outweigh the risk of COVID-19 for kids. Use your power to protect the voice of parents like me.
7/21/2020 12:08:50	ZAC	WILDER	School Parent	Haven	Please allow schools and sports to resume on time These kids need to be active. Some kids are trying to get scholarships to help pay for college that they otherwise can't afford. Don't take away their future. They only have a small window to get scholarships and for some it's already been cut short last spring. Please reject the Executive order to delay schools.
7/21/2020 12:08:51	Marcie	Smith		Fort Riley	I think school should open up as remote learning starting the 17th of August, and then after Labor Day it can be either remote or in person. That way summer won't be delayed for those who have things planned on a yearly basis.
7/21/2020 12:09:02	Melissa	Riley		Olathe	Please keep schools closed until after Labor Day for the safety of students, teachers and staff.
7/21/2020 12:09:05	Teresa	Andrade	Olathe school district	Olathe	Our kids need to be back in school. ALL aspects of their health and wellbeing are important. I have kids in Elementary, Middle, and Highschool. All three kids want to be back in school.

7/21/2020 12:09:07	Dan	Brennan	Capital City Equality Ce	Topeka	I am against reopening schools in Kansas until the pandemic is under control. Currently it is still increasing in new cases. Combine that with the fact that seasonal influenza is spread mostly through schools, it behooves us to be extra cautious in reopening during this pandemic.
7/21/2020 12:09:10	Kristina	Bramwell	Elementary School Teac	Rago, KS	Recently having two grandparents contract COVID from a grandchild who is in 5th grade, having all students come back into classrooms, especially if masks and hand soaps/sanitizers are not available provided a very risky situation. Before schools open at full capacity and until they can make sure all precautions can be met, it only makes sense for school to open later. Although many children and young people will not get very ill, putting family members and teachers and staff at risk is not a humane option. I am for opening when things are safe and well thought out, but not prior to.
7/21/2020 12:09:12	Lauri	Kuntz	Parent	Eudora	I believe that the individual school districts should be allowed to determine their own start dates. The state is very diverse and should not be treated as if we all have the same level of virus numbers. Let each district decide what is best for them. Thank you!
7/21/2020 12:09:20	Traci	Hards	Teachers	Topeka	I am a classroom teacher who is extremely concerned about beginning ANY KIND of in person instruction with the spread of COVID-19 at this point in time. I do not feel that we are adequately prepared with a detailed plan in place that allows everyone in our buildings to be protected. At this point as an educator we have had VERY LITTLE information to be able to prepare our personal classrooms and be ready for all the new things being asked of us. Not only do we have our school community to consider but our own personal families as well. For the first time in 22 years as a classroom teacher I'm contemplating if returning to the classroom is the right move. I am extremely concerned for everyone's safety and well being. If we have adults that won't sit in a meeting without adequate safety measures in place why are we asking our staff and students to return without that same courtesy when our numbers in the community are far from going down?
7/21/2020 12:09:41	Brittany	Lavender		Overland Park	Please delay the start of school. Allow teachers the chance to adequately prepare for the school year. If you are meeting virtually do you really think it's smart to send us back into the classroom?
7/21/2020 12:10:08	McKinsey	Hall	USD 214	Ulysses, KS	I 100% support delaying the school year! As an educator, it will help us prepare for all situations that might happen over time with COVID-19. There is such a learning curve when it comes to teaching during a pandemic and the safety of my students and my family are of the utmost importance to me.
7/21/2020 12:10:20	Karolyn	McFee	My family, friends, Kan	Garden City	Please please follow the governor's order. It's not about politics. It is about saving lives!
7/21/2020 12:10:25	Heather	Blanton		St. George	Districts need the extra time to prepare for an unprecedented school year. Teachers can't just come early, that's not how contracts work. The infection rate in several parts of the state is prohibitive to in person school now, anyway. Have you seen the study that just came out that says that children older than ten have the same infection and transmission rates as adults?
7/21/2020 12:10:28	Barbara	Cameron	My grandchildren	Bonner Springs	I urge you to support requiring schools to open after Labor Day in order to allow the districts to adequately prepare the facilities and staff to deal with the pandemic.
7/21/2020 12:10:30	Jamie	Francis	usd480	liberal	I think waiting is a great idea. I know kids miss school and their friends but this gives more time for covid to hopefully become more manageable and allows educators to prepare their classrooms to be a safe learning environment.
7/21/2020 12:10:30	Cali	Ridder	S	Wamego	Strongly disagree with both of the governors mandates several medical institutions including children's mercy have advocated that children should return to school. Parents have always had and still do have the option to homeschool their children if they do not wish to send them. I resent her taking that decision away from parents
7/21/2020 12:10:32	Gennifer	Birk	Children	Gridley, Ks	It is pertinent that our students that live in counties that are able NEED to be back in school.
7/21/2020 12:10:33	Valerie	Schrag	Teacher - USD 497 Law	Lawrence	I urge you to support Governor Kelly's executive order to delay the start of the 2020-21 school year until after Labor Day. Schools need this additional time to implement the recommendations found in the Navigating Change document approved last week. We need this additional time to get things right, not rushed. Please put political affiliations aside and vote in favor of the public health and safety of all Kansas schools & communities, large or small.
7/21/2020 12:10:37	Alyssa	Beck		Wichita	Support Gov Kelly's Executive Order to delay the start of the school year! We need more time to prepare. Teachers (me included) are scared and worried about their health, the health of their families, and the health of students. Do the right thing! Our cases are surging!
7/21/2020 12:10:38	Neil	Swenson	N/A	Wichita	Close the schools or go online only, but keep paying staff

7/21/2020 12:10:38	Nancy	Dollar	Resident/parent	Prairie Village	Please do not delay schools from opening until after Labor Day. Our children are hurting and need to be in school. The evidence does not back waiting or delaying school in Kansas. Please don't make this political but look at the needs including: mental, physical, and emotional health which far outweighs any risk. Our hearts are burdened especially for the underserved. Please look at the statistics of Truman Medical center and their emergency room department and other local hospitals and what they are dealing with that is about the breakdown of the family and children being abused due to domestic violence and the stress many families are experiencing without jobs, being quarantined and substance abuse. Those children especially need a safe haven at school with structure, nutrition, emotional and mental support and education to have opportunities for their futures. It's horrific. Thank you!
7/21/2020 12:10:43	Katie	Ray	Southwest elementary school	Pratt	Start school in August!
7/21/2020 12:10:44	Janna	Skinner	USD 497	Lawrence	<p>I have two boys—one in middle school, one elementary. I am employed by the district as a special education behavior consultant. My domestic partner is a transition special education teacher. He teaches adults ages 18-21 who continue to receive special education services. Students with feeding tubes, wheelchairs, on respirators, have hygiene deficits, and most likely the very students who will be exempt from wearing masks. My other three family members go to different buildings. I, myself, support several.</p> <p>I ask how the current plan purports to respond when one of my family members is asked to quarantine? Do we all? Do my partner's students have to quarantine if one of the boys is quarantined and my partner is a close contact to our son and his students? What happens when my son's classmate develops Covid? It's bound to happen. How do I explain that. Has the state prepared for those responses?</p> <p>This is just a couple of scenarios and these are going to be occurring daily, maybe even hourly across the state. The intermixing cannot be controlled or taken out of the equation.</p> <p>Sports teams, club practice, students who travel to other buildings for classes, students who live in two homes due to joint custody, students who go to regular mental or physical appointments, chess club, high school classes, multi-school families with several kids or two parents who work for the schools or even across districts, chorus, band, bus routes, kids waiting for the bus, kids walking to school—these occur daily. We are nowhere near staying in front of the spread of this virus. And now we want to add in all of these additional contacts, unsupervised moments, and even supervised organized mishaps. When you have this many moveable parts, mishaps happen. And the virus will spread.</p> <p>There are too many moving parts. The current plan is only proactive in the ongoing daily business of wearing masks and hygiene. One proactive step ahead. There are no preventative steps beyond that. Testing teachers regularly? Daily symptom screeners for all staff everyday to help with contact tracing—I haven't seen it. Parents volunteering to do random screeners with their family.</p>
7/21/2020 12:10:47	Nicole	Drake		Clyde	Even our Leaders aren't wearing masks when they are publicly being observed. They are our leaders. They are educated I am not in favor of delaying the school start date. The reasoning given was that it allowed districts to gather supplies, but I think most districts have been gathering supplies for a while already and do not need the extra time. If a district is having those issues, they could decide locally to go that route. I'm more concerned that all districts should offer options for families. We all bring varying experiences, situations, and concerns, and this is not the time to go back to "normal" or as close as possible without letting parents have choices.
7/21/2020 12:10:48	Nathan	Troyer	Concerned parents and teachers	Lansing	I am a parent of a student and a teacher in USD 453. I ask that you uphold the Governor's EO to delay the opening of school until 9/9/20. The delay in the start will allow for the schools to prepare for the unknown challenges that lay ahead. Teachers and school administration also need time to prepare. It is all of our hopes that the state of Kansas will start to trend downward and no longer be a hot spot for the virus. Thank you for guidance and putting the safety of all stakeholders first.

					<p>Our children need to go back to school without masks. All summer, most kids have been around their friends at pools or ball games. Our kids need social interaction. The online school system was a joke from March to May. I understand that teachers worked hard to continue to teacher students, but not all were successful. For example, I had two teachers who would notify if my child wasn't at the class meeting or didn't turn in an assignment. While yet another teacher, did nothing! My child was missing 18 assignments and yet ZERO communication! The chromebooks that are suppose to be used as an educational tool at school, turned into a toy at home.</p> <p>We talk about the lack of communication skills our children have due to texting on cell phones, they do not know how to handle confrontation. What are we teaching them by continuing to attempt to educate them online? Elementary and High School Re were students should be learning basic life skills, how to communicate in person, being held accountable for their actions, and how to interact with diversity just to name a few. This virus is not going to go away. It is a virus! No different than the Influenza A or B, in terms of being a virus. Daycares have been allowed to stay open this entire time because of essential works needing daycare for their kids. That age arrange of daycare children is anywhere from 0 to at least 5. Have you ever tried to teach a 3 year old to cough in their elbow, wipe their nose, wash their hands, etc? How many daycares were closed because someone got COVID? But yet, we can not let children ages 5 to 18 attend school because of the possible spread of the virus? At least the school age range of children can be taught to cough in their elbow, grab a Kleenex, use hand sanitizer properly, and wash their hands. How many of those school age children were abused or set at home by themselves while their parents had to go to work to keep providing for their families? How many did not get at least one balanced meal during the day? What are we teaching our children? How media can scare and control our lives? How a virus that has a survival rate of 99.98% is so deadly that we can not be in public? We need herd immunity. The sooner we all have it and exposed to it, the sooner our bodies can learn to fight it. Yes, there has been deaths, most of them because the patient had an underlining condition. Our immediate family has members who are at high risk, so we understand the concern to keep them safe. That is why they are the ones staying at home and not going out into public places, not those of us who are healthy. Did you know that our school district alone had 40 plus kids missing daily for about a two week time period in January and February due to an "upper respiratory infection." They tested negative for Influenza A or B, strep, and mono. These kids were out for any where from 7 to 14 days. Our schools didnt shut down. We need to help our kids get back to as much if a normal routine as possible. Gov. Kelly already ruined dozens of students Senior year with her snap decision to shut down schools back in March. Those</p>
7/21/2020 12:10:55	Loretta	Cole	My family of 2 JR high	Belleville	
7/21/2020 12:10:57	Tracy	Archibald	Retired teacher	Wichita	This delay will greatly improve the odds of having a safer and thus successful reopening of school classrooms. "Pay now or pay later" continues to play out every time we have moved too fast.
7/21/2020 12:11:01	Jane	Clark	My family	Pratt	Get school started-if it's important to educators they can finger out a way to do it. They've had since March to develop contingency plans based upon different senarios. Children are suffering and the long term effects of the continued shut down are tragic! Teachers are also essential! Glad our hospitals didn't shut down to figure out how to get their job done!
7/21/2020 12:11:15	Robin	McKee	Catholic School parent	Wichita	I want schools to open! I love my children and want them to be safe. I'm fine with schools opening in early September but any longer is unacceptable. My children are not totally quarantined to the house. We have been to church, to the store, and out to eat. My husband and adult children go to work and come home every day. They are not totally isolated. I'm hoping the school and children can be responsible and make this work. I will be cautious but I will not live in fear. Thank you.
7/21/2020 12:11:18	Kimberly	Thompson		Olathe	Good day. I live in Olathe and teach in the Blue Valley District. We are inviting tragedy opening schools any time soon. After decades of destroyed communities at the hand of gun violence, and subsequent anemic responses to such destruction, it should surprise no one that local, state, and national leaders wish to, again, put the lives of children and their teachers on the line. This time, though, we can be proactive instead of reactive. PLEASE keep school buildings shuttered before we are forced into retreat as a response to the illness and deaths of thousands of community members. Learning may be more rich and rigorous in person... but is that the proper priority at this time? It is ok to say we know distance learning will be unusual, even difficult... but nothing is more difficult than burying the bodies of children.

7/21/2020 12:11:35	Tiffany	McCandless		Lawrence	I think that school should officially start after Labor Day. I think teachers should have to report (at home or at the school building) at the originally scheduled time. Give them a couple weeks to plan and collaborate. It will give them time to plan lessons, learn ways to successfully distance and in person teach, and learn all of the new protocol for this year. This will help them feel confident going into the school year. As a former teacher, I know there are so many stressors at the beginning of the school year for teachers. Time is so helpful on a regular school year. I know this year even more so! This will also help the school year be as successful as possible for everyone involved.
7/21/2020 12:11:37	Jen	Fescoe	SMSD- Teacher	Overland Park	Schools should remain closed until after Labor Day
7/21/2020 12:11:44	Tessa	North	ONEA	Olathe	Please Vote Yes on opening schools after Labor Day. We need time to get systems in place to keep our kids safe and to keep the staff that works in the school safe. Thank you for your consideration.
7/21/2020 12:11:57	Carl	Walston	Self	Lenexa	Respectfully as the KS State Board of Education to open school on time. In my non-medical opinion, 17 days is not going to make a difference. It is also my opinion that positive cases are going to increase rapidly once school starts, and school will switch to on-line. So let's get the process going. Open schools on time, and switch to on-line if/when the increase of cases. This way students can get their education going and settle into a learning mode.
7/21/2020 12:12:00	Rea	Parker	none	Lenexa	I don't believe that the schools should be opening at this time. The rate of the virus is higher currently than when the schools were closed in March. Let's just slow our roll and protect our families. If the students need to start their learning at the same level as when they left so be it. This situation will pass and conditions will be such that there isn't a risk factor involved to teachers, students and family members. We still have many employers mandating that their employees work from home... until it is safe for working together. Lets do the same for our children. Thank you.
7/21/2020 12:12:05	Jo	Blevins	USD 512	Olathe	Please support Governor Kelly's executive order to delay the start of school. All of our public health officials have said that we cannot safely open schools until our number of cases are trending down. We continue to see cases escalate in the state of Kansas. It is important that the state provide LEADERSHIP in this pandemic with decisive action to keep our students, teachers, and families safe.
7/21/2020 12:12:06	Jim	Darnall		Topeka	Understanding the science behind this there should be no problem with putting children back in schools. In fact it is in their best interest to do so. It is very sad to see this governor making rules as she goes along to delay returning to normal. This virus is one that has become a tool for political use. As people of this nation our leadership has disgraced the Constitution and the rights of the people based on false science and disinformation. We already can see nations and states that are operating closer to normal with little problem. This whole mess was created by panic and fear and it was all done intentionally!
7/21/2020 12:12:07	Jacinda	Vinduska	Abilene schools	Abilene	I'm okay with a delay if it helps make school safer for kids.
7/21/2020 12:12:21	Tara	Jennings	Parents	Olathe	For the safety of our students, staff, and families we should delay opening school until covid is under control.
7/21/2020 12:12:29	Veronica	Spires	Parent	Olathe, KS	Please open after Labor Day. Please equip administration, custodians, and especially teachers with all the items needed to make school a safe place for students and teachers.
7/21/2020 12:12:38	Julie	Hughes		Clay Center	I am a high school teacher who teaches in the public schools in our district. I am not afraid to return to the classroom, but I do want to have adequate time to prepare myself, my lessons, and my classroom space itself for all of the changes we will be facing. It is extremely frustrating to be forced to wait for outside organizations to make decisions affecting my students and my job. I am tired of being in limbo. Normally I would start preparing for the return to school July 1st. We are already at July 21, and we are still waiting for direction from the state. If you choose to uphold the governors order, please define what this means for the remainder of the school year. Will these days just be eliminated from our school calendar, or will they need to be made up in May? I know it is incredibly difficult to prepare for every scenario, so I am not blaming you or the governor or anybody... I am just expressing my frustration with the entire circumstances.
7/21/2020 12:12:38	June	Bender		USD 483 Plains, Ks	Please go with keeping schools closed until after Labor Day. We need to give things a chance to settle down so that our kids can safely return to the classroom. We have busses that carry many students and there's no way that we can have enough busses and keep the children distanced. Thank you for your time and dedication.
7/21/2020 12:12:39	Sarah	Moreno	Parent	Shawnee	Please keep schools closed past labor day.

7/21/2020 12:12:43	Ron	Ridley		Lakin	I do not agree with the order from Governor Kelly. Any and all decisions regarding children in schools are best left to the local school boards. They are elected by the district they serve and represent the best interests of the students. Kelly's one size fits all approach ignores the wishes of parents and ignores the differences between districts, counties and the associated rates of transmission in those counties. Please vote against the statewide order, so that local decisions can be made by the people directly affected.
7/21/2020 12:12:43	Angela	March		Cherryvale	I believe we need to open our schools back up on time and as normal as possible. We are letting kids across the state down if we don't. My child is a strong student and person in general and I can see how hard this has been on her. I can't imagine how hard it had been on children who don't not have a good home life! The numbers do not show a large impact on kids. And if you believe that they have not been around one another since March, you are blind! Also, the numbers are not any higher that other disease processes so I don't understand why we are responding like we have. We did not shut down schools during influenza seasons or when the swine flu hit when half of the schools were home sick so why would you do it now!
7/21/2020 12:12:57	Amy	Gillen	Parent	Garden City	I am a firm believer that our children need to be in school. Making your mandated to fit everyone is unrealistic. Every child, school, and parenting styles are different. Sime do well with on line some DO NOT. I was a teacher for 25 years and decided to resign due to your mandates. It is not logical to DEMAND mask in school. Just another issue our teachers will be faced with. Also the bully issue "his/her mask is better than mine..WHY are you trying to control us.
7/21/2020 12:12:58	Jeremy	Strahm	School, Heritage Christi	Topeka	Please ensure that government orders and mandates from Governor Kelly do not apply do private schools. Private schools do not force or require attendance, remote learning is available. For those choosing to attend in person, it is only logical to maintain that Liberty.
7/21/2020 12:13:03	Pam	Smith	USD 259	Wichita	I support Govenor Kelly. Please offer remote learning until it is safe for students and staff to return to work. I want my 2 children back in school ASAP, but I only want it to happen if they are safe to do so.
7/21/2020 12:13:13	Megan	Poindexter	My own family, as well	Lawrence, KS	<p>I do not, whatsoever, *not at all*, want to do virtual learning/ distance learning/ homeschooling/ whatever you want to call it. However, I think that if we jump the gun and put kids in schools before our state gets the rate of spread of COVID in Kansas under control (back to where it was in April/ May), we are making a grave mistake. I think the low numbers of children who are COVID+ is only because they have NOT been in schools; in fact, children have almost no where they can go to be together in close quarters. School settings will change that, and the way COVID manifests in children is terrifying, as evidenced by the existence of Multi-System Inflammatory Syndrome.</p> <p>I do not want outbreaks of COVID in our schools which will lead to sudden closures, quarantines, children with COVID swabs being shoved up their noses, sickness, and yes, death... but the most immediate and wide-spread impact is a whiplash of inconsistency for the children, their families, employers, and more. Yes, children need to be in school for many reasons, including their own safety and health. But if there is an outbreak in a school, that school is closed right back up again, putting those children back at home.</p> <p>I do not want outbreaks in the schools which would lead to outbreaks in all other parts of our communities. I an the Executive Director of the Senior Resource Center for Douglas County, and I have learned from a survey to Douglas County's senior population (60+ yrs old) who have said in no uncertain terms that they do not feel ready to jump back into society with the way Kansas' general population is ignoring Gov. Kelly's mask mandate, and people are ignoring it aggressively without concern for anyone other than themselves in, what I believe to be a childish, selfish, short-sighted mindset. The subsequent rapid spread of COVID since Gov. Kelly was stripped by our legislature of her Executive Powers to manage this situation supports the opinions of those seniors who feel their health and safety is compromised.</p> <p>I am optimistic that by giving Kansans an incentive to wear their masks and truly social distance, those who have deemed these actions to be something they are unwilling to do previously will find this a good reason to follow the practice and help stop the rapid spread of COVID.</p>
7/21/2020 12:13:28	Lynn	Kilgore	Retired teacher, substit	Leon	Keep schools closed until after Labor Day! Our schools are not meant for an experiment in this pandemic we are living through!

7/21/2020 12:13:28	Jennifer	Comer	Parent	Shawnee	They need to go back ASAP. This is affecting their mental health and is producing children that are improperly educated. We all know that we will most likely be put come winter. We need to get a jump start and get their education started.
7/21/2020 12:13:36	Ashley	Campbell		Salina	Let us go back to school! Not harmful to be out of school than in school for multiple reasons, COVID ASIDE!
7/21/2020 12:13:45	Joel	Wagoner	Teacher	Roeland Park, KS	I feel that the board should support the governor's executive order. We are currently in a place, especially in the KC metro, where cases are still rising every day. We are kidding ourselves if we think that it won't get worse if schools open right now. We need to also think about the teachers, and adults who kids go home to, that might be in a high risk category for COVID-19. I believe that we should support the doctors and leaders in our state who are working to keep people safe, and wait until new case rates begin to drop before opening in person.
7/21/2020 12:13:46	Janet	Stewart	My family	OLATHE	This delay is necessary. The virus is at an uptick and the schools are not prepared to handle a mass of children. Think about the children. Think about the staff. Putting their lives and the lives of all of the families they go home to IS NOT WORTH it. You must do what is right.
7/21/2020 12:13:54	Angie	Clifton	Blue Valley	Overland Park	Please OPEN our schools to in person!
7/21/2020 12:13:55	Erica	Ganz	Prairie Elementary	Prairie Village	I think we should follow the Governors plan to open schools AFTER Labor Day.
7/21/2020 12:14:04	Jesse	Borden	Kansas Resident	Olathe	The safety of children, teachers and staff and funding for implementation any plans. So far have not heard of any plans Until these issues are addressed I feel like it is foolish to go forward with opening schools.
7/21/2020 12:14:19	Suzanne	Long		Clearwater	Please consider that there is no "one size fits all" solution to this situation. What works for the large districts in the state won't necessarily work for the small districts. I'm not sure that delaying by three weeks will make much difference, I'm more concerned about all the other guidelines that don't make sense for ALL districts statewide.
7/21/2020 12:14:38	Joel	Colletti	Mill Valley high school	Shawnee	Start school and sports as normal
7/21/2020 12:14:38	JoAnn	Hermann		Wichita	Schools should remain closed until Sept. 9th! If public activity is again being slowed (bars and nightclubs closed, public gatherings to 15 or less etc.) it is not safe for school to be open. I believe that reopening schools too early will result in negative consequences.
7/21/2020 12:14:39	Bea	Mejia		Emporia	I support the Governor's mandate and believe that she is basing her decision on the data and safety of students. As a parent and school staff member, I want my child to go back in person and I want to see the students I work with more than anything. However, the safety of all involved is critical and I believe that being cautious in how we move forward will save lives. I believe working with our Governor and supporting her leadership is the best path in getting back to school!
7/21/2020 12:14:39	Lindy	Kralicek	Teacher	Goddard/Wichita	Please give us time as teachers to prepare our classrooms for an unprecedented time in returning this delay is needed if we go back at all since we are in Sedgwick county and cases are on the rise this might not be the case for the rest of the Kansas but all teachers in Kansas need this time to prepare in case it impacts their own county
7/21/2020 12:14:39	Monica	Gawith		Salina	Please keep the Governor's delayed start order in place. Our districts need time to put safety measures in place for the large groups of students we face. Three weeks in the scheme of student and teacher health is not unreasonable. It is better to error on the side of caution than look back regretting not keeping health as the priority. Please leave the delayed start order in place.
7/21/2020 12:14:49	Dominic	Sparks		Leavenworth	I think going back to school with full attendance would be dangerous not just to the health of the students, but to the families those students go home to.
7/21/2020 12:15:00	Caleb	Seimears	Seimears household	LENEXA KS	We will be forced to pull out of public schooling if my kids will be forced to wear a mask. If delaying makes this go away then that's what we need. I think this all seems unconstitutional and at the moment my only way to fight is to withdrawl until elecion time.
7/21/2020 12:15:00	Ashlee	Edwards	JEfferson County North	Nortonville	I think we should wait the extra couple weeks to give staff more time to get everything ready.
7/21/2020 12:15:02	Josh	Van Zandt	Cure of Ars	Overland Park	School should not be delayed
7/21/2020 12:15:11	Maria	johnson		salina	my sons just really want to know if there will be fall sports. They are really up in the air about having school in school and or having Fall sports. Please tell us if there will be fall sports.

7/21/2020 12:15:20	Derek	Walden		Wichita	What is the reason for delaying and prohibiting instruction of any kind, including private education? What role do parents have in determining health-conscious decisions for their family? Allow parents/families to choose what's best for their family in regards to risk and exposure. Many children can barely pay attention in class already. Any expectation of a mask worn all day by a child is simply unrealistic. Please listen to the public and allow parents the very American ideal and tradition of choosing what's best for their family. Thanks for your efforts and wish you all the best.
7/21/2020 12:15:37	Susan	Sunderman	I'm a parent	Atchison	I think kids need to have some kind of social interaction. The lack of socializing can/will lead to more kids depressed, sad, and stressed. In the face of this virus, we need a good viable plan for kids to be in school. I've read a plan from one state where they plan to have half the kids go Monday & Wednesday, the other half goes Tuesday & Thursday and leaving Friday for individual time with a teacher if needed and deep cleaning the buildings and buses.
7/21/2020 12:15:46	Kelsey	Allen		Wichita	Open schools now and no mask for kids. You know how many kids are at home alone right now cause parents have to work. This virus isn't as bad for kids and not as bad as the flu for adults lets get kids back to school please.
7/21/2020 12:15:51	Jennifer	McKinsey		Wichita	As a teacher and a mom, I fear both going back to in person classes and sending my children. Too many people are not taking this disease seriously, and our lives are not up for debate. We can provide online instruction until the numbers subside and a vaccine is found. Please focus on the science and not party opinion.
7/21/2020 12:15:54	Mary Alice	Kelly	Shawnee Mission Schoo	Shawnee	I think it's a good idea to delay the start of school until after Labor Day holiday.
7/21/2020 12:16:01	Lori	Wallis	Private	Altamont	After Labor Day is when schools used to start, & I don't think there's anything wrong with that. I do think after that, they need to fully open up schools, activities, sports, etc as normal. We will ALL eventually be exposed to COVID-19. As with any virus, it cannot be avoided, & we can't continue living in a bubble! We either have a strong enough immune system to survive, or we don't. There's no cure for the flu, & it just has to run it's course. Same with this virus
7/21/2020 12:16:03	Stephanie	Pessin		Overland Park	Please allow Governor Kelly's Executive Order stand. She is using science to base her decisions on and cares about Kansans across the board!
7/21/2020 12:16:08	Jarrold	Kieffer		Bel Aire	<p>Parents are best equipped to determine which schooling options are most appropriate for their children (online, in-person, or hybrid). Options for various learning environments are already being provided. Parents of each child should determine which format is most appropriate for them, considering the risks and benefits. These are not decisions that should be made centrally by bureaucrats or politicians.</p> <p>That being said, even if this decision were most appropriately made centrally by politicians, the experts have already weighed in. The American Academy of Pediatrics has determined that the (low) risks posed to children are outweighed by the benefits of in-person learning. The AAP has reviewed the evidence and rightly determined that children are at very low risk for contracting COVID-19, almost immeasurably small risk of dying from COVID-19, and they are very poor spreaders of the virus. The irrational fear that schools will cause great outbreak or infect teachers and staff is not supported by any evidence. And, if in-person school were delayed or canceled, many of those children would continue to socialize and/or attend daycares anyway, negating any perceived benefit.</p> <p>The bottom line is that Kansas children should not be forced to fall behind in their education in order to prevent the spread of a virus that they are at low risk of contracting and even lower risk of spreading. Governor Kelly is ignoring the evidence in this regard, and her proposed order should be rejected in favor of furthering our children's educational interests. Ironically, this decision still allows parents who are not comfortable (contrary to all evidence) sending their kids to school to home school or e-school their children. To the contrary, a decision to enforce the governor's order denies all parents the right to choose in-person schooling. There is only one correct choice here -- reject Governor Kelly's proposed order delaying the start of in-person schooling.</p>

7/21/2020 12:16:13	Candice	Garcia		Junction City	I believe that school restart should be left up to each county depending on their own active cases. Currently in our County there is only 15 active cases. It does not make sense to stop school entirely for huge increases when those increases are not happening everywhere. The long term education well being of our children needs to be taken into consideration. School is sometimes children's only place to escape. With guidance each county should open with necessary precautions when the active Covid numbers are not increases. There should not be a blanket timeline for everyone. Rural KS schools and metro Kansas schools will each have their oan struggles that should be accounted for.
7/21/2020 12:16:13	Brooke	Sorenson		Derby	As a teacher, I an my colleagues have tirelessly put students above ourselves and our families time after time again. We practice active shooter drills and know in a moment's notice that we would do whatever needed in order to protect our students. This is the ONLY time we have ever asked that our needs and lives be considered as well. We arent asking school to be cancelled or online the whole year, just a THREE week postponement. I don't feel like that is asking much. I know that many of you want to leave it up to the local school board but they are the ones receiving immense pressure from parents who need child care (which is NOT our job) or conspiracy theorists who believe it is not real. Ideally, I could trust my district to make the right decisions and care about my healthy over a couple loud parents and keyboard warriors. But I don't and neither do ANY of my colleagues I have spoken to Is the system broken? Yes. And let's use this as an opportunity to show current and future teachers that they are valued. I have a three year old son and would never forgive myself if I got him sick. I know online isn't ideal but neither is constantly living in fear surrounded by 30 students in a room with poor ventilation fighting them to wear masks. Worrying about my colleagues getting sick and dying isn't ideal. You want people to continue entering this profession? Show them that they matter.
7/21/2020 12:16:18	Ryan	Hizey	Cherryvale USD 447	Cherryvale	I believe that we should postpone the opening of schools in hot spot or high rising areas until a fully safe plan to open them has presented itself. There are still a lot of risks and unknowns to starting in person instruction in schools. At the moment, online instruction is the safest option to keep everyone safe and to help get the rise of covid cases down. I believe our governor has our best interest in mind and wants to keep everyone safe, from the administrators and staff, to our students and community members. Please, I beg you to consider what is best for our staff and students in schools and our communities in Kansas. Support this postponement of schools and the safest plans possible to help open our schools safely and keep Kansas going in a safe manner.
7/21/2020 12:16:18	Elizabeth	Inguanza		Scott County	No. Don't delay school. The damage to these kids from the spring shut down is apparent. How much damage are you willing to do to the children? I know people that are already looking into virtual schools and home schooling. Public schools won't really be needed if too many people become educationally independent. I believe public education is so much more than curriculum and I hate for that to happen. Covid 19 is now being handled very well by our medical professionals. Let's move forward for all of us.
7/21/2020 12:16:21	Katherine	Leatherman		Spring Hill	Please delay opening public schools or help teachers/families figure out a way to make all schooling homeschooling for a year.
7/21/2020 12:16:21	Nancy	White		Wichita	I have 2 great granddaughters who are school age. I agree we should delay school until September. Things were not near this bad when we cancelled school back in March. Now our state is one of the hot spots so why would we want to send out kids now. Please wait till it is more safe for all concerned. I know kids need to be in school but it is not worth risking their health and all the teachers and workers.
7/21/2020 12:16:26	Tina	Schrag		Goessel	I support the efforts of Gov. Kelly to delay the start of the school year until Sept. 9. Local school officials and teachers need that time to properly prepare in this time of pandemic.
7/21/2020 12:16:27	Michelle	Fender		Lawrence	I work for USD 497, and I think we should follow Governor Kelly's Executive Order to delay the start of school. Maybe COVID-19 cases will decrease in the next few weeks, or maybe the delay will just give districts more time to plan for effective on-line classes, but I know it is not safe to send staff and students into the school buildings in August.
7/21/2020 12:16:27	Flo	Harvey	parent	1730 W. University Wic	I think it would be wise to hold off the school start to after Labor Day.
7/21/2020 12:16:35	Deborah	Boatright		Lawrence KS	I support the Governor's order. School delay will help ensure the health of our citizens during this pandemic.

7/21/2020 12:16:42	Leslie	Weishaar	Shawnee Heights High S	Topeka	I support Governor Kelly's mandate to start schools after Labor Day. As a teacher I am concerned about returning to school while the number of cases of Covid-19 continue to rise. The safety of students and staff should be the number one priority of our leaders.
7/21/2020 12:16:44	Erin	Pelz		Wichita	I support Governor Laura Kelly's judgement In regard to keeping our schools safe. This is about safety of human lives. It is not political.
7/21/2020 12:16:44	Kristin	Ragsdale		Lenexa	<p>Across the state it is important that a singular decision on the procedures schools follow cannot be achieved. A 1A school with a class of six in a county with three cases does not need the level of restrictions necessary in a country with hundreds of cases and schools bursting at the seams. Therefore, the method on which each school district chooses to run for the semester and year may differ depending on circumstances, and this is reasonable</p> <p>However, that being said, the delaying of the start of schools across the state is not only understandable, it is the most common sense option that works for all districts. This delay gives districts more time to look over the guidelines for a safe reopen and to implement protocols, it provides teachers an opportunity to pursue continuing education on how to better implement virtual learning and hybrid models, it provides the science community more time to research the transmission within the pediatric community and how best to keep students, parents, and our teaching staff safe, and most importantly, a delay allows more time for families to read through the protocols and become as informed as possible and prepared with masks and supplies before their children either return to the school buildings or begin on a journey of education from the safety of their homes.</p> <p>The delay in the start of the school year seems not only necessary but as a wonderful option that is beneficial to the entire school community for all sizes of schools from the K-12 1A buildings to the bustling 6A schools in the higher populated metropolis regions of the state. As an aside, for years many parents and communities have pushed back against the ever creeping earlier start of school as it has leaked from post Labor Day to early August. While this push back is for the health of the state and our residents, it is important to note that starting in September is not an alien concept, and was the protocol for decades.</p> <p>In conclusion, as a state, let us be less concerned about the contact hours and more concerned about the health and welfare of the education population.</p>
7/21/2020 12:16:46	Jane	Juelsgaard	LHS	Lawrence	OUR CHILDREN NEEDS SOME NORMALCY PLEASE CONSIDER THEIR MENTAL STATE AND CONTINUE SPORTS FOR THEIR WELL BEING.

					<p>In opposition of the executive order — first, pertaining specifically to activities, sports, and extracurricular activities. There is no EO pertaining to club-sanctioned activities outside of the school districts (i.e. traveling baseball, softball, soccer, etc) which generate a higher level of risk for spreading the virus as families and players are traveling among states, not just within their own city, to play against other teams. While those activities generate revenue for their respective cities and private clubs, and school activities aren't seen as a source of revenue for the schools, it seems like a double standard that schools aren't able to participate while the privately sanctioned groups are able to continue practice and competitions.</p> <p>Second, the loss of the roughly 17 days out of the classroom puts additional strain on the number of hours required by KS Leg to properly complete an academic year. Knowing no waivers are allowed, suggest to begin as scheduled in mid-August and mandate an online-only curriculum through October 15 for specific areas. A sweeping blanket order doesn't fit the smaller districts who have the ability to commence in-person learning where infection rates are below a minimum. Larger districts have the opposite problem, where community spread poses an outrageous risk to educators and staff. While students are eager to return to learning, in-person instruction should be heralded with caution for specific audiences and needs who cannot have similar services at home (i.e. special needs/therapies).</p> <p>Compromise needs to be reasonable and consider all parties. Please consider the health and safety of your educators and support staff, above your partisan motivations. Please also consider, what is appropriate for a 1A district looks vastly different than a 5A school. Separate recommendations may be appropriate for one compared to another.</p>
7/21/2020 12:16:54	Catherine	Mores		Overland Park (Olathe S	Thanks in advance for your time.
7/21/2020 12:16:57	Lainee	Graham	Family/educator	Shawnee	Please allow districts to make local decisions.
7/21/2020 12:16:58	ricky	bulman		Enterprise	delay the school year
7/21/2020 12:16:58	Megan	Schoff	Heritage Christian Acad	Olathe	I believe school should start on time. The school is prepared, a delay won't make a difference. Masking, distancing and good hand hygiene will help!
7/21/2020 12:17:01	Sherry	Whitmore		Wichita	Take the advice of public health experts. Wait until the cases go down and stay down before attempting to increase contact. Education is vital, we must keep everyone alive to reap the benefits.
7/21/2020 12:17:03	Kristin	Dunn		Kansas City	Delay for the safety of children and staff.
7/21/2020 12:17:05	Sabrina	Watkins		Wichita	School should absolutely be delayed. It is not the schools job or teachers jobs to babysit so parents can return to work.
7/21/2020 12:17:07	Ian	Arnold		Leawood	I support the Governor Kelly's order to start school after Labor day.
7/21/2020 12:17:10	Alberta	Cook		Lawrence	Myself and so many others are VERY concerned on our children even returning this yr. I have daycare at my home, everytime my son gets exposed he will be sent home 2 wks, thats tough for all my families that depend on me! I could loose my job! How many times could this happen? A LOT!!!! Not happy! Feel you are putting our kids in danger so you don't loose funding! Don't care about our children! 1,800 kids in his school....the virus will spread no matter how careful you are! Please think about it! PLEASE!
7/21/2020 12:17:14	Danea	Cramer	Parent and employee of	Wichita	I am 100% on board with delaying the start of school. It is too risky and as an employee I don't feel like I should have to risk my life. I also believe that in a months time we will be able to see if wearing masks is truly effective. At that time I would still like to see a gradual re-entry and if it proves to not be safe move to an on-line format. That's not ideal but it's not forever.
7/21/2020 12:17:34	Cynthia	Giesen	Spring Hill School Distr	Spring Hill	I do not think the Kansas schools should open until after Labor Day at the earliest. I think unless there is clear plan for how exposures and positive COVID cases are going to be handled in each district, school should start as virtual and be reassessed at each quarter.
7/21/2020 12:17:35	Christy	Hancock		Wichita	Please vote for schools and sports to resume! No delay. My high schooler has been conditioning for football for 2 months with his teammates. It is our choice
7/21/2020 12:17:41	Tammy	Kniffin	USD 259	Wichita	In the Wichita area, we either need to go all virtual or delay the start until we can safely return to school. I am not sure about rural counties, but I know many recently held county fairs so their numbers may go up considerably.

7/21/2020 12:17:42	Kylie	Seymour	USD 475	Manhattan	I support the delay of school starting after Labor Day.
7/21/2020 12:17:50	Heather	Hanson	Blue Valley and Desoto	Shawnee	I am a mother of 4 and a teacher. Forcing students, educators, support staff and other school personnel to go back to school in person during a pandemic is reckless and irresponsible. Virtual learning from home should be the only choice.
7/21/2020 12:17:50	Megan	Pfannenstiel		Hays	Concerned more about the isolation that children have been living in since March. Concerned about child care costs and lack of childcare for working parents. My child misses his school, friends, and learning environment. We need to weigh what is worse, illnesses or the mental toll this is taking on children, parents, school employees, and our community.
7/21/2020 12:17:51	Christy	Bogart		Abilene	I, as a parent, appreciate Governor Kelly thinking of the safety of our kids. Numbers in Kansas are rising and many are not taking this pandemic seriously. While it may not be convenient to postpone the opening of schools, think of our children, our teachers, and all staff members, their health and lives are worth a little inconvenience. Please postpone the start of school, let us get our numbers down and our schools ready so that we can open schools as safely as possible!
7/21/2020 12:17:58	Christy	Reed		Olathe	As a parent with a student with an IEP I feel it is very important for schools to start on time. She's falling more and more behind the longer school is not in session. I've hired a tutor, but it's not the same as having resource everyday.
7/21/2020 12:18:00	Roxanne	Mettenburg	None	Princeton	Listening to KU Health Services panel this morning speaking to the safety of opening schools "safely". A couple of simple take-away points: 1. Is the community "safe" (as regards COVID)? If cases are going up and the rate of positive tests is going up and wearing a mask, social distancing are not being observed widely, the school will also not be "safe", as it will reflect the community "standard" and if resumed will be essentially the same risk as a bar. 2. Can the school follow infection control protocol? Masks, face shields, social distancing and frequent hand sanitization? That is what will be required for schools not to become sources of clusters. As I observe my local rural community, the answer to the first question is "no, the majority of people are not practicing proven precautions. Rate of positive test results in Kansas has shot up in the last month to double digits. Kansas is ranked by an insurance industry report as the 2nd worst state in observing precautions - in the low 30% range. On the second question, the answer is I don't know if the school can do those things. Are they going to get increased funding to make the necessary accommodations? Money for PPE? I have never seen a classroom large enough to accommodate the same number of kids at 6 ft distances. Finally I would suggest that you have healthy skepticism for the notion that this virus is benign in children. Evidence to the contrary emerges daily. My wish is that you let the data guide you. The data does not support resuming schools at the traditional August time. I hope it does by the week after Labor Day.
7/21/2020 12:18:03	Julie	Brunner		Manhattan	I think a delay may be necessary but after Labor Day seems excessive. 1. Cases will probably only increase in winter (with everyone inside) and schools will most certainly be closed for at least sometime this winter. 2. Many kids are failing to thrive without school right now for various reasons (mostly social, but emotional, academic, etc.). I think if a number of people are planning to homeschool, then delaying seems even less important as there will be fewer students.
7/21/2020 12:18:04	Amanda	O'Shaughnessy	Blue Valley School Dist	Prairie Village	Please uphold Gov. Kelly's motion to delay the start of school until at least Labor Day. I also whole-heartedly support virtual learning until COVID numbers decline. I am an elementary teacher who sees 450 students a week. I miss my students and teaching in person----that said, I do not want to feel like I am risking my life (stress/worry will also take a physical and mental toll on teachers and students), my family's lives and contributing to a safety hazard by teaching in person. I want to go back when it is actually safe, not just when someone in authority says to go back despite the elevated risks. Thanks for your consideration and care in this decision!
7/21/2020 12:18:21	Sheila	Lunsford		Pratt	One size does not fit all and it doesn't when mandating an entire state to all delay schools. A city with 7,000 people shouldn't be treated the same as a city as big as 390,000! Each county should be able to make plans according to how things are going in their area. Our kids need some normalcy and need in person classrooms!

7/21/2020 12:18:23	Jean	Willich		Horton	I don't see anything wrong with waiting until after Labor Day; don't see anything wrong with starting before either. Anyone who has kids or grandkids in northeast Kansas who play sports know 7th graders up have been together all summer practicing anyway using names like "conditioning, open gym," etc etc. plus a great number of travel leagues have played all summer, not to mention swimmers. If they can do that, they can sit in a classroom. Give parents choices. To play sports meet in classrooms and wear a mask, sanitize, and take precautions or go virtual and not do sports. Either way they must be accountable for academics. You will never make everyone happy. I wish you 🙏 and know this retired teacher thinks teachers must be accountable just like other essential workers.
7/21/2020 12:18:33	Samantha	Lackey	USD 327	Lindsborg	I believe that delaying school to September is smart. With the new guidelines for music teachers, the extra time allows us to get all the extra materials that we are going to need. It also allows us to keep ourselves and students safe. Not to mention my unborn child. I want to do everything to keep my baby safe, as well as my students. Going back to school without the proper materials that were just recommended in the aerosol study, would not be safe for any involved.
7/21/2020 12:18:40	Renae	Willey		Abilene	I am a Kindergarten teacher, please give us the time we need to do everything we can to be ready to keep students and staff safe. Our district leadership team met yesterday, and my head is swimming processing all the logistical changes, let alone the academics.
7/21/2020 12:18:41	Katie	Mathews	Parent, Realtor, Emporia	Emporia	I have taught in K-12 public schools and now am an instructor at ESU. My husband is a principal at our high school. More planning time is needed. I believe all schools where numbers are rising should be starting virtually and working towards safe integration for all and best educational practice.
7/21/2020 12:18:41	David Day	Day	Usd 453	Leavenworth	Students need to return to school sooner rather than later. Online learning does not work for all of Kansas kids. Many low income students don't have access to internet or parent to help them. It's not because parents can't but because they don't have the time with returning to work.
7/21/2020 12:18:43	JR	Hall	Parent of Kansas student	Wichita	<p>THE CAT IS OUT OF THE BAG... THE CDC, THE WHO, AND ALL THE SO-CALLED EXPERTS LIED TO YOU!!! HERE'S THE LIST:</p> <p>⚠️ EVERYONE IN THE ENTIRE COUNTRY NEEDS TO READ THIS AND ABSORB IT... THOSE STILL ASLEEP, YOU BETTER WAKE UP BECAUSE THIS SHAM/DRESS REHEARSAL WILL CERTAINLY BE THE LAST CHANCE; THOSE CHOOSING TO REMAIN IN DENIAL, GIVING THE FINGER TO REALITY, YOU'RE ON YOUR OWN ...</p> <p>▲ "CDC admitted they screwed up COVID19 infection counts and intentionally misled the public and have apologized, clarifying that the amount of people truly infected is much lower than what was originally reported -- an error so egregious it made the director of the Harvard Global Health Institute say "how could the CDC make this mistake? This is a mess."</p> <p>▲ The American Coronavirus Task Force also admitted to fudging the National COVID19 death count when Dr. Birx said the deaths are people who died "with" COVID19 not "from" COVID19, thus making the real death count much lower than what is currently being reported.</p> <p>▲ Dr. Anthony Fauci admitted masks won't help against the virus and mask manufacturers are now including warnings that their products do not deter COVID19.</p> <p>▲ Fauci also said that continuing to close the country could cause irreparable damage.</p> <p>▲ CDC backtracked their initial claim that led governors to shutdown their states &amp; clarified that COVID19 does not spread easily on surfaces.</p> <p>▲ Governor of New York Andrew Cuomo confirmed a recent health study showing that 70% of new infections actually originate at home, thus making stay at home orders one of the most dangerous mandates currently in place.</p>
7/21/2020 12:18:43	Donna	Loewen		Ulysses	School remain close until after Labor day!

7/21/2020 12:18:46	Darci	Kaser	Usd 392 osborne county	Osborne	I am a teacher in Osborne and I am hoping we are able to start our year in August as planned. I feel one size should not fit all in this situation. We are a rural community with few cases. (Only 3.) Our kids need some stability, and regularity during this time. We need to begin getting back to normal. Please consider this as you make your decision. Thank you.
7/21/2020 12:18:47	Marshall	Minnich	my family	Lenexa	Please open the schools. The kids need to go back. The data shows that kids are at virtually zero risk to themselves and to others. The teachers can be protected via masks and social distancing if they desire. There is no substitute for in-person learning, and the economic hardship on parents trying to earn a living with kids forced to stay home is huge.
7/21/2020 12:18:52	Dayla	Jensen	Wichita Heights HS	Wichita	Please don't delay school until after Labor Day!!!! My sister and brother in law are administrators for usd 259 and they have been working so hard to come up with a plan to open on time and safely. I trust that these administrators have the best interest of students and faculty in mind. Waiting until Labor Day for school to begin means postponing sports too. This is not a good thing for my boys. They have to play soccer or they will find other things to do that will involve being around more people and a variety of people other than their soccer team. This will increase their likelihood of being exposed.  If we delay school 3 weeks, does this mean that we will be going to school until after Memorial Day? Then this means that teachers will need paid an extra 3 weeks! Will we shorten the number of days that our students need to be in school?
7/21/2020 12:18:53	Erica	Hohl	Usd 259	Wichita	I say trust our local school districts to make the best decisions for their students and staff! No Executive Order! No safe islands
7/21/2020 12:18:57	Erin	Hodgson	Common Sense	South Hutchinson	Schools HAVE to reopen. The data for how this minimally effects children is clear. What DOES effect are the long term consequences of stunting their education and overall development. These kids have to go SOMEWHERE while their parents work. It can be unregulated daycare situations or it can be a proper education in a classroom with a teacher. The teachers unions are jumping on this train wreck and using it as yet another way to make entirely unrelated demands. They're claiming to be martyrs and saying they're being put in danger. Please, go look a nurse in the eye and tell them that. Go look a nursing home Director in the eye and say it. Go tell the 17 year old grocery store clerk that. It's a job. You either do it, or you don't. But don't expect a paycheck if you choose not to do it. Also, children have a right to a free and adequate public education. There's not a child in America that is receiving that right now (aside from legitimate homeschoolers). Our country is failing these kids. 6 hours a day on a computer doesn't come anywhere close to a quality education. Open the schools. We owe it to our children. Anything less than full, in person school (without MASKS!!!!) is an insult to them. And masks are a joke. Go spend 12 seconds with a 2nd grader and tell me a) it fits them properly b) they're not touching it and c) they're paying attention to you and not their mask. I walked through a parking lot last week and saw 5 masks laying on the ground, presumably from adults. Now imagine a school with 200 kids putting them on and off all day for drinks, lunch, etc. PLEASE, I urge you to do the right thing for our children. Don't make them suffer because of a bunch of oversized babies who can't quit playing a game of politics with our children. Either use my tax dollars for giving these kids a proper education, or give them back.
7/21/2020 12:19:01	Megan	Shuman	Haysville public schools	Wichita	Delay start of school until we are comfortable with our safety measures keeping our teachers, students, and families safe
7/21/2020 12:19:07	David	Schepp	Schepp Family	Topeka	There is no need to rush back to open up schools. Err on the side of caution and think of the second and third order effects that sending children back to enclosed educational settings will have.
7/21/2020 12:19:08	Amber	Jackson	Parent	Silver Lake	I support the delay of opening schools. Please give our schools time to make sure everyone is safe.
7/21/2020 12:19:14	Amanda	Whearty	Kindergarten Teacher	WICHITA	I feel that it is important to delay the start of school to allow teachers the opportunity to reconfigure classrooms and curriculum to work for our students and their families. With the numbers still climbing this is the time to be smart about how the school year will look. We don't want to get two weeks into school only to have it cancelled/shifted online without any prep time. Starting the year is nothing like finishing out the year. We need to have this time to make sure our students and staff can be successful!
7/21/2020 12:19:16	Ted	Hanman	Faculty member Benedic	Platte City	Please delay opening until the numbers of infections are at the correct CDC amount.

7/21/2020 12:19:26	Donelle	Sage	I represent myself as the	Meriden	<p>I am writing you to encourage you to follow and support the recommendation of Governor Kelly in her executive order to delay the start of our school year. For the last 15 years, I have dedicated my life to the students of this great state and will continue to do so. I am also a product of the fabulous public school systems in which you so proudly represent.</p> <p>With that being said, I also want my family and myself to be able to live safely. I am high risk but my family and I also live with my aging and elderly father whom is extremely high risk. I know that the children must learn and I have done and will continue to do what is best for the children of this wonderful community. I just hope you can let us all learn together safely. I am part of the specials rotation and this would expose me to almost 1000 elementary students and staff a week if not almost daily.</p> <p>Thank you for your time, dedication, hard work and effort in this unprecedented time.</p> <p>Donelle Sage School Counselor in Shawnee County</p>
7/21/2020 12:19:34	Dehonna	Stone	Family	Louisburg	Return to school asap. Students will adapt to the changes. Understandably larger cities will have extra hurdles but many rural areas are not seeing the # of cases as larger cities.
7/21/2020 12:19:43	Kristy	Scheffelman		Olathe	Delay the start of school until after Labor Day.
7/21/2020 12:19:50	Zebulon	Tiedeman	Kansas Teachers	Belton, MO	I have spent all 11 years of my band directing career in Kansas schools. Recently, I have confronted the fear of possibly losing a colleague to COVID-19. This person is a well-respected and loved teacher. She is a veteran teacher who has made an impact on hundreds of students. I fear that we will lose truly inspiring figures in our profession because of COVID-19. I do not believe we are ready for full in-person instruction just yet. Districts need more time to gather resources and make the safest plan possible for their district. Delaying the school year will help ensure we are thinking about the safest way possible to return to the in-person instruction we all miss.
7/21/2020 12:19:55	Peggy	Nikkel		Hutchinson	This is ridiculous!!!! It is supposed to be left up to the local authorities. As many have said, one size does not fit all. The BOE and KSHSAA has a great plan for starting school in August and districts should be left to determine what is best for them, not some remote politician. Way overstepping her bounds!!! Quit quarantining healthy people!! Never have healthy folks been quarantined. If folks are afraid, they can take the necessary precautions (masks, distancing, and STAY AT HOME). Perhaps if we hadn't been quarantined for 3 months, we would be way past this.
7/21/2020 12:19:56	Scott	Sackrider	Parents	Lawrence	Keep closed until a plan is devised AND implemented to keep all safe. To include PPE, distancing, etc.. Suggest plan for this to be the case for years. The paradigm of inserting information into brains, as well as turning that information into knowledge and wisdom needs to greatly improve. Create an "a la carte" list of classes or assignments that can be completed self-study for credit. And create classes in how to increase self-reliance itself. (Teach classes on how to learn)
7/21/2020 12:20:04	Ilex	Gelpi	Parent	Wichita	I vote no, do not delay the start of school.
7/21/2020 12:20:06	Patty	Robb	na	Olathe	I think schools should be online only for the first semester, there is no safe way to reopen while COVID is unchecked in our community.
7/21/2020 12:20:12	Marylavonne	Roseberry	USD 439	Sedgwick	Please give staff and administrators the time to go through and implement plans from the document that you passed down. Our re-opening committee is doing everything we can, but if we start school at the regular time we will NOT be ready. If you do not agree with the Governor's mandate, that's fine. Do what is best for our students and staff by giving us three extra weeks to safely open. We need that time to put procedures in place.
7/21/2020 12:20:16	Brooke	Heiter		Goodland	I believe it would be smart to delay school. The amount of cases that are popping up is concerning. I myself am a teacher and I hear all the time that teachers just want an extended break. Let me be clear how WRONG those people are. I need time to figure out how I can be the most effective teacher right now. It is mind boggling on all the extra things I will need to do in my class to make sure all my kids and myself are safe. It's overwhelming. If I have three more weeks to prepare then just maybe I can shake this feeling of anxiety and fear.

7/21/2020 12:20:18	David	Korte	Seneca	<p>Please let individual school districts decide their fall schedule.</p> <p>I appreciate our governors concern about the spread of coronavirus. There is enough demographic difference from district to district that we need to evaluate the situation individually. Our county currently has an active (diagnosed) infection rate of 0.04% (4 in 10K). We may suppress a pandemic, but the virus is not going away any time soon. Evaluate the benefits of education (curriculum, psychological, and sociological)vs. the cost of "hiding under a rock". We are rather blessed in our "sparse population". Allow us to use that to our advantage.</p> <p>Also, death rates(in KS) have not followed the recent "surge in diagnosed cases" suggesting that something has changed in either our data collection practice, or in coronavirus mortality. I suggest that you do your own research to either confirm or refute our governors beliefs/recommendations.</p>
7/21/2020 12:20:19	Logan	Coffman	De Soto	<p>Any additional closure of schools past Labor Day Weekend puts the children of essential workers at great risk due to lack of supervision. Furthermore, this causes an unfair conflict for parents between their responsibilities as both a parent and healthcare worker.</p> <p>Additionally, if schools remain closed, some in person activities need to be offered by the school district in order to maintain the social and emotional health of adolescents, many of whom are struggling significantly due to isolation.</p>
7/21/2020 12:20:25	Elizabeth	Vulgamore	Scott City	<p>We live in a community where school is a safe haven for numerous children. They rely on the meals served and the stability the schedule brings. The delay in starting will likely be ended with yet another delay which in turn will bleed into the first semester. This virus is not going away. We must carry on for the sake of our children's mental health, the economic impact as well as the long term effect on education.</p> <p>we cannot in good conscience reopen schools until we have adequate resources to make every school safe for teachers and students. It is still too dangerous, and we do not yet have the resources or space to make it safe. Reopening schools would put students and teachers in danger, as well as their families, the community, and our state.</p> <p>Pediatricians advise that children should only be allowed to return to school if measures to keep students safe have been put in place. With recent news of several cases of healthy children with no preexisting conditions becoming very ill from COVID 19, some with possible long term heart and lung and other conditions, it is clear that children are vulnerable to COVID 19.</p> <p>Many recent outbreaks in our community have involved teenagers, that then led to others in the community becoming ill.</p> <p>At a Montessori daycare/school where my nephew attends, 3 teachers who had been practicing social distancing became ill with COVID 19, which led to the school closing for two weeks while others were tested. Imagine that occurring times every school in the school district and state.</p> <p>Many local school districts don't have the necessary resources or capacity for even very basic preventive measures of physical distancing and limiting contact between students.</p> <p>Other countries have been able to reopen schools because their governments invested in personal protective equipment, health and safety measures for schools, as well as adequate nationwide testing for COVID 19. Our country has yet to expend the resources to do that to the degree necessary to reopen.</p> <p>With regard to remote learning, it has to be done in a way that is equitable to all students. Again, financial resources have to be made available in order to achieve it, but that seems more feasible at this time than reopening underprepared schools.</p>
7/21/2020 12:20:26	Susan	Woodbury	Prairie Village	

7/21/2020 12:20:26	Jenn	Marasco	Jennmarasco Wellness	Overland Park	We have to fight for the kids who don't have a voice!! There are so many Kansas Kids need schools for safety, structure, and food!!! Please vote against Governor Kelly!
7/21/2020 12:20:34	Cynthia	Duncan	Self	Shawnee	We need for kids to go to school in person!
7/21/2020 12:20:45	Darrah	Buren		Lawrence	Please support Gov. Kelly's EO to delay reopening schools until after Labor Day! It is the smart, SAFE thing to do. Our teachers and students are relying on you to do the right thing!
7/21/2020 12:20:45	Andrea	Wollenberg	teacher in USD383 Sch	Manhattan	LOVE the idea of delaying the start of the school year.
7/21/2020 12:20:46	Joey	Wood	Free State Football	Lawrence	As a high school student, and part of the football team, leaving us to do nothing for 2 months is bad on our mental and physical health. If you truly believe is making every kid better and mentally stable in Kansas Education, then this is not a step in the right direction. Without school or sports for 2 months, kids will be left to make bad decisions and lead them in the wrong path.
7/21/2020 12:20:47	Hope	Smith	USD 503	Parsons	Please uphold the Governor's order to delay the start of school. One child getting seriously ill is too many. The life altering effects from this disease aren't known as of yet. Please keep our kids and adults safe!
7/21/2020 12:20:47	April	Jason	Usd 232	Shawnee	I have two students enrolled in Kansas public schools, one in Kindergarten and one in 7th. Prior to Gov. Kelly's press conference, I had decided to pull them out of public school. With COVID-19 cases continuing to rise, putting hundreds of students together in buildings that can't accommodate them safely is hopelessly irresponsible. I've taught in Kansas, and I can't in good conscience add my children to the overcrowded situations, putting staff and student lives at risk.  I fully support Gov. Kelly's plan to delay opening until new COVID-19 cases begin declining in our region. I also fully support a hybrid approach, allowing students who absolutely need face to face contact to make gains in academics, and allowing school personnel to continue to support children whose lives depend on school for food and safety. I do NOT support opening the doors for the full student population all at once.
7/21/2020 12:20:52	Joanna	Farmer	USD 259	Bel Aire	Let local school boards decide. I'm ready to get back to work but I feel that waiting until 9/7 makes sense. Sedgwick County's cases are growing rapidly. I realize that's not true for all counties. The decision can be made locally.
7/21/2020 12:20:53	Mindy	Shannon		Carbondale	I have a sophomore in Santa Fe school district and a sophomore attending Topeka High. If we can't have groups larger than 15 to 25 then how can we expect to send our children to schools. It puts our children, teachers, staff, and families at risk. If one of them gets Covid they take it home to a sibling or parent or grandparent who can't fight it! I know my sons dad has lung issues and would not be able to fight it! School needs to be online! We can't hold graduations (my daughter didn't get hers) but let's send our kids to school! No!! Think about the safety of everyone!
7/21/2020 12:20:54	Jane	Gilman		Hays,KS	I believe the delay is wise , so schools can get a solid plan that works for each school but still with healthy guidelines.
7/21/2020 12:20:58	Barbars	Bond		Plains, KS	My husband and I fully support Governor Kelly. We feel she has the children, teachers and families in the best interest in her Executive Order concerning the beginning of the 2020-2021 school year. I have daughters and granddaughters working in three different school systems in Kansas plus schoolage grandchildren attending school in Kansas. They, as well as us, are concerned for their safety. Thank you Govenor Kelly for your concern.
7/21/2020 12:21:10	Amanda	Pfeifer	USD 102 Cimarron	Cimarron	I support delaying school to see if we could possibly start without the mask mandate.

					<p>I am asking that, for the health and safety of students, staff and families, that you support Governor Kelly's Executive order for a delayed start of school. Beginning the school year a few weeks later allows us to come together as a community to get our numbers down. Even the White House has listed Kansas as a "red zone," (Specifically targeting Sedgwick, Wyandotte and Johnson counties) urging counties to limit meetings to no more than 10 people. Just today, The top Sedgwick county Health official has moved to close bars and limit gatherings to no more than 15 people (in addition to social distancing and various other measures). This is yet another sign that schools should not begin until Wichitans begin to take this pandemic seriously, ultimately getting our numbers down.</p> <p>Sources: <a href="https://www.kwch.com/2020/07/17/white-house-report-kansas-among-18-states-declared-red-zones-for-covid-19/">https://www.kwch.com/2020/07/17/white-house-report-kansas-among-18-states-declared-red-zones-for-covid-19/</a></p> <p><a href="https://www.kwch.com/2020/07/21/sedgwick-countys-top-health-official-recommends-more-restrictions-as-covid-19-cases-rise/">https://www.kwch.com/2020/07/21/sedgwick-countys-top-health-official-recommends-more-restrictions-as-covid-19-cases-rise/</a></p>
7/21/2020 12:21:15	Christy	Goentzel	Educators	Sedgwick	Thank you again for supporting our community and for continuing to keep the education of Kansas kids a top priority.
7/21/2020 12:21:24	Abbi	Kretzschmar	USD 259	Wichita	Please delay the start of school so we have more time to prepare. As a high school science teacher, I would appreciate it greatly.
7/21/2020 12:21:30	Monte	Couchman		Lindsborg	I support Gov. Kelly's order to delay the start of the 2020-21 school year.
7/21/2020 12:21:36	Julie	Pauly	Cheney USD #268	Cheney	Please delay school opening until after Labor Day so everyone can finish planning and be ready to hit the ground running!
7/21/2020 12:21:45	Lindsay	Flint	Clear Creek Elementary	Shawnee	<p>These kids NEED to be back in school!!! Read the facts about kids and the virus (not stuff from the media!). Look at the one country in Germany who has had school from since May <a href="https://news.yahoo.com/german-study-finds-no-evidence-164704005.html">https://news.yahoo.com/german-study-finds-no-evidence-164704005.html</a></p> <p>We cannot just let life and living be ruined by this virus. We must live with this virus or else our kids, our state, our nation will fall!</p>
7/21/2020 12:21:50	Helen	Ramsey	USD 501 Topeka Public	Lyndon, KS	I believe in person school is not appropriate at this time. If we must go face to face, delaying the start of school would be appropriate. My school has not done any preparation for social distancing, keeping staff and students safe, etc. I am being denied access to my classroom. How can I prepare for teaching? Also, my district is doing everything virtual for their safety, but they want to put staff and students in harms way. That doesn't make sense to me.
7/21/2020 12:21:50	Crystal	Oster	None, just a concerned c	Newton, KS	I am in favor of delaying the start of the 20-21 school year or using partial online/in person schedules, until the number of COVID19 cases go down. Do not put our teachers, school staff, students and all their families at a higher risk.
7/21/2020 12:21:51	Rebekah	Urena		Hillsboro	This is absolutely needed in order to further stop the spread of COVID-19. Being that the most accurate research states that children are mostly asymptomatic carries, they may bring home the virus to parents, grandparents, children with special needs and immune compromised family members.
7/21/2020 12:21:54	Jennifer	Cauley	Parent	Great Bend, KS	I have 2 kids in public school and I think school should be delayed until after Labor Day.

Sedgwick county is currently a hot spot for the growth of this virus. Please do not ask me to choose between my job and my health.
7/21/2020 12:21:57	sarah	naff	top flight kids learning c	Olathe	If preschools and daycares are open it is very unfair that it "is not safe" to open public schools when its safe enough for us to be open. Do we not matter?
7/21/2020 12:21:58	David	Miller	Basehor-Linwood Paren	Basehor	District school board should be making these decisions on a case by case basis since they have to address collectively all the issues that arise from a start date decision.

7/21/2020 12:22:00	Ashley	Jacobson		Waterville	I really think you need to let each district make this decision. What is right for Kansas City, Lawrence, Topeka and other larger cities is not always what is right for us smaller communities. Our county has had 6 total cases and currently only 1 active case. Let us open school in August but cut out all activities that would make the children travel. This needs to be about education and not sports. If you let the kids travel then the virus is just going to spike again. Also please do not make them wear masks. Like I said before we live in a small community and my kids have been around the kids they will go to school. They have ran and wrestled each other and I let that happen because I trust the parents and I know that they have not left the county like us since this whole thing has started. Thank you for taking the time to read this. I hope you have a wonderful day.
7/21/2020 12:22:04	Stacy	Malicoat	USD 259 Wichita Public	Wichita	Please support the Governor Kelly's order to delay school until after Labor Day. This will give districts time to prepare and train teachers in safety procedures.
7/21/2020 12:22:16	Rosette	Randel		Seneca	I feel you should get school started as soon as possible and earlier if any change. Get going before the real flu season hits. The world has changed. You can't put off the start forever so get it going. Masks should not be required as other health issues will become an issue.
7/21/2020 12:22:19	Jeff	Bartlett		Rural	I would like to see students return to school as regularly scheduled.
7/21/2020 12:22:34	Emily	Brueseke	N/A - parent	Manhattan	I am in support of the Governor's Executive Order to delay the start of the K-12 school year until after Labor Day. I believe that it is in the best interest of students, families, teachers, and our communities to allow for more preparation time and also for COVID infections to decrease before schools reopen.
7/21/2020 12:22:40	Amy	Woodbury	Parent	Lawrence	Do not agree with order. School needs to start, kids need to play sports. Your plan will not prevent the spread of Covid. Let people get back to business and school.
7/21/2020 12:22:48	Brian	Griffin	Myself	Wamego	Leave it up to local jurisdiction on requirements and start kids on the normal start date of August 20th! The requirement for athletics to follow suit is asinine and a complete overreach of government! If you care about kids, stop and think what this is going to do to the mental health of ALL athletes. Being someone that coaches the younger kiddos, all they are worry about is playing sports this fall. Just the thought of postponing or canceling sports already has probably half of the kids I interact with weekly showing signs of depression at just the thought!
7/21/2020 12:22:55	Eric	Starnes	Band Programs in USD	Overland Park	I support the executive order. Delaying the start improves the likelihood of lower infection rates. This increases chances students can participate in activities outside of core, which a large group of students depends on to stay engaged. Thanks.

					<p>Please hear me out!! we need you now!!</p> <p>Local Control is not the way to go! Don't let local BOE's make this foolish decision to open or not open schools.</p> <p>We've seen what happens when you give local control during this pandemic! People choose to "cautiously reopen", and the cases and deaths spike as citizens don't follow guidelines.</p> <p>All of the deaths and permanent health issues of the compromised and unlucky in Kansas will be on your head. There is only one wise decision until we have some semblance of control over this virus... avoid being in large groups until we have a medicinal way to fight it, or watch it kill or permanently injure people's health.</p> <p>Taking temps, wearing masks and hourly hand washing will help until SUPRISE - it doesn't. It won't stop the statistically guaranteed super spreader events that will happen time and time again all over our great state. In the last 2 days they have released findings that older children (6-12 grades) spread the virus just as easily as adults. They've also got so much more info on how the super spreaders do so before they have a temp and are asymptomatic.</p> <p>I am a 46-year-old high school band director. I had major lung surgery 3 years ago to save me from a life threatening issue. I am healthy, but get out of breath easily now with my impaired lung function. I LOVE to teach band and kids, it is my purpose. When I die this fall, and could've made a difference for several more decades of teaching... it's terrifying and sickening.</p> <p>Governor Kelly made a heroic choice, and now I call upon you to do the same, as one of the few heroes that can stop this horrific mistake before it leads to the biggest spread of death to every urban metropolis and tiny farm town in the country all due to schools being the perfect 2-tiered virus catalyst they are (infecting their families and their families infecting places they go, making more students into spreaders, and the cycle repeats again and again).</p>
7/21/2020 12:22:56	Aaron	Tompkins	Abilene High School	Abilene	
7/21/2020 12:23:01	Karl	Spear		Baldwin City	please follow Gov Kelly's order for delaying school.
7/21/2020 12:23:07	Kali	De Paul		Overland Park	Keep up the good work protecting our students, teachers, families and community as a whole!
7/21/2020 12:23:07	Ann	Bowman		Emporia	I totally agree with Governor Kelly's decision as always better to be safe than sorry.
7/21/2020 12:23:12	Heike	Klein	KCKPS USD 500	414 N Evergreen St., Ga	I am 57 years old, and my husband is a Type 1 diabetic of 50 years who is also on disability because of diabetes complications. I am definitely concerned about possibly becoming exposed to COVID-19 and infecting my husband.
7/21/2020 12:23:17	Curtis	Long		Clifton	Please open the schools on time and have the students return to normal life. A 3 week delay to opening schools is not going to change anything for the good. The delay will cause another group of Seniors see their school year crashed by this. It will also cause a long-term problem of our younger kids falling behind on education and I would guess it will increase the drop out rate of those kids. We have had the flu around for many years and have not stopped the world from normal everyday life and we should not for this virus. I went to the dentist yesterday and the one of the questions I had to answer was "do I have any FLU like symptoms". Open up the schools and activities today. Thanks

7/21/2020 12:23:21	Benjamin	Cigich	Blue Valley School Dist	Overland Park	I am a parent of a Blue Valley school district student and the husband of a BV school district elementary principal. I have watched my wife work through hours of details to plan for a safe return of our students and seen the stress she has as she is trying to make it work for all alongside BV leadership. She realizes any decision never makes everyone happy but I saw her smile for the first time last week after Gov Kelly's announcement. She cried a bit and said "wow, the gift of time." She was so thankful for the extra three weeks that would allow for teachers to be prepared, buildings to be updated and guidelines put in place to allow for a safe return. I am certain she thought when they returned in August that Kansas' numbers would be down. We are a great state. We follow rules and care for our neighbors. While local control is important, it is vital we unite as one to make a decision for the health and safety of all involved in the day to day workings of school. I have heard many parents and community members say "its time for the kids to go back." They are right. It is time for them to go back when it is SAFE for them to go back and not just them but safe for all involved in the school day. Please do not let those who do not understand the details of school buildings influence your vote. Please do not make this about politics. Please support Gov Kelly's order to show you support our students, our teachers, our medical professionals and our communities. Thank you.
7/21/2020 12:23:22	Marlene	Whitney	Board clerk-Interlocal #6	Plainville, KS	As much as I want my kids to be in school, I want it to be safe. Safe for them, safe for the staff and teachers. My husband is an educator and he is fearful of potential risk. So if a few more weeks will allow all districts to be better prepared all the way around, I'm in favor of the state board approving the executive order for the delay of school.
7/21/2020 12:23:25	Thomas	McDow	Self	Wichita	I believe schools should be opened. The science shows children do not spread the virus. Also in opening the school it should return to normal conditions, no masks which is hard on children's health, and no social distancing, . Playground and gym should be open. All these things are traumatizeing our children. Please stop this tyranny and harm!
7/21/2020 12:23:29	Tawny	Jacobs	Plains Elementary School	Plains	Please allow our schools to open. In our rural area our students suffer when not in school. They don't have other opportunities for learning. Distance learning is difficult with internet being substandard. Students do not have access to food, and many are left alone while their parents work at packing plants. I am very willing to go back to school and work.
7/21/2020 12:23:31	Jay	Atkin		Burlington	No delay in school should be done. The evidence of this virus being dangerous to kids is MINIMAL!!! The world is not a safe place and you will not be able to make it so. With a fatality rate of .00028% it is ludicrous for these measures to be put in place. There is some other reason the "panic" was pushed by the media. NO DELAY, NO ABNORMAL MEASURES. NO MASKS!! We are the rulers, and we are Sovereign. These are our children, not the States. You have minimal authority to advise parents and your over reach is hereby revoked.
7/21/2020 12:23:37	Roylene	Klein	self	Derby	Please support Governor Kelly's executive order. The fact that local school boards are meeting virtually because they are unwilling to meet in a group seems to say they consider meeting in a group unsafe. If that is the case, why would they consider a larger group of people such as in a school to be safe? I think the school board should be willing to actually put themselves physically in any classroom situation that they are recommending students and teachers to do.
7/21/2020 12:23:42	Cindy	Alexander	Shawnee Mission School	Lenexa	Please stand by the delay. Or continue the delay for a longer time. It's ludicrous to put people INTO danger. Please continue to listen to the health pros and the science. Thank you for all that you are doing to protect Kansas (whether we all comply or not!)
7/21/2020 12:23:49	Maggie	Onstott		Wichita	Please vote FOR opening schools AFTER Labor Day. As a parent and educator, it is not feasible to open schools completely unprepared to meet safety guidelines, protecting our children and educators. Statistically, for USD 259, we will lose 300+ lives if we aren't able to meet these safety guidelines. As a USD 259 employee, I know we are not ready. We don't have the equipment, and we don't have the time needed to prepare. 3 weeks could make all of the difference necessary to save lives. The lives of are citizens are worth protecting, aren't they?

7/21/2020 12:23:49	Lisa	Smith		Lawrence	No they should open. They should be making choices based on facts not fear. <a href="https://mobile.twitter.com/NahasNewman/status/1282048669374701573">https://mobile.twitter.com/NahasNewman/status/1282048669374701573</a>
7/21/2020 12:23:49	John	Anderson	Parent of Olathe South s	Olathe	You must listen to our public health officials. I have another son who is immunocompromised. His health is in jeopardy if schools open sooner rather than later. In the words of Dr. Lee Norman: “ Time for some plain talk. Schools can’t be “safe islands” in an unsafe community. Counties and cities who don’t use the proven measures to reduce spread of Covid-19 ask schools and hospitals to fix their sloppiness and mistakes, which is wrong to do. The virus will find a way in.”
7/21/2020 12:23:51	Casse	Drummond		Shawnee	Please vote to allow schools to open on time. Many parents and students need this option. Parents who don’t want or need their kids in school have many options to do so. Please give all parents a choice. I have confidence this can be done and be done safely.
7/21/2020 12:23:56	David	Pitts	Citizen	Pittsburg, Ks	Opening at all is absolutely dangerous to the students, staff, and general public. This should be a virtual year or the state will be in great danger
7/21/2020 12:23:56	Holly	Barth		De Soto	Please do not do in-person classes. It's not safe.
7/21/2020 12:24:07	Dennis	Boyer	Me	Olathe	I fully support Governor Kelly's order to delay the school year until after labor day and am asking that the State Board of Education do so as well. It is the correct thing to do in order to keep the people of Kansas safe and help reverse the spread of COVID-19.
7/21/2020 12:24:10	Jennifer	Bartlett		Rural	I am ready to return to school as an educator and ready for my children to return.
7/21/2020 12:24:10	Trina	Lutters	Teacher	Osborne	We need to start schools and sports. It is healthier if students get back to school.
7/21/2020 12:24:11	Shawna	Wright		Roeland Park	Please let the schools start in person. Anyone with a high school age student knows it is safer to have them in schools & sports with protocols being followed then tons of free time, where they will figure out ways to hang out closer together & do other high school kid stuff. Please don’t let the squeaky wheel get the oil. Our high school only has 6 families opting for online learning (I am sure for good reason), everyone else is comfortable with in school...because the risks of isolation, mental health struggles, or unstructured socialization is higher then the health risks in school. Thank you. I know this is not easy.
7/21/2020 12:24:16	Amy	Gallagher		Leawood	As a pediatric Physical Therapist with a minor in special education, and a sibling of an adult with special needs who attended Blue Valley schools I want to encourage you to consider all children and their varying needs when deciding on school reopening. By using a blanket statement and stating that all schools are mandated to be in person/be virtual it can limit the availability of services to individuals that may need. Please consider giving many options with plenty of flexibility to allow educators to best serve the varying levels of needs that exist in our community! There is no one size fits all in this situation, therefore I feel there is no one size fits all answer that should be mandated by the government. Thank you for your consideration
7/21/2020 12:24:16	Jana	Cox		Salina	keep the schools closed until after labor day!!!! It may save lives and it will sure as heck save on utility bills - I have always thought it silly to start in the heat of the summer and run up utility bills and then let out so early in the spring when it is still cool. Massive amounts o money could be saved if the schools started later i.e. after Labor Day and let out later such as the last week of May. Climate wise makes so much more sense -- whoever thought it was smart to make those poor kids walk home in extreme heat, have recess in extreme heat, and try to learn while hot from recesses.
7/21/2020 12:24:24	Jon	Woods	Parent	Manhattan	I feel it is very important for our youth to have interaction while learning. The schools need to open and run as they have in the past! This includes activities etc. For those not willing they have the option to do homeschooling.
7/21/2020 12:24:27	Desirae	Blythe		Uniontown	Reopen the 9th is fine but there better be sports or schools will lose a lot of students. Sports are motivators for students. I have already heard from several parents and students who will go elsewhere for education if there is no sports. Most parents send their children to public schools simple for the sports but are willing to send them to private schools or even homeschool. Also, there isn't anything positive about wearing masks. Why should we be breathing our own toxic waste? Plus it hinders learn of reading and language. Media and certain government politicians have used fear with not a whole lot of facts. We can't do that to our students. They need an environment that they feel safe. Masks don't promote safety but fear. What about the students with health issues or anxiety issues? The mask only makes those issues more noticeable. I don't fear Covid but I do take other precautions to keep my self healthy. Lot has to do with using some common sense.

7/21/2020 12:24:27	Raina	Lupton	Gardner Edgerton High	Gardner	Please open schools! My son is special needs and needs the structured environment. He will flunk school in an online atmosphere.
7/21/2020 12:24:44	Leslie	Nekola		Shawnee	Keep school decisions with the district! Kids need to be in school!
7/21/2020 12:24:45	Naomi	Earl	Stockton kansas element	Stockton	I understand the need for safety, but please consider the students - younger and older - that are unable to handle wearing a mask for a length of time. Either due to conditions like autism or anxiety. The feeling of having a mask confine your face is highly personal and to some unpleasant. I understand the deadly consequences but I also ask to not completely disrupt the children's lives. Sports, club activities and school functions are so important for their 0personal development and growth - please dont takerthat away.
7/21/2020 12:24:51	Carolyn	Kintzel		Topeka	As a teacher over 55 years old, as a parent of a high school aged student, as the custodian of a very vulnerable 75 year old aunt who lives with me and requires 24 hour a day care, and as a republican I agree with the executive order and would like to see it upheld. We do not know all that we need to know to put students and staff/teachers at risk by rushing into the school year unprepared. I would also like to see some options for teachers in a vulnerable state of health or who are caring for vulnerable family members. Please know that I take into consideration the economic impact keeping students home has on Kansas. I am also aware of the problems some children face from hunger and abuse, which weighs heavily on me, but at this time I am confident that this postponement of school will be overall beneficial to districts trying to keep their community safe for the people of Kansas by slowing the spread and allowing districts to have the best safety precautions they can have when school starts on September 10, 2020.
7/21/2020 12:24:53	Loretta c	Johnson	Myself, profession biolo	Manhattan	Please support Kelly's mandate to open schools after Labor Day. This action is in the interest of public health and safety of students, teachers and the community.
7/21/2020 12:24:59	Sandy	Theilen	USD497	Lawrence	Please hold off on any in person learning!! We should not be expected to sacrifice ourselves and thrown into a dangerous situation which could risk the health of ourselves and our family. Don't ask that Of educators! Simply put, going back to school during a time where COVID-19 runs rampant in this nation is beyond ignorant, its flat out stupid. With proper time, online learning can be proven sufficient for student learning. Also, when all of corporate America is allowed to work from home, expecting teachers to return to school clearly states how their own education system values them, and how education in this nation is run like a business, and not a means of expanding cognitive learning.
7/21/2020 12:25:01	Angela	Bertocchini	Blue Valley	Leawood	Please create a plan to have our children return to school, on time! Our children need to be in school, learning from a classroom. They need the in person support, guidance and love from their teachers. They need social interactions with their peers. There are ways to open our schools AND keep our children and staff safe. I am the owner of a local preschool and we have been open the entire time, never closing. To close would have left many families without child care and left our children at a loss of early learning. Our staff are wearing masks all day and teaching. We are doing our part in providing care and education for our families, while sanitizing surfaces, wearing masks, taking temperatures, asking health questions when entering the classroom etc.. It can be done! Please create a plan for our children to return to the classroom for in person learning!
7/21/2020 12:25:07	Lisa	Harris		Clay Center	3 weeks of starting late should be nothing to debate about. In the last couple of weeks out town had children down with the virus. They recovered fine but why would anyone force parents to put their children in harms way. 3 weeks would allow schools to further their safety protocols with mask, social distancing, what doors for which child to enter for temp checks, etc. This should be a no brainer.
7/21/2020 12:25:15	Amanda	Smith		Hutchinson, KS	I ultimately want my children back in the classroom. However, as COVID-19 cases are rising in our state and county, I support the late start to the school year. It is my impression that our district could use some extra time to adequately prepare for the students' safety, as well as for that of the instructors. The instructors also need time to prepare their lesson plans for the variety of instruction methods they may have to accommodate. It is a lot of work. It takes time to prepare for all of the possibilities we may have to face; it is unfair to ask the teachers of our children to ramp up in such a short amount of time. They need adequate support and resources, and I think the delay could help. My husband and I work full-time out of the home. We need to coordinate childcare sources that we trust (and can minimize exposure to our family), so I would ask that a decision is made quickly in order for us to plan ahead.

7/21/2020 12:25:24	Tiffany	Cogdell	Teachers	El Dorado	I would like the decision to start school be left up to the districts/counties. We have few cases and our school is ready to begin.
7/21/2020 12:25:24	Jason	Enneking	sabetha public schools	sabetha	Please delay until after Labor Day.
7/21/2020 12:25:28	Julie	Burk	Teacher	Lawrence	<p>I am a teacher and parent in Kansas. I am asking you to uphold Governor Kelly's Executive Order. I desperately want to return to my classroom and my students. I miss it every day, and it is immeasurably easier to teach in person than online. But I do not want to risk my health or the health of my students and their families. Please do not return us to these environments until it is safe. If you cannot hold these meetings IN PERSON then you should not be asking us to return to crowded classrooms and hallways. It is hypocritical in the extreme. I teach early childhood. Please explain how I can keep 3 and 4 year old children sitting in seats and away from each other for the length of a school day. Please explain how I can keep a mask on a 3 year old with special needs. And then please explain to me how I console a 3 year old who has lost a family member from a virus that could be prevented with strong leadership.</p> <p>Please consult the experts in the field of education. Those experts would be teachers. I, a teacher, will not be sending my own children back to school under any circumstance until cases drop precipitously and/or there is a vaccine. I, a teacher, understand that absolutely none of the guidelines from the CDC are possible to enforce. I, a teacher, understand that there are no funds available for the guidelines. I, a teacher, spend thousands of dollars a year on my classroom and know the money is not there and I am tapped out. I AM TAPPED OUT. Please do not ask me to give up my life or my health. Please do not ask me to endanger my family. I teach because I love it. But I love my family more.</p>
7/21/2020 12:25:31	Lynn	Jordan		Overland Park	Please vote to delay the start of the school year per the Governor's order. With the continued increase in cases it doesn't make sense to send our children to school without truly understanding how the virus will impact them.
7/21/2020 12:26:00	Laurie	Greenfield	Blue Valley High	Leawood	Please open schools and allow the kids to do their sports
7/21/2020 12:26:01	Kathy	Johnston		Concordia	<p>Governor Kelly has a degree in Public Health- by ignoring her and the Medical community you are ignoring education as a whole! The rate of Covid cases in Kansas is tremendous! The hospitals only have so much they can do- sending students back early can will jeopardize lives! I will be tremendously upset if my grandchildren who attend school in Manhattan get this- or their teachers- and they dobt have a ventilator available. Politics need to be put aside! Do the right thing! If you are questioning what the right thing to do is??? Talk to Dr Steve Short a Pulmonologist in Manhattan- he can tell you first hand how devastating this virus is! Or his son Dr Hazen Short ER Dr in the Kansas City area! This is not about Governor Kelly or your stupid insinuation that she is overreaching! This is about our children their teachers and the staff in our schools! Have lots of family employed with the school districts and their liv4s depend on your common sense! Your party affiliation needs to take a back seat!</p> <p>Thank you Kathy Johnston</p> <p>For the record I am registered Independent!</p>
7/21/2020 12:26:05	Kimberly	Fulkerson	None	Salina	I am in favor of schools starting on time In person in August. The AAP recommends it.
7/21/2020 12:26:08	Bill	Cinelli	grandparent	Emporia	Please don't open schools before Labor Day. And then, with strict measures in place.
7/21/2020 12:26:22	Andrea	Curtis		Manhattan	<p>As a parent of children in the Kansas public school system and a Kansas educator I am asking that you please uphold Governor Kelly's Executive Order #20-58 to delay the start of the 2020-2021 school year. Delaying the start of the school year allows for school districts to process the information provided in the 1000+ pages of guidelines from KSDE, to develop a thorough reopening plan, and to prepare students, staff, and guardians.</p> <p>Positive cases of COVID-19 are increasing in Kansas and allowing students to return to school buildings in a few weeks will be dangerous to the health of all Kansans.</p> <p>Kansas teachers will be able to recover the lost instructional time with our students, but we can't recover the lives of loved ones potentially lost due to COVID-19 cases associated with an early return to school.</p>

7/21/2020 12:26:23	Melissa	Zieammermann	Usd 259	Wichita	School should be delayed until numbers are going down.
7/21/2020 12:26:25	Martha	Slack		Peck	As a registered nurse and mother I highly recommend following population health expert guidance. This virus is novel and we are still learning. We need to set politics aside and protect our communities, neighbors, friends, and families. The healthcare experts and frontline workers are telling us the right things, it is our responsibility to heed their suggestions. There are no "do overs" so please proceed with caution.
7/21/2020 12:26:30	January	Batcheler	Parent	Olathe, KS	Please honor the governor's executive order to have schools start after Labor Day.
7/21/2020 12:26:43	Megan	Olsen-Scogins	Parent of 3	Wichita	With 2 children in public middle and high schools, and 1 child in private elementary school, there is much concern that schools are not ready to provide the necessary resources and support to keep our children and teachers safe in the face of a global pandemic. As cases increase due to adults not following health guidelines, children are even less likely to understand or follow those same guidelines that adults refuse to follow. As a parent, we know how easily disease spreads in our schools, whether that be from child to child or adult to child. Parents constantly send ill children to school, despite being asked by schools to keep them home. This is a recipe for disaster with a virus that can often be asymptomatic. If schools cannot absolutely ensure safety measures will be followed for every teacher and student in a mere matter of weeks, postponing until that can be ensured and resources are accessible for teachers, students and parents is essential. I am not ready for my children and family members who are teachers to be guinea pigs in this return to school experiment.
7/21/2020 12:26:45	Megan	Bricks	Olathe Public Schools	De Soto	As a elementary music teacher for Olathe Public Schools, my hope is that you will uphold Governor Kelly's mandate to push back the opening of schools. I teach 520 students in my school and see them twice a week for 30 minutes each time throughout a school week. At this point, we don't have the resources or means to provide staff and students the safety precautions they need in school buildings. Please give our districts the gift of time to figure out what will work best for our community, students, parents, families, and staff. I want to teach music again to my students, but I won't be able to do my job effectively without time!
7/21/2020 12:26:48	D	Jam	usd230	Spring Hill	DO NOT open schools until Covid 19 has went down and stays down. Do not make the kids go to school with mask on
7/21/2020 12:27:06	Courtney	Wicks		Olathe	<p>It is not reasonable to begin in person classes at this time or in the near future. Virtual learning should be the plan to begin the school year. As cases continue to climb, it would be irresponsible to put more people at risk. Please continue to keep the health and safety of our children and educational professionals as the priority.</p> <p>The Governor has done a wonderful job approaching things with caution. We can see how the opposite approach has not worked with Missouri. Defer to the medical experts, use a single source of truth, and take a conservative and forward thinking approach to the education of our children.</p> <p>Taking a play from the private schools, they have had virtual learning in place for some time now. COVID-19 caught us off guard and has forced us to be reactionary. I realize there are many differences between public and private schools, we can still learn from each other and review and put into place best practices. Please follow the science and the experts. Johns Hopkins University has been an excellent resource for our family and decisions we are making. Keeping in mind that medicine is not an exact science and subject to change and evolve as more information and understanding comes to light.</p> <p>Please do not start in person classes while the cases continue to rise.</p> <p>Thank you for your time. Courtney Wicks, Mother of a middle and high schooler</p>
7/21/2020 12:27:19	Carrie	Cronan	Olathe School District	Olathe	I believe the board should follow the governors mandate and wait to resume in person school until after Labor Day.
7/21/2020 12:27:26	Joshua	Warner	Lawrence Public School	Lawrence Ks	Keep schools open. If schools aren't allowed to open at least allow sports to continue. The young adults have been working hard for years to get a scholarship and this could derail the entire work put into getting here.

7/21/2020 12:27:26	Tirra	Carter		Scott City	Masks for children are unconstitutional and a violation of our civil rights. It should be up to parents whether or not our children wear masks. Healthy people do not wear masks. Sick people do. Quit traumatizing our children for the sake of politics. Individual counties should be in charge of when we start school. This is not one size fits all.
7/21/2020 12:27:28	Staci	McCaig	USD490	El Dorado	I feel the year needs delayed to give teachers adequate time to prepare for the students.
7/21/2020 12:27:31	Jackie	Worley	My children and self	Emporia	I believe delaying school is the best interest of the district and state. This would allow teachers and staff to prepare our schools for the safety of the students. I myself do not feel safe sending my children to school even after September 9.
7/21/2020 12:27:44	Brent	Kaiser		Hays	Please do whatever possible to allow kids back to school in the classroom as soon as possible. My kids are itching to be able to get back to school in the classroom.
7/21/2020 12:27:52	Jennifer	Duggan	Blue Valley school distr	Merriam	Please pass the governors order to delay start of school. As a teacher we need time to plan for the upcoming year based on newly released plan. Is also love to give us a chance to lower the numbers for a chance to be in person! And please delay start of fall sports. We need to keep athletes, coaches and sponsors safe!
7/21/2020 12:27:52	Emily	Nethercott	KCKPS (as an educator)	Kansas City	Please rely on available scientific data to make decisions keeping the health of all Kansans in priority.
					<p>I am greatly concerned for the future education of my children as many parents are. I would like to present the following information for you to consider, borrowed from another with permission.</p> <p>To provide some contrast to the governor's executive orders, I will present the following information:</p> <p>Kansas today: 7-20-20</p> <p>Covid-19-23,334 positive and probable cases total</p> <p>Deaths-307 or 0.0131567669 of cases or 1/100th of cases 61.4 deaths per month in 5mon. 2.04 deaths per day</p> <p>2,913,000 population 0.0001053896 deaths per capita or 1/1000th</p> <p>Of 307 deaths - 0 in ages 0-24yrs</p> <p>So no deaths, not one under 24yrs No male deaths under 44 No female deaths under 54 1/3 of all deaths in Kansas are from 1 county (Johnson)</p>
7/21/2020 12:27:59	Sabrina	Cruz	St Marys Jr. Sr. high pa	St. Marys	83% of the deaths in Johnson County took place in long term care facilities.
7/21/2020 12:28:01	Tracy	Schoenhofer	USD 385	Andover, KS	Start school and the ones who are health compromised students or teachers can do online. Our kids social emotional and educational needs out weighs the risks. Kids are starting to feel discouraged and we as a society are not helping with our indecisiveness. If we can do the Shrine Bowl, we can get back to school and school activities with precautions in place.

					<p>Good Afternoon,</p> <p>I would like to express my concern with the governor's decision on schools. I do not feel like her decision is justified. This is a new virus and while everyone needs to be careful and practice safety, eliminating school is not going to prevent people from getting the virus. There should be measures in place just as there are when kids get the flu. In person learning is huge for children emotionally and physically. Our children are suffering. My child is emailed his teacher asking for new and harder work each week and was never provided anything but review items. As his parent i had to buy tons of extra learning materials as the schools were not providing them. I don't feel like the schools are even remotely prepared to handle online learning.</p> <p>Please fight to get our children back in school!</p> <p>I understand our teachers are concerned about getting the virus but almost all of them are getting out and about with or without masks on, so i don't see the justified reasoning unless they are truly staying inside their house 100% of the time.</p> <p>They are deemed essential workers just like healthcare, grocery store, etc and we cannot treat them any different.</p> <p>If school is delayed i asked that we fight to make sure it extends into the summer to ensure these children are getting a full year.</p> <p>We can offer virtual learning for those who want it and if we have immunocompromised teachers they could teach those children at home virtual.</p>
7/21/2020 12:28:07	Ashley	Smith	USD437	Topeka	Again, please please please fight to get our kids back into the classrooms!
7/21/2020 12:28:08	Sheila	Howard	Myself	Protection/Teach in Dod	I do not think schools should open with in person instruction, but if it does it should not happen until September 9th. There are too many unknowns: lack of substitutes, who pays medical bills because of an exposure, what about sick time. I live in a county with very few cases of COVID but I teach in Dodge City, which has a lot of cases. My family will not be able to work at our assisted care facility if I am in Dodge all of the time. We are living in a situation of when not what if. I pray politics are put aside and common sense prevails.
7/21/2020 12:28:18	Stacie	Jordan	Wichita Public Schools	Goddard, but teach in W	I understand that our local boards should be handling such matters; however, some of our leadership such as in Wichita just cannot handle making the difficult decisions themselves. They do not even call off school for snow/ice days when they clearly should. I guarantee you they never would have closed schools last March had it not been for the governor. We need your approval of Governor Kelly's executive orders so we can be assured of safety guidelines when we return to school. At the last board meeting it was discussed that a person is only considered to be exposed if they come into contact for more than 10 minutes less than six feet. Now we all know that it does not take 10 minutes to contract a virus, but this is the guideline they are going by to determine contract tracing and quarantine protocols. We will have a serious outbreak in Wichita Public Schools if we do not have help from the Kansas State Board of Education and our Governor.
7/21/2020 12:28:23	Cole	Ivey	None	Shawnee	Please vote no against Governor Kelly's executive order.
7/21/2020 12:28:31	Meghan	Hummer	USD 261	Garden Plain	Virtual to begin.
7/21/2020 12:28:39	Eloy	Perez	My family	Ulysses Kansas	If you guys are saying that mask work why the delay in starting school
7/21/2020 12:28:42	Paige	Unruh		Wichita	I would like school to remain virtual until Covid cases decline.
7/21/2020 12:28:56	LESLIE	LAND		Topeka	I fully support the delay of starting in person instruction for the 20-20 school year. My daughter will be starting 6th grade, and I fully intend on not sending her for in person schooling in August.

7/21/2020 12:28:58	Sylvia	Villa	USD 480	Liberal	Why wait until after Labor Day to start? Will that make a difference in whether or not one will get Covid? We need to go back, now! Students are needing some kind of normalcy in their lives and are getting further behind academically. Yes, I am scared of getting Covid and dying from it as I am an educator, who teaches first grade. However, I am also a parent to a sophomore in high school and online learning is not conducive to effective learning for my son and other students that need the one-to-one interaction. So yes, let's get the show on the road and start getting these kiddos back to what they know!
7/21/2020 12:29:04	Phillip	Gwost	Parent of students in US	Wichita	Please do not open schools until Wichita has seen a steady decline and several weeks of low COVID numbers . I'm a nurse in the Wichita community and my wife is a substitute teacher for Wichita and we want everyone to stay healthy!
7/21/2020 12:29:09	Sarah	Balzer	USD 260	ROSE HILL	I do not support opening schools while covid cases are rising.
7/21/2020 12:29:10	Hudson	Ivey	None	Shawnee	Please vote no against Governor Kelly's executive order.
7/21/2020 12:29:14	Kendra	Lister		Manhattan	I feel that the decision should be left up to each school district, not the state as a whole. Most districts seem to have options available for parents not comfortable sending their children. Each district has many different factors to take into account and it is not the same statewide.
7/21/2020 12:29:15	Kathryn	Taylor		Chanute	I fully agree with the Governor's order. Her leadership is appreciated.
7/21/2020 12:29:16	Susan	Carter	A grandparent	Scott City	Kids need to get back to school and normalcy! I do not believe in masks and elementary children do not need them. Gov Kelly is following the democratic ways and trying to ruin our state and education of our children. She needs to be gone!! Please vote to not follow her ways of delaying school. Thank you.
7/21/2020 12:29:17	Shelby	Leiker	Middle school teacher	Olathe Ks	As a middle school teacher and parent, I am deeply concerned that opening back up schools will be tragic. Unfortunately Johnson county schools are already busting at the seams with students and there is no way that with the rise of covid that schools will be able to realistically keep students 2ft apart let alone 6ft. I urge you to keep schools closed until after Labor Day and possibly longer until a vaccine is available. I understand that smaller districts and smaller communities may be able to accommodate the reopening requirements but in Johnson county that is not possible.
7/21/2020 12:29:18	Allison	Brown	Parent	Derby	If we are to teach children that they should listen to those who set the rules- then we should lead by example. We tell them not just to listen blindly, but to find good sources (the governor has spent more hours learning about this and being briefed than any of us), question the sources' motivation (I can't think of a reason she would WANT to be overly restrictive if she didn't have reason- there is no plus side to her having to enforce strong protocols for no apparent reason: it is a hardship for her people and she has recognized that) I ask that the state BOE would model what it asks of our students, and follow the directions of the Governor.  It is my belief that we can beat this hard and fast, or continue to fight every restriction and prolong it indefinitely. I am sure that the state BOE, and its members, have been in the position of having the most information possible about a topic, making a choice based on that knowledge, and then still had entities below them question or dismiss their findings using logic that (had they been a part of the strenuous decision making process)- they might actually agree with you on. I believe that Gov. Kelly has the safety of ALL Kansans in mind, and that we should respect the decision making process and focus on what we can do to help move students forward within the confines laid out.
7/21/2020 12:29:22	Bob	Pomeroy		Newton	I support the Governor's prder to de ok ay schools until after Labor Day. Ooening schools while cases are rising would put our students and teachers at risk.
7/21/2020 12:29:31	Maribel	Gallegos		Olathe	If children come first, then schools need to be virtual. Children have the right to remain healthy and not spread Covid-19 to their family and community. Please follow the science and not politics.
7/21/2020 12:29:37	Jennifer	Klein	Andover Central High S	Wichita	Keep schools closed!! It is not fair to expect me to stay away from my parents and newborn granddaughter to go to work. It is not safe!!
7/21/2020 12:29:37	Jane	Sommers	usd415	Robinson	We need to be open before Labor Day!!

					We should not delay opening Kansas schools due to COVID-19.  The best available Contact Tracing data out of Iceland, Ireland, and The Netherlands shows that the likelihood of youth transmitting COVID-19 is infinitesimal. Sweden never closed its lower schools, and many EU countries have reopened their schools without increasing infection rates.  Kansas kids are being deprived of an education by school closures. Distance learning is ineffective, particularly in lower grades. Please reopen schools so that our children can get a decent education.
7/21/2020 12:29:48	David	Morgan	Self	Leawood	
7/21/2020 12:29:50	Thatcher	Ivey	None	Shawnee	Please vote no against Governor Kelly's executive order.
7/21/2020 12:29:54	Julie	Wagenblast	Parents of students	Kensington	Please vote against the executive order to delay school opening. All schools should open on time whether it is in person, or for those in high risk areas, online. Our children's future education and well-being depends on it. This is an overstepping of power that should remain with the district's as set out in our constitution. One size doesn't fit all Kansans. I also feel the guidelines you set out, should be kept as such. Specifically, face masks should be discretionary based on individual circumstances.
7/21/2020 12:29:55	Lori	Rice	Self as educator	Wamego	Please support the delay in school start date to allow educators to plan and possibly the case numbers to decrease to safe numbers.
7/21/2020 12:29:55	Justin	Kurtz		Olathe	Please support the govener's decision to delay the start of school and postpone in person classes as needed. It is senseless to put faculty, teachers, students, and parents/caregivers in peril due to the grumblings of the few. It is not just that this virus can kill, but that there is the potential for very long lasting effects well after this pandemic is over.
7/21/2020 12:30:01	Kristine	Walker	Self	Olathe	With infection rates at almost 11% in JOCO, I respectfully ask you to support the Governor and vote to start schools in September.
7/21/2020 12:30:03	Jessica	Janzen		Olathe	I support the delayed opening of the 20-21 K-12 school year until teachers, students, and families of both can safely resume school with the needed precautions and equipment in place as well as COVID 19 cases on the decline.
7/21/2020 12:30:04	Liz	Craig	Johnson County Democ	Overland Park	Setting an arbitrary date for reopening is a mistake. Reopening should not happen until virus infections are down greatly, or gone entirely. We can't risk the health and lives of students and teachers before then.
7/21/2020 12:30:10	Timothy	Sprigg	Kansas Farmers	Norton	As a parent of multiple children who will be riding a bus, the Child mask order and proposed delayed start are both deeply problematic. We are not a State governed by fear. Why the pretense? Who is handing out awards for the most convincing Panic? The safest thing for our children is to congregate and build immunity as soon as possible. If these orders go through, we will be homeschooling our children. Please act in the best interest of our children and not your political affiliations.
7/21/2020 12:30:11	David	Klahr	Holton USD 336	Holton	I request you follow Resolution 20-58 and delay the start of schools until after Labor Day.
7/21/2020 12:30:14	Christy	Steinfort		Hanover	Please open schools!!! Education is too important not to open. The virus isn't going anywhere anytime soon. Kids are hanging out with each other all summer at each other's houses and pools. Might as well have school if they are not keeping space anyway!

					<p>First, I want to thank you for your service during this impossible time. I recognize that the work set before you is daunting. You are making difficult decisions for the children of our state, and I am grateful for your service.</p> <p>I want to ask that you put our children first. As a parent and a social worker who works with children who are at risk, I believe that the health and safety of our children is paramount. After listening to our governor yesterday, I do not believe that she is putting our children first. She went from discussing a long term care facility to discussing why she is closing our schools. There is not a connection. COVID-19 is a public safety risk, but our children are not at a significant risk. I have studied the numbers at length. We live in a world full of risks. I believe that our children are more at risk if we keep them home than if we send them to school. I understand that teachers are nervous, just as every other professional has been, but we can not let their concerns come before the health and well-being of our children.</p> <p>Our youth must be allowed to participate in sports and activities. The middle schoolers and high schoolers are together every day, at the pool and hanging out in each other's basements. They have been participating in morning workouts all summer. They have been playing baseball. They are traveling together and spending the night at each other's homes. The fact that we aren't allowing them to play sports is absurd. We are putting their mental health at risk. They need to be active or we will have a drug and alcohol epidemic on our hands. Please do not allow there to be a delay on sports and activities. For the health and well-being of our children, please allow them to get back to life. We can do it safely.</p> <p>Our governor is allowing politics to come before the well-being of children. Kansas is better than that. Please allow the local school districts to know what is best for their kids.</p> <p>Thank you for your time, Sarah Rothwell</p>
7/21/2020 12:30:16	Sarah	Rothwell	Blue Valley School Dist	Overland Park	
7/21/2020 12:30:21	Beth	Harman	Teacher	Topeka	Districts should be able to decide based on population they support.
7/21/2020 12:30:33	Dina	Ross	Wichita Public Schools	Wichita	I am a substitute teacher and am very nervous about the entire situation. It makes not even want to start the year but I know our district needs them more now than ever. We used to start after Labor Day when I was a kid. I would rather delay the beginning than end the year like we had to if we were to shut down again.
7/21/2020 12:30:39	Jamie	Fowles	Heritage Christian Scho	Topeka	Please vote against the two orders the Governor Kelly is trying to mandate on our schools. Kansas children deserve better. Please vote against these orders, please allow Kansas public and private schools make the decisions individually for what is best for their students and families. They know their students best and all schools are different and can manage their students and families differently
7/21/2020 12:30:41	Angie	Radke		Scott City	Start now! Don't delay. It will probably get worse when flu season hits and we will have to distance learn then. So start now so we can get as much in person as we can! It's needed for the kids mental health
7/21/2020 12:30:46	Carolyn	Long	Usd 265	Wichita	We are in a much worse place now than we were back in March when we closed down. I feel we should delay the start of school as Governor Kelly proposes. I just do not see how we're going to be able to keep all staff and students safe at this time

7/21/2020 12:30:51	Cassandra	Conley		Rose Hill	<p>Please support the governor in her mandates. You just passed an 1100 document this past week that schools need to have time to process and implement. Remember most admin and teachers are technically not back at school (despite the fact I know they are all putting in many many hours). Teachers return just a few days prior to the start of school, but this mandate allows them to return earlier than the students and implement safety precautions. I would rather start school later than get in school and immediately have to explain to my kindergarten child why we are back home again. If schools bring their teachers in earlier than September- the school year for students will still end at almost the exact same time because teachers will have the required professional days at the start. Please after 4 months of trying to tell kids to stay safe and home, don't send them back before they have a chance to make schools safe.</p> <p>Teachers and students deserve a safe space and school can not currently be that place. Numbers are rising. Please be a leader and make a smart decision.</p> <p>Thank you.</p>
7/21/2020 12:30:52	Katie	Schmitz	Circle Towanda Elemen	Towanda, KS	I do not wish to have the school year postponed any further, nor do I believe that young people will wear a mask all day long even if required. Our children need to be back in school!
7/21/2020 12:30:55	Jessie	Pullins	Blue valley	Leawood	Delay til 2021
7/21/2020 12:30:57	Brandi	Carrion	Parent	Fort riley	Please delay start
7/21/2020 12:30:59	Mary	Barnett	grandparent	Wichita	Countries that have successfully re-opened schools have done so when the rate of transmission is below 1.0. Right now, Kansas has the 14th highest transmission rate in the U.S. Recent research shows that although young children do not become as ill as older adults, they transmit the virus to their parents and other adults in their households. We do not yet know the long-term effects of this virus on children. There is growing data to suggest that it may cause infertility in males and life-long vascular and cardiac problems. I urge you to err on the side of caution and delay the opening of both private and public schools until Kansas is able to bring the COVID transmission rate below 1.0 in accordance with CDC recommendations. We cannot afford to make our children and teachers sacrificial offerings to the economy. They ARE the economy! Our children and grandchildren are our best hope for the future. Please do not put them in an experiment to see how many get sick and/or die.
7/21/2020 12:31:00	Kebra	Poe		Junction city	For the safety of our teachers and students school should be delayed.
7/21/2020 12:31:09	Denise	Bamberger	Alternative Education..	Dodge city	Please, hold off on starting school until after Labor Day. When I was in school we didn't start until after Labor Day and we learned all we needed to learn. We will still be held accountable for the mandated hours. Better to delay a few weeks and give students and faculty the best possible odds to stay safe. It will be a risk at any time, but please, don't rush this start. There are so many folks who aren't wearing masks out in Dodge... As a teacher, I know we can bring students back up to speed even with a three week delay. Please!
7/21/2020 12:31:11	Jill	Rosebrook		Salina	<p>I urge you to take the health and wellness of our students and faculty into consideration as you make this decision. This is most definitely NOT the time to bring political lines into the mix, but a time to think of what is the safest way for our children to get the education they deserve.</p> <p>I have a granddaughter in the school system in Salina, and I absolutely hope that you uphold Governor Kelly's Executive Order and delay the start of the 2020 school year. Our children most definitely deserve to have their health put before ANYthing and EVERYthing else.</p> <p>As you make your decisions, please try to think how you would feel if your child were to become infected with COVID-19 due to adult political foolishness. The school system should ALWAYS be a safe haven for our children and their teachers. They should never have to be put at risk for a haphazard decision made by people who only see red vs. blue.</p> <p>Once again, I urge you to take not only my granddaughter, but your own children and families as well, into consideration. Please do what is right for THEM - not for a circle filled in on a ballot. Uphold Governor Kelly's order and delay the start of school.</p>

7/21/2020 12:31:19	Jessica	Bowman		Hillsboro	Please do support the governor's order to delay the start of school until after labor day. It will give school districts a chance to digest the recommendations from KSDE and make sufficient local plans for the best learning and safety of our children.
7/21/2020 12:31:21	Liz	Pomeroy	Self	Newton	I support tge governors order to deokay school start until after labor day. Cases are rising. We must not put students, teachers and all the other workers at risk.
7/21/2020 12:31:28	Heather	Rasmussen		Lawrence	Please support Governor Kelly's order. We care about the health of our children, teachers, administrators, and other school staff. It is too risky to open schools now. The most recent data supports that children (particularly those over 10) DO spread the virus similar to adults. This is not a chance I'm willing to take for my family, friends, and fellow Kansans.
7/21/2020 12:31:51	Linda	Hopkins	Usd 243	Coffey	We were to start August 13th. If in school.classes are to start Sept 9th, is like an option for visual learni g from Aug 13 to Sept 9. So as not to.lose days
7/21/2020 12:31:52	Christine	Leyva	USD232	Shawnee	No
7/21/2020 12:31:52	Troy	Anderson	Parent	Lawrence KS	Let the kids play sports and go to school. It is possible with appropriate risk management, masks, sanitation, hand washing, etc. I am considered an "essential" worker and have been managing the risk for 5 MONTHS!
7/21/2020 12:31:54	Jackie	Batson		Prairie Village	I support Gov. Kelly's order to delay reopening so that schools can be better prepared and able to extend virtual learning further if needed. This affects all of us. However, I hope a safe space can be provided at the schools for those who need it. I also support the mask in schools mandate and hope the schools will be supplying them for those attending in person.
7/21/2020 12:31:55	Monica	Fouquet-Tyler	Lutheran schools BOE a	Cheney	School should start on time with no masks!
7/21/2020 12:32:00	Katelynn	Johnson	Teacher	Ulysses	As a teacher we need that delay!! There is so much to cover and to adapt to. There will need to be time to get supplies and be trained on it so everyone can be on the same page. I am very good with technology but we will need to train those who are not. Technology is going to be a BIG deal during this year. It will become essential to those who stay home or when we have to switch at a drop of a hat to use that technology. Those 3 weeks will make or break the year!! We need to make sure that we are covering the new standards that have put into groupings. Also not to add all the health standards that the schools are still making and adapting to. WE NEED THE 3 MORE WEEKS!!
7/21/2020 12:32:00	Brooklyn	Klahr	Holton USD 336	Holton	I support Gov. Kelly's decision to postpone school. For the safety and health of our students.
7/21/2020 12:32:02	Steve	Ormord	personal	Dodge City	School should not be delayed, but open on the scheduled date. There is far too much science that shows that children need not fear this virus and that the risk of them spreading it is minimal. Politicians are over-reacting to this virus on every level.
7/21/2020 12:32:07	Deana	Gard	Citizen	Wichita	I am writing in support of Governor Kelly's plan to delay the start of school. It is critical that plans to protect the health and safety of students and educators are solid and in place before their return. My aunt is an educator in South Haven. She has cancer that impairs her immune function and I worry for her safety. I'm sure there's many other students and teachers who are immunocompromised that have the same fears. Please protect the health and safety of Kansans by supporting the governor's plan to delay the start of school; lives are hanging in the balance.
7/21/2020 12:32:07	Erin	Ponce	6 th grade and senior 20	Mulvane kansas	Go online until spring get through flu season and let things settle down so our seniors of 2021 can walk
7/21/2020 12:32:08	George	Elmer		Shawnee	I feel it is valuable for our children to be in school. I have two children, one is eager to be back at school while the other wants online school. I feel that if my city isn't having a large number of outbreaks then we should not punish our kids and keep them at home. They should be able to go to school.
7/21/2020 12:32:08	Heidi	Stigers	My family	Shawnee	Please don't allow schools to reopen for in person classes until COVID-19 is controlled. We don't know the long term effects of this disease. Asking children to wear a mask 8 hours a day will be ineffective and put everyone at risk for exposure to the disease. The number of outbreaks that will happen in schools will bring the education system to a halt

7/21/2020 12:32:08	Kelli	Pennington	Public SchoolTeachers	Mulvane	I agree with Governor Kelly that schools should delay opening until after Labor Day. The data on Covid diagnoses and deaths continue to rise. Just today, new measures for Sedgwick County are being put in place. The new Sedgwick County order would: <input type="checkbox"/> Close all bars and nightclubs <input type="checkbox"/> Close all eating and drinking establishments at 10 p.m. <input type="checkbox"/> Limit gatherings to 15 people or less Read about the other restrictions: <a href="https://bit.ly/2OHw8bl">https://bit.ly/2OHw8bl</a> #kwch12w Kansans refuse to take measures of safety for themselves and others. Schools need the additional 3 weeks to prepare the safety measures, provide training, and acquire proper supplies for reopening. Educators want to be back in the buildings and we want to be with our students. Please support US by allowing this to happen not because a Democratic Governor wants to mandate a delay but because it is the BEST for education in KANSAS. Show that our Board of Education cares about supporting its educators. Thank you.
7/21/2020 12:32:10	Michael	Watson	Blue Valley Schools	Kansas City	Please vote to delay schools until after Labor Daym Please consider the lives of your teachers.
7/21/2020 12:32:14	Sarah	Moser	none	Lenexa	I support waiting until after Labor day to start classes; however, please let the sports conditioning continue! The kids need this physical outlet; they aren't in close contact while running or out on a field; they wear masks and wash up upon entry and exit; and it is good for the body and soul. PLEASE let the kids play!
7/21/2020 12:32:15	Holly	Carchesio		Shawnee	these kids need to be in school and masks should be an individual/family choice. don't let the media influence your decision. look at the date specifically for kids.
7/21/2020 12:32:16	Rachael	Wyeth	Self & children	Wichita	I understand the governors position to delay school, but as a parent I am concerned that the governor will continue to delay school or implement rules for the school districts to follow that are cannot be enforced. Sanitation and hand washing have always been important in the prevention of disease. This is not new. It seems like the schools have had all summer to prepare for safety and sanitation processes to be ready for school to start on time. For the families who are uncomfortable sending their children to school they should have the option to do school online, with the ability to change curriculums at quarter or semester end.
7/21/2020 12:32:19	Cara	Dietz	Parent	Hays	I appreciate the delay of schools in order to give the teachers, staff, custodiansAdministrators time to prepare for this school year.
7/21/2020 12:32:20	Erin	Atteberry	USD 495	Larned	Please consider starting school on time. Our kids have been out of school for over 4 months and the emotional impact as well as educational impact is obvious. The reality is that the virus will still be here in 3 weeks and no longer now long we wait, there will be a spike for those who choose to go to school. With Districts offering options for those not comfortable sending their students to traditional school, those who have evaluated the risks and feel the benefits outweigh them, should be able to send their students to in person school with appropriate precautions in place.
7/21/2020 12:32:24	Shantel	Corpening	Larned middle school	Larned	I am all for holding off on starting school the number of covid cases are higher then ever and my son has health conditions it is not safe. I prefer online classes until this is under control.
7/21/2020 12:32:25	Crystal	Holzer		Junction City	PLEASE delay the start of school until after Labor Day. It will allow parents to make more informed decisions and allow schools to adequately prepare for all of the logistics involved.
7/21/2020 12:32:26	Shayla	Tucker		Scott City	I feel we need to do whatever we can to start school in August. We are going to have another spike in COVID cases because kids are gross so let's cross that bridge when we come to it and get these kids in school in August.
7/21/2020 12:32:32	Julie	Geiger	Teacher	Everest	The highest number of new cases to date in Kansas was recorded yesterday: 973. It is ludicrous to even consider in-person classes until we reverse this spiraling upward trend. This is not about politics. It's about public health and safety. How many teachers, students and family members have to die before we take this seriously?
7/21/2020 12:32:36	Shawna	Wright		Roeland Park	In school, after Labor Day, and leave it up to each district/institution regarding before. Private schools can make parents provide PPE & have smaller school/class sizes. Thank you!
7/21/2020 12:32:45	Deeann	Schamberger	Children of Hoxie	Hoxie	No delayed start time
7/21/2020 12:32:45	Stephanie	Katzer	USD497	Lawrence	I have submitted my thoughts regarding the opening date of school. We were asked to share our thoughts about summer sports conditioning. If they continue to practice as they are now, with safety procedures in place and social distancing during conditioning-no contact, I support this as there is a balance with mental health as well.
7/21/2020 12:32:55	Therese	Cooper	Myself	Wichita	Open up school regular time. And governor needs to stop and be realistic in makes for kids.

7/21/2020 12:32:59	Michelle	Schrock	Students of USD 307	Brookville	While I would love to see my students back in school and participating in extra-curricular activities, at this time I do not feel it is safe. With the increase our state is currently experiencing in positive COVID cases, it's in our children's best interest to delay the start of school. It is our social responsibility to limit close contact until our positive cases see a drastic decline. While my family has continued to take the necessary precautions, my daughter has been quarantined for possible exposure from close contact. These possible exposures came from classroom like settings such as helping teach Vacation Bible School just as it will if our children go back to school before we have this pandemic under better control. I am a Republican in rural Kansas, but I fully support Governor Kelly's recommendations and commend her for stepping up as a true leader and making tough decisions in the best interest of our students and communities! Please do not let politics guide your decision! You are an elected official trusted to make reasonable decisions in the best interest of our students, not to play political games with our children's health and well-being.
7/21/2020 12:33:03	Anonymous	Anonymous	USD 489	Hays	<ol style="list-style-type: none"> <li>1. Teachers made online "work" in less than one week. They have had all summer to prepare. There is no need to further prep.</li> <li>2. Temperature checks at the door are a HIPAA violation for my child. If my child has 6 year molars coming in and has a low grade fever due to teeth, it is not the school's responsibility to determine my child's health.</li> <li>3. Opening MULTIPLE entrances for public access has been deemed UNSAFE. This can cause a loop hole for leaving our children vulnerable to attacks. <a href="https://www.cisa.gov/school-safety-and-security">https://www.cisa.gov/school-safety-and-security</a></li> <li>4. If schools are not opened, we will see a drastic increase in home schooling, thus losing teaching jobs</li> <li>5. Our children that need school the most have been without it. Think of the less fortunate students who are suffering at home and missing their school.</li> </ol>
7/21/2020 12:33:10	Kathleen	Billings		Topeka	Thank you for giving the districts additional time to create plans. As a working mother of 4 elementary aged children, it is not at all convenient. But, it is right. I support the Governors EO to delay school opening until after Labor Day.
7/21/2020 12:33:12	Lois	Domek	none	Mayetta	I support the postponement of school opening. Please support Governor Kelly in her efforts to protect the people of Kansas. Listen to the medical experts. We could get ahead of this crisis people stopped playing politics and worked together.
7/21/2020 12:33:17	Patti	Silver	self	Overland Park	I am a medical professional. Since numbers are surging in Kansas and now it has been noted that children can get this virus and the children over 10 can spread the virus just like adults it seems like common sense to keep the children out of school until after Labor Day to see if numbers go down. I believe this a day to day situation. Please keep schools closed for the time being. Thank you
7/21/2020 12:33:20	Taylor	Stivers		Hays	I hope that you use science to make your decision. I think the governor's decision to delay the start of school is in our best interest as educators, parents, and citizens. We need to have less community spread in order to safely open school.
7/21/2020 12:33:22	Sharon	Towery	US Citizen	Larned	Lots of kids have medical reasons like asthma that cant wear masks. I have worn masks to doctors appointments and my asthma that I had outgrown was triggered with the masks for an hour apt. I cant imagine all day for all ages. Please reconsider this. The washing of hands so much during the day will cause infections as their skin will crack and bleed. You say its for the safety of the children but the consequences are adding to a horrible time where death rates are lower and recoveries are on the rise without vaccines. Masks are for hospitals where the environment is supposed to be kept sterile. No matter what you do an environment outside of a sterile unit will always be contaminated. This is why surgeons and medical fields wear PPE, they have to keep a sterile environment sterile. Please consider. Thank you!
7/21/2020 12:33:27	Emily	Dykes	My own daughter who is	Bonner Springs, KS 660	Confirm the governor's orders, please. I want to send my daughter back to the classroom. I don't want her to get COVID or bring it back to us or to her elderly grandparents - one who has cancer. Do this right. Delaying 3 weeks isn't that big of a deal to most of us, and it will give the schools more time to prepare for making sure the kids have adequate distancing and help them figure out how they are going to handle mask mandates (which I am STRONGLY in support of). Don't take stupid chances on our kids. We don't know how this is going to affect them, and we shouldn't experiment on their lives. I won't allow my daughter to be part of it if you don't take the governor's common sense orders seriously.
7/21/2020 12:33:28	Cathy	Johnson		Cherryvale	No delay. And no mandatory face coverings.

7/21/2020 12:33:37	Jo	Emig	St Andrews's	Abilene	Please allow kids to go back to school. Some kids, elementary kids especially need to be in school. Not all kids can do the virtual learning.
7/21/2020 12:33:38	Tom	Brungardt	Parent of school child	Shawnee	Please do not delay the beginning of school. Vote down Gov. Kelly's delay.
7/21/2020 12:33:43	Stephany	Koci		Atchison	I am a nurse. And if your going to do online meetings than why are you going to send my child to be around 100s of other children. Who do not know how to wash their hands like they should. Our teachers can't keep up with reminding everyone to keep the precautions.
7/21/2020 12:33:48	Norman	Johnson		Cherryvale	No delay is necessary if masks work. If my kids get sick, we will keep them from school. Masks either work or they don't. You cannot play both sides of the argument.
7/21/2020 12:33:48	Shannan	Grilliot		Wichita	Delay the start of school. Covid cases are rampant in our state, and Sedgwick County. Opening now is unacceptable. We need to get cases under control first.
7/21/2020 12:33:53	Dakota	Smith	As an educator in a large	Kansas City	Delay the school year
7/21/2020 12:33:54	Jena	Oldham		Lakin	I believe the delay is in the best interest of the schools. It is a good thing.
7/21/2020 12:33:56	Gary	Stevanus		Baldwin City	<p>I support the executive order proposed by Governor Kelly. The number of COVID-19 cases in the state of Kansas are increasing, and we need to do what we can to keep our students and school district staff safe.</p> <p>In addition, following this order will allow school districts time to better plan for in person learning. While the districts have been planning all summer, they recently received a 1100+ page document produced by the Kansas Department of Education. I'm not sure how KSDE or the State School Board can expect schools to read, interpret, and effectively implement the guidelines set forth by this document.</p> <p>Delaying the start of school will allow for schools to better "Navigate the Change" that was outlined in the KSDE document. In addition, one would hope that the COVID cases in Kansas drop between now and the Labor Day holiday.</p> <p>If I were to make one change to toe Governor's order, I would support allowing online only education to take place prior to the Labor Day holiday if the local school district decides to do so.</p> <p>Thank you for your time and consideration into this matter. You are making a difficult decision, to say the least. Please take politics out of your decision making process and vote for the option that you truly feel will keep or students and school district staff members as safe as possible.</p>
7/21/2020 12:33:59	Chris	Eddy	My family	14903 w lynddale Wich	School should open with full participation and full time attendance for those that want that option. Parent who want online classes should have that option as well. We want our kids in school full time with in class instruction.
7/21/2020 12:34:08	Lisa	Brittain		Emporia	I think we SHOULD delay and then do virtual learning
7/21/2020 12:34:09	Stephanie	Marshall		Linwood, KS	<p>Good afternoon - I am writing in *opposition* of Governor Kelly's order to delay the start of the school year until after Labor Day.</p> <p>While I understand the need to protect our children, when you take the time to actually analyze the reports being provided regarding new cases, testing, etc, the need for a delay is just not realized. There are also reports daily now of inaccurate testing counts, of people receiving positive test results but have not had a test administered, and suspect diagnoses of COVID where patients had no symptoms, but were being presumed positive after death. Health departments are not reporting unduplicated counts, so it is possible for a single person to be counted multiple times.</p> <p>Daycare centers have continued to operate during the entire pandemic. If they can function while continuing to not only provide care for our children, but also provide pre-school classes, then there is no reason why our primary and secondary schools cannot also provide onsite learning.</p> <p>Thank you for your time.</p>

7/21/2020 12:34:11	Amber	Krier	USD 273	Beloit	Please allow for local school boards under the direction of local health dept and officials make decisions for each county including when to start school.
7/21/2020 12:34:12	Mark	York, PhD	Individual with a PhD in	Raytown	The central questions in curriculum and instruction are "What knowledge is of most worth?" (Herbert Spencer) and "Whose knowledge is of most worth?" (Michael Apple). The novel COVID-19, and its uncontrolled community spread in the most populous areas of Kansas adds a new calculation in determining worth. The data show that children (especially those 10 and over) are efficient asymptomatic transmitters of this disease that has no cure, no vaccine, and potentially life-long effects on survivors. Areas with no cases of the virus may be safer to open, but there are clearly communities in which schools would place students, teachers, and families at tremendous risk. Vulnerable populations are at greatest risk. The wrong decisions will result in transmission to teachers, parents, grandparents, and students. Some school personnel and school families will face bankruptcy from medical bills. Others will become disabled and die. Schools will become the reactors that gather the critical mass that will cause a chain reaction rapidly multiplying the asymptomatic carriers of COVID-19. Dead teachers cannot teach. Dead students cannot learn. Dead parents and grandparents cannot support schools or their surviving children. Science and experience both provide valuable knowledge that is of most worth as you make this decision. Would the benefits of in-person schooling started prematurely outweigh the cost in illness and death to those who trust you to provide a safe environment? We are all in this together. If community spread of COVID-19 would claim one or more of your family members, would you regret the decision you are about to make?
7/21/2020 12:34:14	J	A		Johnson County area	School districts that are prepared to start learning online should do so without a delay. Online learning occurred from March-May and can start again in August. Many school districts are prepared for online learning with improvements from the spring, so there is no reason to delay education while students sit at home playing video games instead of engaging in meaningful learning. Staff members can report on time to their school buildings with plenty of space and resources to stay safe while students work from home online. School districts can decide what flexibility they provide staff to also work from home, but online learning should proceed on time and continue until it is safe to return to the building with students. It is not currently safe to return to school buildings with any more than about 25% of the student population even with appropriate use of masks and hand washing. 25% of the student population at my school would mean about 10 people per classroom (8 students; 1 teacher; 1 paraprofessional). The government should partner with schools at this time to improve HVAC systems that are clearly in need of being replaced, as they are one component to why schools are not currently safe for full capacity.
7/21/2020 12:34:16	Dana	Paxton	My children	Norton	By holding off on starting school and then forcing students to wear masks is asking our children to sacrifice their childhood. Children aren't getting or spreading Covid! Covid kills much less than H1N1, the flu etc., etc! There was no shutdown then! Stupid to destroy our economy and our children's childhood for this! Look at the real numbers and STOP taking our Constitutional rights from us! Masks DON'T work! Your Democratic agenda to destroy our county is evil and wrong!
7/21/2020 12:34:27	Nick	Becker		Wichita	Open up our schools. Our kids need and must have classroom time with teachers. Death rates continue to drop, the virus is proven not to spread through young children. Most districts are giving parents the choice of in person or at home schooling. We pay taxes, it's our money, we should be able to make a choice for OUR children!!
7/21/2020 12:34:27	Sara	Morris	Myself	Linwood	Delay school
7/21/2020 12:34:28	Joleen	Schoenthaler	USD 208	WaKeeney	Please approve Gov. Kelly's mandate delaying the start of the school year until after Labor Day. I want kids in school just as much as the next person but we need to make sure we have everything in place to protect EVERYONE. In addition, this will give officials time to see where our numbers are at throughout the state. I am concerned about the number of available ICU beds.
7/21/2020 12:34:29	Julie	Wilson	Myself	Meriden	I am scared to death to send my husband of over 30 years back to school. We are in process of updating our wills and our POAs. If he gets it, and he is a prime candidate with all the underlying conditions, I will get it. I just sent a very long email to my sisters outling what needed to be done to help our son if we are both lost to COVID. Give the district's the time they need to get their safety plan in place and their PPE lined up.

7/21/2020 12:34:36	Darby	Cochran Wilson		Emporia	I support the Governor's mask mandate and school delay for the purpose of providing the healthiest and safest environments for our students, school staff, and community as a whole. As a Registered Nurse, and a Social Worker, there are no easy answers here. Our children need to engage with their peers socially for their mental health, and their teachers for their learning. That being said-it is my belief, that putting all of our students back in their school buildings will perhaps fulfill that social need for a short time, we will very shortly see an immediate spike in COVID Cases that may cause significant health concerns for our teachers, family members, or other staff and perhaps lead to another full lock down--which would be so defeating. I believe that by choosing to offer instruction by remote methods, maybe even send paras into the homes of those with high needs (keeping them safer too), we can preserve more freedom, reduce loss of life, and allow our children to be together safely in small groups. COVID is more than a nuisance. It's changed lives and ways of life. We are so far from out of the woods. Please encourage USD 253 to choose the safety of its staff, students, and community and focus on remote alternatives and problem solving in this area for 2020-2021. Thank you.
7/21/2020 12:34:39	Annmarie	Langley		Wakefield	I support the order to postpone the starting of school until September.
7/21/2020 12:34:43	Jill	Butcger	Family	Valley Center	No delay of school please! Kids need to get in class for a multitude of reasons
7/21/2020 12:34:50	Megan	Garrett		Colby	I don't feel as though it is fair for our children to have to wear masks to school as well as keep them separated at all times. It needs to be one or another. If masks work then why social distance. If social distancing works then why the masks. Why treat our small classes the same as the large. If we can gather outside of school in groups of 15, why can't the children gather in classrooms of 15. We have that ability in the small school districts! Our children need that social interaction and team building activities as part of their everyday schooling. We are shaping these children for the future. We need to think of the impact this is playing on them. Yes I want my child safe as she goes to school everyday but there's a line that is being crossed with all the inconsistency in rules about prevention. It's okay to gather on the practice field but not in the classroom? Wear masks in the classroom but not during sports. Will they take away P.E? These are all things the children need. They simply need to be children and interact as though children do. Covering them and keeping them apart is going to ruin their immune systems and ruin their education experiences. Please consider the children's feelings and mental stability when it comes to deciding how our school systems will operate.
7/21/2020 12:34:55	Ray	Lofland	USD105	Atwood	start mid August
7/21/2020 12:34:58	Emily	Freeman	Teacher	Kansas City	My largest concern with schools remaining closed is not with education, it is with the parents who have to go back to work and need to use school as a place for childcare. While I know this has an impact on many, I still support schools remaining closed until Sept. 9th. We are in the midst of a pandemic. While we cannot stop the spread of the virus, we can certainly delay the spread by delaying the start of school as we move towards finding a vaccine. I also think schools need time to come up with plans to meet the needs of the executive order for schools to operate safely. In addition, I think teachers, such as myself, could use this time to prepare their classroom, get training on best practices during this time, and receive more training on what to do when schools possibly shut down again due to positive cases. This time could be very valuable if districts use it wisely. Even if they do not due to a disagreement with this plan, I think it will at least delay the spread through lessening contact. I want to return to school and interact with students, but above all, I want to be conscious in the decisions I am making to try and slow the spread and keep those around me healthy. If schools do not reopen until Sept. 9th- I propose an outline for what districts should address prior to the opening.
7/21/2020 12:34:58	Kasey	Hostetler		Overland Park	Blue Valley families want IN SCHOOL SCHOOLING at the START OF THE YEAR. As long as it is IN SCHOOL by August/early September, that is what matters. IN SCHOOL SCHOOLING WITH OPTIONS FOR THOSE WHO DONT WANT TO GO. PERIOD. Thank you for hearing the voices of the families!!
7/21/2020 12:34:59	Rikeisha	Turner		Ft Riley	School should definitely be delay to ensure the safety of the children as well as the staff.
7/21/2020 12:34:59	Michaela	Anderson	Lincoln Central Element	Edna	Don't take away flexible seating & require kids to sit still for 8 hours straight. LET KIDS BE CREATIVE KIDS and ENJOY their learning! I can spread kids out way more than in a desk. I can sanitize, clean and keep a COVID classroom ! Going tradition will not stop the spread a violence. It will take the kid out of school! Kids are more willing to learn and enjoy learning when given a choice. Kids will grow emotionally, they will BLOOM. Sticking them in a desk will kill the kid inside.
7/21/2020 12:35:02	Sam	Wright	Scotr city usd 466	Scott city kansas	NO masks required and no school delay.

7/21/2020 12:35:02	Kristen	Reynolds		McPherson	I support the governor's order to delay school opening until after Labor Day to give KS school districts more time to set up the logistics of implementing safety measures in our schools. This time would also provide a timeframe for COVID cases to start trending downward, or at least plateau. If this delay would save even one student, teacher, parent, or staff life (and it most certainly would), this is what must be done. To decide otherwise would be to dismiss the health and life of Kansans.
7/21/2020 12:35:08	Josh	Gering		Manhattan	UKHC doctors reported that Kansas has the second highest rate of new COVID-19 cases per capita in the country. Schools should only open when able but not hastily, not without demonstrating competence in the necessary systems/process required to safeguard our families, and not while we continue to politicize the precautions taken by the governor in the face of a severely worsening statewide outbreak. The only progress or success this state has had since the onset of this virus can be attributed to Governor Kelly and her leadership, please stop handicapping her efforts and find something better to do with your time. Especially Dr. Horst, please resign, your lack of compassion and comprehension is appalling. No one, on either side of the conversation, benefits from your presence in this discussion.
7/21/2020 12:35:12	Mary	Perez	USD 500 school district	Wyandotte	Our district needs to develop a plan that follows executive order to keep students safe in schools. At this time we are not ready to send students back. We are over crowded in our schools. It would be impossible to keep desk 6 feet apart with 30 students in a classroom that is too small. Putting students back in schools should not be experimental. We are up against a virus that we do not fully understand and sending students back is too risky at the moment.
7/21/2020 12:35:16	Jean	Kasselman	My grandchildren	Overland Park	Do not open in-person schooling until Covid deaths and incidence decline and there is no community spread.
7/21/2020 12:35:18	Josh	Gering		Manhattan	UKHC doctors reported that Kansas has the second highest rate of new COVID-19 cases per capita in the country. Schools should only open when able but not hastily, not without demonstrating competence in the necessary systems/process required to safeguard our families, and not while we continue to politicize the precautions taken by the governor in the face of a severely worsening statewide outbreak. The only progress or success this state has had since the onset of this virus can be attributed to Governor Kelly and her leadership, please stop handicapping her efforts and find something better to do with your time. Especially Dr. Horst, please resign, your lack of compassion and comprehension is appalling. No one, on either side of the conversation, benefits from your presence in this discussion.
7/21/2020 12:35:19	Julie	Libel		Wichita	I am strongly in favor of complete reopening in person for all Kansas schools. I believe the teachers are so very unlikely to contract Covid from children. Child to adult transmission is almost nonexistent. Death rate is between 1-2% ! The risk of closing FAR outweighs the tiny risk of reopening. Personally know a number of students who received no instruction once the schools closed. This is unacceptable. The teachers trying to take the risk down to 0 and that is not possible. If schools do not reopen the teacher salaries must be cut.
7/21/2020 12:35:22	Shane	DeBoer		Prairie View	School should open normally with county officials deciding any mandates necessary. Local representatives have a much better grasp on the needs of the local districts.
7/21/2020 12:35:33	Lucian	Sours	Student at phs usd250	Frontenac ks	The opening of school should be delayed purely for the safety of the students and staff
7/21/2020 12:35:35	Sara	Michaels	Parent	Shawnee	I agree with the delay until Labor Day. Until our children can return to school without wearing masks, I think we need to postpone in building education. I can't imagine wearing a mask all day myself, let alone enforce my 9 year old to do so.
7/21/2020 12:35:38	Daniel	Tidwell	My family	Wamego Kansas	I agree that we should follow CDC guidelines in order to safely open schools. If we have the resources to do this, then I see no problem with opening schools. However, if our federal government doesn't act and help fund the necessary safety protocols, and our schools opening pose a risk to our children's, teachers, and families lives, then no, we absolutely should not open schools until it is safe to do so.

7/21/2020 12:35:40	Diana	Vega	Free State High School	Lawrence	The children should be going back to school during the normal time. Mortality rate among students is nil. Daycares and camps, including boys and girls club have remained open, virtually the entire time with no fatalities!!! First, school closures are creating “virtual dropouts.” Even those with access to computers who do check in are not learning in the same way. This will increase our country’s education gap and exacerbate racial and social inequalities — with impacts that will persist for years. Second, school closures impact kids’ health both with sedentary behavior and psychological repercussions. Third, a disproportionate burden of working from home is falling on women. I am a single mother for all intents and purpose, as my husband works/lives in another state. Kids are at lower risk from complications of covid-19, and basic risk-reduction control measures are working. We need to create a culture of health and safety, including wearing masks, hand washing, social distancing, staying home when sick, and clean indoor air environment. OUR SCHOOLS SHOULD REMAIN OPEN!!!!
7/21/2020 12:35:47	Amy	Blakemore	SMSD	Overland Park	I would like to thank all the board members for their service to Kansas. I have been a Kansas teacher for 13 years. I do not believe it is safe to return to school in person yet, and I think the wise decision is to delay the start of school right now, so schools can prepare for either an online option or, later, a safe hybrid option. A safe hybrid option will be very expensive and also difficult to implement. My district is working on extensive plans, but they are not yet complete. I don’t want the lives of Kansans to be an experiment. If we take more time to watch the numbers and make effective plans, then we have a better chance of staying safe. In the meantime, school districts can also work on plans to meet the needs of students who require social services during remote learning. With this delay, staff will also have a chance to see their district’s plans and make an informed decision about whether it is safe for them to return to the classroom, take a leave, or resign if necessary to stay safe.  I am also very concerned that some board members may not be listening to their constituents and instead allowing political bias or Covid conspiracy theories to get in the way of making an informed decision. Please, use new scientific data to inform your votes, listen to teachers, and consider the individual lives of Kansans — your own mother, father, siblings, children, and friends — as you consider percentages and risk levels. Consider the potential long-term lung or neurological damage that Covid could cause, not just death rates. We have a chance right now to be a state leader in care and safety. Thank you for reading.
7/21/2020 12:35:50	Kacey	Killen		El Dorado	Our kids need to be in school. With out masks. The data shows that kids aren’t even getting this virus. They don’t wear masks in flu season.
7/21/2020 12:35:51	Rita	Tinkler		Assaria	Due to the fact that children are very UNlikely to acquire or pass on this virus, I recommend NO masks for elementary age kids. And let’s START school! We’re losing a generation! Or is it your goal to dumb down America? Not to mention the social & emotional health issues you’re causing for our kids!
7/21/2020 12:35:54	Scott	Belcher	Self/Parent/Spouse of Te	Andale/Wichita	I think that the delay could only help reduce cases/spread. I have students that i want to go back to school, my wife a teacher of 26 plus years had cancer last year so has a weaker immune system so I worry about her health. 2 Week delay would give a better chance to be ready or to change plans, I don"t want to start and stop over and over.
7/21/2020 12:35:57	Lisa	Harder	self	Newton	I don't usually support much of what the Governor does but I do support delaying the start of school. I think it will allow a little more time to plan. I would actually like to see this be a permanent change.
7/21/2020 12:35:58	Jenny	Brazil		Shawnee	Children need to be in school as soon as possible. We can not continue to delay the start. This needs be a local decision based on current trends in the area.

					<p>to whom it may concern.</p> <p>I appreciate the executive orders put in place to protect students, teachers, parents and communities. While I agree with the delay in school start times, I can't understand why, in these unprecedented times, our school activities and athletics are being limited by school start dates. These activities are an essential part of education and provide growth opportunities that are just as necessary as content centered instruction.</p> <p>A team or group of 50 controlled and homogenous student athletes working outdoors does not equate to the same risk as having 1800 students indoors moving freely throughout the school building. The risk is simply not the same. If we can limit team sizes the risk will be reduced greatly.</p> <p>Furthermore, many of our students have already been participating in outdoor athletics and activities throughout the summer. Is postponing the start of these activities going to curb the current spread of the disease? Unfortunately, I don't believe delaying activities will have any net effect on slowing the virus in our current climate of public dissent. Canceling or postponing activities will have a large effect on the psychological component of many of our students. I cannot imagine having my senior year of football canceled, that would have changed the trajectory of my life and career completely.</p> <p>As Governor Kelly has done it is important to provide leadership and make decisions during this time period. No decision will be perfect but if we work together we can do our best. I suggest activities limit roster size, cancel unnecessary events that underclassmen will have opportunities to participate in future seasons, but most importantly protect the full season for our senior classes. It is my hope that the State Board of Education will allow activities and athletics to begin practicing outdoors and in limited capacity two weeks prior to the start of the school year. This would allow activities to begin competition on the Friday after Labor Day and would only result in a net loss of one week of competition.</p>
7/21/2020 12:36:07	Kevin	Stewart	Free State Football	Lawrence	Thank you for your time, and I appreciate the forum to express my thoughts.
7/21/2020 12:36:09	Scott	Kaul	Veritas Christian School	Lawrence	I think it is wrong and ill-advised to delay school openings. That said, until something is done about this governor's poor leadership and unconstitutional decisions in these areas it is our family's input that sports practices and activities should not be affected by this school opening delay order. thank you
7/21/2020 12:36:11	Tina	Clark	parent	shawnee	please align with Governor Kelly to delay the start of school until September 9th.
7/21/2020 12:36:12	Chad	Van Slyke	Father	Pratt KS USD 382	Keep open the schools and let practice resume. It's detrimental to health and mental wellness
7/21/2020 12:36:15	Kevin	Honas	Lawrence High School	Lawrence	PLEASE KEEP ATHLETICS OPEN. I am a junior at LHS. We need this so badly. It's healthy for us. Kids are very unlikely to get seriously sick. Please. We are begging you for at least this much.

					<p>My name is Alexander Meek, and I will be entering my second year of teaching this coming semester. I am currently the Director of Bands at Republic County Jr/Sr HS, where I teach 5-12 band and 7-8 choir, as well as oversee the logistics of my 200+ member program. Last year was my first year teaching, and despite going through the many trials and tribulations you are all-too familiar with, I discovered that my commitment to teaching was only strengthened. Despite finishing out the year online, I found myself able to connect with students in a different, yet meaningful way, which was inarguably why I became a teacher in the first place.</p> <p>I am filling this out in regards to the State Board of Education's upcoming response to Governor Kelly's executive order. As you know, the Board's approval would push back the start of school until after Labor Day. As our elected officials (and educators at that), I have no doubt you are staying true to the most recent science and recommendations in regards to COVID-19. I feel that these things, in conjunction with the voices of your constituents (not the beliefs and opinions of politicians), are the most vital things in determining a voting stance.</p> <p>While I'm thrilled to begin another year of teaching, I can't help but feel overwhelmed by the various possibilities this year could bring. I am thankful for the guidelines the KSDE has published, as well as the latest findings on music education and its correlation to COVID-19, because I now have a few more tools necessary to plan for the year going forward. I want to get back into the classroom more than anything so that I may make music with my students again, but given the current rise in cases, I strongly believe that a three-week late start can only be beneficial for us in the long run.</p> <p>With that, I urge you to accept Governor Kelly's executive order to delay the start of school until after Labor Day. This will give educators like me the time to adequately prepare themselves and their classrooms for the return of students. I was just writing out all the modifications I plan on making to my band room this upcoming year to account for the return of students, and so far the list has exceeded three pages. And I'm certain that my colleagues teaching art, physical education, or really any content area are being just as thorough.</p>
7/21/2020 12:36:15	Alexander	Meek	USD 109	Belleville	Thank you for taking the time to read my response. I know you must be undergoing a lot of pressure right now, but I
7/21/2020 12:36:17	Ty	Wilder	School parent	Hutchinson	<p>The following is from and study they did in New South Wales where they did not shut down school in the heart of the so called pandemic. They found that this virus less contagious than influenza in children. Here is a full link to the study, <a href="http://ncirs.org.au/sites/default/files/2020-04/NCIRS%20NSW%20Schools%20COVID_Summary_FINAL%20public_26%20April%202020.pdf">http://ncirs.org.au/sites/default/files/2020-04/NCIRS%20NSW%20Schools%20COVID_Summary_FINAL%20public_26%20April%202020.pdf</a>. Our detailed investigation of COVID-19 cases in 15 NSW primary and high schools found only two secondary cases, both in students. This was despite initial cases occurring in 9 students (including two students in two schools) and 9 teachers. Very detailed follow-up, including additional testing for the presence of the virus and for antibodies to the virus, occurred in a proportion of the total 863 close contacts identified from the school setting.</p> <p>Our investigation found no evidence of children infecting teachers. One secondary case (in the child in a high school) was presumed to have been infected following close contact with two student cases. The other secondary case was presumed to have been infected by a staff member (teacher) who was a case.</p>
7/21/2020 12:36:19	Bethany	Boutte		Ogden	I don't have a problem with starting school/sports games in September. I do think the conditioning/voluntary practices that are already going on should be allowed to continue. Otherwise, the athletes will be more susceptible to injury when they start real practice and games suddenly. I believe that was the point in letting conditioning etc start in the first place.
7/21/2020 12:36:23	Alisa	Muir		Buhler	School should not start until September and we have a steady decline in covid cases.
7/21/2020 12:36:43	Anne	Chandler	My family	Wichita	Please delay the start of school to allow our schools to have a chance to open school following your 1088 page plan. Your plan is detailed and deserves a chance to succeed.

7/21/2020 12:36:46	Kelli	Vanderbeck	Columbus public schoo	Columbus, ks	I am not in favor of mandatory face coverings and in classroom lunch for the elementary grades. The children will be more concerned about their masks than what the teachers are TRYING to teach. Children's attention spans are short as is. Adding another distraction on their face will make the teachers jobs that much harder and the child's job that much harder as well. Also an important part of school is the socialization they learn when with the teacher and other children. They see facial expressions. They learn to identify and imprint facial features as friendly, sad, dangerous, you get the point. To completely separate them concerns me a lot for it will have negative effects for many of these children later in life.
7/21/2020 12:36:46	Marlo	Jones	Parent	Lawrence	I think that is a great idea and I just want to ensure the students will make the time up on the back end.
7/21/2020 12:36:49	Seth	Oakley		Hays	It is far past time that we start returning to normalcy. This virus isn't going away, and the vaccine will not make it go away. Our kids desperately need to be in school, and the damage done to these kids by not returning, is far worse than what Covid 19 would be to them. Everything has become so political, and our children's future shouldn't suffer.
7/21/2020 12:36:54	Brad	Just		Hillsboro, KS	I support the order to delay the school start until after labor day.
7/21/2020 12:37:03	Luanne	Fox	SMSD	Overland Park	Please do not open schools until at least after Labor Day. Thank you!
7/21/2020 12:37:17	Kristin	Scarborough		Lenexa	Please vote with the governor
7/21/2020 12:37:22	Penny	Nielsen	Parent	El Dorado Ks	I'm fine with delaying
7/21/2020 12:37:28	Peggy	Drew		Wichita	For the safety of students, teachers, and all staff I strongly believe that school should be delayed until Sept or Even later. I don't believe there should be in person school until the numbers begin to decline dramatically. What will happen when a student or teacher gets sick? Even multiple teachers? If a student dies? Are the school districts prepared for law suits? Even with all the safety measures it will happen. What are the regulations if a student tests positive and exposed the entire class? Doesn't that mean the entire class should be sent home to quarantine? This situation is too dangerous for our students and teachers.
7/21/2020 12:37:31	Katy	Struble		Derby	Please open schools in August. There is no reason for this to be a state mandate. Districts should decide for themselves. Kids will have already been out of school for 5 months and are already behind in learning. Additional time off will only worsen academic outcomes. There is no strong evidence to show that kids are at risk of getting the virus and have anything more than mild symptoms. I prefer kids to go back to in-person instruction, but at the very least they should be starting online learning in August. Schools have had months to prepare for reopening and still have 4 more weeks. Another month to prepare is not a good excuse to delay education.
7/21/2020 12:37:39	Deanne	Megrew		Wichita	Please allow online and virtual schools to continue
7/21/2020 12:37:43	Jesica	Fitzwilliams		Andover	Please vote against delaying schools. My husband and I are both essential workers and our 2 children have been going to summer camp all summer. There is no reason that they should not be allowed back into school in August. I am okay with sending them in masks and taking precautions.
7/21/2020 12:37:52	Steven	Thomas	self	Kansas City	It is imperative that the Governor's order to delay post Labor Day be ratified. Failure to do so puts students and teachers at unnecessary risk. Get politics out of this and vote to protect citizens both young and old.
7/21/2020 12:38:00	Maeghan	Yount	Parent	Overland Park	Money, politics, etc have no business in this PUBLIC HEALTH matter. The health of our children and families should always come first; starting in-person classes during a rise in pandemic numbers is asinine and dangerous.
7/21/2020 12:38:05	Jeffrey	Bender		Concordia	Please do not delay the opening of schools. The enormous document on safely opening schools is excellent and sufficient. Our local school board has put a lot of effort into a plan for safely opening
7/21/2020 12:38:08	Alexis	Kater		Andover	Wouldn't it be better to go ahead and start in August remotely? Seems like we are just delaying the inevitable. There is no way we'll be better off Sept 9 if other changes aren't made. We could at least get devices and some beginning or review work to many students to get a jump start. The 3 weeks could be very beneficial this way, vs just waiting . Please consider a remote start in August!!
7/21/2020 12:38:10	Julie	Bauer		Shawnee	please vote no against Governor Kelly's executive order
7/21/2020 12:38:10	Larry	Carter	Retired from USD 497,	Lawrence	Delay as long as possible. This is WAY too dangerous for teachers, kids and the vulnerable ones the kids will interact with outside of school. Support Gov Kelly!
7/21/2020 12:38:16	Brittney	Vogel		Topeka	Schools should open on time and should not have mandatory masks in elementary schools. I think the Governor is doing a horrible job of leading our state, and completely disregarded all the hard work the schools have done to be able to open on time.

7/21/2020 12:38:22	Janel	Koonce	USD259 as a teacher/ U	Wichita	Please support the order to delay the start of school. As a teacher, I fear for myself and my 150+ students and their families. As a mother, I worry about my children. I have never felt such anxiety over anything in my life. It is more important to get Kansas safe and healthy again. More important than anything else. This is not a political issue, this is a health crisis that needs to be dealt with swiftly and aggressively. If that means keeping schools closed (and online) then so be it. At least a delayed start will hopefully give our schools enough time to prepare for a year like we've never experienced before, and hopefully, our state can get these Covid-19 numbers down. Please pass EO 20-58.
7/21/2020 12:38:24	Lindsay	Billinger		De Soto	All of these decisions need to be made county by county. The state shouldn't mandate what our kids need. Please take control for our kids
7/21/2020 12:38:26	Amy	Dunklee		Johnson County	I believe the delay for opening schools is in the best interest of our schools and students. It would give teachers and administrators time to be fully prepared to welcome students with all the new guidelines. It doesn't seem fair to expect schools to be ready without giving them the proper time to be trained. If schools open up as currently scheduled, teachers will only have a few days to learn the new protocols as well as set up their classrooms to welcome students. If school personnel is not properly trained, it would put students at risk. I also believe with our numbers in Johnson County skyrocketing right now, the extra time allows our population to help flatten the curve. Our numbers are just too high for it to be safe to gather in large numbers. Most meetings are still being held virtually. Also many companies are choosing to have employees continue to work from home. They do these things because it is what they believe is safest for everyone. Shouldn't we do what is safest for the children in our schools also?
7/21/2020 12:38:29	Yomayra	Hernandez		Fort Riley	I feel like starting school after Labor Day is a good idea but also worries me with the whole new restriction for kids going back to school. I have a 5 yr old who I know Won't keep on a mask for most of the day during school hours & staying home to do it through a computer isn't a option. He will not be able to sit in front of a computer for 6 hours & also both parents work. Is there a different way to go about wearing masks at school? Will kids get in trouble & parents get phone calls every time because they aren't being cooperative with these new rules? Just doesn't seem like it's going to go too well.
7/21/2020 12:38:32	Angie	Hobbs	None	Wamego	I believe we should delay the start of the school year.
7/21/2020 12:38:42	Sarah	Reznikoff		Manhattan	Please do not reopen schools in a haste. I understand that working parents are eager to have their kids return in-person but a careless reopen will lead to a spike in the number of COVID cases and deaths and ultimately will force the schools to close again for longer than would have been necessary. Instead, please explore possibilities such as limited in-person meetings in small groups -- say six kids meet a single teacher twice per week for one hour -- and unstructured supervised outdoor play and outdoor "study halls" for kids whose parents must work.
7/21/2020 12:38:46	Ashley	Mowder		Rose Hill	Please consider the safety of school staff, as well as students. While schools are an integral part of our society, it is NOT worth risking the lives of thousands of people, for the sake of a few weeks.
7/21/2020 12:38:50	Bre	Brewton		Wichita	Please delay the start of schools until September.
7/21/2020 12:38:52	Mandi	Osborn		Scott City	I think extending the date to start school is a very responsible, well thought out measure. We all agree children need to get back to school but I think allowing the school officials and staff this extra time will help them have a better plan and system to help keep all students safe and healthy. These three extra weeks are crucial for the health and safety of students and staff and very necessary.
7/21/2020 12:38:53	Mark	Bauer		Shawnee	please vote no against Governor Kelly's executive order
7/21/2020 12:38:54	Makaela	Stevens		Scott City	I strongly disagree with delaying the 20-21 K-12 school year in the state of Kansas. The result would be counterintuitive, as these students have been together throughout this past summer for various activities, including sports practices and summer camps. Students have been consistently participating in these sports practices and weights classes since June, and placing a ban on practices and delaying school for a month would do nothing to prevent the virus, as the students have been in close contact for over a month already. Delaying the school year would only give families incentive to go on vacations and leave their residences for a week, causing potential exposure to the virus. Then, by bringing the students back together in a month, they would all be far more susceptible to COVID. By keeping with consistent sports practices and beginning school at the originally scheduled time, students would remain in safe contact with one another for the next month, allowing them to safely begin school, especially in smaller communities like my own, where COVID is not yet a threat in any way.

7/21/2020 12:38:54	Xavier	Rodriguez	KNEA	Ulysses	Delay
7/21/2020 12:38:57	Dena	Russell Marino		Emporia	I am all for delayed opening and remote options. I want my kids to be safe and healthy!
7/21/2020 12:38:59	Lisa	Ide		Shawnee	I think that it is imperative to hold off on in person school until September 8th if not longer. Schools need time to get supplies and figure out a game plan on how the day will look for the students. The rise in cases should be a clear indication that going back to school at this point in time is not appropriate. I work on the frontlines as a Respiratory Therapist and I currently have a 14 year old patient that is not expected to live through the week. That is the exact age of my son so it's extremely personal for me! Please, please help our schools get prepared and think about online classes for at least the first 9 weeks. Thank you
7/21/2020 12:39:01	Melissa	Valenciano	Parent of a 3rd grader at	Overland Park	Please keep our schools closed until after Labor Day. This will give experts a few more weeks to experience the impact of the mask mandates and hopefully see the Covid case numbers trend downward. Right now the cases are increasing too rapidly to experiment with kids going back to school. Thank you.
7/21/2020 12:39:13	William	Holland		Fort Scott, KS	Please approve and follow the governor's executive order to delay the opening of schools and open schools safely.
7/21/2020 12:39:21	Benjamin	Brown	Shawnee Mission School	Overland Park	It is unsafe and irresponsible to open schools currently. Teenagers and staff are able to spread the virus, and opening schools would only exasperate the problem.
7/21/2020 12:39:23	Michellr	Foster		Independence	I can see delaying schools but how do you expect elementary kids to wear masks all day at school?
7/21/2020 12:39:24	Adam	Lundine	Resident, teacher in KS	Overland Park	Thank you for serving on the Board of Education. It is my understanding that the board will vote to approve Governor Kelly's executive order to delay school opening.  As a teacher, I urge you to approve this plan. We need more time for our state to recover. Teachers and administrators need more time to plan for the months ahead. It is not yet safe for students to be entering their schools.  As a band director, I need more research-based information before I feel comfortable teaching my student-musicians. A joint study is currently in progress that will allow us to make safe decisions for our students in the music classroom. We need more time to receive, analyze, and apply this information. The extra three weeks will allow us to make those safe and informed decisions.  Thank you for thinking of the health and well-being of our students, their families, and our school staff as you vote next week.
7/21/2020 12:39:31	Jan	Crawford		Cottonwood Falls	Post Labor Day to Pre Memorial Day has worked in the past & it can again. Parents should have the say on their child's masking/face shielding or not.
7/21/2020 12:39:31	Jolaine	Palmer	Blue Valley Schools	Overland Park	Please accept executive order
7/21/2020 12:39:37	Michelle	Farha	Self	Concordia, Kansas	Children need to be back in school as scheduled, practicing safe guidelines which are best determined by LOCAL districts. I am a grandmother of 20 young children who deserve to have the best possible learning environment. Choices, decisions need to be made at the local level.... one size does not fit all!
7/21/2020 12:39:40	Christian	Bauer		Shawnee	please vote no against Governor Kelly's executive order
7/21/2020 12:39:44	Kellie	Sibley	I'm a teacher	Kansas City, Kansas	Please delay school openings until after labor day. It's only about 3 weeks and will hopefully give our community numbers time to come down.
7/21/2020 12:39:46	Jennifer	Kilgore		Overland Park	I am responding in concern and petition for the underserved and at risk children in Kansas. Understanding AND emphasizing with the health risk involved for all, it is still of my opinion that we need to come up with an in-person school option for these children who find school to be a safe haven for their physical (food and safety) and emotional/mental needs. Thanks for your consideration.
7/21/2020 12:39:53	Alisha	Janousek		Colby	Open schools up. Kids need as much normi as they can get right now. Think of the children.
7/21/2020 12:40:11	Jack	Bauer		Shawnee	please vote no against Governor Kelly's executive order
7/21/2020 12:40:11	Tiffany	Slade	Myself. District employe	Augusta	Being a high risk individual and having a son who falls in the high risk category concerns me deeply. There is no way for either of us to return to work/school safely with the numbers the way they are in our area.

7/21/2020 12:40:19	Amanda	Fox	Manhattan-Ogden USD	Manhattan, KS	COVID cases in Manhattan have been on the rise and will only continue to do so as students return to KState this fall. The school district needs time to develop plans and procedures and train teachers on new technologies that will be used this school year. Please follow the governor's orders and push the start date back until after Labor Day.
7/21/2020 12:40:29	Korey	Herl		Hoxie	Please do not delay the start of the 2020-2021 school year - please do not force the children to wear masks either!
7/21/2020 12:40:56	Ryan	Bauer		Shawnee	please vote no against Governor Kelly's executive order
7/21/2020 12:40:58	Cimony	Mahoney	MVHS	Shawnee	I work in the district and have 2 children in the district. I strongly encourage you to start school as scheduled and full time. Every day I see high school students stocking shelves at Walmart, checking out customers at Price Chopper, wiping down carts at Target, serving up drinks at Starbucks, serving and delivering food all around the city, babysitting children, working at JCPRD and working at retail stores. In addition children are playing sports, going to the pool or the lake, gathering at friends houses. All of these kids encounter hundreds of people throughout the day and then return home to parents and grandparents. If they can do all this, then we can certainly get them back in school safely. Offer an alternative for compromised people and get these kids back to school!
7/21/2020 12:40:43	Patricia	Prendes	Olathe Schools	Olathe	Dear Board Members, I am writing to you all for your consideration in having classes and school activities start after Labor Day on September 9,2020 I have some serious and genuine concerns as to my exposure to so much with my position as secretary. My exposure in the front office to all students, staff and all entering the building. Regardless of limited access I'm still front and center to all needs in the front office. I also work lunch duty and I'm also exposed to all students and staff. My concerns for a delay is to see and wait for affected numbers to decrease. I'd like to feel secure and confident all measures are in place for all of our protection and security! A few weeks could make a difference and my hope is that every effort be made before the new school year begins! I appreciate and Thank You for all you all are doing for our safety, well being and peace of mind.  Sincerely, Patricia Prendes Woodland Elementary
7/21/2020 12:41:01	Stephanie	Coble		Marysville	Please let districts decide. I live in a county where we have had 6 active cases with 5 recovered and now only 1 active. We need schools to open with no masks. Let only students and faculty to enter schools. Have no sports to limit crossing towns and counties. What is best for one district is not good for all districts.
7/21/2020 12:41:02	Melissa	Earnest		Leawood	Our children need to go back to school not only for learning but for their mental health. This could be detrimental for children where school may be their only safe place.
7/21/2020 12:41:10	Brian	Moser		Lenexa	Conditioning for athletics should continue as scheduled. Many sports (cross country, track, etc) can continue with practice/conditioning while still abiding by the mandates to keep everyone safe. Athletics and coaches can keep plenty of distance during these sessions and they predominantly take place outdoors, the safest place to be according to experts. Other activities can likely also take place safely and still abiding by mandates. Please do not have a "one size fits all" solution but instead, allow coaches and teachers so formulate an activity-specific plan that allows students to maintain as much normalcy as possible while still keeping them safe. Thank you.

7/21/2020 12:41:10	Erica	Rarden	Fowler USD 225	Fowler	Please allow the individual counties and BOE to decide if each district opens in August. Each county is different, and this decision should not be cookie cutter for all. Small, rural schools may be able to handle things differently than larger cities. As a parent, I would like the schools to open as planned in August with all activities allowed. My children have been isolated for 5 months, and they are now ready for interaction among peers and teachers, structure, routine, and extracurricular activities. We cannot live in a bubble forever. We can teach children proper hygiene (if they haven't been taught already). It is time to move forward for the mental health of our children. They need a proper education that many parents cannot provide their children at home. Some students need school to be their safe place, their place for meals and positive interaction. If some parents within a district are uncomfortable sending their child to a classroom, districts can plan for an alternative (virtual or workbook type option) for those families. I am requesting that schools open in August, with masks being optional (personal decision or district decision). I am also requesting that we allow students to be kids and have the opportunity to create memories through sports and activities; they have already lost one season they will never get back. We might need to figure out a temporary new normal, but it is time to move forward.
7/21/2020 12:41:16	Ali	VanDellen		Gardner	We need to get our kids back in school. Education needs to be considered essential. Schools are an essential service to our children. To keep delaying our children's education and well being is a dire mistake. To continue to say we are "safe at home" is a fallacy as many children receive any and all education, food, support, and love from going to school. Virtual learning does not work for many children and if virtual learning continues, we will see more and more children "left behind" and create even more achievement gaps. Our children have no voice, we are the voice. It is our duty to protect them and give each and every child an opportunity for success and continuing to "stay home" is doing the exact opposite. The corona virus is not going anywhere. We have to go back to basic hygiene principles of good hand washing and staying out of other's personal space. These are not new principles. In fact, through out this pandemic, daycares (which are considered essential) have been open and operating with little to no issues. Please consider to do the right thing for our children. Let's get them back into school where they NEED to be.
7/21/2020 12:41:20	Ashley	Hamilton	John F Kennedy Elemen	Shawnee	I am a 2nd grade teacher with underlying health issues. I have two autoimmune disorders and just started taking disease modifying therapy in the form of self-injections 3 times a week. Returning to school in person with a full student roster of twenty-something students puts me at a significant risk of contracting Covid-19. The additional time granted by Governor Kelly's order 20-58 would provide administrators and educators time to implement safety protocols and prepare for the challenges of this upcoming school year, and give my body more time to adjust to this new medication.
7/21/2020 12:41:24	Cynthia	Mason		Overland Park	Schools and sports need to start in person. Parents can choose virtual classes if they prefer. In person is better for most students to learn and sports are important.
7/21/2020 12:41:26	Elaine	Jardon	None	Overland Park	I support delaying the start of school in areas where COVID cases are increasing or remaining the same.
7/21/2020 12:41:36	Caroline (Laine)	Waldron	USD 232	Shawnee	As a high school senior in the USD 232 district, I ask that you please consider the health of the teachers and students as we jump into such an uncertain time with the beginning of school. The schools need more than the time they have now to gather the supplies needed and nail down a strong plan to move forward with. Delaying the start to after Labor Day would satisfy those needs and would make my peers and I more comfortable going into our last year of high school due to the additional safety measures taken. We want to be protected and thought of as well as the teachers and staff in every level school around the country. Please put health first and realize that delaying the start of school would be the safest option.
7/21/2020 12:41:50	TiAnna	Klein	child advocacy center	El Dorado	Do not start school til sept 9. We're not in a good place with virus at this time
7/21/2020 12:42:04	Brenda	Sherman	Skelly	El Dorado	Wearing a mask 🤒 all day will create more problems for the staff and kiddos. It is going to be hard to keep kids from putting their hands on their faces. I believe it will cause more harm then good
7/21/2020 12:42:08	Heather	Harris	Mill Valley High School	Shawnee	Vote no on delaying the opening of schools. Let schools open on time and allow sports and activities as scheduled. Give people the option for online learning but let those that want in person school have that option.

7/21/2020 12:42:18	Shawna	Sterneker		Cunningham	I strongly urge the state BOE to maintain local control of our schools, including start date and other safety measures. One size does NOT fit all. I elected my local school board officials because I knew they would listen to our community and make decisions in the best interest of OUR school. Gov. Kelley doesn't even know our school exists. Our tiny district can (and no doubt WILL) make things work that aren't possible in bigger districts. Please, please, please vote for local control of our schools!
7/21/2020 12:42:23	Erica	Brown		Fort riley	How are the kids with exemptions going to be treated? The same as kids with masks? Or simply secluded? This is the main factor in my decision due to my child having medical problems.
7/21/2020 12:42:25	Chris	Field	Teacher	Salina	This is absolutely ridiculous. It is absolutely asinine that teachers have become this undervalued and under-appreciated! All for political purposes. Makes me sick! You all know that local BOEs can't do anything to counteract this because of all the requirements already put on them by the STATE! so quit acting like it's about local control and our governor's over-reaching. We are not stupid. Thanks for caring so little about our teachers and families.
7/21/2020 12:42:25	Husy	Hein		Augusta KS	Please vote to reopen schools as planned. DO NOT vote to delay school. These children have already been out of school nearly 6 months. Their education is important. Thank you.
7/21/2020 12:42:29	Whitney	Stevens	Kansans	Wichita, KS	Since the CDC is providing data showing it is safe enough to return to school, and is verbally encouraging schools to do so, the postponement until September is not helpful and will not drive significant results. What is the cost/benefit analysis of doing so? If in person guidelines are followed, the CDC determines those are sufficient to minimize spread. Other studies also show there is very little risk to children and most adults, as seen in the updated CDC IFR percentage of 0.05%. The problems of pushing back the school year much outweigh the potential of harm caused by the virus, as deduced by the CDC data. This is not about case count, this is about making a decision based on weighing cost and benefit. The education of children must be held in high regard, and other studies show the lag effect and need for review that more time away from school can cause. Also, what will your decision be if on 9/1/2020 others decide to further postpone? Where does it stop, before we need to address the other issues this causes?
7/21/2020 12:42:31	Jackie	Stancil	Parent and school psych	Lawrence	I support Governor Kelley's order to delay the start of school and hopes the school board does also.
7/21/2020 12:42:31	Niki	Depperschmidt	A Kansas school nurse	Scott City	I agree with delaying opening due to the implementation of measures that need to happen before school related to infection prevention. I am also personally an advocate of masks in schools. More time would allow educational opportunities for families and time for families to obtain masks. I am well aware it will come with challenges, but they are certainly not insurmountable challenges. Unlike the potential permanent damage related to the effects of COVID19.
7/21/2020 12:42:39	Rebecca	Burke		Parsons	I support Laura Kelly's executive order to delay school openings. I encourage you to vote in support to protect our children and our teachers
7/21/2020 12:42:42	Landon	Tucker		Scott City	Our kids need to be in school. Let's make that happen in August and do whatever needs to be done so our kids can get back to normal.
7/21/2020 12:42:42	Brenda	Escalante	My Family	2771 SW Bluestem Dr	I support Governor Kelly's plan of not opening school until after Labor Day. I do not believe we know enough about the long term results of COVID-19. How can we responsibly send children back to school when they will be at risk of getting sick? Can you think of a student who will responsibly social distance for nine hours every day?
7/21/2020 12:42:43	Kim	Blue		Louisburg	Please do not push back the start of school after Labor Day. With all the studies showing children rarely get the virus and even lower statistics on transmitting the virus to adults, I believe the children need to get back to learning. They need the structure school provides and to return to life as normal as possible. Thank you!
7/21/2020 12:42:47	Debra	Whitaker	Parents, Grandparents,	Gardner	Please support Gov. Kelly's mandate!
7/21/2020 12:42:49	Miranda	Schuckman		Wichita	Do not start in person schooling!!!! It's not safe!!!!
7/21/2020 12:42:56	Sally	Elrod	Kckps	Kcks	Have you been in a high school lately. It is so crowded People to People there's no way there's going to be social distancing and the kids in the special needs program are at very high risk and so are the staff members and the teachers.
7/21/2020 12:42:56	Andrea	Fish	USD 411	Lehigh	Hoping for an in person school year!
7/21/2020 12:42:59	Brianna	Schmitz		Kansas City Kansas	I support the delay of schools opening and believe these decisions need to continue to be dictated by the state government (working with school districts, and health departments, of course)

7/21/2020 12:43:00	Mahkayla	Cole	All Geary Schools	Fort Riley	If we're pushing back school and teachers need more time to clean classrooms between periods then how much longer will school days be? Since they will need longer passing periods and at least enough time to teach then will our school days cut into breaks or into next years summer or what? Some people need to pre plan before things happen. But also if we're pushing back school we should at least have stuff to study so we aren't losing that time of learning. I understand you guys need safety but I need my education more then safety no matter where I am.
7/21/2020 12:43:04	Mandy	Price	USD 232	Shawnee	Please start after Labor Day
7/21/2020 12:43:12	Amy	Evans		El Dorado	We need to delay the start of school to give teachers adequate time to prepare!
7/21/2020 12:43:29	Aimee	Landgren	USD #251 Nirth Lyon C	Emporia	As an educator this delay would help us prepare so we can provide the most healthy and safe measure for our students.
7/21/2020 12:43:30	Kayla	Acosta	My family	Hays	Kids needs to be back at school. That being said we cannot expect people and push fear on people with this virus. These kids should not be in masks all day long without a break from it. Sanitizing at least once an hour is crazy! Our bodies were made to work with certain germs. We cant cancel all those out with over sanitization or the moment they are exposed to anything they are going to catch it and struggle to get rid of it. I want my kids back in school and have a sense of normalcy but it is my opinion that the things being implemented will have a bigger negative impact on my kids health than this coronavirus. My family hasnt changed anything (no masks no going out of our way to wash hands or use sanitizer, not avoiding places but also havent gone out of our way to do things out of the norm) since this started and i have no intensions of doing so. We have all remained healthy. This mask facade needs to stop.
7/21/2020 12:43:33	Ryan	Flurry	Parent of elementary stu	Prairie Village	We need to follow the recommendations of KDHE regarding delaying the school start until mitigation measures have had time to demonstrate a drop in case counts. This would provide for the least tumultuous school experience for students.
7/21/2020 12:43:36	Brianna	Foust		Manhattan	Dont delay school
7/21/2020 12:43:41	Kandi	Krebs		Olathe	Remote school til Jan too dangerous
7/21/2020 12:43:42	Ryan	Hoopes	Teacher/coach/parent	Goessel	Please do not allow the governor's order to shut schools down until Sept. 9 pass! She has already made to many demands. It's a slow kill. If we continue to allow her to control our lives it will never stop and only get worse. As a teacher and parent of two, my opinion is these kids NEED to be in school... in person.... as soon as possible! Let the districts decide what is best for their students and community. Thank you for listening and your consideration of our rights as Americans/Kansans.
7/21/2020 12:43:45	Eric	Alquist	USD 379 clay county	Clay center	Please no delay, no masks, let's get back to school , quit fooling around , shut off the TV and let our state get back to work.
7/21/2020 12:43:47	Holly	Manning		Lenexa	Please delay opening and please require make not only for the safety of student but teachers, janitors, administrators, bus drivers, etc. corona isn't a joke and one death as a result of careless administration is too many. Keep our children and our educators safe.
7/21/2020 12:43:56	JESS	NEWTON	USD 368	PAOLA	I PREFER FOR MY CHILDREN TO ATTEND IN-CLASS SCHOOLING WITHOUT DELAY.
7/21/2020 12:43:59	Jane	Culver	USD 443	Dodge City	I feel like a short 2 week delay will give parents, teachers and administration extra time to prepare for the school year. We need to keep in mind the health of our teachers is one of the most important decisions to make. Parents can choose to keep their children home, but teachers will need to show up at work and put their health at risk every day. Please vote to delay school.

					<p>I stated before that I supported EO 20-58, now I'd like to tell you why.</p> <p>I hear the arguments that this decision should be done at a local level, but is each school district self contained. Can you honestly say that 100% of your teachers and staff live and work in the same school district? That 100% of students do not interact with students in another district? If that is the case, then this decision should be left up to the local school boards.</p> <p>However, the truth of the matter is that no school district is self contained. Teachers and staff can live and work in different districts, school boundaries can cross over multiple city boundaries. You can have teachers whose families live in very rural areas and work in urban areas or vice versa. Sports teams from different districts compete against each other. Traditionally schools across multiple rural and urban areas have similar calendars for these reasons, but letting the local board make this decision will result in vastly different opening times. Instead of being a week apart, they could be several weeks apart depending on their individual circumstances. This will create a nightmare scenario for many areas in Kansas.</p> <p>I've also heard arguments that students are needed for planting and harvesting in the Spring and that pushing the opening of schools will somehow push schools into June. Why is that the case? That is where the individual school districts come in. Each district can modify their schools hours or calendars, making small changes to school days to make up time if needed to ensure that their schools get out as planned. Haven't schools been doing that for years when they are hit with massive snow days from a bad winter. My local district has never extended the school year. They adjust. Requiring schools to open a few weeks later does not deprive them of that ability.</p> <p>Kansas schools need the additional time to implement and prepare for the school year. It changes daily. Plans that were in place are having to be modified because of rising cases. Schools are having trouble obtaining the PPE needed to open schools safely. Many teachers and parents do not yet know what their school will look like or what will be required and need time to implement these changes before students return.</p>
7/21/2020 12:44:01	Nikki	Buck-Stewart	Parent	Olathe	
7/21/2020 12:44:02	Jessie	Hoag	I'm a parent.	Yates Center	As a parent, I support this order.
7/21/2020 12:44:02	Mark	T	Usd 475 seitz	Fort riley	No, I don't believe Postponing postponing The school year doesn't lower the risk of Covid. The CDC even states that the risk of children contracting corona virus are the same as adults they aren't a higher risk.
7/21/2020 12:44:03	tracie	miller	kansas youth	lawrence	Youth need sports! allow all kids to get back to youth sports.
7/21/2020 12:44:06	Karen	Lombardi		Shawnee	Please prioritize the lives of children above all else. Please protect our teachers. Please protect all those our children and our teachers come in contact with. Delay school opening! Beyond that, please help schools make the right decision to move fully online this Fall by offering encouragement and material support to do so.
7/21/2020 12:44:08	Samantha	Ross		Lawrence	Please uphold the Governor's executive order. Regardless of whether we go back to school in person or virtually, we NEED this time to prepare. I teach high school and am brand new to this state this year. I'm teaching two classes I've never taught before. We just got new books. With everything up in the air, I haven't been able to adequately prepare for the school year because we have no guidance. Three extra weeks will give the state time to hopefully lower our case numbers and make it safer to return to work. If cases continue to rise, it'll give schools and counties time to figure out how to make virtual learning work and how to help those families that rely on public school to be able to go to work. Please stop making this a partisan issue. If you believe everything should be theft to the districts, then why is there a state level board? This crisis NEEDS centralized leadership—the mess we are in is directly the result of letting each state or locality make their own choices. Please lead, and make a safe, responsible decision for those of us who are the most vulnerable. Listen to the teachers when we ask for what we need.
7/21/2020 12:44:15	Saira	Ugarte		Liberal	As a single mother, I can't afford daycare for my two children. I pick up extra shifts but then that means I have to pay more for daycare. As I know this is for the safety of my children and all other children, but if they have to learn a new lifestyle of wearing a mask and social distancing in school, then what does it matter if it's sooner or later? I am asking to take in consideration to let kids be kids and let them resume school in August.

7/21/2020 12:44:22	Darcy	King	parent in Olathe School	Lenexa	Please uphold the Governor's mandate keeping schools closed until after Labor Day!!!! This is imperative to allow time to get the classrooms and equipment in place to keep our kids AND our staff safe.
7/21/2020 12:44:23	Kimberley	Grell		Ottawa	I am a teacher in an elementary school in Ottawa, Kansas. I was very relieved when Governor Kelly made her order to delay school. I have zero intention of sending my students back for in-person learning right now, but I do not have the option to stay home with them. I am concerned that I will spread the virus to students I work with and their families or it will be spread back to mine. I understand that in-person learning is the best option for the majority of our students and am ready to go back when we have had time to take necessary precautions and put our plan in place for mandatory procedures. At this point our building leadership team meetings have been delayed, due to Governor Kelly's order, and we are further behind in our planning process. We now need those extra weeks to appropriately plan for the mandatory safety requirements in place. I believe it is in our students' and teachers' best interest to wait until after labor day to begin school.
7/21/2020 12:44:24	Virginia	Barnard		Eudora	As a parent and teacher, I 100% agree with delaying the start of school. Thank you for thinking of the safety of our children, teachers and staff. First, Schools and teachers are not ready or prepared to open August; Second, we are still learning about the long-term effects of contracting COVID-19 on all age groups; Third, we need to have a state-wide mask mandate to prevent community spread.
7/21/2020 12:44:27	Laura	Dorsey	Wellsville High School	Wellsville	Allow sports practice even if schools don't open
7/21/2020 12:44:30	Nicole	Reynolds	Olathe public schools	Olathe	The teachers need time to plan and buildings need time to make arrangements for a safe learning environment. Please delay until after Labor Day!
7/21/2020 12:44:32	Steve	Hoeme	Pratt high school parent	Pratt	Let the athletes start their seasons on time!! Youth and high school baseball and basketball leagues have been going on across Kansas all summer with no negative results! You will do much more harm by not allowing fall sports to start on time than this virus ever could! Wake the hell up already and let the school sports go on time!! The voice of all Kansas parents!!
7/21/2020 12:44:33	Shelby	Rebeck	Shawnee Mission School	SHAWNEE	Please adhere to the Governor's order delaying the start of school until no earlier than Sept 9th. It is imperative that schools have time to plan for the necessary changes in order to keep students and staff as safe as possible.
7/21/2020 12:44:36	Timothy	Stout	USD 409	Cummings	I see no benefit of holding off the start of school until after Labor Day. I believe that each day we wait the students fall further behind, especially children in with special needs. No matter what occurs i don't believe it is helping social distancing. I know several high school students who are getting together and not practicing social distancing. They then go home to their family / siblings. I believe at lease if they are in school that they can see their friends and can follow the social distancing guidelines set at school.
7/21/2020 12:44:37	Rachelle	Isley	parents	topeka	please delay the start of the year. Oyr kids deserve tge best preparation for their safety and needs.thank you
7/21/2020 12:44:38	Valerie	McGee		Yates Center	Please do not approve this order as each and every community in Kansas has different needs and desires. I truly believe that people living in the community can make the best decision for their communities.
7/21/2020 12:44:42	April	Hawkins	USD 231	Eudora, KS	As a school librarian in a large middle school in Johnson County, I am very worried about making sure that districts have time to think through all of the safety procedures that will need to be in place to ensure the safety of students, staff and their families. I urge you to support Governor Kelly, Dr. Lee Norman and the other experts that have advised the Governor. It is very important to have a clear, cohesive state-wide plan for Kansas. I have seen the rise in Covid-19 numbers across our state as we reopened too soon and without a cohesive plan for all counties to follow. I am very worried about asymptomatic spread that occurs before a person may even show any symptoms. As this is a new virus, experts are still learning about the long-term health consequences that children and adults who recover from Covid-19 could face for the rest of their life. Experts are still learning more about how the virus is transmitted, possibly through airborne methods. Our building does not have window that open. I think that administrators across the state will need to examine these important issues and put safety measures in now. Please, let us come together as leaders and as Kansans to support Governor Kelly, Dr. Lee Norman, our students, our staff and their families as we create a safe environment for all and fight this virus together.

7/21/2020 12:44:44	Will	Dunn		Lawrence	<p>Support the delay. As a parent of K-12 kids, as a public teacher, and as a resident of the state it is clear that delaying is the prudent, science-based approach. The safety of our young people, their families, and school employees cannot be ignored.</p> <p>We cannot say we need students back in school to get an education and then reject the expertise of the doctors and scientists who represent the fullest extent of what it means to be educated. They warn against reopening in these conditions.</p> <p>This problem only gets defeated as a whole state, not in pieces. This makes it a statewide issue demanding a statewide decision. Pockets of regions doing different things create the gaps by which the virus will maintain its foothold and develop. It is fallacious to assert this EO is an overreach by the governor, whose purview is the safety of every Kansan.</p>
7/21/2020 12:44:48	Troy	Gourley		Lawrence	<p>Kids have been working out together, using safe practices, masks, temperature checks, etc., and school is not in session. No reason to cancel workouts due to postponing school, which shouldn't happen either.</p>
7/21/2020 12:44:50	Kelly	Chapman	Parent of a high school s	Mission	<p>Please support Governor Kelly's Executive Order delaying the reopening of Kansas' schools. COVID cases in our area of the state are increasing. I want my child to be safe at school. I want his teachers and their families to be safe. Thank you for your consideration.</p>
7/21/2020 12:44:51	Jessica	Garriott	Parent	Wichita	<p>Please accept Governor Kelly's EO to delay the start of school. We appreciate her efforts to keep students and staff safe.</p>
7/21/2020 12:44:52	Miranda	Trezise	my family	Medicine Lodge	<p>Our state CANNOT take another slam on education. Mandatory masks for students will greatly decrease enrollment, my children included, which in turn decreases school revenue. Not every county is experiencing a high covid number. Counties should be allowed to choose for their school districts.</p>
7/21/2020 12:44:54	Brooke	Howell		Wichita	<p>I am writing to ask that you vote to allow private schools in Wichita and the State to make their own decisions regarding when to start the school year. Private schools and public schools are not the same and to lump them together in the decision making process is unfair. As a school community, they have been working tirelessly over the summer months to prepare for the August 20th start date. We are prepared with all the necessary precautions, have purchased the necessary supplies and have appropriate plans in place to move forward safely. Our schools have reached out to all staff and families asking for their input and have communicated to the community often to their process along the way. Private schools do not need the extra time to prepare as stated as the reasoning for delaying the start of the school year. WE ARE READY. We ask you to vote accordingly to allow private schools the opportunity to make the best decisions for our school community as they know what is best and the desires of our families.</p> <p>PLEASE VOTE NO, OR AT THE VERY LEAST, ALLOW PRIVATE SCHOOLS TO CHOOSE FOR THEMSELVES.</p> <p>Thank you.</p>
7/21/2020 12:44:54	Tamalee	Baker	Mill Valley High School	Shawnee	<p>I would like to petition that we bring our kids back to school as usual and on time this August.</p>
7/21/2020 12:45:01	Amy	Truhe		Lindsborg	<p>Please delay the opening of schools! Give USD personnel the ability to do their jobs with great preparation and forethought.</p>
7/21/2020 12:45:06	Juaquina	Bowers		Hutchinson	<p>Yes delay the school year</p>
7/21/2020 12:45:08	Joanie	Sheeley	Parent	Overland Park	<p>You can not ask a child to wear masks. What happens to the child if he/she wears a mask for a long period of time? If the child does not have a temperature or cough or sneeze they should not have to wear a mask. It is slim that a child will get covid-19. The teachers can wear shields if they are worried about infection. Masks are ridiculous. One month masks don't help the next month masks are the only way to stop infection. Do you really know? We just need to open up everything. If we get sick we get sick. If we die it was our time to die. If you are worried about infection stay home. Make online a choice but not a rule. I think we are trying to stop something we really have not control of. Why are we pretending we have control?</p>
7/21/2020 12:45:10	Teresa	Markowitz	Self	Lawrence	<p>Please delay opening</p>

7/21/2020 12:45:11	Tacy	Tauschek		Manhattan	Please vote to delay the start of school
7/21/2020 12:45:12	Ashley	Wolf	U.S.D. 320	Manhattan	I would urge Board members to adopt Governor Kelly's mandate of postponing the start of school until after Labor Day. We have had too great an increase in cases to allow for innocent students to be at risk of contracting covid-19 by starting school in mid-August.
7/21/2020 12:45:18	Dustin	Hearlson		Wellington	Open them on time
7/21/2020 12:45:21	Ashlee	Gann	USD 410 Parent	Hillsboro	Our family prefers a regular start date - no delay.
7/21/2020 12:45:23	Stacey	Frederes	My family	Olathe	Please delay school until we've flattened our current curve. It makes no sense to go back right now when we can work to get COVID spread under control and then start.
7/21/2020 12:45:25	Bill	Flynn		Lawrence	If you have a heart, let these kids go back to school and participate in activities. The kids are going crazy not being a structured environment.
7/21/2020 12:45:29	Katie	Hermreck		Paola	All in favor of the later start date.
7/21/2020 12:45:38	Lisa	Hall	Teacher	Salina	If we delay school please adjust the total number of state hours. The affects of making up 21 days of learning is difficult time.
7/21/2020 12:45:41	Amy	Yi	Hillcrest Parent	Lawrence	Please support the EO delaying return to school. Parents need extra time to decide on virtual vs in person option, and schools need to be prepared for the inevitable COVID exposures and procedures. My kids were exposed this summer at Hilltop and had to quarantine for 2 weeks and Hilltop has very stringent measures in place to protect the kids. The exposures will happen.
7/21/2020 12:45:42	Kylie	Wedel	Mize	Shawnee	Please open schools and let sports be played! These kids need this! My kids felt like they learned nothing with online school.
7/21/2020 12:45:43	Kelli	Oreder	Student	Osage City	Not in favor of delay
					<p>Hello,</p> <p>I am writing you as a mother of an 11 year old daughter who will be starting middle school this coming year and a mother of a 15 month old daughter. My daughters future and the future of so many children will be determined by the decision you are about to make. I can't imagine the weight of that, but I am depending on you.</p> <p>The death rate in Kansas for COVID-19 is 0.011% based off of today's statistics from the kdheks.gov website. Also, by looking at the numbers off of the website NO children have died in Kansas from COVID-19. The youngest age of a death is 29 years old. Why would we not be sending our children to school normally?? More cases does NOT equal more deaths.</p> <p>There is NO scientific evidence that children who may be asymptomatic can spread this disease and there is also NO scientific evidence that the wearing of face masks will prevent the spreading of COVID-19! The scientific data has shown that it is rare for children to get COVID-19 and rare for them to transmit it to anyone. A just-released JAMA Pediatrics study flatly states: "Our data indicate that children are at far greater risk of critical illness from influenza than from COVID-19."</p> <p>I want my daughter to go back to school normally and be able to learn and engage with her fellow peers. Anything less than this is a true crime against our children and their physical and emotional well being. NO masks, NO social distancing, NO temperature checks. Our children would not be able to comply with such restrictions and it will be so damaging to them if you make them try.</p> <p>Please, our children need you to cast aside any societal pressures, look at the facts, and make the logical decision for them and for future generations to come.</p>
7/21/2020 12:45:47	Amanda	Dawson		Valley Center	Please vote against delay!
7/21/2020 12:45:55	Zach	Jackson		Salina	Please vote against delay!
7/21/2020 12:46:01	Jennifer	Primm	JP-Ed Education Consul	Wichita KS	Communities in Kansas are now facing substantial community transmission of Covid 19; therefore, our state should implement the plan to delay the start of school in order to slow transmission rates.

7/21/2020 12:46:08	Shann	Dunn-Vigare	I represent my daughter	Topeka	Please, support in-person school for our children who have severe disabilities. Do not delay the start of school any further. We need our children with Rett syndrome and other brain disorders to have hands on education as well as therapy in order for them to thrive (therapy: occupational, physical, and speech and language). Or, at least let parents/primary caregivers of children with severe disabilities make the choice on how their children will participate in receiving an education. I have seen what missing last nine weeks of school (when the 2019-2020 school year abruptly ended early) has done to my it has done to my daughter with Rett syndrome. Please, allow in-person school to start and continue through the whole school year. My daughter needs it!
7/21/2020 12:46:11	George	Brown		Overland Park	Uphold the governors's decision to delay the start of school until Sept.8. Kids need to be in school, but we need the Coronavirus counts to lower in Kansas. We are above the 10% mark and need that to decrease before we out these kids in classrooms. In the corporate world, I have not heard of one meeting that is being held in a conference room with 25 people in it, the meetings are virtual! Why would we put 25 kids in a classroom together that can not accommodate social distancing? Masks are essential on all school aged children! Let's have parents practice the skill of properly wearing masks with their children. Kansas can get this right, we need to hold off a bit, get the positive cases down, get kids back in classrooms and parents back to work!
7/21/2020 12:46:29	Maggie	Underhill		Hill City	I will be a senior this year at Hill City and I do not want my senior year to be taken away. I along with other classmates really struggled with online school. We need to be in school not just for social purposes but to really learn. Students need those daily assignments not weekly assignments. We as student need to be around others. If we're away from people we will never learn how to speak to others. Please think about us seniors who want a proper senior year and allow us to go to school.
7/21/2020 12:46:48	Suzanne	Schielke	Colby public schools/pa	Colby	Please open the schools ASAP with each district making their own decisions based on their local numbers. Do not make masks mandatory and allow sports to take place. Study the science for children and Covid. Teachers that are Hesitant to return must realize they are essential workers
7/21/2020 12:46:51	Rachael	Hoeme	Usd383	Manhattan	I believe that you should vote to uphold governor Kelly's executive order. I am a Kansas school teacher!
7/21/2020 12:46:56	LeAnn	Ostmeyer		Colby	I support Executive Order 20-58 that would delay the start of school until September 9. As a former teacher, I feel that would give schools More time to plan healthy practice procedures and allows schools time to get the materials they need to start the school year safely.
7/21/2020 12:46:58	Brad	Levy		Lawrence	I support delaying the start of the 2020-2021 K-12 School Year.  The delay will give districts additional time to plan and implement changes for greater student and staff safety and spread reduction, which affects not only the students and staff, but the entire community. It also gives more time to make sure proper personal protective equipment, testing capacity, and spread tracing resources are available - all of which are still experiencing shortages.  I don't want to lose students or teachers to Covid-19. And while death rate from Covid-19 among children is low, most of the statistics we have are from times when children have not been indoors in large groups in close proximity for seven hours per day. And if the teachers catch it from the kids, you will be ending up with difficult staffing shortages, which may be particularly hard to address in more rural counties.
7/21/2020 12:47:01	Kaitlyn	Wolkensdorfer		Scott City	School should resume in August. Pushing school to a later date is the last things these children need. We need structure back in our communities and things to be as normal as they can be.
7/21/2020 12:47:05	Krystal	Fowler	Dental field	Topeka	Nothing else is closed why are we punishing our youth who need guidance and structure to thrive. We allow every other part of our lives to go on and hold our future captive unable to grow educationally. The order makes no sense when every other part of life is still going.
7/21/2020 12:47:06	Jennifer	Arndt	USD 253- school nurse	Emporia	We need time to simply prepare and to know where our county is going to be based off low-high restrictions. Knowing where our county is at on the "restrictions" scale is going determine how we open school— this is crucial. Personally, I want our kids back in school, in-person, but we have to do it safely. It can be done, but we need more time to prepare.
7/21/2020 12:47:06	Marcia	Adversalo	Parent and teacher	Wichita/Goddard	I feel that it is critical to keep students and teachers, as well as the families they go home to, safe from exposure to COVID-19. Delaying the start of school has the potential to help lower the numbers. No one wants to hear of a student or teacher dying because of the exposure as we rushed back to start school.

7/21/2020 12:47:07	Becca	Cass	USD 388	Ellis	Please vote NO to upholding the governors executive order. The decision as to when school should start should be up to each individual district based on their individual circumstances. I have a feeling city schools would not be best served if they were forced to abide by what works best for more rural schools. It certainly goes the other way. Each district should make their own decision as to when they are ready to begin, not the governor. Please vote NO.
7/21/2020 12:47:09	L	N		Wichita	Please delay the opening of schools to allow for proper preparation. As a parent and educator I am very concerned. I know many families also concerned. The consideration of all online would also be appreciated so families and educators do not have to make very difficult decisions regarding personal health and safety. Thank you for your hard work and diligence in these extremely difficult times.
7/21/2020 12:47:28	Makaela	Stevens		Scott City	I strongly disagree with delaying the 20-21 K-12 school year in the state of Kansas. The result would be counterintuitive, as these students have been together throughout this past summer for various activities, including sports practices and summer camps. Students have been consistently participating in these sports practices and weights classes since June, and placing a ban on practices and delaying school for a month would do nothing to prevent the virus, as the students have been in close contact for over a month already. Delaying the school year would only give families incentive to go on vacations and leave their residences for a week, causing potential exposure to the virus. Then, by bringing the students back together in a month, they would all be far more susceptible to COVID. By keeping with consistent sports practices and beginning school at the originally scheduled time, students would remain in safe contact with one another for the next month, allowing them to safely begin school, especially in smaller communities like my own, where COVID is not yet a threat in any way.
7/21/2020 12:47:30	Karen&jim	Versailles	Self	Prairie View Kansas	We support Gov Kelly's Delaying of the start to School. It would be irresponsible to send children, teachers and support staff into the schoolhouse setting. The preparation and supplies needed will take time to prepare safely. We support this delay. Karen&jim Versailles prairie view Kansas 67664
7/21/2020 12:47:16	Katie	Graves		Gardner	The kids need to get back into the classroom! Many parents are back to work so their children have been in daycare and summer camps for months. There has not been a spike in cases for children or providers. The kids going back to school is no different that what many have been doing this summer. In addition they should NOT be forced to wear masks. Masks are uncomfortable for adults to wear for hours at a time, even nurses and doctors who have to wear them. I can't imagine making a small elementary aged child wear a mask for 7 or 8 hours a day. There is not enough scientific research done on the affects the masks will have on children. Many doctors and pediatricians have spoken out on the risks to the children if forced to wear masks for long periods of time. Not to mention the frustration and distractions of them wearing them with little to no breaks. Once the masks are touched and adjusted they are essentially worthless, you cannot expect a small child to go the entire day without touching or adjusting their masks. The kids have already suffered enough these past several months, from school being canceled unexpectedly in the spring, not being able to say good bye to teachers and friends, missed field trips, sporting activities, and music concerts, not being able to go swimming at the public pools or seeing their friends this summer, missed family gatherings and events due to lockdowns, the list goes on and on. The kids need a break. They need some sense of normalcy. They need to go back to school, MASK FREE!! They need the structure of the classroom. They need interaction with their friends. If kids can spend the summer in daycares and camps mask free without a spike in cases then kids can return to school mask free.
7/21/2020 12:47:37	Nancy	Jackson	Community / teachers	Robinson	Please uphold the delay of school per Governor Kelly's mandate. We both need to give the districts time to prepare after receiving a thousand pages of recommendations and we need to have the virus better under control before opening the schools. A local community college just tried to have in-person classes and had to switch to virtual after one week because of identified cases. Please give our schools the chance to do this right and be able to keep our students and their teachers in the classrooms!
7/21/2020 12:47:42	Kela	Ortiz	Usd 450	Topeka	Start school normally! Please these kids need it

7/21/2020 12:47:45	Makaela	Stevens		Scott City	I strongly disagree with delaying the 20-21 K-12 school year in the state of Kansas. The result would be counterintuitive, as these students have been together throughout this past summer for various activities, including sports practices and summer camps. Students have been consistently participating in these sports practices and weights classes since June, and placing a ban on practices and delaying school for a month would do nothing to prevent the virus, as the students have been in close contact for over a month already. Delaying the school year would only give families incentive to go on vacations and leave their residences for a week, causing potential exposure to the virus. Then, by bringing the students back together in a month, they would all be far more susceptible to COVID. By keeping with consistent sports practices and beginning school at the originally scheduled time, students would remain in safe contact with one another for the next month, allowing them to safely begin school, especially in smaller communities like my own, where COVID is not yet a threat in any way.
7/21/2020 12:47:53	Brooke	Weeks		Newton	Please delay the reopening of schools. Our community COVID cases are on the rise. Protect our children, staff and families.
7/21/2020 12:47:54	Kristin	Brumm	Self (kids go to ONW)	Olathe	Please, please, please for the love of god and our kids, DON'T have onsite school this year. Kids and teachers will get sick and bring it home to their families. People will die. Those deaths will be on you if you push kids back into school just to please politicians.
7/21/2020 12:47:56	Rebecca	Tidwell	self	wamego	Schools need to be properly funded to protect the teachers and staff and students. Socialization is important for our children. Keeping everyone safe should be the number one priority to consider before opening.
7/21/2020 12:47:58	Donnie	Bradford	Schools	Scott city ks	This COVID is absurd they need to open schools with NO masks! The governors mandate completely out of line!
7/21/2020 12:48:03	Wendy	Murray		Tecumseh	Please allow sports and practices to continue. Summer sports have been allowed all summer. My kids don't play baseball and have been looking forward to football starting.
7/21/2020 12:48:08	Julie	Spieth	Teachers	Thayer	I feel if school is delayed sports MUST be delayed also, otherwise there is no point in delaying for small schools.
7/21/2020 12:48:20	Courtney	Otter	USD497	Lawrence	Please vote in favor of delaying the start of school. Schools need time to plan for the different learning options as well as student and staff safety.
7/21/2020 12:48:26	Amanda	Laney		Wichita	I support keeping schools closed until after labor day.
7/21/2020 12:48:44	James	Hill		Garden City	We do not need to keep everybody on the same schedule. Let the schools that are ready to start and make their own decisions. Kids need athletics more than ever!
7/21/2020 12:48:50	Ann	Smith	Self	Kinsley	Remember when counties overruled the gov on facecoverings? Cases are triple now. Like 85 kids under 1 tested positive in one TX county. You need to think of the kids, staff and parents and not overrule this we are getting over 3K cases per week. Wait and prepare
7/21/2020 12:48:51	Joan	Cales	None	Winfield	Please support Gov Kelley's decision. We need to slow this spread.
7/21/2020 12:48:54	Brooke	Eskilson-Patterson		Lawrence, KS	I fully support this executive order. School districts need more time to ensure quality COVID-19 safety and education plans are in place, as well as more time for infection rates to get down to a safe level for resuming in person classes.
7/21/2020 12:49:16	Jessica	Walls		Wichita	I have a high school student and strongly AGREE with the delay in starting school/school activities after Labor Day.
7/21/2020 12:49:18	Melissa	Triana	USD383- Anthony Midd	Manhattan, KS	Please uphold the order. The time will give our district and staff the time to get the supplies needed to open safely, as well as give teachers needed time in their classrooms to arrange for setup of the mix of in-person and online teaching.
7/21/2020 12:49:27	Deborah	Green		Gardner	Delaying is absurd. Nothing can be accomplished by September 9th that cannot be accomplished by regular start dates. The appropriate course of action vis a vis Covid 19 is to get the younger kids back in school full time ASAP. Admit you can't do anything to make high school worth attending and spend time and effort on a distance learning model that will work for them.
7/21/2020 12:49:32	Kathie	Kersten	USD 255	Kiowa	I am requesting that each school district determine their open safety procedures and open date regarding the governor's response to the corona virus. We live in a small rural community where only 3 people in the entire county have had Covid 19 - no hospitalization and no deaths. The governor,s plan will do our students and staff more harm than good. Kids need to be in school! The psychological and economic impacts are already damaging...please don't,t make it worse!!

7/21/2020 12:49:50	Vanessa	Grubb		Topeka/ Onaga	I believe the upcoming school year should be delayed! Our children cannot be expected to distance themselves, or wear masks for the entire school day. Let the numbers start declining instead of rising before we start sending our children into what I believe is harms way!
7/21/2020 12:49:59	Andrea	Coon		Norwich	I think kids should go back to school on their normal dates.
7/21/2020 12:50:03	Cathy	Dorcas		Emporia	Please uphold Governor Kelly's decision to delay the opening of schools until it is safe. As a teacher, I don't want to experiment with the health and well being of students, teachers, other school employees and communities.
7/21/2020 12:50:06	Chandra	Spears		El Dorado	I support the delay in opening schools and I wish the social distancing was included with the mask ordinance. I hope that the board of education will support and ratify the Governor's executive order keeping Kansas schools closed until after the Labor Day holiday. Not only does this give our communities time to decide to follow public health advice and hopefully reduce the Covid numbers, but it also gives our schools time to solidify plans, to purchase supplies, and for teachers to prepare for the impossible task being placed in front of them.
					We all want our kids back in school. Our kids want to be back in school. Unfortunately what that really means is we want to send our kids to school last December. Before Covid. School as it must be now, will not resemble school in December.
					We are currently asking teachers to plan to teach online. In person. And then some combination of the two. Splitting their efforts in that manner mean they will have no choice but to do a poor job of all of them. Quality virtual education looks different than quality in person education. We have no idea what quality socially distanced education looks like. But certainly it's nothing like the trained and talented teachers of our state learned about in their teacher training programs.
					We can easily give them more time to plan and organize and understand what is being asked of them before they, literally and figuratively, step into the line of fire. The governors executive order does just that!
					Every body that enters the school building endangers the safety of the kids and professionals in that building. Until our community numbers go down we cannot safely expect schools to protect our kids. Governor Kelly's order ensures that kids from all corners of the state get to go to a safe(r) school, regardless of what their local county government is doing to ensure community safety.
					The state board of education has wisely chosen to follow the advice and guidance of trained teaching and school professionals in adopting the navigating change documents. Now you have the opportunity to see some teeth given to the guidance created.
7/21/2020 12:50:11	Rebecca	Gerhardt		Topeka	
					Want my kids to go to school but not if academic time is shortened. With what I have received from the district, there is so much cleaning and focus on social distancing that it shortens what kids are at school for... Academics. They keep music, art, pe, recess and even add social and emotional learning but shorten actual academic lessons in the classroom in order to fit everything in. I vote to hold off in-person school until they are able to spend the same amount of time to academics. If they can't offer that, I vote to delay or start school virtually or just do small groups.
7/21/2020 12:50:12	Emily	Stevens		Derby	
7/21/2020 12:50:41	Gerardo	Perez		Wichita	I agree for the safety of our students and staff, including teachers, bus drivers, and any other person who contributes to our students education.
7/21/2020 12:50:42	robert	sindorf	Parent	Gardner, ks	School needs to start on time and with minimal provisions. Kids are lowest risk level for severe or mortality. Provisions for remote learning should be offered for educators, students, and students with high risk families .
7/21/2020 12:50:43	Brian	Tucker		Altamont	I don't feel that percentage of kansans that are testing positive is high enough to be concerning enough to delay the start of school. I think each school district should be able to come up with their own protection plan and shouldn't be a state mandated decision. Every school district is different and should be allowed to handle planning and decision making that fits their needs best.

7/21/2020 12:50:45	Jennifer	Louk	USD 256 Marmaton Val	Moran	I have been a teacher at USD 256 for 25 years and these are unprecedented times. I am also a mother of 2 school age kids (one who is a senior this year AND lived through missing his Junior year baseball season...) and a grandmother. I really feel that Governor Kelly is trying to make the BEST decision for students and staff by delaying school. This decision should not be a political soap box, it should be about protecting the health of Kansans. Protecting my students, my own family, and MYSELF!! This extra time would give our teachers and administrators TIME to figure out the competencies and plan. This delay would help us all to be better prepared to help our students and keep everyone safe. In our small district ONE death of a student OR faculty would be devastating. Please vote to support Governor Kelly's executive order on delaying school. Thank you for your service and dedication to education.
7/21/2020 12:51:03	Lindsey	Dowell	USD 437	Auburn	I am hoping that the state school board chooses to uphold the Governor's EO. I understand that circumstances from county to county are vastly different, but one thing that is the same is the need for teachers to be able to plan more extensively than we had the opportunity to in the spring. When schools are once again shut down, because I believe this is highly likely, it would be in student's best interest to allow teachers this time to create a viable plan. Please uphold the Governor's Executive Order.
7/21/2020 12:51:08	Kaki	Patterson	Teacher	Hobbs	I think it would be wise to wait until Labor Day to open. There are still too many issues to iron out before start of school.
7/21/2020 12:51:11	C	Kirk		Augusta	I would like school to start sooner rather than later, but if the schools can't be ready then I understand waiting. honestly, I feel like somethings should have been done by now considering schools have known for 4 months this was coming. Why haven't we already made partitions for classrooms or whatever you see these kids needing to maintain social distancing?  I also DO NOT want my children wearing masks 8 hours a day. Both of my children have anxiety and when they wear masks for extended periods of time their pulses race and they get extremely anxious. If it is mandated I may have to pull them out and home school them for their mental health.
7/21/2020 12:51:13	Janna	McConnaughay		Wichita	Please reject the Governor's propose mandate to delay the start of school. Education is ESSENTIAL to our children. Teachers are ESSENTIAL workers just like nurses/doctors/grocery store workers etc. While I applaud our school districts for making the best out of the end of the last school year, our kids haven't had a meaningful education in 6 months. I guarantee EVERY school district has a plan ready to go for the upcoming school year that is best for their local area. Parents can choose to send their kids to school, homeschool or do an online school (there are plenty that don't have residency requirements). As with any ESSENTIAL job, teachers have the option to work in school or find employment elsewhere. I know for a fact that both teachers and paras in our district were offered the option of transferring to the ecademy program if they weren't comfortable being in-class. Our kids are already behind by nine weeks they can't afford to fall behind another 3 weeks. Our tax dollars fund education and you have a duty to ensure that it happens on time. This is a virus, that is not going away. As with other virus's it doesn't have a cure. The MAJORITY of infected persons have little to no symptoms. The death rate is the lowest it's been since March. We cannot shut down our world to cater to a small group of citizens that have underlying conditions. We DESERVE the CHOICE to get our kids back in school on schedule! Vote to REJECT the school delay mandate!
7/21/2020 12:51:13	Carolyn	Davis	My family	Wichita	I think that starting later makes sense and I think a hybrid model makes sense
7/21/2020 12:51:16	Jaden	Scott		Louisburg	Please uphold Governor Kelly's executive order that delays school opening until after Labor Day. That will allow schools to better prepare and hopefully numbers will go down a little by then if people wear masks between now and then. I am a conservative yet I have supported and appreciated Governor Kelly's leadership during this pandemic. I truly believe she's making decisions based on safety. Please do not overturn her.
7/21/2020 12:51:22	Katie	Winder	259	Wichita	No problems with delay. However, why are teachers going back anyway? They will run out of contract days and don't have a place for their own children.

7/21/2020 12:51:22	Emily	Garvey	USD 500- KCKPS	Overland Park	I would like to see the executive order be passed. The safety of our students and families need to be taken seriously. A good majority of the students I work with live with grandparents or multiple family members. I would hate for anyone of our students to accidentally take something home. By passing the order it will give our district leaders time to make plans for keeping both students and staff safe. Our original timeline for starting school would not provide enough time to really think through plans and decide on something that will work for schools of different sizes and age groups. Last year our district had a terrible time getting subs when teachers were sick for just a shot period of time. With Covid 19, I am very concerned that we will have even fewer number of substitute teachers. By passing the order I hope it will also give time to plan for teacher abscesses as well without putting students at a risk for passing the virus around. Thank you for your time and putting in so much thought to keeping our kids safe.
7/21/2020 12:51:24	Anna	Green		Ulysses	As a teacher, I would much rather complete this year virtually and hopefully by the start of next year we can go back to "normal"
7/21/2020 12:51:33	Ashley	Burdick	Parent	Maize	Please support Governor Kelly in delaying the openings of schools. The US Surgeon General supports this as well, as does all science.
7/21/2020 12:51:42	Shae	Rush	USD 231 Gardner-Edge	Gardner	<p>Thank you for all the work you have put into making urgent decisions during this extremely challenging time. I am thankful for you and know your heart is to do what is best for the kids and parents of Kansas.</p> <p>I am wanting to submit my personal opinions as you prepare for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <ul style="list-style-type: none"> <li>•Safe School opening following the Board of Education Return to School Plan</li> <li>•No delay to student participation in school, athletics, and activities.</li> </ul> <p>In response to the Mandate delaying School opening statewide, PLEASE allow the individual districts to make their own decisions as well as encourage each district to begin school as close to normal as possible.</p> <p>This will allow each district to make the decision that is best for its community - but also give your support for the school districts. The situations vary widely across the state and a one size fits all approach does not make sense at all - KIDS NEED TO BE IN SCHOOL... so each district can make their own decision on what is best for their community.</p> <p>Based upon the information available and my personal knowledge from being a full-time pediatric RN at Children's Mercy, I firmly believe we are able to send them safely back to school and activities NOW, or asap. Delaying school for more weeks is absolutely unnecessary. I also believe we do more harm than good if we delay starting school and activities on time. Kid's need normalcy. Kids need structure. Parents need to work. Parents cannot teach their own children academics unless they voluntarily are able and want to do so. We are providing a dis-service for the future of our community, nation, world if we withhold school from our children. Children need to stay active and involved in activities and athletics... this will keep them out of trouble, teach them responsibilities that I have cherished everyday since my younger school years. I am thankful my daughters are not yet in the thick of their academics, but my youngest NEEDS to go to preschool for structure, discipline etc. My husband is physical education teacher, a middle school basketball coach and a highschool football coach - he NEEDS to go to work to teach those kids at all the different age levels important life skills for them to carry on throughout their lives. WE FIRMLY BELIEVE kids need to go back to normal ASAP. Covid is not affecting children and the general population as the news is portraying. Hospitalizations and deaths are not common, at all. The sooner we get back to school, the sooner parents can get back to work, economy with slowly return to normal. Covid is not the only illness in our community, in fact there are illnesses far more</p>
7/21/2020 12:51:42	Rachel	Elyachar		Lenexa	As a both a teacher and a mother, please delay the start of school until cases are lower and there is less evidence of community spread. I'm nervous for my students as well as my family. We can have a successful start to the school year through virtual learning.
7/21/2020 12:52:01	Tami	Farr Smith		Topeka	I support Governor Kelly's decision to delay the start of school. I am concerned about keeping our children safe, but I'm equally concerned about keeping our teachers safe. No one has talked about keeping teachers safe in the discussion to open schools.
7/21/2020 12:52:02	Cindi	Miller	Parent and grandparent	901 Luther	Waaaay to risky with people NOT wearing masks everywhere
7/21/2020 12:52:03	Anna	Green		Ulysses	As a teacher, I would much rather complete this year virtually and hopefully by the start of next year we can go back to "normal"

7/21/2020 12:52:03	Kendra	Hancock		McPherson	I fully support a delay in the school year. Honestly as long as it takes to get the numbers to a reasonably safe infection rate. This is such a small moment in time for our students that I do not believe it is worth risking the health of students but as well as if not especially our staff engaging with them just to not lose any seat hours in the classroom. I am strongly considering homeschooling which would greatly affect how I am able to work and provide for my family but if it comes down to it and the public school system fails me and my children and our community, I will keep my family safe. I have personally witnessed a situation in an at home daycare where not a single child presented a symptom but what started with the daycare provider having the virus, spread to every single parent (that did not have contact with each other) in the same time period. We do not know enough to make definitive statements about children being safe or not spreading to each other or adults. Please put health first.
7/21/2020 12:52:06	D	Ziegler		Kingman	I have no problem with the delayed start. We started after labor day years ago, just didn't have as many days off during the school year.
7/21/2020 12:52:08	Lori	McMillan	My family	Topeka	<p>If you are making this decision over Zoom, you already question the safety of group gatherings. If your safety matters enough to protect in that way, the safety of our school staff should matter enough too.</p> <p>Kids don't have the attention span to follow the rules to keep each other and the staff safe. The liability issues of sending teachers into close quarters with kids, in buildings with poor ventilation, will surely cost us more (lives and settlements) because you can't create a safe work environment out of thin air, should dictate that caution is warranted. There are workplace health and safety laws for a reason. Otherwise, I hope the teachers sue, like Florida. Legal fees are expensive - shouldn't that money be spent on our kids instead? Just because parents need babysitters doesn't dictate that teachers should be the ones to die. That's not what educators are for. They aren't soldiers, and they didn't sign up to be guinea pigs for the experiment this would be, either.</p> <p>My family has socially distanced the heck out of the last 4 months. We are taking this seriously. My husband is a teacher, and high risk. If he has to choose between his health and his job, he will probably quit. Otherwise, if he goes back and catches COVID, I will happily sue his employer (501) until they wish they'd been smart enough to realize that teachers are not expendable.</p>
7/21/2020 12:52:18	Amanda	Aveyard-Elo		Lawrence, KS	We need to delay the start of school so that plans can be made to start safely. Maybe with the delay and people wearing masks more, our numbers will drop and it will be easier to keep everyone safe.
7/21/2020 12:52:22	Amanda	Weatherford	My family	Gardner	I am fine with schools starting after Labor Day but I would like for children to not be required to wear a mask while at their desks.
7/21/2020 12:52:23	Austin	Acton		Wichita	Do not agree with decision to delay school, especially if it pushes back end of school year. Kids need interaction with other kids soon. Requiring temperature taking upon arrival is fine. But no masks needed if healthy. Masks restrict breathing and harm immune system. Open schools at normal time/date. Working parents may not have option of summer camp or alternative care much longer.
7/21/2020 12:52:25	Jody	Lauer		Marysville	These students need to go back to school. They were already deprived of their education last year. Let's not do it to them again this year. And when they are in school they need to be able to focus and not be playing with a mask and sanitizing their hands all day long. Teachers in elementary ages will not get any school work done if they have all these restrictions. If it is not safe for students then get the online school education started up in August. But do not wait till September to make a decision. This is also something that the counties and school officials should decide and not our Governor. Some small counties are not as bad as the heavy populated cities.
7/21/2020 12:52:32	Nicholas	Yeager		Larned	Please do not close schools and sports! Some counties have numbers in the single digits! Leave this up to each school district please! Our children need normalcy - especially for a virus with such a low rate of a bad outcome. H1N1 had 56 MILLION more cases - nothing was shut down.
7/21/2020 12:52:46	Anita	Unruh	Concerned parent of student	Hillsboro	Please delay the start of school until after Labor Day
7/21/2020 12:52:46	Jodi	Murphy	Parent	Norwich, Ks	I think the schools should open for in-person schooling in August.
7/21/2020 12:52:49	Catherine	Ireton		Lenexa, KS	The rate at which people are contracting this disease is even higher than before, and people are considering having their children go to school? We don't even have much of a plan. I think it would be irresponsible and dangerous to not wait for a well-thought out plan at the very least.

7/21/2020 12:52:52	Lisa	Maxfield		Emporia	I agree with the delay of school and/or 100% virtual learning until the case numbers drop. Please don't put our children, teachers and staff at risk.
7/21/2020 12:52:56	L	Loewen		Emporia	There will be no significant difference between starting mid-August like always or after Labor Day. This is a disappointing political move at the expense of our children.
7/21/2020 12:53:10	Rebecca	Duncan		Wakarusa	It makes no sense to open schools when numbers are rising. Schools are not ready for this and people will die if more time isn't given. Although it's not what anyone really wants to hear, I suspect online learning, at least in part, will need to be used at least until January of 2021. It makes no sense to me to open and then have to close again because the virus is running rampant through the building. This is not a political issue. This is a health issue. I expect the state board to place a higher value on student and staff lives than opening in August.
7/21/2020 12:53:26	Jill	Giele	Concerned citizen	Lawrence	Please comply with the Governor's recommendation to wait until after Labor Day to open schools, giving all of us more time to get COVID cases under control. This delay of just a few weeks could save many lives, I sincerely hope you will consider that and do the right thing.
7/21/2020 12:53:28	Jeff	Jones	Resident of Lenexa, KS	Lenexa	In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions.
7/21/2020 12:53:31	Beverly	Morrison	Myself	Lawrence	It has been proven multiple times that Covid does not affect children. Remaining at home causes long term damage to the child due to lack of education, social skills. The parents inability to work due to their children being home causes long term damage to the family emotionally, mentally and financially.
7/21/2020 12:53:36	Kaitlyn	Schamberger	Hoxie Kansas	Hoxie Kansas	A one size fits all approach does not meet the needs of northwest Kansas. Delaying schools based on fear alone and not the actual numbers in northwest Kansas is going to hinder the children's education more than anything. Their well-being is what we should be worried about. Look at the numbers look at the caseload. What happens in Topeka or Kansas City or Wichita doesn't make sense for rural northwest Kansas.
7/21/2020 12:53:37	Bradley	Rose		Kansas City, KS	<p>As a teacher in Kansas, parent with a student in Kansas schools, and as a resident of Kansas, I have been very disappointed by the inability of fellow Kansans to take personal and local responsibility to stop the spread of COVID-19. I want nothing more than for my daughter to have a "normal" school experience that fulfills her social and intellectual needs. I want nothing more than to see my own students face-to-face and to give them the best and full education they deserve. However, I value their life and health and the lives and health of my fellow educators more than my desire to rush into forcing a "normal" where normal is not currently possible.</p> <p>Some State Board of Education members have suggested in their individual comments thus far that this is a "local decision" to be made by local school boards. This would usually be appropriate when local boards would be addressing strictly local issues. The reality is, though, that we are dealing with a GLOBAL pandemic that does not understand country borders, state borders, let alone individual school districts. In the past several months, it has been this "local" control (or lack thereof) that has led to a significant rise in cases of the virus in our state and has put many lives at risk.</p> <p>The other inevitability if schools were to open at their usual time is spread would occur and districts would then have to shut down after having started. The number of cases is too high to fool ourselves into thinking this would not happen. Look at what happened at multiple camps this past summer. Closing after rushing an opening would put a significantly greater inconvenience onto parents with the unpredictability of the starts and stops of in-person learning due to the virus. If we were to delay the opening of schools and numbers were to lower to a more track-able amount, we would be more likely to keep schools open and lighten the load for parents.</p> <p>For those Board Members who choose to vote against Governor Kelly's reasonable, realistic, and sound Executive Order, I will hold you personally responsible for those whose lives are put in danger (especially any lives lost) and for delaying our state's ability to dampen the spread of this virus. If schools worsen the spread after rushing openings, I will work in whatever part of the state is necessary to ensure you are not re-elected. You have a duty and responsibility to prioritize and make decisions that protect the needs, health, and well-being of Kansas students and educators and use the evidence and expertise of those who understand how viruses actually work ahead of emotional and political pressure from those that are only thinking about themselves and their own situations. I know your decision will not be</p>

7/21/2020 12:53:38	Clelia	McCrary	ESSDACK and also rural	Sterling, Kansas	I personally think school calendars should be left up to the local school district based upon the community needs it sees instead of a one-size-fits-all statewide approach. COVID19 will spike at different times in the 105 different counties of Kansas. Schools and their communities need the continued local flexibility to address what they see needed to be able to still deliver the 1,116 hours of required instruction as they see when and where FOR THEIR INDIVIDUAL SCHOOL DISTRICTS. We may need to also consider using some additional community spaces in order to allow school districts to put in place the social distancing spacing recommended by CDC. There are faith-based buildings or community centers in our communities that are idle most of the school week that might provide a solution to some temporary increased space. Again, let's also focus on making sure that communities have the broadband capability to provide virtual learning where needed and supported by sound educational research (virtual learning for below 4th grade does not provide consistently good results if you examine the research findings). We need to use this pandemic to create solutions for more quality learning diversity for students for the future no matter where they live. In 2020, we should not be providing education that some students can access and some can not due to their lack of internet access or access to technology devices and if public education is supposed to be available to all students, it should be accessible to all students instead of some getting media-rich learning while others are handed a stack of paper that was not completed when we had the physical school closure this spring. In addition, since colleges offer summer school for teachers in June and July who are trying to get graduate degrees or further schooling, then learning access for teachers also becomes a problem if schools statewide do not complete their year until sometime in June. We also need to be consistent with our social distancing message: if we need to provide social distancing from 8-3ish, then extracurricular activities should also be limited to ones that can also adhere to the social distancing health standards. I know that postponing contact sports like football until later will not be popular but we need to be consistent with our messages we send students, parents, and the communities. I recommend voting for LOCAL OPTION DECISION MAKING as the state board votes and then use our gap findings (broadband, internet, reduced career and industry hands on learning, etc.) to plan for better solutions for our future as Kansans over time. Thank you for your service with the goal to create a better future for Kansas through a well-developed and educated Kansas citizenry that indeed can also meet the needs of business and industry!
7/21/2020 12:53:44	Leann	Urbanek	Herington USD 487	Herington	My kids need social interaction and thrive in a classroom setting. Although they did well with remote learning it is not the same. They did not get as much out of it. Also they are both extremely active in school activities and the last 6 months had been awful. We are fine with masks and social distancing and all the other recommendations but kids need the social interaction both in the classroom and in a team setting.
7/21/2020 12:53:46	Sarah	Tidwell		Kansas City, KS	Please consider the safety of not only the students and their families but also the safety of my teaching staff and our families. We all want kids to come back to school, we miss seeing them and the relationships we create with them, but given time and a plan we can do this online, in small groups or other forms to accomplish all of these things. We love our kids and will find a way to create relationships and learning opportunities in a safe way for all of our community.
7/21/2020 12:53:46	Jacob	Davis	Andover central high	Wichita	I'm scared to go back to school and catch the rona.
7/21/2020 12:53:50	Ashley	Kirkham	Marshall County School	Marysville	As a parent of a young child all I ask is that this is handled as safely as possible. I know school is critical to these children in so many different ways but all I can ask is that you don't rush either way because of pressure but consider the safety of students, teachers, faculty and the families of all involved.
7/21/2020 12:53:51	Libby	Tison	USD 259 - Caldwell Ele	Wichita	Each morning at Caldwell, we repeat "Safekeeper Statements." One phrase comes from the staff to the students, "I will keep you safe." The students then reply, "I will help you keep me safe." Please support the Governor in the delay of opening schools so we can confidently make those statements when we return. With the virus running rampant in Wichita, I fear for the safety of our students, families, and staff. All of us want to return to normal, but what we are returning to will be far from normal. District staff and families could use the extra time to prepare ourselves for what will need to be new routines and safety measures. Thank you for your consideration.

7/21/2020 12:53:59	Heather	Augustine		Manhattan, KS	Please vote yes to delay school until Labor Day. As a teacher, I am overwhelmed to the point of detriment to my mental health about preparing for school in a different way than any of my 24 previous years of teaching. To effectively provide the best quality education for my students, the extra time to fully learn new systems of instruction is vital. This time would also allow schools to secure even better resources for cleaning and safety. None of us expected the virus to still be this prevalent and getting worse as school approaches. In order to further ensure safety of students and staff, waiting until after Labor Day allows for time to complete research on best practices for spread prevention. The relief I felt when the governor proposed this idea was immense. It was the first sense of peace and confidence that I have had in months. Please consider not only the physical health but the mental toll that fear and unpreparedness takes. Thank you.
7/21/2020 12:54:12	Ashleigh	Cornelius	USD 253- Village Elem	Emporia	Please uphold the governor's order to delay the start of school until after Labor Day. Our students and staff deserve to be granted the grace to prepare in light of the latest developments. I'm pregnant and do not feel schools are safe for myself, let alone others.
7/21/2020 12:54:14	Pamela	Chamberlain	parent of school child	Salina, KS	I understand the concerns, but I feel school needs to start on time and not be delayed. Our school district had made plans to open when scheduled and had plans already in place to wear masks, social distance and do what they felt best for the students and staff. They have worked hard all summer to come up with plans so that kids could start back to school. It has been way too long and this needs to happen. Corona is not going away and we need to start getting life back to the new normal.
7/21/2020 12:54:21	Peyton	Wheat	Free State High school	Lawrence	Sports should be allowed to practice and play even if schools not in session. We can not lose another season. The seniors need this I know a lot of people who can have a break out year and end up playing college ball. My brother is in the situation and I want the best for him. There are students who only show up and do school because of sports. Please let us play.
7/21/2020 12:54:42	Sue	Dewan	Self	Wichita	Keep all schools closed until after Labor Day AT LEAST! Then open on a county by county or city by city basis. Wichita Schools should not open for actual classes until the city gets the virus back under control. Use virtual school in Wichita until then.
7/21/2020 12:54:51	Angela	Clevenger	Parent/school nurse	Leawood	I want my 2 children back in school on the August start date. As a school nurse I have done endless research and every study says that it is healthier, and safe for children to be back in school. The Governor brought up a study that South Korea did that said children pass Covid. I read the study and it was a poorly designed study, one that people would throw out. Of course, it was the only one she could find that agreed with her. The American Academy of Pediatrics says children are low risk and need to go to school. Two more studies just released from Germany and Ireland on school children says children are low risk and need to be in school. Please vote to override the governor's mandate and let our children return to school on the planned start date.
7/21/2020 12:54:59	merissa	medbury		bel aire	I want my kids back in school. mask me be worn but also s idk sometimes down. sanitize and wash hands. for the mental aspect my kids need in person
7/21/2020 12:55:09	Rachael	Rico	USD466	Scott City	Our schools need to start on time and students and staff should be able to opt out of wearing a mask. It should be a choice and to wear or not to wear a mask should be acceptable. I believe that if it is mandatory many families in the community WILL homeschool their children.
7/21/2020 12:55:12	Cassie	Denning		Wichita	Schools should absolutely remain closed for now. With the way our numbers are riding this shouldn't even be in question. We have no information on how this virus could affect children long term, even if initially they have less risk. Also, why are we willing to sacrifice our teachers and staff for the sake of a "normal" year. There is nothing normal about this school year. Opening schools when are numbers are up and rising is only going to result in trauma for our kids. Watching their beloved teachers get sick and possibly die is going to be much worse than delaying school not just until after labor day, but until our numbers are down. Kids will recover just fine from some time out of school, they .ay not result in the trauma caused from opening when our numbers are going up and out of control.
7/21/2020 12:55:16	Stephanie	Katzer	USD497	Lawrence	I have submitted my thoughts regarding the opening date of school. We were asked to share our thoughts about summer sports conditioning. If they continue to practice as they are now, with safety procedures in place and social distancing during conditioning-no contact, I support this as there is a balance with mental health as well.

7/21/2020 12:55:19	Gail	Kliewer		Hillsboro	I am a mathematics teacher in a rural district. Please support Governor Kelly's executive order to delay the start of school until Sept. 9. We need the additional time to ensure safety for staff and students and to prepare well to teach our content in multiple formats.
7/21/2020 12:55:24	Jonathan	Callison	none	Prairie Village	I absolutely agree with the Governor and thank her for doing the right thing. Hong Kong, Israel, Australia - all experienced the mistake of opening their schools before getting the infection rate under control. I would also argue that this virus is so infectious that all areas will suffer if any relax their masking and social distancing, including opening up their schools. There is simply too much exchange between our various areas to argue that some don't need to follow the same precautions. After all, when, not if, when the virus comes to their local, their serious cases will be sent to our metropolitan health centers - increasing the burden on them when they may already be seriously overtaxed by the present surge in our populous counties. We are all in this together whether we much like it or not and should act accordingly.
7/21/2020 12:55:25	Tracey	Kastens	I'm a parent and a full-ti	Lawrencie	I fully support the governor's order to delay in-person schooling until the COVID curve has consistently trended downward. The amount of illnesses and deaths that we will see among both students and staff as a result of opening too early cannot be overlooked nor justified. Requiring that students, teachers, and other school employees report back when it is unsafe to do so is irresponsible and will do irreparable damage to the health of so many, in both the short term and long term. We must value human life above all else in this situation; academics can be recovered eventually, life cannot.
7/21/2020 12:55:26	Kim	Criswell	I am a parent and a kind	Wilson	I am in agreement with opening schools after Labor Day. Let's let schools use this time to adequately prepare to comply with recommendations, but then let's GET SCHOOLS OPEN. Our students need this. Other businesses have successfully opened, schools can also, especially in counties such as mine that currently have very minimal numbers of active cases. I am in my 50s and have had prior complications (bilateral pulmonary embolisms) after the flu, but I think we can open safely and I think that is what our kids deserve! Thank you.
7/21/2020 12:55:27	Jimmie	Booth	Praire View Elementary	Liberal	School should be opened.
7/21/2020 12:55:34	Nora	Perry		Shawnee	I agree with Governor Kelly and delaying the start of schools
7/21/2020 12:55:35	Donna	Hunt	BVNW	Overland Park	As long as safety measures are taken, these kids need and are ready to get back to school.
7/21/2020 12:55:36	Katie	Burke		Olathe	I think the delay in school starting is the right decision. As a veteran first grade teacher I know we all want kids back in school. However, with the numbers on the rise it makes me nervous to go back in the mass group setting to school. Teachers will have contact with all the kids and everyone that those kids have had contact with as well. Thank you for taking our safety into consideration when making this decision. I also would like for the masks to be required for everyone k-12 with staff as well! Keep Kansas safe.
7/21/2020 12:55:41	Patricia	Forsythe	No organization, just a n	Emporia	I believe students should be allowed to attend school as normal in the normal time frame. Children are at low risk for the disease, and those who may be at higher risk could have the option of staying home. I believe we need to consider the whole child, including social-emotional health as well as food security and safety. The shutdown in the Spring was difficult on parents and children. It will be more so as parents are returning to the workforce and trying to provide for their family's needs. Consider more than the virus, please. It's not impacting children enough to deny all children the right to be in school.

7/21/2020 12:55:44	Shawna	Blanka		St. Francis	<p>This should not be a state wide decision. This is why we have a State Board of Education and local school boards who can make the best decision for their county. These local entities are also collaborating with the County Medical officer, County Commissioners and County Health Nurse. The Covid numbers show no reason to delay school any longer. The kids have been together all summer and having activities and there has been no issue. It is only hurting the kids and their education. It has already been halted this spring and there is no implications that these kids can't get back in school and activities including sports! If people have concerns and don't want to send their kids fine but a majority are ready for school. The numbers of kids having depression, getting into trouble with drugs and alcohol and thinking of suicide are only going to continue to rise, so is that what we want for our KIDS - I don't think so. It shows that kids are not at a high risk for Covid so why keep punishing the kids?</p> <p>They should not be made to wear a mask either, again leave up to local authorities.</p> <p>We need to move on and show the media we are not going to continue to live in 'fear' of a new virus that is showing very low mortality rates now and low hospitalizations as it continues.</p> <p>Our country was founded on ethics, freedom, In God we trust and many people have lost their lives fighting for this and that is not what is being represented right now by our state government!</p>
7/21/2020 12:55:45	Dustin	Dade	Parent of a student	Olathe	<p>Dear State Board of Education,</p> <p>My family is writing to you today to urge you to vote to support the Governor's delay to the school year. We are at a pivotal moment in our state where cases are still climbing at an alarming rate. There is currently not enough time between now and the projected start of many school districts to safely open schools. The Governor's plan is backed by the Secretary of Health and Environment Dr. Lee Norman. He stated last week that a minimum of 28 days is what we need to get through 2 incubation periods of this disease. That is how we can lower the numbers, by working hard for the next 28 days to get the numbers down.</p> <p>A delay is not a closure of schools. It is a chance to save lives and stop this terrible disease. Yes, many people that get the disease recover without serious injury. However, it is transmissible to someone who may get seriously ill or worse, die. No child should be placed in that situation. One, where they may get seriously sick, or two, pass it on to someone they know (a teacher) or love (parent or grandparent) who gets very ill or perhaps dies. All of that is easily preventable by delaying school by a few weeks while the rest of the state works to squelch the disease using proven methods of socially distancing themselves, wearing masks and clean hygiene.</p> <p>We did this in the Spring and we can do this again now. But we need the time to make it work. This is not a political plea, it is a medical and societal plea. Give everyone the chance to do the right thing and get the cases under control. Save lives by giving everyone the easiest solution, time.</p> <p>Thank you,</p> <p>Dustin and Tonya Dade</p>
7/21/2020 12:55:48	Michelle	Parkman	Public school children	Emporia	<p>Please keep them closed. We above everything else must keep our children safe. Children can die from this. We have to do everything in our power to keep our babies safe.</p>

					<p>I would prefer the school year start on time for several reasons. My comments are specific to large high schools across the state.</p> <p>1) Students taking courses through partnered community colleges need to get going. The community colleges are starting classes in August.</p> <p>2) Waiting until Sept 8 to start school will result in possibly fewer breaks through out the year to try to finish on time.</p> <p>3) It's pretty much a given that the schools in "red" zones now are not going to significantly improve anytime soon, so online is the only option and let's get going. School building openings should be on a county by county basis with state guidelines/criteria. If there is community transmission in a school district's boundaries, then its courses would be online until transmission is under control. Turn the schools into supervised areas where kids that need free lunch and internet can go, strictly reduce the numbers and provide needed services that some kids have been needing since March 13.</p> <p>4) Temperature readings of 3000+ high school students on the way in each morning, HOW?</p> <p>5) Social distancing everywhere but the classroom, HOW?</p>
7/21/2020 12:55:51	Jenna	Means		Lenexa	Between logistics and reality, opening up large high school buildings in red zone counties is not a good idea.
7/21/2020 12:55:54	Rita	Engle	Grandmothers	Wichita	Postponing in classroom education is wise at this time. Reassessment can then be done and next actions decided. Having plans in place for online school for this semester would be smart. Then possibly a vaccine will be available for next semester.
7/21/2020 12:56:02	Julie	Conard	Usd 467	Leoti	I think delaying the start date fir school is fine, but we must continue to allow athletes to train and hold camps, which is what's they've been doing across the state all summer. To delay any fall sports until sept 9 basically means no sports, and that is a huge fear!!! I would also like to allow local health depts control as my county only has 1 case, just confirmed yesterday. We are no Sedgwick or Wyandotte counties, so a one size fits all policy simply does not work. We are ready to return face to face, with no masks in our county.
7/21/2020 12:56:04	Jessica	Larsen	USD 497, employee and	Lawrence	Please support the Governor's initiative to keep us all safe amidst the COVID pandemic. She has been an amazing leader, serving in the best interest of saving lives. Leaving it to local communities will only exacerbate what we are seeing at the federal level with a lack of coordination, communication, and planning - it continue to spread and we will be unprepared for the consequences.
7/21/2020 12:56:16	Pamela	Garcia		Newton	I am for delaying the upcoming school year.
7/21/2020 12:56:25	Jennifer	Enright	USD 259	Wichita	Please support the delaying of opening schools.
7/21/2020 12:56:43	Nathan	Lawson	dighton elementary	Dighton	I personally do think it would benefit us more to start school after Labor Day. I think there is too much risk at this moment to be able to allow teachers and kids to be in the building together . The costs and preparations would be rushed if we decided to start in August and not everyone and district could be ready by then in my opinion . I'm a special education teacher and know my students need one in one , but the risk is far greater to start too soon
7/21/2020 12:56:48	Bailey	Schmidt	USD 456	Emporia	Please delay the start of school, I have a young daughter and newborn daughter to keep safe at home until we can get proper PPE for teachers. I am a second grade teacher in a small district.
7/21/2020 12:56:51	Ella	Burrows		Satanta, Kansas	My name is Ella Burrows and I am a senior at Satanta High School. (IA) Although this is my last year of high school and would love for it to be as normal as possible, I believe that Governor Kelly's executive order should stay in place. School districts need this extra time to prepare and plan for a safe return to school. Additionally, by overruling the order, you would instead be taking another week of much needed planning time for schools because of all the changes and uncertainty administrators our faces with. Kansans need consistency and they need be informed of exactly what will be happening with schools this year.

7/21/2020 12:56:56	Mary	Reeves		SEDAN	I feel that the decision to open school should be at a local level. We have a small school in SE Kansas that has a small number of students who attend. Chautauqua county has only had 5 cases of covid 19. I feel that we can safely start school and sports without putting our students and staff at risk
7/21/2020 12:56:57	Elisa	Gagnon		Overland Park	Schools should be open when it is safe and when it will not contribute to the rise of this terrible virus. Even if children do not get sick from the virus, it is proven that staff will. In order to open, everyone must commit to doing what we have to do to reverse the curve. Only then can the schools safely open. Look at countries that initially managed things very differently—New Zealand comes to mind but there are others—and learn from what they did. when Kansas lead the way last spring, we were ahead of the curve, controlling the spread, learning as we went, reacting to new information. Then the legislature decided that safety of the many was less important than scoring political points. We as a community, were forced to open back up. Immediately we could see that there is a general lack of empathy or concern for others. How many times do we have to see messages from people who blithely went out in public, mixed and mingled with no regard for spacing or simple precautions, then were laid low by the virus? “Oh, I didn’t realize it could be this bad,” is no longer an acceptable reaction to contributing to the spread of Covid-19.
7/21/2020 12:57:00	Kirsten	Larsen	Schroeder Larsen Law, P	Overland Park	In your post, you ask why not question everything. Questioning is how we will solve this problem, but only if we are logical, careful, and follow the evidence to better understandings every chance we get. Following red herrings simply because they support what we want to be true will only extend this situation. Focusing on questions that serve only to blame rather than solve, should not be the priority. At this point where and how this virus came from is much less important than responding to the situation, healing and protecting our citizens, and preparing ourselves to react more swiftly and effectively the next time. Only then should we be worried about assigning blame to the source of the problem.
7/21/2020 12:57:04	Daniel	Minde	Education	Liberal	Everyone agrees that the restricting the flow of people to work and to school is detrimental to our economy, but the economy, as it looked before, should be a lesser priority, than having safe healthy citizens within it. As has been said before, dead citizens don’t do much for the economy. Expecting schools to accept so much risk without the right expectations, protective gear and training, just so parents can get back to work is irresponsible. We are so interconnected there is no such thing as “back to normal” and confining the outbreaks. One sick child can ravage a school. The traditional school day keeps too many kids confined in rooms without access to fresh air. The infected air is circulated for hours in old HVAC systems. The sick children, may have mild symptoms themselves, but that doesn’t prevent them from spreading it their families and their teachers. Those families take it to their workplaces. The teachers spread it to their families. And now we call in substitutes, if any can be found. On and on, and in a few weeks, the economy that was prioritized is shut down anyway. Who benefits from that approach?
7/21/2020 12:57:07	Lisa	Bass		Hutchinson	Our schools are cornerstones of communities. Delaying the start of school and letting schools customize solutions that
7/21/2020 12:57:14	JoAnna	Rush	Myself—parent of 4 sch	Roeland Park	I think we need to delay the opening of schools.
7/21/2020 12:57:15	Stacy	Campbell	USD232	Shawnee	Please do what Laura Kelly said and delay starting school. No reason it should even be in your hands. #IStandWithLauraKelly
					Let each school board and community decide when to begin the school year. Please let schools begin in August. Smaller schools and areas that have little impact should be able to start in August. They’ve been researching and making plans. For parents and teachers who are worried, they have the freedom to opt in for virtual for the semester (in Johnson county). As is very evident in our great state, one size does not fit all. Please let local communities, school districts and private schools decide on the plans that best fit their community, students and teachers. Children’s Mercy has released information showing that kids are not as likely to get or transmit Covid 19. Those who do get it are often asymptomatic or get a light case. Children’s mercy and many other doctors, including pediatricians, are encouraging the return to school.
					Please keep the decision making to individual school districts.

7/21/2020 12:57:21	Sarah	Rastogi	Leawood	<p>Delaying school till after Labor Day does nothing. Other businesses and the hospitals have been operating for months and figured out things and schools can and will too. All moving the date till Sept does is move us closer to cold and flu season where students will miss more and schools may be required to shut down. Please reconsider the governors request. This is becoming way too political. I feel like the governor is trying to make a political move and not a scientific move. Kids need school!!</p> <p>-concerned parent and pediatrician</p>
7/21/2020 12:57:22	Catherine	Gordon	Horton	<p>Please support the executive order, this will afford the schools valuable time to delve into the navigating change document and plan for student success.</p> <p>I am writing to request the Board support Governor Keny's executive order to delay the opening of K-12 school. I am a mother of two children, ages 10 and 13 who attend Blue Valley public schools as well as a 4 year old who attends private preschool. Our family is comprised of numerous front line physicians in Kansas City who are daily confronting the horrific realities of this virus and following the research as it rapidly unfolds.</p> <p>We all want our children back in school, but we all also agree the safety of our children, parents, staff and the community at large is paramount. The decision to reopen schools should not be influenced by political affiliation. It should be guided by science and research, which continue to rapidly evolve.</p> <p>This virus is too new, and there is much we still do not know. Why do some people get really sick, but others do not? Exactly how transmissible and deadly is the virus? How many people have actually been infected? What treatments are most effective? What are the long-term complications of the virus? How long does immunity last? We need answers to these and so many other fundamental questions before putting the lives of our children, teachers and families at risk.</p> <p>The intensive, international effort being put into studying this disease is unprecedented. Science will get us out of this pandemic, but we need to exercise patience while researchers work with great urgency to find the answers.</p> <p>Based on early research findings, some have argued that children are less likely to spread and fall seriously ill from this disease. Compelling new research from South Korea just this week indicates that while children younger than 10 transmit the virus half as often as adults, those between the ages of 10 and 19 spread it at least as well as adults. In fact, those in middle and high school were even more likely to infect others than adults were. These findings suggest that as schools reopen, communities will see clusters of infection take root that include children of all ages. And, while the incidence of serious illness among younger people may be lower on the whole (though there are numerous reported incidences of death from multi-system inflammatory syndrome in children), they are not a bubbled population and can set off a chain of transmission within their households and communities.</p>
7/21/2020 12:57:29	Angela	Sharma	Overland Park	<p>Moreover, the more widely the virus is circulating in a community, the riskier it is to open schools. Currently, there are</p>
7/21/2020 12:57:31	Suzanne	Bacon	South Haven, KS	<p>Please allow schools to open as scheduled, do NOT wait. Not all schools are the same and local citizens and boards can decide best methods to do so, with KSDE's guidance document. We are approaching doing more harm, emotionally and educationally, to our children. We need to let ourselves and our children get back to living life, and be cautious safe, but not live in fear.</p>
7/21/2020 12:57:32	Maureen	Peterson	Wichita	<p>There is MORE than enough scientific proof that a huge majority of children do not carry the viral load to infect others or get gravely I'll themselves.</p> <p>You don't shut down Or have mandates during the flu season when children DO become gravely ill and DO pass it to adults.</p> <p>Use science not fear.</p> <p>This is ridiculous.</p> <p>100 days into this pandemic and forcing children to wear masks 8 hours a day (wait for those health issues), or anyone else is ridiculous. Research for yourselves instead of appointed health officials no one voted and, quite frankly, has been wrong more often than a meteorologist.</p>

7/21/2020 12:57:40	Ben	Faunce		Olathe	As an educator, I feel opening schools while our state sees a surge in coved cases is irresponsible and will set us on a course for an even longer and more devastating epidemic. Please consider postponing opening for the sake of all Kansans. Thank you.
7/21/2020 12:57:41	Holly	Martin	N/A	Basehor	Schools need to have a plan developed to open schools safely (on time), with options for parents who aren't ready to send their kids back to in-person class. We've had since March to plan for this, three additional weeks will make zero difference, other than allowing more time for planning. The planning should already be done. We know cases will continue to increase. Finalize the plans and get them distributed to parents and teachers. While I would prefer in-person class, if the answer is to conduct virtual classes, get the plan finalized AND GET IT COMMUNICATED. I'd rather know we are transitioning to virtual school now and have five weeks to develop a plan for my three kids than continue to "wait and see"...it's clear Covid is here and here to stay for the foreseeable future. SOMEONE MAKE A DECISION. Also, I strongly feel like fall sports should start on time. Even with virtual school sports should be allowed to continue. Let the districts develop plans to hold safe practices and competition. My son has been playing in baseball tournaments every weekend since the first of June. We've traveled all over town and been around large groups of people. We've practiced social distancing and haven't had a single issue. I'm unaware of a single incident of a player or team having to stop playing because of illness or exposure. Has it happened? Probably. However, not to the extent of even hearing about it, let alone stopping everyone from playing. Governor Kelly just announced her intent to delay school and sports, yet my kids will attend football camp, basketball camp, and strength and conditioning this week. It makes ZERO sense. Let's let fact drive decision making, not fear.
7/21/2020 12:57:42	Iva Lee	Colgan		Olathe	<p>I am writing to ask you to support the delay of the start of school for this year to:</p> <ul style="list-style-type: none"> <li>- give time for more preparation</li> <li>- give time to try to get case numbers to trend downward</li> </ul> <p>I am a retired elementary school principal who still knows and loves many children and teachers. I also am a grandmother with two school-aged children here in Kansas. I cannot help but be worried for all of them.</p> <p>I am also remembering how, last Spring when families had to begin to support their students with learning at home, everyone said:</p> <ul style="list-style-type: none"> <li>- Teachers are wonderful!</li> <li>- Teachers are my heroes!</li> <li>- We don't pay them enough!</li> <li>- Whatever they put on the school supply list next fall, I'll buy it!!!</li> <li>- How do they even do this day after day?</li> </ul> <p>Now is our chance to show them we meant those things. We must recognize that we are in the middle of a world-wide pandemic. The world, as we knew it, is gone.</p> <p>I know you are hearing a lot of voices on this subject. I admit that I have not paid much attention to the State BOE, but I am paying attention now.</p> <p>Thank you,  Iva Lee Colgan, Ed.D.  13913 W. 150th Terrace  Olathe, KS. 66062</p>

7/21/2020 12:57:49	Maria	Egging	Skyline School USD 438	Pratt	My frustration comes that we are being forced into a one size fits all approach. What the right public policy in Kansas City is not what's right in our smaller communities like Pratt, Greensburg, Cunningham, St. John, Stafford and so many others. What is the right precautions for someone who is 70 is not a feasible precaution for a healthy 7 year old. I'm beyond frustrated that in trying to protect a demographic that can be narrowed down we are sacrificing another vulnerable group among us, many who are hiding in the cracks without anyone able to hear their cry's and plees... OUR CHILDREN. Children whom will recover from this virus in less than a week, if they even feel sick at all. But in our response, thousands of children, if not millions will have implications that last a lifetime. Are there some outliers that don't seem to follow the data of young and healthy cases that still fall hard or have complications? Absolutely, but these same outliers happen with the flu, strep throat and other viruses we have accepted as part of life. Please let our children go BACK TO SCHOOL.
7/21/2020 12:57:50	Paula	McKenna	School re-opening	Selden	I want schools to open but you have to mandate guidelines so that ALL children can return to school. Social distancing, sanitizing, and requirements to wash hands and use hand sanitizer at a minimum, if we don't want business to have to shut down again, are not too much to ask. Also, we have to make theses guidelines mandatory or districts will choose to ignore them. If not, schools will constantly be in quarantine. Make school happen but make it SAFE FOR ALL!!! Don't forget that kids do have family members living at home that might not live if this virus gets brought home from a kid.
7/21/2020 12:57:54	Keri	Brucken	Parents	Circleville	I want to highly encourage the KS state board of education to vote in favor of the work that was already done by the committee to give local districts control. Please do not support these mandatory cookie-cutter mandates in our schools. Every district has their own challenges and they are best to decide, with the help of their county health officer, what will be best for their students. Parents who don't feel safe sending their kids to in person school already have been given the option of virtual or homeschooling options. To take away a parents right to send their child to in person school is not right. We as parents understand the risk of sending our kids to school. We choose to send our kids to school. Also the every hour of hand sanitizer is not healthy. Sand sanitizer disrupts the bodies natural defense. Warm water and soap should be more highly recommended in schools. Please consider the work already accepted 100% by the board to make recommendations not mandates in our schools!
7/21/2020 12:58:08	Anya	Honse		Goddard, KS	Please open schools on time, our kids mental and physical health and well-being depend on it
7/21/2020 12:58:16	Cindy	Connellan	school nurse SMSD	Prairie Village	I support Gov. Kelly. With numbers rising in Kansas - we can't do in person school
7/21/2020 12:58:19	April	Wasleski		Overland Park	Yes, the school year should be delayed until after Labor Day. The cases are increasing and schools and teachers need time to prepare for students to come back to school.
7/21/2020 12:58:20	Tara	Hornback	Parent in Olathe School	Olathe	I'm married to a PhD Microbiologist and we as parents with two children in the Olathe School District agree that school needs to be online until Covid-19 has a vaccine or the numbers are low. We closed to prevent the spread and having in person school will only overwhelm the medical community. Teachers aren't safe and children will spread it to their parents. Who will take care of our children when us parents are on life support in the ICU or hospitalized? What will you do when a cluster of teachers have it and you don't have enough subs? It happened with influenza and it will be worse with COVID-19 and influenza. Please do the right thing and do online for this year. Let's keep all the children, families and educators safe.
7/21/2020 12:58:26	Kristen	Joyal	Usd 262	Wichita	I am a 50 year old math teacher. This will be my 25th year teaching. We need to get schools open and for those that choose the option - in person.
7/21/2020 12:58:35	Kimberly	Gutiérrez	Parent	Liberal	Keep schools online the first Nine weeks. Then require students who refuse to wear masks to continue with online learning.
7/21/2020 12:58:37	Julie	Wheeler		Scott City	I am writing to give you my opinion about the governor's mandates. I implore you to overrule her! Our kids NEED to be in school, WITH their teachers and among their peers! Things need to start getting back to normal. I understand that some measures will need to be taken, but I'm not sure what good waiting until after Labor Day would do. I also don't think it is fair to make this mandate for the entire state. There are many counties that have had very few cases. They should not be treated the same. I believe these decisions should be left up to the local school districts. If the kids don't start until after Labor Day, they will have been out of school for 6 months! They need to get back! Thank you for your time!
7/21/2020 12:58:45	Cassie	Foster		Utica/Ness City	I emailed my comments to link listed above.

7/21/2020 12:58:46	Amanda	Sweet	Educators	Olathe	There are just too many unknowns as of July 21, regarding the method of instruction and the implementation of safety plans to be able to start on time effectively. We need to start this year out very strong and organized to make up for the chaos of last spring. Our students, parents, and teachers need to be fully aware of new protocols (regarding both safety and instruction) and need to be trained on them in order to ensure safety but also to lessen stress and provide confidence in a situation that will be harmful to mental wellbeing no matter what decision is made. Also, and perhaps most importantly, people should not be put at risk in order to meet an arbitrary start date.
7/21/2020 12:58:52	Lacey	Morris		Derby	Schools and universities should absolutely be closed to protect both teachers and students. The cost of opening schools, to be blunt, is the casualties of our community.
7/21/2020 12:58:57	Katie	Barberena	Parent of a Senior at LFS	Lawrence	Please begin online classes in August. September 8 could arrive with an even higher rate of Covid-19 cases. For schools that's classroom size is smaller, give the principal the option to offer online and in school classes. For extracurricular activities, allow our kids to participate with safety in mind. Thank you
7/21/2020 12:59:03	Mindy	LaFontaine		Clyde	Don't delay school opening and do NOT require masks
7/21/2020 12:59:05	Brian	Jackson		Olathe	We don't ask firefighters to run into a burning building without adequate protective gear and neither should we compel (or guilt) students/teachers/custodians/Principals/administrative assistants/etc. to enter a school facility in an unsafe manner. We should postpone (not cancel) in-person learning until these safety measures are met.
7/21/2020 12:59:09	Chris	Stiles	Concordia High School	Concordia	It is prudent to delay the opening of school until September, not only for health reasons, but to allow educators to read their buildings, staff and curriculum the best they can for the health and well being of our students. Speaking as a teacher, neither teachers or administrators are ready to open next month. The best plan would be to delay school but ask educators to report in August as usual, and give us time to create the safest educational experience possible.
7/21/2020 12:59:27	Lloyd	Stuteville	My children	Louisburg	Please use common sense and error on the side of caution with regards to Covid19 and our young children's lives. This virus has many, many unknowns at this time and requires all of us to be cautious until more information is known about the effects and secondary effects of this virus. The very vocal, uneducated few who are trying to force their views on everyone should be taken with caution, as the common sense people in Kansas want safety for our children and educator's.
7/21/2020 12:59:27	Kristen	Jackson	Lawrence school district	Lawrence	We need to decide this based on science and data. Right now the data shows increasing numbers in all the cities with larger populations. Keeping kids and staff safe is number one priority so give schools the time they need to prepare.
7/21/2020 12:59:35	Tara	Glanton	USD 497 parent perspec	Lawrence	In favor of delayed start. In favor of all virtual instruction for 9-12 at minimum first semester with increased home visits by counselors/ school psychologists for those not attending or needing additional support. In favor of in-person instruction for students with instructional/social/emotional learning plans. Thank you.
7/21/2020 12:59:38	Raynee	Beaty	High School , Sports, an	Lawrence ISD. (Usd497	These kids need to be active and be able to continue their learning, sports, and activities they love. They have already had too much time away from their normal lives and being stuck on their phones and not socializing and being active is not good for them mentally or physically. These kids need structure, activity, socialization, strength, and teamwork. We are letting our youth down by not keeping structure and activity in their lives.
7/21/2020 12:59:39	Susan	Wendland	Retired educator	Randolph	I would like to see school delayed. I feel there are many schools ready but many who are not. This would give school districts time to get things done so maybe one would not have to close down the road. Hoping numbers start going down.
7/21/2020 12:59:57	Erika	Loesch	Teachers	Liberal	I have a hearing disorder. So the mandatory masks makes it hard for me to understand. I get that I can be excepted possibly but I teacher kindergarten! It is hard to understand young kids anyways and now it will be even worse. I will not be able to understand them because they will be required to use the mask! I just want to be in school with my students! Many of my kids only speak Spanish or don't have support at home. They need school.

7/21/2020 13:00:00	Nicole	Hartman	Parents	Hays	<p>I do not think delaying the opening of schools is the right plan of action. So many children rely on school for meals and a healthy environment. Delaying schools is only hurting these kids who desperately need a safe place. We all know DCF is useless at keeping children safe.</p> <p>Another reason school should be delayed is because we're making these kids more likely to contract viruses because we've been forced to keep them in bubbles, thus lowering their immune systems. Kids need to be exposed in order to build immunities.</p> <p>Also, as a working mom, I am on the verge of being forced to quit my career to stay home and care for my children. This will not only hurt my family financially, but it will soon be trickling down to our local economies as more families are forced to become one income homes because or governor has taken away education.</p>
7/21/2020 13:00:12	Jackie	Stafford	Parent and Teacher in U	LAWRENCE	I do not feel it is safe to return to in-person schools at this time. Please support Governor Kelly's executive order to postpone the start of school until after Labor Day. Students and staff's lives are on the line. Please give us to time to plan the safest and most effective way to teach in the pandemic.
7/21/2020 13:00:15	Clare	Frantz		Westwood	I appreciate the pushing back of schools opening for safety, but I fear it is just a delay to the inevitable decision that will need to be made which is to go online this semester. If we are hoping that three extra weeks will give us time to make it safe to be in schools again, I think that is an unrealistic expectation given the growth of the virus. We've seen that even if we do flatten the curve a bit, release back to normal or even some version of in-person schooling is bound to make the numbers skyrocket again. I'm not sure why we can't just start online now and if things get better, move to in person. If you're worried about teacher preparation (switching from online to in person and back again), then I understand that. It just seems a bit odd to not start schooling in some capacity at the normal time. I am a teacher in the Shawnee Mission School District, and I think kids need some type of schooling ASAP.
7/21/2020 13:00:23	Michael	Van Walleghem		Lawrence	I'm very glad the governor has acknowledged that opening schools in August is problematic (at best), and dangerously ill-advised (at worst). I hope she will go further to mandate staggered enrollment in all buildings statewide (at least all secondary school buildings).
7/21/2020 13:00:29	Jeff	Renner		Dodge City	I am completely opposed to a one size fits all approach to delaying the start of school and requiring masks for students to attend school. We elect local school board members to set policy at the local level. These elected board members are in the best position to make policy that best fits local conditions. Please vote to oppose the Governor's mandates.
7/21/2020 13:00:38	Erin	Emme	USD 437	Shawnee County	As an elementary teacher and mom of 2 elementary aged students, I'm all for the delayed school year. I fully support this EO.
7/21/2020 13:00:42	Jessica	Johnson		Topeka	Please delay school opening until after Labor Day.
7/21/2020 13:00:42	Shanon	Pearson	Student	Wichita	I agree with and support the Governor's order for schools
7/21/2020 13:00:52	Traci	Poore		Concordia	I support the governors order. Our children are not science experiments, or political pawns. Send them back when it's safe. The delay makes sense.
7/21/2020 13:01:05	Rhonda	Stevens		Wichita	Delay school opening in person until spring 2021.
7/21/2020 13:01:05	Chrissy	Hessler	USD 475	Junction City	We need to go back to school in time not in September. Our youth are struggling and need to be in the classroom to learn, they have been out of school for way to long.

7/21/2020 13:01:13	Kate	Barnes	USD 360 Caldwell Scho	Caldwell	I think the Governor's executive order to delay school should be passed. Our school district waited on the KSDE guidelines and are in need of August to plan and collaborate as a staff. More importantly, I think it give us all time to see what the number of cases does. In Sumner County where I live and teach, cases are on the rise and are at the highest levels. I am very nervous for the safety and health of my students and co-workers. I very much want to get back in the school building and working with my students when it is safe to do so and that we should listen to the health experts. I think Governor Laura Kelly has the best interest of our citizens in mind. I know that people are worried about local control and I see that side of it. I just worry that it is not safe right now and that some local school boards may vote along party lines instead of the recommendations of our state and local health experts.
7/21/2020 13:01:15	Christine	Bowen	USD 453	Leavenworth	Please support Governor Kelly's order to delay the start of school until September. The safety of my Kindergarten student's and my co workers is very important to me. Germs spread like wildflowers in Kindergarten under normal circumstances. We need to protect our children.
7/21/2020 13:01:21	Chelsey	Chamberlain		fort Riley	Could you please let the parents know the projected number for students that will attend/enroll in traditional school? I would like to be aware of the class size for my child. Also can we do part/half day Monday-thursday and e-learning Friday as an option.
7/21/2020 13:01:22	Ashley	Daher	USD 232	Shawnee	Do not delay the start of school.
7/21/2020 13:01:26	Lindsay	Sheets		Hays	Open after Labor Day only if safe
7/21/2020 13:01:34	Tammt	Miller		Valley Center	I do not think with the rise of covid in our community our schools should open before Sept 8. The safety of students, teachers and other staff must be first.
7/21/2020 13:01:40	Alecia	Frederick	Parent	Auburn	Start school on time.
7/21/2020 13:01:56	Diane	Morgan	Personal	Shawnee County	Please note the most recent medical information that shows transmission among students ages 10+ Extra time to prepare schools to follow the guidelines can only make reopening the best success which is what we all want.
7/21/2020 13:01:58	Amanda	Lakin		Larned, KS	I am not upset about delaying the school start until after Labor Day as I feel that is how it should have been all along. I am however, upset that the governor is allowed to mandate that students wear masks. That should not be the governors decision. That should be the parent's decision. Overturn the governors executive orders!
7/21/2020 13:01:59	April	Morgan	My family	Wichita	Republicans need to wake up and stop being selfish children. Schools need to be closed until students and staff can return SAFELY. There is no way this can happen before Labor Day. At this point, I don't even think it will be safe then. Republicans need to stop politicizing this pandemic and do what is best for the health and safety of the public. It sickens me that Republicans are willing to risk lives to further their agenda.
7/21/2020 13:02:05	Chris and Carrie	Holliday	My family	Soldier	This executive order should not be approved or signed. Control should remain at the local district level. Children should return to school per district recommendations. Kansas kids deserves better and parents deserve choices in these hard times. Pediatricians believe kids can and should return to school safely and I agree.
7/21/2020 13:02:11	Alyn	Thomsen		Lawrence	Please allow sports practice/conditioning to continue. Also allow practice to start as planned.
7/21/2020 13:02:13	Liz	McDonald		Larned	Delaying the start of school for some districts may be wise, however I have concerns about it being required statewide. Districts with few cases currently may be better starting on time with the option to close later in the year if local cases rise. Also, please consider the social emotional impact of having schools closed. There are many children who live in conditions of abuse/neglect who may not be identified during this time, as well as others suffering with social isolation. While school will certainly be different due to COVID-19, please consider allowing local districts to make choices based on their unique and ever-changing demographics. Thank you for your time.

7/21/2020 13:02:26	Pamela	Rotchadl		Wichita	<p>Dear Board Members, Please fully and normally open the schools. The science/data/facts prove that children rarely get or give Covid 19.(CDC &amp; JAMA pediatrics) NO children have died of Covid 19. ZERO!! (Kdheks.gov) Cases have NOT meant more deaths. Go to the website and do the math. KS death rate is .011%. It is unconscionable that schools would not open! Also, masks have NO proven scientific data or facts to show they prevent VIRUS transmission. Absolutely none. The same goes for “social distancing” . Totally arbitrary &amp; not science driven.</p> <p>100% normally open the schools. No temp checks, no social distance, no masks! So terrible for the social, emotional &amp; mental health of our children to be normal. Stop this insanity &amp; do what’s right for KS children.</p> <p>Listen to the proven data/facts/science not the fear &amp; hysteria from the media with inflated statistics. Err on the side of humanity!! Open normally and on time!</p> <p>Thank you</p>
7/21/2020 13:02:27	Caitlin	Goode	Myself	Paola	<p>Good morning. My name is Caitlin Goode and I am from Paola, KS. I am writing in regards to the upcoming Kansas School Board meeting on voting to uphold or overturn Governor Kelly's mandate. Not only do I have 4 children (grades ranging from Kindergarten to 7th grade) who attend Kansas public schools, but both of my sisters and my mother are educators in the state. I am a Surgeon's Assistant and I work within the metro area. I have a unique view by having both a healthcare background and children and family involved in the public schools. With the recent influx in not only cases of Covid 19, but hospital inpatients and deaths, I pray that the Kansas BOE will consider the health of not only students, but educators. While children typically display more mild symptoms of Covid, this is not always the case. I have a daughter with severe asthma, as well as a niece with Type 1 Diabetes- both high risk, both less likely to display mild symptoms. Think of the many children across Kansas who will fall into the high-risk assessment. But, above all, I implore you to cast your vote in favor of the teachers and adult staff who will be risking their lives to teach children and pay their bills. You are their voice and you are their advocate. My 60-year-old mother, for instance, has dedicated 30+ years of her life to educating the youth. Students deserve an experienced and compassionate teacher like her, and she deserves to not have to risk her life to be able to do so. Kansas is currently the #1 State in the US with cases per capita- you can NOT- in good conscience- open schools and choose to harm children and teachers in this manner. The school year will look different no matter what. Please give teachers a chance to plan accordingly with the time between now and September 9th. Allow them to think of plans for their IEP students, students who need more intervention, economic resources, etc. I implore you to think of the fact that if one student or teacher's life is lost- the cost of their loss to their families and communities. Please think of the facts, the advice of local health departments, doctors, ICU nurses- instead of political agendas and the court of public opinion. Please make safety of your citizens the number one and only priority. I believe you hold the power to keep my children, my sisters and my mother safe. Please consider them when making your decision. Thank you very much.</p>
7/21/2020 13:02:38	Melissa	Fagan		Paola	<p>Please keep students and school staff safe by delaying the start of school or by only offering online instruction. Thanks.</p>
7/21/2020 13:02:43	Nicole	Skidmore	USD 305	Salina	<p>I am a teacher and a parent. I have an immune deficiency as I take a biologic. My daughter has only 1 functioning kidney and my husband has asthma that he has been hospitalized for several times. Not only do I think schools need more time, I also think you need to be realistic. Kids especially k-5 cannot be expected to wear a face mask for almost 8 hours a day. I teach kindergarten and I’m telling you. They will NOT leave the mask on. Which will put ME at a huge risk. Schools should start out virtual until it is safe to be in session without mask. I’m asking you to be human and do what is right. Think about when your kids were little, think about your grandkids. Could they do it?</p>

7/21/2020 13:02:53	Christopher	Renner		Manhattan	Please support the Governor's Executive Order postponing the start of school until after Labor Day. The lives of teachers, support staff and students are on the line and voting to override is a death sentence for them. It will force teachers to resign, force parents to homeschool, and force our schools closed in a matter of weeks since COVID-19 will be released like a wild fire. I have been thoroughly disgusted with the lack a protect the common good by members of the "pro-life" Republican Party. Nothing they have done has been pro-life. It has cost thousands of Americans their lives. STOP PLAYING POLITICS and DO WHAT IS RIGHT! Protect our children and give our districts the time they need to prepare. The spike in COVID-19 infections is a clear sign that what has been done to protect the rich is not working. The families I teach struggle to put food on the table, if their children become infect and ill the reproductions will be disastrous.
7/21/2020 13:02:56	Dashiell	Keys	USD 500	Olathe	Please uphold the Governor's order
7/21/2020 13:03:10	Amy	Baarington	I'm a parent.	Wichita	The children should not wear masks in the school. It should be business as normal. Teachers should be allowed to wear face shields. The numbers aren't there to show a high infection rate in children. Please read this article from the NY Times regarding infection rates. If parents are concerned then they can choose to have their children wear masks or alternate schooling. Maybe we should wait until September to open schools to see where we go from here. <a href="https://www.nytimes.com/2020/07/20/parenting/coronavirus-children-spread-covid-19.html">https://www.nytimes.com/2020/07/20/parenting/coronavirus-children-spread-covid-19.html</a>
7/21/2020 13:03:11	Christy	Ramus		Olathe	Please uphold the Governor's Executive Order. Please make online education mandatory until we have calmed the CoVid spread. Please put teacher, student and staff's health before politics.
7/21/2020 13:03:12	Elliot	Olson		Overland Park	I am so glad our governor is taking the virus seriously. It has been upsetting and disgusting watching Republican lawmakers in Kansas giving so little concern to the health and safety of our citizens, especially children. Just because you politically don't want to face the consequences of a pandemic, does not mean it goes away. Governor Kelly has handled this situation with such grace despite the unthinkable bullying and actions from Republican lawmakers in Kansas. I fully support a delayed school start and any other health measures found to be needed.
7/21/2020 13:03:21	Bruce	Hermesch	Bruce Hermesch	Seneca	Everyone, and especially kids, need to get back to a sense of normalcy. At least give the local school boards the opportunity to make this decision. You cannot treat people in Seneca area, rural, (Nemaha Central) the same as people in KC, Wichita, or any urban areas. Thank you for being on the Board of Education, and taking the time to listen
7/21/2020 13:03:22	Dylan	Wolford	Citizen	Parsons	Please do not open up schooling this fall. The disease will only spread further, the second wave of corona can be prevented as long as everyone is in full support and realization to science. Thank you for your time!
7/21/2020 13:03:42	Rebecca	Southern		Newton	I support delaying the start of school. I do think there will be major challenges enforcing masks with young children!
7/21/2020 13:03:50	Laurie	McKinnon	Parent	Wamego	Please delay school until a vaccine is found.
7/21/2020 13:03:51	John	Ellis		Wichita	Why even a vote? Have u seen cases? Not safe!! Wait.... Lives are at stake.
7/21/2020 13:04:02	Kristy	Rupe	Parent of USD 112 Stud	Clafin, KS	I am in favor of delaying the school year until Kansas, and more specifically, the areas and counties nearby USD 112 that are seeing rapid spikes in cases, can get a handle on the outbreak. For our location (like many other rural KS communities), so much more needs to be considered than the defined 'school district' boundaries because many parents travel anywhere from 25-45 miles away to go to work. Our small community of Claflin was the first to report cases of COVID-19 in Barton County and logged the first COVID related death bc of it. Had Gov. Kelly not shut down the schools when she did (during Spring Break), there is a very high chance that our elementary school would have seen an outbreak due a school employee being one of those first few who were confirmed positive in Claflin. That person is my mother-in-law's assistant/aide. That is way too close for comfort when you have 2 high risk family members. I commended Gov. Kelly for her actions then and I commend her for her actions with this current exec. order. Don't get me wrong, I want my children in school just as soon as the next parent does but not at the risk of losing a close family member or child to COVID-19. Our household has 1 high risk child and my father in law is also high risk. 'Nana' and 'Papa' are our only support net and life line that we have out here. Without them and their health, we have no outside resources for child care nor family support in general. Kansas is worse off now than it was in March when Gov. Kelly shut down the schools. It's only logical then that our schools don't open until Kansas is doing BETTER than it was in March when they closed initially.

					Please vote yes to support Governor Kelly's delay of school!
7/21/2020 13:04:04	Mary	Rodriguez	Retired educator; grand	Lawrence	We need to put safety first for students, teachers, staff and community. The surge we are seeing now is too dangerous; the virus is too serious and too contagious! Thank you.
7/21/2020 13:04:05	Shawnda	Werth		Hays	I will not send my kids to school with masks on and the delay is just more scare tactics...
7/21/2020 13:04:11	Amber	Royse	Irwin Army Community	Junction City	NO DELAY, LET THESE KIDS BE KIDS
7/21/2020 13:04:15	Jessica	Huber		Wichita	With the increasing cases I support the delay in starting in school classes. If there are ways to start online prior I would support that. I support this for the safety of students, teachers, other staff, and their families. As businesses have to pivot to service so do schools, several suggestions that I found helpful were found at <a href="https://medium.com/@shaylargriffin/some-students-should-go-to-school-most-should-stay-home-8a57894b8487">https://medium.com/@shaylargriffin/some-students-should-go-to-school-most-should-stay-home-8a57894b8487</a>
7/21/2020 13:04:17	Sukesh	Kamesh		Kingman	Laura Kelly and the other administrative staff of the Kansas government have done a great job. As a high school student, I cannot disagree with Laura Kelly's and the Kansas Government's handling of the pandemic. There are absolutely many critics out there wanting to send their kids back to school. The issue here is not sending students back to in person school, but rather the fact that these people will ABSOLUTELY NOT WEAR A MASK AT ANY COST. Many people still believe that this GLOBAL PANDEMIC is less lethal than driving on the road, and other day to day things that we as Americans and Kansans do. They claim that it is more likely to die from using a lawnmower or car wreck than from this highly infectious raging pandemic. I would feel scared and insecure as a student if we had in person school and did not wear masks. So, my opinion is to have in person school but MANDATE MASKS AND OTHER PROTECTIVE/PREVENTIVE MEASURES. I do not know who is reading this, but once again thank you to Governor Kelly and the Kansas Government for protecting YOUR KANSANS!!!! You guys have done such a great job. THANK YOU!!!!
7/21/2020 13:04:23	Dallas	Hathaway		Topeka	I urge you to support Executive Order 20-58. Although delaying the start of the school year will impact parents, teachers and other faculty members, safety should be the number one priority of the KSDE Board. Educators have not had enough time to prepare for these major changes, considering many of the plans were released in the last week. Opening up schools too soon will only make the transition to online learning tougher, if schools are forced to close because of an outbreak. We need a unified approach as a state to resolve this issue. Unfortunately, not all school districts will proceed in a unified manner. In short, I urge you to support this executive order because teachers and families deserve to know their elected officials understand the importance of their safety and education. Thank you for your consideration.
7/21/2020 13:04:33	Susan	Severin	USD253 and parent of 3	Emporia	Please vote yes prioritizing safety and humanity....
7/21/2020 13:04:35	Jill	Norman		Shawnee	Please vote NO to the Governor's orders to allow local districts to control their needs rather than making a statewide decision.
7/21/2020 13:04:38	Barbara	Brown	Olathe USD 233	Olathe	With the upsurge in covid cases please delay school till after Labor Day. I work with special needs and am also in high risk category, but i love my job and my district and do not want anyone put at risk anymore than they have to be. Thank you.
7/21/2020 13:04:42	Ralph	Kelley	USD 500 .	Olathe	I ask the Board to approve Governor Kelly's EO to give districts the time and ability to decide with all stakeholders the best way to proceed with the 2020-21 school year. By delaying school, districts will have the ability to put systems and procedures in place and the time to create the learning places and/or programs that serve their individual districts best. Both staff and students will be better protected. Thank you.
7/21/2020 13:04:44	Paulette	Lundine	Retired Grandparent	Overland Park	Are school districts prepared to follow your guidelines and enforce them? Allowing more time (and money) makes sense and would show that the board cares about students, staff, and the people they contact. Pushing them to open after only recently receiving your guidelines will only cause shutdowns.
7/21/2020 13:04:45	Mandi	Higgins	Parent	Emporia	I have an elementary school age child and a high school aged children. My fear is the elementary child will not be able to social distance and use a mask. I also want to know a plan for sports so my senior can plan accordingly.
7/21/2020 13:05:08	Justin	Poore		Concordia	This is the right thing to do. We need more time to try and get our case numbers down and allow the schools to figure out how to get students back in the classroom safely.
7/21/2020 13:05:08	Cheryl	Gruhn		Overland Park	Please uphold the Executive Order and give all schools the necessary time needed to focus on reopening SAFELY after Labor Day.

7/21/2020 13:05:22	Linda	Tessar		Harrisonville	As a retired DV shelter director and educator I strongly agree that schools should open in the fall yet also think after Labor Day is appropriate for preparedness and safety across the board. I also hope that doing so would enable the board to provide consistent guidance and policy statewide.
7/21/2020 13:05:25	Hollie	Lind		Wamego	Yes
7/21/2020 13:05:26	Amy	Knapitsch		Lenexa	I sincerely wish that over the summer, schools had obtained masks, thermometers, etc, but if they don't have these supplies in place, they shouldn't open. I think we would benefit from specific guidance such as percent positive amount for when schools can open, be hybrid or need to close
7/21/2020 13:05:30	Rachel	Fath		Wamego	The decision to delay the start of school should be decided at the local and county level. This should not be a one size fits all approach as the Governor is making it out to be. Please let each individual school board make the decision as to what is best for their staff and students. Thank you.
7/21/2020 13:05:34	Colleen	Rumbough		Olathe	I strongly support the EO 20-58 delaying the start of the 2020-21 school year. Vote for the passage of this executive order.
7/21/2020 13:05:52	Kris	Shields	Concerned Kansas resid	Lawrence	I support Gov. Kelly, and her decision to delay opening schools until after Labor Day, or even later. Some districts may consider remote learning, or a hybrid of both. Gov. Kelly has made good, solid decisions through out this pandemic time period. She has considered medical advice as well. I don't think much of the party line republican "leaders" in the state house, they're not doing much to protect us, nor are their decisions sound. Wear a mask, and stay separated!!
7/21/2020 13:05:44	Kyle	Broadfoot	USD 259 - East High	Wichita	Please accept the Governor's call to delay schools until September 8. As a new teacher I find it unconscionable to send students into the classroom until it is safe to do so.
7/21/2020 13:05:47	Karissa	Rengstorf		Riley	Please open schools at normal time. Or leave it up to the local districts. It's going to put a huge strain on parents without childcare options if it remains closed. It's not a 1 size fits all matter.
7/21/2020 13:05:51	Carl	Eccher		Louisburg	The damage being done to these kids by not having them in school cannot be measured. Open the schools on time and stop this madness
7/21/2020 13:05:51	Catherine	Bennett	Olathe school district	Overland Park	Please say yes to governor's mandate of giving us until after Labor Day to prep schools due to COVID 19. Thank you
7/21/2020 13:05:53	Ann	Mikkelson	Parent with students in C	Salina KS	I do not have a problem delaying the start of school but the school year needs to be extended in the spring by 3 weeks. While I kids had access to online learning, they definitely did not learn what they should have to complete last year on a good note. In our case, starting school on Sept 9 when they had planned to start Aug 12 takes another 4 weeks off of their learning. I have a daughter that will be a junior this year. How is she going to be college ready with 15 weeks less education between her sophomore and junior years? Again, I don't have a problem with the delay but I do have a problem with shortening the school year again. Thank you for your time.
7/21/2020 13:05:54	Darren	Erpelding		Eudora	I do not think making a blanket decision for every district in the state is right. I believe it should be a district by district. By pushing the school date back, in my opinion really doesn't do a lot for anybody. Most teachers have been preparing for just about any situation. Also moving the date back could possibly eliminate school sports. This is would absolutely devastating not only to the kids that participate but to the schools. Taking fall sports to the spring is also a bad idea. The kids need something normal for their mental health. As long as we follow the things we are supposed to do, I don't see why we can't go back to school on time or even just a few days later. September 8th is absurd and should be out of the question.
7/21/2020 13:06:12	Anne	Selfridge		otis	As a teacher and a parent, I want school start to be delayed. We haven't heard from our school about what is going on for the school year and what precautions will be taken. Asking the teachers to go into the classrooms and expose themselves puts us and our families at risk, not to mention our students and their families.
7/21/2020 13:06:23	Crystal	Shanline	USD 382	Pratt	Move on! School needs to start on time! Sports need to start!!
7/21/2020 13:06:23	Janneil	Crader	Blue Valley Schools	Overland Park	I prefer the late start to hopefully allow time for the mask mandate to have an impact. I have a senior at BVSU and I teach 3rd grade at Valley Park Elementary.
7/21/2020 13:06:26	Shannon	Mills	Wichita public schools	Wichita	Support the governor's order and delay school reopening
7/21/2020 13:06:30	Jennifer	Engle	My family	Andover	Delay opening until infection rates drop. All online learning is preferred in this situation.

7/21/2020 13:06:35	Lauree	Moore	Mount Hope, Kansas	<p>Any decision of this nature is difficult, but I urge you to delay the start of school until after Labor Day as suggested by Governor Kelly. These are unprecedented times, and we've not had to deal with a health issue of this magnitude in decades. This means life will be altered, which has upset the normal routine we've always enjoyed up to now.</p> <p>If you have been in a school for any length of time, you know the truth of how kids operate. The suggestions given by the CDC for schools, though factual and well intended, create further difficulties in already large classes. Teacher forums, blogs, and social media groups have been discussing nonstop various strategies for how best to implement these suggestions. Elementary teachers are especially concerned with how to help the very young, because normal routines are already complicated enough on good days! As always, teachers will innovate and rise to the occasion, because that's what good educators do. But we shouldn't place them in vulnerable situations without considering the overall repercussions.</p> <p>I wholeheartedly oppose anything that would jeopardize staff and students, and as the positive cases continue to rise in Kansas, a start delay makes more sense. We cannot view this school year as "normal", no matter how much we want it to be. No doubt you've heard a great number of reasons for and against a delay. There are so many ludicrous statements making the rounds, one of them being that kids can't get COVID-19. We know this to be patently untrue, as several cases with children have occurred across the country and will occur in future.</p> <p>Recently, in our very small town, 17 people tested positive for COVID-19 after attending a funeral. This was the result of someone who did not know they had COVID-19 exposing those who attended, who then exposed others as they went about their business. The time frame they spent together was less than three hours. More people who had contact with them afterward are testing positive as well. This isn't the 'flu. It's something worse, and something novel. We can't treat it as a "normal" virus. Situations like this are happening everywhere. We don't have this under control - yet.</p> <p>A delay is certainly better than a shutdown, and the proposed start is not a large delay. This is a decision that has to be for the greater good of all, which, unfortunately, has become a political hot potato. I do hope that this decision can be made without rhetoric or bias, but rather with logic and compassion.</p>	
7/21/2020 13:06:37	Tammy	Allen	Andale	Children need to go to school! Distance learning did NOT work last semester. The kids didn't learn anything. All the studies prove that children are the least likely to catch or transmit the virus. School is the safest place they can be. Get them back to learning!	
7/21/2020 13:06:40	Matt	Flint	Shawnee	Don't delay school	
7/21/2020 13:06:43	chalece	anderson	Shawnee Mission School	Shawnee Mission	wait to start school until after Labor Day
7/21/2020 13:06:45	Crystal	Davis	Andover - USD385	Wichita	As a parent, I am scared to death to send my children back to school, especially while covid numbers continue to climb. I have 5 school-aged children. Two of them are considered "high-risk". My husband (their father) who also resides at our resident is considered extremely high-risk (both heart and lung problems). Not only am I worried that my children will contract covid while at school, I'm worried they will bring it home to my husband. Even if he doesn't die, him becoming ill would be financially draining as my income as a teacher doesn't pay the bills let alone pay for food for 5 children. I highly encourage you to accept Gov. Kelly's order to delay the start of school to ensure our numbers are going down before putting our students, school staff, and community's lives at risk. It's not a matter of if it will spread through schools, it's a matter of when. And when it happens, there will be lives lost. I feel at this point, it would be negligent - both for students and school staff - to send kids back into the classroom. Even one death is too much.
7/21/2020 13:06:52	Ryan	Austin		Andover	The current spike in coronavirus cases is far above the amount of new daily cases that we saw back in March and April when the schools were closed, so it only makes sense to delay the start of school until this surge can die down. Many students and teachers will be uncomfortable if forced to return to classes in August.
7/21/2020 13:07:01	Wendy	Elkins		Olathe	If you decide to hold classes, you are saying you are fine with teachers, students, administration and other school employees getting sick and some dying. This is the choice you are making...This sure sounds like you do not care about children and the people of Kansas. If you decide to hold school I expect to see you in the schools teaching as substitute teachers in every district in Kansas.

					Delay the start of school.  As an educator, I am asking that we consider the safety of both students and staff when deciding whether or not to delay the opening of schools. The number of confirmed cases of Covid-19 is rising in the state of Kansas. Now is not the time to take chances with the health and safety of those who work in and attend our schools. Delaying the start of school will give districts the time they need to prepare for the inevitably hazardous conditions that will be present when schools are opened. Governor Kelly was praised in March for her proactive approach when closing school buildings. Now is the time to lean into her executive decision making.
7/21/2020 13:07:04	Kylie	Huneycutt		Junction City	
7/21/2020 13:07:09	Lori	Hisle	Grandparents	Stilwell	Please support Gov Kelly's exec order to give our state time to get healthier, admin and teachers a little more tim to prep and districts more time to get safety measures in order.
7/21/2020 13:07:11	Amy	McGuire	USD332 Cunningham	Cunningham, KS	I hope I get two comments, because I just ran the most current numbers. Total Kansas Residents 2,774,044 Negative tests 238,197 Positive tests 23,544 (0.8% Less than ONE PERCENT of our state has tested positive for covid. LESS THAN ONE PERCENT. Big towns, small towns, all the towns. LESS THAN ONE PERCENT have tested positive, INCLUDING THOSE who are asymptomatic and have received bogus test results.) Deaths 318 (0.0114% One hundredth of a percent. Yes, I know that EVERY human is important and every death counts. I lost my brother in a car accident at age 22. We are ALL well-acquainted with tragedy. I get it.)  PLEASE don't drastically alter our kids' lives and our community well-being for .8%, for .0114%. It's just not necessary. If nothing else, PLEASE give control to individual districts to do what's best for their people.
7/21/2020 13:07:15	Rebecca	Romine	parent	Lawrence	Please help us protect students, teachers, and school staff, by keeping schools closed until they can be opened safely, and by supporting our Governor in keeping the school buildings closed until after labor day.
7/21/2020 13:07:20	Angela	Logan		Hutchinson, KS	I understand the need for extra time for teachers and other school employees to prepare their buildings and classrooms for the accommodations necessary to keep kids safe at school. The order that will not allow athletic practices or other extra-curricular rehearsals, etc., before the delayed start of school, however, are unnecessarily restrictive and detrimental both to students and to the programs they participate in. Athletes need to continue to train and run drills so that when they ARE finally able to compete they don't suffer injuries from being ill-prepared. Marching bands, musical production, and drama production teams need to rehearse and can do so in conditions that meet the social distancing and masking guidelines. Students need activities to thrive, not just in their physical health but also in their mental and emotional health. These overly restrictive mandates show little care for the students' health holistically, and should not be put into place.
7/21/2020 13:07:20	Lynsie	Wolken	Mother of a studen	Eldorado	I don't mind pushing it back. I. Am not okay with masks
7/21/2020 13:07:20	Shannon	Murphy	Full-time working paren	Olathe	Please open schools. Have parents sign a waiver and let us send our children to school.
7/21/2020 13:07:22	Nicole	Fraise	TPS 501	Topeka	I support the delay of schools until after Labor Day and further delay if necessary due to rise in cases or lack of decline in cases.
7/21/2020 13:07:24	Kelli	Bottorff		Lancaster	I am in favor of beginning school as scheduled. Our school district seems to have a plan in place that will be as safe as can be for teachers, staff and students.
7/21/2020 13:07:38	Patsy	Bastin		Haysville	Delaying schools means there will be less total school time period. Schools will close undoubtedly during flu season and it makes no sense to close in late summer- districts have had 6 months to prepare and 3 additional weeks is ridiculous. Get these kids back in school- you are harming them by not!
7/21/2020 13:07:54	Ellen	Canfield		Overland Park	I agree that school should not start until after Labor Day. At that point I feel school should be held virtually.
7/21/2020 13:07:55	Erin	Redeker	USD 383	Manhattan, KS	Please delay the start of the school year. This will not only allow communities more time to stop the spread of Covid 19 but it will also give teachers more time to plan for the school year. More planning time will only benefit teachers, students, and parents in our communities. Please keep the health and safety of students and teachers in mind when voting. Teachers need more time to prepare and plan so when we do return to school we feel safer and are more prepared to lead and instruct our students. Safety and health should be the top priority when making this decision. Thank you.

7/21/2020 13:07:55	Cynthia	Kroll Hauptli	Parent	Lawrence	Keep schools closed and online, until it is safe. Schools should not open until there is a vaccine, and the infection rates have gone down. We cannot allow teachers and children to die. Schools should most likely stay closed through December. Online and Staying Alive is the way to be, this Fall 2020 semester.
7/21/2020 13:07:56	Angela	Snell		13311 W 138th Terrace,	As a full time working mom of two elementary age kids in the olathe school district, I implore you to uphold Governor Kelly's executive order. I felt a sense of relief when the EO was issued, even though it means keeping my kids here at home and struggling to balance work at the same time. I can't wait for my kids to get back to school in person. But I strongly believe kids should not be sent back to school in person until the cases begin to drop. Why would we go virtual in March, but send them back now with a rising number of cases? Keep them home until the data shows that case counts are dropping. If school starts online, I also think the department of education needs to ensure that it's flexible for all households. I was told the virtual option of school would require parents to sign weekly logs to show that their kids were putting in the state mandated number of hours. How could any household with two full time working parents manage a child's education for 7 hours a day? Please make it feasible for all households if school starts or goes online at any point. Thanks for your time.
7/21/2020 13:08:10	Estelle	King	Self	Lawrence	Please keep schools closed until after Labor Day so we can give a chance to the Covid-19 virus to abate in our communities.
7/21/2020 13:08:17	Brenda	Wikoff	None	Brookville	Accept Governor Kelly's September school start date. If the nation had taken Covid-19 seriously in the beginning, we wouldn't be saddled with this issue. It is time to consider the safety of the students and staff and time to put politics aside. Will you be willing to step in and substitute when staff gets sick? How will you fund individual desks for all and other necessities? The death of one individual will be on your shoulders should you open too soon.
7/21/2020 13:08:19	Angela	Christopher	Self - parent in DeSoto S	Lenexa	Do not sign the mandate - allow schools to start as originally designed on the academic calendar.
7/21/2020 13:08:26	Pamela	Rotchadl		Wichita	Dear Board Members, Please fully and normally open the schools. The science/data/facts prove that children rarely get or give Covid 19.(CDC & JAMA pediatrics) NO children have died of Covid 19. ZERO!! (Kdheks.gov) Cases have NOT meant more deaths. Go to the website and do the math. KS death rate is .011%. It is unconscionable that schools would not open! Also, masks have NO proven scientific data or facts to show they prevent VIRUS transmission. Absolutely none. The same goes for "social distancing" . Totally arbitrary & not science driven.  100% normally open the schools. No temp checks, no social distance, no masks! So terrible for the social, emotional & mental health of our children to be normal. Stop this insanity & do what's right for KS children.  Listen to the proven data/facts/science not the fear & hysteria from the media with inflated statistics. Err on the side of humanity!! Open normally and on time!
7/21/2020 13:08:31	Apryl	Partridge		Norwich	Thank you I think delaying schools at the timenos the right thing to do. But not much past labor day. If things aren't improved enough by then, online schooling should be the answer.
7/21/2020 13:08:43	Mayci	Paxton	J.C Harmon High Schoo	Olathe	Please delay the school year or require it to go online. There is no way for us to properly social distance in our classrooms. Kids can be infected/carry and then give to family members who can pass to whoever they come into contact with... It will only spread worse by allowing students to congregate in person. Our lives as teachers, support staff, admin and STUDENTS are worth it.
7/21/2020 13:08:54	Jessi	Clark	Maize USD 266 & ALL	Wichita	Keep schools open all 5 days of the week and don't delay anymore! These kids need to be in school-if nothing else for their mental stability. You are making mandates that fit your political BS agenda and could care less of what you are doing to the mental health of these kids! It's a disgrace that you are sacrificing what's best for these kids because of politics. If you require masks because it stops the spread, then why are you sitting down schools for even 1 day. And, please explain how teachers are not essential? My husband is a 1st responder and has been working since day 1 and will continue. Ntm, to date, there are only 2 police officers who have contracted COVID some the beginning. What does that tell you?? They certainly didn't shut the department down!!! Open your eyes!!!

7/21/2020 13:08:55	Michelle	Regier	USD 373	Newton	<p>Thank you for taking the time to read public comments. I am writing to ask you to please uphold the executive order to delay the 20-21 school year. Typically, I am in favor of and understand upholding local control to make decisions. However, tough decisions need to be made right now, and it is clear that not all community leaders are willing to make those tough decisions that are needed to keep people safe. Unfortunately, many community leaders have fallen into the politics of this pandemic instead of staying focused on health and safety for everyone and following our local health official's advice. Please do not make the same mistake. This executive order not only ensures more time for COVID cases and risk to decrease in all communities, but also gives each community more time to plan for what will be a very different school year no matter where you are located in Kansas. Our schools and staff need this extra time to create effective plans to serve all students. This extra time will also allow for some anxiety to decrease, as having a fully thought out plan is always better than having a rushed plan that may not work.</p> <p>Additionally, this pandemic as a whole is a community and national trauma. As a social worker, mitigating and reducing trauma is essential. In this situation, going back to school too soon, without effective planning or safety precautions, has the potential to increase trauma for students, teachers/staff, and parents. When you experience a trauma, having a clear plan is one important factor for creating safety. We need time. We need to feel safe. This executive order to delay the school year will help with those needs. We all want to get back to school, and know that children need to be in school. Taking some additional weeks to plan for this to happen effectively is essential. In my professional opinion, the benefits of delaying the year strongly outweigh the risks.</p>
7/21/2020 13:09:00	Mindy	Sluss	Skyline	Pratt	<p>Keep our kids &amp; teachers safe!! Don't open schools yet. I had COVID-19 ITS NOT FUN AND COULD WIPE OUT THE EVEN HEALTHY PEOPLE!</p>
7/21/2020 13:09:09	Robert	Sailler	USD 497 Morgan Hunt	Eudora	<p>I support Gov Kelly and Dr. Norman and his health team. I feel that the public will be more motivated to implement Gov Kelly's mandate to wear masks, promote social distancing, and improving hygiene in the hopes of flattening the curve of the virus spread. If not, then schools should open via distance learning. By delaying the start of the school year, we can see if people are following Gov Kelly's solutions. Also, by delaying school openings, districts will be able to prepare for her mandates. Districts will have to have lots of masks on hand for students and school personnel. Governor Kelly has taken the pandemic very seriously and she has proposed solutions to stop the spread of the deadly virus. I support her efforts.</p>
7/21/2020 13:09:11	Becky	Chvatal	USD 105 Parent	Atwood	<p>I feel our kids need to get back to school and activities at the normal time. If this "thing" was killing everyone, I would have a different opinion. The mental state of our kids is being affected. I personally have an 18 year old senior that states if we don't have sports this fall, there is no reason to finish the senior year. I think this needs to be addressed at the local level, maybe not schools treated equal. We live in a small town. Let our kids get back to school and activities.</p>
7/21/2020 13:09:13	Jami	Hubbard		Olathe	<p>Please support Governor Kelly's executive order delaying the start of the school year and mandating common sense protections for students, teachers and staff during this pandemic. Pediatricians have walked back their support of in-person learning. Earlier thoughts that children weren't as affected by the virus are being proven wrong as summer camps and daycares get shut down. Give the districts more time to plan. Keep our kids and teachers safe. We all want things to be normal again, but unfortunately wishing doesn't make it so. This will not be a normal school year, no matter what we do. Many people talk about the mental health benefits of in person school. And under normal circumstances that would be true. But how will it affect a child's mental health if their teacher dies? If they carry the virus home to a parent who ends up hospitalized or dead? What effect will it have on them to see their friends, but not be able to play with them as they normally would? Or to run to a teacher for comfort and be told to stand back? How will it affect them to be reprimanded all day for touching their mask or being too close to friends? Pretending we can just have a normal school year is going to have deadly consequences.</p>

7/21/2020 13:09:23	Jared	Morris	Junction City High Sch	Manhattan	My name is Jared Morris, and I teach high school musicians at Junction City High School. I respectfully ask that you vote in favor of delaying school to give us more time to prepare, and hopefully more time to see a decrease in COVID-19 cases.  Thank you for your service and consideration.  Jared
7/21/2020 13:09:24	Janet	Barnes		Valley Center	I would be in agreement to delay the opening of school by three weeks to better prepare the buildings and teachers and would be in agreement for my child to wear a mask
7/21/2020 13:09:29	Megan	Marasco	SMSD 259	Overland Park	Hoping to encourage placement of our children back in school asap with precautions taken. Our children need to continue boosting their immune systems around people, places and things. We are not only hindering their academics, but also their physical and mental wellbeing. Please please reconsider continuing to withhold children from schools.
7/21/2020 13:09:38	Catherine	Holthaus		Mayetta	No delay
7/21/2020 13:09:43	Kendra	Tharp		Winfield ks	I am a para. I agree that we should wait to start school after labor day since we have so many new cases. I am scared to get sick or the children.
7/21/2020 13:09:44	Steve	Weatherford	My Family	Gardner, KS	As a father, former educator and tax payer. I want to encourage our education leaders to stop living in fear and start putting the "education" of our state's children as a priority. After the way last school year ended, it is hard to believe that we would postpone the fall semester. You get paid to ensure that our children have a quality education and the education my children are receiving is non-existent. As an essential worker, I have been working through this whole crisis. I would expect the same for our educators and I believe that school is essential. I will continue to educate my children regardless of your decision. However I know many parent will not. Please stop ignoring the risk of our students being out of schools.
7/21/2020 13:10:09	Rachel	Mull		Wichita	Reject both of Gov. Kelly's E.O.-I am asking that you leave the school start dates and how individual school districts implement State BOE COVID guidelines up to the various districts. I have zero fear about sending my daughter to school. In-person school is what is best for our family and many others. However, I will not send my daughter to a school that feels more like a medical facility.
7/21/2020 13:10:09	Keith	Skillman		715 Tennessee St. Lawr	I support Governor Kelly's executive order to delay school start.
7/21/2020 13:10:14	Lauren	McNeil		Hays, KS	Please consider allowing the students to attend school this year in person...without a laundry list of unachievable mandates that make their day feel more like a correctional facility than a school building.
7/21/2020 13:10:15	Bethany	Pfannenstiel	Hays Middle School	Hays	My concern for this school year is supplies. It is hard to find hand sanitizer and disinfectant wipes.

					<p>I am in favor of delaying the start of the school year, at the very least, and am also in favor of online only. I am married to a 7th grade math teacher and coach. Together we have two girls ages 16 and 10. We are alumni of the district we live in and some of the same teachers that taught us are still teaching. This should not be a question of if we want kids back in schools. Of course we want kids back to school. The question is bigger than that. Can we get EVERYONE back in safely? This is the real question.</p> <p>My entire life will be going into these buildings while in the middle of a pandemic we have yet to gain any control over. There are numerous studies showing this virus is airborne. Sitting in a building for 8 hours with no windows that open and AC units that recirculate the air rather than bring it in from the outside is a recipe for disaster. And worse yet, this won't stop with just the people going into these schools. This will reach the rest of their family's too. We've already started having conversations with our parents that we won't be able to spend time with them if the kids or teachers have to go back into the buildings. The risk is too great for both sets of our parents.</p> <p>And why on Earth did we close down the entire state if we were going to throw everyone back into school while numbers are continuing to climb? The exact thing we were trying to avoid by stopping school and shutting down the state is exactly what we will be creating by putting kids and teachers back into the schools. It doesn't make any sense. I beg of you to think about how you'd feel if you were told you have to send your kids and/or spouse into a situation that isn't completely safe. We aren't talking about nurses, doctors, fire-fighters, policemen, or the military so let's not treat them as such.</p>
7/21/2020 13:10:16	Carrie	Scoby		Baldwin City	
7/21/2020 13:10:19	Tawnya	Herrington		Mission, KS	Schools should remain closed until after Labor Day. Opening the schools is not safe for students or staff.
7/21/2020 13:10:22	Courtney	DeForest	Parent	Topeka	I am in full support of delaying the start of school. Too many what if's right now and I feel it is unsafe to start at this time.
7/21/2020 13:10:23	Helen	King	Parent	Wamego	I support the delay in school because I feel it will give schools and staff more time to get ppe and to implement better plans for in school instruction, hybrid or online learning.
7/21/2020 13:10:24	Corby	Milleson	Parent/Teacher/Coach	Emporis	Don't delay the start. Don't delay/cancel activities
7/21/2020 13:10:50	Steve	Alexander		Overland Park	The school year definitely needs to be delayed. The virus is increasing in 40 states. As a grandfather of 4 Kansas K-12 kids and as a loved one of 3 Kansas teachers, I want their safety be the highest priority. We only get one life.
7/21/2020 13:10:55	Sheree	Molina	USD 259	1909 E. Idlewild, Wichita	It is too early to go back for the students. We will not be able to keep EVERYONE safe even if we try to enforce social distancing rules.
7/21/2020 13:11:03	Cate	Stein	Olathe Public Schools	Overland Park	We all want school to start, but please give us time to get prepared for whatever will come our way.
7/21/2020 13:11:05	Cari	Rohleder	Community member of	Hays	Please start school AFTER labor day. Thank you.
7/21/2020 13:11:06	Sean	Ryan	Kansas City, Kansas Public Schools	Shawnee	If you go against the Governor Kelly's wishes you are all more than welcome to come sit in my classroom for a week. If it safe for Kansas teachers and students then it is safe for you. Put up or shut up.
7/21/2020 13:11:25	Valerie	Schniepp	USD 259	Wichita	As of today, the coronavirus infection rate is the highest it has been. Kansans are not following the simplest rules to stop the community spread of this virus. When the medical advice of health experts in the infectious disease and public health safety fields tell us to clamp down and sit tight in an effort to contain the virus and reduce it's spread, our schools should not be the one place that we open. Close them for as long as it takes. If parents want their kids back in school, they need to shape up and take responsibility to do their part to curb the virus to levels that make it reasonably safe to open them. Even if it may be the possibility that school closure would not have been necessary, we do not have a crystal ball and should err on the side of caution that does our utmost best to protect our students, teachers, school staff, and their families! Please do not open our schools until the health experts tell us it is safe to do so.
7/21/2020 13:11:36	Barbara	Frank		Alma, Ks	I support Governor Kelly's recommendations on opening schools.
7/21/2020 13:11:40	Kerry	Kalivoda	Usd333	Concordia	I hope now is not the time for politics. Our governor made the smart decision, don't change it. Give Kansas time to bring. Covid numbers down before we bring kids back to school.

7/21/2020 13:11:53	Mark	Davoren	USD 453	Leavenworth	I think it would be a mistake to start school anywhere that still has people with COVID -19. I don't even think it's a good idea to have school while masks are required. I don't think anyone knows how much of a pain it is going to be to police the mask wearing for kids. We should definitely start remotely AFTER we have had time to sufficiently prepare. The end of last year was okay, but we could do better.
7/21/2020 13:12:07	Andrew	Singleton		Topeka, KS	As a teaching family (my wife and I are both teachers) we completely support the Governor's plan to postpone school. Teacher and student safety should be the priority at this moment. Districts need time to prepare for an effective year of instruction and this order provides some time. I ask that you think about the health and safety of teachers, students, and our state when you vote tomorrow.
7/21/2020 13:12:07	Becki	Libhart		Inman	Please delay school starting
7/21/2020 13:12:12	Katie	Gordon	Baldwin city primary ce	Baldwin city	We need to just do online schooling until we ALL feel better with statistics and ways to keep safe. Kids may not contract yet ... but ALL the adults in the building can. And a lot of us have kids or a spouse (that makes more money than us) that would have to quarantine if we got sick.
7/21/2020 13:12:23	Casey	Lynch		Olathe	Please vote No for Governor Kelly's executive order. Keep the power for the decisions at the local/district level.
7/21/2020 13:12:23	Chelsea	Hearting		Olathe	I would like schools to open in August as previously scheduled. All the health statistics show that COVID very rarely transfers from child to child or from child to adult. Really the kids are more at risk from COVID from their teachers. If the teachers wear a mask, then chances of risk should be extremely low. Kids are falling behind in education as online learning does not work for many. Also there are many children who are suffering with depression, abuse, and lack of food at home. Please keep this in mind when you vote on Governor Kelly's Executive Order.  I understand teachers are stressed about the many unknowns with going back to work and it's understandable. All parents and adults are stressed right now but stores, restaurants, and many businesses are open. The answer is not to shut down schools until a vaccine is available. The answer is to show our children that we are resilient.
7/21/2020 13:12:27	Amber	Gallagher		LINWOOD	I think school should start as scheduled for many reasons. One of which is if other states are starting school then that will put Kansas kids behind the curve. What will that do to their chances of entering college and pursuing scholarships? Kansas schools are ill-prepared for online learning and students again will fall behind. I know this is a difficult decision and I am praying for you all.
7/21/2020 13:12:29	Christine	Preston	USD 232 teacher	Lawrence	I support the executive order that requires school starting after Labor Day. The additional time will allow for teachers and districts to put in place safety measures and precautions to be best prepared for the fall school year.
7/21/2020 13:12:37	Kristina	Collins	Parent of 3rd grader at S	2425 SE Tecumseh Rd	I wholeheartedly and completely support the decision to delay schools. As a healthcare professional, it is not safe for students to return at this point. We must use science to make decisions.
7/21/2020 13:12:46	Challie	Metzger		Scott City	Please do not allow Governor Kelly enforce a blanket order across all schools in Kansas. Leave it up to our local representatives to make the decisions. Every school district is different and capable of deciding what is best for our own kids and situation that we are in.

					<p>I am writing to you to let you know my concerns regarding the delay in opening schools. Not only am I concerned for the many children who need to be in school, for development, both academically and socially, but also because if they aren't, they may be left at home to fend for themselves, abused and potentially starved, etc. We may live in Johnson County but we still have many families who barely get by.</p> <p>I am also writing as a parent who send their child to private school. We don't send our children to private school for the prestige but rather that they learn how to be followers of Christ through academics. Our school could be in serious jeopardy, along with other private schools. We are committed to keeping our children there but as a board member I am concerned that other families will not see the value in online teaching for the cost of tuition. Our school does not receive any state funding so we rely on private contributions. We cannot afford the luxury of supplying every student with an electronic device to use at home. If we cannot provide in school learning, we could be in serious trouble as a school. How can you and your constituents know that a decision like this could ruin many private schools?</p> <p>I understand the school districts could struggle on a larger scale as well. However, schools aren't even getting opportunity to see if they can make it work.</p> <p>I am also concerned for the well being of many students who have working parents that don't have the luxury of working from home. I being one of those. My employer has stated that if we don't come back to work then I am basically resigning. I am fortunate that my son would be fine doing schooling on his own, however, I am sure that I am not the only parent out there that has to be physically at a place of business. Who is going to teach their children while at home? Parents struggle enough when school is out finding someone to watch their kids, or get them to summer camps. We are putting parents in a role that they would not necessarily want, being a homeschool teacher. How will that work when we start to see more abuse because parents are stressed and now on top of it making them teach their children?</p> <p>Please understand that I know this is something to be concerned about but how much more concerned should we be with the ramifications of keeping our kids home?</p>
7/21/2020 13:12:53	Tracie	Burrow	Kansas City Christian S	Overland Park	
7/21/2020 13:12:59	Matthew	Voth	Marion County Fire Dist	Rural Goessel	<p>As the Fire Chief of our local dept I am very much in favor of delaying classes. Covid is very present and growing in our community and I barely have enough PPE for our current pace of dealing with the growth of Covid 19 and I am a Fire Chief. Take politics out and use common sense and science. As a father of two young kids I also am becoming concerned as more day cares shut down due to Covid. More time is needed by everyone to just take a breath, slow down, and find ways to mitigate and prepare for the situation.</p>
7/21/2020 13:13:01	Andrea	Berg	Olathe District Schools	Shawnee	<p>On KU health system's Facebook live, a pediatric infectious disease doctor said that they're finding that child to child and child to adult transmission is really only uncommon through age 10-12. After that, kids are basically acting like adults as far as transmission goes, which is particularly worrisome for middle school and high school students, teachers and staff. I am a 4th grade teacher, and I would like schools to have enough time to get any safety equipment in place that they need and safety procedures in place. I would like the staff to have proper training on what this will look like. I would like to see teachers have PLCs &amp; staff meetings via zoom and no adults other than the classroom teacher should be in the classroom. That also means special teachers should not be coming into the regular classrooms to do art on a cart, etc. On nicer days maybe PE could be done outside to social distance. It would be great to have elementary students wear masks, but I don't know that this is always going to be doable for them. All adults in the building should be wearing masks. For middle and high school I think a mask should be worn by students and adults. I would also hope that as a classroom teacher I would have the ability to scan my students' temperatures as they come into my classroom and after they eat lunch. There should be a policy in place that if a child has a temperature they need to go home immediately. Parents should be reminded to keep allergies under control with proper medications. I would also hope that the school districts have enough cleaning supplies, gloves, hand sanitizer, etc. It might be beneficial for classrooms to also have air purifiers. I do think sports should continue because it's good for our bodies and mind, but precautions should be in place. I do believe it is important for the kids to start school in person.</p>

7/21/2020 13:13:10	Kelli	Worthing	USD 232 De Soto Schod	Shawnee	Please do in person school. My children can not do online learning with parents who work often over 40 hours/week. Let each school board and community decide when to begin the school year. Please let schools begin in August. Smaller schools and areas that have little impact should be able to start in August. They've been researching and making plans. For parents and teachers who are worried, they have the freedom to opt in for virtual for the semester (in Johnson county). As is very evident in our great state, one size does not fit all. Please let local communities, school districts and private schools decide on the plans that best fit their community, students and teachers. Children's mercy and many other doctors, including the American Academy of pediatrics, are encouraging the return to school.
7/21/2020 13:13:11	Elsbeth	Kuhn	Parent	Hesston	I fully support the governor choosing to delay the start of school until after Labor Day and I implore the board to support her as well! As a parent of two young school age children and a person who works part time in a school, I appreciate her looking out for the well being of all of us. Due to the recent spike in cases and many unknowns on how this may impact children long term, I believe she has the best interests of our children at heart. Thank you for choosing to support her and in turn, all staff and students in the state of Kansas!
7/21/2020 13:13:25	Lynda	Denton	USD 375	El Dorado	I feel that with recent mask protocol, social distancing and disinfecting measures, school in Butler county should begin right after Labor Day. As an employee of Circle district, I trust that the precautions and policies in place ensures a safe school environment for children and staff returning to school.
7/21/2020 13:13:29	Mrs	Williams	none	Mulvane	This whole approach has lacked common sense. Make the SICK stay home and those at high risk. Shutting down our world is only going to impoverish people and put our communities at risk in every other conceivable way: education, fiscal, social. This has cause SO MUCH division and fear. It's a virus. Like any other years, sometime viruses are worse than others. What good does it do to save so many lives when nobody has a life to get back to?
7/21/2020 13:13:30	Kirsten	Walden	Blue Valley Northwest p	Overland Park	It's important to me that high school starts in August as planned. I understand K-5th may present different challenges in terms of following distancing guidelines but 9-12 students are certainly old enough to get it so perhaps it's a hybrid approach. I have an incoming senior who needs to be back in a structured classroom preparing for college.
7/21/2020 13:13:31	Makenzi	Johnson	Teacher - Lakin	Garden City	The order not only should stand, but needs to stand. Teachers have not had enough time to plan to teach in a pandemic. I'm a band teacher, and the amount of extra equipment and PPE needed is astounding according to KSHSAA and NFHS and the studies they recently released. We don't have those supplies on hand, and we cannot be expected to buy them on top of what we already purchase for our classrooms. My classroom isn't built to hold rehearsals the way these two organizations are recommending. I have to have time to speak with admin and other teachers to find alternative places to rehearse. I need to know how the air is ventilated in my room. Are there HEPA filters with with UVA to eliminate further contamination in the air? Who's replacing them when needed? Who's sanitizing the chairs and stands after every rehearsal? Am I expected to be a full time custodian on top of being a full time teacher? There are so many questions that are unanswered at this point. We need this time to to discuss them and come to mutual conclusions. This is not a joke. I'm 33 years old and I had to ask my dad if he was ready to put me in a casket. Please make the right choice. This isn't political, this is literal life and death.
7/21/2020 13:13:43	Kristina	Gilchrist	none	wichita	I agree with the executive order delaying the start of the school year.
7/21/2020 13:13:46	Cindy	Unger	Parent	Garden City	No masks - determine by local counties
7/21/2020 13:13:48	Jason	Peters		Hesston	I would support starting pushing the start of school later to help teachers and staff prepare for the incredible amount of change that will be required to provide instruction this school year. Since a number of the concerns from teachers and parents relate to the safety of those involved in onsite instruction, the extra time would give a chance to hopefully help the rate of new cases to decrease as well.
7/21/2020 13:13:48	Chance	Eldridge	Parent	Topeka	I think we need to stand behind the governor and delay the opening of schools. It's not safe to open yet. I personally have been effected by the loss of a friend locally due to covid.

7/21/2020 13:13:49	Gregory	Weis		Shawnee KS	The Governor has over stepped her bounds with this blanket delay in schools starting. Each district should be able to make their own decision on how "safe" it is to start schools in person. A school located in Nickerson KS looks very different than one in Johnson or Wyandotte county. There are several places in KS that have ZERO cases but are being placed under the same blanket as a place with increased numbers. If the districts have a plan in place, than please let them make the decision of how best to move forward and keep the political stuff out of it. If a teacher doesn't want to "work" than let them find another job that allows them to be paid without doing their job. People have been working at "essential" jobs throughout this pandemic so what makes the teachers any less "essential" than them? I've seen several different plans set out to allow a limit of students in classes and an at home option for those who just don't feel safe going to school. As long as options are in place there is ZERO reason for the government to shut down schools again for nothing other than to support some political group such as the teachers union. Please put the power back at the local level and get the politicians out of this decision.
7/21/2020 13:13:57	Jennifer	Macivor	Parents	Leawood	Public schools need a viable test and track system in pace, proper PPE including masks for all prior to in person sessions. There are needs to be transparency in cases of COVID. Finally, transparency in all metrics with clear thresholds for staged in person interaction must be consistently executed and followed.  Finally, educators need additionally funding to ensure credentials teachers are teaching a safe number of students.  For district virtual learning, pool resources across schools and to allow students to choose a deeper number of course options and times.
7/21/2020 13:14:07	Jean	Brintnall		Hiawatha	Support the Governor's order. We will use the days with staff to continue planning and professional development as well as assessing for interventions.
7/21/2020 13:14:11	Nancy	Tompkins	I'm mom of a teacher at	Topeka	NO SCHOOL STATEWIDE FOR SEVERAL MORE MONTHS! This is a dangerous life-and-death matter that you need to decide for all schools in our state and not leave it up to ill-informed local boards who think this is not New York City so a huge hotspot crisis will never happen in my little town. Protect our loved ones' lives and futures! Delay school openings and you'll avoid lawsuits by parents grieving the loss of their children.
7/21/2020 13:14:13	Curtis	Rein	None	Abilene	I am asking all elected Kansas State Board of Education members to vote NO on Governor Kelly's executive order. To me, a one-size-fits-all mandate makes absolutely no sense for the state of Kansas. The COVID-19 situation varies greatly throughout our state, so to me it seems wise that decisions concerning it are made locally.
7/21/2020 13:14:28	Rovonne	Birtell	Parent	Topeka	Open schools on time with online options
7/21/2020 13:14:32	David	Mechem		Lawrence	I strongly support Gov. Kelly's school delay to give the masking time to work (because of the lagged response) and to give faculty and admin the time to develop safely protocols.
7/21/2020 13:14:36	Erica	Smith		Harper	I am for allowing individual districts to decide on when school should start and how they choose go return depending on their Covid presence in their communities.
7/21/2020 13:14:37	Gwendolyn	Clark		Lawrence	I agree with Governor Kelly's recommendation to delay the start of the school year. Our school districts and teachers deserve more time to prepare and get supplies. Plus, with the University of Kansas starting classes in about 4 weeks, we are certain to see a rise in cases in Lawrence and increases community spread.
7/21/2020 13:14:36	Michelle	Lucht	Topeka 501 as an Instru	Topeka	Please support Governor Kelly's executive order to delay the start of school. Our Covid numbers are going up and as a parent and a public school instructional coach, I am questioning the safety of being able to send my kids to school and to continue doing my job in building. I have been a teacher or a coach for more than 15 years. It is not an easy decision for staff to continue to teach/serve or to quit if staff are required to be in building out of legitimate safety concern. Give us time to look through the KSDE guidelines, to create/prepare the best standards-bases content we can to support academic and socioemotional needs, and to do so safely. We know remote and virtual learning works considering the millions who have earned degrees. Having one quarter of this experience as a staff member in March, was a start from which we can build upon safely.
7/21/2020 13:14:45	Melissa	Murphy	Private school	Johnson county	Please let these kids go back to school before Labor Day!

7/21/2020 13:14:46	Tiffany	Rose		Overland Park	I feel the kids need to be in school before Labor Day. My kids have been in Ycare for almost 2 months now without any issues. Our children need an education and I feel we are doing a disservice in keeping them out of school. Also you need to remember that majority of households work full time and are unable to stay home with their children.
7/21/2020 13:14:46	Shonda	Serpan	Spring Hill School Distr	Spring Hill	Please let these kids begin school and athletics and not delay it anymore. Transmission child to child and child to adult is extremely low, and the mental health of my child will be challenged if she has to delay school and sports any longer. If some want to do virtual, that is fine, but we should have the option.
7/21/2020 13:14:46	Lynley	Remy	I teach band and choir fo	Burdick	I have always known I would retire in May of 2021 from teaching. This year I am very concerned about returning to work. I am in that demographic of teachers who have concerns regarding my own health and safety. I know children need to be back in school. I also know parents need to get back to work. I have two sons who are also teachers and coaches here in Kansas. They are concerned with their students being vested in school if they are not able to play football (or participate in their other extra-curricular activities). If parents have the choice about whether their kids are going to be home-schooled, return in person or continue on-line, can teachers have that choice as well? Or could teachers in our last year have the option to retire now a year earlier? I believe the executive order to delay school in order for schools to make the required accommodations is important. I believe our Gov. has always acted with out best interest in the forefront of her actions.
7/21/2020 13:14:47	Juan	Ramirez	USD 253	Emporia	I believe we need to delay the beginning of the school year until September 9th.
7/21/2020 13:14:54	Erica	Keller	The Keller family	Lawrence	I am the mom to an incoming kindergartener. I want him to have routine and structure, but most importantly, I want him to be safe as well as his teachers and their families. I think delaying school is smart. Personally, I think we will be going back to online or should since the numbers are rising so quickly and devastatingly. This delay will help teachers get plans in place to do the best for kids. Hopefully, when a vaccine is made available, we will be able to go back to school as normal, but until then, I think we need to wait, regroup, and begin online after Labor Day. I would hate for kids to get sick, but also, if they are carriers, how guilty would these children fee if they caused harm to another, even accidentally.
7/21/2020 13:14:55	Ashley	Cook	District 5	Pratt	Delaying school is not going to lesson chances of Covid-19. Starting school 4 weeks later is not going to hurt our children more. Individuals who choose not to mask are also not going to social distance and the problem will continue. No matter what decision is made it will cause friction. My concern for my children, is the schools being prepared and trained properly. I want my school to have the daily routine down before my children step into utter cautious and my children start having fear and anxiety over this disease. We don't need to have them fear one another and if schools aren't prepared then it's exactly what it will cause.
7/21/2020 13:15:05	Tammy	Poage	Parent	Topeka	Please allow schools to open on time with online options. Local districts need to have control of this, not the governor. Thank you for listening.
7/21/2020 13:15:09	Chelsea	Wecker		Colby	Asking children to wear mask for 7.5 hours a day will only create distractions, And health hazards. To a child seeing the smile on their teachers and classmates faces means so much, I fully believe that our schools can keep a healthy environment with out the mask. What about all the parents Who don't wash the mask every day, that will only create more bacteria and make that child sick faster. Children thrive on positive touch, smiles and positive words. We can't talk this away from them. As for starting after Labor Day , I have no objections. But we do need to keep in mind that they have been out of the school environment almost 6 months already ! Expecting them to remember everything is an unrealistic expectation. Our children need socializing, learning from their peers and teachers that are not their parents. They deserve to have the best education our district can provide, I am by far no teacher , yes I can teach them some but my education is not what their teachers is. I feel my children have already suffered learning what they need in the past 6months. I love my children and want the best for them . For them that is learning from our amazing, patient, kind teachers in our schools. If we prolong this any longer the children will keep regressing .
7/21/2020 13:15:13	Zach	Rohrbough		Scott City	I believe that if the state decides to open schools we will just extend this and have to shut down later on if we just wait and see what happens it'll be easier to figure out what to do I just don't want wrestling to get canceled

7/21/2020 13:15:20	Jessica	Graff	Parent in USD 497	Lawrence, KS	As a parent with 2 children in the public school system, I am concerned that we are jumping to send our children back to school too soon without proper regard for the safety of students, teachers, and the community as a whole. For years Kansas has cut corners in properly funding schools, resulting in over crowded classes, under paid teachers, etc. Now we are faced with a virus that we know little about, that poses an undeniable risk to the health of the most vulnerable in our communities, and unknown risk to those seemingly healthy. Our children and our teachers are not guinea pigs on the alter of party politics. This should not be a partisan issue. Keeping kids and teachers safe means keeping parents safe, it means ensuring that our communities can continue to function, work and remain healthy. This is not a permanent solution, schools will re open, but when its safe to do so. To ensure that it is safe, we need to ensure that at a minimum the CDC guidelines can be implemented, class sizes can be reduced, teachers paid a generous sick leave, students who miss more then 10 days are not declared truant. In short this is a complex issue, without an easy solution. We much be creative, delaying school starting is merely a way to foster creativity and implement appropriate measures so that schools are safe, whether they are conducted in person, online, or a combination of both.
7/21/2020 13:15:22	June	Duehring		Gardner, KS	I would like to request that you overturn the governors mandate to delay schools opening. As a youth pastors wife and mom of 5 teens I have watched and mentored students through this whole covid thing and am very concerned about the mental well-being of the students. I feel like putting this off and including sports with it will be another blow to our youth. I watched them go through so much while losing their proms, graduations, summer jobs, fall plans and I honestly think the dangers of depression and suicidal thoughts are way more dangerous than the virus. I also feel like this will just be put off again in Sept. I don't believe our governor has any plan to let them go back to school this semester. It seems like it's just done in increments to not scare us as much. I have researched this virus constantly and see no reason why schools can't start back up on time in Kansas. Thank you for letting us share our thoughts with you.
7/21/2020 13:15:22	Hollie	Zimmerman		Wichita	Please start school on time.
7/21/2020 13:15:27	Reagan	Wiesner		Olathe	The children need to go back to school. I think we should follow Childrens Mercy advice. There are too many children at risk for abuse at home. They need the security and stability school provides them. My children are not in that situation but they too need school for more than just education. We need to consider mental health within all of this as well. Even if it means they aren't in school full time. I found a great idea of putting clear plastic boards between the students.
7/21/2020 13:15:38	Liz	Krehbiel	Pratt USD 382	Pratt	Please give districts/counties control of school start times. You all (KASB) thought it was worth the time this summer to put together a 1,078 page document detailing how schools should run to be practical and safe during these times. PLEASE let each district use those guidelines to get the students of this state back in school. Our district has a great, no amazing!, plan in place to keep our kids as safe as possible. Their brains and their hearts need to be in school and not further damaged by fear and unknowns. Much of life is unknown, yet we keep on living the best way we know how.
7/21/2020 13:15:43	Shalea	Bose	Scott City KS schools	Scott City	Please allow our schools to keep on the best way they know how. Please delay school so the school has time to open as safely as possible. Thank you.
7/21/2020 13:15:44	JAYME	LEWIS	self	EUREKA	No Mask Requirement for students. The governor does not have the constitutional authority to enslave school children!
7/21/2020 13:15:44	Carter	Gooden	Scott Community High	Scott City	I believe that delaying School would be a huge mistake. Scott County has barely been affected by COVID-19 and only has 1 active case. Kids need to have school so that we can learn and so that we can become active members in the work force.
7/21/2020 13:15:51	Tabatha	Morgan	USD 253	Emporia	For the safety of our children during this Covid 19 pandemic school should be started later than normal.
7/21/2020 13:15:53	Sara	Wichert	Parent	Hillsboro	I support school starting AFTER Labor Day. Cases in our area are on the rise and I believe that will give more time for them to dissipate. I also want more time for our teachers and admins to be prepared.
7/21/2020 13:15:57	Crystal	krueger		Olathe, KS	As a school nurse please give us More time to prepare as a staff! We need to get all our teacher back in buildings and have time to figure out what areas we can do is distance. We need time to get thermometers. I want students to go back in buildings after Labor Day! I just feel we need time to get thermometers. I have a kid with dyslexia and i want him in school but I want a clear plan as a building not just a district

7/21/2020 13:16:07	Vergie	Opdycke	retired teacher	De Soto	If the KS State school board is unable to meet in person due to CoVid 19, then why do you think it is safe for staff and students to return to school?
7/21/2020 13:16:11	Tabitha	Mehlhorn		Pratt kansas	Open schools in August. Stop sacrificing our children for political gains.
7/21/2020 13:16:13	Helen	Scott	My children	Olathe	I have three elementary school aged children and reside in the Blue Valley school district. My kids currently go to a small Christian school, Heritage Christian Academy. If I'm understanding the executive order correctly, my children cannot start school in-person or online until after Labor Day, even though my school is fully prepared to start on the start date. That's very concerning to me. I believe each individual school or school district should be making the decision of when they are ready to start, not one person for all. That is in American, and not the way our government is supposed to work. Thank you for your time and service to our community!
7/21/2020 13:16:19	Jenn	Miller	Olathe Public Schools	Leawood	All staff and student safety should be the number one priority in your decision making however, other areas that you need to consider would be student's being left at home on their own to navigate the curriculum while parents go to work. Student's who may find themselves in an abusive situation and have no other outlets but coming to school. Those students who need socialization and how it affects them mentally and emotionally. How much farther behind the students that really struggle will be without that one on one in person experience with their teacher. I feel there really isn't any good solutions at this time, but if I had the opportunity to vote I would send the kiddos back and make it as safe as possible for everyone. The students need structure, stability and predictability and love from their school family. I will be praying for all of you and the tough decisions you will be making on behalf of our school communities. Thank you for all you do!
7/21/2020 13:16:25	Max	Contreras	Scott Community High	Scott City	Please don't delay the school year. Kids are getting into so much trouble now and we're all stressing out just from being home all day. we need to return.
7/21/2020 13:16:29	Karissa	Hammock		Junction City	Please support Governor Kelly. We need all the time we can to make our schools safer for students and teachers. I don't want to plan funerals this year because we didn't wait. It's worse now than when it was in March and we closed the buildings.
7/21/2020 13:16:29	Sharon	Blaes		Cherryvale	I feel our children need to get back to normal (whatever that is now) as soon as possible. I don't feel delaying the opening of school is a good idea. I also don't think all students should be required to wear masks when their parents are against it. I worry school will be shut down later and it is going to be difficult to make all the time up. I know this is a difficult decision for everyone but I feel delaying school starting is going to be a burden on many families. Thank you for listening.
7/21/2020 13:16:39	Angi	Richard	Washington County sch	Washington	All for delaying start of school til after a Labor Day !!! However, feel forgiveness needs to be given on making up those school hours and schools having to revamp calendars
7/21/2020 13:16:45	Isaiah	Tetuan	Topeka 501	Topeka	County by county should make the overall decision on as to when school should start for that particular area. Most cases that I've heard of have been mild to no symptoms at all. The recovery rate far outways the hospitalizations and death rates combined. It's time to get sports and schools goin asap. Its hurting the kids more not having school than having school. Alot of these kids rely on the food and learning. The online schooling was bringing my kids down and they hated it. We have got to get the schools goin in August.
7/21/2020 13:16:46	Kendra	Lind		Topeka	Please don't open until after Labor Day
7/21/2020 13:16:49	Keri	Bye	Teacher	Wichita	Please delay the start of school. This will allow time to again flatten the curve as well as giving districts, administration, teachers and staff time to prepare a SAFE return. When we do return to school, a matrix for in-person, hybrid, and online learning opportunities could provide safe options for all parties (although it would mean more work for teachers). Thank you for your time and consideration!
7/21/2020 13:16:54	Derek	Fowles	Heritage Christian Scho	Topeka	There needs to be much more consideration given to smaller schools when executing an executive order as not all schools function in the same manor.
7/21/2020 13:17:01	Isaac	Tarango	Scott Community Highs	Scott City	Wyandotte County and other largely populated counties do NOT also represent Scott County/other smaller counties. They're rules should not collide with our rules, and I think certain restrictions for differently populated counties should also have different, less restrictive rules.
7/21/2020 13:17:01	Jenna	Parry		Hoyt	I think we need to open School back up on time. These kids have been juggled around enough, they need stability in their learning. They also need to be able to focus on their education instead of playing with masks ect. We need to stop installing fear and anxiety in our kids, which is what will happen with all these recommendation!

7/21/2020 13:17:10	Katie	Osner		Hutchinson	Masks should be optional and opening should be left to the school district and parents working together
7/21/2020 13:17:22	Madison	Thompson	USD 457 Teacher and P	Garden City, Ks	I believe that we should follow the State Order. This will help ensure a safe plan of education. We cannot “jump the gun”. Staring unprepared increases the likelihood that we would have to return to distance learning due to high numbers of Covid-19 cases.
7/21/2020 13:17:25	Kristin	Silvers		Olathe	Schools need to open up for kids!! Kids need normalcy. Kids need meals many don't get without schools. Some kids are abused at home.
7/21/2020 13:17:27	Shana	Lane		Lawrence	Please delay. Better yet, delay until 2021.
7/21/2020 13:17:35	Robert	McCowen	None	Manhattan	I appreciate the fact that the Governor is keeping the best interests of students, faculty, and staff firmly in mind.  In a situation this critical, decisions have to be made based on data and evidence — and it's clear the Governor is doing so.
7/21/2020 13:17:44	Krickit	Ketterl	NKESC	Oberlin	I work for the Northwest Kansas Educational Service Center. Please consider those of us who are itinerant when making your decision. I do not know if it is best to start now or to wait but I do not feel that it will be best to leave it up to each individual district because that could make those of us who are itinerant have a nightmare of a calendar. I have been in the classroom for the past two weeks just started week 3 with a small group of preschoolers. I can tell you that it was some much needed teacher therapy to be back with those kiddos again and we do have the majority of our preschoolers leaving a mask on for the 2 1/2 hours that we are in the classroom as well as staff members. We can do it and we can do it safely but please make sure that we all have the same start times. Thank you for everything you do!
7/21/2020 13:17:45	Jessica	Delgado	district 5	Pratt ks	I'm not pleased with school re opening , more cases are coming out everyday , there's no safe way of re opening , I understand kids need school but not by risking them attending thru a pandemic ,absolutely not
7/21/2020 13:17:47	Dianna	Zampieri		Hays	I approve of Gov. Kelly's plans to keep our children, teachers, and families safe.
7/21/2020 13:17:54	Jennifer	Findling	Parent	Wichita	Schools need to invest in modifications to buildings to make them safer in regards to the virus. Improve ventilation and HVAC systems. Possibly install UV sanitation systems in the HVAC system, so that recirculated air is sanitized with ultraviolet light. Air purifiers should be placed in each classroom. Free masks should be distributed to those students who need them. Ensure that windows open in each classroom, so the classrooms can be aired out several times a day. Classes could be held outdoors, if the district invests in shade structures. Plastic partitions that sit on desks can be used to divide students from each other. Social distancing within classrooms needs to happen. Fewer students per classroom. Schools could utilize modified schedules so that there are few were children in the building at a time. Or utilize unused spaces, such as recreation centers. Some churches might be willing to allow students do use their Sunday school classrooms. Teachers need a lot more training in how to use video based learning strategies. Volunteers from the community can help build outdoor classrooms. Money from the state should be made available to make changes to school buildings. Parents in the community would be willing to organize fundraising drives to provide support for safety measures. A lot of families, including mine, intend to keep their children home for several weeks, to see how things go after schools are open. Staffing schools should be flexible, so that teachers can shift to in person instruction, as students return to school at various times.
7/21/2020 13:18:04	Aubrey	Watts		Hutchinson	Please follow Governor Kelly's order to postpone the start of school until September!
7/21/2020 13:18:04	Catherine	Theisen	Myself	Lawrence	I am writing to request that the KSBCE and Governor Kelly exclude outdoor school-sponsored athletic activities from the proposed three-week moratorium on instructional and extracurricular activities. Students have been participating in sports conditioning workouts for most of the summer in preparation for fall sports. These activities occur outdoors, where there is significantly less risk of COVID-19 transmission. Imposing a three-week hiatus would cause the students to lose strength and conditioning gains they have made and increase the risk of injury to the students when they begin competing after the moratorium.
7/21/2020 13:18:11	Jenny	McAtee		Pratt	Kids need to be in school for structure and learning. By September, it will almost 6 months since they have been physically instructed by a teacher. They are losing their education and future. I understand COVID is an issue but it isn't going away. We can't keep denying education and socialization of our youth and future leaders.
7/21/2020 13:18:24	Heather	Birkinsha		Atchison	Please day until after labor day. Faculty needs time to implement whatever measures are deemed necessary (desk spacing, new schedules etc). Our teachers and students deserve a healthy well-planned return to school.

7/21/2020 13:18:42	Tracey	English	Parent	Lawrence	DELAY SCHOOL START!!  When schools are allowed to have in person class, I intend on sending my kids (6th and 9th grader). I understand Governor Kelly's reasonings begins delaying school. I am a nurse at Advent Health Shawnee Mission. We too had to adjust to face masks, temps being taken, etc. I would like to suggest that kids in the BV school district (and everywhere) start school as their school calendar had intended (August 13 for BV) but rather as distant learning (if in person classes are not allowed). Give the kids 3 weeks to just review topics and get back into the swing of things. We desperately need normalcy and a schedule and I think online learning can achieve that. So when schools are allowed to start in person on Sept 8th, kids will have already had review course work and they will be ready to go. Let's face it, it's not the teachers who are ordering masks, thermometers, and hand sanitizer. While secretaries and other people do the ordering, let the teachers start teaching so our kids aren't behind.  And please, I hope you don't cancel sports/activities. My kids are in sports and Marching Band. For so many kids, this is their outlet. They need these sports/activities for their mental and physical health.  Thank you for considering all the above.
7/21/2020 13:18:48	Sara	Kreisel	Parent in Blue Valley Sc	Overland Park	Sara Kreisel
7/21/2020 13:18:49	Elizabeth	Thurston	My children	Manhattan	Please keeps schools closed until after Labor Day. This gives us 3 more weeks to prepare , organize and hopefully see our numbers decline.
7/21/2020 13:19:02	Jason	ROMANISHIN	public schools	overland park	Thank you Governor Kelly for having the courage and resolve to show that you care about Kansans and their children. I support and appreciate the delayed start at the very least. I am a public school teacher who is concerned with what the school year will bring. My household consists of two employees in public education and one child in the school system. We are fearful of contracting the illness and even more that our child might acquire the heart disease moving about the youngest populations. Please continue to keep us in your heart and decision making. We want to be in the classroom, but expecting us to do so at this time is a death sentence for some and, at the very least an impending risk to a greater health crisis. Thank you and please keep fighting.
7/21/2020 13:19:05	Jerilyn	Johnston	N/A	McPherson	Do NOT delay school.
7/21/2020 13:19:07	Brad	Chamberlain	self	Eureka	No masks for kids. Governor Kelly does not have the authority to enslave our kids!
7/21/2020 13:19:08	martha	romero	community member	topeka ks	Please delay 2020 School year K-12 until it is proven a slow down of coronavirus We must make sure that our teachers, students, and all staff are in a safe environment to continue their learning without fear.
7/21/2020 13:19:10	Patricia	Ahern	Wanamaker Elementary	Lawrence	PLEASE uphold the EO and delay the start of school!! Nothing has changed since March except more sickness and death. As a teacher, we are asked to sacrifice many things for children and their families - our lives should NEVER be one of them.
7/21/2020 13:19:15	Ryan	Pfannenstiel	Parent of 3 students in E	Hays	I believe waiting until After Labor Day is the smart choice during this time. Giving our schools and faculty time to prepare for whichever plan they choose to keep our children safe. Please vote to wait until after Labor Day to start school!!
7/21/2020 13:19:20	Susan	Kite		Scott City	Please do not delay the openings of school. And more than that please do not stop activities and athletics. The kids have been in the weight rooms and open gyms all summer with no problems. This is getting out of control.
7/21/2020 13:19:35	Nicoleta	Dimitriu		Topeka	Delay schools and move the learning on line. It's the only safe way!
7/21/2020 13:19:47	Enrique	Mtz	Social	Cd juarez chihuahua	No apertura ,ser maduros,anuncian aumento de c19 en kansas,alumnos no harian caso de usar medidas de control,para que arriesgar,definitivo mi pensar esperar más tiempo,es mejor prevenir que lamentar,saludos
7/21/2020 13:19:51	Catherine	Wright		Wichita Ks	We need to get our children and grandchildren back in the classroom.It's time the teachers union be concerned about the children and about social issues.

7/21/2020 13:19:52	Kathleen	Parkins	Teacher	Shawnee	Delaying the start of school will give us additional time to lay in PPE and sanitizing supplies as well as fine-tuning how we can safely work with our middle school students. Johnson county is not ready to start school based on our current state of virus spread. We have enormous numbers compared to when we closed schools in the first place for the safety of staff and students. Why would we go back if we are in a worse place? And, for purely selfish reasons, since I'm 62 years old, I would like to know who will substitute for me if I get sick? Who will take care of me, as I live alone, if I get sick? Perhaps, until these concerns can be better addressed, we should take a little more time and get a more concrete plan developed.
7/21/2020 13:20:00	Sara	Mcknight	Teacher	Wichita	We should delay the school year for the safety of teachers, admin, students etc.
7/21/2020 13:20:16	Sheri	Bartel		Holton	Please support the Governor and keep Kansas teachers and students safe. Starting as late as possible gives a chance for the numbers to go down and teachers time to prepare.
7/21/2020 13:20:17	Jessica	Pryor	Parent	Lawrence	Delaying start makes sense since numbers are rising. Going back with uncontrolled infection growth makes no sense.
7/21/2020 13:20:17	Vic	Adams	self	Yates Center	Vote NO on mandating masks for school children.
7/21/2020 13:20:18	Haley	Jackson	Self	Russell	Please vote in favor of Governor Kelly's and the Kansas dept of health's executive order 20-58.
7/21/2020 13:20:19	Heather	Woods		Manhattan	I am very much in favor of Governor Kelly's leadership during this time, including her recent executive orders on school delay and sanitizing/masking issues. Kelly is very clearly leading using an evidence-based approach to determine her next steps and frankly, has science on her side. I hope that politics will not stand in the way of caring for our children and our communities, including teachers, staff, administration, janitorial workers, and literally any other community member that comes into contact with them.
7/21/2020 13:20:23	Holly	Stetler	Kansas City christian sc	Kansas city	Please allow districts to make decisions regarding school start dates and not make a blanket policy for the entire state.
7/21/2020 13:20:33	Kenton	Noonan		Topeka	The state schools need more time to develop plans and to communicate these plans to their teachers! Schools are not adequately prepared yet and three more weeks would allow them to make decisions and communicate what they need from teachers, parents, and students.
7/21/2020 13:20:33	Ivy	Tatum	Kansas parents	Winfield	Kansas schools take great care of their students and have the communities in mind when they make decisions. Some communities have been hit harder by COVID than others and I feel that it is unfair to make every district fit in to one mold. Our kids NEED school to open. I'm asking that you to give our schools, who know us, the choice. They've heard us and were prepared to make a decision based on parent feedback as well as your recommendations.
7/21/2020 13:20:39	Jeremiah	Zweifel		Augusta	Start school and activities on time
7/21/2020 13:20:43	Cali	Burke		Kansas City	Please respect the data that has shown rampant infection rates and dramatic increases and postpone the opening of schools, many of which are terribly ill equipped- with 2 bathrooms per floor making even hourly hand washing a complete struggle for all students and too many students to properly distance in rooms. Please keep schools closed until the scientific data can show a decrease in cases.
7/21/2020 13:20:44	Samantha	Zweifel		Augusta	Schools and activities need to start on time.
7/21/2020 13:21:00	Alicia	Boor	Parent	Hoisington	I support Governor Kelly's executive order to keep schools closed until after Labor Day
7/21/2020 13:21:01	Alison	Woodward		Topeka	I DO NOT think in-person or hybrid schooling is appropriate and/or safe at this time. As a parent and a HS staff member, I think classes should be taught online for the Fall 2020 semester due to the risks associated to COVID-19 exposure.

					<p>I need to know that my child, her classmates and teachers will be safe. Opening schools right away should only happen when all necessary precautions have been thought of and implemented. My faughters emotional state is important. We have taken action with her to ensure we are not overlooking anything.</p> <p>If Bars and nightclubs are closing to help reduce risk of contamination because of the spike of younger people infected. How so you plan to enforce the same guidelines with kids? Will someone be in every bathroom monitoring? Will water bottles be given and sanitized daily by parents or staff? Back packs carry millions of germs, just like the bottom of shoes.</p> <p>What about bussing, how long will it take to bus our kids home, in between sanitizing? You can't expect a child to hop on a bus right after another kid gets off. The vinyl seats carry contaminates very easily.</p> <p>I do not have an answer to everything.</p> <p>I do know, i do not want to have my child, her friends, family, teachers or staff in a hospital. Even worse yet, I do not want to attend any funerals or hear the cry from any school about someone passing from Covid or anyrhung else.</p> <p>Please, protect my child and all our kids.</p> <p>Thank You,</p>
7/21/2020 13:21:17	Kenneth	Houpt	family	Valley Center	Ken Houpt
7/21/2020 13:21:20	Stephanie	Starling	Olathe	Olathe	What happens if 1 teacher or 1 student gets corona. Does all the classes and students all have to quarantine? If so that means the parents also have to quarantine because they have been exposed. There is a domino effect. I would rather keep the schools closed a little bit longer than reopening and exposing a lot of people when it could have been prevented.
7/21/2020 13:21:22	Breanne	Prior	Parent	Marion	Normal start date!
7/21/2020 13:21:23	Michelle	Fellere	My middle school child	Wichita	I definitely support the delay of school at the very least. I would feel so much better if school doors were closed until a vaccine is available or until the spread of covid is significantly less. I am terrified of my children returning to school. I am considering keeping them home. They go to Maize, and distance learning will likely be an option. However, my children learn much better in person. They, their father, and I are all concerned that their educations will suffer if they can't have in person learning. We would all feel better about it if all Kansas students were distance learning, and they were all on a level playing field. If educators were preparing now to make distance learning the best possible option, instead of waiting for a final decision to be made, all of our children would benefit. I would be happy to contribute to any further surveys or questions.
7/21/2020 13:21:27	Alison	Brookins		Andover	I'm just not ready to send my son, who will be a senior, back to school yet. I am high risk so in part it's about me. And while schools can offer cleaning and sanitizing, they can't get everything. Let's delay the start so we can slow down the cases. My son did poorly with online/distance learning, so he needs the structure offered at school. Thanks.
7/21/2020 13:21:30	A	B		Wichita	When TX is not doing in class and we are the highest corona per capita why would you even think about starting on time?
7/21/2020 13:21:38	Michelle	Neufeld		Inman	Yes please delay due to rising covid cases. I'm a nurse and I'd hate for my kids to get sick or their teachers and peer.
7/21/2020 13:21:45	Allison	Southerland	USD231 & also a parent	Gardner	Thank you for taking comments. Please, I implore you to uphold Gov. Kelly's order to delay the start of schools. This time to prepare to make schools safer is imperative! I am classified staff and therefore probably won't even get a paycheck during this time...HOWEVER, my priority is absolutely on the safety of our schools. I would rather be broke than dead! It would be irresponsible and dangerous to open schools prematurely. We CANNOT count on each individual area to do the responsible thing - we tried that with masks and it did not work. This is not an issue of personal freedom when personal choices affect the WHOLE COMMUNITY. Thank you for your time.
7/21/2020 13:21:46	Amy	Behrens	St. John's Catholic	Hanover	I feel that the school should wait until sept 9th to be safe!
7/21/2020 13:21:49	Victor	Wynn		Bel Aire	Please let the governor's order stand.
7/21/2020 13:21:55	Kristal	Helton	USD 102	Cimarron	I want to see my kids starting school as scheduled in August. I also do not want it mandated that they are required to wear masks. I feel that is a decision left to us as parents.

7/21/2020 13:21:57	JAMES	ALLEN	Self	Hutchinson	<p>Thank you for your decision to delay the school year's start. I know this was a tough decision based on many factors. The fact is that back in March and April, the state laid out its plan to shut down and reopen, with relaxation for restrictions being based (among other things) on a downward trending of cases. We saw a brief drop followed by the last couple of months of consecutive surges. This leads me to believe that the current environment is not conducive to relaxation of preventive measures against the spread of COVID. I would go as far as to say that if the state as a whole does not see a two-week drop by the time the delayed school year is planned to start, the semester itself should be cancelled. It is an unfortunate fact that children spread disease much easier and wider than adults, and I see reopening schools too early as a risk multiple magnitudes greater than what we have seen so far after the initial relaxation of restrictions. I believe the return to school needs to be based on scientific analysis of current trends in Kansas. Furthermore, I believe the school board has already begun making plans for conditions upon reopening--my opinion, based on WHO and CDC recommendations, is for children to be required to wear face masks while indoors at ALL times, wash hands before all meals, and observe social distancing of at least 6 feet while indoors. While outdoors, children should be encouraged to maintain distance from each other and avoid sneezing or touching each other. Teachers should explain the current understandings of how the virus spreads and impress upon the children the severity that the virus poses. Thank you again for your decision to delay re-opening and for reading my comments.</p>
7/21/2020 13:21:58	Dana	Wilson	Children	Great Bend	<p>Education was turned upside down in March and despite the best efforts of local school boards, it essentially ceased to exist for a lot of students who need it the most. Low income, rural, and minority students suffered the most due to lack of internet access, language barriers, and interpersonal dynamics of their households. Special education students have suffered losses that may never be regained!! It is time to get our children's education back on track with appropriate health and safety considerations. Every day is another loss for our students. School districts have been planning their reopening since this began &amp; its time to take care of our children's educational, social, and mental health!! Please don't give a blanket stamp of approval to this executive order. Let each local community decide what is best for them. NOT EVERY COMMUNITY IS IN CRISIS IN KANSAS DUE TO COVID 19!</p>
7/21/2020 13:22:04	Derek	Bristol	Parent	Newton	<p>Waiting until Sept. 8th isn't ideal, but it is necessary in order to provide schools with time to gather resources and make plans to keep personnel and children safe. Please accept the Governors executive order. It is the right thing to do.</p>
7/21/2020 13:22:09	Mira	Coulter	USD 259 - paraeducator	Wichita, KS	<p>Please make the right decision. Please make the safe decision. We must keep our students, teachers, and other school staff safe. Forcing school to open at a time that the data specifically tells us it is not safe, is not responsible, and it puts precious lives in danger for no reason. Delay the start of school, allow schools to prepare for the hybrid environment of learning - because with the uncertainty of long-term effects in regards to Covid-19 - that is the format of learning schools need to start making the new "normal" until further notice. With that being said, organize and create a tiered guidance system for school districts to follow - similar to the national "red, green, yellow" status indicator, in terms of Covid-19 cases - so that districts have guidance for regulations based on current testing data and know how to respond if the situation changes (for better or worse, respectively). Some school districts may not need to have as strict regulations as others based on their current Covid-19 county data. This should all be considered in a comprehensive plan for education during a pandemic. Wichita, in particular, is not one of the counties that can operate in a traditional way - Wichita's case numbers are rising, therefore stricter regulations need to be in place. We must keep our people as safe as possible - we must evolve with the current situation. These are unprecedented times and it calls for non-traditional, "thinking-outside-of-the box" measures. Delay the start of schools so that we can keep everyone as safe as possible. Support (and fund) online and hybrid learning environments until it is absolutely, without question, safe for everyone to return to a more traditional school situation.</p>
7/21/2020 13:22:16	David and Judy	Greenberg	Grandparents	Shawnee County	<p>We are in support of the Governor's executive order because as more data/evidence comes out children get the virus and are major transmitters to other students, school staff and family members.</p>

7/21/2020 13:22:27	Aaron	Dale		Topeka	I urge the Board to uphold the governor's order regarding delaying the start of school. Our schools need additional time to prepare for these unique challenges, especially since the governor is mandating many of the board's recommendations. Schools need to implement a hybrid learning option, which will take significant preparation and coordination. If the start of this school year is rushed I fear it will be extremely chaotic. Thank you.
7/21/2020 13:22:28	Bryce	Wichert	parent	Hillsboro	Please delay school until after Labor Day. Thanks.
7/21/2020 13:22:28	Erin	Chamberlain		Topeka	Schools should delay opening
7/21/2020 13:22:40	Emily	Beecham		Lawrence	I have 3 elementary age children an teach high school in a school of 1600 students. When cases started to rise in Douglas County I felt sick and anxious about the return to school. Governor Kelly's announcement of her executive order instantly settled my anxiety. Please listen to what teachers are saying. Please approve Gov. Kelly's order and delay the start of school. Keeping kids and school staff safe should be your number one priority. Thank you.
7/21/2020 13:22:45	Erika	Lehman	I'm a parent	Olathe	PLEASE! PLEASE! PLEASE! DO NOT send kids back to school until the pandemic is under control. Teachers, staff, and students WILL DIE. Kids will bring the virus home and kill loved ones. Any idea what that can do to a child? To be responsible for killing someone they love? Blood will be on your hands. Please make the moral decision.
7/21/2020 13:22:46	Julie	Perkins		Olathe	School should be able to start as soon as possible! I also think it should be up to the school district to decide.
7/21/2020 13:22:47	Whitney	Freerksen	Freerksen family of 5	Lyndon	School should start on time in August. There will no doubt be a need to shut down face to face instruction at some point(s) this year. The teachers were able to finish the last school year with online instruction after only 1 week of preparation. Even if classes begin only online, the kids can't risk spending more time completely disengaged in learning. Students attending online school (ie., K12) will not be falling behind like the public school children. It's a disservice to these children to delay school starting.
7/21/2020 13:22:59	Aaron	Leinmiller		Wichita	A blanket delay incorrectly assumes that no schools are prepared, and is an overreach of government. I'm incredibly thankful to have my daughters attend Classical School of Wichita, where the school leadership has already thoroughly considered what precautions and modified procedures are prudent, published a detailed plan including contingencies, and is ready to welcome kids back on August 20. Many school administrations may just be waiting for direction rather than proactively preparing for the fall, but that's no reason to penalize the schools, students, and families that are on the ball. Furthermore, in my opinion the government should be limited to providing INFORMATION and making RECOMMENDATIONS that schools/families may consider before making choices for themselves for their particular circumstances. Thank you.
7/21/2020 13:22:59	Kelsey	Zabel	Parent	Olathe (De Soto SD, 232	Please support the order to delay the start of school. I want nothing more than to send my kids to school this fall, but this extra 3 weeks will allow the leaders and teachers of our district to do it in the best way possible. Thank you for your consideration and your work on this matter!
7/21/2020 13:23:01	Bailey	Betts	USD 253 & Parent	COTTONWOOD FALL	I do not think that we should be going to school before Labor Day. Also, I believe a hybrid or remote learning should be the only option. I don't feel it to be safe for students and staff to be in buildings face to face, even as much as I WANT to be back to school. It will not be quality education for anyone and as much as the students need social interaction, it wont be a healthy social atmosphere as students will not be able to do many things that they normally would be able to do with friends!
7/21/2020 13:23:10	Marla	Wiens		Topeka	Vote YES tomorrow. No schools should open until scientific data proves it is safe to do so.
7/21/2020 13:23:15	Corrie	Kramer	Gardner Edgerton Schoc	Gardner	my children proved they cannot learn virtually. Please open the schools back up. The sooner the better. Kids need the interaction of their peers and teachers. Doing it over a computer is not the same. Bring back in school learning
7/21/2020 13:23:17	Laren	Newboles		Hutchinson	Please open schools on time. Our children need to get back to routine. Let the kids at high risk (and others that are afraid) distance learn until parents feel it is safe for them to cone back. Who is to say the governor won't try to push it back again in a few weeks? Thanks for listening. We are praying for you all and the decision that has been put on your shoulders.

7/21/2020 13:23:18	Hannah	Merle	USD320	Manhattan	As a teacher of 18 years, I am asking you to delay schools for the safety and health of students, teachers, secretaries, paras, bus drivers.....all those who make a school on a normal day flow. This is not normal times, so I think it is crucial to give the schools time to prepare and be ready to work with kids during this COVID time. This is not the moment to wing it, and hope for the best. Teachers love their students and want the time and safety measures to be there for them in the safest and most healthy way possible. Health and safety first...,without that, the rest doesn't matter. Please delay schools.
7/21/2020 13:23:25	Evelyn	Moore	USD259	Wichita	Don't delay school, do a hybrid, wear masks, use precautions...but kids need normalcy and an uninterrupted education.
7/21/2020 13:23:37	Jenn	Ayres	USD 345/ SHS and Top	Topeka	Let the individual school districts make their own choices. Please do not let the governor force us into a one size fits all. Smaller schools like TLS have different capabilities to socially distance. Even larger schools such as SHS with USD 345 have good options for all of us. Please let us decide what is right for our kids working with the educators/administrators in our schools.
7/21/2020 13:23:44	Jeff	Jordan		Hays, KS	Listen to the science. Use common sense. Trust the governor. One life lost is too much.
7/21/2020 13:23:46	Charles	Engle	Me	Wichita	Do not take chances with children or force parents, teachers, or Admin to take on medium to significant risk related to virus. Error on side of caution. This is serious!
7/21/2020 13:23:52	Heather	Whiteside	Parent	Leawood	I value the concerns on children going back to school; however, the statistics from daycares and reopened schools across the globe do not support the governors concerns of spread within schools. Furthermore, if schools are delayed three weeks, there should be an extension of the school year three additional weeks next summer. I am fortunate to have one son in a private high school in Missouri, they have used their time over the summer preparing for the start of school on time. It is a shame that Kansas schools are claiming that they are not ready, and Dare I ask what three additional weeks is going to do?? Please open our schools! For the amount of money our family contributes to taxes, we should be provided this service or refunded!
7/21/2020 13:24:05	Korda	Griffith		Hanover	It is very important to start our school year at its normal time frame with no delay. Many children as is my very detail and time scheduled and it is very important to him to begin as normal ! The transfer of covid from kids to kids has been proven rare if any . This is hurting the families and children who rely on school for their daily routine ! If the parent, student and teachers feel safe to attend then it should be allowed !
7/21/2020 13:24:08	Katherine	Liggett	USD 253	Emporia	I don't see a point in delaying the start of school. You would only be delaying the inevitable.
7/21/2020 13:24:10	Terese	Johnson	Individual and former sc	Wichita	Please approve the after Labor Day opening of schools to allow the professional staff to finalize their plans for keeping students and staff as safe as possible.
7/21/2020 13:24:25	Alesia	Smith	my family	wichita	PLEASE PLEASE do not delay the start of school. Our children need the structure, academics and socialization desperately. It would not be in their best interest to delay the fall start of classes.
7/21/2020 13:24:26	Toni	Wheeler	None.	Lawrence, Ks	I fully support the Governor's recommendations to delay the start of school. If schools are evaluating sports and other extracurricular activities, varsity sports and activities for seniors should be a priority over all others.
7/21/2020 13:24:27	Wendi	Engle	My household	Olathe	Please follow the governor's decision to delay school start up.
7/21/2020 13:24:29	Connie	Ritchie		5853 Park Circle, Shawnee	Do not send our children and teachers to a school building until KS has had 14 days of no new Covid 19 cases.
7/21/2020 13:24:30	Tara	West	USD 288	Lawrence KS	As a parent and teacher, I strongly support Governor Kelly's Delay Order. We have nothing to lose by doing this, and everything to gain. Kansas covid cases are steadily trending up. This is not the time to rush into starting school. Our students and staff will benefit from this approach.
7/21/2020 13:24:33	Natalie	Boone	USD # 386 Madison - V	Toronto, KS	I think this would be a horrible decision for our students education, I myself am a high school teacher and parent, and the consequences for this are far worse than the prevention of covid. Honestly if you think of the amount of kids that are in bad situations right now and let's be honest if you look at the numbers it shows that kids are far less likely to contract and spread this. I think it is also important to not force kids to wear masks. I think that would be a poor decision on the basis that they will not leave them alone and they are going to cause way more problems.

7/21/2020 13:24:35	Laura	Austin	Topeka Public Schools	Topeka	I have taken social distancing, face masks, and hand washing/cleaning pretty serious since March. Thankful my family has stayed healthy. As a teacher I am worried that if schools reopen in August kids and teacher's will get stick. The virus will spread quickly once it is in our schools. I would hate for anyone to die. As a parent of a fourth grader and two kindergarteners I worry about my kids and what they are going to be exposed to. Even taking all the safety measures will not prevent the virus from spreading when our numbers are so high. Please vote to delay the opening of our schools. It needs to be done when our communities are safe so our schools can be safe too.
7/21/2020 13:24:54	Carrie	Baumann	N/a parent	Eudora	I am writing to request that you honor Governor Kelly's delay in starting schools. A few weeks will allow more time for schools to prepare and determine how best to educate our children in this pandemic. Pushing them back to school has no benefits, only risks.  We hope that each school district will provide learning options that fit each family. We would love to be able to send our girls back to school, but we will not do that if we feel the risk is too high. We hope that the school will offer virtual learning options. If they do not, we may decide to homeschool them.  The safety of our children, their teachers, and all school staff is in your hands. I'm not willing to gamble with their health or lives. I trust you aren't either.  Thank you,  Carrie Baumann USD 491
7/21/2020 13:25:00	Pam	Gull	Retired volunteer	Circle District. Reside in	In favor of postponing school until September and reevaluate the situation.
7/21/2020 13:25:00	Wallea	Bergsten	Bergsten Day Care	Clay Center	School should happen in August. Also no masks in the child's classroom. Masks in the hall maybe but not in the classroom
7/21/2020 13:25:03	Claire	Campbell	My 3 Children	Overland Park	Children belong in school. They need to use their beautiful immune systems that God gave them. And I get it, teachers are scared. But with all due respect, we were all scared when we first went back to work. Their education is essential. They've had so much stripped from them already. I am a dental hygienist that sees 9 patients a day. Every child and every parent I have seen wants to be in school. Please do not let the more vocal, minority win. The silent majority wants their children in school. And no we are not selfish. Also, please please please look at the recommendations of the American Academy of pediatrics. They have emphatically stated that children should be in school without any restrictions. Why is no one talking about this recommendation? Why only the governor's?
7/21/2020 13:25:06	Amy	Sand		Lawrence	Please delay the school year for the health and safety of our students and teachers. Better safe than sorry!
7/21/2020 13:25:11	Trisha	Delong	BV high school, BVN h	Overland Park	As a teacher I want to be back in person with my students. Virtual learning isn't working and school is more than an assignment. Middle school and teen students need connections in person with peers and teachers. It is more important at their age to development. Missing activities that give kids sense of self, teamwork and accomplishment and bring part of a team or activity provides valuable life lessons that aren't learned in a screen. Even kids in Johnson county are living in bad situations with school being their only escape. Please get kids back into school...teachers want this so stop letting the union vote for all of us.

7/21/2020 13:25:11	Joe	Husband	One the will soon be for	Kansas City Metro	My spouse is an elementary teacher in Missouri. How DARE the Missouri Governor risk the lives of students, teachers, and families. What an insensitive, ignorant man. He will have blood on his hands, and the people will seek justice. There is nothing that can be done to stop an outbreak from occurring in schools. She has two underlying health conditions. She will catch this and bring it home to me. I also have two underlying health conditions. We are already planning our funerals. Children are going to DIE! Teachers are going to DIE! Family members of both students and teachers are going to DIE! By acknowledging that students will catch COVID-19 directly by going to school- which is now public record - the governor will be held 100 percent responsible for every COVID-19 death caused by the spread of this virus in schools. His remarks were that of an insane man. He should resign. Schools must remain closed. These are children - not guinea pigs. There is a reason - far too advanced for this governor to understand - why young students haven't been suffering in greater numbers - they were taken out of school last spring! How can we, as a society, allow one person the power to murder 100s or 1000s of people? That is what the idiot in office is doing by keeping schools open. I want him on TV today acknowledging he will accept full responsibility and full punishment (death penalty) once the deaths caused by the opening of schools start to occur.
7/21/2020 13:25:12	Kyle	Ruder	BV high school	Stilwell	Open the schools in person with all sports and activities. Enough is enough...this is not any worse than the flu and learning virtually is not teaching. I'm an essential worker and have been working this entire time. Teachers can go teach in person as that is what is best for kids. Mental health is suffering with teens in particular ...open the schools!
7/21/2020 13:25:12	Kelli	Ruder	Blue Valley High School	Stilwell	The infection rate in joco is .4% The mental health of your teen communities is at stake. Kids need to be in person in school and fully participating in all activities...sports, choir , band and clubs.
7/21/2020 13:25:14	Darci	Jones	business manager	pratt	leave opening decision to local school boards
7/21/2020 13:25:14	Ashley	Kleiber		Hillsboro	Aug 20 start date!!
7/21/2020 13:25:30	Susan	Rothschild	Topeka 501 School Dist	Topeka	I am writing to urge you to accept Gov. Laura Kelly's delay of school opening this year. As a paraprofessional in Topeka who works with special education elementary school students, I am well aware of what a delay means to our students and staff. While all of us would prefer to be back in the classroom, I feel it is most important that we do it safely for all of us. I personally have asthma and diabetes and I work with many medically fragile students. I do not want them losing any more educational time than necessary, but I DO NOT think it is safe for any of us to return as our state COVID numbers are as high as they are right now. I participated in online learning with students this spring and I believe our district had some of the best materials available in the state for our students. Like other staff members and parents I am reviewing our district's extensive current plans for re-opening schools. While I still think our district is addressing the needs of our students, we need some more time for our state to bring those numbers down before we all are exposed to one another again. I personally am continuing to shop for groceries online and am social distancing as much as possible and wearing a mask when I have to be in public. I am not convinced enough other people are doing such things to make our schools safe yet. Without her order, I fear that many folks will believe it is fine to resume our previous lives and quit taking precautions and will further endanger our children, other families and staff members. We need to do this together. I understand that some areas may have fewer cases than others, but as we have seen nationally and worldwide, that does not mean any place is immune nor that relaxing our standards prematurely leads to continued caution. Please help us protect our kids. I work with too many children who already are exposed to regular illnesses from thoughtless people. Please don't expose them to a dose of something that has already claimed the lives of more than 140,000 Americans this year. None of us wants to be responsible for killing a child who was simply seeking an education. Please back our governor's leadership. All our children may be falling behind educationally right now, but is it worth risking their lives? Our districts and teachers are doing everything possible to try to make up for lost time and think of creative ways to keep our children learning. I believe we can both help them learn and keep them safe. Give us a chance to prove it with the delayed start.
7/21/2020 13:25:52	Jessica	Duhon		Harper	As long as school opens at some point and the kids get educations they need out in place all the safety guidelines you need!!
7/21/2020 13:25:57	Aaron	Smith	private citizen	wichita	I am not in support of delaying school. As a father of three it is my opinion this would very negatively affect my children's academics and social health.

7/21/2020 13:26:00	Teresita	Bermudez Albert		Shawnee, KS	I agree with the decision to delay school until after Labor day. We need a more detailed plan in place for our teachers and staff! Please give them time to put this plan in place!
7/21/2020 13:26:08	Brad	Guhr		Newton	Please follow Gov. Kelly's EO to delay the start of school to allow administrators and staff and collaborating entities the additional time needed to to roll out the opening of school as smartly and safely as possible. Thank you.
7/21/2020 13:26:14	STEPHEN	RAGAN	None	Olathe	Yes, Open schools as regularly scheduled. It is critical for students, and particularly young children, to be allowed to go back to school on time this fall. Normal precautions, such as adults in schools social distancing and wearing masks (perhaps) when working closely with each other as well as cleaning and sanitizing surfaces often should be employed.  But under no circumstances should schools remain closed for the fall. Child abuse, depression and even suicide is highly likely to increase dramatically from extended closure of schools. Children are much less vulnerable to this virus than they are to other dangers in their environment.
7/21/2020 13:26:25	Cintha	Hernandez		Overland Park	I agree with the Governor's decision and please continue to delay school until it is safe. Also as a health care provider I think it would be important to educate some of the families/parents out there that still don't believe this virus is not real. It is disturbing that I continue to see people who are in complete denial about what is going on.
7/21/2020 13:26:26	Jonathan	Elliott		Plains	Please support EO 20-58 to give schools time to prepare, allow schools time to work with parents to identify the best schooling setup for each student, and to give parents time to acquire adequate cloth masks for their students.
7/21/2020 13:26:30	Marcy	Sunderman	Teachers	Go back to school now .	Get back to school while the cases are down . Extend school hours .
7/21/2020 13:26:31	Len	Melvin		Hays	The kids are ready and need to be back in the classroom. The research is strong behind the idea that they need structure, friendships, activities, and opportunities to gather. Many need a good meal a safe place to be. I know this has to be a very difficult decision. Thank you for your diligence in working through this.
7/21/2020 13:26:32	Sara	Esther		Kansas City Kansas	For many students, schools are their safe haven in an unpredictable world. We need to take all steps possible to ensure that schools remain a safe place for students and staff during this pandemic. Right now, that means pushing back the beginning of the school year until Labor Day and investing heavily in technology and training for distance/blended learning. Kansas currently has the highest case rate per capita in the nation and its only getting worse. Now is not the time to sacrifice the psychological and physical health of students and staff in some misguided attempt to re-start the economy.  As a teacher, I want to be back in my classroom. I want to see my kids, I just want to do so in a manner at at a time in which we have some chance of keeping people safe. Right now it's tempting to fall in to the thinking that the harm of students being out of school is worse than the possible harm done my the pandemic, but remember that we will not be sending them back to a familiar and physically social environment. They will not have group projects, no shared supplies, no choir, band, hugs, or physical contact with each other or staff. I wonder if being held to what can only be described as a rather penal standard of behavior would be more damaging than remote learning. Seeing their friends without touching, constant tension and pressure to maintain social distancing, the looming and ever-present threat of rolling quarantine and the chance that they, their friends, teachers, or families could become sick and die at any time would be an enormous strain on kids.  I teach in a district that serves 23,000 students. If we reopen in person, many of them will get sick, and--God forbid--someone very well could die. Some teachers and staff most probably will die. In my mind, the trauma that would cause probably outweighs the benefits of in-person school at this time. We can catch kids up academically, but dead is dead. We should take any opportunity we have as a society to slow the spread of this virus and ease the burden on our medical system. In this case that means delaying--only delaying not canceling--school for a short time to reassess cases and give teachers a chance to plan out an effective model for what will be a challenging year. Let's keep schools safe. Delay re-opening.

7/21/2020 13:26:43	Doesnt	Matter		silverlake	<p>children should not have to wear masks all day at school and until its safe to go without them kids DON'T belong at school.</p> <p>Some kids already have a hard time asking for help with work &amp; having something over their face with make them feel like they're not allowed to talk and ask for help or answer questions.</p> <p>Children in special education definitely need to be considered which has NOT been addressed. Those that have IEPs already struggle as it is putting them through this situation will be terrible.</p> <p>Children need to be able to be able to sse their teachers talking when it comes to spelling, reading, etc... how can they do that if the teacher has a mask cover her face? School needs to start but online until the numbers go down and its safe for them to return. Chilren who need assistance with special education and testing should be allowed that care when needed at school. So that no child is left behind in this mess and can continue to strive in school. Laptops need to be provided for each student that is doing online work. Starting on time is better for these kids than putting it off. Why wait? Get these online classes started while we wait for numbers to go down &amp; then bring the kids back into the classroom &amp; they'll be ready to go!</p> <p>If masks are required for students then mine will NOT be attending. I will NOT put them through that torture for 7+hours.</p>
7/21/2020 13:26:49	Angela	Wolgram	Parent	Madison	<p>I am unclear why our peers in other countries have successfully put kids back in school with data that shows that there was not a spike in cases or increased deaths related to schools opening back up and we don't seem to think we can go back. The science supports that kids don't spread it to adults and they are mostly asymptomatic . What we are doing is setting up our kids up to be so far behind they may never make up for what is missed. Easier tests or fewer lessons is not acceptable. My 20 year old daughter tested positive (required by her work to be tested weekly) and she has except for a sore throat that is most likely related to repeated testing that has caused her a sinus infection, has no other symptoms. It has been 8 days and no one in our household is sick or has any symptoms. I know we have 8 more days to meet the 14 day quarantine. I know that for some this virus can be more severe but the flu is more severe in some than in others. Colds year to year are worse for some than others. Put things back to normal. Academics and extracurricular activities are vitally needed by our kids and it's time. Time to go back to school and time to get back to playing sports and living life. I</p>
7/21/2020 13:27:06	Laura	Squires	Usd 379 is the school di	Clay center	<p>I think delaying the start of school til after Labor Day is the right choice. I DO NOT want it cancelled or delayed further though. Kids need to GO TO an actual classroom to learn and get the most out of school. Online school is not thr same as being in school.</p>
7/21/2020 13:27:09	Martha	Risley	None	Wichita	<p>I definitely do not think Wichita should open until after Labor Day. As a retired USD 259 teacher, I can certainly say that I would want to delay the start.</p> <p>Smaller districts with fewer kinks to work out may feel they are ready earlier. However, I really don't think waiting one more month is going to make that much difference. Having a definite date and plan for their school's opening will make both students and teachers feel more secure.</p>
7/21/2020 13:27:15	Natalie	Battenfield	USD 253	Emporia	<p>Yes school should be delayed.</p>
7/21/2020 13:27:16	Lori	Archuleta	Usd 255	Kiowa, ks	<p>I do not want school to be postponed! I have 2 children I'm elem and one is higher needs</p>
7/21/2020 13:27:17	Lauren	Docman		Kansas City	<p>I think school should be delayed until atleast Sept 8 to allow for schools to prepare for the precautions.</p>
7/21/2020 13:27:21	Zoe	Miller		Shawnee	<p>I support abiding by the Governor's order to keep schools closed until after Labor Day. Furthermore, I believe schools should be online only through at least the fall semester. With numbers of COVID-19 cases skyrocketing, sending our children and our teachers back is too risky. I would encourage you to keep their lives at the forefront of your decision. One case is too many cases.</p>
7/21/2020 13:27:54	Alec	Walker		Harper	<p>I agree with delaying school. I think it should be online this year</p>
7/21/2020 13:27:30	Renae	Peters	My family	Hesston	<p>I urge you to please support EO 20-58 in order to delay the start of school until after Labor Day. This will allow my husband more time to prepare for delivery of remote instruction of the high school math curriculum. It will allow our daughters' Kindergarten and 4th grade teachers more time to prepare. I hope that it will make the community take the pandemic seriously in order to reduce the spread and make it safer to return to school. I have served as a substitute teacher for the past 7 years. I will be more likely to continue substitute teaching if school is delayed, extra precautions are taken, and the rate of infection declines.</p>

7/21/2020 13:28:31	Dawn	Shoffner	Self	Alta Vista	I agree with Governor Kelly's decision to delay school starting. Our schools have a hard enough time coming up with supplies for our children, let alone PPE and all the precautions that should be taken to protect our children and the staff. They need time to get this in order and also allow for options for parents who don't want their children to attend in-person at this time. I don't think we have enough data to show how/if kids can transmit the virus to adults and we also have many children with underlying health conditions that could be at high risk as well.
7/21/2020 13:28:31	Brandon	Weckbaugh		Lawrence	I support Governor Kelly's executive order. I emailed my representative Mrs. Mah with further explanation and rationale.
7/21/2020 13:28:35	Cassandra	Moore		Olathe, Kansas	I don't believe schools should open until after Labor Day.
7/21/2020 13:28:46	Jaimie	Leis	Parent	Mayetta	I think we should keep them closed until labor day or after.
7/21/2020 13:28:52	Cheryl	Burns		Lawrence	<p>Delaying school until Kansas communities have reached little-to-no new cases of COVID-19 is the only rational, responsible, moral thing to do. New research shows that children over 10 transmit the virus as much as adults. And, while children under 10 transmit it at about half the rate of adults, that is a very long way from zero risk for a teacher who must be exposed to many children and ALL their contacts every day for hours a day. And, then, that teacher is at risk for transmitting to their family and everyone they come into contact with. Just 4 days ago, Kansas was leading the nation in new case numbers per capita. A majority of Kansas counties refused to comply with the governor's mask order, which means everyone living in those counties or who has contact with anyone in those counties is at increased risk. This does not bode well for school children being protected by their families before coming into contact with each other, teachers, and school staff.</p> <p>Until new case rates have been dramatically reduced, it would be irresponsible and immoral to subject students, teachers, staff, the families of each of these groups, and everyone in the community to the pandemic breeding ground that schools will inevitably become if we open schools in the midst of a full-blown, active pandemic.</p> <p>Delaying start times until Sept. 9 is an absolutely essential first step. It will allow time to see what is happening with transmission rates. But if we have not reached a safe point by then, it would be unconscionable to force teachers and staff into an unsafe work environment. There is no indication that there will be adequate funding, adequate space, and adequate new teacher/staff hires to allow for anything resembling the necessary levels of distancing to make this safe. And it would be irresponsible to send the message to parents that their children were safe in schools when they are not. Delay school openings until at least Sept. 9th. If community transmission rates are within the safe zone, then and only then would it be responsible to reopen in-person schools.</p>
7/21/2020 13:28:55	Stacie	Dickey	Parent	Rose Hill	I agree with delaying schools opening. Why are we going to put our kids at risk when cases are rising. When schools are offering all or none not a hybrid option. So we either send our kids in crammed classes so they have access to teachers or keep them home and hope they get it. When they could half the student population in school and do 2 days in 3 days out. Same group of kids go Monday and Tuesday the other group go Thursday and Friday and use Wednesday as a deep cleaning day.
7/21/2020 13:29:12	Sheila	Treu	Parent	Emporia	Kids need to be back in school. They need the socializing aspects of it. The learning they have lost will totally affect this generation in the long term of things. Many of the children are feeling hopeless, scared, and lost with all this covid garbage. They don't understand the masks and need to wear them. They are wanting life to go back to somewhat normal again. Many in our area depend on the school setting for more than learning like solid meals for the day or someone to love on them, show them they are special and wanted.
7/21/2020 13:29:17	Kurt	Leader	USD 457	Garden City	Students from K-12 need to start school in August for the following reasons; Children and young adults rarely die from the coronavirus, in fact the flu causes more deaths from ages of 5-30. Parents need to get back to work to support their families. More harm is done mentally, physically, socially, and academically than what the coronavirus will do. Lastly, quit playing politics with my 12 year olds life!
7/21/2020 13:29:17	Nicholas	Engle	Financial Advisor	Derby, KS	Please allow each school district to make their own decisions on how and when to open.
7/21/2020 13:29:21	Lance	Ziegler	USD 208	WaKeeney	I am a junior high English teacher in USD 208 in WaKeeney, and I am absolutely opposed to the governor delaying the start of school until after Labor Day! We need to get our students back in school and the sooner the better. It's what is best for kids!
7/21/2020 13:29:22	Kate	Roades		Olathe	Please have schools open later!!

7/21/2020 13:29:27	Patricia	Francis	None	Salina Kansas	I agree with the Gov about keeping schools closed until after Labor Day or even later this Fall.
7/21/2020 13:29:34	Brooke	Thomsen	Kansas City Kansas Pub	Kansas City	Please do not open schools until after Labor Day. It is not safe for students and staff like myself.
7/21/2020 13:29:39	Jena	Tharman	Teacher	Troy	Please let us start or at least let each county decide. We are a rural district. I, even being pregnant, want to see children in my classroom. Sanitizing and cleaning has been on our minds since March. We don't need extra time. Please. Thank you!
7/21/2020 13:29:40	Sheri	Smith		Troy	Please do not pass children having to wear masks in school!
7/21/2020 13:29:41	Jackie	Hays	South Central Kansas Sp	Wichita	I encourage you to think of the safety and health of Kansas students and staff. This is not and should not be a political issue. With the high COVID numbers in the state, it's confusing to me why we're trying to rush hundreds of people back into buildings for 8 hours per day. However, given these extra few weeks, staff will have more time to review state guidelines and implement a local plan to help ensure the safest possible return. Everyone wants to be back in schools, we just need to be smart about opening back up. Please consider what you are asking staff to do by sending them back to school. At least give us the opportunity and time to prepare. The hours can and will be made up throughout the year, or at the end of the school year if needed. Thank you.
7/21/2020 13:29:46	Breana	Wendel		Lansing	Do not mandate masks, hourly handwashing/hand sanitizing, or social distancing in school. Allow parents and school districts to make their own choices. Small counties should not be treated the same as Johnson or Sedgwick. We are going to raise an entire generation of kids who are fearful of others. The mental health of our children is as much at risk as physical health. The youngest death in KS is 29. Allow teachers to choose what's best for their health - classroom teach or virtual teach. allow parents to choose what works for their family. Everyone has a different risk tolerance so allow families to choose.
7/21/2020 13:29:47	Paul	Schapker		Leawood	The delay of opening schools is essential to give schools the time they need to figure out implementing safety precautions. The governor's order allows for local officials to take immediate action (removing all "wait and see"). Please do not overturn the executive order.
7/21/2020 13:29:47	Alyx	Wood	Free state high school st	Lawrence	The governor should not cancel all school activities between now and sept 6- kids need to feel involved - no one is made to go if they are not comfortable - everyone should have the choice - we r wearing masks doing temp Checks and social distancing - do not let this order proceed as written
7/21/2020 13:29:53	Cindy	Wichman	Derby USD 260	Derby	Please sign the Governor's order. Also, please mandate ONLINE only schools!! Numbers are still rising! Why put students and teachers in the "petri dish" during this pandemic. Our numbers are way worse than they were in March!
7/21/2020 13:29:59	Jackie	Hays	South Central Kansas Sp	Wichita	I encourage you to think of the safety and health of Kansas students and staff. This is not and should not be a political issue. With the high COVID numbers in the state, it's confusing to me why we're trying to rush hundreds of people back into buildings for 8 hours per day. However, given these extra few weeks, staff will have more time to review state guidelines and implement a local plan to help ensure the safest possible return. Everyone wants to be back in schools, we just need to be smart about opening back up. Please consider what you are asking staff to do by sending them back to school. At least give us the opportunity and time to prepare. The hours can and will be made up throughout the year, or at the end of the school year if needed. Thank you.
7/21/2020 13:30:02	Makaela	Stevens		Scott City	I strongly disagree with delaying the 20-21 K-12 school year in the state of Kansas. The result would be counterintuitive, as these students have been together throughout this past summer for various activities, including sports practices and summer camps. Students have been consistently participating in these sports practices and weights classes since June, and placing a ban on practices and delaying school for a month would do nothing to prevent the virus, as the students have been in close contact for over a month already. Delaying the school year would only give families incentive to go on vacations and leave their residences for a week, causing potential exposure to the virus. Then, by bringing the students back together in a month, they would all be far more susceptible to COVID. By keeping with consistent sports practices and beginning school at the originally scheduled time, students would remain in safe contact with one another for the next month, allowing them to safely begin school, especially in smaller communities like my own, where COVID is not yet a threat in any way.

7/21/2020 13:30:02	Tiffany	Burget		Topeka	I want to share my opinion as an educator. This will be my 9th year as a teacher. I truly believe that the first two weeks of school are the most important. Those are the weeks that trust begins to grow. That students get to know their teachers and teachers get to know their students. It's were the foundation for the whole year is built. Students get to see us as people who care, not just as a provider of information. If we are talking about student social and emotional well being then I think it is best to delay the start of school. Only so much can be done in a zoom conference and quite frankly I teacher junior high students and zoom conferences aren't high on their priority list. Not to mention that some students don't have the means to participate or might be embarrassed about what can be seen. A school setting is the best place to build new relationships, not over a conference call. If delaying school means that I have the opportunity to spend the first two weeks of school with my students in person than to me, it is worth it. I can't fully explain how important those weeks are but ask a kid. First impressions are important. Video conferences cannot do everything that face to face can.
7/21/2020 13:30:11	Melissa	Carnahan	U.S.D. 493	Columbus, Ks	I think each community should decide the school start date and any mask orders. Each community knows their situation better and can adjust if necessary. Please let the communities decide for themselves!!!
7/21/2020 13:30:14	Evan	Durnal	Citizen	Bucyrus	The delay in school start serves two good purposes - allow teachers and schools to plan for the logistics that are required to keep staff and kids safe, and (hopefully) allow time for masks to decrease the current trends in disease prevalence. Please consider approving the delayed start so that we can hopefully maintain continuity once it does start, which is crucial for the kids. The logistics of protecting educators must be finalized prior to school starting, especially as new studies show children 10 and up are just as readily transmitting disease as adults. Educators still don't know what they are even planning for, give them the time to get it right. Thank you for serving our children and our educators.
7/21/2020 13:30:15	Veronica	Hauptman		Hays	I think delaying the start of the school year is a wise decision. It allows districts adequate time to plan for the many changes this school year will bring, while hopefully allowing the number of active cases to go down before our students all come together in school buildings.
7/21/2020 13:30:25	Rebecca	Eck	Unified PreK Teacher	Wichita	Online learning was NOT effective for my unified class of 30 reg Ed students and 10 special ed students. Only 5-8 showed up for online meetings. Contact was difficult. I truly hope we can get back to the classroom. Obviously safety is priority but we NEED the classroom.
7/21/2020 13:30:31	Ashton	Kathrens	Mother of a student	CIRCLEVILLE	I believe the schools school wait until after Labor Day to reopen. I'm nervous enough about sending my children back anyways. This at least allows more time for the school and teachers to have time to get everything ready. It also allows more time to see how the spread in the community is.
7/21/2020 13:30:31	Anne	Cook	USD 431	Hoisington	As a teacher I don't feel like schools are ready to reopen yet. Many small towns like mine are just beginning to see a surge in cases and so residents haven't been fully taking precautions. I think allowing more time will let the community see the need we have for things like masks, social distancing and small gatherings. Just this past weekend someone had a wedding with 600 guests invited and yesterday someone who went to it tested positive for Covid. I really do believe it's about to hit hard and there's no plan in place and schools are not at all prepared to deal with the unknown.

					<p>I wanted to give an update on the research regarding COVID in children.</p> <p>I should back up briefly and state that this is from a physician with a PhD in Epidemiology who became very interested in this topic when a colleague and friend of mine, Jennifer Kasten, MD MSc, wrote a systematic review of COVID epidemiology in children (<a href="https://www.facebook.com/jenniferkastendm/posts/128898328763114">https://www.facebook.com/jenniferkastendm/posts/128898328763114</a>) and found kids 12 and under *might be viral "dead ends", meaning they can get COVID but can't transmit to anyone else. This really captured my interest because this would make COVID very different from most respiratory viruses we know. Then in a physician's group dedicated to school opening, a physician researcher published a document for the group in which said she could identify 0 (zero) cases of certain transmission from children under 12 in the scientific literature and since that time Dr. Rutherford, UCSF Epidemiologist, has also been public about elementary-aged children being a "one way street" for infection - they get it but don't appear to transmit it, much, if at all. (UCSF Grand Rounds lectures are now available on YouTube for those interested in hearing him).</p> <p>Last month, I did my own summary of the data (<a href="https://www.facebook.com/tracy.hoeg/posts/10219217323357158">https://www.facebook.com/tracy.hoeg/posts/10219217323357158</a>) and found evidence of the following:</p> <p>*Very limited transmission if any from children ages 12 and under to either other children or adults</p> <p>*Children appeared to be at least 10 times more likely to die of influenza than Covid and are more likely to be struck by lightning (I rechecked the CDC website today 7/13 and they are still reporting 3 deaths in children under 18 due to confirmed COVID; for comparison, there have been 185 deaths due to influenza in this population in the 2019/2020 season. Edit: see updated mortality data below from the 7/19 addition).</p> <p>*Countries that reopened elementary schools as a first step in their country's reopening did not see an uptick in cases (these include numerous European and Asian countries, some of which are displayed in Figure 4. Reopenings not causing and uptick in cases is consistent with children not being a major vector for the disease. Figure 3 shows age of the source of the cases of COVID in Holland, with none ages 18 and under in their study, as just an example of these</p>
7/21/2020 13:30:43	Brandon	Grosdidier	Eudora High School and	Eudora, KS	
7/21/2020 13:30:49	Krystle	Walker		Goessel	OPEN SCHOOLS!
7/21/2020 13:30:56	Sean	Stewart	N/A	Lenexa	Please follow the Governor's lead on this. We can only meet this challenge if we act in unison. Fractured leadership and mixed messages have led to the mess we currently face. We all want our kids back in school, but we must ensure that it's safe and that we give schools the time and resources to meet this challenge.
7/21/2020 13:30:58	Linda	Vaughn	Colby public school	Colby ks	Please leave the decision on opening schools in kansas with their local school board and local health officials.
7/21/2020 13:31:01	Krissy	Cox	None	Lakin	No need to delay the opening of schools! Let local districts & local health departments determine what changes are needed, if any. One size does not fit all and many small communities have little to no current positive cases. Moving all sports to spring won't work for small towns either. The same kids play all the sports. Again, what is good for one town or region may not be good for another. Let the locals decide!

					<p>As a parent of two young girls, I 100% stand by Governor Keny and the order to postpone the opening of schools for students so that schools have the adequate time to read and figure out how to implement the state's recommendations that have only just been released last week.</p> <p>We aren't even hearing the plan for our daughters school until Friday. We certainly want time to review all the plans and then make an informed decision for our kids.</p> <p>Schools are preparing for all three scenarios (in person, hybrid, and online), and that takes time to figure out how that will work. Even if a school opens in person they may have to transition to a hybrid or an online model depending on outbreaks at the school. Although they did this in the 4th quarter with very little notice, there was not as much student and parent accountability or rigor, and they need time to figure out how they can make that happen, so they are ready for when things need to be pushed online. Schools are having to figure out how they will do the temperature checks, keep social distance (in parking lots, entrances, exits, hallways, classrooms, lunchrooms, etc.), and how they will keep all of these students and the teachers and staff members safe and healthy. It is a huge undertaking that deserves more prep than one week of teacher inservices.</p> <p>Many teachers will have to change curriculums (thinking of music with limited singing, playing, and large ensemble numbers, PE, etc.). Things that are the core of those subjects are now potentially unsafe. Teachers need time to find out what they can safely teach. This might look different than any other year. They also have to figure out how to deliver this brand new curriculum in person (if they get to stay in their classroom), in person on a cart (if they have lost their classroom and now have to travel from room to room to help contain cohort groups of children), in a hybrid model, and online. They have to be ready for all of these scenarios all the time, because at any time, they may need to move to a different scenario with little notice. This will take more than one week of teacher work time.</p> <p>Something that I haven't heard much about is what will happen if a child or staff member at the school tests positive. Will just that class need to quarantine? Will the whole school? Who will sub for these teachers who have to quarantine for 14 days? I imagine since most subs are retired teachers, that the pool of subs from which to pull from will not be as</p>
7/21/2020 13:31:17	Lindsay	Jervis	Parent of a 3rd grader at	Wichita	
7/21/2020 13:31:18	Erin	Hatton		Lawrence	Please uphold the Governors plan for reopening schools. I have two children in high school and I am concerned about kids becoming infected with COVID-19 and bringing it home to their families.
7/21/2020 13:31:20	Jamie	Lingner	Spring Hill Middle scho	Paola	Our kids mental health is far more important that the recent covid numbers. We just keep our heads on straight and get our kids back to school.
7/21/2020 13:31:23	Madellaine	Grifgin		Lawrence,Kansas	I would prefer on-line classes at least for the 1st semester.
7/21/2020 13:31:24	Makele	Goering		Pretty Prairie	Open schools on time. And no mask mandate.
7/21/2020 13:31:28	Karen	Pendlay	None	Emporia	Leave the politics out of this!!!! Do what is best for the health of ALL staff and students who will be returning to our school buildings. I beg you to act like responsible adults, regardless of which political party you are affiliated with. How sad is it that you have to be reminded to act like adults and do the right thing???
7/21/2020 13:31:33	Melissa	White	My home	Wichita	I sincerely hope that our entire KS State BOE takes a long hard look at all the data and rightly decides to allow schools to open in August as planned. I also hope that the BOE sees reason and understands that all day mask wearing and other excessive "precautions" are unnecessary and even detrimental for our children.
7/21/2020 13:31:53	Lauren	Misse		Gardner	I agree with the order.
7/21/2020 13:31:54	Ginny	Kiser		Emporia	Please keep teachers and support staff in mind! School never used to start till after Labor Day so what is the big deal. All safety precautions need to be mandatory!!
7/21/2020 13:32:04	Taryn	Gervais	Blue Valley Schools	Olathe	Please support the executive order to delay the start of schools. As a BOE, I would hope you are making data-driven decisions, just as we do when creating curriculum and learning environments that best support our students. The data is there; it is unsafe to return to school. Please lead our students by example by making an informed data-driven decision. It is the right thing to do. Protect our students, and school staff.
7/21/2020 13:32:04	Susan	Rollins		Jackson county	yes
7/21/2020 13:32:08	Carmen	Trease	None	Derby	Governor should not determine what people are allowed to do with private education.

7/21/2020 13:32:17	Kelli	Netson		Wichita	Please uphold the order and delay the start of schools, especially those in high population, high infection rate locations. Please consult with and heed the advice of medical professionals. Please understand that the economic repercussions will only be prolonged if we don't get this under control. We will be dealing with the cognitive, developmental, and emotional fallout of this pandemic for years to come and schools will be instrumental in mitigating the effects, but only if they can open up and stay open. Opening now at the height of infection rates will not allow that to happen.
7/21/2020 13:32:22	Megan	Whiteley		Lenexa	Please vote to delay school opening until after Labor Day. In hopes COVID cases are going down by then.
7/21/2020 13:32:23	Kaci	Jamison	Concerned Parent	Clay Center	I dont believe the schools should reopen till January 2021. There are more cases now then in March when we were shut down to begin with. To make kids wear masks for 6 to 8 hours a day is ludicrous. The younger kids will never leave them on that long. They will just turn them into toys. Lets not forget about all our teacher's and staff and bus drivers. They are basically signing their death certificate it's not fair to them. And how are you gonna temp check all those kids everyday? I just ask that you really think about these things before deciding on anything.
7/21/2020 13:32:23	Erin	Grinde	Family household with s	Olathe, KS	-OPEN THE SCHOOLS ON SCHEDULE. With full, on-site curriculum, activities, and teaching staff. The knowledge we have now of this virus is that it's manageable, extremely unlikely to infect or be spread by children, and that 99.9% of healthy individuals who have been infected survive. During the course of a standard seasonal flu season, several thousand children become severely ill. Several thousand of those children may die. Yet we've never shut down schools, instituted mask requirements, distancing measures, or abbreviated classes. -With schools being closed since March 13, 2020, the state and the district have had a FULL FIVE MONTHS to come up with a plan for reopening schools in the fall. In fact, that's all parents have heard from the district and the state: "we're working on a re-entry plan for school opening for fall". So far we've seen no progress. Only a collection of so-called "reasons" backed by so-called "science" that no one can definitively say is even remotely true or effective (it isn't. Practice basic hygiene. Do not foster germaphobia). -Are we now going to get a tax rebate on the teacher salaries, meals, art supplies, books, classroom supplies, and other staffing and operational expenses, that are not going to be used this year? Is the district going to provide all of these materials and support to the parents, in order to facilitate education in a "remote" learning scenario? -Requiring masks for children is ludicrous. There is more potential for all types of viruses and illness to spread with a mask on than without. How is a student expected to concentrate on their school work, participate in class activities, play at recess, or feel any sense of confidence with a mask covering half their face? It's degrading. It's sad, and it's not how our children should be treated. Healthy people, in particular, children, SHOULD NOT WEAR A MASK. It restricts vision, it restricts healthy breathing, it's plain restricting. At the very least, it should be VOLUNTARY. Not required. Those parents who may have more vulnerable children, or who are worried about sending their children back to school need to make arrangements with the school and teachers on an individual basis for their students' schooling. The concerns of a few MUST NOT outweigh what's best for the majority.
7/21/2020 13:32:28	William	Moore		15805 South Kenwood S	I am in favor of the delay. If the situation isn't improved by Labor Day it should be delayed further.
7/21/2020 13:32:35	Robin	Buss	USD340	Grantville	I think a compromise like August 31st would be a great solution. Let teachers have more time at the beginning to figure out cleaning procedures, online learning platforms, new outcomes, etc. I do not want my child going to school in June. If you allow Gov Kelly's proposal to stand please reduce the amount of day or hours students are to be in school. This is ridiculous the number of hours students are in school plus the time they are in a mask now.
7/21/2020 13:32:59	Michelle	Cyphers		Wichita	Please vote to accept the Governor's executive order. Please consider virtual learning for the first nine weeks. I am a parent and a teacher.
7/21/2020 13:33:02	Austin	Smith	Senior Class of 2021	Wetmore	I think if you are planning on delaying the 2020-2021 school year, then you should delay/postpone it completely. This would mean canceling the 2020-2021 school year completely and having students return to school normally for the 2021-2022 school year. Doing this instead of just pushing it back a little will make it so that seniors have a (hopefully) regular senior year, all students will get a proper education, and state and local governments have adequate time to get this pandemic under control so that when students and educators return to campus, they will be at lower risk for contracting the virus.
7/21/2020 13:33:05	Brad	Dawson		Hays	Do what Governor Kelly has mandated.

7/21/2020 13:33:14	Martha	Murchison		Salina	The current COVID infection rate in Kansas is far higher than the preferred less than 5% . We need the extra three weeks of mask wearing to allow that rate to go down. Then, coupled with extra protocols, perhaps some schools will be able to reopen safely-- for students and faculty.
7/21/2020 13:33:17	Rhonda	Francis	Private Kansas Citizen	Olathe	I am a public school teacher in the state of Kansas. I believe we should not delay the opening of school. Governor Kelly is using this issue as a political one and it is harmful to our students. Furthermore, the additional mandate she put in effect today was made with the intent of making it prohibitive to start school- requirement of all students to wear masks 5 and older, requirement of washing hands every hour, requirement of checking temperatures before entering the school buildings each day. These mandates do not even follow the guidelines given by the Kansas State Board of Health's Guidelines for reopening schools published a week ago. CDC data: in the last 6 months, deaths caused by Covid 19 in the age group of 5-14 year olds were 14 people. Only 2% of all Covid cases fall into the age range of 5-24 year olds. 95% of Covid transmissions are between adult to adult. Even the American Association of Pediatrics has strongly urged our country to open schools. We are harming our students by not opening up. Please vote to open our schools on time. Let's follow the data/science and not let Governor Kelly play politics.
7/21/2020 13:33:18	Melissa	Venard	USD483	Plains	I teach in a small rural school where many of our students do not have reliable internet. Many of our clientele suffer significant academic regression any time they are away from the school environment. Our distance learning efforts this spring did not result in successful learning for a vast majority of our students due to lack of stable internet connections and the inability of our parents to help, either due to lack of education or time constraints. I believe that the detriment to the learning of our students far outweighs the risks of returning to brick and mortar school.
7/21/2020 13:33:19	Katie	Roberts	School psychologist	Gardner	I believe the delay is warranted.
7/21/2020 13:33:25	Jessica	Hall	Moundridge	Moundridge	School needs to begin as normal
7/21/2020 13:33:34	Rose	B		Topeka	I believe you should delay the start of school until after Labor Day to better prepare schools and parents for the changes coming this year. Parents are not yet equipped with answers to questions regarding how things will be handled. They cannot make informed decisions whether to send their child to in person school or have them online yet without these answers. I however, do not want the school year to end after Memorial Day. Please keep our schools and children safe while you are making these hard decisions.
7/21/2020 13:33:43	Michelle	Tajchman		Olathe	Numbers are trending upwards. Why would we place hundreds of thousands of students/staff back together in close proximity, only to then release them back into the community where some will inevitably spread this further? And before a National Holiday weekend that congregates many! Data is still mixed when it comes to youth spreading this virus. Possibly the younger students are not as likely to spread, but what about those in grades 6-12? That data isn't as reassuring. We also know that the adults present in our schools can spread the virus, and it is likely will. I just do not understand the rationale for taking that risk, and to further devastate our situation until it is better under control. Parents are scared. Staff is scared. Students are scared. The window of time has significantly narrowed as we all wait for answers! The original start date for staff in my community is only 2 weeks away, and for students the return date is 3 weeks away. As a parent, I do not feel prepared to make a decision. As a school nurse, I do not feel prepared for what is to come, despite spending significant personal time preparing and educating myself on this topic. The added time can be used for educating all stakeholders and ensuring the right processes are in place for the necessary safety of all. If you represent a district that is not highly affected by this virus currently, be grateful, stay safe, and please consider your fellow Kansans when casting your vote. Thank you!
7/21/2020 13:33:43	Trace	Woods	USD 457	Garden City	I believe it is in best interest of everyone involved to delay the start of school to after Labor day for the safety if the students, staff, and families of students and staff. Thus delay would give everyone more time to prepare the proper ways to start school and also to plan out exactly how to attack the virus once it inevitably gets in the school system. Delaying the start would also give us a chance to get ahead of the virus as a state as well.

7/21/2020 13:33:43	Alex	Fender		Anthony	<p>Please uphold the governor's executive order to delay the start of school year 2020-2021. Educators need time to put in place the mandatory precautionary and preventative measures, as well as time for staff professional development related to COVID-19 prevention and remote learning. Educators need to address the recommendations put out by KSDE. Itinerant practices and procedures also need considered and addressed.</p> <p>Prevention and early intervention will be key, as they so often are, to our health and well-being.</p> <p>Additionally, this delay allows us time to review data from other states as they resume school to see what works and to what extent.</p>
7/21/2020 13:33:49	Amy	Deters		Goddard	<p>Please start schools on time. Kids are proven not to be affected by covid and many pediatricians recommend having them in school.</p>
7/21/2020 13:34:13	Julie	Klahr	Holton USD 336	Holton	<p>I hope and pray that all of you on the Kansas State Board of Education, will consider postponing school.</p> <p>Please support Governor Kelly's Executive Order 20-58.</p>
7/21/2020 13:34:17	Jennifer	Villarreal	Concerned parent	Hutchinson	<p>As a registered and voting Republican, I have to say I fully support Governor Kelly on delaying the start of school and the mask mandate. I consider myself high risk, as I have moderate asthma that is not easy to control. I have been wearing masks to protect my lungs way before COVID-19 was ever a thing. I continue to do so now more than ever. I have a nursing background and choose to believe the science. I do not believe any of this is an effort of the government trying to control us. I do not believe I am losing any freedoms by wearing a mask. I believe we all have a responsibility to each other to do what we can to mitigate this virus. I appreciate your time and consideration in this matter and encourage you to think of the lives that will be spared in delaying school for a few weeks as we continue to learn more about this virus.</p> <p>Sincerely,</p> <p>Jennifer L Villarreal</p>
7/21/2020 13:34:26	Meredith	Dickinson		Shawnee	<p>My daughter attends St Thomas Aquinas. They are ready to teach. she is ready to learn. Let them! If daycares can open so can schools. At the very least allow virtual classes. Do not hold the entire state back to accommodate the unprepared schools. Let the schools who have a plan in place move forward.</p>
7/21/2020 13:34:31	Yulia	Sharshel	Parent	Topeka	<p>I understand the need for safety, but our children need to return to school ASAP. Nothing will change in the 2 weeks if school is postponed. At least allow virtual instruction during that time, or just have kids go to school for core classes (reading, math, science etc) for those weeks. We all have masks and can wear them. And please, allow kids to at least continue to hold practices like they have been all summer. Overall, I wish kids could start school as planned, since they had no instruction since end of February and are behind already.</p>
7/21/2020 13:34:36	Kaylee	Harris	Myself as an educator w	Dodge City	<p>Please delay the opening of school. We need more time to prepare for the requirements mandated by the governor. Our district has also canceled our summer school and jumpstart opportunities for incoming kindergarteners and middle schoolers; we need time to figure out how to prepare these students for next year.</p>
7/21/2020 13:34:51	Juanita	wolf	personel	scott city	NO MASKS AT SCHOOL
7/21/2020 13:34:54	Katie	Roberts	School psychologist	Gardner	I believe the delay is warranted.
7/21/2020 13:35:03	Cassandra	Dickerson		Shawnee	I am FOR delaying the 20-21 K-12 School Year until after Labor Day
7/21/2020 13:35:04	Skyler	Johnston	Student	Lawrence	Please postpone school AND sports & activities. If we continue to allow students to participate in sports, travel and gather in large numbers, it contradicts postponing school to curve numbers of Covid.
7/21/2020 13:35:09	Sheri	Bell	Teacher	Lakin	Delay start we have a lot of things to figure out before we open school.
7/21/2020 13:35:11	MELISSA	MOBLEY		Wichita	<p>The governors executive order needs to be stopped. This virus is not going anywhere anytime soon and WE CANNOT LIVE LIKE THIS! Our children cannot grow up like this. They are suffering, the parents are suffering, please stop this madness. All for what? A less than 1% chance of death? Seriously? If that's the case then no one should drive, give birth, or have elective surgeries. I hope you can see the rationale for this type of government overreach is just plain insane. Please open back up our schools asap and if need be offer a remote learning option for the teacher and students who don't want in person. As for the rest of the students...they need school!</p>

7/21/2020 13:35:17	Jo Marie	Bolick		Lawrence	Please delay school and begin virtually on August 8th.
7/21/2020 13:35:26	Sarah	Johnson	Teacher	Wichita	I think delaying will be beneficial so we (teachers) can have more time to prepare for this year and have work time in August. I am in favor of returning back to school and look forward to seeing my students. Thank you!
7/21/2020 13:35:28	Kelsi	Birney	Family Heritage	Russell	As a mother of 6, my kids understand the risks as do I of returning! My kids want to come back and should be able to choose a mask or no mask! Return us back to school for a full 8 hours!
7/21/2020 13:35:29	Rebecca	Stewart		Larned	We need to allow the kids to resume "normal" schedules. This seclusion is detrimental to their mental health. There's always going to be a risk of getting sick. Honestly I wish the schools would refrain from using hand sanitizer and go back to making the kids use soap and water.
7/21/2020 13:35:29	Chris	Owen		Wichita	Please don't play politics with our children's lives. No way is school happening this year. Why pretend otherwise?
7/21/2020 13:35:31	Ryan	Weyrauch		andover	Simply put, I absolutely DO NOT support the governor's TOP DOWN approach of governing. I hope the members of the state board of education veto/deny her overreach and allow for EACH school district to make their own decisions as to what's in the best interest of their district. The scientific data overwhelming concludes COVID19 is not a serious risk to HEALTHY individuals, especially children. Please allow individuals to self-assess and self-govern. The continued failure to address the collateral damage/unintended consequences of fear-based decision making is doing more harm than good. It is time to start facing decisions with facts not societal based fear.
7/21/2020 13:35:34	Ashlee	Swearingen	parent of two Olathe stu	Olathe	Please vote to approve Governor Kelly's Executive Order 20-58 to delay the start of school. The Governor has been working closely with the state and local health departments to do what is the safest approach to return our children, teachers, administrators, and staff to the classroom. This control should not be relinquished to each local school board and district as when that has happened with the phased reopening and mask mandates, it has been proven in both cases, those politicians are making choices based on politics, not on medical advice. I do not want the same thing to happen with our schools. Approve the EO to protect everyone in our state. While the numbers in some counties are in the thousands, and others are in the double digits, it's important to remember it is all relative to population. The almost 4,000 positives in Johnson County is 0.7% of the population, but the 90 positives in Ellis County is still 0.3% of their population. And there are no barriers to keep people in low rate counties out of high rate counties, actually, I would anticipate some of those to come to the larger counties like Sedgwick, Johnson, Wyandotte, Douglas, etc to do their back to school shopping and then potentially spreading disease back to their communities. This isn't an urban problem. This is a concern for all counties. Our counties need the additional time to secure PPE for all staff, teachers, and students. They need to time to train their teachers on the more robust online learning platforms that will be needed at times during the school year. Delaying the start gives the entire state the ability to potentially start school in person and do so successfully. Please vote for the safety of the children, teachers, administrators, and staff and not your own personal politics. Thank you.
7/21/2020 13:35:36	Robyn	Liebelt	USD 361	Anthony	Without any other answers about the implications to the 1116 hour law I have a hard time supporting the delay in school starting. If there is flexibility to this hour requirement then it may not be so bad to have the extra time. We have endured struggles and can persevere. However, if there is no flexibility to the hour law then there are other things to consider including teacher contract time, family struggles etc.
7/21/2020 13:35:42	Julie	Lane	Frankfort Schools	FRANKFORT	I am a teacher that needs more time to digest and plan using the excellent "Navigating Change" document. We all agree that we want to be back in the classroom. However, I am over fifty and immunocompromised. While cases are low in our rural community, it is more a matter of luck than any true effort to socially distance and wear masks. I see little evidence that the majority of people in our communities bother. Because safety guidelines have unfortunately been politicized, and because I am high risk, I feel the additional time and mandates by the governor will help me feel safer as I return to school. My classroom is small and there are very few teachers, so there are tons of challenges. Therefore any chance for our district to learn how to follow evidence-based practices as much as possible helps me stay healthy where i can stay in the classroom and devote my energy to helping kids.
7/21/2020 13:35:48	Adrienne	Folkerts		Olathe	(In Spring Hill School District) Open our schools as planned! Kids are losing precious education time. Let us resume sports and activities. Give the power back to local school boards. They know our communities the best!

7/21/2020 13:35:54	TAMI	NORRIS		LAWRENCE	Please delay schools & look at hybrid options for the year. Our state is seeing an alarming up tick in positive cases. The inability for students to properly social distance & school activities will only increase the spread of the covid virus.
7/21/2020 13:35:55	Janet	Fogh	Maranatha Christian Ac	Shawnee	Good afternoon! Please protect the learning in our schools by allowing us to begin school as normal in August. We will use appropriate COVID precautions and definitely want to keep our school community healthy, but it would be devastating to our school and the academics of our students to have a delayed start. We want to go back to school in a responsible fashion in August. Thank you!
7/21/2020 13:35:56	Jill	Doyle	Doyle Family Farms & H	Jackson County, Kansas	Please support and vote with Governor Kelly on her Executive Order to delay the opening of schools. Please do not make this a political issue when it is a health issue. Following what our Drs, Scientists and Health Officials are recommending is the ONLY way to vote when it comes to keeping the citizens (including our children) of Kansas safe. It is IMPERATIVE that we stop acting as though we know better than those that are far more educated when it comes to public health and safety! Please vote with our Governor! Our children, teachers, elderly, front line workers, hospitals and families in Kansas are depending on that! Thank you!
7/21/2020 13:35:58	Jackie	Claassen		Dover, Kansas	I don't think one size fits all. If a district is ready to start school, let them start. If they need more time, they can delay. Should be up to the individual school district or private school if they are included.
7/21/2020 13:36:01	Kathy	Randolph	Self	Atchison	Please ratify Governor Kelly's decision. A delayed start will benefit all stakeholders.
7/21/2020 13:36:06	Rana	Bentley	parent	Olathe	please uphold Governor's EO to delay school start until after 9/9, and only if we have seen a decline in COVID-19 spread in our community. Keep our students, teachers & families safe.
7/21/2020 13:36:11	Alecia	Frederick	Parent	Auburn	Start school on time.
7/21/2020 13:36:12	Chelsea	Johnson Bagwell	USD 232	Lawrence	Please, please vote yes on the executive order to delay school opening. Districts and teachers need this time to prepare how we're going to provide for our students. We dearly miss them, but do not want to make hasty decisions that may cost hundreds of lives.
7/21/2020 13:36:15	Emily	Jackson		Topeka	I am a teacher with a child in first grade. I hope that delaying school until after Labor Day will help get the rise in COVID-19 cases back under control since masks have been mandated in so many places. Please allow us to stay home and make sure that it's safe before we go back to school. The risks of going back to school prematurely outweigh any potential benefits of school resuming. No one's life is worth sacrificing to start school again. We have a serious pandemic that has needlessly killed so many people, so please remember this is a public health issue and not a political one.
7/21/2020 13:36:16	Tom	Brungardt	Parent of school child	Shawnee	Please do not delay the beginning of school. Vote down Gov. Kelly's delay.
7/21/2020 13:36:19	Jamie	Hibbs	My family	Winfield	I ask that the board vote to delay school to give schools more time to have safety precautions and routines decided. This also allows time for the number of cases to hopefully decrease. I think it is important that the delay be consistent for everyone rather than up to individual districts.
7/21/2020 13:36:22	Courtney	Barnett	KDHE	Topeka	I am so incredibly thankful that I didn't have to make the decision of putting my children in a situation that is unknown or keeping them home. I'd rather be safe when it comes to our children
7/21/2020 13:36:27	Dennis	Burns	The Burns Household	Overland Park	It's time for our children to be back in school and continue growth and development. This can be done safely. Additionally, the "one size fits all" for the entire state of Kansas is ridiculous. Work harder to figure this out!
7/21/2020 13:36:31	Krystal	Kern		Wichita	It's a good idea to put the start of school off for the safety of the children and teachers! We have to many grandparents taking care of little ones to spread covid 19 to them!
7/21/2020 13:36:31	Jennifer	Stroup		Olathe	I encourage you to please allow schools to open for in person learning. Our children have been without proper education since March 2020. Our children have a right to a quality education that provides structure and support. If other entities in our state that serve children (ie: daycare's, summer camps, residential facilities) have been able to remain open without large outbreaks then schools can also. With the safety recommendations being required it should be an option to have in person learning. I think many districts have developed a plan to allow parents to elect for in person or virtual learning. Let the parents decide what is best for their families rather than a one size fits all model. Please allow schools to open for in person learning.

7/21/2020 13:36:32	Cathy	Smith		Lawrence Ks	I support governor Kelly's order to delay school. Something I would like you to consider is how important grandparents are to children. Once they go back into the actual school building we will no longer be able to spend time with them. We are just as important to our grandchildren as anything. They need us! The delay would help schools better prepare to make sure the kids are safe. They can always catch up but losing a grandparent or without being able to see grandparents can never be made up. That time is valuable and the greatest gift a child will ever receive! Please allow remote learning once school is in session! Life is so short to rush into things that are unknown. None of us have a clue how it will turn out once kids are back in the actual school building and any life lost is not worth any risk. Think how a child would feel knowing they passed COVID to a parent or grandparent that passed away from it. They would never get over that! There is a great possibility of that happening so...please follow governor Kelly's order to delay school.
7/21/2020 13:36:36	Deb	Johnson		El Dorado	The delayed start hurts the disenfranchised students who come from dysfunctional homes. They have been out of school for a long time. Public schools are supposed to be the great equalizer. Private schools and possibly home schools are also being harmed by this governmental overreach.
7/21/2020 13:36:39	Nancy	Minster		Overland Park	Please do all you can to ensure graduation can occur- spring semester more important than fall
7/21/2020 13:36:40	Courtney	Roberts		Shawnee	No - keep the decision at the district level
7/21/2020 13:36:41	benjamin	miller	youth sports	lawrence	do not take away youth sports. allow kids to get back to practicing and playing sports. mental health is way more valuable than possibly getting a fever and a cough ! please do not take away youth sports open up all gyms and allow people to make their own decisions about what it takes to be healthy
7/21/2020 13:36:46	Krysti	Bergkamp	USD 444	Marquette	Please allow the kids to go back to school with the option for online learning. Please do not mandate kids or teachers to wear masks 8 hours a day. The virus is spreading with masks in place in every country and every county.
7/21/2020 13:37:00	Deborah	Bass		Lenexa	I support Governor Kelly. Teachers and parents have been given no time to prepare and consider what options we have. School districts have not provided any clear guidance as to what opening plans are, only hypothetical scenarios. Three weeks makes a difference for me to best plan for my career and family.
7/21/2020 13:37:01	Michelle	Hooper	Kids in desoto district	MTMS MVHS	Send our kids back to school!!!!
7/21/2020 13:37:01	Hazel	Morlan	USD 480	Liberal	I think that all schools should go exclusively online. My family has been affected by Covid 19. My 11 year old daughter has tested positive as well have other people in my family. I do not want my daughter to attend traditional school in a building for the fear of her getting it again and for the fear of it spreading more. In my opinion if school is going to be delayed until after labor day it should all be online .
7/21/2020 13:37:03	Elizabeth	Mak		Prairie Village	In accordance with the American Academy of Pediatrics, and locally, Children's Mercy Hospital, I agree that kids need to be back in school asap. I find it quite unbelievable that adults have all options open to them, while kids suffer. Adults are eating out, going to get their nails done. Exercising. Kids can't even join a school group sporting team for exercise, but adults are unlimited. School for kids is an essential service. If the government is going to mandate closing, it should be closing nail and hair salons, gyms, restaurants, bars etc so that kids can be in school to learn. So kids can get away from child abuse in the home. Kids can have the school services they need. I think government should step back and listen to the doctors and scientists that are experts on KIDS. I'm tired of hearing politicians presume to know better than doctors what our kids need. It's about time people with more creativity get involved in solving these problems. There are more ways to keep kids safe than shutting down their whole world. Adults speak up loudly when their world shuts down, so now it's reopened. Who's listening to the kids, or speaking up for them. Even the Governor needs to put aside politics and find a better way to problem solve.
7/21/2020 13:37:20	Kevin	Norfleet	Self	Wichita Kansas	I am for the executive order. This will ensure the safety of families throughout the state.
7/21/2020 13:37:26	Patty	Wilson		Salina	Please open schools with no masks required for the sake of the children!
7/21/2020 13:37:27	Cherie	Leader		Holcomb	Students and staff need to get back to school! The children are missing out on very important instruction and we must meet their social emotional needs!!! I want to get back to my students!!!
7/21/2020 13:37:28	Julie	Slaubaugh	Sacred Heart Grade School	Hays	We are a small private school K-6 with the advantage of having small class sizes where social distancing, extra sanitizing, and temperature checks can be done to keep students and staff safe. I feel that because of the low student numbers and spacing in rooms we would be able to implement adequate guidelines to successfully start school August 18th.

7/21/2020 13:37:36	Thomas	Jackson	USD 418	Mcperson	Schools should be open and activities should continue. Some of these kids only chance to leave their homes for better roads is the grades they will get with a teachers help and the coaching they will get that can help them get scholarships. If you close schools and shut down activities you are continuing to hurt our most fragile students, the ones who have less money and less opportunity. Stop being scared of something that is being so overhyped. Give choice or open fully.
7/21/2020 13:37:44	Richard	Plamann		Topeka	I do not believe it wise to open our public schools for in person attendance. Cases of Covid are still increasing. I don't believe it is currently possible to protect the students, staff and teachers from Covid exposure. There is really no way to organize protection within the crowded classrooms and hallways of our schools. I believe that opening schools anytime soon will create super spreader environments within each open school. This will in turn spread Covid outside the schools to families, friends etc. Long story short, opening schools is not safe for the educational community (students, teachers and staff) and it is not safe for the community at large.
7/21/2020 13:37:46	Laurel	Navinsky		Washington, Ks	Thank you Governor for delaying the opening of school. Teachers, Paras, lunch ladies, bus drivers, custodians and secretaries are all at risk.
7/21/2020 13:37:54	Laura	Phillips		Lawrence	I'm writing to urge you to uphold the Governor's request to delay school openings until after Labor Day. I'm very concerned about community spread of Covid 19 when so many students are gathered back in schools. And although the children may not be particularly susceptible to catching the virus, the adults who work in the schools will be at risk for catching and passing on the virus. Giving the school administrators several extra weeks to prepare will greatly mitigate this risk. I've been very pleased to be able to start shopping locally again with the mask mandate in place, but if the schools are allowed to open too early I'll feel compelled to go back to online ordering. This is not good for our many small businesses and restaurants. Please look at the big picture and protect our state. Thank you.
7/21/2020 13:38:10	Nicole	Pagoyo	parent of 2 students	Wichita	I support the delay of in-class school. The difficulty of getting a COVID-19 test in the community setting and the long wait for results puts working parents in a situation where they have to take long periods off to stay home with kids whenever they are potentially exposed. Unless the schools will be providing tests on-site and results can be received within a couple of days it makes it incredibly hard for us to manage work schedules and childcare.
7/21/2020 13:38:10	Cara	Cramer	My Children	Healy, KS	Kids need school and activities. Let there be normal start time and activities. No mask or at least leave it up to the school districts. Our rural districts are not metro.
7/21/2020 13:38:11	Micah	Koksal	USD 216	Garden City, KS	Please uphold the Governor's mandate. We must protect our teachers & staff so they can go to work with a shred of confidence. In order to educate our children, we must keep them & their teachers safe. Please do what is best for our health & safety.
7/21/2020 13:38:19	Erich	Singer		Topeka	My wife and I are both teachers. We have 2 children in elementary school. We believe that education is an essential service. We and our children are ready to return to school in person full time. The schools and KSDE have prepared comprehensive safety plans. We feel safe and prepared to return to school with our children in early August. If we must wait until September, we will accept this reality. However, we feel strongly that a commitment must be made to an in person full time option for parents and students. Thank you for all of your work this summer.
7/21/2020 13:38:26	DaNae	Yarnell		Wamego	I agree with the governor's decision to postpone. I think this will allow teachers to prep more thoroughly with whatever decisions are made. I also would like to request that IF a hybrid model is selected that siblings schedules are taken into consideration and are allowed to attend schools on the same days. I have two elementary students one at west and one at central. It would be huge burden to plan and over see their supervision and education and to maintain job responsibilities.
7/21/2020 13:38:27	Patty	Donaldson		El Prado	Starting school in the mist of a pandemic which is spiraling out of control is putting the "cart in front of the horse". First admit America Screwed up, shut down again to get the virus under control via CDC guidelines. Then and only then put a keen focus on reopening schools safely.
7/21/2020 13:38:46	Stacy	Greenwood	USD437	Live in Lawrence; work	I believe the board needs to support the governor's decision to delay schools opening until after Labor Day to keep students and staff as safe as possible during this difficult time. As a school psychologist, I do worry about the effects of being out of school this long. However, even being in the buildings will not be the same due to the virus and will have lasting traumatic effects when someone gets sick and/or dies.

7/21/2020 13:38:55	Kara	Bunce		Buhler	As a parent and a teacher I'm in full support of the delayed opening of schools. I feel like districts need more time to think through all things big and small before we return.
7/21/2020 13:38:58	Dawn	Tomokins	Heritage Christian Scho	Topeka	I feel that school boards should make the decision for their stakeholders. Some districts and private schools can manage this virus different than a large district.
7/21/2020 13:39:03	Janaye	Shaffer	USD232	Shawnee	Let's get kids back to school! Even if it has to be 50% occupancy.
7/21/2020 13:39:04	Carrie	Mullies	Spring Hill parent & Ola	Olathe	Please uphold the Governor's executive order. As a parent, I am very concerned that Spring Hill has very little in place for remote learning (per their recent board meeting) and that they do not have any PD scheduled for teachers to prepare for the Covid adjustments (cleaning, distancing, room prep). This extra time will allow them to prepare their classrooms and figure out how to modify their classroom plans for non-contact. (Because we are used to teaching up close - not 6 feet apart)  As an Olathe employee I am begging you for time to prepare. We have been told that the district does not have enough PPE for all staff. We still have not been provided with a draft opening plan. All we have is how to prepare online lessons. Your teachers are afraid to return but we want to be there with our students. Please give the individual buildings time to prepare. Thank you for your time.
7/21/2020 13:39:08	Mara	Olson	Schools and kids everyw	Frankfort	It is not good for anyone to wear masks all day. Even nurses and doctors don't do it unless they are doing procedures or have patients. This was like this even before. This governor is out of control and needs to go back to New York. I don't really have an issue with starting after labor day because that's what we did when I was a kid and it would save every district money for their AC bills. We also got out in May, same as now. I'm pretty sure we were smarter because this dumbed down version of school our kids get now is ridiculous. Never in history have we acted the way we are now for a virus that has a lower death rate than influenza, which is proven to affect kids more than this covid 19 virus does. There will be lots of parents that choose to homeschool their kids just for the safety of having to wear a mask all day. And if they can't are they going to be punished or shamed? That alone is worth teaching them yourself. Fear is a funny thing and it takes more courage to speak out against it than to say nothing. I urge you to speak up and do the courageous thing and quit making decisions based on fear. If our country behaved like we are now years ago, we wouldn't even have a country.
7/21/2020 13:39:10	Ellen	Edgar		Kansas City (KS)	I am in full support of delaying the start of the school year as long as possible.
7/21/2020 13:39:24	Laureb	Worley	Olathe school district ce	Olathe	Please follow governor's order to postpone until Labor Day then proceed with protections in place for students and teachers
7/21/2020 13:39:24	Amanda	Davis		Lawrence	Please abide by Governor Kelly's Executive Order and require schools to delay their in-person start until after Labor Day. The right thing to do would be to require that all schools start with a modified virtual learning experience, state-wide, with exceptions for students with IEPs who need in-person, safe, socially distanced, masked, instruction until there is a vaccine or until other steps are taken by our state and federal government to mitigate the havoc that COVID-19 has reaped on our state and this country, as a whole.  Blatantly ignoring health officials' recommendations will only result in the unnecessary deaths of children, their family members, and our cherished educators. Please do the right thing and put the health and safety of our communities first.
7/21/2020 13:39:24	Mel	Perry	parent	Lawrence	Thank you!
7/21/2020 13:39:37	Mel	Perry	parent	Lawrence	Please uphold the governor's order
7/21/2020 13:39:38	Amber	Phillimore	My son goes to Wamego	Wamego	I encourage you to open schools with proper precautions. My son will be a Junior and he needs to be back in school. The online learning last semester was a joke. My sons mental health is suffering. He is not around his friends and he desperately needs some sense of normalcy. He is suffering and not going to school will be detrimental to his health and to his overall education. Please open schools back up!
7/21/2020 13:39:40	Rebecca	Bo kelman		Bucyrus	please approve the executive order delaying school

7/21/2020 13:39:49	Alison	Miller	KCKPS	Platte City, MO	Now is the time to band together. I read two days ago that all but three counties in KS have covid transmission. That figure is bound to rise without statewide mitigation strategies. While we all think about our own communities, Governor Laura Kelly is looking at the entire state as one entity. In this case, I am in agreement. I live in a different community than where I work, as do many people. Many people work in different districts than where their families live and where their children attend schools. What happens in one school district most certainly influences what happens in another district. If the state acts as one and delays the start of school, we will all be in a much better position to move forward into the school year. We will have more time to train for student needs and safety techniques in these times of high covid spread.
7/21/2020 13:39:52	Andrea	Seaton		Cimarron	While I understand the fear and uncertainty of bringing a large group of students together for school everyday during this threat. I have to believe it would be far less damaging to our economy and family lives then if we choose to continue living in fear. My husband and I have had the virus and while it was not a pleasant experience it almost replicated the flu for me and my husband actually only lost his sense of taste and smell. I understand in full capacity that others are not so lucky and it can be deadly; however, so can the flu, but we've never been crippled by fear of the flu and many people I know do not even bother receiving a flu vaccination so we can't use the vaccine as an excuse. Fear can be just as crippling as well. The effects of our decisions today on education will impact us for MANY years down the road. My mother is in education and I've seen first hand the type of emotional impact she has on her students. We often times forget about the child who looks forward to the new school year because it means a hot lunch, listening ears, friendly hugs and smiles, and structure. It's heartbreaking to think how disruptive this virus has been to so many children AND adults emotional well being. At what point is enough, enough? I don't recall the shutdown being implemented for the sake of ridding the virus in its entirety, but instead to slow the spread which I believe we have achieved to the extent necessary to continue our daily lives. We are now more equipped, we've learned more about how to recognize its symptoms and treat patients. We have to move forward as a nation. The longer we wait the harder it will be to ever return to some sense of normal. As a Christian, I know we weren't created to be in control. We don't have the capacity to have all of the answers, we have to trust. We're told that God knows the very number of hairs on our head!!! He's in control, we need not fear! We have the opportunity to demonstrate to others that in God we DO trust. I'm in favor of starting back to school and unfortunately this virus will show its ugly face, but it's going to sooner or later no matter how much we try to hide! Let's not continue going down this slippery slope to a new disaster.
7/21/2020 13:39:54	Theresa	McDowell	Goddard schools	Wichita	Please delay the opening and recommend online school where multiple cases of Covid is present. Support the governors order.
7/21/2020 13:40:04	Amanda	Church	USD 411 - Goessel Sch	1061 30th Ave, Canton,	Please uphold Gov. Kelly's executive order to delay school until after Labor Day. I believe this will allow schools the time needed to adequately prepare for children to return. I'm concerned not only for my children, but for all the teachers, staff, and other students. Both of my children are medically complex. One has a brain tumor & one has severe GI & pulmonary issues requiring a feeding tube & regular visits to Boston Children's Hospital. Should either of my children get CoVid, they will likely die due to their medical issues. Yes, I could homeschool them; however, they need socialization just like you & I. Please consider upholding Gov. Kelly's executive order for the sake of all the children, teachers, & staff that are at risk. Thank you for your kind consideration. Amanda Church
7/21/2020 13:40:04	Adria	Kasel	USD 361 Chaparral Sch	Attica	I am a teacher who has two children under the age of 8, both in school. I for one would like to see a sanitation station as soon as kids walk in and mandatory mask for all students when they are closer than 5 feet apart. I have trained my 3 year old and it is possible for her to wear one for two hours without complaining. I want to keep them safe.

7/21/2020 13:40:06	Brad	Willems	Wallace County HS Foo	Sharon Springs	Going to start real simple, 1 size does not fit all! The kids need to get back to not only school but also sports! We have been averaging close to 60 kids each morning in shifts for weights and our county still has ZERO cases. We take the common sense approach-wash hands, wipe down after yourself, cover your mouth when you sneeze or cough and if you are sick we stay home! We also don't share water bottles. The kids want to be around each other, they need to be around each other, my kids do love to work hard but the biggest reason they are coming in is because they need the social aspect of it! We already have gotten behind in school and stole there spring semester and sports form them, we cannot let them get any farther behind then they already are! I understand that this is a virus that can cause problems and I am no doctor, but there are so many other things that I am more scared of for these kids then this virus. Mental Health, Social Health, Physical Health and are they even getting food every day! School and sports do so much more then teach them to read and write! Life isn't just about reading and writing, yes they are super important. But this is why online classes don't work for K-12, because of the Social interactive they get being around people! I come back to my first statement, 1 size does not fit all! Just like a text message doesn't give off the personality of the person sending it, some thing are better in person, meant to be in person! I have elderly parents who live in a different area then we do and yes I am worried about them, but its not because of them its because of the people around them.(Common Sense has seemed to have left the building) Kids need to be in school and sports to learn those life lessons so they have the ability to battle and compete in this world! Life is not easy, it is our job to prepare them for it! And it is really hard to do that when they are not in the school! Kids want to be held accountable and held to a higher standard, again it is real hard to do that when you are trying to teach them online. It is real hard to do that without school and sports! I truly believe if we don't get them back to school and sports we are failing them! That means we are failing at our jobs and the last time I looked if you fail you shouldn't have a job! Again, 1 size does not fit all! I am only speaking about our situation here. I understand it might be different else where, but I still truly believe the kids need to be in school and sports! When I say sports, I mean all extra curricular activities. Scholars bowl, forensics the play-whatever it may be, these kids got to get back to it, they need to get back to it! We owe it to them! Thanks for listening to me and thank you for all you do! Brad Willems
7/21/2020 13:40:23	Shelly	Maldonado		Wichita	Start school in August. Our kids need the support, consistency and education! Their mental and physical health needs are being ignored and they are suffering greatly! We need school.
7/21/2020 13:40:26	Cheri	Haskett	Skyline	Pratt	If masks are required, delay. If not, then let these kids go to school.
7/21/2020 13:40:39	Christina	Lewis	Teacher	Lenexa	As a teacher I feel that school should open as usual. I value my students and will do everything to keep them safe, but delaying school by 3 weeks is not going to make this virus go away. We stay in school during flu season and I see half my class out a week at a time to recover from the flu. Unfortunately this pandemic has become political and I don't feel that many of our leaders are doing what is best for the people, they have their own political agendas.
7/21/2020 13:40:40	Amanda	Gayton	Mother of children	Derby	I think this is an overreach of power and that fact that you are mandating masks and all these rules, when the truth is coming out about the cdc falsifying hundreds of thousands of positives and deaths, when in actuality we don't even qualify for pandemic status anymore is just mind blowing on how stupid you think the people of this state is. THIS WILL NOT BE THE NEW NORMAL! It's time for things to go back to how they used to be and for Laura Kelley to be thrown out of office! My children will not participate in this stupidity and if I have to I will do everything in my power to make sure things go back to how they were and that these people get relieved of their positions in office. NO MORE SCHOOL RESTRICTIONS! OPEN EVERYTHING BACK UP!
7/21/2020 13:40:54	Ryan	Flurry	Parent of elementary stu	Prairie Village	We need to follow the recommendations of KDHE regarding delaying the school start until mitigation measures have had time to demonstrate a drop in case counts. This would provide for the least tumultuous school experience for students.

7/21/2020 13:40:54	Karen	Hay	Special Education teach	Topeka	I support school being delayed. I am very afraid of the domino effect of anyone to include myself getting or being in contact with someone who has COVI-19. Although I am single and an only child, I am the ONLY person that my parents have for any support or emergency. I am extremely afraid of being in school with 1,800 + students and then coming home to check on my parents or give my mom relief from taking care of my dad who is completely bedridden. I am very concerned that districts as a whole are not going to be able to supply enough sanitizer, soap, masks, shields, and keep up with deep cleaning scheduled. What about subs for teachers? The list is endless of what if's.
7/21/2020 13:40:55	Jamie	Schnee	USD 383 Manhattan Hig	Manhattan	PLEASE push the reopening date back to September. This will give schools and families a few more weeks to prepare, and the bigger schools a few weeks to figure out how we can SAFELY make this work. The numbers in Manhattan keep rising, and I do not feel comfortable as an educator throwing my high-risk special education students in a classroom as it is now. Plus, staff can have the opportunity for more trainings and preparedness for in-person and/or online instruction, along with safety trainings. Please consider the health of the most at-risk population!
7/21/2020 13:40:55	Jessica	Dempewolf		Colby	Please, let our kids get back to school as soon as possible! We need our teachers and staff to help our kids face to face! They have been out of school since March and need to get back to a normal routine and schedule. Thank you! I don't know what can be done about masks but, my daughters are 4 and 6 and really are still learning speech. How to sound out letters. How to read. A mask hinders their learning ability. They need to see their teachers mouths to properly learn these sounds and words. Again, thank you for hearing parents opinions.
7/21/2020 13:40:59	Rebekah	Ohlde	Daycare provider/parent	Salina	As a parent I believe my kids need to be back in the classroom. I believe all the staff, teachers, administrators are doing their best to keep our kids safe. I feel our kids need to be back in school for the academic portion as much as for the social emotional and the well being of their mental health.  As a daycare provider, having the older kids in care during the school year brings a new set of challenges. Trying to help 'school' the school age and take care of the younger children can be quite challenging. On top of doing our best to keep the facility/home clean and sanitized.  I know there are many sides to this decision and many concerns I may not be dealing with personally but I believe going back to school on time is what's best for my kids!
7/21/2020 13:41:08	Michelle	Narayan		Lenexa	Please consider a hybrid option to begin the school year. I am concerned about preparedness to address health of students, teacher and staff. I believe the students need in-person teaching instruction along with virtual learning. Thank you.
7/21/2020 13:41:10	Sherris	Bellamy		Overland Park	I support Governor Kelly's order to delay school opening until September 9
7/21/2020 13:41:14	Stacey	Hargrave		Abilene	The kids need to get back some type of normal. Let school start as originally scheduled in August. Starting after Labor Day will not slow COVID down, it just once again keeps the kids from having something to look forward to.
7/21/2020 13:41:28	Kristin	Crowder		Olathe	Please let kids return to school in August giving the option to both families and teachers to opt for virtual learning if they choose not to attend in classrooms. Students need to be back to school and classroom settings for their wellbeing, mental health and to receive services and materials that are just not possible for at home learning. If studies show that transmission from children is low then I feel sending them back would be are best and smartest decision.
7/21/2020 13:41:30	Lisa	Wingfield	Blue Valley School Dist	Overland Park	I work with Early Childhood special education students as a Speech-Language Pathologist. I do not believe that I can safely provide therapy for my students in a face to face setting. I provide all of my therapy in the special education classroom in a group setting. We will not be able to social distance--many times the children need assistance getting in and out of a chair or hand over hand assistance when cutting or drawing. They cannot yet cover a sneeze or cough. I regularly wipe noses, assist with hand washing and potty-training and/or diapering. Although I can wear a mask, the children will not be able to see my mouth/face as I am teaching how to articulate sounds or interpret facial expressions. It is not safe to return to school at this time.

7/21/2020 13:41:39	Tara	Thacker		Topeka	Please vote in support of Laura Kelly's executive order to delay the start of K-12 schools in Kansas. With COVID-19 cases on the rise in Kansas, this is not an appropriate time for students and teachers to return back to schools. As a teacher myself, I fear for my community, my students, my family, and myself if we return to school too soon. One death that results from the reopening of schools is too many. I dread the possibility that this may impact me and my school community. Even with social distancing measures and mask-wearing, the lack of open space and the huge number of students and staff that will occupy the building each day will ensure that schools become hotbeds for the spread of this virus. Please support delaying the start of school!
7/21/2020 13:41:43	Karen	Unruh	USD 411 and USD 418	Rural Goessel in McPhe	I support Governor Kelly's order to keep schools closed until after Labor Day. Our area of the state is experiencing a spike in COVID positive cases, and it would be extremely dangerous and irresponsible to send students and teachers back to school. This is not a "normal" time, and we need to heed the scientist's and health professional's advice. The extra weeks will allow schools to adequately prepare for a safer learning environment during the pandemic. PLEASE VOTE IN SUPPORT OF GOVERNOR KELLY.
7/21/2020 13:41:47	Brad	Burrow	Parent	Overland Park	While we truly appreciate the concern our leadership has for the spread of the Coronavirus, we also understand that there has to be a weighing of the costs associated with keeping our children apart as they attempt to learn. While most teachers did their best to accommodate the distance learning nightmare they were thrust into, most will acknowledge that they were ineffective and mostly irrelevant to the potential grow of their students. When you weigh the potential protections of staying isolated versus the loss of community, learning and growth our students continue to experience it is very clear that we must go back to school on time. When you look at the risk of spreading the virus, it becoming clearer everyday that it continues to decrease as we learn more. This age group is simply not at risk like other age groups. I would advocate that any teachers that don't feel comfortable or are in the higher risk categories should be able to stay at home or have accommodations made for them. Everyone else should be allowed to meet and interact – LEARN! Additionally, the government or Governor really doesn't have the authority to do what they are doing. Save your tax payers some money by keeping us out of frivolous lawsuits that will surely be coming. GO BACK TO SCHOOL!
7/21/2020 13:41:49	Audra	Relph	My family	Bel Aire, ks	Please open schools as scheduled. All the teachers and staff have been preparing all summer, they are ready! We met with our principal last week, and she laid out their plans. Also, masks for kids in the classroom is ridiculous. Pediatricians have said so continually and evidence from Europe proves they aren't needed for the kids. If you are truly concerned, at least allow virtual/online schooling. Delaying the start of the year will online cause more issues and chaos later
7/21/2020 13:41:49	Grace	Tan		Overland park	Would like to start with online schooling on Aug 13, and when it's safe enough to go back to school then will take in person class. But please don't wait after labor day to start school.
7/21/2020 13:41:52	No	Swander	Parent	Hays	No!
7/21/2020 13:42:02	Jackie	Hays	South Central Kansas Sp	Wichita	I encourage you to think of the safety and health of Kansas students and staff. This is not and should not be a political issue. With the high COVID numbers in the state, it's confusing to me why we're trying to rush hundreds of people back into buildings for 8 hours per day. However, given these extra few weeks, staff will have more time to review state guidelines and implement a local plan to help ensure the safest possible return. Everyone wants to be back in schools, we just need to be smart about opening back up. Please consider what you are asking staff to do by sending them back to school. At least give us the opportunity and time to prepare. The hours can and will be made up throughout the year, or at the end of the school year if needed. Thank you.
7/21/2020 13:42:03	Suzanne	Wolcott	Self	McPherson	I am in favor of the delay. I hope it gives schools the opportunity to work on a more comprehensive safety plan. These are difficult times and I support Gov. Kelly's ongoing efforts to help our communities and children stay safe.

7/21/2020 13:42:04	Alicia christi	Carter jarrett		Topeka lawrence	I feel like the kids should be in school as soon as possible and as much as possible. I feel like if you give an option of online learning, then those that who prefer that, will do that. I don't think kids should be required to wear a mask all day. Only when in hallways or in tight spaces like in the main office etc.. I feel like the virus isn't as much of a threat as it is to take away their independence, hands-On learning, social learning and interaction and all the other benefits a kid would receive by being in school. Thanks!
7/21/2020 13:42:06	Harold	Brandt III		Lawrence	I support the governor in her decision. I do not believe based on scientific findings from our nation's top health institution as well as local health experts that opening schools at all is wise. People are generous and ingenious, we can find a way to educate our children and maintain livelihood without risk to our children and communities. Educating our children is not worth the risk of injury or death
7/21/2020 13:42:34	Doretta	Braden	Myself	Topeka	Please support Gov Kelly's order to delay the start of school. We must get the covid19 numbers tending down before sending out kids, teachers and staff into the school buildings.
7/21/2020 13:42:34	Kelly	Murray	Kansas City Christian	Overland Park	All schools don't fit the same shoe size and our school is unique in how they manage cleanliness and social distancing. I met with my Primary Care doctor this morning and I don't trust or believe the number of cases or cases of death caused by COVID-19. Facilities are encouraged to be unethical for the sake of money and politics. COVID is real, but the numbers are not accurate and untruthful. Please don't make our children suffer by requiring them to learn On-Line without the guidance of the teachers and much needed socializing with their peers. Depression and isolation among our children is not healthy. Please consider allowing private schools the choice to open with the proper protocol for safety.
7/21/2020 13:42:35	Kristin	Griffith	Usd 497	Lawrence	Allow school athletes to continue practicing prior to sept 8 2020
7/21/2020 13:42:35	Ashley	Hiatt		Overland Park	I agree with delaying school closures until rates of Covid 19 are decreasing, not rising and public health officials deem it safe for schools to open for children and employees.
7/21/2020 13:42:36	Nikki	Schnepf	Parent	Shawnee, KS DeSoto Sc	Do NOT delay the school year! Our kids need to be in school for academic, mental and social reasons. We cannot live in fear of what "might" happen. Please allow our kids to attend school with their teachers and peers!
7/21/2020 13:42:38	Jan	Johnson		Manhattan	Please accept governor Kelly's mandate. We are in a town with 20,000 students returning in august. If we start school at the same time, we'll be shut down within a week Please
7/21/2020 13:42:41	Rosemary	Long		LaCygne	Do not delay the start of schools. Do not cave to a governor who is trying to get back at the legislature for reigning in her power trip. Kids and teachers will be fine. The governor has no basis in science for delaying schools. She talks about positive cases ( some are repeat tests on a single person, and some are simply probable positive), but never mentions the negative tests. She is also tight lipped with the demographics of the deaths. Out of the 318 deaths we do know (by Lee Norman) there have been 117 in the nursing homes. I'm sure this number is higher by now. In all these months the elderly who have been masked and sequestered away have been hit hard. Physically covid has taken some but the emotional side has, I'm sure, taken others through heartbreak. Physically our children have seen minimal problems with covid, but What about going hungry? We have spent so much time putting programs to help children with food; how did this become so unimportant so quickly? Emotionally these children need interaction with their peers so they can become productive members of society; not people who are afraid of their own shadow. So much more is involved with teaching than 2+2=4. I wish I could better convey how important it is to get kids back to school, and not bow to a vindictive governor. Thank you.

					<p>Considering the nature of a pandemic and assuming a desire to mitigate the spread of a virus with no vaccine, it seems prudent to hesitate to fully open schools for traditional learning in August as planned.</p> <p>Alternative options have been suggested: all virtual learning and a hybrid model. These strategies will allow us to hopefully transition to full classroom attendance later this academic year.</p> <p>These alternative methods of delivering education to students are a boon; without current technology, we would be looking at suspending school altogether as the only option to deal with a pandemic. Thankfully, we have options.</p> <p>But these new methods need to be consistent. They need to be rigorous. Teachers provide lessons, lectures, activities, and insight for their students, and teachers also monitor students as they engage that information individually, in groups, and as a class. When students are not physically in a classroom with their teacher, the teacher's ability to monitor their progress day to day, minute by minute, is not only hampered, but entirely removed. Emphasis will have to be on teachers providing quality instruction and resources for their students, while students and their caretakers will be responsible for ensuring appropriate time is dedicated to learning.</p> <p>Everyone needs time to solidify strategies to use during this experience. Teachers have to retool their approach for multiple modes of teaching, and be prepared to alternate between modes as the pandemic proceeds.</p> <p>Delaying the start date for this academic year will give teachers time to develop these strategies and systems for their "classroom." It will give school administrations time to ensure safe procedures when students are in the building and to ensure teachers are consistent in their expectations of student achievement. It will give families time to adjust and prepare for a vastly different role in their own/their children's education.</p> <p>The governor's order is the most reasonable, most compromising measure I have seen from an authority during this debate. If we don't want things to crash and burn during this pandemic, we must be prepared and we must have everyone on the same page. Hopefully that page says something more eloquent, compassionate, and specific than</p>
7/21/2020 13:42:46	James	Henry	USD 501 teacher	Topeka	
7/21/2020 13:42:47	Page	Pound	kindergarten teacher/ m	Towanda, Kansas	I want what is best for my children as well as my students. I feel that if we return to school as scheduled in August we will be sending them to an prison like institution based on the guidelines of the CDC. I want my children and my students to participate in school that resembles that of what school is supposed to be rather than the institution like environment.
7/21/2020 13:42:48	Jody	Mason		Overland Park	As a parent and school librarian I support Governor Kelly's order to delay school's opening until after Labor Day. 7/21/2020 13:43:04	Kristin	Williams		Goddard	Delay school, keep kids and staff safe
7/21/2020 13:43:15	Audra	Stiles	Blue Valley SD	Overland Park	Please focus on distance learning. Do not put parents, teachers and kids even further behind by continuing to delay the start of school. Come up with a plan that can work from home.
7/21/2020 13:43:25	Taylor	Holland	Usd 204	Basehor	Please vote to delay the opening of schools. Teachers and their families deserve to work in a safe environment. As a teacher with underlying health conditions and two children with severe asthma, I fear from my family's safety if schools reopened before it is truly safe to do so.
7/21/2020 13:43:36	Sandy	Ernst	SMSD	Lenexa	Please keep schools closed until after Labor Day. This will allow districts and staff ample time to make classroom and school modifications to ensure student and staff health and safety precautions are in place.
7/21/2020 13:43:38	Jody	Leeper	USD 300	Wilmore	Our kids have been out of the school learning environment since March. They are so excited to get back to school. The state of KS has a variety of school sizes & towns. Each school district knows best what is going on in their community & how to be safe. Please do not do a one size fits all approach for our schools. At USD 300 we are ready for the upcoming school year & looking forward to starting on time in August.
7/21/2020 13:43:41	LeAnn	Gregory		Lawrence	I'm requesting that you please allow sports to practice even if school is not in session. Our teenage kids desperately need to continue this as it gives them something to look forward to at such a crucial time in their lives. If there are big outbreaks, you can always cancel at a later time. We have to get back to life especially our kids. Thank you for reading and taking my comments into consideration. It is greatly appreciated!

					<p>I wanted to give an update on the research regarding COVID in children.</p> <p>I should back up briefly and state that this is from a physician with a PhD in Epidemiology who became very interested in this topic when a colleague and friend of mine, Jennifer Kasten, MD MSc, wrote a systematic review of COVID epidemiology in children (<a href="https://www.facebook.com/jenniferkastennmd/posts/128898328763114">https://www.facebook.com/jenniferkastennmd/posts/128898328763114</a>) and found kids 12 and under *might be viral "dead ends", meaning they can get COVID but can't transmit to anyone else. This really captured my interest because this would make COVID very different from most respiratory viruses we know. Then in a physician's group dedicated to school opening, a physician researcher published a document for the group in which said she could identify 0 (zero) cases of certain transmission from children under 12 in the scientific literature and since that time Dr. Rutherford, UCSF Epidemiologist, has also been public about elementary-aged children being a "one way street" for infection - they get it but don't appear to transmit it, much, if at all. (UCSF Grand Rounds lectures are now available on YouTube for those interested in hearing him).</p> <p>Last month, I did my own summary of the data (<a href="https://www.facebook.com/tracy.hoeg/posts/10219217323357158">https://www.facebook.com/tracy.hoeg/posts/10219217323357158</a>) and found evidence of the following:</p> <p>*Very limited transmission if any from children ages 12 and under to either other children or adults</p> <p>*Children appeared to be at least 10 times more likely to die of influenza than Covid and are more likely to be struck by lightning (I rechecked the CDC website today 7/13 and they are still reporting 3 deaths in children under 18 due to confirmed COVID; for comparison, there have been 185 deaths due to influenza in this population in the 2019/2020 season. Edit: see updated mortality data below from the 7/19 addition).</p> <p>*Countries that reopened elementary schools as a first step in their country's reopening did not see an uptick in cases (these include numerous European and Asian countries, some of which are displayed in Figure 4. Reopenings not causing and uptick in cases is consistent with children not being a major vector for the disease. Figure 3 shows age of the source of the cases of COVID in Holland, with none ages 18 and under in their study, as just an example of these</p>
7/21/2020 13:43:43	Brandon	Grosdidier	Eudora High School and	Eudora, KS	
7/21/2020 13:43:44	Kathy	Weatherman	Myself	Sylvan Grove	Starting after Labor Day is the logical thing to do. I have 3 teachers in my family. Please just keep the safety of our children, teachers and all that are employed by the districts as a top priority. And please, please keep politics out of the decisions.
7/21/2020 13:43:55	Andrea	Hoelting	Parent USD 382	Pratt ks	I think you are absolutely doing the right thing delaying schools to keep ALL of Kansas safe. Thank you!
