7/21/2020 13:43:56	Brandi	Caldwell	Usd 204	Bonner Springs	I don't feel like it's safe for students and staff to return to school until our districts county has Covid more under control.
7/21/2020 13:44:00	Brooke	Knight	Usd 259	Wichita	<p>I am an Elementary Veteran Teacher of 20 years in USD 259 and a parent of a High School Freshman. I am one of the High Risk teachers due to autoimmune problems. I've spent my career in two of the most impoverished neighborhoods in Wichita. I've loved teaching students of poverty and extreme trauma because I care about them and their families, I feel I make the most difference there. I've devoted myself to my students and my school community and I miss my darling students with all my heart.</p> <p>With all this being said I am so very thankful that Gov. Kelly is giving the school systems more time to prepare for a safe return. As a high risk teacher I am terrified to go back to a full classroom/school. My own health is a real issue and I could easily bring it home to my family members.</p> <p>I fear that even with mandatory masks the young students won't keep them on, social distance, and the schools will not provide the products we need to properly disinfect spaces. It will be very hard to have any real focus on academics while monitoring distances, cleaning, and monitoring masks.</p> <p>The thought of opening schools in Wichita as Covid cases are rising and more shutdowns are happening around us seems insane!!</p> <p>Please protect my students, my own child, myself, and my family. Delay the opening of schools until case numbers decrease and we can safely go back!</p>

7/21/2020 13:44:05	Stefanie	Kelley	School Nurse JOCO	Leawood	PLEASE gather data on transmission rates in Kansas and my county Johnson County before we open. The data from South Korea is so impressive. As a school nurse, I am so concerned about our teachers & staff, students, and families will just result in additional avoidable morbidity and mortality. Our schools ARE NOT READY! We need to know what we are risking. Kansans do NOT need to be experimental subjects for other school districts to determine whether it is safe or not to open. We need data to know WHAT is specifically occurring in our state and counties regarding child to child, child to adult, adult to child, and adult to adult transmission. Furthermore, masks and social distancing are scientifically proven methods to prevent the spread of SARS COV-2/COVID19. Thank you.
7/21/2020 13:44:08	Justin	Smith	Parent of 2 students in U	Lawrence	Delaying school is in the best interest of all parties involved. Teachers, all dust it staff, students and families. We need a better plan and we need to be safe. We need this time for districts to create a specific and safe plan for returning in person.
7/21/2020 13:44:13	Noel	Miller	Educators	Overland Park	Please delay the start of the 2020-2021 school year for students. As an educator, I greatly appreciate the strategies and training our staff could work through before kids come to the building. I sincerely believe that this training will be beneficial for the health and safety of all educators and students.  Thank you.
7/21/2020 13:44:13	Jaime	Trent		Paola	I do not think school opening should be delayed.
7/21/2020 13:44:13	Kelley	Ahrens	KS resident	Overland Park	I support Gov. Kelly in waiting to open schools. The numbers are up and students and staff's health should be the priority. The amount of time schools will use sanitizing, washing hands etc will not make for a productive learning environment.
7/21/2020 13:44:23	M	Moore	Self	Wichita	School should be online. The risks are too significant.
7/21/2020 13:44:31	Sharon	Painter	BSKNEA	Basehor	Even in pre-COVID times, at the elementary level, we have classrooms filled with kids who don't know how to blow their noses, and we were already begging parents for tissues, hand sanitizer, and antibacterial wipes. And, after we return to school, with or without the equipment, and ability to stay healthy and safe, if a teacher or student gets symptoms, what then? Often times the kids are asymptomatic, so they will be spreading germs unknowingly. Many kids already come to school sick, sometimes dosed with medicine to mask fevers and symptoms, because parents have to work. How do we monitor this? The symptoms of COVID are very similar to the symptoms that children exhibit throughout the fall, winter, and spring due to the common cold or allergies. And, if teachers and students stayed home every time they had a cough or symptom, they would be absent more than present. So, if we ignore certain symptoms, please clarify which symptoms are ok? Teachers are likely to have increased absences due to self-monitoring. Who is teaching the remote learning if the teacher is unable to work due to having COVID that he/she caught at school because we changed all the health and safety recommendations just to accommodate pushing schools to reopen without the equipment, space, or ability to keep STAFF and STUDENTS safe? Teachers WANT to get back to school-WHEN IT IS SAFE! We WANT to get back to seeing "our kids" in person everyday-WHEN THE CASES STOP RISING! Teaching remotely is not easy or fun, and I get it isn't everyone's first choice. But, our top concern right now is that everyone is healthy and safe. How much learning would be taking place in the classroom anyway, after we wait in our 75 foot long lines to wash our hands for 20 seconds, multiple times a day? School days are already crammed full, and now we will be adding in disinfecting constantly, monitoring for symptoms, sending kids to "quarantine," trying to get ahold of parents, dealing with masks, giving "masks breaks," etc. Yes, kids are usually asymptomatic, but they can still spread the virus to each other. They might not be sick, but they can take those germs home to their families. They can give those germs to their teachers, who can take it home to their families. Yes, we, as teachers, are used to being the sacrificial lambs. Yes, we protect our student, and would take a bullet for them, if necessary. We would give our lives to keep them safe when they are in our care. But, I am not willing to expose myself to COVID and take COVID home to my family for the sake of having school in-person when it is completely preventable. We WANT to get back to our classrooms-WHEN WE NO LONGER HAVE TO FEEL LIKE WE ARE RISKING OUR LIVE AND OUR FAMILIES LIVES TO DO SO!
7/21/2020 13:44:32	Angie	Schwalm	Teacher	Leavenworth	I'm ready to open safely!! Lots of precautions in place! I need it to improve both my mental health as well as kids.

7/21/2020 13:44:38	Benjamin	Romney	republican	Seneca	start school regularly. no masks for grades under 6
7/21/2020 13:44:38	Lindsey	Wilson	USD 506	Altamont	I am in favor of keeping schools across the state closed to allow district administrators and educators a bit more time to plan for a safe reopening of buildings, and also allowing parents the opportunity to see what well-thought-out plans and options each district will have available, so that parents may make the best choice for their child. It's not fair to ask parents to choose without being able to "see" what districts have to offer. Districts haven't had a chance to solidify what they'll be able to offer, given the late release of the reopening guidelines. Keeping the start date as uniform as possible across the state ensures our curriculum will stay more closely aligned from district to district, as well as platform to platform (in-person/remote) by allowing educators more time to create parallel lesson plans for those classroom teachers who will be required to teach both remote and in-person lessons. Postponing school start dates until after Labor Day will not have a drastic impact on a child's learning; however, having an underprepared and overwhelmed teacher certainly will.
7/21/2020 13:44:41	Michelle	Garcia		Olathe	We should be in school
7/21/2020 13:45:12	Toby	Allen	Parent	Olathe	School should start before labor day.
7/21/2020 13:45:15	Deb	Phelps	League of Women Voters	Olathe	I totally support Governor Kelly's delay on opening school.
7/21/2020 13:45:16	Jennifer	Peterson	USD 259	Wichita	Please delay school until after Labor Day to try to flatten the curve so that we can attend school safely.
7/21/2020 13:45:17	Gui	Griffith	Scott City High School	Scott City	With the delay of school some kids might not be able to eat, socialize, or do any number of things that school provides for them, let alone, and most importantly, to learn. If this order goes through kids will have a harder time learning skills that will help them in their career. Some seniors won't be able to play their senior season of fall sports/activities. Kids need to be in school even if they hate it.
7/21/2020 13:45:17	Kami	Miller	Scott community high school	Dighton	Let these kids get back in the classroom and on the field!!
7/21/2020 13:45:18	Betty	Bachman	USD 308	Hutchinson	Delay school
7/21/2020 13:45:42	Christopher	Robles		Prairie Village	I urge you to uphold the governor's order to delay the beginning of the new school year. We are in the midst of rising cases of COVID-19 and I can't even believe that sending students back to in-person learning is being discussed. I am a teacher in an elementary school for the Shawnee Mission School District and keeping students and all school personnel must be a top priority for our state.
7/21/2020 13:45:42	Shelli	James		Scott City	I think school and sports need to get started in Aug. the kids are falling behind and if you don't start sports the kids will find something to do and it won't be good.
7/21/2020 13:45:43	Danielle	Amderson	Wichita USD 259 Pre-K	Wichita	Please delay school until after Labor Day

					<p>I feel for you all its a tuff spot and I am praying for you all. You are darned if you do and darned if you don't. I personally think if you can not avoid having children dealing with uncertainty of the day whether online or in person. Being quarantined for exposure. Consistent behavior is so important. Parents that are willing to put there children at risk for the selfish reasons of not wanting to put in the work to help their children are completely different then children that have terrible home lives and without the education system are going to truly be uneducated.</p> <p>I honestly think perhaps a waiver signed by parents saying they assume all risk with sending there children to public school , that releases all threats from an law suit if their own exposure was public school and something or death Became they could not sue as they truly had other options and knew the risk. Again to protect system from insurance claims to testing expenses to life claims. How to protect the discussions you make.</p> <p>I am a mother business owner and wife. When we had to do online school I reduced our hours for all employees in our office. It was not ideal as we are an accounting office it was tax season. But we owned to our children the time and help to get them through. I think things in this uncertain times call for different reactions. I feel businesses have to respect the additional responsibility being added to parents and find a way to accommodate the best they can. We are working from home or after school hours in our office. People tend to find a way. Change is hard but watching people react to pre action versus reaction is difficult no one wants judge or the what if's but the why didn't can be just as hard.</p> <p>In our small community bus drivers come from other jobs when you have late start or snow delays those bosses allow that delay of arrival for drivers. They also work with parents of children for drop offs and pick ups. Same with educator days or early release. It's just something new and different there for again it's the change people fear.</p> <p>Small communities tend to react harder to change as they just don't have as much.</p> <p>Good luck , God Bless and know some of us aren't mad we respect you we respect your decisions and you are in this spot because we choose you to represent us.</p>
7/21/2020 13:45:58	Monica	Baker Swarts	382	Pratt	
7/21/2020 13:46:28	Stacy	Cordes	USD 226	Meade	Please uphold Gov. Kelly's executive order to delay the start of school. I am on our reopening task force. We NEED time to plan and reorganize. We need time to receive supplies. I appreciate your time and efforts in ensuring Kansas teachers, staff, and students have a safe, effective, and enjoyable year.
7/21/2020 13:46:33	Jennifer	Webster	Usd402	Augusta	I support delaying school after Labor Day or until later when numbers merit returning. In the mean time I support on line education over the socialization of face to face or hybrid classes.
7/21/2020 13:46:39	Judy	Steinbrink	USD216 teacher	GARDEN CITY	I am 64 years old and teach 4 year old preschool. There is nothing more that I would like than to start the year with my little ones in class with me. Please delay school until after Labor Day. This will give us time for hopefully numbers to go down, as well as time to plan for the best way to effectively, but safely, bring our students back when the time is right.
7/21/2020 13:46:50	Marcus	Gutierrez		Wichita	I believe this a very good idea, for teachers, kids and family! Also for the city/state, it is for our protection against this virus and to avoid it from spreading person to person. As a parent I wouldn't want to risk my son not wearing a mask, so I am glad that there is a mask order in the works! Anything to do to keep kids , teachers and family safe!
7/21/2020 13:47:06	Kathryn	Couch		Wilson	I support Governor Kelly's order to delay the start of school. Students, teachers, other staff and the general public will be safer by doing so. School should not open for in person classes until Kansas Covid 19 cases are under control. Also schools will need increased funding to implement the necessary safety requirements that will be necessary to open safely for everyone. Let Governor Kelley guide the state in reopening schools.
7/21/2020 13:47:06	Lauren	Manning		Derby	Please vote IN FAVOR of Kelly's Executive Order 20-58
7/21/2020 13:47:07	Lisa	Smith	My Family	Wichita	I think scholl should be delayed until new cases are zero.
7/21/2020 13:47:11	Kendal	Smith	USD 421	Lyndon	I believe a delayed start will give many districts more time to create and implement plans that will better address COVID safety measures and concerns.
7/21/2020 13:47:18	Claudia	Finley	Citizen	Overland Park	We should not send children, teachers and support staff into schools while numbers are cases are rising. Teachers and staff who are exposed should receive workman's comp benefits and hazard pay,

7/21/2020 13:47:19	cynthia	schaker		el dorado	I support Governor Kelly's order to keep schools closed until after Labor Day. I would urge the State BOE to support this order and give local school districts more time to prepare for this unprecedented time for us all. Perhaps with a little more time we will see a decline in new cases, but even if we don't it will give everyone more time to prepare how to safely educate our children and protect all school employees.
7/21/2020 13:47:25	Teresa	Simon	TPS	Topeka	Keep them closed until we have PPE and barriers in place!!!! Let us phase them in.
7/21/2020 13:47:28	Laura	Franken	Blue Valley Schools	Overland Park	Wish to begin start of school year via virtual learning
7/21/2020 13:47:28	Jill	Lynch		Emporia	I support the delay to start school after Labor Day.
7/21/2020 13:47:32	Haleigh	Carlson	Teacher in USD 383	Manhattan	A late start in the year gives teachers an adequate amount of time to plan for the year and create a meaningful learning experience that can work ahead of the pandemic. A late start to the year is not canceling school or starting late to give anyone a longer summer. A late start to the year is giving students and their families more time to decide what it best for their families and education. A late start is time for teachers to plan and create safe and meaningful educational experiences for students.
7/21/2020 13:47:42	Queren	King-Orozco		Burlingame	Thanks
7/21/2020 13:47:44	Katie	Hutchison	Parent	Lawrence	As a parent of a 1st grader, preschooler and infant I am extremely concerned about my children contracting COVID19. Schools have always sites of rampant viral spread. Why do we close for a snow day to prevent a single death yet we are willing to risk the lives of our children and their teachers by returning to an unsafe environment on a daily basis. Schools need time to thoroughly prepare for the year ahead. Please approve the governor's executive order. Let's wait, gather information and make data-driven decisions. There is no rush to open.
7/21/2020 13:47:44	Diane	Cochran	Maranatha Christian Ac	Shawnee	Please vote against Order 20-58. Lets get our students back to school in August.
7/21/2020 13:47:51	Jamie	Elwood	Teacher	Prairie Village	Please do NOT open schools! I don't want to die or spread this virus to my family and then they die, all because schools needed to ipen.
7/21/2020 13:47:58	Maryann	Coffman		Overland Park	I am in favor in delaying the opening of schools until after Labor Day. Kansas owes it to our students, teachers, staff and administrators to provide them with a safe environment when they return to schools
7/21/2020 13:48:01	Ashley	Baugh		Olathe	I am a parent in the Olathe school district with a 3rd grader and a kindergartener. Please let me know you hear our concerns and the concerns of our teachers by voting to delay school starting.
7/21/2020 13:48:03	Janelle	Habiger	Shawnee mission school	Overland park	I think this should be done until we are safe and numbers are declining. You are putting lives at risk.
7/21/2020 13:48:14	Tuanua	Swartz	USD 361 Chaparral Sch	Anthony	I believe delaying the start of school would provide more time for schools to prepare for all possibilities of learning. Face masks should be worn when there isn't the opportunity to remain 6ft apart. Once in the classroom, students seated 6 feet apart should be able to remove their face masks. Athletics and extra-curricular activities help keep students focused and engaged. Events should be lived streamed and face-masks should be worn by spectators at all times.
7/21/2020 13:48:21	Lisa	Goering	Concerned community r	Derby	I am against opening schools during the pandemic. Too many people are not taking the precautions necessary to stop community spread. Forcing teachers and staff to risk their lives and the lives of their families and students is cruel. Kansas is currently a hotspot, and until the state forces another shutdown, we will not get the outbreak under control. I am also very concerned about the long-term effects of COVID, especially the recent discovery of the continuing and life-altering issues children are suffering. Opening schools now to avoid inconvenience could lead to a huge number of Kansans with chronic life-long conditions that cause more economic and emotional hardships. Please do NOT open schools!!!
7/21/2020 13:48:35	Deanna	May	USD320	Wamego	Not safe to send kids to school now
7/21/2020 13:48:40	Caitlin	Smith		Overland Park	Please vote to delay reopening of schools until after labor day. Given current local case trends, I don't feel comfortable sending my child back to school and my mother (a teacher) back into the classroom.
7/21/2020 13:48:41	Matthew	Moore	Self	Wichita	I consider in-person schooling a risk and a gathering of potentially many children who could be asymptomatic, further spreading this disease. I feel online schooling should be an option for all public and private KS schools, with a delaying of opening at minimal.
7/21/2020 13:48:45	Stacia	Perez		Fort Riley	I think schools should start one time and not be delayed. Our children need to start getting back into the regular routines.

7/21/2020 13:48:48	Julianna	Garcia	Teacher (employed)	Manhattan	We have decided to not have our children attend school in person this year and I myself have resigned from my position at our local school. I suffer from a compromised immune system due to medications to control and auto-immune disease and our youngest daughter also has a compromised immune system. Please think of our teachers (people like me) and children who may have a compromised immune system but do not have the luxury of staying home. If the state mandates that the school year will start later to ensure the safety of our staff and of our compromised students, I believe our state will be better off for doing so. It is my experience that the uncertainty of safety guidelines, how teachers will be paid or unpaid for having to take sick leave if he/she is in contact with a positive COVID case, or whether or not the entire class will have to quarantine for weeks on end (further disrupting the classroom environment and the psychological welfare of our students), is what is concerning to most educators and parents. We need to have certainty that it is safe for our students and staff to come back to school for the long haul. Thank you for taking the time to understand where our needs are as a community.
7/21/2020 13:48:51	Emily	Stanley		Overland Park	Please vote down the delay of starting school. Kids need to go back to school. They have sacrificed so much and now you are asking them to not go to school again plus get out of school later due to the fact that they are starting later. The research supports kids not being at risk
7/21/2020 13:48:51	Greg	Raney	non	Olathe	Open when the state government determines that it is safe. Please be transparent with the plans.
7/21/2020 13:49:07	Janet	Fogh	Mca	Shawnee	Do not start school till September please
7/21/2020 13:49:13	Zach	Dinges	Public School	Topeka	<p>The KS DOE has long embraced data driven accountability in education. With that in mind, I urge the board to make their decision based on data and not emotion or political calculation.</p> <p>The simple fact is that cases are higher now than they were in the spring. Putting kids back in buildings now is admitting you know there's danger, but you care more about other issues</p> <p>That's not a morally or ethically viable position</p> <p>Even the white house has identified KS as a hot zone and suggested a return to phase one</p> <p>Besides that, a mere couple of months ago, this would all be a moot point as the legitimate authority of the governor would have been enough. The fact that this decision is even in your hands is the result of political machinations. Don't indulge that effort. Support the governor and follow the system that worked for nearly the entirety of Kansas history</p> <p>In addition, look at the polling. Solid majorities support the governor's handling and decision-making with regards to COVID-19</p> <p>As an educator, coach, and parent of school aged children, I guarantee I want to be back in the classroom as much or more than anyone. But it needs to be safe and responsible. That's not where we are currently, and I believe you all realize that</p> <p>Don't toe the line for political havjs and professional rabble-rousers like Susan Eagle. Do the right thing</p> <p>Finally, I leave you with this: if a single child or teacher dies a preventable death due to COVID this fall, the data will show quite clearly who is personally accountable for that. Do you want them on your conscience so you can be in good graces with professional politicians in the Statehouse, and have a better chance at reelection?</p>
7/21/2020 13:49:14	Anna	Phares	Parent	Westwood KS	Please consider delaying the start of school until after Labor Day to give teachers ample and appropriate time to tailor instruction as needed. This extra time also allows the district to gather necessary safety resources and review new procedures with teachers and staff.
7/21/2020 13:49:16	Sara	Shumaker		Wichita	Say NO to this order! I don't have a problem with delaying school or with masks. But mandating these things is not acceptable. Individual communities should vote regarding school decisions. Individual families should be free to choose what's best for their children's unique situations. We have to stop these one-size-fits-all mandates and orders.

7/21/2020 13:49:26	Alan	Ackerman	Self	Colby	As we all know each school district is different, my thought would be to set some guidelines and let each school board work with the county commissioners to adjust their own school procedures
7/21/2020 13:49:28	Chelsea	Gardenhire		Mulvane	Masks don't work. There are lots of studies that confirm this. Making children wear masks is just hurting them, especially children with special needs. I have 2 children that fall under the exemptions. Mandatory mask is not healthy for anyone. The government has overreacted and can not tell us what we have to do for our health. That's my rights their stepping on. They sure as hell can't tell a homeschooling parent that they have to wear masks. That's invasion of privacy. Stop the mandate. Stop the government overreach.
7/21/2020 13:49:29	Mary	Rauter	parent of HS students	Overland Park	Dear Board members Please open schools and allow sports to continue. Enough of Dr Norman and Governor Kelly's skewed views. It is no longer about flattening the curve-they now want total eradication which will not be possible, just like the flu. I follow the numbers and a lot of us aren't quite sure why our elected officials choose to scare people instead of inform them of all of the facts. Anyone can take a graph and make it appear to back up their theory. I can produce graphs to show the death rate is decreasing, hospitalizations are down(why the number of ICU beds we have in Kansas keeps changing is beyond me. One day it shows 1200 beds in Kansas, the next it shows 800). I regress....we have 7% of those beds being used, filled with Covid patients, or any other patient with pneumonia or flu-like symptoms. The curve has indeed FLATTENED. And please don't say our inability to refrain from social distancing has caused the huge "up-tick" in cases. Let's be honest. When you test 20 times the amount you tested the month before, you will see a rise. When you test anyone off the streets, whether they have symptoms or not, you will see a rise. Protesting perhaps??? We can only hope to God this is not setting a precedence for all viruses to come. We will literally be hostages in our own homes. My kids missed numerous, life-long events due to this unprecedented event. We watched and social distanced and followed the rules. My kids missed ACTs, college visits, prom, spring sports, State Cups, dances, recruiting opportunities, time with friends, time with teachers, LIFE. They missed living. Why schools weren't prepared for opening on time this Fall is strange to me. We knew in March we were done for the year. Most districts started working on it immediately and have plans in place. Parents have been buying sanitizers for years. Nothing new there. We can all come up with a plan of how to take the temp of 1400 kids each morning in a matter of hours. Masks? That will be the next great hoarding event. Who is responsible for each child having one? The school or the parent? And for the record, Governor Kelly talks about how great the schools handled the shut down. Can someone show me all the parents that were happy with how the pandemic on-line learning went? I have yet to find one, unless your child attended private school. Again, we played along and didn't criticize or schools or teachers because it was so beyond what we could control. BUT that time has passed. It is time to open the schools and allow the kids to play sports, be in the play and join the club. The numbers clearly show that kids do not have the same level of severity as do MUCH OLDER ADULTS and people with underlying conditions. If people don't feel safe sending
7/21/2020 13:49:31	Lindsey	Thyer	USD383	Manhattan	Please consider Gov. Kelly's executive order to open schools after Labor Day. It gives teachers, students, and parents time to make informed decisions on school opening plans as well as training on virtual learning.
7/21/2020 13:49:45	Natalie	Mickelson	Teacher and Parent at U	Paola	Please approve the delay in reopening of schools. I also strongly suggest going virtual/remote learning for the fall. We have worked very hard at maintaining our health and safety and have made many sacrifices, including cancelling our summer vacation and not enrolling our children in any sports or extracurricular activities. We do not wish for all our efforts to be in vain. I being a specials teacher would be exposed to 320+ students twice a week. That's terrifying in my mind.
7/21/2020 13:49:46	Cristi	Hare	Teachers	Milton, but work in Wic	Give parents choices, everyone has different circumstances. Let parents decide online or in person, let teachers decide if they want to teach online or in person.
7/21/2020 13:49:50	Teresa	Salinas	Parent	Olathe	The Olathe School District has a well thought out plan to bring back our students and staff safely. There is zero reason to delay us at this point. Wear masks, and wash your hands. These kids need to return back to some level of normalcy for the sake of not only their physical and mental well being but for some students school is their safe place or the only place they get fed, and I feel like those students are being tossed aside in this decision. Quite honestly I wish we would start school earlier, and attempt to get the semester done by Thanksgiving, and maybe have a longer break to allow.

7/21/2020 13:49:59	Sarah	Haub	Parents	Shawnee	Start schools on time. Go online until face to face can happen. We don't need to delay student getting back in a routine. Kids NEED SCHOOL AND TO GO TO SCHOOL!
7/21/2020 13:50:06	Rebecca	Cruce	USD 290	Ottawa	As a teacher I am terrified to go back to school. I think that we should get this virus under control and have a vaccine before we subject teachers and families to avoidable risks. Going back now should not be a viable option.
7/21/2020 13:50:07	Graden	Oswald	maranatha christian acad	colathe	as a student, i believe we should start school on time
7/21/2020 13:50:21	Betsy	Lobmeyer		Garden City	Please delay the start of school
7/21/2020 13:50:22	Megan	Minaschek	Self	Overland Park	There is no reason to delay the opening of elementary schools. All of the evidence shows that these children are not efficient spreaders of COVID and are the most impacted in other ways. Please use some common sense and don't make a blanket solution to an age-specific problem.
7/21/2020 13:50:28	Michelle	Wade	Parent	Lawrence	Please approve the delay so that the schools can formulate a solid plan for either bringing students back or providing virtual classrooms.
7/21/2020 13:50:30	Stephanie	Ramirez	USD 253	Emporia	Please support the governor's executive order. I am a teacher and a parent. It is imperative that we give time for the numbers to go down as well as to prepare for a safe return to our school buildings. Please don't let politics get in the way. Put kids, families, and school staff as your priority.
7/21/2020 13:50:31	Heidi	Petree		Overland Park	Delay/Do only distance learning.
7/21/2020 13:50:33	Jessica	Yourdon		Augusta	Please allow local school districts to make their own decisions. There is no need for a blanket delay on school starting and there is definitely no evidence to support mask wearing for children. Stop the madness.
7/21/2020 13:50:34	Sherry	Keller	All schools	Douglass	With the significant increase in cases and many states re- instating restrictions, it is too early to re-open schools! Besides how difficult it will be for teachers to teach effectively with limited classroom resources, it will be extremely difficult and stressful to try to make sure all students are following the safety guidelines as well as learning!  Please support Governor Kelly's Executive Orders! She has always had Kansans' best interests at heart and I trust her decisions.
7/21/2020 13:50:37	Sarah	Speck		Shawnee	Why don't we create 2 choices: 1. Open schools: teachers and students who choose to attend can attend. 2. Online Learning: Teachers and students who choose to stay home will stay at home. Everyone chooses their own path.
7/21/2020 13:50:39	Christopher	Parisho	Self, a parent of school a	Wichita	The KSDE developed a great plan which allowed individual districts many options to accommodate instruction while also maintaining safety fro students and staff. Not all districts have tens of thousand MBD s of children to instruct. Many districts are in counties which have little or no issue with severe or critical cases. The Governor is undermining that plan and treating everyone as if we are in a big city.  Please reject the Order by the Governor and let districts decide what's best for them using the plan you developed.
7/21/2020 13:50:52	Joe	Morales	Maranatha	Shawnee	Absolutely not. We pay for our children to go to a private school and do not rely on public funding. This is outrageous as our children need to be in school and it has been advised by pediaticians there is more risk in not having them in a school setting than keeping them away from corona virus. We are not worried about the virus and our school has indicated they are ready. This is unnecessary.
7/21/2020 13:50:54	Gwynne	West		Salina	I want the children back in school in August
7/21/2020 13:50:55	Kyle	Taylor		Colby	I would like Kansas K-12 to start the school year on the regular date that it should start.

7/21/2020 13:51:02	Ginger	Armbrust	Salina USD305	Salina	I would like to see a delayed start for school for several reasons. I teach middle school, and although research shows that kids are often not getting sick, many of our students test the rules. Maybe we need to mandate that the 2 weeks prior to schools even opening, students and all school personnel need to STAY HOME! No travel, no gatherings, no stores, so that maybe we can all go back covid free. I have been teaching a long time and feel nervous putting that many people together suddenly without people stopping their travel. And as a parent of a kid that had covid this summer, taking the CORRECT precautions at home to keep everyone else healthy was time consuming and exhausting. I also feel like all schools should start and maybe stay hybrid this year. I appreciate the work that was put into the 3 models and I am 100 percent behind kids being in the face to face instruction, BUT if kids get started with hybrid, then transitioning to either of the other models won't be hard for them. And it protects more students and staff at the same time. Delaying start will give teachers TIME to get quality stuff together, get our groups in place in case one of us gets sick, and allow teachers like me , who have been mostly home and in small gatherings, get used to being back in group settings. Please think about all of the people involved here, not the politics involved. Thank you!
7/21/2020 13:51:07	Christy	L'Esperance	School parent and high s	Overland Park	Please approve Governor Kelly's executive order to delay the start of the school year. Corona virus case numbers should be under control and protective supplies and equipment should be in place before we can feel comfortable returning. I can't think of a single person whose health and life it would willingly sacrifice to hasten the opening of schools.
7/21/2020 13:51:08	Robert	Keys		Topeka	Allow the local counties to make their own decisions regarding the timing and requirements for opening schools
7/21/2020 13:51:11	Carrie	Zuniga	Maranatha Christian Ac	Shawnee	Please Please open school on time!! Our children need to get back on schedule for their mental health!!
7/21/2020 13:51:13	Karen	Streit	BSHS 204	Basehor	Start school in the classroom and sports. The kids need this
7/21/2020 13:51:15	Jessica	Tallman		Overland Park	Our children need to be in school. There are a wide variety of reasons, all of which you already know. Daycares and childcare centers have been operating safely since the pandemic began. They implemented safety precautions as advised and children are thriving. We can do this with schools, too - especially in the elementary levels. Studies are showing over and over again that children are less likely to contract and less likely to spread the disease. Currently, studies show a child under the age of 10 is more likely to drown than die of COVID-19. Children can be in school and still have some sense of normalcy if things are done right. If classrooms at the elementary level behave like small families, groups can be isolated and kept in check. Children can still interact with each other, breathe fresh air (if we can reverse the mask mandate), and get the social and educational experience that schools offer. It is also important that children are together for developing their immune systems. They need to interact with a somewhat diverse group to keep their bodies ready to respond appropriately to their environments. Teachers at elementary levels can also minimize their risk of illness by staying mostly in their family groups, social distancing with other teachers, and masking (if they want to). Recess is important for vitamin D, fresh air, and movement. We can open schools safely.
7/21/2020 13:51:15	April	Bruna	St Johns Catholic School	Hanover	Please consider blocking this executive order. I have children entering 2nd and 5th grades and feel it is in their best interest to get them back in the classroom on time to prevent any further gaps in their education. Although we all tried our best to keep the learning going in the spring I know they were not able to get to the same point they would have been at had they been in school. Our teachers need those extra weeks to help get students caught back up where they should be academically. I have spoken with leadership at our school and they are ready to resume classes on time even with the new mask and hygiene mandates. We all knew these were practices likely needed for the school year and had already made plans including them. I feel that reasoning for the governor to delay the start was a poor excuse. These educators and administrators are smart people, they knew to plan ahead. Again I ask that you vote against this executive order. Thank you.
7/21/2020 13:51:21	Madison	Kirch	High school	Pittsburg	Please keep schools closed to allow superintendents more time to finalize an inclusive, SAFE plan for return of students and staff. Until there is a plan for what happens when a student or staff member is compromised, what to do when there is a sub shortage, how to get proper PPE for faculty and staff, districts have no business going back to school in two and a half weeks.

7/21/2020 13:51:25	Mary	Stackhouse	Interlocal 605, speaking	Cunningham, KS	Thank you for your serious non-partisan consideration of this matter. I trust you know that Governor Kelly wouldn't have come up with this mandate without careful thought and input from the medical community. I realize it is an impossible choice, but I stand in support of delaying the start of school. This is certainly an unprecedented time and, hopefully, one that we can get past. Starting later will certainly be a challenge for me, as I work in special education and the Sept. 20th count will be coming up soon. However, I think the additional time to figure out how to deliver itinerant services and how to best be prepared to pivot between in-person and online, if necessary, will be beneficial. Hopefully, we can all behave and flatten the curve before then. If not, then I wouldn't suggest delaying again; rather, start online as appropriate for local districts. I would venture to say my opinion is the minority in my area (sports is a big consideration I hear). I trust you to listen to the science and make the hard decision. I will be ready and eager to serve my students either way.
7/21/2020 13:51:27	Marjorie	Lathrop		Topeka	I strongly urge the BOE to approve this executive order for the safety of our children, teachers, and community.
7/21/2020 13:51:46	Lindsey	Radcliff	St. Patrick Catholic Sch	Basehor	I urge you to support Gov. Kelly's order to delay school opening. We need additional time to prepare and implement all of the guidelines for a safe return.
7/21/2020 13:51:47	Yvette	Nickel		Hesston	I support EO 20-58 and the plan to delay the start of the 20-21 school year. This delay will give educators and staff adequate time to prepare for the upcoming school year (with potential online options) and allow cities and communities to bring the number of COVID-19 cases down. Thank you!
7/21/2020 13:51:50	Gary	Bingham		Lawrence	Our children will not attend in person until there is a vaccine or some other protection for teachers and students.
7/21/2020 13:51:50	Aaron	Winkler		Gardner	Thank you for allowing the public to address this situation. I hope you are truly taking this into consideration when looking at what is best for our children. I believe returning to school K-12 with a normal schedule is what is needed. No mask, no social distancing, no restrictions, let school be school. Why, because that is what is best for our children. Returning to school and not allowing them to be kids or put these unrealistic measures on them is not going to be beneficial and will hurt the kids, their academics and their relationships with the teachers. If any of these regulations are imposed, I will not be sending my kids back to school. I would rather home school and get together with the other parents who feel the same way and allow our kids to get together for "school interaction." Nothing that Gov. Kelly has talked about is going to prevent this virus, it will spread, it has been for a while now. What will help, kids washing their hands or using hand sanitizer throughout the day, parents being responsible and keeping their kids home when they are sick and lastly, not letting fear drive our future.
7/21/2020 13:51:51	Richard	Macivor	Blue valley parent	Leawood	If professional sports can conduct quick testing, temp taking, contact tracing, masking, and adopt a standard quarantine procedure, then so can the school districts. Until these systems can be professionally administered, schools should remain 100% virtual. It is reckless and irresponsible to open schools without these systems in place. And have you thought about when a teacher gets sick? There will be a shortage of substitute teachers. Schools are not daycare, they aren't babysitting, they need to be places of learning.
7/21/2020 13:51:56	KATHERINE	WILLIAMS	BALDWIN USD 348	Baldwin City	Do not open schools without proper systems in place for all students. I would like to see the start of school pushed back until after Labor Day. I would also like to see only online classes...no classrooms
7/21/2020 13:52:02	Aaron	Johnson		ROELAND PARK	I am a parent of a 2nd grader. My spouse and I both work full time during the school year. Keeping our child at home for the fall semester will be very disruptive for both of us. However, there are sacrifices that we are willing to make for the health and safety of our family and our community. Please, do not send our children back into the classroom fall semester 2020. The risk is too high. We gladly will accept all the inconveniences of homeschooling, rather than endanger our students, teachers, school staff, and all of their families by "re-opening" before the COVID-19 pandemic is better under control.  Thank you for your time. Best, Aaron Johnson

7/21/2020 13:52:06	Deanna	Carr		Johnson	Please PLEASE open the schools. In my opinion, the numbers simply do not justify these extreme actions. And I have concerns for the teachers who will have to do required quarantines-will they be paid? Will they have to use sick days for it even if it's just an exposure and they are not ill?? I also have concerns for the kids whose only hot meals come from the school district. My church sends backpacks home with kids on Fridays so they can EAT over the weekends. Those are distributed at school. I think parents who are not comfortable sending their kids to the actual school building should explore their online options. And the rest of us should be able to send our kids to the building if we're comfortable doing so. Thank you.
7/21/2020 13:52:14	Jennifer	Lynch	Kansas City Christian S	Basehor, KS	Let each school board and community decide when to begin the school year. Please let schools begin in August. Smaller schools have been researching and making plans to keep students and faculty safe. Children's Mercy has completed comprehensive analysis that shows the impact COVID has on children is minimal and the impact of not having a routine is much worse on mental health. They also found that children are less likely to transmit the virus and if they do get it, often have little to no symptoms. For parents and teachers who are concerned, there is an opt in for virtual learning in Johnson County. With the diversity in the state of Kansas, one solution definitely does not fill every scenario.
7/21/2020 13:52:17	Lara	Williams	USD 259	Wichita	I am super uncomfortable teaching in person with all the students present like there is nothing going on. Would anyone on the board like to substitute for me for a week? Can you put yourself in my shoes? I am a specials teacher that meets with 600 students. My classroom is not that big. There will be no 6 feet apart possible. There would be anywhere from 26 to 35 students in my room. This is not unusual for a specials class. So, I will ask again. Would someone like to sub for me? I am certain the answer is no. My 15 year old kid is telling he his friends that his parents might die, you see both his parents are teachers. Bars are closed again everywhere to protect the drinkers, are they more important than our children and educators? No gatherings bigger than 15? Sure, for everyone but our students and teachers. How can this be? So, we are going to all sign living wills? I saw the last board meeting. I was beautiful, there was Plexiglas, masks, and spacing. Are you kidding me? I get none of that. We get to make the kids wash their hands more. This is not okay. One more time....would you like to sub for me?
7/21/2020 13:52:20	Michael	Raehpour	Teacher	Wichita	Please don't politicize re-opening into a "Right vs Left" debate, but instead consider the safety of students, parents, teachers, and all those who live with them who may be high risk of transmitting the illness. I'm a conservative teacher who seemingly is going against the grain of many people who generally think like me, and am wanting you to choose caution. I encourage you to support Governor Kelly's executive order and delay the start of school. I teach over 500 students per day as a band teacher and beginning school as planned frightens me with the possibility of person illness, family illness, student illness, deaths, and liability that falls onto me as a teacher.
7/21/2020 13:52:35	Kerri	Martinez	Parent	Olathe	Open school on time
7/21/2020 13:52:38	Jessica	Heidrick	Newton High School	Wichita	I fully support the governor's EO!
7/21/2020 13:52:40	Andrea	Leiker		Wichita	Kids need to be in school. They need the in person touch and I feel requiring masks is a huge mistake especially for the young ones. You can't expect a young child to keep a mask on all day long.

7/21/2020 13:52:49	Sarah	Grunder		Cassoday	Hello. I am a teacher at USD 492 and a parent of a 2nd and 5th grader. I believe our school district leadership team has the ability to effectively and safely derive and implement decisions based on covid 19 and our local status. I do not believe the Governor is acting in our best interest as she does not know the details that make up our district. Her actions are that of larger cities and districts within KS and therefore do not take our district into consideration, instead she is putting all of KS in one bucket and assuming that a blanket order is protecting us all when in fact it is not. It is hurting our children. If there is not a single case in our district, meaning no one in the school has covid then why are we wearing masks and starting later? In case someone brings it in, I understand that concept, but with making children wear masks and socially distance from one another (mind you a large part have been playing sports together) is a guarantee negative impact on their emotional and mental health. The over precautions and overstep do not match the statistics in our district. In January and February we had roughly 30% of students and staff out sick with influenza along with a virus the doctors weren't sure what it was and we remained open. My child's 4th grade class had 75% of it's students (15 out of 20) sick and they remained in school. And now when we have 0% sick we are going to start later, wear masks, and socially distance children? That does not make sense. I hope that you will consider every district in making your decision and the disruption in life that it will cause by allowing the order to go through. Thank you for your time. God bless!
7/21/2020 13:52:51	DeAnn	weber	Maranatha Christian Ac	Shawnee KS	Please allow Maranatha to open on time. They have everything ready to go to make sure that the kids are safe. My son has gone there to summer camps and they were taking temps before entering and using hand sanitizer constantly.
7/21/2020 13:52:58	Wendy	Dobbs	USD204	Edwardsville	I believe the delay in starting school will allow school staff to have a well established plan on how to keep students safe upon return to schools. It is inevitable that we return, but we need a solid plan beforehand.
7/21/2020 13:53:02	Mike	Johnson		Wichita	Schools should remain closed. We are putting our children at risk. They are the future. We should protect that future.
7/21/2020 13:53:02	Aaron	Cunningham		Wichita	Open the school. Reject Laura Kelly order. For the teachers and the students who are in fear let them stay home. But for everybody else let them sign a waiver saying they're aware of this flu And they will assume responsibility. Laura Kelly and her orders is just the nose of the camel under the tent. she will close school for the first half this year until after the election. this is going to open the door for homeschooling and for private and chartered schools if the public schools do not open
7/21/2020 13:53:04	Megan	Stroup	Usd 362 parent	Parker	Please open the schools the virus is not going away. Kids need school and activities
7/21/2020 13:53:07	Amie	smith	USD 259	Wichita	As a self contained special education teacher we need to really consider kids who can not keep a mask on or who have to be gtube fed. Some of these students spit and bite. They can not maintain social distancing. The staff and other students on rooms like this will not be protected. To short of staff to keep to with the cleaning this would put in place. Let me ask you...would you put your own family at risk? Then why put mine.
7/21/2020 13:53:09	Nicole	Woodson-Parks	USD 204 Parent	Bonner Springs	I think the start date should be pushed back because if you all don't feel comfortable meeting in person why are y'all pushing for our students to go into a building.
7/21/2020 13:53:12	Amanda	Lovell	Parent	Pratt	I would like to see schools moving forward based off the numbers in their community vs a one size fits all approach. Our school presented a tentative plan for returning to school that seemed to adequately address many of the issues with returning. I would also like it to be taken into consideration the low numbers when it comes to cases and transmissions between children. I understood shutting down in the spring with so much unknown but we down way to soon.
7/21/2020 13:53:23	Vlada	Binshtok	parent of a child with sp	Overland Park KS	Please make plans to restore services for special needs children a priority. While you are allocating resources either to safely reopen schools or to prepare for virtual learning for all, this small population of students could be safely served with either option at the scheduled start of school year. Thank you.
7/21/2020 13:53:24	Amy	Larson	Brown County Special E	Hiawatha, KS	Please do not start school until Sept 8. This gives all school employees a better chance to be prepared for the students with the pandemic.
7/21/2020 13:53:28	Barb	Goering	USD 411	Goessel	As an educator in the Goessel school system, I would like to see a delay in starting school until after Labor Day, 2020. The numbers of active new cases of Covid 19 in Kansas needs to be stable or decrease prior to opening, in my opinion. Thank you.
7/21/2020 13:53:38	Anne	Jardine	Self—Teacher	Manhattan	For the Love of children, please pass the order. For the love of teachers and other school staff members, please pass this. For the love of common sense, please pass this.

7/21/2020 13:53:44	Kelly	Lagree	Catholic Schools	Hays	<p>Thanks Kelly</p> <p>I urge to please open schools as scheduled and not delay the opening until after labor day. There are too many hours that would be lost and finding ways to make up those hours would be difficult. I understand that the school year can be extended, or the day could be lengthened, but that does not work for all students. It's not a cookie cutter or one fits all students. Many kids struggle with longer days and that brings into consideration the mental health of students. There are a lot of impacts to take into consideration on how students will be effected by changing the starting date. I also urge you not to go to online learning. It will be difficult to get students to sit at home for 7 or 8 hours a day in order to meet the required hours for the year. Plus our taxes or school fees pay for in-person education. Moving to online would require the student to be self taught or rely on a parent/guardian to teach the student. This is not what people are paying for. If I am going to spend a \$1000 to send my child to a private school, then I want that child sitting in a desk at that school. Same goes if I had to pay over \$200 in school fees to send my child to a public school. I'm not paying for that teacher to be sitting at home using Zoom to teach my child how to do math or reading. Kids don't learn that way. My child is going into his senior year, it would be devastating for him to lose this year. This is the most memorial year of a child's 12 years of school. It saddens me to see the class of 2020 lose part of their school year. Also please take into consideration of not postponing sports and other school activities. They need that interaction with other students. Plus sports provide physical activity which is much needed to provide a whole education to a student. You need to be both physically and mentally healthy in order to learn and be successful. Sports help with social skills as well help with leadership in a kids life. I know I'm being selfish by not wanting my son to lose his senior year, but it's not fair to him or to those who lost that year already. Also look at those kids who are just starting kindergarten. They need that interaction with other kids, this is when they start social skills and communication with each other.</p> <p>Please take my thoughts into consideration when voting on when to start school and activities. Let's start school on time. I honestly do not see how waiting until after another major holiday will change anything. Let's get things started!</p>
--------------------	-------	--------	------------------	------	---

7/21/2020 13:53:46	John	Tompkins	Retired engineer/educator	Olathe	<p>Please reference p. 1023 which addresses ventilation ASHRAE (Std. 62.1 for safety and building health) supported both by CDC and EPA for healthy schools (fresh air introduction through windows or HVAC). What we know on transmission: A. Droplets B. Touch C. Aerosols (importance of HVAC system). My concern is that the paragraph suggests some reasons not to address ventilation by HVAC...temp control, energy cost, security, etc. by improving ventilation (cost v health). Safety and health should not be an option in any workplace - particularly when there are standards to follow. I support the delayed reopening which might help to mitigate AC cooling load cost of introducing more outside air once schools starts (when I was in school we didn't have AC). Research* supports ventilation promotes healthy schools both physically (attendance) and cognitive (assessments). The recent GAO report June 2020 lists HVAC systems as greatest need for upgrade for both near and long term value - so my thoughts in these times as they are:</p> <p>A. Would like to see this paragraph strengthened to strongly encourage and/or require facility administrators to evaluate their HVAC system by professional engineer - with suggested follow up by administrator/teacher(s) to measure classroom CO2 with a handheld meter (\$200). Most high school science labs actually have instrumentation or access to instrumentation to measure (Vernier Technology CO2 sensors)</p> <p>B. Schools/districts with updated HVAC systems with forced ventilation (CO2 control) share their experiences with respect to best available technology.</p> <p>C. Schools without updated HVAC systems provide teachers guidance on opening windows....and consider as part of their master plan an audit of the existing HVAC system with respect to current ASHRAE standards for prioritizing in their budget considerations. (When giving a KS state standardized test - I moved to a room with windows and opened them up to give my students a fair advantage - if a state test is standardized; should the room environment not meet a standard ie. ASHRAE Std 62.1).</p> <p>As a former educator in a poorly ventilated science room...I saw the effects when the lab became the "lab of human respiration to exchange O2 for CO2" with high levels of CO2 outside the ASHRAE Std 62.1. I actually collected data to follow the trends based on classroom occupancy/size...not dangerous (at that time) but a "stuffy" room where critical thinking was a challenge for my students....and who knows what the health effects were during flu season? With new research in this area and believe this pandemic might provide an urgency to now look closely at building environments as a priority for investment - as the health of the building will determine the health of the occupants.</p>
7/21/2020 13:53:51	Ashley	Campbell	Parent	Pratt	I support the delaying of starting school. But worry about kids with bad parents and school being their only safe place
7/21/2020 13:53:55	Belinda	Katz		Bucklin	Open school in August. Let our kids get their education.
7/21/2020 13:53:58	Gabriel	Wiley	Maranatha Christian Ac	Shawnee	Schools should start on time taking reasonable covid precautions
7/21/2020 13:53:58	Tamara	Dody	USD 112	Clafin	I do not support the delay of school. Our district is small & is ready to start with safety precautions in place. Our children need routine, schedules, & no further delay in their education. My husband & I cannot stay home & cannot provide the assistance to my children to adequately get the benefit of online education.
7/21/2020 13:54:02	Damien	Stephens	Stephens Chiropractic	Abilene	Children need to be in school.
7/21/2020 13:54:02	Christina	Smith		Newton	You should wait to start school. Children and teachers are going to get sick and it will spread so quickly with class sizes. Kids should be kept safe.
7/21/2020 13:54:06	Jennifer	Gessley	Blue Valley 229	Overland Park	I am a reading specialist at the elementary level. Last year, prepandemic, I was often pulled from my job to cover classrooms due to a shortage of substitutes. This will be a significant issue this year. I love my job and love my students and I will find a way to teach them to the best of my ability, but I am not a martyr. I am already uneasy enough about returning without the added concern of having to cover classes anywhere in the building at the drop of a hat. We don't have the level of responsibility or control in our neighborhoods yet to be able to open schools safely.
7/21/2020 13:54:06	Kristi	Nichols		Garden City	Please do not delay the opening of schools. Our children need to be in school. I am a teacher and firmly believe this. The benefits outweigh the risks!

7/21/2020 13:54:12	Lisa	Breshears	USD 335 - Jackson Heights	Holton	I am in favor for delaying the opening of school, if it's to gather sanitizer/other various cleaning supplies and extra time for planning of lesson plans/agendas. We all know there is going to be large gatherings for the Labor Day holiday weekend, so it's a moot point to delay the opening for the number of positive COVID-19 cases. If it's positive cases that the delay is for, it would have to be delayed two weeks AFTER Labor Day weekend. My kids want to be back in school as much as I want them to be back in school, but I want it to be in the safest manner possible, not only for them but their teachers as well. If we delay school because of the number of positive cases, you may as well plan on everyone taking a gap year, because we've all seen how well adults have been listening the the guidelines/mandates/orders. Kids learn by example and so far the example that has been set by the vast majority of adults hasn't been good.
7/21/2020 13:54:17	Lindsey	Hickman		Council Grove	I as many other parents are struggling with what is best during this pandemic, nothing feels right. We live in a rural area and are very lucky our cases numbers have been low. I for one would like to see it stay this way. Following Governor Kelly's order to start after Labor Day just makes sense.  We have a 3rd grader and a freshman this year, what we feel is best for each is different. We realize by letting them go back it means all students, staff and families will be put at risk. The student who lives with their grandparents, a teacher with a small child, a bus driver with elderly parents, a para struggling with health issues...by going back we are putting all of these people at risk. I urge you to look to healthcare professionals and take whatever measures are necessary.
7/21/2020 13:54:22	Emily	Miller	USD 458	Prairie Village	Please vote YES.
7/21/2020 13:54:29	Amy	Entrikin	Hiawatha middle school	Hiawatha	I believe local and school officials should be responsible for when, if and how school starts and looks. Every county is highly different and one may have low numbers now and is able to start school but may need break later while others may have high numbers now and need to delay the start of school and can continue later. It should be up to local officials and not state wide.
7/21/2020 13:54:33	Michael	Zuniga	Maranatha Christian Ac	Shawnee	We request school to be open on time for the health and wellness of our children. The science shows they are at virtually no risk of contracting Covid 19. They are our essential future, please let them go back to school on time! Thank you!
7/21/2020 13:54:35	Christi	Reid	teachers and students	Lyons	This is a difficult decision and I do not envy you having the weight of the youth of Kansas on your shoulders. As you make this difficult decision, please make sure you are aware of the surroundings and conditions under which you are making it. Are some attending virtually? Did you have a temperature check before you could attend the meeting in person? Do you all have masks on? Do you have partitions up between those in attendance? Are you able to maintain 6ft distance?  If these conditions are necessary for 10 well-educated and experienced adults to make one impactful decision, then you should make sure these conditions are more than ready to roll out in every school by the date you decide to open those schools. Students and teachers are making numerous impactful decisions all day long, every day in those classrooms. Our students are even more important and less privileged. Please respect the people that you are making this decision for as much as you do your own health.
7/21/2020 13:54:36	Lesa	Frantz		Lawrence	I 100% support Governor Kelly's recommendation to delay the start of the 2020-2021 school year. Do NOT turn this into a political issue- we have a state leader in Governor Kelly who is making the best possible decision in these uncertain times- for the safety of our children , teachers, and everyone they come into contact with.
7/21/2020 13:54:48	Christina	Sadun		Overland Park	I have 2 sons: 1 in high school and 1 in middle school. I am in full support of Gov. Kelly's order to delay the start of school. Allowing more planning time and time to slow the spread of the virus is the smart path forward for our children, our teachers, and our communities. Patience is difficult but it is a virtue!
7/21/2020 13:54:51	April	McPherson	MCA	Lenexa	Do NOT delay schools

7/21/2020 13:54:56	Gina	Blessing		Olathe	<p>I do not want to see our schools open, fully, at this time. I don't believe our teachers will be provided with enough resources to keep our children, and themselves, safe. I think waiting until after Labor Day is a very good compromise. Buying a little more time to see where our numbers of cases and deaths go, is a better option than rushing back only to be shut down completely again.</p> <p>Isn't it better to go slow, take our time, and make sure we are doing things right before rushing back? There are smaller communities in Kansas have that been very fortunate to not see cases that are now starting to see cases.</p> <p>I believe we all want a sense of "normal" back in our lives. As I mentioned before, my biggest concern is rushing back to in-person school, seeing a larger increase in case numbers, and then shutting schools down completely again.</p> <p>Let's take our time. Please let calm voices and reasoning determine what our schools do and how we service our families and children in Kansas. Passionate screaming and arguing gets us nowhere.</p> <p>Thank you for your time, consideration and serving on the board!</p>
7/21/2020 13:54:59	Ray	Linville	Public school teacher	Bel Aire	<p>I support Governor Kelly's Executive Order 20-58. The delay of the start of instruction will allow myself and my colleagues essential time to prepare for new instructional strategies, develop and practice new safety procedures, and for school districts to install needed safety equipment.</p>
7/21/2020 13:55:05	Wendy	Orndorff	Maranatha Christian Ac	Olathe	<p>First of all I would like to thank the Kansas State Board of Education for taking public comments on the proposed Executive Order 20-58. I am the Elementary Principal for Maranatha Christian Academy, a small private school located in Shawnee, Kansas. I strongly feel that the Kansas State Board of Education should vote against Executive Order 20-58. In my opinion, the governor should not be able to take away the rights of the governing bodies of each county, city, and local school board. It does not make any sense to me that we are entrusted daily with the lives of our precious students and that we are tasked with keeping them safe in the event of a school shooting, but that we can not be trusted with the task of keeping our kids safe in the midst of the COVID pandemic. Our school, like many schools, have been working all summer to prepare ourselves for the upcoming school year, and I believe that we deserve the right to make the decision about whether or not we are ready to start school. Thank you for your consideration on this matter.</p>
7/21/2020 13:55:06	Jessica	Orchard	My family of 4 students	fort Riley	<p>please hold off so we can be more informed on what options or opportunities our children will have. In the example of JROTC and e-learning. If we choose e-learning would we be allowed to go to the school for just for that class. Due to not having enough teachers. Also information about IEPs and speech therapy.</p>
7/21/2020 13:55:10	Sarah	Coddington	Olathe East High School	Olathe	<p>I support Governor Kelly's measures to postpone school openings until after Labor Day at the earliest and the public health measures schools need to take when they are in person. I am a parent and a teacher. I am not prepared to teach my students remotely and help my kids learn. I am even less prepared, though, to reenter in person teaching at this point in time. The time is critical for districts and educators to refine their plans.</p> <p>I am considering pulling my kids from in person public school and signing up for virtual school through an established public program. I need the time allotted here to determine if the public schools will be able to pull this off in any type of a coherent and effective fashion. My middle school child will check out of school for the year if the first two weeks aren't well prepared and he needs options for elective classes if he is schooling online. I know virtual schools have already solved those problems.</p> <p>Please act to support Governor Kelly's executive orders.</p> <p>Thank You, Sarah Coddington</p>
7/21/2020 13:55:17	Kelsi	Kernicky	Maranatha Christian Ac	Olathe	<p>I do not think it is reasonable to hold kids back. The teachers union is complaining about their safety all the while myself, a hospital worker and all other essential workers have been reporting to work daily since the start of this pandemic. We need a governor that will stand for herself and not whimp out to her peers on this matter. It is important that kids are in a classroom learning from educators in an appropriate time. What does waiting will Labor Day solve. Does COVID-19 magically disappear then? I don't think so. Kids historically have not been ones getting this virus. This isn't about the kid's here. This is about the worthlessness of the teachers union.</p>

7/21/2020 13:55:27	Mary Beth	Jones		Stilwell	Schools need to remain closed until the risk of contracting Covid 19 for students, teachers, and staff has been significantly reduced and/or eliminated.
7/21/2020 13:55:34	Amy	McKee	Nemaha Central Schools	Seneca, KS	Please vote to allow the individual districts to decide when school will open. These kid's futures depend on it. Our school as taken many safety precautions such as Infra-Red Scanners and UV Lighting for the HVAC systems.
7/21/2020 13:55:40	Lacey	Morgan	parent	McPherson	I do NOT support the delay. Our schools need to open!!
7/21/2020 13:55:49	Shelly	Harris	Educator	Ulysses	I support both of the Governor's orders to delay school and for schools to embrace all safety measures such as wearing masks and practicing social distancing and good hygiene. As an educator I would appreciate more time to fine tune plans for various options of learning that may be necessary due to Covid-19.
7/21/2020 13:56:03	Holly	Adams	Usd 416	Louisburg	I am a high needs, special education teacher and I would like to postpone the school year just in the selfish fact that I would need to come up with a safe game plan for my students, their families and my own, but with the state and district leadership.
7/21/2020 13:56:21	David	Lesperance	not applicable	Overland Park	Please approve Executive Order 20-58. Schools and parents need more time to review the 1,000 page board of education guidance released last week, time to determine whether it's safe to open schools now, as well as obtaining all supplies needed to safely open schools (if possible).
7/21/2020 13:56:30	Sally	Zogry	parent	Lawrence	As the parent of a rising 10th grader and 8th grader (who is immunocompromised) I am in support of the proposed delay of the start to the 2020-2021 school year. Until we have a better plan that takes into account how positive diagnoses of students and teachers will be handled I do not feel there is merit in starting school. I am also uncomfortable with how the students will be interacting inside the buildings and how social distancing and mask wearing will be enforced. There are too many variable at play for me to feel safe in sending my children to in person school.
7/21/2020 13:56:37	Sally	Peterson	self	Wichita, Kansas	I'm in total disagreement with the school delay and mandatory mask order. My child is ADHD should she be required to wear a mask in FIRST GRADE it may make her TOTALLY distracted! So far when asked to wear a mask for an extended amount of time she sucks on it (the paper mask) and wears a hole in it! I'm also very concerned with her breathing her carbon dioxide all day long. How safe is that??
7/21/2020 13:56:48	Becky	Childers	USD 497	Lawrence	I understand the reason for the delay, however, students need to be able to continue to condition and do walk throughs for their respective sport. They have been doing conditioning drills all summer long already, so i fail to see what the harm is on letting them continue. Sports ( while at social distances) is beneficial to the students physical and emotional education. These kids have been out of school for almost 5 months already and my 9th and 6th grade children were very disappointed that school was delay ed. The school district did an abysmal job of diatance learning March-May. Learning was non existant. In fact, my 5th grader had 2, 1 hour Zoom calls a week and the only thing they talked about was what each student was up to the past few days. There was NO teaching going on. I have had to hire a private tutor to recover the learning loss. Please have the students get back to the classroom as soon as possible. If parents do not want to send them to brick and mortar school, there are several online learning options available for them. I also do not think the delayed start is a one decision fits all situation. I feel it needs to be left up to the county to decide. Gov. Kelly put the decision making onto the county for the phased re-opening, why is she making a decision for all of Kansas on this?
7/21/2020 13:56:53	Lindsey	McDonald		Johnson	I would like to see students return to in person learning and activities just as soon as reasonably possible and in a way that supports our teachers. Online learning was extremely challenging for some students including my son and I worry that going into junior year, students potentially will face setbacks if they cannot learn in person. If teachers feel the three additional weeks is needed to prepare for in person learning, parents need to respect that decision but we MUST be committed to starting school learning immediately after Labor Day.  Regarding athletics and activities, we need a consistent policy for return to practice and competition. We cannot have one policy for practice and competition for one sport and not for all.
7/21/2020 13:56:54	Kate	Dibble	Blue Valley schools	Overland Park	I agree with the delay start of schools- why rush the start only to potentially have to shut down again
7/21/2020 13:57:11	Krista	Whitaker	None	LEAWOOD, Kansas	I support delaying of schools

7/21/2020 13:57:20	Kelsey	Schultz		Overland park	PLEASE reopen schools on time. All of my kids have fallen so far behind! If schools aren't open then my kids will have to attend daycare. So either way they will be around others. Please don't mistake daycare for school. My daycare will not teach what they or the manner in which they learn. I beg you to reopen. I'm sure at some point schools will be closed down so we need to get a jump on in school learning while we can and then look at possibly extending the school year if we don't have a lot of in person learning. Virtual learning will never be suitable for elementary aged children so much of that learning is social/emotional.
7/21/2020 13:57:21	Kelly	Henning	Parent	Prairie Village	Please delay start of school until after Labor day 2020.
7/21/2020 13:57:24	Nancy	Westling	Concerned Citizen	Manhattan	Please delay school. I have 2 grandchildren that will attend on site and am worried about their health, their parents health and my own.
7/21/2020 13:57:25	Kim	Osborne	Blue Valley school distr	Overland Park	Please consider voting for Governor Kelly's executive order. It will give districts time to put together a plan for keeping staff and teachers safe. We need to have time to get in person and online activities together.
7/21/2020 13:57:33	Kimber	Kasitz	Kansas School Nurses O	Wichita	The Kansas School Nurses Organization strongly supports Governor Kelly's Executive Order 20-58 - Delaying the 2020-2021 K-12 school year. This will enable schools to determine more clearly what decisions must be made, obtain necessary supplies and develop protocols for a healthy and safe return to school for students and staff. Many school districts have been working tirelessly since March to develop plans with an ever-changing landscape and contradictory guidance. Please reference the letter sent to all KS BOE members from the Kansas School Nurses Organization that includes a poll from school nurses attending our virtual school nurse conference today. I have also emailed a copy of the letter to publiccomment@ksde.org. Thank you, Kimber Kasitz, KSNO President
7/21/2020 13:57:35	Laura	Kuplic		Dodge City	I think this delay is EXTREMELY WISE. Educators need this time to successfully plan and collaborate for the safety of our community!
7/21/2020 13:57:37	Angela	Sayers	School Teachers	TOPEKA	I think delaying the start of school year is a good idea. I understand it could cause the school year to be extended into normal summer break or loss of already scheduled off days. I also believe extending the school day could help to make up for the time missed. Teachers are always complaining there is not enough time get things finished.
7/21/2020 13:57:44	Sally	Zogry	parent	Lawrence	As the parent of a rising 10th grader and 8th grader (who is immunocompromised) I am in support of the proposed delay of the start to the 2020-2021 school year. Until we have a better plan that takes into account how positive diagnoses of students and teachers will be handled I do not feel there is merit in starting school. I am also uncomfortable with how the students will be interacting inside the buildings and how social distancing and mask wearing will be enforced. There are too many variable at play for me to feel safe in sending my children to in person school.
7/21/2020 13:57:51	Madison	Stratton	USD361 Anthony Eleme	Anthony	I'm hoping that the executive decision to postpone schooling for all districts is something that is mandated. We need to take into consideration staff, and staff's family members. This is just too great of an unknown for schools to be opening on time.

7/21/2020 13:57:51	Stacy	McGrath		Marysville	<p>I am a mother of 2 little ones in Marysville KS. I have a daughter starting first grade and one starting preschool this year. Our county (Marshall) has only begun to see a few cases of COVID, only 1 active currently. To say I was disappointed with the governor's latest announcement of starting school late is an understatement. My hope is that it is still left up to the local school district to decide what is best for our area. A blanket mandate across the entire state does a great disservice to our young people. Those rural counties across the state with very few, if any, cases should be able to make the decision of what is best for the kids in their area. I see no reason why school can't start on time (here it was set for August 17).</p> <p>My husband and I both work 40+ hours a week jobs and to expect us to try to fit online schoolwork in with a 4 and 7 year old after 5pm just isn't ideal. I realize that things may take a 'turn for the worse' this fall, and we are prepared to tackle that as best we can. However, we are not trained educators and our children's education will suffer, even though that is not our intent. That is not taking into consideration those kids, even in rural communities, who look to school as a safe haven from their home and count on school for a hot meal and much needed break from their home life. To me, the abuse and hunger these kids face is much greater risk than the risk they will be taking going to school with COVID.</p> <p>In conclusion, I'm hoping this message is read and taken into consideration when deciding what to do with the governor's announcement to force the whole state to start school late. We are educated people that have the right and the consideration to do what's best for our kids in our district.</p>
7/21/2020 13:57:54	Jeannette	Simonson	Topeka Public Schools	Topeka	As an educator I believe it is imperative we delay opening schools for children and staff safety. The novel coronavirus has proven to be a formidable enemy, and I do not believe the risk to our children's mental health to be as severe as the risk to the health of Kansas' population in the spreading of further Covid-19 cases. Children are resilient and, with more time, resources can be put in place to aid with mental health needs.
7/21/2020 13:57:55	Samantha	Carson		Topeka	I support school starting at the regular time in August , and do not wish to see a delay in starting the school year.
7/21/2020 13:57:59	Carrie	Weber		Colby	Please allow our kids back into school. The negative psychosocial effects the last 4 months have caused are far scarier than the virus that has such an incredible survival rate. More time out just increases those negative mental effects. I know some bigger schools may not agree but I'm in a small school district. Please let the districts decide! God bless!
7/21/2020 13:58:03	Elizabeth	Gerber	Public school / special e	Scott City	Please consider allowing local control to make educational decisions in our community. Guidance from the State BOE regarding strategies and practices has been helpful. Children need to be in school; parents need their children in school for educational and social-emotional learning. The economy of our state needs kids in school & parents working again!
7/21/2020 13:58:05	Will	Reiter		Gardner	Delaying the start of school will allow the public to bring down COVID numbers before sending children and teachers together that may cause more harm. Masks should be mandatory but sanitizer use every hour would be impractical.
7/21/2020 13:58:16	Stacy	Molton		Lawrence	Please start schools after Labor Day. Please give the schools more time to acquire necessary supplies to help keep our kids and the building staff safe. Schools are already struggling with plans on how to re-open safely and need the extra time to adequately plan and implement policies and practices
7/21/2020 13:58:18	Xuemei	Zhao		Overland park	No delay
7/21/2020 13:58:24	Jaymi	Westrup	USD 300	Protection	Do NOT delay
7/21/2020 13:58:56	Sawyer	Stevens	Scott City Football Team	Scott City	My team has not gotten to play competitively since March. As an athlete this is essential. Some kids are depending on this season to get scholarships to be able to go to college. Since we have already been together practicing since late may, why is it suddenly imperative to not be together practicing? Also, it's a lot different in bigger towns rather than Scott City.
7/21/2020 13:58:57	Barbara	Muse	USD #361	Anthony	I encourage the State Board of Education to carefully consider Gov. Kelly's mandate. Please do not allow party politics to taint the process. This is about keeping our students and their family's, our teachers and all of our support staff safe during a time that is unsure. This too shall pass and when it does, I hope that all concerned can look back and know that what they did was right for all concerned and based on facts.

7/21/2020 13:58:57	Rebecca	McGuire	USD 460 and HCSEC	N/A (live in country)	I believe we should trust the local health departments to tell the schools within their jurisdiction whether or not it is safe to open schools. This should be a LOCAL decision, county by county or even up to each individual district BOE.
7/21/2020 13:59:00	Michelle	Anderson	Teacher and Parent	Overland Park	Accept the governor's mandate and delay schools opening until after Labor Day. The Covid case numbers are continuing to rise and it is unsafe to go back at our normal time. The schools have not explained how they are keeping all people in a school building safe.
7/21/2020 13:59:01	Ashley	McClaskey	Olathe USD #233	Olathe	As a teacher who misses my students and teaching dearly, I ask you to uphold the Governor's executive order to keep schools closed until after Labor Day. This will provide us teachers precious time to prepare for the unknown school year ahead. The more prepared teachers are, the better the learning and safety for students!
7/21/2020 13:59:03	Carrie	Smith		GOESSEL	I have four children, and I fully support the Governor's mandate to delay the start of the 2020-2021 school year until after Labor Day. I believe this to be in the best interest of the health of our children and all school staff, as well as their families and the larger communities.
7/21/2020 13:59:05	Karen	Jamison	Lexington Trails Middle	De Soto	Please support Gov. Kelly's decision to delay the 20-21 school year. With so many teachers that don't live in the district that they teach, this could cause other areas to be negatively impacted. When it comes to health and safety, we must proceed with excessive caution.
7/21/2020 13:59:08	Emily	Green		Derby	I support fully the executive order to push the start date of schools back! I am a teacher in Wichita, but live in Derby where my son will start kindergarten in the fall.
7/21/2020 13:59:26	Kevin	Poole	Topeka Public Schools	Topeka	Please allow for this vital extension of the start of the school year. To vote against it would be a disservice to school staff, students, and their families. This additional time is needed for teachers to effectively prepare resources for school safety and remote learning. Thank you!
7/21/2020 13:59:21	Sara	Johnson		Valley Center	Please remember the children of front line workers, police, nurses, grocery etc. when making your decision. We have been working away from home this entire time and our children have been educating themselves. Many hospital employees had to cut back their hours to stay at home in the spring, which leads to less staff to take care of patients. I know more will follow suit if online learning is going to continue indefinitely. Many have discussed removing from public schools if online continues, to either properly homeschool or go to private. The state is forcing us into these hard decisions. Please help our children return to school.
7/21/2020 13:59:31	Denise	Carter	El Dorado USD 490	El Dorado	Please follow the mandate to allow teachers the time to properly prepare to return to class. We miss our kids, but want us to be safe. Thank you!!
7/21/2020 13:59:38	Brittney	Garner	Special education teache	Overland park	Delay school and plan for online learning
7/21/2020 13:59:40	Zach	Bickel	None	Overland Parm	This is a simple choice, if you put politics aside. The science is there, it is real, and it needs to be followed. COVID infects, kills, and spreads easily. Kids get it; kids have died from it; kids have had serious effects after getting it. Kids can spread it to teachers, staff, and their parents and grandparents who have a higher probably of dying from it. It's not safe to open now as KS continues record breaking number of cases. Doctors and health directors have cautioned against opening schools - you should listen. What happens if you open school - against professional medical advice - and a kid or teacher gets ill, hospitalized, or dies? You're exposing yourself to liability. Why do that? Distance learning is there - this won't be forever. Follow the science - delay schools until the spread is not so great, or we have widely available testing, therapeutics, or a vaccine.
7/21/2020 13:59:43	Jay	Middleton		Overland Park	I want Gov. Kelly to be able to continue leading this fight against COVID based on the information she has access to and her sound judgement. Therefore, we do not want our daughter to go back to school full time until Gov. Kelly's team says it is safe. We are also interested in a hybrid option where she attends for essential classroom activities and then comes home like she would in a university setting if that is deemed safe.
7/21/2020 13:59:53	Hilary	Louvar	Small business owner	Wichita	I am overjoyed school is delayed.... and feeling pretty certain we should actually just do online learning this year.
7/21/2020 14:00:00	Natalie	Smith		Olathe	Please delay schools opening until it is safe for our children and teachers to return. The governor's plan is a wonderful start. Rely on testing and science to decide when it's safe to return.

7/21/2020 14:00:03	Lari	Jarrett	Santa Fe Trail USD #43	Overbrook	<p>I am a teacher and a parent. Our county rates are low, but I also recognize that my community is full of commuters.</p> <p>I remember how the swine flu swept through our school--60% absent at times. I am afraid COVID will make it into our schools, and we won't know until it is too late.</p> <p>I believe we can figure out systems to make school safer and allow some in-person instruction. We literally got the state guidelines last week. Please allow us the time to process and prepare.</p> <p>Every teacher in this state has spent their summer trying to be as ready as possible, but we are functioning with very little guidance. Thinking teachers have been "on vacation" for months is insulting.</p> <p>Please support the EO so we can figure things out. Give schools the time to prepare.</p>
7/21/2020 14:00:06	Scott	Sanders		Wichita	<p>Our kids missed so much during distance learning. They need in-person instruction and sports. Let's have our students and teachers wear masks - just like employees in most business environments do. Do not delay the school year.</p>
7/21/2020 14:00:15	Lynn	Auslander	Parent	Overland Park	<p>With 4 kids at home, 1 with a 504 and 1 with an IEP, it is imperative they all get back into the classroom. I have seen adverse affects in all my kids from being kept out of school and one being very dangerous to their well being. We can not continue to let them slide further down in their education or their mental well-being.</p>
7/21/2020 14:00:19	Brianne	Phillips	Parent of student	Lawrence	<p>Our children have essentially been out of school since March. Districts have had all summer to plan for various types of openings in the fall. Though I support keeping brick and mortar schools closed, I urge you to encourage schools to begin virtual/remote instruction at the planned original start date of school.</p>
7/21/2020 14:00:20	Sarah	Benton	USD 204	Kansas City, KS	<p>I know this decision must be weighing heavy on you. I appreciate the updates, willingness to listen as well as seek out advice from health experts, those in the education field, as well as parents and community members. Thank you for asking and listening. I am an educator and resident of Wyandotte County and am imploring your support of Gov. Kelly's delaying of school. What would 3 weeks of delaying school cost us versus the cost of opening school on time? What's the threshold of numbers of cases? Numbers of outbreaks? Numbers of deaths? I know your answer is my answer, that even one is too many. Three weeks buys us a lot more time than those not in education realize. Currently in our back to school schedule we only have 2 days of work time in our classrooms to get everything set up for social distancing and safety as well as only 3 days of professional development to discuss and learn all the new COVID protocols and procedures to keep our students and staff safe (in addition to how and what we're going to teach to still deliver a high quality education that our students deserve). That simply is not enough time to be ready. Gov. Kelly's order buys us an additional 12 school days to make sure we do this right, because as you know we only get one shot at this. One shot. Will you help us make the right shot? Will you help us protect and educate our students safely? Will you help us protect ourselves and our colleagues properly? We need your help so desperately. Thank you for your time, your service, and your help. Prayers for discernment in the decisions and for peace in the waiting. Prayers also for you and your family's safety and protection.</p>
7/21/2020 14:00:22	Jill	Compton	Parent	LENEXA	<p>Our children are not political bargaining chips. Leave schools closed till after Labor Day.</p>
7/21/2020 14:00:24	Melissa	Abernathy	Olathe School District P	Overland Park	<p>Our kids are suffering by not being educated &amp; socialized. We are finding ourselves falling behind compared to top performing nationally and internationally. Our kids need structure, parents are working and we simply can not keep our children entertained and challenged. Their poor minds have not learned or been exercised properly now for nearly 6 months. The continuous learning program put in place did them no justice. This is not intended to be a criticism as I understand you did not have time to properly prepare--but you have had time to properly prepare for school to reopen. I appreciate your thoughtful approach to this matter and know this is not an easy matter to navigate. Please help our kids! We do not want this generation to fall behind as we need them to lift us up for the future.</p>

7/21/2020 14:00:45	Jim	Balding		Emporia	Delaying school is only delaying education. According to the CDC as of July 21, 96.3% of all covid cases RECOVER. Any death is terrible and we should be diligent to protect one another. However, we have to understand that reopening the state we expected a rise in cases. That's how we build herd immunity. Our very own state KDHE today July 21, reports 98.65% recovery rate. Any delays only prolong the recovery of our health, education and economy. Please vote to move our state forward and focus on the positives.
7/21/2020 14:00:49	Shabina	Kavimandan	Kansas State University	Olathe	please allow schools time to adjust their calendars and let the cases subside a bit before we open schools. Our kids have been quarantined all this time and opening schools now when the cases are on the rise will be very bad.
7/21/2020 14:00:51	Chelsea	Albert		Shawnee	It is my recommendation to allow the decisions to be made by the local school board and community. The dynamic is so different from school district to school district.
7/21/2020 14:00:59	Karen	Arbo		Olathe	Education needs to be a priority and schools need to reopen on time. Denying kids an education is not acceptable , our kids are falling behind. There are guidelines for safety for all. Open the schools, teach the kids, do it on time. Kids are falling further and further behind,. Open the schools. Open the schools. If I can go to work all day, they can go to school. Open the schools.
7/21/2020 14:01:05	Joanne	Hughes	na	Stilwell	Our school is ready to open on time. Why punish the schools that have been proactive? This should be a school decision, not a decision made for the whole state. I'm writing this as a high school math teacher.
7/21/2020 14:01:13	Crystal	Davis	Andover - USD385	Wichita	I highly encourage you to accept Gov. Kelly's order to push back the start of Kansas schools due to the rising number of covid cases. Especially considering that numbers now are substantially higher (and are increasing at a more rapid rate) than they were when schools were ordered closed in March. Personally, I am scared to death to return to my classroom seeing 100+ students even if it is on an alternating basis (I would still be exposed to 100+ students). Trust me, nobody wants to see school resume as normal more than us teachers. The vast majority of us sacrifice our lives for 9 months out of the year because we LOVE our students, some almost as our own kids. Often times, we spend our own money feeding, clothing, buying coats, and paying for extracurricular activities for those students who otherwise can't afford it. We. Love. Our. Students. We understand that students need that social/emotional support, hot lunches, safety, education, and love among many other things that may only be provided at school. Nobody understands this more than teachers. However, there is a high risk to sending students back into the classroom with the balloon of positive covid cases in the state right now. That risk is far more than any risk before. That risk is death - to both children and adults. Sending kids back to school too early is simply negligent. It's not only negligent to the students, but it's also negligent to all school employees. It's thought (although highly disputed in some cases) that children are not as likely to get deathly ill, but have we taken into account that children were the first ones we quarantined (back when schools were closed in March), and are the last ones to leave quarantine (when schools open back up). My children (unlike myself) have literally not left the house since schools were ordered closed. Assuming other children are in the same predicament, it would makes sense that the number of children are lower than that of adults in our country. After all, more and more research is showing that kids are getting the virus at a similar rate to those of us adults.  There is always such a fine line when it comes to teachers and burn out. I feel that ordering teachers back too soon (like right now) will cause many teachers to walk away (possibly including myself). For those that don't walk away, the catastrophic loss we will witness (i say will because it's not a matter of "if", it's a matter of "when" covid spreads through schools) throughout the year will be enough to make us walk away next year. Talking about a shortage of qualified teachers - how will that help education in the future? Over the past several weeks, my husband and I have talked about taking out life insurance for our entire family and making a will before the possibility of returning to the
7/21/2020 14:01:20	Amie	Carter	My family; non profit ea	Lawrence	Please vote to delay the 2020-21 school year. It makes sense from the science and numbers and it will give all districts longer to prepare and make appropriate decisions that keep the teachers, staff, and families safety at the forefront. Weeks can be made up, but we can't replace lives. Please look at covkidproject.org Thanks for your time and important vote!
7/21/2020 14:01:24	Cindy	Mccurdy		Williamsburg	Delay school
7/21/2020 14:01:25	Jamie	Swan		Derby	Please follow Governor Kelly's order. I am very concerned for the health of the kids as well as faculty and staff. I know the faculty and staff are likely to be in the high risk categories for Covid.

7/21/2020 14:01:27	Shely	Perez	Usd253	Emporia	Until it is safe for staff and students we should not go back to school. There are too many unknowns and long term effects will still don't know about with this virus.
7/21/2020 14:01:29	Katherine	Sands	none	Overland Park	As a parent of an incoming high school freshman in Shawnee Mission SD, please delay the start of the school year. With covid cases on the rise, this is the only responsible way to proceed. None of the schools are ready or prepared for what happens next and they need more time to plan, parents need more time to plan, and we need to flatten the curve if at all possible to save lives. Please delay the start, please.
7/21/2020 14:01:37	James	Weaver		Olathe	Get the kids back in school. The stats do NOT support Gov. Kelly's position. Period.
7/21/2020 14:01:40	Jennifer	White		Lawrence	I support waiting until after Labor Day to start school for the safety of our teachers and students.
7/21/2020 14:01:41	Jennifer	Lombardo	NPS	Raymore	I live in MO, but I teach in KS. Please stand with Gov. Kelly and delay school start. The extra 3 weeks gives the residents a chance to try tonget our numbers trending back down, but it also gives us, as educators being thrown onto the front lines the opportunity to plan and get safety measures put in place for not only our kiddos (10 and up able to spread the disease like adults), but for our own safety and health. We are the at risk ones....please stand with US as we navigate unknown waters ahead. Things need to be done....we need time to do them.
7/21/2020 14:01:52	Carter	Stolberg	Teacher at Bonner Spring	Mission ks	Good afternoon! As a teacher in Kansas, I believe that it is crucial we allow teachers the three additional weeks to get ready. Though educating the youth of Kansas is essential, along with their mental well being, we must guarantee that schools are safe before re-opening. Having another three weeks will give teachers enough time to make any necessary changes to our lesson plans, and to prepare our classrooms to the unique challenges of this semester. I do hope that you choose to uphold Our Governor's order. I can not stress enough how important this decision is.
7/21/2020 14:01:59	Komoss	Creamer	Hays Public Schools US	In hays Kansas. Ellis c	Comment removed due to profanity
7/21/2020 14:02:03	Andi	Dale	South Central Middle School	Protection	<p>I am currently teaching middle school in a small 1A school. I have been overwhelmed thinking about how we are going to implement the KSDE recommendations in the 3.5 weeks we had before school started. How do administrators, faculty and staff think through all the moving parts to successfully begin school August 13. I know I breathed a huge sigh of relief when the governor made her announcement last week - more time to think through, adjust and prepare to give my students the best education this fall.</p> <p>I am most frustrated though by the politics that seem to keep changing the date. How on earth do we prepare when we're not sure when we're preparing for?</p> <p>I also think that upholding the delayed date takes a great deal of pressure off of small districts' boards of education who are feeling a great deal of pressure to get things going.</p> <p>I support the governor's executive order and hope you will too.</p>
7/21/2020 14:02:03	Jenny	VanEaton	None- Practicing CRNA	Little River	I believe the governor has reached way beyond appropriate boundaries with all of her mandates. There is never a one size fits all. Wanting to require masks for K-12 is not practical. Young children will be far more distracted and playing with their mask/face far more than not wearing one at all. It will impede their ability to pay attention and learn. Your suggestion that children 6th grade and above wear masks was much more appropriate. But how long does this go on, how long do we keep receiving 'orders' we must follow, Covid 19 isn't going anywhere. Do we let the government and media cause us to live forever in fear? The statistics of this virus say we should be doing otherwise. I have three children; 11, 8, and 6. I have seen the ill effects the closing of school in March and no sports/activities has had on them. Our youth are at a much higher risk of irreversible damage if school and sports/activities continue to be limited and shut down. Childhood obesity is at an all time high. Not to mention depression, anxiety, increased child abuse, hunger and a multitude of other negative things that go along with taking school and activities away from our children. We should not be teaching our children to live in fear and that is exactly what we are doing. The AAP believes this and so does my husband who is a practicing physician in McPherson. He has seen the negative effects the quarantine/social isolation has had not only on his pediatric patients but adults as well. Your decisions matter, it's time to stand up for what's right and quit letting the government overreach and take away our ability to think for ourselves and to make decisions for ourselves and for our families. I love my small town community and my state but right now I am not proud to be a Kansan.

7/21/2020 14:02:08	Lotus	Hazlett	Myself, but I am a teach	Manhattan KS	First, thank you for taking the time to read these comments. I am very hesitant to return to in class teaching in the fall. I worry about all the new responsibilities that will be placed upon me on top of providing a quality education. I am worried about kids infecting others (I teach HS and MS). I am worried that I will bring this home to my susceptible child. I am worried that if I don't follow something perfectly that there will be leeway for a parent to sue me for some type of negligence in my classroom teaching/management. I want my students to be successful and i want them to learn my curriculum. I felt fairly successful as I taught online last semester. Please allow us the time to be prepared for whatever type of instruction is best for our students. Delaying the start of the year allows for that proper preparation time. It also allows the country time to see some decreases in cases.
7/21/2020 14:02:09	Damin	Belcher	Maranatha Academy	Shawnee	Open the schools with no delay
7/21/2020 14:02:11	Wes	Fox	Teacher/taxpayer	Liberal	Late start is the dumbest thing ever. So is all the schedule changing schools are doing.
7/21/2020 14:02:13	Suzette	Kollman	Self	Olathe	As a special education teacher, when you discuss opening schools, I am asking you to make the safest decisions for my students, my colleagues, my family and myself. Please rely on the science and the current data for Kansas. Doing what is difficult now, will make the future easier. Thank you.
7/21/2020 14:02:19	Christine	Sturges-Brown		2737 sw burnett rd Tope	I'm asking the KS School Board to support Gov. Kelly's EO. Please allow teachers and administrators the time they need to put their safety protocol in to action. Teachers need time to plan and adjust. Caution is not the same as fear. Please let science, not politics, guide you.
7/21/2020 14:02:22	Jessica	Tholstrup		Clay Center	As a parent and educator I am all for postponing school after Labor Day. Not sure how the virus and statistics will look by then. For the safety and well-being against this horrendous virus. I think it is of utmost importance to postpone. Two of my children along with myself have suppressed immune systems and the outcome would be fatal if we would come down with the virus. I am hoping that the board puts the well being of students, staff,& everyone else involved in Kansas' education and does the right thing not the political thing.  Sincerely, Jessica Tholstrup
7/21/2020 14:02:32	SueAnn	Wanklyn	USD 320 Wamego Scho	Wamego	Special education students got lost in the virtual school environment last spring. Most have a much harder time learning if not hands on. My son being one of those. Am delay until September means SPED students will have been without proper education for six (6) months. Unacceptable! Our children lose retention at a much faster rate than those of their typical peers. Yes, we work with or soon at home, but many parents do not. Please take us back to a "normal" that has been disrupted due to politician's furthering their own agendas. Our kids need to get back to learning not only for their future, but their mental health as well. Thank you! SueAnn Wanklyn
7/21/2020 14:02:36	Cole	Rorick	Freestate high school	Lawrence	I believe school should be pushed back, but that outside sports practices should be allowed to continue.
7/21/2020 14:02:40	Cate	Eighmey	Cate Eighmey Photograp	Olathe	SUPPORT GOVERNOR KELLY'S EO TO DELAY THE START OF SCHOOL UNTIL AFTER LABOR DAY! Keep our staff and students SAFE!!
7/21/2020 14:02:40	Sally	Joseph		Southwest Kansas	Kansas School Board Members: I respectfully ask the board to look at the increased number of cases being reported and allow the school districts to have additional time to get proper safety guidelines in place before children return to school. It is imperative that schools take the necessary safety measures to create a safe and healthy environment for children to have continuous education throughout the 2020-2021 school year. Thank you for your consideration with starting school at a later time.
7/21/2020 14:02:50	Kelly	Brown	Maranatha Christian Ac	Basehor	First risk mitigation comment:We self transport our students to and from school. Second risk mitigation comment: Classroom population size is small enough to provide more than required social distancing imposed space without alternating days. Third risk mitigation comment: Lunch time has staggered times with the majority of students brown bagging their lunch from home.Fourth risk mitigation comment. All students are temperature scanned at entry before the school morning begins.
7/21/2020 14:02:53	David	Comer	Self	Overland Park	Kids need go back to school in August as scheduled.

7/21/2020 14:03:20	Cortney	Schrick		Valley Falls	Schools should be closed until the rest of the general public can operate like normal. My children along with others will not keep masks on or social distance. Let alone the masks will be a distraction for them and they won't be able to learn adequately
7/21/2020 14:03:37	Aunjele	Traylor	Wichita Public School	Wichita	I'm good with starting later
7/21/2020 14:03:42	Sienna	Alexander	Maranatha	Kansas City	August
7/21/2020 14:03:43	Brian	Pringle		Olathe	Open schools on time for those that want to go back to school. I'm in Spring Hill school district and the people that want their kid to do online classes can choose that. The rest want the kids back in the classroom. It should be a choice not a mandate.
7/21/2020 14:03:55	Alice	Blecha	Topeka Public Schools	Topeka	I support Governor Kelly's recommendation to delay the start of school and proceed with caution on having any on-site classes during this pandemic. The virus is surging uncontrollably at this time and likely will continue until an effective vaccine is developed and available for widespread use. This virus not only has killed far more people than the last pandemic flu (Swine flu in 2009), it has caused permanent health problems for many of the survivors. The fact that it is easily spread by asymptomatic carriers makes it impossible to know who has the virus. Public safety outweighs any of the problems and disadvantages that distance learning has. Distance learning isn't ideal, but staying well and alive is more important.
7/21/2020 14:03:56	Courtney	Miles	USD 233	Ottawa	We need more time. No one is adequately prepared and rushing back into buildings will do more harm than good. Delayed start is the best case scenario right now.
7/21/2020 14:03:56	Kelly	Byers		Olathe	I believe for the safety of staff and students we should wait until after Labor Day. Or, remote learning for at least the first month or so
7/21/2020 14:04:00	Richard	Young	LMH Health	Lawrence	I fully support delaying school. Opening school on the regular schedule WILL expose our children which I turn will expose their families. This will ABSOLUTELY increase the spread of COVID, resulting in more illnesses, lost time from work and death.
7/21/2020 14:04:10	Sara	Roepka		Hutchinson	<p>I am a wife or an essential worker that provides work to food plants to keep them functioning. I am a teacher that sees 300 kids daily. I am a mom, a daughter of older parents, a sister, an aunt. I am immune compromised. Please understand, I want to see my students and my colleagues but am SCARED to return to work! I fear being exposed and exposing all those that I love and those that I rely on to help pay the bills. I fear being hospitalized if I contract this virus and my previous condition plays a vital role in how my immune systems tolerates it. I fear I could be hospitalized and never seeing my family again. I fear death and not being able to give my family one last kiss and hug and tell them I love them. I fear a lot!!!</p> <p>At this time there are so many unanswered questions with the virus, the KSDE guidelines and the safety of our teachers and students that we should not be using schools, our teachers health and safety nor our students as a testing lab in order to see what will happen when schools reopen. Why should my well-being, my health and my families well-being be put in harms way so parents can work and the economy can continue to survive? Why are we being considered child-care for those parents? We are educators not child care providers and we should not be treated as such. Why are we considering opening schools now when our numbers are so much worse than when we closed in March and continuing to rise? Kansas numbers are getting worse that we are now considered a hot spot by some organizations and we are asked not to go to certain states due to our numbers. Is this not enough to wake you up and see returning to school is not going to help the situation?</p> <p>Schools are struggling to get proper PPE and cleaning supplies that were ordered months ago. Schools are struggling on how their districts will provide various instruction models and needs more time to figure this out. Local school boards are being rushed into decisions that are not ready to be made yet just to provide information to staff and families.</p> <p>I ask that you vote to delay the start of schools until at least after Labor Day.</p> <p>I also would ask that you consider enforcing remote learning in Kansas through the fall as we won't know how Labor Day will affect numbers for weeks following the holiday weekend. This will give teachers and parents much needed answers now rather than at the last minute. It will give us time to prepare as well as obtain the needed materials to</p>

7/21/2020 14:04:18	Becky	Waltner	Self	Olathe	I am a nurse practitioner. My sons dad is a physician. We don't even know what is best, so I am not envious of your "decision making" position. That being said, I would urge those in position to make choices for many who have no idea what to do, to listen to medical professionals, rather than being persuaded by political/economic forces. I honestly want him to be IN SCHOOL, not doing virtual learning, but I think we need to think outside the box (outdoor classrooms?) and/or continue the delay until we know it's safe to be indoors for 8+ hours/day. I do not feel that virtual is a good option for us, and would honestly rather just delay the year until we have this thing under control than try to manage two medical careers, in two households, while doing virtual learning. Thank you for doing what needs to be done to keep our kiddos safe!
7/21/2020 14:04:26	Mary	Towse	none	Bonner Springs,KS	I am in favor of delaying person to person contact in the schools.
7/21/2020 14:04:27	Kevin	Serrano	Scott Community Highs	Scott City	I think that fall sports shouldn't canceled or pushed back. There are some of us who already got the end of the school year canceled and it was devastating not doing track
7/21/2020 14:04:38	Erin	Weber		Overland Park	I agree that schools should delay opening until after Labor Day (or start online) until Covid numbers are significantly down and it is safe for students AND staff to return. The focus seems to be more on children and I'm glad Governor Kelley is standing up for employees who also work within the schools. This is a pandemic and it needs to be taken seriously.
7/21/2020 14:04:38	Keith	Skillman		715 Tennessee St. Lawrence	I support Governor Kelly's executive order to delay school start.
7/21/2020 14:04:39	Tandy	Wolters	Parent of a public school	Lawrence	Kansas is currently a hot spot for increasing rates of Covid-19. Evidence is growing that children ARE spreaders, and many children DO have serious cases - some die. And for anyone who tests positive, we don't know the long term effects of this disease. But certainly, some are already displaying systemic issues well after "recovery". Sending kids to public school will be dangerous - for kids, their families, for teachers and staff, and the larger community. There is simply no way to contain the virus when we put lots of bodies together! And without healthy families, we cannot feed the economy. Each time we do a little more to open before we truly have things under control, we just keep delaying our way out of this thing. Let's do the work and once and for get this thing under control. Online learning for all for the foreseeable future.
7/21/2020 14:04:39	Ellen	Hollister-Breen		Fort Riley	Please delay as much as possible. The health of my children is paramount.
7/21/2020 14:04:40	Tony	Smith		Pratt	As a High School teacher I would hope you support the Governor In her order to postpone the opening of school until after Labor Day. This would allow the situation with the Covid 19 virus to settle down. It will also allow schools more time to develop plans which will protect both the students and staff from being infected. I really would like to avoid getting infected and possibly dying
7/21/2020 14:04:43	Kelsey	Wuthrich	Usd 375	Augusta	I am a teacher and agree with the governors decision to push back the 20-21 school year start date. I feel like my school district needs more time to plan and prepare for the upcoming school year.
7/21/2020 14:04:43	Amanda	Morris	Parent of student	Overland park	Please keep decisions at the district level, not the state, and as a nurse practitioner in pediatrics, I strongly believe we need to get these kids back in campus and in school!
7/21/2020 14:04:44	Kelley	Alexander		Olathe	I think it's best for students and educators if school is virtual for at least this semester. There are so many unknowns about health at the moment and risking the life of health of anyone us unnecessary when virtual options exist.
7/21/2020 14:04:45	Hollie	Tejeda		Wichita	Delay school. Protect students and staff.

7/21/2020 14:04:51	Abby	Hearron		Overland Park	I think we should start school because first of all we need to build up an immunity to COVID-19 just like we have built up an immunity to every other disease that this world holds. Also what is even the point of starting late if we are just going to go back eventually. I am going to be a freshman in high school this year and for me I think I need to make the transition into high school in person. Also not being in school is very bad for some people's mental health because maybe they have something going on at home and school is the only escape for them. Or maybe they need to be in the school environment with a certain teacher or friend because it makes them feel better and we can't do that from home. The amount of cases might be going up but the number of deaths is not because everyone is just not getting tested. If it was already in their system and they just carry the virus then it will show up as positive. All I'm saying is that this thing isn't going anywhere so we can either choose to be scared of it our whole lives or we can choose to go on with our lives like we did before and not let it completely change everything. Being stuck in our homes is not going to do anything but make it worse when we do decide to go out again. School is the most important thing to some people and if you don't let us go back it will be your problem when everyone retaliates. So you can either choose to keep us locked up in fear because of your power or you can let us live our lives and do what humans do best, adapt.
7/21/2020 14:04:51	Memori	Keck		Goddard	Please wait until after Labor Day and let's get things figured out! Give our district leaders time to plan a return for our students. I want nothing more than to be back in my classroom but it's not worth a life to do so!
7/21/2020 14:04:53	Jamie	Arnold	Parent	Kingman	Mandatory masks, social distancing and other interventions creates an environment which goes against human nature and is not conducive to learning especially in children where they have been proven to not be asymptomatic carriers and are more likely to be struck by lightning than get and pass on Covid. Look at the death and recovery numbers compared to the total local population. Let each county have the ability to make decisions for their students.
7/21/2020 14:04:53	Christoher	Wright	Blue Valley 2nd Grade	SOLATHE	Open the Schools!!!!
7/21/2020 14:05:02	Gloria	Hiller		Overland Park	As a health care professional, I would like to stress the importance of protecting our children, their teachers, other workers in the school, and families from the risk of COVID 19 infection. Delay school until after Labor Day. Do the right thing and follow Governor Kelly's executive order.
7/21/2020 14:05:05	Andrea	Rausch	Parents and Teachers	Wichita	KEEP SCHOOLS CLOSED until this is under control. Do the right thing for the kids, teachers, school staff, and community. Opening schools is NOT AN OPTION in a situation like this. I know these times are unprecedented but SAFETY and HEALTH much come before education right now. We have to accept this!

					<p>I wanted to give an update on the research regarding COVID in children.</p> <p>I should back up briefly and state that this is from a physician with a PhD in Epidemiology who became very interested in this topic when a colleague and friend of mine, Jennifer Kasten, MD MSc, wrote a systematic review of COVID epidemiology in children (<a href="https://www.facebook.com/jenniferkastendmd/posts/128898328763114">https://www.facebook.com/jenniferkastendmd/posts/128898328763114</a>) and found kids 12 and under *might be viral "dead ends", meaning they can get COVID but can't transmit to anyone else. This really captured my interest because this would make COVID very different from most respiratory viruses we know. Then in a physician's group dedicated to school opening, a physician researcher published a document for the group in which said she could identify 0 (zero) cases of certain transmission from children under 12 in the scientific literature and since that time Dr. Rutherford, UCSF Epidemiologist, has also been public about elementary-aged children being a "one way street" for infection - they get it but don't appear to transmit it, much, if at all. (UCSF Grand Rounds lectures are now available on YouTube for those interested in hearing him).</p> <p>Last month, I did my own summary of the data (<a href="https://www.facebook.com/tracy.hoeg/posts/10219217323357158">https://www.facebook.com/tracy.hoeg/posts/10219217323357158</a>) and found evidence of the following:</p> <p>*Very limited transmission if any from children ages 12 and under to either other children or adults</p> <p>*Children appeared to be at least 10 times more likely to die of influenza than Covid and are more likely to be struck by lightning (I rechecked the CDC website today 7/13 and they are still reporting 3 deaths in children under 18 due to confirmed COVID; for comparison, there have been 185 deaths due to influenza in this population in the 2019/2020 season. Edit: see updated mortality data below from the 7/19 addition).</p> <p>*Countries that reopened elementary schools as a first step in their country's reopening did not see an uptick in cases (these include numerous European and Asian countries, some of which are displayed in Figure 4. Reopenings not causing and uptick in cases is consistent with children not being a major vector for the disease. Figure 3 shows age of the source of the cases of COVID in Holland, with none ages 18 and under in their study, as just an example of these</p>
7/21/2020 14:05:07	Brandon	Grosdidier	Eudora High School and	Eudora, KS	
7/21/2020 14:05:11	Mark	Hoduski	Maranatha Christian Ac	Bonner Springs	Please open school on time. Online learning is not effective compared to relational-education. Please don't allow this generation to get so far behind academically that they can never make up the time lost. Thank you, Mark
7/21/2020 14:05:16	Cathie	Bennie	Olathe North High Scho	Olathe	Please support Governor Kelly's mandate to delay opening the schools until we can control the community spread.
7/21/2020 14:05:21	Kim	Christopher		Basehor	We think smaller districts should be able to decide for themselves and not be lumped together with larger districts as far as mandates go. Please consider the facts that the media/politicians are not considering--without schools: abuse remains hidden, meals get missed, IEP's are not adequate, learning disabilities are left unrecognized, social skills are delayed, academic success is not promoted, parents are left to decide between work and school, emotional and psychological issues are left unattended, staff is left without work, life long relationships are not formed, kids do not receive physical education or movement, team building skills are lost, social behavioral skills are left unchecked, dogs will miss chasing the school buses ;) and SO MANY MORE! Please prayerfully consider the impacts of children of all ages not being able to learn together!
7/21/2020 14:05:34	Erin	Wohletz	USD444 Teacher & Pare	Little River	Our students & teachers need to return to normalcy...let's start school, in person & on time. Encourage good hygiene (washing hands) and DO NOT REQUIRE MASKS! Covid has been no worse than influenza which hits schools EVERY YEAR!
7/21/2020 14:05:36	Heyda	Linera		Leavenworth, KS	To open August with all students learning remotely from home. Eventually, combination in-School & Remote Learning, would start September, if the COVID-19 infection rate in Leavenworth drops.
7/21/2020 14:05:36	Susan	Kendall	Grandmother	Topeka	Please support Governor Kelly's executive orders regarding the opening of schools in Kansas.
7/21/2020 14:05:41	Renner	Bradley		Merriam	I personally don't understand what waiting a couple extra weeks is going to do. Nothing has improved much over the past few months as far as coronavirus cases go. And we continue to see hundreds of new cases daily.
7/21/2020 14:05:45	Kristin	McMahon	Blue Valley School Dist	Overland Park	Postponing the start of school by 3 weeks is the least you can do. I will be in close contact with over 150 students a day and do not feel it is fair to bring illness home to my family when our positive case numbers are on the rise!!
7/21/2020 14:05:49	Natalie	Clark		Pratt	Do not delay school

7/21/2020 14:05:53	Sarah	Garten	Self/ Parent	Overland Park	I hope that the school board upholds Governor Kelly's executive order to postpone the start of school, and require masks and other protective measures once they re-open. The safety of our kids, teachers, and community is of paramount importance and I don't think any family should have to choose their child's safety over their education. I hope that Kansas takes a stand and is a model for other states that we value the safety of our community and the life of our children more than we value a political agenda. This should not be a political issue. This should be a human life issue. Please keep my family safe and help us find other ways to continue to educate our kids in a remote fashion until a vaccine is found.
7/21/2020 14:06:06	Laura	Good		Olathe	I believe kids should start back to school with in person learning Aug 13.
7/21/2020 14:06:15	Andrea	Sanmiguel	Parent	Lawrence	I support the delay in school opening if this gives time for funding to be put in place to support safer in person school options.
7/21/2020 14:06:17	Jacob	Miller	Citizens climate Lobby	Kansas city	Push opening until after Labor Day. Gov. It's just too early to reopen and endanger the lives of students and teachers.
7/21/2020 14:06:20	Sarah	Ullmann		Wichita, KS	Please uphold the Governor's Executive orders to allow for a delay in school starting. Many communities have a high positivity rate of testing and community spread. Please protect our children and staff! Thank you for serving all of Kansas' children and schools.
7/21/2020 14:06:33	Shirley	Ulery	Wichita Public Schools	Wichita	Delaying the start of school is the only answer at this point and then it needs to be done virtually until this virus is under control. We are in a way worse situation than in March! Please don't put students, teachers and families at risk.
7/21/2020 14:07:05	Chris	Hartwick	Maranatha Christian Ac	Shawnee	Please allow smaller, private schools the flexibility to manage when and how they open. Smaller schools, much like rural schools, are able to safely open on time following CDC recommended guidelines. Please do not group smaller private schools in the same category as larger, public schools that face additional challenges, especially in terms of social distancing.
7/21/2020 14:07:12	Tara	Allen	USD 259	Wichita	Please OPEN schools with safety precautions in place sooner rather than later. Our kids need to be back in school.
7/21/2020 14:07:14	Ben	Gervais		Olathe	I support executive order 20-58, to delay the start of the school year. I would hope that the school board will make a data driven decision that impacts the lives of all students and families. While the decision is difficult to make, these are unprecedented times with unprecedented decisions to make. As a teacher of music (a subject always neglected in big decisions), I realize my job could be in jeopardy in the long term of this decision. However, my job is not as important as the health and well being of students and their families. Please allow the time for schools to effectively prepare for the school year to ensure a safe return for all students.
7/21/2020 14:07:23	Stephanie	Luttrell	Luttrell Family	Olathe	I am extremely worried about reopening schools in light of the increasing numbers of Covid-19 cases. I am worried for our children one of whom has asthma and for the teachers and staff who serve our district. We feel all summer and fall in person activities should be cancelled so that we can really slow the spread of the virus in our community and state! It is unfair to ask our youth to risk their health to participate in activities that might mean scholarships or other accolades while those who stay home would not have the same opportunities as they are not willing to gamble their health. That is a choice no family should have to make. Kansas has an outstanding education system. Slowing/suspending some education/activities will not harm their long term educational goals and might even save their lives. It is also unfair to ask teachers to risk their lives and their family members' or risk losing the jobs they love. They will be not only put in a position of educator, but in public health official by trying to keep order in classrooms with children who may not keep their masks on or outright refuse. Allergies, common colds, flu, and other illnesses can have the same symptoms as Covid-19 and will cause enormous stress to them as they try to get through each day being the caring people they are but trying to maintain safety for themselves and others! We should not require them to do so. I am extremely grateful for each and every staff member who comes into contact with my children each day, from the janitor who smiles and helps them pick up the books they drop in the hallway, while keeping our school running, to the cafeteria workers who make sure they are well fed to the teachers and staff that offer them a safe, loving and rigorous educational experience. I urge you to delay in-person instruction and activities until the virus is decreased and our communities can resume with less risk. Thank you.

7/21/2020 14:07:26	Michelle	Kirk	myself, although I am a	Baldwin City	<p>I thank you for giving the public a chance to send you even more communication. I thank you for your service to Kansas education, students, families, and staff. These are times that call for difficult decisions, not popular choices. Please support Governor Kelly's Executive Order to delay the start of schools, so we may use those few extra weeks for desperately needed time in this unprecedented time.</p> <ol style="list-style-type: none"> <li>1. We need time to lower COVID19 transmission rates in Kansas, instead of the increasing numbers of cases/deaths that are hitting both urban and rural communities.</li> <li>2. We need time for school districts to order necessary protective/cleaning supplies and new technical equipment.</li> <li>3. We need time to prepare and train staff on new protocols and new technology in keeping our learning environment safer for everyone inside our schools.</li> <li>4. We need time to adjust to KSDE's Navigating Change educational plan that was just released last week.</li> <li>5. We need time to make sure our local district plans are in place for the constant shifts that will occur in different areas at different times across the state.</li> </ol> <p>If our own state's medical advisors are not sufficient support for Governor Kelly's decision, please consider our National Surgeon General's words this morning (Tuesday, July 21): "We need to lower transmission rate of coronavirus to reopen schools." <a href="https://thehill.com/homenews/administration/508284-surgeon-general-we-need-to-lower-transmission-rate-of-coronavirus-to">https://thehill.com/homenews/administration/508284-surgeon-general-we-need-to-lower-transmission-rate-of-coronavirus-to</a></p> <p>We know that our children matter. We know that education matters. We know that you are facing many pressures in making your decision. But we also know that starting school at the "normal time" is NOT in our best interest, because this is NOT a normal time. This is not about closing school, this is about giving us precious needed time to prepare for the dangers that lie ahead.</p> <p>We know you want to do what is best for our children and for our staff in this great state. We are counting on you to make the right decision. Ad astra per aspera. Thank you.</p>
7/21/2020 14:07:28	Tamyra	Heim	Topeka USD 501 public	Lawrence	<p>Regarding Executive Order 20-58: Please uphold Gov. Laura Kelly's proposal to delay the start of school for K-12 students. The continuing pandemic crisis makes public school for our students and staff more difficult than ever. Educators want to be in our schools and teaching our students, but we need to be able to do that in a safe environment. Please put the students and staff of public schools in the best position to succeed and to stay healthy. Thank you, Tamyra Heim</p>
7/21/2020 14:07:29	Erin	Friesen	Maranatha Christian Ac	Shawnee and Lenexa	<p>We need all of our children back in in-person school! This is vital to our children's continuing education. My children will lose what they did know if you don't allow them to attend school. Please do not delay our in-person education!! Children learn best when they are in the environment of learning. On line learning can leave kids distracted and not prepared for the future. I believe children have good immune systems and are not as easily done in by the plandemic. Please, please do not delay our in-person education!!</p>
7/21/2020 14:07:30	Jane	Doe		Phillipsburg	<p>Kids are in far more danger at home and online or even in their parents' car than they are from this virus. Open normally with no crazy mandates, and if parents are not comfortable, they can pair up with teachers who are not comfortable for a small private homeschool coop.</p>
7/21/2020 14:07:31	Brandi	Shoemaker	Mom and Business Own	Overland Park	<p>Both of my children are currently Enrolled at hilltop and they're special education program. As a Mother of a child with special needs we have noticed a huge change with her IEP and program at hilltop. We implore you to please open school back up. The children need their education and early intervention is so key. We've seen the statistics about Covid with young children and I'm baffled that we are even questioning kids not attending in person school. We have seen a huge regression in behavior and social skills since we've been out of school. Drs. And health care Professionals have stated that our kids need to be in school. I am extremely concerned if this continues to progress the way it has.</p>
7/21/2020 14:07:35	Carly	Hoban		Leawood	<p>I think we should go to school. It is very important developmental years before college and kids are more productive during in person schooling. Kids are not high risk and should go back to school.</p>

7/21/2020 14:07:46	Mary	Shepherd		Fort Riley	Please delay the start of school and please encourage schools to offer hybrid learning. We need better options that's all or nothing in school or distant learning.
7/21/2020 14:07:48	Crystal	Koeneke		Manhattan	Schools need to resume as were previously planned in August! There is absolutely no reason to delay for 2 weeks. The kids need to resume as normal of a life as soon as they can. This has caused a ton of mental health issues for our children that have caused way more harm to their lives than the Coronavirus. I am speaking from experience as my child developed an eating disorder during Covid & is currently in an Eating Recovery Center. All of his normal coping mechanisms were taken from him when the governor chose to shut schools. Please, please allow the schools to open as previously planned for August.
7/21/2020 14:07:53	Erica	Catausan	None	Overland Park	It shouldn't take additional three weeks to get supplies that should have been ordered months ago. We knew school was coming and the virus would still be here. Her hold up I believe is to extend the no school order and order every student to stay at home and do distance learning.
7/21/2020 14:07:54	Janel	Durler	Non-metro area commu	Wright	<p>The decision to delay or not to delay the start of school should be a local decision. One made by the elected board members in communities, who know the risk for that particular community, and can consider the needs of it on a more personal level. What is appropriate for metro areas, other bigger cities in Kansas, and rural communities, has never been the same. So, why should there be a blanket solution now. A huge part of Kansas re-design has been personalized learning, and making a decision for the entire state does not follow what we have been working so hard on either.</p> <p>Please let the local boards, with guidance from Dr. Watson and the state school board, decide.</p>
7/21/2020 14:07:57	Michelle	Henley	Shawnee Mission Schoo	Lenexa	I am a teacher and am looking forward to teaching in the school when it is safe for our community to do so. Coronavirus cases are still rising in our area and melding so many different "bubbles" together will have a negative impact on the situation. I don't want businesses to have to close when the schools open and the case rate expands. I do believe kids are at risk of falling behind academically and socially from staying at home, but we can and will catch them up. Illness in themselves or their family members will put them much farther behind than staying at home temporarily. Thank you for asking for our input.
7/21/2020 14:08:02	Jessie	K.		Emporia	I believe delaying school should be a local decision, not the governor's choice. I feel there is no reason to delay school, when in fact I have been teaching in person for the last couple of weeks. Yes, it has been small groups. Yes we are taking precautions. Yes, we are going to have cases, COVID isn't going anywhere, but we need to get our kids in school. If a district feels like they are prepared for school to start and the local school board agrees, let them do so. Please, let this be a LOCAL school board decision. I am comfortable and ready to send my kids back as well as have myself in the classroom.
7/21/2020 14:08:12	Vanessa	Underhill		Hill City	I would love to go back to school on time. Our children have been out of formal school for 6 months. They need to get back into the classroom. Our small county has not had the outbreaks that big communities have faced. Thank you for your time and consideration.
7/21/2020 14:08:16	Tara	Heim	Parent	Larned	I do not think delaying thile 20-21 school year for 2 or 3 weeks will do any good for our students. As a parent of 5 kids who attend the 495 school district and who works for the school district, think delaying their learning and any further would be beneficial eith as far behind as all of the children are currently with missing as much school as they have. I also do not think mandating masks for everyone is right. We as people and parents should have this right to decide to not wear a mask. Pediatricians have even stated they are not beneficial nor is it healthy. I think it should be optional, and if is it not I will be pulling my children and home schooling them
7/21/2020 14:08:18	Lesli	Lundquist	Maranatha Christian Ac	Lenexa	Please let the schools open as regularly scheduled in August and NOT postpone to after Labor Day. Thanks you!
7/21/2020 14:08:19	Elizabeth	Daniel		Roeland Park	Please delay the start of school until after Labor Day. There are so many factors and moving pieces to determining what is best for students, teachers, staff and families. Additional weeks will give communities much needed time to continue to formulate plans to keep kids, teachers, and communities safe. These are unprecedented times. Please DO NOT let partisan politics keep you from doing what is will keep our kids and families as safe as possible.

7/21/2020 14:08:20	Dec	Kellogg	motherhood!	Wamego	I don't think it would hurt to delay school until after Labor day. If they need to make up the hours why not give them a shorter Christmas break and not so many days off.
7/21/2020 14:08:22	Kara	Pinter	Maranatha Christian aca	Lenexa	Please start school on time., or give individual schools the option to make the decision best for them. Thank you!
7/21/2020 14:08:22	Carmen	Raines	TPS 501 teacher	Topeka	As a veteran teacher and parent of an immunocompromised child, I ask that you follow Gov Kelly's order for face masks, distancing between students, and delaying school start date until after Labor Day 2020.
7/21/2020 14:08:24	Lacy	Rogers		Lawrence	Due to COVID kids should not be going back to school yet!
7/21/2020 14:08:27	Eli	Gaeddert	USD411	Goessel	I agree with Governor Kelly's guidance on school opening after Labor Day.
7/21/2020 14:08:35	Darla	Walker	Grandparent	El Dorado	I agree with the Govenor. I think we can do this if done cautiously. I believe kids can be taught to wear a mask and social distance. I think some kids NEED that structure . Thank you Gov for doing your best to do the right thing
7/21/2020 14:08:49	Amber	Brown	Frank Laden Elementary	Fronenac	Please give our teachers and staff time to plan and execute before adding students and parents.
7/21/2020 14:08:53	Kerry	Mueller	parents	Linwood	We need to reimagine the structure of the school day. Kids need to be back in school, especially elementary aged children. If they can complete their subjects online in an hour or two, they don't need to go for 7 hours a day. Split the classes in half, and half goes in the morning and the other half in the afternoon. Schools should open in August to get some instruction time in before the flu season arrives and possibly more COVID cases. Expecting parents or others who are non-teachers to home school/teach kids online is a disservice to the kids.
7/21/2020 14:08:57	Josh	Pavlik	Teacher/Parent of a first	Emporia	I agree with Governor Kelly. School should be postponed until after Labor Day.
7/21/2020 14:08:59	Ann	Hiebert	USD 411 teacher	Goessel	It seems extremely important and imparitve that schools and staff have time to make plans for opening schools that are safe and provide the best possible education during a pandemic. The extra time also allows for getting the appropriate supplies and adaptations in place. It also allows time for Kansans to help flatten the curve of the virus.
7/21/2020 14:09:00	Stephen	Shull	Parent	Colby	I think starting school late is a plus but kids wearing masks at school should be optional.
7/21/2020 14:09:02	Kelly	Tun	Parent	Altamont	Please DELAY. There is no benefit to rushing. Teachers want to teach but they want to be safe. Parents need time to adjust. Rushing into it will only cause panic. I do not want to see parents keep their kids home because they're scared. Please delay and give everyone more time to do things right. Thank you.
7/21/2020 14:09:13	Peggy	Whitworth	Myself	Abilene, KS	My opinion is to open up the schools before Sept.9. Will 10-15 days later make a big difference? Those that want to home school can and those who are ready to send their children to school can also. It's a win win for the parents. I'm hearing a lot of parents want to home school, so that should help make for smaller classrooms and easier social distancing for public schools. There are children out there that need to be in school with qualified personnel or they will really fall behind. Home schooling is certainly not for everyone. Give the parents a choice, don't be making it for them. Not one size fits all. Thank you for this chance to voice an opinion.
7/21/2020 14:09:21	Jolynn	Allen	I am a parent	Hutchinson	I feel like the date set is a good starting point, but there needs to be a plan ready to execute delaying even longer if this keeps spreading clearly reopening our businesses and things to do didnt work in june and we need to find a way to safely open everything up my priority is seeing my kids and teachers healthy and not just being a spreader of this horrible covid. We need a plan that will help little children who already have difficulty staying apart and wearing masks to do so and to keep hands clean that is so much to ask. There has to be a better way. This isn't just about school this is about everyone's health. One kid taking this home and spreading it to their mom who works in a nursing home. . You see where I am getting at. It could be devastating. I dont understand why online learning can't be taking place till that is figured out schools had time since March to figure this out . What has been done? I find it really sad that kids can't be normal and be with friends and do everything a kid is supposed to do, but i clearly believe we need to worry about this as a whole and not just look at it selfishly. If delaying the start of school till after the holidays is what needs done i will be sad but someone needs to take the health officials words and figure that out, isn't that why we have leaders and specialists. They all know what's best in their specific expertise.
7/21/2020 14:09:24	Erin	Davis		Olathe	Thank you Gov. Kelly for delaying schools until after Labor Day. Keeping our children safe should be our number one priority.

7/21/2020 14:09:32	Wanda	Lewis		Manhattan ks	The schools need to remain closed. Even one child or teacher lost is too many. We do not know enough about this virus to risk our staff and children's lives when we have the option to go online. When the first kid gets the sniffles it will cause a trickle effect of closings , quarantines and chaos. Give the doctor and scientists time to get ahead of the virus. We need to be proactive. We've had 6 new children's cases over the weekend here in Riley county. As an educator I beg you to keep the children out of those buildings.
7/21/2020 14:09:57	Laura	Scott		Louisburg	I work in the Blue Valley School District and support Governor Kelly's decision to wait to resume school until after Labor Day. Please uphold her executive order. I believe she's doing her best to protect the citizens of KS.
7/21/2020 14:10:03	DAVID	Keener	Maranatha Christian Ac	Kansas City	Students are needing to get back to school. The online learning situation is not ideal for most students and the peer/teacher interaction is more valuable than most understand.
7/21/2020 14:10:03	William	Perkins	my grandkids	LAWRENCE	Delay opening. We didn't start school until after labor day when I went to school and it will not harm my grand kid's education. We need to stop this virus as soon as we can.
7/21/2020 14:10:04	Anne	Lawrence	myself	Oxford	<p>The cancellation of school in the spring and delays this August have caused and will continue to cause many students to fall behind. Some students may do well with 'distance learning' but many do not do as well as in-person learning. This particularly discriminates against special needs children. Forcing any student to spend so much time on electronics is not good either. For special needs children, in particular, this causes sensory overload that is detrimental but it is also a bad influence for any child to spend extensive time looking at a screen. Even in adults, extensive screen time tends to become addictive; how much more is it influencing young, developing minds?</p> <p>Expecting that Kindergarten children and older will do well with wearing masks all day long and focusing on learning is very unrealistic. It is interesting that everyone is considered contagious during class, but magically, they are not contagious during lunch? That makes no sense at all in a logical application but makes all the sense in the world in an emotional sense.</p> <p>Everyone is fearful of the corona virus because the media reports spiking cases. With much more extensive testing and many reports of grossly inflated reporting of positive cases from many testing sites, such as over 300 sites reporting 100% positivity in Florida when real numbers were 7-9%, it should be expected that there will be more cases reported. What they don't tell you is that the vast majority of cases are asymptomatic or have extremely mild symptoms. Yes, elderly and vulnerable people should be taking extra precautions, but the vast majority of the population is just fine and will remain just fine. It is unpopular in this heightened panic to say so, but the flus we experience every year have killed many more people than the corona virus. Are we now going to shut down everything and panic when the traditional flu season starts? That would be the appropriate response considering what we have done and continue to do for the corona virus. It is sad to see so many so fearful of living their lives. Our ancestors who settled this country must be spinning in their graves.</p>
7/21/2020 14:10:08	Amy	Greenwood	Parent and wife of first r	Valley Center	Start school on time. Get the kids back into a routine.
7/21/2020 14:10:11	Timothy	Green	Teacher	Derby	Please pass Governor Kelly's executive order to allow schools enough time to review the document and to have enough time to train and follow appropriate safety protocols
7/21/2020 14:10:21	Marci	Dighton		Shawnee	We would like to see school start after Labor Day as a norm. Covid aside, this is a good move. We have no concerns about starting in August, however. Just prefer later start in general!
7/21/2020 14:10:30	Jason	Slote		Lawrence	Students, staff and faculty should not be present in school buildings until it is PROVEN SAFE. The lives of our children and families are not to be put at risk for political or economic advantage. PERIOD.
7/21/2020 14:10:31	Mark	Evans	Maranatha Christian Ac	Shawnee	Please do not delay the opening of school. Reasonable precautions can be taken.
7/21/2020 14:10:38	Scott	Myers	Myself and my family	Cummings, Kansas	I believe if we want our kids to go to school we should have that right. If people want there kids to stay home that's fine too!
7/21/2020 14:10:41	Courtney	Smith		Olathe	Please accept the governors EO. My son is immunocompromised and I'd like the district to delay opening as much as possible or go all online for his safety. I have numerous other reasons as well but this is the most important. Please allow a few weeks to see what case numbers do and to give schools more time to plan for this ever changing situation. Thanks for all you do!

7/21/2020 14:10:44	Heather	Ostrander	Self	El Dorado	Unless the state plans to pay for my family to have internet and pay my wages so I can stay home and school my 5 year old who cant be left to fend for themselves then schools need to open as scheduled!
7/21/2020 14:10:51	Kelsey	Finke	USD 320 Special Servic	Manhattan	Thank you, Governor Kelly, for providing schools & communities time to prepare & plan for the changes necessary to return as safely as possible to school. Pushing back the start date will help immensely in preparing!
7/21/2020 14:10:52	Blake	Braddock	N/a	Manhattan	Schools opening is not a smart idea. Cases are growing quicker than when the schools closed!!!
7/21/2020 14:11:02	Marsha	Ramsey	Grandchildren	Eureka	I see no purpose in delaying the start of the school year. The students have already been out of the classroom for 6 months. I know 2 of my grandsons did not perform well with the twice weekly zoom meetings. Also their parents need to work and not everyone has a grandparent to fall back on and even if they do not all grandparents are computer/Zoom savvy.
7/21/2020 14:11:07	Brenna	Smith		Olathe	Direction for schools to take should also consider the impact on child custody visitations schedules. If the start is delayed, will schools still be required to provide the mandated amount of school days/school hours, and ultimately impact the end date? Will school break times be revisited and reworked? If so, this may require some parents to have to go back to court (Which May be a problem due to limited onsite scheduling) and incur additional expenses to modify visitation plans. Schools should be able to offer the remote learning opportunities to keep aligned with the original school schedule.
7/21/2020 14:11:09	Steve	Clabaugh		Overland Park	I do not believe delaying the school year is necessary. I believe the school year should start in August on time. Private schools should not have to follow the same guidelines as Public schools. I also believe that making the children wear masks is not in the best interests of the children. If appropriate safety measures are implemented then it is not necessary.
7/21/2020 14:11:13	Stacie	McKay		Wichita	I believe delaying until after Labor Day is the correct response for USD 259 and other districts in high case counties. Other districts that are rural may not have the risk as the larger ones, so it may be best on a district by district case. However, if it would be "one size fits all" then we need to wait.
7/21/2020 14:11:15	Josh	Mecom	COFFEYVILLE Student	Coffeyville	Reject the governor's proposal and start school as normal.
7/21/2020 14:11:18	Jennifer	Duryea	Teacher in USD375 and	El Dorado	I think it is crucial to make this decision based on the extreme rise in positive cases of COVID across our state. This delay will allow us to go through 2-3 incubation periods to see if Kansans are serious about controlling this virus and hopefully seeing our numbers go down. As teachers this will give us time to effectively plan for the education of our students and incorporate the recommendations of the State Department of Education. We would all like to be back in school but we have to proceed with the health and safety of all involved at the forefront. Please support Governor Kelly's executive order!!

					<p>Kansas chose to close schools due to the amount of COVID-19 cases we had in April. We did it to prevent the spread of the virus, to protect one another, and to hopefully come out the other side of things better off. It was working, until we opened back up.</p> <p>Then, the number of cases exploded.</p> <p>If the rate of cases in April was alarming, then the rate of cases now should be even more so.</p> <p>Going back to school, physically, puts everyone at risk. Kids, parents, grandparents, teachers, school lunch room workers, janitors...everyone that supports operations at a school, would be at risk. And their families...and anyone else they come in contact with.</p> <p>What are parents supposed to do to protect their kids? If y'all say, yup, school is on, like normal... BUT with these guidelines that young kids could never follow..then, I HAVE to send her, by law, and put myself and everyone in my family at risk. It's not as if you'll create a program that will pay me to teach her at home for the year or until a vaccine is found. I have to work to pay bills.</p> <p>Along the same vein, if you say everyone should stay home and do at-home schooling, who will teach my kiddo while I'm at work? If there isn't a program created to pay me for missed work days, it just won't happen.</p> <p>Don't wait for our federal government to fix this. They won't. I think you should protect the health of your citizens and provide help for families to teach their kids at home until a vaccine is found.</p>
7/21/2020 14:11:20	Meagan	Blanchard		Bonner Springs	Everything else either puts too many at risk or drops the ball in one category or another.
7/21/2020 14:11:28	Haley	Jackson	Self	Dodge City	I vote to delay schools opening
7/21/2020 14:11:38	Nikki	Green	Nikki Green Counseling	Shawnee	<p>We cannot live in fear of a virus that has an incredibly high survival rate. The unintended negative consequences we have experienced far outweigh any risk of reopening schools. The losses associated with the shutdown responses to this virus have greatly impacted mental health. More children are experiencing anxiety, depression &amp; are at risk of suicide. Many children are safer at school even with a potential virus transmission than they are in their own homes. When home stressors increase as they have with this pandemic, children suffer more from child abuse, domestic violence, addiction, etc. We cannot continue to base decisions out of fear &amp; the unknown. We can be wise, use good hygiene, social distance &amp; live our lives. A few weeks isn't going to make a difference because this virus isn't going anywhere. Kids need schools to open on time. We all do. We are made for connection &amp; community.</p>
7/21/2020 14:11:41	Rachel	Willems	Parent of 3 public school	Protection	<p>I believe that the delay adversely affects not only my own children, but most children in Kansas and kindly ask to reconsider this decision. I question what will change with the status of the virus in 3-4 weeks when Gov. Kelly says we can reopen them? Is it going away? No. Therefore, a delay makes no logical sense. I am a small business owner in my community and have had to navigate being both a working Mom, business owner and took on the role as a virtual teacher for my kids' this Spring. It was difficult to say the least (and I have taught in a classroom for 6 years!). Furthermore, sports/extracurricular activities also have a huge impact on students and is a way that so many stay connected in their academics &amp; I believe a delayed reopening will have a negative impact on sports season/extracurriculars, our students. Please reconsider this delay! Our children deserve a proper education in a social setting and back to a more normal routine!</p>

					<p>First, I would like to thank you for your service to our community. Then, by way of brief introduction, I'm a patent attorney at Spencer Fane LLP heading up our Intellectual Property practice group. I graduated from KU with a mechanical engineering degree and law degree, and currently reside in southeastern Shawnee with my wife and three kids (5, 7, &amp; 14).</p> <p>I rarely if ever take an interest in day to day political activities, but the events of late are going to require more of us to begin to speak up as wrongful executive actions are taken to restrict freedoms and cause harm to our society having consequences both immediate and far into the future. With that, I'm sure you will not be surprised that I believe the shuttering of our schools nationwide (not to mention our entire economy) was an extraordinary overreaction and foolish. Thus, further delays (which unless we speak out against them appear likely to be extended) are equally foolish and harmful to the development, overall wellbeing, and futures of our children.</p> <p>The fearmongering press and most unfortunate politicization of the new corona virus cross over strain(s) necessitates that we step up on a local level and defend freedoms and the wellbeing of our children. Thus, I would ask that you use your judgement and authority to get our children back in school and return at least that portion to some normalcy for them.</p> <p>Kindest regards, Kyle</p>
7/21/2020 14:11:41	Kyle	Elliott	Parents	Johnson	
7/21/2020 14:11:43	Toni	Keffer	USD405	Lyons	Delay school start
7/21/2020 14:11:45	Erica	Riley		Olathe	School should remain closed until pandemic is under control and kids are safe to return without the use of PPE.
7/21/2020 14:11:51	Graecinda	Tedder		Olathe	Opening schools on areas not meeting COVID 19 gating criteria is irresponsible public health response. Using the data for CDC gating criteria of each county should determine if schools open or wait until After Labor Day. Those areas with schools that are not at or below 5% should remain closed. This is a simple method. Counties either meet the criteria or they do not. Clearly those areas in KS that do not meet the gating criteria should remain closed until communities are under control and meet a downward trajectory of positive cases for 14 days and continue to meet the criteria set by the CDC to provide an avenue that is clear on when to reopen communities. Communities need to do their part in preventing the spread but with schools opening in areas that do not meet gating criteria that won't be possible. I urge you all to provide no in person instruction until gating criteria is met in community counties per the local health departments reports.
7/21/2020 14:11:54	Roxana	Cardonne		Mcperson county	It should be delay a bit further.
7/21/2020 14:11:58	Leslie	Goodin	Parent	Desoto	Please uphold the Governors decision to postpone the opening of school.
7/21/2020 14:11:59	Jerry	Dowdle		Lawrence ks	Please delay school opening (at least until Labor Day) and longer if needed for safety of all involved.
7/21/2020 14:12:00	Miranda	Hodo		Gardner	Uphold mandate and give school districts the gift of time to properly make plans!
7/21/2020 14:12:03	Kerri	Jones	Topeka public schools	Topeka	Think it's the right choice. School should be virtual until Covid rates decrease significantly
7/21/2020 14:12:22	Joyce	Bertoch	Maranatha Christian Ac	Shawnee	I am requesting that the state of Kansas does NOT issue a delayed start to the 2020-2021 school. I don't think it is good for any student. I am especially asking for private schools - if they have demonstrated a reasonable plan for following government recommendations regarding Covid safety, I would hope they would be allowed the freedom to start as they choose to best educate the students who have placed their education in their hands.
7/21/2020 14:12:23	Heather	Reynolds		Topeka	The delay of the start of schools until after Labor Day is essential to ensuring that schools open safely.
7/21/2020 14:12:23	Donna	Ackley	None	Lawrence	I support the proposal to delay the start of schools. I do think that there should be criteria added about the number of cases and the weekly trends for the area to determine when schools can safely be re-opened. Clearly defined criteria and rule can help families plan for this unprecedented situation.
7/21/2020 14:12:28	Leo	L		KCK	Please delay start until cases either flatten or decline.
7/21/2020 14:12:36	Rachel	Haught		Goddard	Please approve the Governor's orders to give schools more time to plan how to keep students and staff safe and allow Kansans time to do their part to start trending down. In Sedgwick county, restrictions are ramping up again because our cases are rapidly increasing.
7/21/2020 14:12:41	Heather	Schmidt		Lenexa	Please vote to delay the start of the school year until after Labor Day. This delay will allow for more time to plan how to safely return our children to the in-school setting. This is particularly important in Johnson County where the cases continue to increase daily.

7/21/2020 14:12:45	Katie	House		Prairie Village	Packing students back into school puts them and faculty at risk of COVID. If board members still feel the need to socially distance/Skype these decisions, then the school year needs to be delayed.
7/21/2020 14:12:55	Lacey	McGuire	Student	Louisburg KS	I am opposed to delaying schools unless our school needs the time. If they are prepared we should be open.
7/21/2020 14:13:02	Troy	Plummer		OAKLEY	Please be the voice of reason & open these schools back up on time & get activities for these kids going. They've already spent the summer swimming & playing baseball, delaying the start of school/sports is an absolute waste of time. It's time we move forward.
7/21/2020 14:13:02	Stephanie	Woolfolk	Usd 220 and my family	Protection	If school IS delayed, we had BETTER start in September! My fear, as a concerned mother and kindergarten teacher, is that there will be another delay once September comes around. We cannot have successful online school if we aren't even allowed the opportunity to establish routines and as much learning as possible in the classroom! The longer we wait to get into school, the closer we get to "flu season". I felt like the sooner we could start, the better! Virtual school was a nightmare and placed too much responsibility on parents. Some had too much on their plates and others just didn't care. I had about 1/3 of my class that probably still "learned" or atleast participated. The social and academic loss is scarier to me than the virus. Kids need school!
7/21/2020 14:13:08	Sean	Dooley	Parent of USD 497 student	Lawrence	I am asking that you don't mandate the postponement of athletics and activities for high school students if you choose to postpone the start of schools until after Labor Day. The schools have been able to monitor workouts throughout the summer in a safe and healthy manner and feel extremely confident they will continue to do so. If we cut off their ability to work with their student-athletes for essentially a month, we will be back to square one from a conditioning standpoint. If we allow them to continue to work together under the coaches and schools supervision we can accomplish several things. 1) it will allow the students to continue to participate in an activity they love to do with their friends and give them hope that they will be able to participate in that activity this fall. 2) it will give schools an opportunity to practice some of the safety procedures and protocols that will be set forth by the state for the upcoming school year. Let these athletes and coaches be the guinea pigs for these new measures. This way schools and their staff members are better prepared come first day off classes. Thank you for your time
7/21/2020 14:13:09	Candace	Landers	USD 260	Wichita	I am a mother of two school aged children and a third grade grade teacher. I vehemently support the delay of school openings and further, believe we should be fully remote until Covid-19 cases have been in decline for at least two weeks, or there is a tested vaccine made available to all students and staff. I would like there to be supports in place for working families, so they do not feel like school is their only option for maintaining their livelihood.
7/21/2020 14:13:11	Valerie	Creswell	Central Infectious Disease	Wichita	We are in a COVID surge- we need to delay school openings until we have a plan to protect not only students, but school workers and family members. This needs to happen in all counties - no reported cases does not mean that there are no infected individuals in that county at this time. Thank you- Val Creswell MD- infectious disease specialist
7/21/2020 14:13:13	Karen	Stainbrook	Chaparral Schools	USD 1 Anthony	Please delay the start of school until after labor day or start school remotely until a vaccine is available. I do not believe it is safe to start school in person yet. One child's death is too many.
7/21/2020 14:13:15	Laura	Hines		1616 Vermont	I support Governor Kelly's order delaying school.
7/21/2020 14:13:22	Tracy	Schinzle		Bonner Springs	I think schools should be delayed till after Labor Day. Staff needs time to properly prepare and adjust regardless of meeting in person and or distance leaning. Our cases are increasing in KS. We need time to prepare and hopefully for the numbers to lower. Give time to prepare so everyone can excel and not fail.
7/21/2020 14:13:23	Kaleena	Viruete	USD 500	Olathe	I work as an educator in USD 500, Wyandotte County and am also a parent of an incoming kindergartner in USD 233. I fully support the Governor's executive order to delay the start of school. It is a very minimal concession at this point to save lives of not only students, but educators, support staff, and multi generational families.
7/21/2020 14:13:26	David	Roberts	Personal	Topeka	Teachers need more time to plan together!! Delay openings until after Labor Day and then let districts decide!
7/21/2020 14:13:30	Margaret	Bono		12815 Sagamore Rd	Please open the schools for the sake of the mental health of all the children!

7/21/2020 14:13:36	Lisa	Bandre	Blue Valley Schools par	Overland Park	I urge you to uphold the governor's order to delay starting school. A few weeks ago, I was ready to go back to school with modifications in place. As the number of cases continues to rise, I no longer feel like that is a wise choice for the safety of students and staff. As a veteran teacher of 27 years, I have spent my time (and my own money) enrolling in conferences & workshops This summer to extend my knowledge on how to adapt my teaching to our circumstances. The problem is that I'm not sure how, or even if, I will be able to apply the things I have learned to my classes. We were waiting on guidance from the KSBOE on what things would look like so that our district could use that to combine with the plan they have been working on since the Spring. We were supposed to find this out last week but now it has been delayed with the order. As teachers, we are still in the dark as to what we will be expected to do, and how we can even do it (right now I don't even have the needed technology to start planning even if I had a clue what I was planning for!) I am hopeful with the delayed start that teachers will be able to get the necessary training and equipment from our districts as well as prepare our buildings in a way that we can welcome students back. As a high school teacher I am very nervous about how we will maintain a safe environment in a school of 1600 students. We need time to learn what is expected of us and how to do it in addition to time to prepare our lessons so that we are doing a good job with whatever form of delivery we need. I want to be back at school and I want my son to be able to start his Freshman year, I hope that this delay will give us at least a chance at that. Please uphold the governor's order. Thank you.
7/21/2020 14:13:46	Denise	Woods	Usd 263	Mulvane	Please delay the opening of school to allow time to get the number of viral cases down. Please!!
7/21/2020 14:13:56	Hannah	Wright	USD 461	Neodesha	I'm an elementary principal in Neodesha. I would like to urge you to vote in favor of the governor's suggested delay of Kansas schools starting until after Labor Day.  The main reason I would like for you to vote in favor is to give the Covid case numbers to hopefully decline and allow districts more time to appropriately plan for the instructional needs of our students.  Thank you for your time and consideration.  Sincerely, Hannah Wright
7/21/2020 14:13:56	Christina	Brandenburg	School nurse	Olathe	School nurses are hair now getting protocols from the JOCO health department and the state on how to safely manage Covid in the school setting. The extra 3 weeks provides us time to prepare for the safe arrival of our students and to meet the mental health needs of both staff and students. Safety first!!
7/21/2020 14:14:02	John	Thurston		Manhattan	Delay opening. Please don't ignore the science.
7/21/2020 14:14:08	Brandy	Estrella		Hutchinson	Please open schools on time without mask mandates. Our children need to be in school around their peers and learning in person. I have a child who struggles, being away from school is not helping him. I know it is taking a toll on our children being away from friends and not socializing.
7/21/2020 14:14:12	Amanda	Bigus	My children	Lawrence	Absolutely delay the start of the school year! Kids deserve to be as safe as possible if they have to go!
7/21/2020 14:14:13	Danielle	Derstein	Horace Mann Dual Lang	WICHITA	I agree with Governor Kelly's order. In fact, I would go farther to suggest schools delay in-person instruction until coronavirus positive tests collected daily are in the single digits within counties. There are so many challenges in getting students (even parents) to comply with normal school rules to expect this opening to work AND be safe for all. Also, if our board members cannot meet to make this decision in-person because your lives matter, why would you expect teachers, staff, and students to meet in-person for school? You are sending educators a clear message depending on whichever way you vote in regards to their worth. I also urge you to apply to be a substitute in your county if you want to keep schools open. I don't care how busy you are, you need to experience this craziness for yourself. Thank you for letting me voice my opinion.
7/21/2020 14:14:30	Lynda	McKee		Colby	As a high school teacher, I am concerned about the health risks. I am okay with starting on time if the active cases number starts decreasing again, but definitely think everyone should be required to wear masks in the schools.

7/21/2020 14:14:38	Jaime	Anderson		Shawnee	I want to see all the evidence on covid. We get mixed information from all government officials (local-federal) why are we not listening to the doctors....the ones who are trained in healthcare? For the mental wellbeing of students and parents it's imperative kids get back in the classroom asap. What do single parents do with their young children if they are an essential worker? What about those who cannot afford childcare? My husband and I own a small business and I work a full time job on top of that. What is your plan to keep families from filing bankruptcy if we can't work because school is not in session? It won't help the economy that is for sure. Many places will not test kids under the age of 12 for covid.....yet they are the most likely carrier of the virus. The state should provide covid testing for ALL students/staff to return back to school. There also needs to be a back up plan for all schools (public and private) to provide online learning. Stop hurting our children's education by putting school off. 3 weeks will not make the virus go away...the virus will not disappear. We still have no scientific proof that people become immune. Your decisions now will impact a generation of young minds.
7/21/2020 14:14:45	Ronald	Morgan	Parent	Topeka	Please support the delayed opening of schools
7/21/2020 14:14:55	Hilary	Murphy	South Central School Sy	Protection, KS	I ask that the delay in KS school start dates be determined county by county. The risk in our small, rural counties is different than the large metro areas of the state. Our children need school to start back up in August for so many reasons! Emotional and Mental health is the top of our concerns with this change in routine.
7/21/2020 14:14:57	Megan	Taggart	N/A	Overland Park	I really appreciate the delayed start in school this year. I'm a recent college graduate whose sister teaches in Wichita. My sister as well as her husband are teachers at different schools and their son is starting kindergarten this year at another school. As a family we do not feel safe doing much outside the house right now and are trying to limit our exposure as much as possible. It scares us a lot to think of all the germs they will be exposed to and that they could spread to one another and the other people at the respective schools. I know my family is hopeful there will be an option for them to be entirely online if possible, however I know that would be very hard on parents who have to go in to work and would need to find childcare. My personal hope is that online school is available and an option for both students and teachers, however having safe in person classes as a second option. Please attempt to give teachers and students the option to choose how they will do school this next year if possible. No one will be learning at optimal levels if they aren't comfortable in their surroundings. Overall, I am extremely pleased with the work Governor Kelly has done. I admire her commitment to the schools and people of Kansas and that she will not bow to political agendas. She is more concerned about the wellbeing of Kansans than her re-election campaign. This speaks volumes to who she is as a person and I'm so proud to have her as our governor. Thank you for putting people first and politics second.
7/21/2020 14:15:00	Ava	Dunekack		Topeka	School should be delayed in order to protect the staff and students.
7/21/2020 14:15:03	Lei	Wu	Parent	Overland Park	As kids has been home for too long without organized learning event and interaction with classmate, delaying school start date will further impact their academic progress negatively. Plea to start online ontime without delay. Later can shift to physical or hybrid if proper.
7/21/2020 14:15:05	Samantha	Hammontree	Blue Valley Parent	Leawood	I think K-12 should follow the university schedule with a break from Thanksgiving to Feb 1st and no spring break! Keep excuses for travel to a minimums. I'm okay with delay of school; however, would like to hear BV's tentative plan so I can plan accordingly. TY.
7/21/2020 14:15:06	Jamie	Froetschner		Larned	Please let the kids return to school on time. & PLEASE let these decisions be a district by district call. Larned has no active cases and less than 10 total. We hear a mask mandate is in order for k-12 as well. This is insane. Please stand for us parents and kids and put an end to this madness.
7/21/2020 14:15:07	Darin	Snyder	Colby school district	Colby	I personally think these kids need to get back to school on time.
7/21/2020 14:15:09	Sam	Huenergardt		Shawnee	We support allowing small schools who have the flexibility to react to the changing conditions the room to do so. Many have spent the summer preparing. We support giving them the latitude necessary.

7/21/2020 14:15:09	Susie	Antosh	Self	Dodge City	<p>Hello! Let me start by saying i do not envy the position you're in and the decisions you must make.</p> <p>I thank you for the important roll you play. I would would like you to know I'm aware that my family is not the majority, but all I can speak to is our situation. I live in fear of this Pandemic and the damage it could do to my family, you see I have a beautiful super intelligent 8 year old who has an autoimmune disease; that sadly she inherited from me. She's on medication that suppresses her immune system these medications are vital as my sweet girl could walk or move her neck without them. I also have a husband at home who has just finished radiation after a year long battle with lymphoma cancer. I understand the importance of getting back to business, my husband who is self employed has worked very little this last year because of Cancer and now because of a pandemic, financially it stinks, but we are alive and surviving.</p> <p>I know we cant be trapped in our homes and shut down forever, but I beg you to create an option where my child can be safe and still receive an education. Online options are something several families would be happy to take part in, leaving room in classes to social distance. Please consider us in your discussions and when you make your decision.</p> <p>Thank you for your time, Susie Antosh</p>
7/21/2020 14:15:10	Dawn	Keil		Hays	<p>I request that you approve the Governor's executive order delaying the start of school. With many public places now requiring masks, this could give communities time to slow the spread and schools time to prepare for the necessary changes. I also request that you approve the mask mandate for BOTH staff and students of all ages. I am a 34 year veteran teacher of elementary students. It is impossible to socially distance when teaching young children, so I ask that the mask mandate be implemented. I take care of my aging parents who have compromised health. ( I see them daily for 1-2 hours.) I feel an obligation to protect myself at school as a way to protect them. This is a common issue for teachers in my age range. (50-65) I have a friend who is a speech language pathologist in my school district. She has severe asthma and is uncomfortable returning without the mandate in place. I have also spoken to two colleagues who plan to take medical leave if they feel unsafe going to work. One already has her paperwork complete. If teachers and staff feel unsafe returning to school, this could create a real problem in staffing all positions. I have considered retirement, and will still consider, if the mandate is not implemented. Please show the educators and school personnel of Kansas that you care about their personal safety, and vote to approve the Governor's executive orders. Thank you.</p>
7/21/2020 14:15:14	Joelle	Holt	Self	Lawrence	<p>Delay or keep on line options or we will never be able to open up again.</p>
7/21/2020 14:15:18	Sandy	Banman	USD460	Goessel	<p>I am very concerned as a teacher. I don't want exposure and don't want to bring exposure home to my health-compromised husband. There is so much talk about the students, but what about the teachers who are forced to do this? Do we get any voice in this? What about our families? I think it's important to see cases going down before we get out &amp; about in this pandemic. Going through several incubation periods would be important! Politics does not matter in this, ALL LIVES MATTER!!!</p>
7/21/2020 14:15:24	Kim	Edgington Keehn		Wichita	<p>The harm caused to children from not being in school is far greater than anything this virus can do. We have brilliant minds in this state that can surely manage a plan to bring education to our children while protecting teachers. I implore you to put these minds to work for the benefit of students.</p>
7/21/2020 14:15:49	Karen	Kadel		Overland park	<p>Please don't have the students return to school this semester. Their health and that of the staff is more important. I have worked in a local elementary school in the past and parents don't follow the rules and send sick kids to school. Once at school, they sometimes take hours to pick them up and only do so after reminding them that we can call child services if they refuse to pick their child up. Sick kids will be sent to school if schools are open. Please re-evaluate for the second semester and remain closed if the situation has not improved.</p>

7/21/2020 14:15:50	A	D	School	Gardner	As a parent and school employee, I would love children to go back to school but what happens if a child/teacher/parent is infected with covid-19? I work in a high school. How do we contain the spread with students going from room to room? Once one person is infected, logically and quickly the entire school will be infected and therefore spreading the virus back home even with the attempt at social distancing and wearing masks. Online school, although difficult and possibly unpopular seems like the safest choice until we can reassess at the natural holiday break. If we can slow the spread this fall semester, hopefully we can return to full time in person instruction in January!
7/21/2020 14:15:52	Sheila	Brown		Shawnee	I work in a public school where my students had a very hard time getting equitable access to an education during the spring because of concerns with access to technology. Additionally, nearly all of my students are on free or reduced lunch and rely on our schools to have regular meals. If we want our students to continue to learn, they need to be in school.
7/21/2020 14:15:53	Jesua	Moreno		Lawrence	I think this is great leadership on the governors part! Thank you for thinking of our students, staff and families. My only concern is that once you do decide to allow schools to open, we should ensure our cases are down for at least 14 days before opening. Each school district may have to open at different times in order to make a safer return for school staff and students. This won't be a one size fits all. Thank you again for your clarity and leadership!
7/21/2020 14:15:55	Dianne	Conway		Lenexa	I highly support delaying the opening of schools. My daughter is a teacher and I have twin 1st grade children and am highly concerned if we rush into in person classes. My daughter loves teaching in person but doesn't want to at this time. Many teachers are willing to put in the extra time and effort to start later and virtual until things are under control.
7/21/2020 14:15:59	Lisa	Barger		Wichita	I don't feel the evidence supports that children spread Covid-19. I don't feel delaying the start bog school will help flatten the curve. Kids need to be with eachother in school for their social and emotional well being.
7/21/2020 14:16:07	Mistie	Becker		Shawnee	My daughter is entering 4th grade at Maranatha Christian Academy in Shawnee. I am confident that our school can provide a safe atmosphere for all students to be able to start school as planned in August. My daughter attended a camp at the school this summer and we had a great experience! I believe our school is ready to open with safety measures in place to protect my daughter and all students and faculty at Maranatha. I do not support delaying school, especially as a one size fits all approach! Thank you.
7/21/2020 14:16:12	james	doscher	None	De Soto	Please follow the Governor's executive order and delay until after labor day...we all have too much at stake to do otherwise
7/21/2020 14:16:17	Dawn	Daugherty		Lenexa	Our kids need to get back to school in August! Parents need to go back to work, and life needs to get back to normal. This is not normal nor will it be the "new normal". Our kids need routine and socialization. To delay the start of the school year will just cause more stress, comotion, and issues. Lives have already been completely messed up and starting school at a regular time of year will show some normalcy and hope that we are resuuming normal lives again. We should not be fearful of this virus with a 98-99% survival rate and very minor symptoms for a majority of people. Our government should not have this much "control" on the people and the more harmful decisions that are made the worse it gets for Americans. We have already gone through spring and summer with many, many restrictions but now is the time to return to normal.
7/21/2020 14:16:17	Caleb	Austin		Kansas City, KS	Please delay school opening per the Governor's Executive Order. As a teacher, I should not be risking my life when there are safe alternatives.
7/21/2020 14:16:18	Karen	Allen	My family	Lawrence	Please delay the start of school. We owe this to our children, school staff, and families to try and quell the virus before anything in person can happen. I also strongly encourage you to start the school year totally online. We need to protect our kids and their families.
7/21/2020 14:16:22	Rustee	Schmidt		Moundridge	I think it is absolutely ridiculous. And no elementary age child will be able to safely wear a mask. They will constantly be touching them. And they need proper social interaction to help them build and keep up their immune systems.

7/21/2020 14:16:31	Carolyn	York	USD 500	Raytown, Missouri	I wanted to add additional comments. I wanted to add additional information. There is a lot of concern about students getting their social/emotional needs met at school. While this is true for some students it is not true for all. Many students will be traumatized with a return to school too soon. We have many students who have high anxiety and depression. Going back for them will be difficult under these circumstances. If they carry covid 19 home this would be devastating to them and their families. If they lose staff due to the pandemic it will also be difficult. We also have a number of students who did better when they were online.
7/21/2020 14:16:33	Rebecca	Meder	Meder family- Ellis Cou	Hays	Many physicians have penned letters that kids need to be in school for their health, wellbeing, and mental stability. I agree- this has been hard enough on kids- they need to get some normalcy back in their life. Additionally there are no masks FDA approved for young children as masks are not recommended for young children due to health hazards. Laura Kelly needs to be reigned in- she can not dictate things that may affect my, and 100's of other, children's health. Her mandates are getting out of hand. We need kids in school and young kids should not have to wear a mask. We are a family that will pull our children from public school over the mask mandate if not repealed.
7/21/2020 14:16:34	Gayla	Fickel		Chanute, KS	Delay opening of school to allow time for safest possible procedures to be implemented.
7/21/2020 14:16:35	Michelle	Unruh		Newton	I urge you to vote in favor of Governor Kelly's order to delay the start of school. As a teacher, I currently do not feel comfortable going into a classroom setting and educating students as our cases continue to rise. Do what's best for all students and for Kansas! Thank you for your work!
7/21/2020 14:16:39	Danielle	LeGrand	Olathe Public Schools	Kansas City, MO but I w	I may live in Kansas City, MO, but I work for Olathe Public Schools. I am a school counselor who has already returned to work. I truly believe the school year should be delayed because my school is no where near ready for students. We are the 6th largest school in the state of Kansas. We have not been given anything to protect ourselves as of yet. COVID 19 has hit Johnson County hard, and I am risking my life and my 7 month old sons life by returning to work. He is currently in care where he is at risk and I am work putting myself at risk. Please consider delaying the year so we can better prepare and keep our students and staff safe.
7/21/2020 14:16:56	Melissa	Bowles		Manhattan	With having a child with health problems and living in Manhattan a college town. I would like to see school pushed back. Social distancing guidelines are already not being followed in the summer conditioning programs. You being educators know that physical health is just as important as mental. What happens when these teachers get sick and there aren't enough subs to go around. Please make the right choice here even though it is the hard one.
7/21/2020 14:16:59	Audrey	Herbst	Principal, USD #444, Li	Little River, Kansas	To the members of the Kansas State Board of Education, please adopt and approve Governor Kelly's order 20-58 and 20-59. With an increase in positive COVID cases identified across the state and in our local county, there is evidence of uncontrollable community spread. In an effort to expedite reopening of schools in a safe manner, I support Governor Kelly's executive order. We are not ready to open school in a manner that would curb the spread of Sars CoV2 in an efficient manner. With a proactive approach we can prevent an outbreak in our rural community, much like what Logan, Kansas is experiencing. Our goal is to get back to school and extracurricular activities quickly and safely. The only way to do that is to be proactive in our approach to ensure the health of Kansans and those in our local community. Thank you for your dedication to our public schools and for your thoughtful consideration.
7/21/2020 14:17:06	Susan	Polhlopek	Northeast USD 246	Franklin	Follow the governor's executive order.
7/21/2020 14:17:07	Melissa	Smith	Usd 336	Onaga	At this point, to allow schools time to prepare it is necessary to delay schools some. Please encourage schools to use the added time for professional development for staff.
7/21/2020 14:17:20	Christopher	Engle	Engle Family	Andover	I want to send my kids back to school, but not until it's safe for everyone. We will be keeping them home until the situation is under control and the Covid numbers are way down. Let's continue remote learning for the first semester and hope for the best for Spring 2021.

7/21/2020 14:17:23	Jennifer	Leiker	My children attend St. T	Wichita, KS	Please leave the decisions of when to start school, safety and health of our children, families, teachers, admins, volunteers, and priests up to the individual schools. They will act in the best interest of all involved and will be more flexible and capable to provide the best learning environment for our children during this pandemic than executive orders from the governor. The delay in school start is an overreach that only hurts our community school by dictating rules that may not be necessary. Virtual learning was horrible and I am concerned catch-up from the spring is necessary and this gap will continue the longer we delay school starting. I am also concerned with the children in our community that are not learning virtually, live in abusive situations or may not have parental oversight or regular meals, not to exclude children that struggle with mental illness or suicidal thoughts. Please consider these children as well. We know children are low risk for this virus and adults are able to take precautions. Thank you for your consideration.
7/21/2020 14:17:24	Jon	Garten		Overland Park	They should do school from home this year
7/21/2020 14:17:32	Scott	Erickson		Kingman	I am vehemently against any mask order for students to wear one 8 or more hours per day! My sophomore daughter refuses to wear one and states she would rather drop out and be home schooled than be controlled like a mindless sheep. Even the CDC recommends AGAINST wearing a mask unless sick or having symptoms. Maybe Governor One Term Kelly should gollow the State and Federal Constitutions instead of giving tyrannical orders for wearing a mask which all scientists say will not stop virus spores from penetrating. Masks and vaccines have done nothing to stop ot slow the flu virus so what maker her think that this tyrannical order of masks will help? A mask does nothing to protect my daughter or anyone else. Let the individual school districts and us parents decide what is best for OUR children!
7/21/2020 14:17:38	Sara	Glotzbach	USD 345	Meriden	School needs to be delayed until after Labor Day.
7/21/2020 14:17:55	Lindsey	Martin		Protection	No delay. My kids need person to person teaching. A Delay of a few weeks, does not change the virus, only delays my kids' education
7/21/2020 14:17:57	Amy	Wiebe		Wichita	Please uphold the order to delay opening of schools. This volume and growth of COVID 19 cases is high currently. Scientific evidence, and health and safety of students and staff must be placed ahead of our desires to return to "normal." Additionally, schools will need extra time to prepare for all new requirements and train staff. We would all love to be back in school buildings, and it will happen, but we must do the difficult work now so that we may be more successful in our return to school buildings later.
7/21/2020 14:18:05	Michelle	Dinges	Topeka Public Schools;	Topeka	You have the chance to demonstrate responsible leadership and save suffering in our Kansas communities. Please use your position to support a responsible order that will protect us from people who will act irresponsibly unless mandated to do otherwise. I support both of Governor Kelley's executive orders. C-19 WILL spread through schools if classes resume in person. Even the White House has recognized Kansas as one of 18 states that needs more C-19 regulation. Once it spreads amongst students, it moves through families and the community at large. Please show that you care about families and teachers by supporting these orders. Thank you for reading this.
7/21/2020 14:18:06	Jennifer	Tillberg	Educator	Lindsborg	In favor of delaying start of school so teachers have adequate time to plan
7/21/2020 14:18:07	Jeanne	Hoduski	Marathon Academy	Bonner Springs	I am writing to request that the school opening not be delayed but to be allowed to open it's doors on schedule. Thank you so much for your work and consideration in this matter.
7/21/2020 14:18:11	Taylor	Ryan	Licensed Kansas Teache	Overland Park	Please do NOT start schools before Labor Day and please start them online. I hate the thought of not being with my students in person. But I truly believe that extraordinary times call for extraordinary measures. Families are still not taking this seriously. I know of at least 15 out of my 20 kids who have traveled this summer. Including places that were on the restricted list. It is not safe to come back and put everyone at risk. Then, to find subs, lesson plans, use my PTO to quarantine because someone has brought it through the doors is just asking for more trouble. Please think about the life altering events that will take place for teachers, students, and staff. I appreciate everything you all are doing for us. Your decision is tough.

7/21/2020 14:18:19	James	Gwennap		Smith Center	<p>This message in regards to the opening of schools.</p> <p>As a past B.O.E. member at USD 237 for 20 years, I am deeply concerned about our governors latest mandate regarding wearing masks in the school as they open this fall. Our kids are already under a lot of stress. Closing of schools last March was shocking to kids as well as families. I truly believe we will struggle to catch up with students education. Now as we start the new school year, instead of trying to provide a comfortable learning environment once again our governor creates a stressful setting by mandating masks. No data is available to support wearing masks or not wearing masks for preventing Covid 19. Our governor seems to make a lot of spur of moment decisions with no long range plan or thought put into her decisions. As a farmer in agriculture I can assure you masks hinders your breathing, does not stop all particles and is uncomfortable to wear. At some point we need to start using common sense, encourage good learning environments and not stress our kids. We have 2 students here in Smith Center who are autistic and I have a grandson who is beginning kindergarten this year. There is absolutely no way you are going to get him in a mask. I believe we have had other life threatening diseases including the Asian and the swine flu. There was never this fuss about masks. Taking kids temperature when they arrive at school should be sufficient.</p> <p>I encourage you to allow schools to make their own decisions in regard to masks. Lets help our students learn and not frighten them. You can bet the same high school kids who are forced to wear a mask are in cars together etc. after school and evenings. The numbers that we have seen in deaths and who have tested positive are not accurate. Thank you and I hope that you can come to a decision that would be best for students and teachers.</p>
7/21/2020 14:18:23	Emily	Humm	Myself	Pomona, KS	I support Gov. Kelly and think students, teachers and communities are safer if we take the extra time needed to properly prepare for the new way education must look in order to keep people safe.
7/21/2020 14:18:25	Laura	Valerius	USD 300	Comanche County	I wish they would leave it up to local decision. My county has 0 active cases. While we have zero I feel we should be able to start and let teachers get to know students ect.. By Sept. 9 who knows what it will be. I live in a small district. They have been preparing and making preparations for a safe return all summer. We do not need the extra time. If we get cases after Labor Day we might have to go distance. So why not let us start when we can to be able to best serve our students.
7/21/2020 14:18:38	Lynn	Hartter	N/A	Sabetha	After considering the facts of Covid-19 in Nemaha and Brown Counties, and the plans of other states, including Missouri and Nebraska, to open schools in a timely manner, I draw the conclusion that the Executive Order was issued for some intent other than the safety of students. It is perhaps at the request of education staff members. I work in a school building and have no concerns about catching coronavirus from students even if they are unmasked a majority of the day. Students have been left with less structure, parents have been forced to assist, and the local districts have recommendations from the Kansas School Board to put into place. These decisions should be at the district level, in cooperation with local municipalities and counties. It was clear that the intent of the Kansas Legislature was that statewide decisions regarding school and its opening, closure, or in this case, perhaps a play on the scenario of a delay (remaining closed) should rest with the Kansas State Board of Education AND that control of implementing Executive Orders should rest at the county and city level. It may not be appropriate for all districts to start school as planned, in person, or even to attend at all in person at first. That is why the three-plan option was developed for recommendation. I urge you to uphold the intent of your legislators, who responded to their constituents. Allow local districts to decide when to open and what model they will use for opening.
7/21/2020 14:18:40	Keith	Skidmore	None	Newton, KS	Please vote against Governor Kelly's Executive Order 20-58. Thank you, Keith Skidmore
7/21/2020 14:18:42	Rachael	Gehringer		Lawrence	Online instruction is fine;however, please make sure all teachers are instructed in teaching online and learning apps that kids are required to use.
7/21/2020 14:18:48	Mary	Maxwell	None	Manhattan	Do not postpone the begin group of school & activities. Reasons too numerous to mention!
7/21/2020 14:18:50	Debbie	Summers		Sharon Springs	Kids need to be in school. They need the socialization. The online learning doesn't work for very many. They have been out too long. Schools need to start at the regular time, not later.

7/21/2020 14:18:59	Heaven	Cain	I'm a para at an element	Augusta, KS	I know our numbers in Butler CO are not as bad as a lot of other counties in KS, but that doesn't matter. Our cases are rising as well.  Although I really want to see my students that I work with on a daily basis, I am worried about going back to school. I am worried about my families safety as well as my students and co-workers. My family has various illnesses that COVID could complicate. Here's a small list of the illnesses the people I am around every week have: Heart disease (this includes myself), asthma, pregnancy, thyroid issues, previous cancer patient, diabetes. The list goes on and on. If we do not close schools, I will not be able to see my parents or siblings for at least 4 months because we will not run the risk of them being infected. I do not feel it is safe for anyone to go back to school. I feel it would be irresponsible to go back because it is putting students and staff in harms way. People without a medical background are going to have to make judgement calls that they should not have to, if the nurse gets sick. It is all around not fair to put the lives of teachers and students at risk because of politics and parents wanting a baby sitter for their child. The number of cases are higher now than they were back in March and when we peaked in April. Why would we go back to school now when the numbers are higher than ever before? A year out of school is better than having students or their care givers die all because we chose to be irresponsible.
7/21/2020 14:19:02	Tom	VanBurkleo		Wichita	With long term effects of Covid-19 unknown, I support the delay of school starting. Kids age 10 and up can carry the virus as well as adults. This will cause deaths.
7/21/2020 14:19:03	Jessica	Copeland		Olathe (Spring Hill USD	I, along with my children (3rd & 7th), believe school should open ASAP! I am very upset that the EO includes absolutely no interaction for the next 3 weeks-a cheer coach can't even zoom with the girls so they can learn cheers! I would not be opposed to a Sept 8 start dates IF we could be guaranteed that would be the date (and she couldn't push it back again) and it wouldn't affect our last day of school (I do not want to go into late June). Thank you.
7/21/2020 14:19:07	Emma	Cerre	Sedgwick County Specia	Wichita	Regardless of how we carry forward with the school year, teachers and staff need the extra time to plan!
7/21/2020 14:19:08	Kerry	Dixon	Myself	Tribune	Give each district local control of their education
7/21/2020 14:19:12	Husy	Hein		Augusta KS	Please vote to reopen schools as planned. DO NOT vote to delay school. These children have already been out of school nearly 6 months. Their education is important. Thank you.
7/21/2020 14:19:16	Benjamin	Wilson	USD 262 Valley Center	Valley Center	I am against the governor's order delaying the start of school until after Labor Day. I am of the opinion that delaying the start of school will have very little impact on the case count and infection rates. Our children need certainty right now for their mental, physical and emotional health and a plan to move forward needs to be put in motion. The fact that we are continually moving the target for a return to routine is a detriment to their well being and the ability for the leadership to develop and communicate a plan. In addition, it seemed that both KSHAA and the KBOE were caught off guard by her sudden announcement last week and should have been consulted prior to making such a proclamation. Yesterday's mask mandate was yet another example of her individualistic decision making. I would prefer a collaborative and open approach with all of the stakeholders involved to provide guidance to those of us who ultimately have to answer to the constituents who we represent.
7/21/2020 14:19:16	Cheryl	Maybrier	USD 409	Atchison	I think you should delay it. Our priority is to keep children safe. If that means schools remained closed then so be it.
7/21/2020 14:19:17	Debbie	Makings		Larned	Please follow the governor and wait to start school until after Labor Day. This will allow districts time to prepare.
7/21/2020 14:19:34	Farrah	Beardslee		Overland Park	I strongly urge the board to vote against Governor Kelly's executive order to push the start of school until after Labor Day. I don't understand what the purpose is of delaying the start of school three extra weeks. Our kids have been out of school for five months and are falling further and further behind. We should have the freedom to keep our kids home and learn virtually and we should have the freedom to send our kids to school. Unfortunately our freedom is being taken away from us lately and now our kids are being affected by it. It's time to move forward and get our kids back to school, please. Thank you
7/21/2020 14:19:35	Jennifer	Hanson	USD 480 Prairie View E	Sublette	Please support Governor Kelly's mandate for a delayed start to school. COVID19 cases are on the rise in Kansas. We need to wait until it is safer to start school.
7/21/2020 14:19:36	Lisa	Bauman	Blue Valley teacher, Sha	Overland Park	Please support Gov. Kelly's order and mandates. Our kids' lives are at stake.

7/21/2020 14:19:46	Ian	Devers		Shawnee Kansas	ZERO deaths in Kansas under 29. ZERO deaths in JoCo under 40. 7 people have died in JoCo under age 70 (five in 60's and 2 in 40's). Average age of death in Kansas from Covid is 78 (same as average life expectancy in US). If you are under 70, you are literally more likely to die of ANYTHING before you would die from Covid. Based on FACTS, there is ZERO justification to shut down school or sports.
7/21/2020 14:19:52	Megan	House		Lenexa, Olathe school d	School needs to start on time, even if it needs to be all online! 6 months is way to long to be out without public formal education available. Would love a transition to in person as the Covid situation allows. Thanks!
7/21/2020 14:19:58	William	Pettijohn	Self	Hutchinson	The continued delay of education for the children in Kansas will set them back for years. On-line education during the end of the 2019-2020 school year was a joke. In talking with Teachers across the State many of the Students did not do the work. If Teachers are scared to go back into the schools have them quit or retire. Those same Teachers expect medical workers to keep working, fire and police to keep working, and even checkers and stockers in the stores they go to but not them.
7/21/2020 14:20:00	Jody	Meyer	My family	Lawrence	For the sake of children's health and welfare, please carve out an exception that allows children to continue to do sport type activities from August 10 through September 8. We have been successfully doing these types of activities since June with no adverse consequences. Studies have shown the importance of physical activity for children both for physical health and mental health. There is no reason not to continue to allow this. Being outside doing activities is not the same thing as sitting in an indoor high school with 1600 students. I beg of you please allow these kids (high school in particular) to do their high school sports.
7/21/2020 14:20:05	Evelyn	Normandin	Self	Lawrence	Ask a parent of a special needs student with lung issues and from a house where parents have health issues as well, I am asking that you delay school openings. My student definitely needs face to face instruction for things like math. However I would rather not jeopardize our families health. Thank you.
7/21/2020 14:20:13	Jennifer	Younger	Parent	Ellis	Essential workers have worked the entire time in healthcare and other industries. I'm guessing that some had preexisting conditions and the world did not come to an end. Teachers are essential. With planning, such as sneeze guards, masks, and reasonable social distancing (3 ft is plenty) teachers and coaches can be safe. We cannot disregard an entire generation of teenagers and kids who obviously are at near zero risk of serious illness from COVID.  Below are facts about teenagers taken from the KDHE website. <ul style="list-style-type: none"> <li>- between the ages of 10 - 17, a grand total of 3 have been hospitalized due to COVID, obviously all 3 made a complete recovery</li> <li>- the median age of death in Kansas from the virus is 78</li> <li>- the youngest person in Kansas to die from the virus is age 29</li> <li>- 78% of Kansas deaths from COVID were over the age of 65</li> <li>- age 44 and under account for 2.7% of COVID deaths</li> </ul> <p>Teenagers need to be in school, and participating in sports and activities. The unintended consequences of teenagers not being in school and living life far outweigh the risks of the virus. Every teen I have spoken with HATED online school.</p> <p>Learning is individual, you can learn a definition on your own but education is social. The social aspect of hearing others opinions, stories or situations about how to apply a term, etc is the social part of education. Teens need that face-to-face for education. The three hours per day done last year with online sucked! If families are really worried about, send your kid to an experienced online secondary school. It is not fair to ask face to face teachers, to teach online. Teachers with pre-existing conditions, can learn to teach there. Break the two groups up. Offer one in-person option and one face-to-face option.</p> <p>Sports are also necessary! You must come up with a solution for sports. Kids work too hard in practice and the weight room to not have a voice or contingency plan. Let them sign a waiver and play! THESE YEARS CANNOT BE MADE</p>

This includes: students, teachers, all school staff, bus drives, janitorial/maintenance, coaches and the families of all those listed.</p> <p>Please vote to support the health and well being of Kansas!</p> <p>Thank you, Athena Schumacher-Sutton</p>
7/21/2020 14:20:24	Amy	Slavik		Kensington	Please veto the governor on the delay of starting school and other extracurricular activities. There does not seem to be any concrete evidence to support the eminent danger of having the kids in school regarding the pandemic and many health officials are actually encouraging kids to go back to school. I feel there will be more serious matters to deal with if we don't get our kids back in school. Knowing our governor, this delay is just a way to put off the next delay, and the one after that. Thank you for your consideration on this matter.
7/21/2020 14:20:29	Amber	Mitchell		Lawrence	Wait to open, not safe for kids to wear masks all day, especially the little kids.
7/21/2020 14:20:30	Zachary	Coffman		KANSAS CITY	The numbers and science show that the data the media portrays is a lie. Why do we continue to buy into this lie. Open back up and stop lying about the facts. How are we supposed to stay home when some have to work in order to maintain a life. There is no solution to keep kids home.
7/21/2020 14:20:35	Jeffrey	Walker	Maranatha Christian Ac	Olathe	Please vote to allow schools in Kansas to begin the 2020-2021 academic year as they have planned. The delayed start has negative outcomes for scheduling and completing our academic year. Thank you.
7/21/2020 14:20:39	Heather	Maze	USD 615/USD 415	Hiawatha	I would like to see school held off until after Labor day to insure that educators and schools have time to get things in place for a more successful school year. However, I would not be in support of it being held back any longer than labor day if this should happen again in the future and the governor wants to push us back again!
7/21/2020 14:21:05	Molly	Dickerson	Blue Valley SchoolDistr	Overland Park	I support Governor Kelly's proposal to delay the start of school. I believe this would provide more opportunity for schools, teachers, and students to better prepare for a safe return to school. I believe that a safe return to school is more important than a quick return to school.
7/21/2020 14:21:06	Anne	Erbert	No organization, represe	Hays	We do not support Governor Kelley's recommendation that children K-12 be required to wear masks in school. Research has shown that wearing a mask all days can be detrimental to your health. If such is required, we are very seriously looking to home school our children. Thank for your time and consideration.
7/21/2020 14:21:07	Jeni	Cerre	USD 261	Wichita	I personally am not comfortable as a homeroom teacher returning to school with confirmed COVID cases as high as they currently are. I do not believe it is in the staff or student's best interest to return to an unsafe environment. Working with younger students, my concern is the capabilities to socially distance with typical large class sizes and lack of cleaning supplies. I worry for my students who live with immunocompromised and/or elderly family members. I worry for the health of my own family as well. I hope we return to school in person with as many safety precautions in place as possible for a conducive learning environment.
7/21/2020 14:21:24	Eric	Strueby		Lenexa	I ask that you please VOTE AGAINST the Governor's executive order DELAYING the opening of schools. It is a broadbrush that affects Kansans all the same when specific areas are more than capable of making decisions based on the needs of each district. I fear for the inclass instruction time my children have missed already. Education is vitally important to my childrens', and all childrens', future.
7/21/2020 14:21:36	Glenna	Kaup		Topeka	They have already missed 13 weeks, 1/4 of a school year. When does this end? What keeps the Governor from continually delaying school when she feels the need? The Olathe school district ran a poll that said 90% of the parents chose in person instruction. One of the largest school districts in the state. Your duty is to the education of Kansas students. It's time to get them back in the classroom with no further delays. Thank you.
7/21/2020 14:21:39	Laura	Treeman	Household	Overland Park	Delay opening schools until AT LEAST Labor Day. Thank you.
					Yes in person school should be delayed for now and when it goes back it should not restart at more than 50% capacity (or part time).

7/21/2020 14:21:42	Michele	Garson	Usd 475	Junction city	Delaying school is stupid, if they are giving an online option then there is no reason to delay the start of school. And this has all become political and its ridiculous to require kids to wear masks.
7/21/2020 14:21:43	Dana	Christie	NA	Lawrence	Teachers did not sign up to be put at risk every day. As a parent of elementary age children, I am asking that schools not resume in class, and focus only on distance learning for this coming school year. It puts everyone at risk, especially employees of schools, but ultimately everyone in the community will be at risk if kids are sent back to school too soon. Just as what happened when states reopened too early.
					<p>As the parent of 4 children who all receive special education services I urge you to vote to reopen schools as originally planned, even if it's virtually.</p> <p>2 of my children haven't received a single minute of special education services since schools closed in March. Our school district only gave some SPED kids services. The total IEP hours lost between my 4 kids was 34 hours a week. As a parent when you add into their normal hours of school, it's impossible to achieve because they're just isn't enough time. I'm being expected to fill the role of an OT, SLP, reading specialist, special education teacher and para without any training or help. The regression my children have experienced will take years to recoup. If you don't plan to reopen schools you need to assign a dollar amount of what the state deems fair (we pay \$160 a session for private OT) for lost IEP hours and compensate SPED students accordingly so parents can afford to pay for services lost thru private means or enroll in a school that is open.</p> <p>Six months is plenty of time to come up with a plan and if those in charge couldn't even come up with a virtual option to start the school year with, then they need to be removed from their duties. Allow someone who WANTS to work to come in a fix this. Not even coming up with a virtual plan and just continuing to close schools is no longer an option. Decisions need to be made regardless one way or the other. Make a plan stick to it, quit moving the finish line. Either children go back in person or virtually in August, you all have had PLENTY of time to make a decision.</p> <p>I also think that the timelines for state complaints and due process should be extended past their 1 year/2 year deadline to account for the time schools were shut down without a plan.</p>
7/21/2020 14:21:53	Kelly	Johnson	Eudora 491	Eudora	I'm asking that you follow the Governor's comments on keeping schools closed until after Labor Day. Please keep the safety of the kids in your vote. I've taught in Kansas for 25 years and I'm worried about COVID in the classrooms. Thanks.
7/21/2020 14:21:58	Rob	Colvin	Teacher at USD434 Sch	Carbondale, Ks	
7/21/2020 14:22:08	Casei	Drewek		Manhattan, KS	Please support Governor Kelly's executive order to delay school opening. By delaying school openings we are giving our districts, teachers, staff and students extra time to get comfortable with the new guidelines we must put in place to be safe. Ultimately school should be a place where you feel safe and I just don't believe that opening schools up at the normal start time is a safe and wise choice.
7/21/2020 14:22:09	Kim	Sramek	Maranatha Christian Ac	Lenexa, KS	Please vote to allow KS schools to start on time and in person!

				<p>Regarding the potential schools closure for the upcoming year. I am very disappointed that our Governor has made, what, in my opinion, amounts to a political decision on the health, safety and EDUCATION of our children. We are not California nor are we New York, we don't need Gavin Newsom's or Andrew Cuomo's politics mixed in with Kansas education and values.</p> <p>Every child, from K-12, has lost what will amount to a years, at least, worth of education! LOST! Never to be made up! Every child will literally be one year behind in their education, their life, their everything!</p> <p>People, especially kids, are not dropping like flies. The fatality rate is minimal, very minimal. If this was a pandemic, where 85% of the population was at dire risk, then you have a great idea. But to push the panic button, and cause great harm, is foolish at best. If schools become breeding grounds for the virus, then yeah, close them. But there are NO facts to base such a significantly decision off of.</p> <p>If the schools must close, then the expectation is that in the 21st century, their ought to be some way to make up the lost education. How about the teacher, teaches class from home, open his or her laptop, point the web cam at them self, and when class starts, begin with the lesson. Student can either join the online "meeting" or watch the lecture later off of a You tube channel or some other streaming service.</p> <p>Wow, see how easy that was! So why has this not become a reality? When schools closed in March, classes should have continued just as they had, just like many business did.</p> <p>Even if we traveled back in time 50 years, there would still be ways, to facilitate an education remotely. It may not be great, but even 'really bad' is better than nothing!</p> <p>I am sure that despite not teaching the kids for many months, the teachers have continued to draw their pay checks? If they are not willing to work, why should my tax dollars continue to fund their extended vacation? If the schools are not open and the students are not learning, why are our tax dollars not being refunded to us?</p>
7/21/2020 14:22:10	DOUG	MUIR		Overland Park

7/21/2020 14:23:09	Whitney	Thuma	ENEA	Emporia

7/21/2020 14:23:13	Christi	Parker		Louisburg	No deaths which is important. Very few positive cases. Our city council voted to no mask. We are doing really good for our area and continue. Our children need to return school without a mask. Sports and normality need to return for their mental and emotional stability. The children infection rate is slim to none with very little symptoms if any. We don't do this with flu and we have had more illnesses and deaths in our area. Hoping our kids get to go back to the classroom to learn with normalcy.
7/21/2020 14:23:14	Beth	Luhman	Teacher	Riley	I feel it should be left to the individual school districts. Some schools are remote and small that they can do their usually start time. I feel a lot of schools already have things ordered such hand sanitizers, thermometers. We don't need a whole additional month it isn't 3 weeks it is a month. Then to delay athletics leagues will have adjust their schedules to allow practices before playing. I know volleyball has a game schedule September 1 and 8. They are already conditioning and then to stop for a month defeats their conditioning this summer. I think we should allow the districts to put their own team together to decide what is best for their school not a blanket delay. We need flexibility not restrictions.
7/21/2020 14:23:17	Denise	Busenitz		Peabody	Please reopen schools on time, without masks. The data shows kids are not at risk. 0% death rate of ks kids! I would like my kids to have the opportunity to get back in school. I also do not want them being forced to wear a mask. Masks and kids are anything but sanitary. They are much healthier washing their hands and being taught good hygiene. Thank you for hearing my opinion.
7/21/2020 14:23:19	Melissa	Fager	Oatville Elementary	Derby	I'm in favor of delaying school IF we can get back in the classroom. I am asking for PPE specifically faceshields to be provided for K-3 classrooms at no expense to the teacher. I am also asking that you revisit appropriate class sizes. I had 23 kindergarten students last year. That is was too many to effectively teach let alone maintain social distance. Thank you for all your time and the opportunity to speak.
7/21/2020 14:23:22	Christy	Kelly		Lawrence	Please delay the start of the 2020-2021 school year.
7/21/2020 14:23:49	Nicole	Risley		Lawrence	I emphatically support the delay of school so that districts, schools, and teachers can have adequate time to plan for a safe and effective school term.
7/21/2020 14:23:50	Timothy	Morrell		Beloit	School delay is the right choice
7/21/2020 14:23:58	Michelle	Renner	USD #274	Oakley, KS	I believe the school calendar should be a local school board decision. Every district has their own unique situation and local school boards should be trusted to make those decisions.
7/21/2020 14:24:02	Brianna	Armstrong	Catholic Diocese of Wichita	Wichita	I personally am not comfortable as a classroom teacher returning to school with the Covid 19 numbers as high as they are. School needs to be a safe place for students to be. It is unsafe for students, teachers, and staff. Social distancing in a classroom will be hard to maintain with young students and it will not be conducive learning environment. We need to stay home until numbers go down. It is not worth risking the lives or long term health of our teachers, students, and staff.
7/21/2020 14:24:08	Azure	Winter		Maize	Multitudes of medical professionals, physicians, physician groups, and the American Academy of Pediatrics, across the nation and in the state of Kansas, agree that for the greater well being of our children the benefits of being in the classroom far outweigh the risks associated with potential exposure to COVID-19. Especially in this time of great confusion and fear, our children need stability and predictability and the emotional and psychological support of being amongst their peers socially, in athletics (physical and mental well being), and via resources provided at school. Impoverished children at highest rates and risk for abuses and necessity neglect in the home are also most especially at risk by the decision to delay or cancel classroom learning. There simply is no substitute. Please let us as parents CHOOSE wether we would like our children to be taught in the classroom or online, per individual family, so that ALL voices are heard and respected. Thank you.
7/21/2020 14:24:15	Taylor	Ott		Topeka	I don't particularly agree with the delay in school starting, but I do not agree with mandatory mask for our students. There is a very low risk in children getting this virus and spreading it. The mortality rate is below pandemic levels and there have been other states that have been "accidentally" adding false positives to the official numbers. How do we know Kansas isn't either. But it is not healthy for these kids to wear mask for hours a day. If teacher are worried about getting the virus, then THEY can wear mask or face shields but these children should not be forced to wear mask. We should not project others fears on to these innocent kids. It should be up to parents if their child goes to school and wears mask. Mine, particularly will NOT be wearing a mask at school. He is 10 years old with a health condition and I will not subject him to that abuse. Thank you

7/21/2020 14:24:16	Chambre	Breuer		Ford, KS	<p>I have no argument against delaying the start of school until after Labor Day to not only help schools plan and prepare, but also to monitor the current spread. I believe schools need time for a solid plan to prevent the spread of the disease and also shift to remote learning (if, and as needed).</p> <p>While I support this delay, I do fear further delays unless absolutely necessary. I believe there is also a mental health and safety concern with not starting school.</p> <p>I have two children in school (1st and 3rd grade). My preference would be for them not to wear masks, but support other sanitation and screening efforts. Thank you.</p>
7/21/2020 14:24:39	Linda	Miller	Teacher public school 9	Hiawatha	Please support Governor Kelly's mandate giving educators time to properly prepare in this horrid time of Covid. No other profession except medical has been asked to risk their life to return to a job. I know online education works as this is how all schoolS in Kansas do credit recovery plus if it doesn't then why do you all support full time virtual school in our state that have been in operation for years
7/21/2020 14:24:41	cheryl	kauffman	KCKPS USD 500	Raytown	
7/21/2020 14:24:44	Dec	Siruta	NKESC	Oakley	I think it's ok to wait until after Labor Day but need to think about modifying required hours as kids are so done by middle of May...
7/21/2020 14:25:07	Hallie	Velez	My family	Lawrence	Please push back the start of the school year to allow for community containment of Covid-19 and for school districts to prepare. I support governor Kelly's executive order.
7/21/2020 14:25:21	Timothy	Surface		Hutchinson	please delay the opening 
7/21/2020 14:25:28	Karyn	Hendrix		Scott County	I do not support delayed school openings or masks for school-aged children. This pandemic is not one size fits all and therefore it is my position that county governance should have the final authority to do what is in the best interest of their citizens. I believe, for the most part, county governance, specifically those in western Kansas, will guide their decisions based on the needs of the constituents in their counties and the medical directors, healthcare practitioners, and county health leaders to determine what is best for rural communities.
7/21/2020 14:25:30	Robert	Lundqvist		Lenexa	I respectfully ask that you do not delay the start of school back three weeks. The ruling that our Governor made based on schools needing additional time to get ample Covid-19 supplies is a absurd. While state funded public school may be having an issue, smaller private schools have been able to obtain the necessary equipment as well as produce a back to school plan to minimize infections. Schools have been closed since mid March and if a school or district did nothing during that time to prepare for this then I'm truly sorry. One would ask the question as to what was done since the powers at be knew the start of a new school year was just around the corner. If colleges are allowed to resume with their plan, why are the K-12 schools not allowed to do so? Three weeks is meaningless in the grand scheme of things but the wording /justification used by the governor of Kansas is simply not enough. Please do not cave into the pressure to continue to continue to keep our schools closed and deprive our children of the education they rightfully deserve.
7/21/2020 14:25:36	Lisa	McBride		Baldwin City	
7/21/2020 14:25:39	John	Robison		Lawrence	Virus conditions are not better, and the chances of children catching it are still significant. Please at the very least delay the start of classes, and preferably take a more aggressive tack and either go online only or delay until the spring semester. Thank you for your time.
7/21/2020 14:25:46	Charles	Bailey	Myself	Newton	The Governor should have asked School Board FIRST. School starts on-time..
7/21/2020 14:25:47	Ashlee	Garcia		Kinsley KS	I believe keeping schools closed until after Labor Day is not in the best interest of our children. They need social interaction back after already 5 months of not being in a school setting. I believe not putting our kids back in school is going to hurt them emotionally, and delay them in learning. Not to mention how hard this will be on teachers and staff members. Please, for the good of our kids, open school back up in August. Think of the children that only have school as their "safe place". Let's get back to a normal school setting and just take the extra hygiene precautions needed! Delaying school is not going to make the virus disappear!!
7/21/2020 14:25:51	Tricia	schuler	parent	olathe	Kids need the choice to be in school at school or teachers need furloughed. Olathe did a horrible job with online in the spring.

7/21/2020 14:25:52	Steve	Noll	USD #339	Nortonville	Please allow local schools to set their own starting dates and vote against Governor Kelly's executive order. There will not be any major changes in those 3 weeks with our current situation. Disinfectant wipes will still be hard to come by just like they have been since March. Districts have had time to prepare and some have done that very well. Other districts that have not prepared could use the 3-4 weeks from now until the start of the school year to prepare. But again some won't and will still want time, if a teacher does not think he/she should be in the classroom now they will not feel any different in 3 weeks. Pushing everything back helps no one. We will still be faced with same issues then so please get the year started off as normal as possible by allowing schools to start on time.
7/21/2020 14:25:58	Mandy	Prather	Physicians	Overland park	Delaying school only makes sense if it will change plans for return. The use of masks will be essential either way. There needs to be a hybrid model to reduce number of students in the buildings at one time. If a hybrid plan can be achieved, there would be no reason to delay school start. The number of cases will continue to rise with or without starting school.
7/21/2020 14:26:01	Jill	Owens	single parent	olathe	I ABSOLUTELY 100% SUPPORT GOVERNOR KELLY'S Extremely Difficult, Brave, researched based, and non-political Decision to delay schools till September
7/21/2020 14:26:01	Alisa	Schwindt		Iola	I believe that the local school boards should be able to decide how and when school starts and who should wear masks. We live in a smaller community and I don't believe a one size fits all approach is appropriate for our state. Our children need to go back to school and I believe safety precautions can be put in place for it to be safe for them and the faculty, but that it should be left up to our local school boards. I believe that is what they are for and can better make decisions for their schools based on what is currently going on in their area in order to make sure the students are getting the best education possible. I don't believe this will happen if the one size fits all approach is taken. Please leave it up to the local school boards, public and private.
7/21/2020 14:26:13	Robin	Brown		Wichita	I am begging the board to rely on your state health experts. State legislators are not health experts. The numbers in Sedgwick county are climbing daily. Three weeks could allow for numbers to get under control. Don't use Kansas children as political pawns.
7/21/2020 14:26:14	Lisa	Wendland		Lawrence	As an essential worker and a parent, I support keeping schools closed until after Labor Day. We can make adjustments to our work schedules for the health of our children.
7/21/2020 14:26:23	Renee	Gregory	Parent	Lawrence	I support the office of being of schools after Labor Day. Keep our kids and teachers safe!
7/21/2020 14:26:26	Sally	Hoeven	Olathe School District	Olathe	Thank you for all the time you have put in to working on this very important situation. Kansas is the highest state in the country per capita for coronavirus cases. The number of cases are on an uphill surge. Children can get it and get very sick. Kids can also be asymptomatic and can spread it for several days without knowing they have it. Staff and teachers are at a huge risk for catching it from the kids. Some teachers and staff will die. Kids can also bring the virus home to family members. Kids and staff will need to quarantine for 14 days if exposed. Who will we get to substitute this fall? The substitutes I have spoken to said they won't risk their life to work for a day. How will contact tracing be carried out in the schools? How does the state plan to handle testing for the kids and staff? How will the state supply the proper N95 masks or higher grade for its teachers? I have taught for 16 years in the state of Kansas and I have heard a message loud and clear throughout my elementary and secondary jobs..... number 1 priority is SAFETY. I hope it still is. We should not be returning in person until we have 14 days straight of declining cases. As Dr. Lee Norman said on the press conference today with doctors from KU Med, "Our schools certainly won't be safe until our communities are and at this point they are not. We have to do more to get communities safe and get the numbers down before we can even think that schools would be safe". Please do what's right. Thanks!
7/21/2020 14:26:30	Lexington	Link		Overland Park	Please do not override the order. We don't know how many teachers and student may be at risk and it is very likely that there will be a massive uptick in cases if students are sent back to school too soon.
7/21/2020 14:26:32	Jeanne	Hoduski	Marathon Academy	Bonner Springs	I am writing to request that the school opening not be delayed but to be allowed to open it's doors on schedule. Thank you so much for your work and consideration in this matter.
7/21/2020 14:26:33	Shelly	Whipple	Ingalls USD 477	Kalvesta Ks	Please let our students go back to school with safety precautions implemented. Our school offers a safe place for our students to attend. Our students need to be educated and their social and emotional health needs to be our top priority.
7/21/2020 14:26:48	Becky	O'Keefe	Parent	Lawrence	Please do not send our kids and staff into the school buildings

7/21/2020 14:26:49	Nancy	Lett	USD497	Lawrence	At this time schools are not safe places. Both my kids (8th & 11th) want to be back in school, but not until it's safe, for students and staff. This seems like we are putting the cart before the horse. Safety is not possible given the current conditions. Where are the subs for the health office or main office going to come from? Everyone is focused on teachers, but schools can't operate without proper support staff. When student safety is being discussed by adults via zoom, clearly the powers that be do not feel safe holding in person meetings, clearly they are not looking at the safety of students AND staff if they decide to put children and adults together in small spaces.
7/21/2020 14:26:59	Stacey	Reasoner	Parent	Lawrence	Please consider allowing sports conditioning and other school activities (I.e. Marching Band) that can take place outside with social distancing to continue.
7/21/2020 14:27:00	Kaila	Musinski		Manhattan	Kids and teachers aren't safe. Care about them.
7/21/2020 14:27:01	Maggie	Booton	Blue valley	Leawood	Thank you for delaying the start of in-person school. Research states COVID numbers should be decreasing significantly before we gather in school. In Kansas, the numbers are still on the rise. And the preparations needed for buildings to comply with social distancing and health recommendations will take awhile to adequately complete. The health and well-being of students and teachers must be provided so that learning can occur. Thank you!
7/21/2020 14:27:06	Megan	Taggart	N/A	Overland Park	I really appreciate the delayed start in school this year. I'm a recent college graduate whose sister teaches in Wichita. My sister as well as her husband are teachers at different schools and their son is starting kindergarten this year at another school. As a family we do not feel safe doing much outside the house right now and are trying to limit our exposure as much as possible. It scares us a lot to think of all the germs they will be exposed to and that they could spread to one another and the other people at the respective schools. I know my family is hopeful there will be an option for them to be entirely online if possible, however I know that would be very hard on parents who have to go in to work and would need to find childcare. My personal hope is that online school is available and an option for both students and teachers, however having safe in person classes as a second option. Please attempt to give teachers and students the option to choose how they will do school this next year if possible. No one will be learning at optimal levels if they aren't comfortable in their surroundings. Overall, I am extremely pleased with the work Governor Kelly has done. I admire her commitment to the schools and people of Kansas and that she will not bow to political agendas. She is more concerned about the wellbeing of Kansans than her re-election campaign. This speaks volumes to who she is as a person and I'm so proud to have her as our governor. Thank you for putting people first and politics second.
7/21/2020 14:27:06	Shayna	McAlexander		TOPEKA	I believe school districts and private schools should choose what is best for their constituents.
7/21/2020 14:27:17	Brandon	Perkins		Lawrence	Schools need to be closed until after Labor Day if not longer to keep our children safe. What will happen if a teacher tests positive? Will every student they had a class with then have to quarantine for 14 days? Will substitute teachers be willing to teach in this health environment?
7/21/2020 14:27:21	Stephanie	Strange		Overland Park	Please honor Gov. Kelly's Executive order to delay the opening of schools to provide a safer environment for students, teachers, and all staff.

7/21/2020 14:27:24	Betsy	Bunker	My family in the Spring	Olathe	<p>Please vote NO on the governor’s mandate. I’m worried about the mental health of our teens. The section that concerns me is NOT the part delaying the start date of school. But I am very concerned by this:  “K-12 public and private schools shall not allow attendance, instruction, athletic practice or competition, rehearsal, performance, or other interaction of an instructional manner—  including virtual, online, and any other direct or indirect means of providing instruction—  between faculty/staff and students of public or private K-12 schools from August 10, 2020, through Sept. 8, 2020...”</p> <p>I have a student athlete in high school. He was very sad to miss his track season last spring due to the school closures. Sad and angry. As the lockdown progressed and continued on and on for months, his attitude became worse. Nothing made him smile. As soon as KSHSAA announced that his HS soccer team could begin conditioning, he was a whole new person. He’s excited about school, life, his team, his friends. He comes home from soccer conditioning just beaming! I asked him what happened that was so good, and he said, “I just get to play soccer with my friends.” PLEASE don’t take this away from our kids. I don’t understand why the governor would want to cut off all activity and communication between children and their coaches, even via zoom or email! This is not about virus safety, this is a direct attack on the mental health of students and their families. It’s an attempt to deny students, parents, and teachers to connect. Please do everything in your power to continue sports and activities when school starts. And even before it starts. That’s the reason some of these kids get out of bed in the morning. I’m fortunate that my son is a great student, but he has classmates who probably would not show up to school if it wasn’t for a certain activity or sport they were passionate about. Please protect the mental health of our teens, not just their physical health. Please vote NO.</p>
7/21/2020 14:27:32	Sarah	R	Concerned Parent	Topeka	<p>I write to express my support for Governor Kelly’s Executive Order delaying the start of school for 3 weeks.</p> <p>I have a 6th grader in Topeka who desperately wants to attend school in person this fall. But I don’t know if I can send him in good conscience while case numbers are on the rise. I see more and more people acting now to decrease cases by wearing masks, etc. My hope is that after Labor Day cases will be declining and I will feel confident sending my son to school.</p> <p>I also am not currently confident that my school district is taking enough safety measures to keep my child safe while he is in school. I think the three additional weeks will give me time to ask more questions of my school district and hopefully for the school district to implement more safety measures.</p> <p>In addition, I fear that if school buildings are opened now while numbers are on the rise, it will backfire and kids will end up with remote learning for the entire semester (along with sick kids, families, and teachers). Whereas waiting a few weeks may mean that the kids can safely attend school in person for the majority of the year.</p> <p>I also worry that the current testing delay (it recently took a friend of mine 6 days to get results on a Covid test) may cause chaos in the schools. What is a school district to do with testing delays? Does it close down the school/class while waiting for test results? Or does it wait until the individual gets the results, meanwhile the virus could be spreading throughout the class and school?</p> <p>In the end, nobody is questioning the importance of education and getting children back into school. But that importance must be balanced with the health and safety of school children, their families, teachers, and administrators. If a three week delay can push us closer toward meeting both of those goals, I can see no reason not to support the Governor’s order. Every day more information is coming out about this virus. Just today the US Surgeon General said that the most important factor in opening schools is lowering transmission rates. I desperately hope that by September Kansas has reached that goal and that schools will be able to safely open. But Kansas is not there now and will not be</p>
7/21/2020 14:27:41	Morgan	Bryan	USD320	Wamego	I do not believe we should delay returning to school.

7/21/2020 14:27:45	Marcy	Schooley		Clay Center	Please give administrators and teachers a 3-week opportunity to return our children to school. At the moment, I don't know that they have had time to implement a safe structure for all students and staff.
7/21/2020 14:27:47	Latisha	Wood		Independence	It would be a great thing to delay the school start until after labor day to help families, Teachers and Schools adjust and prepare for the new normal of school
7/21/2020 14:27:53	Kim	Hollinshed	Parent/educational staff	Kansas City	I support pushing back the start of in person school. Where are the guidelines and true safety plans that can be enacted while numbers continue to surge?
7/21/2020 14:27:53	Shawn	Hughes	Parent	Edgerton	Please do not open schools it is not safe.
7/21/2020 14:28:03	Kevin	Nickel		Hesston	I urge the members of the KDSE to support EO 20-58 in order to delay the start of school until after Labor Day. I believe this will give our teachers more time to adequately prepare and the community more time to adapt to the COVID-19 precautions in place (like the mandatory mask mandate). This extra time will hopefully bring cases down and allow for a safer environment for all including teachers, such as the three in my family, and students like my 6th grade daughter and 4th grade son. Thank you!
7/21/2020 14:28:05	Zach	Moser	Olathe Northwest	Lenexa, ks	As a student who goes to ONW, I think it is very necessary that events (like sports) continue to happen. They are very valuable because they contribute to student's mental and physical health. While I think it is a good idea to postpone class for a while longer, sports do not need to be cancelled. We are taking the necessary precautions to keep everyone safe while practicing, and the sports will not affect or further spread coronavirus.
7/21/2020 14:28:21	Jenny	Griffin	Student	Overland Park	As a student, I'm very concerned for myself and other students if we are forced to go back to school so early. I think Laura Kelly's decision to start schools after Labor Day is the right decision as it will ensure more time for preparation for teachers and the staff at schools. Please consider our collective health and well-being over all else. This is the least we can do to make sure more people don't die.
7/21/2020 14:28:22	Cheryl	Welch		Topeka	I watch school aged grandkids and I am more than happy to wait until after Labor Day for them to start school.
7/21/2020 14:28:28	Jessica	Dibble		Lawrence	I think its a great idea to just cancel school and do online. Im not willing to risk my childs life and everyone at school. I don't know why it's even an option to have school.
7/21/2020 14:28:33	Kristel	Stang		Lawrence, KS	Please support delaying the start of school until after Labor Day. Districts need time to review the Navigating Chang document, and time to adjust their plans as cases have risen significantly in our state within the last few weeks. I know some of you view this as a local control issue, but I believe we have a state level school board for situations just like this. You can make a decision that will save districts valuable time that would otherwise be spent on this issue (convening calendar committees, soliciting feedback, going through negotiations, etc.). We need that time to plan how we will deliver effective instruction while keeping our students, staff, and families safe. Thanks for your time and service.
7/21/2020 14:28:36	Nathan	Leseberg	daughter	Olathe	Open the schools in August The isolation is more damaging This has nothing to do with health This a governor wanting power One size does not fit all Small private schools are ready Open the school as originally planned in August If people are afraid, stay home If people are at risk stay home
7/21/2020 14:29:14	Claire	Harding	Eudora Elementary PTO	Eudora	I am 100% in favor of Governor Kelly's Executive Orders issued 7/20. Please vote according to the science of the pandemic. Children, families and our essential school staff will be unnecessarily put at risk if we open too early. The State Board of Education adopted the Navigating Change document because you are aware of the seriousness of getting it right. Reopening schools needs to be done correctly to keep students learning while also keeping our communities safe. The document asks a lot of school districts and they need the extra time Governor Kelly's orders provide. Please, please understand the purpose of the order and set aside petty politics to do right by Kansas families.

7/21/2020 14:29:15	Wendy	Lowmaster	USD 259	Kechi	<p>We are in a new world right now.</p> <p>We all WANT to get physically back to school! There is no way to protect my staff or students if we go back too soon! How many staff and students will have to die before we understand that people's lives are more important than kids being physically in school? Please keep us safe!</p>
7/21/2020 14:29:37	Erin	Atherton		Overland Park	<p>PLEASE follow the governor's executive order and do not reopen schools any earlier than 9/9/20. The districts need more time to make plans as safe as possible and as a state, we need more time to get the number of cases trending down. Especially for the teachers, support staff, and administrators.</p>
7/21/2020 14:29:37	Miriam	Edelman		Manhattan	<p>I strongly recommend following the recommendation of our scientists and public health experts, as Governor Kelly has done, and delaying school openings until it is safer.</p> <p>Children may not get as sick as often with COVID-19, but we are seeing increasing cases of horrible illness in younger and younger people. Children are germ magnets at the best of time, and they do not live in bubbles. Teachers, administrators, staff, bus drivers, everyone working at the school is vulnerable. And children will take those germs home to all their family members.</p> <p>Please stop obsessing only about deaths; we know that recovery from COVID-19 can be devastating as well, sometimes taking weeks and even months, and with possible lifelong consequences. How many children, and adults around them, should have to go through that because we wish everything could magically go back to normal?</p> <p>Schools need time to plan appropriately for this new world. None of us have done this before, and rushing without preparation is a huge mistake—and one that could cost lives. Most schools also need money to buy the necessary PPE, plexiglass barriers, and all the other mechanisms for safety. Schools may need more staff—where a hybrid approach is taken, the same teacher cannot simultaneously teach in person and online, any more than they could be in two different schools at once. Waiting a few weeks to get arrangements in place is critical.</p> <p>I am hearing teachers say they will quit rather than return to a dangerous and poorly planned reopening. I trust scientists, public health experts, and teachers. You should, too.</p> <p>Thank you.</p>
7/21/2020 14:29:38	David	Sturm	Parent	Lawrence	<p>Please support the Governor's executive order for a delayed school start. Sports just aren't as important as the health and well-being of our children. The states that are taking the COVID-19 situation seriously, and acting cautiously, are seeing their infection and death rates decline. Also, what message does it send when school boards aren't willing to meet in public, but they are considering requiring children to return to school in-person. It's time to put individualism aside and be on the right side of history here. I urge you to vote to support the Governor's efforts to ACTUALLY return to school when it's safe for the students and staff to do so.</p>
7/21/2020 14:29:38	Tracy	Shiner	Maranatha Christian Ac	Basehor, Ks	<p>I feel Kansas schools should open the 2020/21 school year on the normally scheduled start date. Parents can then choose what is best for their families and schools can be ready to receive the children that attend and give them the education they deserve &amp; need.</p>

7/21/2020 14:30:06	Katie	Gehrt		Spring Hill	I am a high school teacher and my mom is an elementary school teacher in a neighboring district. Allowing more time for school districts to make safe plans is imperative to a successful school year. My parents live with my grandparents who are both high risk. We are very concerned about the risks involved with returning in person and the time and money needed for school to resume in person in order to make it safe for all stakeholders. Some classrooms in my building do not have adequate ventilation or space to accommodate the recommendations by doctors and scientists regarding social distancing. I love being at work and being with my students. I know this decision is not an easy one for everyone and there are certainly pros and cons to processing with the school calendar as planned vs. delaying OR using online instruction vs in person for first semester. However, teachers are putting themselves at risk with the possibility of returning to school and questions regarding substitutes, sick days, plans for when students/teachers/family members testing positive, etc. have not been fully addressed. If we are required to work in person, will we be compensated for the risks we are undertaking by exposing ourselves? Will we be compensated for taking temperatures or anything related to extra things we will need to do to create a safe environment? We as teachers are very aware of the crucial need for social interaction for our students. The State has already stated masks may not be necessary for students K-6 which may be okay based on the data we have so far about young people and COVID, but it does not protect their teachers or teachers' families. Governor Kelly's proposal would make many teachers more at ease so that our questions can be answered and we can plan accordingly in our personal lives.
7/21/2020 14:30:07	Ben	Chappell	none	Lawrence	Safety for our kids and community comes first. It is completely clear that delaying large gatherings of people will save lives. Kudos to the governor for her leadership. We need robust remote learning with full per-head funding, access and support for kids in need, and social distance until the virus is beaten.
7/21/2020 14:30:09	Mary	Gojcevic	Teacher, mom	Leawood	I truly appreciate the work you have been doing to help us return to school safely. I think the Labor Day start is wise. We have a high number of faculty with pre-existing conditions that puts us at a higher risk along with many teachers with infants. We're in a high school setting, so transmission of COVID from students to teacher is a real possibility. I don't think we can be too careful with guidelines to reopen schools. Thank you for focusing on the safety and well-being of students, staff, and parents and not the politics of the situation. It makes me proud to be a Kansas educator.
7/21/2020 14:30:30	Ana	Vega		Kansas City KS	I will like school open until after Labor Day.
7/21/2020 14:30:36	Teri	Dow		Wamego	Please say yes to delay the start of school! Teachers and staff need more time to prepare and ensure that our students are safe.
7/21/2020 14:30:43	Jessica	Fraley		usd446	Open after Labor day. This will give Teachers and staff more time to prepare for all of the changes.
7/21/2020 14:31:04	Anthony	Carpenter	N/A	Manhattan	Please open schools. Children need school.. do masks work or not? Have the wear masks if that's what it takes.. fact is, thousands of kids have been in daycares this entire "pandemic" and have had zero issues, why can we not have K-12 schools open?.. if a gas station attendant is deemed essential, then a teacher definitely is as well. OPEN SCHOOLS PLEASE.
7/21/2020 14:31:15	Linda	Hoopes		Lawrence	I agree with delaying the start of the school year until after labor day. Anything sooner is a disastrous decision.
7/21/2020 14:31:18	Michael	Ritter	Shawnee Mission School	Leawood	Please delay the start of school until we are actually able to effectively manage testing, contact tracing, and human needs around Coronavirus. We are in no way prepared to deal with this on the level required to effectively manage it. Leadership has and continues to be short-sighted in combating the continued spread. To put our educators and potentially students in harm's way is despicable. I want my kids gone as much as the next person, but not at the sake of my community's well-being.
7/21/2020 14:31:19	Paige	Pate	High school educator in	Joplin	I feel the delayed start is totally acceptable and a great idea to make sure we have a plan in place, based on science, not politics, and have time to create a classroom that is safe and efficient with new policies we are expected to implement. Also to make sure we don't rush into it and have regrets when the cases are still increasing

7/21/2020 14:31:20	Annie	Brock		Holton	There is virtually no way to open schools and keep everyone safe. There is so much contact between students and teachers each day it would be, at minimum, a huge burden to do contact tracing if an infected person comes to school, if not impossible. I know it is difficult for families with young children right now. I myself have a 7 and 9 year old. I want them to get back to school, but not at the cost of their friends' and teachers' health. School isn't like retail work or restaurant service — it is close, prolonged contact day in and day out with children who may or may not be physically and cognitively able to socially distance or wear PPE properly. Let's reevaluate in September, which gives us time to hopefully see COVID numbers in Kansas to go back down and give schools time to make a plan, procure equipment and train staff.
7/21/2020 14:31:21	Kelsea	Cadwell	Olathe School District	Olathe, Kansas	I strongly disagree! The deaths are down. Our kids need to be in school. Make it safe, wear masks, allow those who want to stay home stay home! But let kids who want and need to go back- go to school!!! How can we possibly keep kids from their education. Our schools are essential. It's not from an economy stand point. It's from a mental and social stand point for our kids!!!
7/21/2020 14:31:32	Sara	Pueo	USD 259	Andale	Please DELAY the start of school so we can better prepare and follow the health guidelines to protect our students.
7/21/2020 14:31:37	Laura	Porter		Olathe	I support a post Labor Day start for KS!
7/21/2020 14:31:41	Richie	McDanel	None	Topeka	I support the decision to delay the start of the school year.  I have seen no evidence that school districts currently have the resources needed to keep students safe during in class instruction.
7/21/2020 14:31:42	Wendy	Fisherq	Parent Maranatha Christ	Lenexa	We must get our children back in school. Virtual is not as healthy for our children. I am tired of them being on electronics they need to socialize with property covid restrictions. If people can go to nail salons and travel on airplanes kids can go to school. Please don't make the mistake of keeping kids home.
7/21/2020 14:31:44	Tammy	Johnson		McPherson	Please keep schools closed until at least after Labor Day. Remote learning would be best after that until our numbers stop climbing.
7/21/2020 14:31:46	Erin	Tuttle		Emporia	Governer Kelly is doing her best to keep us safe. You need to do the same. Delay openings and prepare to be able to move online when cases grow
7/21/2020 14:31:46	Ester	Carpenter	USD-384 parent	Manhattan, KS	Please do not delay school opening. Let those who want to have a home school plan choose it. There is no be benefit to the delay. Why would we allow daycare open but not schools? If it was truly a threat we would have closed them as well. Let's make decisions off facts not politics.
7/21/2020 14:31:50	Susan	Liles	Parent of a student	Denison, KS	Please allow the schools to open back up in August at least online. The students need to get back to a routine and have missed out on so much learning. Use these few weeks in August as a time to review where they left off, get them accustomed to their new teachers and students in the class, get them prepared to hit the ground running when they may possibility get back in the buildings. The online teaching definitely needs to be more of a live stream so the student feels more like a part of the class.
7/21/2020 14:31:58	Kari	Neilson	Mother of elementary st	Stockton	I think the kids need to go back to school. They need to be able to be around people again. They need to socialize and get back to a structured aystem.
7/21/2020 14:31:58	Barron	Stringfellow	My Grandchildren	Hiawatha	Keep schools online until we have a vaccine and answers.
7/21/2020 14:32:00	Haley	Wilson		Manhattan, KS	I am 100% opposed to delaying the start of school. Our kids have waited long enough, and delaying is only going to push us closer to winter weather and flu season. Why give up 2+ weeks of good instruction time? The mask mandate for young children (mine will be in 1st and 3rd grades) is ridiculous, counterproductive, delusional (that they'll properly wear the thing)...
7/21/2020 14:32:11	Melinda	Goertz	USD 361	Anthony	I will support the decision of the State BOE
7/21/2020 14:32:12	Paul	Moore		Olathe	I want the state school board to follow the Governor's recommendation on delaying the start of the school year. Districts need more time to prepare with the cases going up. It seems like common sense considering the board won't meet in person due to the risk. If it is not safe for the board of adults to all meet in person then why are we risking our kids and teachers?
7/21/2020 14:32:17	Charlotte	Fathi		Manhattan	The governor had made the right moves regarding reopening schools. It is in the best interest of our children's health and safety to delay the opening of schools.

7/21/2020 14:32:18	Erin	Wohletz	USD444 Teacher & Parent	Little River	Our students & teachers need to return to normalcy...let's start school, in person & on time. Encourage good hygiene (washing hands) and DO NOT REQUIRE MASKS! Covid has been no worse than influenza which hits schools EVERY YEAR!
7/21/2020 14:32:22	Taunya	Schlessiger	Teachers	Ellinwood	Whether we start before or after Labor Day is not important. That effects us minimally here, we start usually a week before Labor Day. What my concerns are with on-line teaching is the amount of kids that fall behind and do not participate, the lack of proper technology and supplies to ALL students, and the struggles parents have at home with it. As well as added and extra pressure put on teachers, principals, and administration. I understand this is new to all of us and adapting is a fundamental practice that teachers have long ago accepted. There will already be a huge "catch up gap" from last year to starting this year. I hope we can be in the classroom and doing what is best for students. I'm for students thriving.
7/21/2020 14:32:30	Susan	Wolfe		Valley Center	I support the Governor's order to delay the start of school until September. As a teacher, I fear going back to the germ factory that is my fourth grade classroom! Going back to school in August will make that germ factory a COVID factory in no time. I encourage you to support Governor Kelly's order.
7/21/2020 14:32:31	Kami	Mcdonald		Garden city	Masks are not the answer. The health repercussions of constantly breathing in your toxins and reducing your immune system scares me far more than the Covid virus.
7/21/2020 14:32:31	Darrell	Lea	self	Lawrence	We need to do what is safest for students, teachers, families and all support staff involved in the operation of the schools. This pandemic and related disease is not under control. Until conditions are safe and the spread of disease is in check, school buildings should not be opened and schooling should happen at a safe distance. We are in the middle of a Public Health Emergency. We need to act and reason accordingly.
7/21/2020 14:32:41	Julie	Vandal		Wichita	I'm comfortable with delaying the start of school. I am not comfortable with the requirement of Elementary school children to wear masks all day. The teacher will spend more time policing the masks than teaching with younger children. I agree with using them in hallways but should not be mandatory in the classroom.
7/21/2020 14:32:43	Lydia	Mendez	Parent of student	Lawrence	Pls support the governors order. I have no confidence in the local admin willingness to make the decision themselves. Our cases are on the rise and we do not know the IMO they of KU starting.
7/21/2020 14:32:44	Sue	Groth	Kansas teachers	Dodge City	I think children need to be educated and being physically in school is the best way to accomplish this. Schools across the state are different and should have some flexibility to how best to keep their clientele safe. Giving each district time to accomplish this seems logical so starting after Labor Day seem logical. However, any further delays down the road doesn't seem to be the best way to go.
7/21/2020 14:32:46	Heather	Murphy	concerned citizen	Sabetha	Please keep the schools closed until after labor day. Give administration and staff the extra time to plan and make things as safe as possible.
7/21/2020 14:32:47	Rebecca	Ivery		Shawnee, KS	Vote no... keep decision with our local BOE
7/21/2020 14:32:48	Angie	DalBello	USD232	Prairie Village	Delaying the start of the school year until after Labor Day is the SMART and SAFE thing to do. The health of students and faculty at schools IS NOT worth the risk of starting schools in Kansas too early. Covid cases are increasing in Kansas, we should not be putting large numbers of people together in indoor spaces. Use science to guide decision making about when and how to open Kansas schools.
7/21/2020 14:33:11	Paula	Thompson		Hesston	Kids need to get back to school in August.
7/21/2020 14:33:13	Erica	Smith		Harper	I am for allowing individual districts to decide on when school should start and how they choose go return depending on their Covid presence in their communities.
7/21/2020 14:33:15	Megan	Pfannenstiel		Hays	Concerned more about the isolation that children have been living in since March. Concerned about child care costs and lack of childcare for working parents. My child misses his school, friends, and learning environment. We need to weigh what is worse, illnesses or the mental toll this is taking on children, parents, school employees, and our community.
7/21/2020 14:33:18	Jonathan	Fisher	Parent Maranatha Christ	Lenexa	Do the right thing and allow kids to go back to school. Parents need to be able to work again. Kids need to socialize and get away from technology, get away from bad environments and getting into trouble. Our numbers are much lower than other states who are already planning to open! DO THE RIGHT THING PLEASE LET US GO BACK TO SCHOOL>
7/21/2020 14:33:29	Terri	McNally	Hiawatha usd 415	Morrill	I would prefer that each school district should be able to decide on their own when they would prefer to start their school year. I feel that 2 or 3 week delay wouldn't matter as to when to start school.

7/21/2020 14:33:29	Nancy	Levine	USD 453	Leavenworth	I support Gov Kelly's decision to delay the beginning of the school year. Thank you for considering the health of students and staff.
7/21/2020 14:33:34	Angela	Durland		Spring Hill	Please vote yes on Executive Order 20-58. I do not feel like our district is ready to safely start school in person in August. They need the extra time to put more safety plans in place not only for students, but for the Teachers and staff. They also need more time to prepare a sufficient online option. I want my daughter in school, but I don't feel like it is safe. I cannot choose the online option being offered because it does not seem like our district has put any effort into this option.
7/21/2020 14:33:36	Jennifer	Stoskopf	USD 233	OLATHE	Please uphold delay of school to lower the spread before coming back to buildings.
7/21/2020 14:33:44	Kyle	Nelson	Auburn Washburn school	Topeka	As a teacher, it feels comforting to know that the governor is willing to protect schools and students, even when that means she got a lot of political attacks for it. It doesn't feel like many leaders care much about the health and safety of teachers. Please vote to postpone until after Labor Day. I don't mind teaching into June.
7/21/2020 14:33:47	Karen	Arbo		Olathe	Open the schools. Since they lost three months last school year the schools shook open on time and be extended For an additional 3 months to get kids back to where they need to be. ACTs and SATs are a fat of life and they need to be prepared.
7/21/2020 14:33:52	Audra	Seeman		Larned	Kids and teachers can be safe there are guidelines. Open the schools, extend the school year. Educate the kids.
7/21/2020 14:33:53	Jennifer	Freestone		Olathe	Kids need to start school, sooner than later. Masks are fine, but please send them back!
7/21/2020 14:33:55	Amanda	Hendry	USD 253	Emporia	Please delay the start of the school year for the safety of all. As an educator and mother, I'm concerned about rushing into reopening without the proper protective equipment and supplies. These few weeks will allow for more comprehensive planning and preparation. I hope we're able to sacrifice this very short amount of time; if not, we may be sacrificing lifetimes instead.
7/21/2020 14:34:03	Ashley	Barton	Myself	Lawrence	This is about science and it is not safe or wise to cram all of our children and teachers back into school buildings! PLEASE follow our governor's direction!
7/21/2020 14:34:03	Crystal	Fortin	Maranatha Christian Ac	Liberty	I feel the delay is very beneficial
7/21/2020 14:34:04	Kurt	Hudson		Healy Ks	Please allow school to resume as usual in August. Our school has gone above and beyond with cleaning and preparing a plan for school to start in August. The students and teachers need to get back to teaching and learning. Thank you.
7/21/2020 14:34:04	Kurt	Hudson		Healy Ks	As a father of 3 school age children ranging from kindergarten to a senior. We will be doing more damage to the children of our state if we don't get back to as normal life as they know it. There are kids in this state that school is the only thing close to safe and normal life they have ever known. We have to also look at what these kids have put into activities that they participate in. What are they going to miss out on? Scholarships? The commroderity amongst the kids and how hard they have worked is something we need to look at. We need to get busy living and not so worried of the alternative! The kids in our state are not a political pawn and we should look at the damage that can happen if we don't get these kids back to school and activities as possible! In 5 months the epidemic has not gone away and it won't anytime soon. There are kids that need school and without it is worse that any virus. Please look at the big picture and get these kids back to school and the sports and activities that they have worked so hard to get.  Thank you for all your time and patience.
7/21/2020 14:34:10	Marin	Massa	my family	Lawrence, KS (rural resi	Kurt Hudson
7/21/2020 14:34:13	Nicole	Williams		ManhattanKansas	Please follow guidelines offered by epidemiologists and other scientists for the safe opening of schools; allow communities a chance to decrease positive COVID cases, and then have 14 days without a positive case in the county. Schools were struggling before the shut down with retaining enough teachers and substitutes, large class sizes, and digital equality in their communities. Opening without proper safety guidelines and overall good community health will threaten/sicken teachers and staff, not to mention students and their families. This will cause the closure of schools and yet another disruption to our children's school year. Please use common sense and science to help make decisions.
					I'd rather have it safer to send my children back to school than starting in August.

7/21/2020 14:34:14	Christina	Riley		McPherson County	I do NOT support the delay in the start of the academic year.
7/21/2020 14:34:15	Amanda	Araujo	Soderstrom Elementary	Lindsborg	I agree with Governor Kelly postponing school start date. No one was prepared for COVID to get worse. We need to make smart, thought out choices to make our kids safe and Provide a productive learning environment.
7/21/2020 14:34:15	Jennifer	McAllister		El Dorado	Delay the opening. We r grandparents w health issues and do not want the kids to bring home additional illness
7/21/2020 14:34:16	Kristina	Girkin		Lawrence	We need at least a blended online with limited in person student ratio. Doing nothing is only sacrificing the health and safety of students and staff. Do not open until you have a valid and safe solution
7/21/2020 14:34:32	Stefanny	Aquino		Kansas City KS	I will like you to open school after Labor Day for the safety of every teacher and students.
7/21/2020 14:34:40	Jima	Peterson	Olathe School District p	Olathe	Please uphold the mandates put forth by our governor to keep our children, teachers, and school staff safe. We as a community put our faith in you to make a decision that puts politics aside and keeps our health a number one priority. Online or hybrid schooling is the only fall option that makes sense right now. I appreciate how hard of a job you have right now and have faith you will make the right decision for our children, teachers and community.
7/21/2020 14:34:55	Troy	Anderson	Parent	Lawrence KS	Let the kids play sports and go to school. It is possible with appropriate risk management, masks, sanitation, hand washing, etc. I am considered an "essential" worker and have been managing the risk for 5 MONTHS!
7/21/2020 14:35:07	Rebecca	Bowles	Countryside UMC	Lawrence	Please delay the School year. We need to keep our kids, teachers and school staff safe. We need more action take to keep everyone safe. Kansas can not loose more teachers. We already have a shortage.
7/21/2020 14:35:13	Kirsten	Nelson	Former 501 teacher	Topeka	It is not safe for my husband and son to go to in person school yet. I have multiple preexisting conditions that make it dangerous for my husband to infect me from working. I have liver disease, and my biggest personal priority is not worsening that. We have been wearing masks and only going to the store once a week. We do not eat out. We are doing our part. We were grateful schools were online in the spring, although my husband worked harder than he ever has to teach remotely. Please keep schools closed until after Labor Day to give time for the cases to go down.
7/21/2020 14:35:15	Leah	Green	Private school	Emporia	I am for delaying the school year until Labor Day. I am against masks for children 10 and under.
7/21/2020 14:35:19	Haley	Lemman	My family	Manhattan	Please don't take away our children's opportunities to be children. They're mental health is just as important as everyone's physical health, and yet it is harder to treat.
7/21/2020 14:35:21	Natalie	Robbins	Maranatha Christian Ac	Lake Quivira/Shawnee K	I believe that as a private school (not funded by the state of KS) the Maranatha Christian Academy leadership team should be able to decide if they would like to start the new school year in August 2020 as planned. I support their decision to get our kids back in school sooner than later. I strongly believe that the risk of delaying school openings (particularly canceling in person school) far outweighs the risk of sending them to school in person. Thank you.
7/21/2020 14:35:23	Don	Caywood		Maize	I support Government Kelly's decision to delay start of schools.
7/21/2020 14:35:43	Jenna	Myers	Circle Benton Elementar	Benton, Ks	Please, hear my plea! As a mother of a special needs child, I need my son in school. With the closing of school last March until now, I feel he has regressed. I am an nurse - an essential employee and I do no feel I can do an adequate job of teaching him properly. Our kids need to get back to school. Please consider challenging Governor Kelly!
7/21/2020 14:35:54	Erica	Howe		Johnson county	Please delay k-12 school opening until after Labor Day.
7/21/2020 14:36:08	Cade	Leeper	USD 300	Wilmore	Please let our local schools be in charge of the upcoming 2020 school year. Each district will know how their community is handling COVID 19 better than the Governor.
7/21/2020 14:36:16	Patty	Mullen	Parent	Oberland Park	My daughter needs active schedule at school to maintain her mental health.
7/21/2020 14:36:23	Tina	Tucker	Emerald City Gymnastic	Leavenworth	The delay in school will not change anything, except delay all our lives for your convenience or your own political agendas. All employees in the essential jobs for the last several months took extra precautions within their own family and lives to stay safe, this all that needs to be addressed and how important that will be for school teachers and workers for all kids to get back to school. As reported, children are not a high risk of this illness and hospitalization, therefore, if you are worried of adult age, then set guidelines for them. Ask all the daycare and camps that have been in session for the past 5 months, how many of these kids are sick??? Please do your homework on our real kids, not just a piece of paper.
7/21/2020 14:36:25	Dave	Woodward	Hesston Schools	Hesston	I'm against delaying school, as well as sports. And if you need to delay it, then move all of Inservice days to the front of the year. Allow for sports and activities to begin. Allow for face shields to be used in place of face masks.

7/21/2020 14:36:28	Deb	Cohoon	Grandma to six school	Kingman	I believe schools that offer in person instruction are essential. The sooner , the better. Day cares are open and that has been “justified” to assist essential/in person workers- Walmart, Home Depot and medical providers. And teachers aren’t essential? We continue to perpetuate shaming, divisive pandering and hostile comments on social media. Shame on us Adults. We are bullying and refusing to participate in common sense discussion. It is either “my way or you are stupid”. I challenge you as elected officials to do a gut check. We are not immortal, kids and adults do get sick and some die sooner than we would like. We cannot continue to live under this umbrella of fear and “what if’s“ or we will drown in self doubt. Trust that your schools and students will do their best to diminish the threat of this virus and perhaps all will have a deeper appreciation of our educational freedoms and each other.
7/21/2020 14:36:46	Amy M	Altwegg	my family	Abilene	Don't make this political Please delay the start of our schools
7/21/2020 14:37:10	Sydney	Carnes		Pittsburg	Please delay the start of school. As a teacher, I am terrified to go back to school and risk getting myself or my family sick. These extra weeks could help us better prepare. There’s so little time to the initial start of school right now and with so much still undecided, it would be very beneficial to have these extra weeks to prepare and be able to plan what would be best for my students. Please do not vote solely on political lines and make the best decision for the teachers and students who will be working in close proximity.
7/21/2020 14:37:10	Carmen	Clark		Hutchinson	I do not believe a blanket mandate is what’s best for our state. Schools need to be able to make decisions at a local level as what is best for their communities and children. There is a huge difference in how a 6A school in Wichita or KC function vs a small 1A rural district. I do not believe elementary children should be expected to wear masks all day. Children aren’t not going to wear them properly making them completely ineffective. Let local schools make these decisions based on the guidelines from the BOE and local county health officials.
7/21/2020 14:37:13	Mello	Manley	Lawrence	Lawrence	Please uphold the EO and do not pass the buck to local boards. Covid is increasing in many areas of our state. A new study that came out today shows children do pass and contract this horrible disease. I implore you to do right by protecting our children and families! Teachers cannot teach from their graves.
7/21/2020 14:37:20	Sarah	Karns		Topeka	Hello, first of all, thank you for much contemplation and dedicated work toward achieving the best possible solution for Kansas. Second of all, my deep and strong plea is to altogether stop this from being political. The health of Kansans is at stake here so please stop making this political. I ask that considerations be made based on guidance from health professionals, school teachers and administrators, and families. Please bring different voices to the table, do not look to your own opinions for a decision. Please consider child development as you weigh pros and cons with the risks you're deeming necessary to take or not take. Please consider the wellbeing of teachers and student guardians. Ask yourselves if starting school in the traditional sense is worth the burden put on school staff and families effected by default. Individuals will contract COVID-19 if/when you decide to open schools. That being true, please consider what is worth it given the fact this will happen. Is it worth it to burden teachers, administrators, and families with starting school to then ultimately and abruptly close school when a teacher or student contracts the virus before exposing many individuals. It was difficult for students, teachers, and families to transition from spring break to online learning in March. Please imagine how emotionally taxing (not to mention the logistics of it) it will be to send students and teachers back to school to ultimately send them home once a school affiliate contracts COVID-19. Additionally, in urban areas especially, many students live with their grandparents. Those living in poverty (who are likely also living in multi-generational households) are already more deeply affected by the virus and are more likely to have preexisting health concerns. When a student contracts the virus at school the could very well be spreading it to not only school affiliates but also to their guardians who are well over the age of 65 and have chronic illness. I, personally, live with my sister who is an educator. Our brother is also an educator. Should school begin as originally planned, I will be the sole caretaker for our parents who are over 70 and sometimes require emergency care. I will have to move out of my home in order to be apart from my family working in the school system who could no longer care for our parents while they are exposed to the virus at work. Truly, personal story aside, taking the public health viewpoint informs what the decision should be. Please do the right thing. Please be kind and have compassion for all Kansans. To those who are considering the economy before human lives, please stop. The economy will grow stronger faster if we get rid of COVID faster and we can only do that if you make the right decision in keeping students and school staff home awhile longer. Thank you.

7/21/2020 14:37:23	Karen	Reedy	Concordia Elementary	Concordia, KS	<p>Good Afternoon,</p> <p>I know that there are many difficult decisions that need to be made regarding the safety and education of the children of Kansas. I have been an educator for 17 years, in rural schools. However, I grew up in Dodge City, (one of the major hot spots in Kansas this summer) and I realize that there is some real concern over this virus. I don't envy anyone making these decisions for our state. With that said, I don't believe that delaying school openings is in the best interest of ALL of the students in Kansas. I understand the fear of sending students back to school. I worry about my own children, three of which will be attending public schools this year. What I have seen in our own small community has been very positive for reopening our schools. We have Summer Programs that have operated without spreading the virus. Granted, our summer sports programs included students who tested positive for the virus, but we were able to stop the spread of it and contain it to a few individuals. My youngest also attends the Community College Children's Center, and the procedures there have been effective as well. Yes, school will look different this fall. Yes, I worry about the virus affecting my family and my community. However, my community is not the same as Dodge City, Wichita, Topeka or Kansas City. In education we believe that what's best for one child may not be best for all children. We were taught not to treat all children the same because they are individuals coming from individual situations. The same is true of our schools. What's best for the city is not what's best for our rural communities, so shouldn't the local communities be making the decisions that's best for them? I ask you to consider the fact that we as communities have elected leaders that know our situation much better than the people of Topeka ever could. We need to trust them to make the decisions that's best for our students. Please vote NO to Executive Order 20-58.</p> <p>Respectfully Karen Reedy</p>
7/21/2020 14:37:30	Andrea	Passantino		Overland Park	<p>I really believe schools need to open. I know we are in unchartered waters, but we cannot shelter in place and hope this passes. It may be here to stay. In the meantime, children need some semblance of normalcy. They need peers, teachers, and school. I know there is no easy decision but many local pediatricians are saying the same thing. They are not the most at-risk group. Their mental health is also at stake. Allow parents a choice, but I firmly believe nothing will replace brick and mortar education.</p>
7/21/2020 14:37:30	Nadine	Bennetts	Teachers	Olathe	<p>These are unusual times, and COVID-19 is a dangerous virus - and as a community, (Kansas), we all need to do our part to provide for the safety of one another. Our state is currently experiencing a spike, much higher than the one we had in mid-March. Bringing our students back together in August would be the traditional thing to do, but as mentioned above, these are unusual times, and bringing students, too soon to school will cause more harm to our community (Kansas), and have a negative effect on students' ability to learn due to distractions and worries about the virus, and possibly spreading it to family and friends. Time can be our ally, along with mask wearing, to stem COVID. Let's do the necessary things to help our community. Please follow the guidance provided by qualified medical professional and scientists, which Governor Kelly has been doing to help keep the citizens of Kansas safe. School districts and teachers can adapt this year's schedule. Please leave politics out of your decision. Thank you!</p>
7/21/2020 14:37:37	Trinity	Coots	Para at Lincoln central	Independence	<p>I feel it is okay to go to school! With Paras I believe they should have an assigned area and only work with specific grade so they are not floating and spreading to other grades! I don't mind wearing masks...but it would be uncomfortable at recess duty</p>
7/21/2020 14:37:43	Janet	Roecker	I'm a parent	Lawrence	<p>I fully support delaying the opening of school until after labor day. I would also support online learning for the first semester to ensure health and safety of students, teachers and staff.</p>
7/21/2020 14:37:46	Angela	Knigh	Maranatha Christian Ac	Shawnee	<p>Please do not delay school opening. Kids have been out of school long enough! They need a full education.</p>
7/21/2020 14:37:57	Diane	Williams	Grandparents	Salina	<p>I support Governor Kelly's decision</p>
7/21/2020 14:38:00	Paula	Burgett	parent	Goddard	<p>I support the governor's decision to delay the start of the school year.</p>
7/21/2020 14:38:06	Natalie	Yoza	Parent, tax payer, Kansa	Lawrence	<p>I urge you to vote that the EO is in the students best interests and adopt the necessary resolution. If Covid is not fought through social distancing, masks, and this delay to the school year, it will continue taking the lives of Kansans and hamstringing our economy.</p>

7/21/2020 14:38:16	Madison	Stratton	USD361 Anthony Elem	Anthony	I'm hoping that the executive decision to postpone schooling for all districts is something that is mandated. We need to take into consideration staff, and staff's family members. This is just too great of an unknown for schools to be opening on time.
7/21/2020 14:38:19	Christy	Levering	Classical school of wich	Please open school in A	Kids need to go back for mental health and well-being
7/21/2020 14:38:24	Kristi	Guthmiller		St. Francis	I believe this decision should be left to each individual school district and the families involved. NW Kansas is not the same as a big city. We have had the fewest cases in the state and all of them recovered (Since April in CN County). I know that this question addresses the start date of school, but I would also like to address the wearing of masks. I again think this should be decided by the individual school districts and the families themselves. I don't believe our government has the right to take those decisions away from us. Have you looked at the State of South Dakota, their governor trusts their citizens to make the right choice, and they have - voluntarily. Maybe Kansas should do the same.
7/21/2020 14:38:31	Connie	Stoker		Lawrence	I support a delay to the start of the 2020 school Year. I have a grandson in kindergarten and I would appreciate the administration and teachers have extra time to plan. It will not do parents or communities to start before adequate planning is in place that results in stopping schools again. Just think of how disruptive that will be for our children. Please plan adequately the first time!
7/21/2020 14:38:33	Christina	Kirkpatrick	USD109	Belleville	I truly believe schools need to start asap. Our kids NEED to get back to some sense of normalcy and with the percentage rate of kids getting infected, There is NO REASON to keep them out.
7/21/2020 14:38:39	Maria	Tacoa	self/ USD 204	Shawnee	I am a lifelong k-12 teacher, and as such am a MANDATED REPORTER. At this point, we have seen a spike in the corona curve and a shortage of tests/sanitizer/PPE. I will have 27 students/class (5 classes rotating) in a room without external circulation/windows, and without space for social distancing.  This is NOT SAFE for my students, their families, the staff at my school, or myself. I am happy to teach outside, online, or in a situation in which you can guarantee our safety. We are not a political pawn. These are human lives.
7/21/2020 14:38:42	Jalynn	Nomte	Usd 443 and USD 613	Dodge City	Please delay school opening until after Labor Day. We already have had people Involved in school that have tested positive for Covid this summer...as recently as this week. In the past, I have seen parents send their children to school even though they were sick. We have teachers who fall in the category of being at risk for Covid and with the numbers showing an increase for Covid, I am concerned. I encourage you not to make your decision based on politics but based on the health and welfare of Kansas families.
7/21/2020 14:38:47	Linda	Augustine	Im a grandmother that ta	Salina	Please delay the starting date
7/21/2020 14:38:59	Sharon	Jelinek	USD 428	Great Bend	I would like to see the after Labor Day start date so we have plenty of time to plan and truly prepare.
7/21/2020 14:39:00	Julia	Heimsoth	Parent of 3 children enr	Olathe	I support the order delaying the start of school until after Labor Day.
7/21/2020 14:39:03	Jack	Low	The Low Family	Lawrence/Eudora	The delay should be supported to allow schools to better prepare. Three weeks is time to help prepare and doesn't hurt students
7/21/2020 14:39:07	Kelsey	Chadd	Teacher kckps	Overland Park	We should wait until after Labor Day. Allowing for staff to prepare and the districts to be able to access and create plans that are safe for both staff and students.
7/21/2020 14:39:15	Jerri	Ehrlich	Home	Manter	We are fine with starting school after Labor Day. We are not fine with taking away sports or in class learning for students.

7/21/2020 14:39:25	Seth	Dills		Manhattan	Thank you for taking all of these comments into consideration and for trying to make the best choice in a difficult situation. I urge you to maintain the importance of public safety as the number one priority for students, teachers, administrators, staff, and their families. However, I also encourage you to consider the diverse experiences happening around our state. If there is a way to ensure that this decision is taken county-by-county based on active cases with special regard for the individualized needs of school districts and counties, that should be the first decision. I feel that it would be appropriate to waive the minute requirement for face-to-face time if we force the start of school to be moved back and find ways to continue to support schools through this and to avoid adding extra stress to schools. For instance, in hot spots it would be appropriate to not allow in person classes to resume but in counties with no active cases, modified schedules or extra precautions may be more appropriate. I trust that whatever decision you make will be in the best interest for everyone's health, even though many may not agree. In my area (Riley County), I support the delay of school, due to rising cases and especially the return of KSU students to Manhattan. I also support the reduction of minutes and emphasis on grade bands/ standards based work to reduce the minutes requirements so that districts do not have to completely re-work their calendars.
7/21/2020 14:39:27	Caroline	Eddinger		LAWRENCE	No. This is not acceptable. Especially if we end up with online learning. The kids' education is important. My daughter enjoys learning and is going into her senior year. Americans are already uneducated enough. Don't make us find a private school in Kansas City, which is what we are currently exploring.
7/21/2020 14:39:32	Virginia	Cutrell	None	Admire	The 3 week delay may (and I emphasize may) allow schools to stay open. Schools need to have time to prepare. Ideally, we should be following the plan the KC schools, starting fully online and transitioning to partial F2F as the Covid numbers drop.
7/21/2020 14:39:36	Dawn	Wilcox	Maranatha Academy	Shawnee	I ask that you allow local school districts to determine whether or not they are ready to begin on time. School districts who can put the required mitigations in place by their original start dates should be allowed to do so. School districts in Kansas do not all begin with the same start date normally.
7/21/2020 14:39:38	Deann	Steinle	Parent of kids in public	Lawrence	School should be delayed until it is safe to return for all.
7/21/2020 14:39:49	Brittney	Garner	Special education teacher	Overland park	Delay school and plan for online learning
7/21/2020 14:39:56	Christina	Brandenburg	USD 232- school nurse	Olathe KS	If we are to temp check students each classroom teacher will need a touch less thermometer. In buildings with 500 people in them it's not a realistic expectation that one single person be in charge of that process.  Also, parents pre treat temps prior to arrival at school regularly, taking them after lunch and Prior to dismissal would yield more accurate results.
7/21/2020 14:40:05	Ashley	Carlgren	Carlgregn Family	Norway	I have been a teacher for 22 years. My entire family tested positive for covid-19 June 23rd. My 3 children will all be in high school next year. My kids bounced back & I am the one that suffered the most from the virus. My kids need to be in school. Online school did not meet their needs but was better than nothing. I feel as if they are being cheated. No education, no sports & no jobs. They work hard & are very active in their community & school. They are very aware that they may get the CORONAVIRUS again but are willing to take that chance to live their lives. Mask up & let's get school started.
7/21/2020 14:40:16	Mary	Fleming	Parent/caregiver	Junction city	I like that school will be delayed until September when I went to school we never started school before labor day but our kids need to be back to school after that they need the structured teaching of the teachers when you have a child with special needs
7/21/2020 14:40:20	Sophia	Miller		Lenexa	I am a teacher in the Blue Valley School District. I completely agree with Governor Kelly's order. We should NOT go back to school in person until case numbers are declining. Please support this decision!! For the safety of the kids and the staff, we cannot go back yet.
7/21/2020 14:40:43	Maggie	Rust		Wichita	As far as delaying the beginning of the school year, it does not matter to me. But please, really reconsider having all students at once in the buildings. The hybrid plan (half of each grade level Monday & Tuesday, the other half Thursday & Friday, with Wednesday's reserved for cleaning, etc) makes much more sense, as far as distancing and whatnot. Less children in classes at once means less children exposed.
7/21/2020 14:40:46	Natasha	turner	Sacred heart ness city	Ness city	I don't think making kids wear mask is a good idea. They are just going to play with them making them touch their face way more than they already do. Delaying school is just making it harder on these kids. The more time they are out the harder it's going to be for them to get back in to school! Online is hard. Some kid can't learn this way I know my oldest child struggles so bad with this. Please please let these kids back in school

7/21/2020 14:40:48	Jessica	LeFort		salina ks	Both of my children are ready to be back in a school setting!! If we wait a month that is half a yr of them out of school setting and not learning!!
7/21/2020 14:40:49	Donna	Caywood		Maize	To protect our children and teachers I would like Gov. Kelly's decision to delay the start of school and once school is in session that masks and sanitation requirements be enforced.
7/21/2020 14:41:04	Heather	Watson		Lawrence	The kids need to go back to school for educational, mental and social reasons. I'm a health care worker who never stopped working. I have treated ALOT of patients and have not contracted COVID. Adults spread the disease much quicker and at a higher rate than kids 16 and under. We cannot lose another school year. Especially since there is no online curriculum in place although 4 months have gone by. When did school become non-essential? Right now there are people working minimum wage at grocery stores and gas stations so people can have food and gas. Those people come into contact with ALOT of people and they still go to work. School needs to start.
7/21/2020 14:41:14	Dace'	Inbody		Lawrence	I work at Eudora Elementary School, in special education and I have a son going to Lawrence Free State High School. It is important to me that our schools have the time and resources needed to prepare for close proximity of students and teachers. If waiting till after Labor Day would give us this time, please let us wait. As a teacher, having this time to prepare and organize my classroom for social distancing would also be valuable.
7/21/2020 14:41:15	Teri	Briggs		Shawnee Kansas, De So	We believe on site instruction is imperative for our kid's education and social development. The unintended consequences of keeping kids at home seem worse than potential exposure to a virus that is not high risk for kids. For us, we also have a boy who struggles with video game addiction and therefore online school is not a healthy option for him. We assume many others are in this same position. Studies have concluded, without doubt, the detriment of excessive screentime for children. Virtual learning was ok in the short term but is not a sustainable long term solution. Our kids need to interact and grow in a school environment albeit with some alternations to make teachers and administrators comfortable. Thank you for asking for input. We know the decision you have before you is very difficult.
7/21/2020 14:41:16	Lynn	Van Horn		Wichita	Delay opening to September 9, 2020
7/21/2020 14:41:39	Kelsey	Olden		Lawrence	Please consider voting yes for governor Kelly's EO 58. The schools are not prepared to go back at the normal time. The additional time will give schools and teachers time to prepare for students safely and effectively. We also need additional time to hopefully see some cases drop. With Lawrence being a college town. I am very concerned about an increase of cases when the college students returning. Some school districts may be better prepared but Lawrence has been really slow on the ball and needs that additional time.
7/21/2020 14:41:43	Timothy	Lipscomb		Olathe	Each district should have the ability to decide for themselves based on positive cases. Needs of students, ability to make needed precautions. This is not a one size fits all. Please overturn this and allow each district to start when they feel it's best
7/21/2020 14:41:50	Andrew	Edmondson	Teachers	Lenexa	I support Gov. Kelly's executive order to delay the start of the school year.
7/21/2020 14:41:51	Amy	Shamp		Wichita	I think it's a great idea. Gives teachers and districts time to adjust and time for people to get the numbers down.
7/21/2020 14:41:57	Terra	Miller		Wamego	Please adopt Laura Kelly's executive order to delay the start of school until after Labor Day. This will give our administrators and teachers the time needed to allow for a safe return to schools for our children and staff. The Roadmap to Reopening document is an extensive document that will require additional training for teachers and staff. Let's give them the time they need so that the schools can open and stay open.
7/21/2020 14:41:59	David	Woodbury		Overland Park	It is too dangerous to open schools in the next few months.

7/21/2020 14:42:00	Rosanne	Green		Basehor school district	Of course we care about our children, but we also care about all of the adults that go to their schools everyday to teach, feed, and support our children. We also care about our families and the families of all of the other children, who will come in contact with the children and further increase the chances of COVID 19 spreading even more, and killing more lives. Most experts, government officials, and people agree that the likelihood is much greater of spreading COVID 19 when social distancing is not practiced. Until the schools can guarantee that at all time social distancing can be enforced, sending students back is is not thoughtful at all, it is down right cruel and tempting fate. Please help make the best decisions for all of our communities by either 1) postponing the start of school until there is a better handle on this pandemic, 2) do virtual schooling until there is a handle on this pandemic, or 3) do a hybrid approach to learning this year where days, hours, classrooms, etc. are staggered to allow for social distancing. There are several creative ways to do hybrid teaching, and I bet a lot of our teachers have some great ideas. Just ask, listen, care, and please do the right thing, because doing the right thing is the right thing to do.
7/21/2020 14:42:05	Kendra	Vaughn	USD 489	Hays	You want to delay back to after Labor Day, great. Fine by me. But drop all the other "mandates" period. NO mask requirement, KSSHA PLAYS ALL SPORTS FULL SEASON, no distancing in schools. PERIOD. You people are really not with it if you think these kids have been social distancing, and protecting themselves. I promise they are partying it up, going to clubs, having field parties and moving in with friends. Life doesnt stop because you say it should. Kids have enough STRESS ON THEM! With the CDC announcing as many as HALF of these positives in the past 30 days could be the common cold and NOT COVID you have ZERO RIGHTS to treat the kids like this or our teachers!
7/21/2020 14:42:09	Angela	Zysk	Parent of elementary kid	De Soto	Please vote to affirm the executive order to delay school.
7/21/2020 14:42:13	Hannah	Singleton	USD 450	Topeka, KS	I am a 1st grade teacher in Topeka, KS. I ask that you support Gov. Kelly's executive order to delay school until September. If districts are pushed to start school sooner than this, they will not be able to amply prepare for what is needed. Realistically, it takes more than a couple of weeks to get things together for a normal year, much less an exceptionally different year. It is already the end of July. Teachers need more than one and a half weeks to train, and prepare for what will inevitably be another challenging year. What doesn't need to happen is teachers being thrust into the frontlines unprepared, by politicians, and having parent frustration be aimed at teachers. If teachers are given time to train for this, we will do great things. Without the delay, we will not be able to do everything that can make in-person, hybrid, or online learning what is best for our students.
7/21/2020 14:42:20	Terry	Beurskens	USD 446	Independence	Should start after Labor Day for sure
7/21/2020 14:42:22	Bobbie	Dinkel	Individual	Hays	I am writing on support of Governor Kelly's executive order postponing our school start date. I am a classroom teacher with nearly 30 years of experience. I do feel kids learn best in the classroom and want them to come back. However, I would like the time to be better prepared and to hopefully see 57% rise in cases we have had reverse trend.
7/21/2020 14:42:29	Nicole	Herber	Educators/private school	Prairie village	I support the mandates of delaying schools. Teachers, staff, students, and families need the extra time to put in place safety protocols for all. Schools should also only open if there has been a 14 day downward trend in cases.
7/21/2020 14:42:30	Celestial	Arnold		Silver Lake	Delaying the 20-21 school year will allow schools to request the Personal Protective Equipment (PPE) necessary to comply with Governor Kelly's mandates. Many schools operate with limited budgets and resources, this will allow more time to gather the necessary supplies and also to gather technology if the state were to shut down again. It also gives parents longer to find childcare during school months. It's much better to be proactive than reactive during a pandemic. Additionally, the school year can be extended into June to make up the time in August.
7/21/2020 14:42:31	Jacob	Davis	Andover central high	Wichita	I'm scared to go back to school and catch the rona.
7/21/2020 14:42:47	Katie	Carder	Community	Overland Park	Schools should not open for in-person teaching until no new cases have been reported for 2 weeks. This is the only way teachers and students will be completely safe. It is dangerous to send kids and teachers back now, or even immediately after Labor Day, when so much is still unknown about how the virus affects children.
7/21/2020 14:42:54	Paticia	Ciotti		Wichita	It makes no sense to open schools now with Covid being much worse today then it was when schools closed last spring. Please for the safety of teachers, students, parents, custodians, grandparents, etc. etc. allow another month + to lessen the severity of this pandemic. Now that bars may close again and other measures be put back in place, this just might happen.
7/21/2020 14:43:04	Jocilyn	Oyler	Parent	Lawrence	Please. Postpone school until September as the governor requested.

7/21/2020 14:43:13	Susan	Stanley		Overland Park	I am all for delaying in person school as I don't think it's safe right now but I do think online learning needs to begin ASAP. I am anxious for my kids to get back to learning and they are too.
7/21/2020 14:43:14	Sarah	Hendrix	Cedar Hills Elementary	Overland Park	There needs to be options available for families in the blue valley district. Continuing to push back the start date is just denying the inevitable.
7/21/2020 14:43:21	Blake	Braddock	N/a	Manhattan	Schools opening is not a smart idea. Cases are growing quicker than when the schools closed!!!
7/21/2020 14:43:32	Brooke	Smith	Usd 290	Ottawa	Don't delay school openings
7/21/2020 14:43:33	Nikki	McMeans		Fort Riley	Open school on time!! Our kids need routine and back with their friends!
7/21/2020 14:43:35	KaCee	Smith		Offerle	Have to school day for 5th -12th be from 8-5 like a normal person
7/21/2020 14:43:36	Jennifer	Moore	Self and family	Gardner	Please delay the opening of schools, or go to virtual learning for the first couple weeks. We don't want to expose those students or teachers who are immunocompromised! It would be extremely sad to have a page in a school yearbook with a memorial section for those teachers, staff, and students who perished from COVID.
7/21/2020 14:43:51	Katie	Kohlasch	Teacher in a Catholic sc	Olathe	Thank you for your hard work on the executive order to delay school until after Labor Day. I know many teachers and administrators in my school who are grateful for the additional time to plan for the year and to get more PPE to protect our teachers, staff, and students, as well as their families. My husband and I are both teachers, and we'll welcome our first child next week, so staying healthy has become even more of a priority for us this year. Thank you for making tough choices to keep our school communities safe and healthy.
7/21/2020 14:43:57	Ben	Alexander	none	Iola	I've worked many years in schools, and there is no possible way to have in-person classes and ensure safety and health for students, parents, and staff. Kids have to be reminded to wash their hands, they pick their nose and smear it on their desks, they swap and mix up their lunches, they wet their pants and need new ones, they wrestle pens and pencils from each other, they get sick and vomit in the hallway, etc. etc. Older students sneak into staircases to perform sex acts and leave dirty gym clothes in their lockers for six months. Basically, unless the proponents of reopening have an entirely different population in mind, it is literally unimaginable that children could successfully social distance and maintain healthy practices.  In addition, there are many, many school staff who don't receive KPERS benefits or other inducements to grin and bear it, and we will not risk our lives to make a silly point. Schools will suffer from shortages of classified staff, and will be forced to hire less-qualified staff for all the jobs most important to maintain a safe and healthy school. I foresee schools opening for less than a month, followed by massive outbreaks and emergency closures. Rather than panicking and closing on October 1, we must plan for continued closure now, and work to ensure that students will have access to the things they need AND are safe.
7/21/2020 14:44:01	Rita	Baxa	USD 443	Ingalls	Keep schools closed until you can guarantee the safety of every single person in those schools!! The first time a child gets Covid, the schools will be blamed. I would rather we wait a little longer than go back and forth between opening and closing. Let's start with something that we can do consistently until Covid is over!!
7/21/2020 14:44:20	Michelle	Struble	USD 361	Anthony	I feel it would be better to let each district decide based on their health data and number of cases in their respective counties instead of putting our whole state under the exact same regulations (which may not be necessary in all places).
7/21/2020 14:44:29	Doug	Joseph		Topeka	I would like to see the governors order upheld. The reason I believe it should be upheld is if a unified policy is not presented school districts in the same city will have different policies. For example I live in 501 and across the street is 437, each could start at different times and I feel this would not be beneficial to the students, parents, or faculty.
7/21/2020 14:44:30	Cynthia	Duncan	Self	Shawnee	We need for kids to go to school in person!

7/21/2020 14:44:32	Brett	Burhenn	SMSD	Gardner, KS	I fully support EO 20-58. As a teacher and especially as a parent, I have little to no faith that the area in which I live is ready to open up fully. The risks to our student and children are much too high, and the answers to all of our "what if..." questions are not there or are not satisfactory. With cases on the rise, there is absolutely no way to make the virus go away if students continue to share it amongst themselves. I've heard the "Kids aren't at risk and can get over it easily" arguments many times, but that doesn't account for the people those students can and will infect while they're getting over it that WON'T get over it easily. As long as we're encouraging students to show up to school in person, we're negating all of the stay-at-home time we all put in over the spring. I believe governor Kelly has the right idea. At the very least, give us more time to plan for the inevitable disaster that an in-person school year will bring.
7/21/2020 14:44:33	Johnnie	Johnson		Milford	Thank you for considering our children's and the teachers safety. Please uphold the Governor's ruling to postpone face-to-face instruction. We closed schools (appropriately) when there were far less cases than there are now. Seems irresponsible to send students and staff back at this time, with as many cases as there are!
7/21/2020 14:44:53	Stacey	O'Neill		Olathe	Open school in August
7/21/2020 14:44:54	Stephanie	Manley	Lawrence	Lawrence	I implore you to uphold the governors EO. Please do not allow schools to open prior to meeting CDC guidelines of a 14 day decrease on Covid19. Once this decision is made it can't be undone. Learning time should happen virtually until it is safe and schools have adequate PPE. All school staff needs a raise for risking their lives by returning. Teaching has risen to the 5th most dangerous job in the country due to Covid19.
7/21/2020 14:45:06	Kellie	Lacey		Lebo	Stop making this political and listen to the science!! Our numbers continue to increase, daily! Do what's right And safest for our kids, keep the schools closed. Their purpose is not to provide daycare but to educate which can be done safest at home!!!!
7/21/2020 14:45:06	Meghan	Plankers	Olathe School District	Olathe	As a teacher in the Olathe school district I feel strongly that we should wait till after Labor Day to begin the 2020-2021 school year. Our district has not had the opportunity to update the staff and families of the plan for the year. With the extra weeks in August the district will have more time to solidify a safe environment for kids and staff. A plan should be put into place that has longevity and can be used throughout the semester. The rise in COVID positive cases and the push to start at the beginning of August, I think, will lead to more spread and quick closure. Pushing back the start of the year will hopefully lead to a confident plan within the Olathe district and more confidence in teachers as they transition back to classroom.
7/21/2020 14:45:10	Mrs. Sharry	Huysen	Retired teacher from Bl	Lenexa, Kansas	Please vote to delay school until after Labor Day. Let's not send the children back to school when the pandemic is so out of control in Johnson County. Give the teachers and schools time to make it safer for the children. Also, please support that the children wear masks. If preschoolers at Growing Futures (used to be Head Start) in Overland Park can wear them, so can our k-12 students! Schools used to not start until after Labor Day not too many years ago. Cut the Fall Break and Spring Break shorter to make up the time!
7/21/2020 14:45:11	Maggie	Ascherman	Myself	Lawrence Ks	Please delay the start of school
7/21/2020 14:45:17	Kaysie	Morris	Head Start (& I'm a mor	Hays	I feel it's best to delay school until after Labor Day. This will give school admin, teachers, & parents more time to prepare (emotionally and physically.) However, I don't think masks should be mandatory. There are so many potential problems with that order. My personal reason is that My son is deaf & relies on lip reading to communicate. With those around him wearing masks he will be completely isolated & struggle with instructions (more than he already does.) Small children will play with them & probably pass more germs to one another than if they didn't have masks! Thanks for considering my opinion!
7/21/2020 14:45:18	Robin	Kingeter	Johnson County Resider	Overland Park	Please delay the start of school for the health and well-being of our students, their families, and the people who work in schools. It is not worth risking lives.
7/21/2020 14:45:18	Amy	Ball	Parent of a 3rd and 6th g	Bartlett	Delay please
7/21/2020 14:45:21	Caden	Byers		Pratt	I think it is best to let school districts who have 1. Low or no cases and 2. Have already done a great job planning for this unusual semester to make decisions for themselves on when to begin school. I also believe kids need to be in school for many reasons besides academics.

7/21/2020 14:45:32	Caroline	King		Lenexa	Gov Kelly's EO EXECUTIVE ORDER NO. 20-58 states: K-12 public and private schools shall not allow attendance, instruction, athletic practice or competition, rehearsal, performance, or other interaction of an instructional manner—including virtual, online, and any other direct or indirect means of providing instruction—between faculty/staff and students of public or private K-12 schools from August 10, 2020, through Sept. 8, 2020 No virtual classes, workouts, nothing, zilch, nada. This makes NO sense, none whatsoever. Many of our Kansas schools are prepared to teach remotely, the virus doesn't spread through ZOOM. Why is the Governor demanding that schools do NOTHING from Aug 10 - Sept 8. If our schools are ready and prepared to teach remotely, why is this necessary? If a school needs the extra time, they have the autonomy to take the extra time. But to DEMAND EVERY SCHOOL in Kansas to stand down till September 8 is a gross over reach of power. I urge you to vote according to the specific needs of the schools in your district and not capitulate to a wide sweeping generalizing EO that doesn't make sense.
7/21/2020 14:45:41	Joni	Burkett	Elementary School Para	Topeka	Thank you for your efforts to keep school staff and students safe. It is important to delay in-person classes until after Labor Day at the earliest. Your executive order is necessary because not all residents are following guidelines to wear masks and maintain social distance. Children with the virus will infect other children & staff, who will in turn, infect their entire families.
7/21/2020 14:45:54	Timothy	Burkhart	I serve the Lord Jesus Ch	Newton KS	I'm asking the State School Board to vote NO on Executive Order 20-58.
7/21/2020 14:45:55	Anne	Bertie	Parent of student athlete	Independence	Allow sports practices, even if school is not in session.
7/21/2020 14:45:56	Kristin	Massoth		Prairie Village	I understand the importance of school, but I feel that safety must come first. There is still much to learn about this virus and its effects. Delaying school provides more time for Kansas to get the numbers of cases under control. Opening schools with our current numbers is not a scenario I'm comfortable sending my kids into.
7/21/2020 14:45:57	Barbara	Durler	Kansas resident	Wright	Students need to return to classroom instruction! They have already lost out on a full quarter of instruction and since they were told they were not "graded" on the on-line instruction they received in those 9 weeks most didn't bother to fully do the work!  Daycares have been open and there have been no issues with "wide virus spread" in Daycares. These children are closer to one another in their play than classroom students tend to be with less children per adult than in classrooms plus these children are not in masks which we are led to believe will cause more virus spread BUT it hasn't!  Common sense shows from Daycares continuing to operate in these past few months without wide virus spread that schools should have the same results AND our students will not be denied these 3 weeks of instruction hours by starting normal start dates!
7/21/2020 14:46:17	Renee	Friess		Goddard	Schools should open with option to have children learn from home or on-site
7/21/2020 14:46:18	Kyle	Elliott		Shawnee	Schools should open on time!! There is no justification to delay school opening except political manipulation.
7/21/2020 14:46:19	Linda	Sieck	NEA Shawnee Mission	Overland Park	We need to be sure all safety measures (and supplies) are in place before we go back. Teachers need time to prepare for whichever plan our district eventually decides to follow at the start of the year - not to mention extra professional development to be better at delivering instruction virtually and truly know which students have limited or no access to WiFi. And of course, we need people to use the extra time to wear masks, socially distance, and help flatten the curve.
7/21/2020 14:46:19	Sara	Hamer	USD 232 parent and sta	Lenexa	Please support our Governor. Kansas is a scary situation that needs to get under control. A couple of weeks delay is a great compromise that just might get our kids back in school long term.
7/21/2020 14:46:29	Amy	Maxwell		Frontenac	I am letting you know that I agree with all the people that are saying it is not dangerous to kids, I believe the lack of socialization is more detrimental to children than the covid19. Look at the rate of suicide. Also I believe mask are not going to help, kids don't leave them alone. Thanks

7/21/2020 14:46:31	Josh	Davis		Jetmore	I am a teacher at Hodgeman County Schools, but I support the delay in the start of education for Kansas Schools to September 9th because I understand that COVID-19 has caused more harm to other counties in Kansas, than my county has received. I feel that it would be best for all Kansas students to have the same delay and have safety protocols in place. If we do not, we risk having another shutdown of Kansas Schools, which adds more stress to parents, students and teachers. Teacher across the state can then use these 3 weeks to network and work together to solve the problem we foresee based on the delay in education. However, in the future, I strongly request the State Board of Education suspend the 1,116 hour requirement hours for education. As much as all teachers will strive to make this year a normal as possible, it will not be normal. We will be taking temperatures and being masked monitors along with caring for students who will be carrying the effects of living in a new world. I think we need to recognize this, however teachers will rise to the occasion. State testing should also be suspended again. I think if we take precautions this year and act appropriately including delaying, suspending requirements and testing, normal can return to the 2020-2021 school year. I, therefore, respectfully request you approve the Governor's order and at a future meeting discuss the items of contact hours and testing.
7/21/2020 14:46:41	Susan	Boller		Geary County	Delay school, give Teachers and Administrators time to prepare and plan for the changes necessary to promote a safe , Healthy learning environment.
7/21/2020 14:46:50	Jennifer	Paxson	Highland Park High Sch	Topeka	Na
7/21/2020 14:46:50	Sarah	McGinnity	Parent in Shawnee Miss	Overland Park	I beg you to uphold Governor Kelly's executive order delaying the reopening of school buildings. The COVID cases are rising exponentially in our area, and I fear for my health and safety, my children's health and safety, and all the staff and students in schools.  Kansas is currently on the list of states recommended to go back to Phase 1 (via a White House report) because of such an increase in cases and positive rates. As a parent, I get one shot at my kids' childhood and keeping them healthy is the top of the list. I love our school but if I don't have the confidence that those in charge have my children's physical safety in mind, I cannot put them in Kansas schools for the next year. Upholding the governor's order is the first step in ensuring Kansas children are not the victim of petty politics.  Please uphold the governor's order and put Kansas children first.
7/21/2020 14:46:53	Alahora	Belcher	Maranatha Christian aca	Shawnee KS	The small private schools do not have the amount of students that public schools have and can take reasonable precautions to open school In August . Please consider making exemptions for smaller schools .
7/21/2020 14:46:53	Ezra	Shove		Topeka	Schools should NOT be delayed. K-12 works best in a classroom and the first delay will lead to more delays and eventually resulting to online classes. Online classes only work if the students do. Students who need extra help will struggle. Schools should NOT delay!
7/21/2020 14:46:57	LauraAnne	Grammer	USD 497	Eudora	Schools should not open until after Labor Day so that teachers and school staff have the time to make necessary accommodations, training, planning, and preparation to ensure the safety of students, staff, and the community. Furthermore, I firmly believe that schools should not engage in, in person instruction until their is a steady decline in new cases. Preferably not until there are 14 days with no new cases.
7/21/2020 14:47:01	Kim	Workman		Spring hill	Hybrid learning

7/21/2020 14:47:06	Sarah	Irsik-Good	Myself - mom of 12 y/o	Topeka	The guidance put forth by the American Academy of Pediatrics is compelling ( <a href="https://services.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/clinical-guidance/covid-19-planning-considerations-return-to-in-person-education-in-schools/">https://services.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/clinical-guidance/covid-19-planning-considerations-return-to-in-person-education-in-schools/</a> ) and while three weeks seems menial, the amount of time our children have already spent out of school may have long lasting and devastating effects on their emotional, physical and academic health. The most important thing to consider is this: "Although many questions remain, the preponderance of evidence indicates that children and adolescents are less likely to be symptomatic and less likely to have severe disease resulting from SARS-CoV-2 infection. In addition, children may be less likely to become infected and to spread infection. Policies to mitigate the spread of COVID-19 within schools must be balanced with the known harms to children, adolescents, families, and the community by keeping children at home." School choice and flexibility should be the priority (with variable options for children whose parents have different perspectives and desires for in-person, virtual, and blended learning to accommodate all students and families. Mask should be recommended, but not required. If my child doesn't want to be in school, and masks are required, are we kicking kids out of school if they refuse to wear masks, for whatever reason? Seems to be counter productive and like a perverse incentive for some. Additionally, there are students in my daughter's district that are not safe when not at school. During Spring virtual classes, there were young, elementary children home, alone, taking care of younger (not school age children) because single parent homes must work and can not appropriate supervise or provide for. Each parent should have choices that match their desired and needed learning support. I would encourage the school board to reject the Governor's executive order delaying the opening of schools (EO 58), and also push back against EO 59, allowing for more tailoring at the individual school and district level so that the response matches the current environment and districts are able to respond accordingly in real time to changes in need and improvement in spread within the school and community environment.
7/21/2020 14:47:12	Larry	Sonsthagen	Parent	Olathe	Due to increasing rates of infection our schools should not start in person classes prior to Labor Day. Schools need more time and money to get the PPE, go over the 1000 page refs, and training. This will hopefully give communities time to decrease numbers.
7/21/2020 14:47:16	Brenda	Buehler		Scott City	Don't force young kids to wear mask. It becomes a petri dish for germs on their face.
7/21/2020 14:47:18	Stacy	Yehle		Lenexa	Kids are asked to do as adults tell them and trust we are making good choices for them. Please help keep them safe by not sending them back to an indoor space with many other people until all recommended safety protocols can be adhered to and cases stop continuing to rise. Keep our future safe.
7/21/2020 14:47:21	Susan	Kraft		MANHATTAN	Please vote to delay the start. We need to slow this back down.
7/21/2020 14:47:22	Emily	Plotkin		Prairie Village	Protect the teachers and staff and help them prepare for the fall semester. Even if that means postponing classes. Value the lives of students, parents and teachers. Fight the urge to rush back into the classroom when so many lives are at risk. Think about prioritizing safety and health over anything else.
7/21/2020 14:47:43	Sarah	Beaulieu		Lawrence	Please support our governor and keep Kansas schools closed until it is safe for our kids, educators and staff to return. I have a first grader and a junior in high school who I know both would benefit the most from in-school learning but that's not a choice I'm willing to make at the expense of their or their teachers safety. I think we should focus on remote learning and how to make that successful for students instead of gambling with our children's lives and those of the community.
7/21/2020 14:47:51	Amy	Wing	None	Lawrence	With the number of cases in Kansas still on the rise, it is prudent to follow the instructions issued by Governor Kelly. It's not enough time to implement new guidelines, instruction and physical necessities to open as previously scheduled. For the safety of the students/staff/workers under your care, I hope that you do what is not only in their best interests, but also in the interests of all the residents of this state. Thank you.
7/21/2020 14:47:53	Priscilla	Howe	Self	Lawrence	Please do not open the schools until at least after Labor Day. Even that does not feel safe. I would prefer after January 1, 2021. Why is the health of children and teachers (and the families of both) being sacrificed for economic reasons?
7/21/2020 14:47:54	Bert	Stramel	taxpaying parent	Colby	Open the schools. Closing has devastated our oldest son 2020 senior year. Please don't do more damage to rest of the kids. We humans have been spreading germs for thousands of years and to think we can eliminate all risk is total ignorance.

7/21/2020 14:48:06	Rebecca	Anthony	Shawnee Mission School	Lenexa	I am a teacher in Shawnee Mission and also have a child in its elementary schools. I would love to go back to school as normal, but that is just not safe right now. I think starting and then having to quickly transition to virtual learning will be much harder and more disruptive than delaying a bit. Please help encourage everyone in all communities to do their part. Wear masks, quit socializing, and help slow the spread so we can safely return to schools sooner rather than later.
7/21/2020 14:48:10	Jill	Siebert		North Newton	My husband and I are teachers and we fully support Governor Kelly's school delay mandate. As much as we miss our students, we are incredibly uncomfortable with the thought of going back to school in person as virus numbers continue to rise and we are still without a vaccine or cure. This is a traumatic time for everyone, and we acknowledge the difficulty of the decisions being made in all facets of our society. That said, the serious illness and/or death of loved ones/teachers/friends/community members of all ages would be so very much worse than any educational or social experience that our students may miss out on in the 3 additional weeks off of school. This should not be a political issue or an opinion-based decision - we need to listen to the scientists and health officials who are working tirelessly to provide us with the most current best practices, acknowledge the disproportionate effect this is having on people of color within our community, and work, not to please the masses, but to keep the effect of the virus on our communities' health as small as possible. Please keep the safety of our students and staff as your first priority and vote to uphold the mandate so we have more time to find the best, safest way to educate our students in this unprecedented time.
7/21/2020 14:48:16	Abby	Shull		Winfield	Please delay the start of the school year to ensure that administrators and personnel have time to make all of the adjustments needed to prevent widespread COVID-19 outbreaks in our schools. As a parent and former teacher, I urge you to make the safe, cautious decision.
7/21/2020 14:48:18	Luke	Bunker	Myself, a student at Spr	Olathe	Please, vote NO on upholding Governor Kelly's mandate. As a student-athlete, this negatively affects the academics, athletics, and mental health of myself, my teammates, and my peers. We students need something to look forward to. All of us have been safely conditioning and practicing with our teams this summer. We have worn masks when we cannot social distance, we have done temperature checks and make sure to stay spaced out when we weren't doing drills. If the governor wants to give schools extra time to prepare, that is fine. However, in her mandate, she cuts off all communications between myself and my coaches, teachers, and advisors. Here is the excerpt: "K-12 public and private schools shall not allow attendance, instruction, athletic practice or competition, rehearsal, performance, or other interaction of an instructional manner—including virtual, online, and any other direct or indirect means of providing instruction—between faculty/staff and students of public or private K-12 schools from August 10, 2020, through Sept. 8, 2020...". I believe this is the first step in taking our season away. If that happens, the feeling of hopelessness among our student body will be like never before. I have heard from district officials that there are already many students in our district on suicide watch. The consequences of ripping away extracurricular activities and most of all communication with teachers will be much more severe than the consequences the virus (which has killed ZERO kids ages 0-18 in Kansas). Not being able to communicate with my advisor and counselors will also make me much more unprepared for the coming year, in which I am supposed to take the ACT and start accumulating college credit. Again, vote NO on upholding the governor's mandate, for the sake of students in my community and across the state.
7/21/2020 14:48:19	Megan	Jenkins	Wiley Elementary School	Holcomb, Ks	Start school at the normal date. This is my student teaching year and I could use all the time and help I can get before I take over my classroom in the Spring alone.
7/21/2020 14:48:19	Vickie	Tholen	parent	Iola, Ks	Please reject Gov. Kelly's plan to delay the start of school. It is the local board of education that should decide this and also the way things should be handled. Children need to be in school and the local board is capable of deciding how to best handle this in their communities.

					<p>I'm writing today to share a couple of things on the importance of reopening schools. These kids need a safe place and place where abuse can be identified. A place where normal is laughing with friends and learning is essential. Again, I'm very worried for the sake of our kids. Here is an article where YMCA has had success in caring for over 40,000 children during this time.</p> <p><a href="https://www.insider.com/how-the-ymca-childcare-centers-prevented-coronavirus-outbreaks-2020-7">https://www.insider.com/how-the-ymca-childcare-centers-prevented-coronavirus-outbreaks-2020-7</a></p> <p>Many individuals are working 8 hours a day around tons of germs and no covid outbreak with employees at all the places that are open. It is ridiculous that schools are not opening!</p> <p>Data shows that the 0-25 age group is the least impacted by this virus...again...as educators who have a responsibility to our children, you already know this statistic. I believe those that are in charge of their individual school districts have the knowledge and understanding to proceed with the school year with the best options for the parents and students in their communities...you should allow them to do so. What the school year looks like should be left up to the district leadership in partnership with the parents....but allowing them to do so...is something you have the power to do.</p> <p>So far, every decision made on behalf of our children has been made by people who have the privilege of being "safe at home" and in my opinion have not taken proper consideration for those who are not that privileged. I myself have grown children, no grandchildren or school age nieces/nephews, but as a caring citizen of this state, I can not sit back and watch these decisions being made that do not take into account those kids whose very lives could depend on being IN SCHOOL!</p> <p>Please get our kids back to school...</p>
7/21/2020 14:48:22	Kelly	Ryder	myself	Basehor	Thank you for your consideration.
7/21/2020 14:48:24	Travy	Johnson		Lenexa	Please do not open in-person school until after Labor Day (and beyond)!
7/21/2020 14:48:30	Keri	Ochoa	USD 214 School Counse	Ulysses	I think you should approve Gov. Kelly's order to delay school at least 3 weeks because we need more time to prepare for an unprecedented school year. This will also allow time to hopefully slow the spread of covid before school starts.
7/21/2020 14:48:36	Valerie	Tollefson	BCK-SEI #615	Hiawatha, KS	Please vote to support Governor Kelly's executive order to start school after Labor Day. DO NOT vote to leave this up to our local districts--the division over will potentially destroy us at the local level. Don't fuel the divisive fire, with our students, staff, and administrators left to be caught in the crossfire. Thanks!
7/21/2020 14:48:42	Just	Mick	Teacher and parent	Larned	Start after labor day to allow preparation and safety measures.
7/21/2020 14:48:56	Jeania	Embry		Fort Scott	Our kids need to go back to school. School needs open up and kids needs to go back. Not doing this would be detrimental till their health and mental state.
7/21/2020 14:49:06	Courtney	Durando Warner	California Trail parent	Overland Park	I encourage the BOE to adopt EO 20-58. I believe this will give schools, especially large schools, necessary time to plan for re-opening for in classroom learning. Teachers and staff should not be expected to rush into re-opening while cases of COVID 19 are still on the rise. Adequate planning ensures that children, staff and teachers are provided a safe environment to learn. I'm not willing to roll the dice on my child's health in order to stimulate the economy.
7/21/2020 14:49:25	Lisa	Stein	USD 477 Ingalls	Ingalls	I am praying you vote against our governor EO 20 58. Lumping all districts in the same pool is unfair. In SW KS we are doing great and especially in Ingalls America. We have had NO cases and have been getting kids together for the past 7 weeks for conditioning and vball skills and drills, with NO sickness. These kids are excited for school to start with their friends and want it to be as normal as possible. Thank you for your time and the job you are doing! Lisa Stein

					<p>Please support the Governor's Executive Order to delay all school activities until after Labor Day. This will buy time to make needed changes within all schools, urban or rural.</p> <p>As a teacher, I did not plan much because I expect to be trained on how to be a (more) effective remote teacher and possibly switch to a 4x4 system. What we did in March was emergency planning. We should not recreate that situation but prepare for a disrupted school year where in-person learning is not always an option. Teachers will also require training for new safety protocols when we do return. We will essentially be distance learning with our classrooms with all of the precautions.</p> <p>With so few decisions made at this point, I doubt the facilities comply with acknowledged standards for safety: multiple, staffed entries with temperature-taking equipment and procedures for entry, rescheduling of classes to reduce class size, repairs to the HVAC system to make sure the building does not recirculate viral material as an aerosol, rearrangement of classrooms including removal of flexible seating as needed to accommodate separate desks, placement of protective plexiglass panels where needed, modifications to classrooms and the Commons to make traveling from place to place or eating lunch relatively safe, creation of sick rooms where students can be isolated, light duty retraining to handle some of the issues that will arise when students and teachers are restricted.</p> <p>Until we have reduced the number of COVID cases in Sedgwick County, it does not make sense to return to our buildings. We have already seen how a premature re-opening of area businesses led to an exponential rise in the number of people afflicted with COVID. The more time we have, the better the odds of bringing the numbers down ESPECIALLY if it is no longer optional to comply with public safety measures. Clearly, many people favor individual choice over community safety.</p> <p>Kicking this decision down to local school boards wastes time and endangers all of us. The three unaffected counties all border counties with COVID cases so it seems likely that they will not remain untouched. The numbers have been rising across the state. This virus has demonstrated how interdependent we are. Until Kansans take the necessary precautions, we are all in danger. Why does the state BOE meet in virtual space when many of you come from areas</p>
7/21/2020 14:49:26	Lizanne	Minerva	USD 259 teacher	Wichita	
7/21/2020 14:49:28	Sarah	Ball	Parent	Paola	The 3 week delay is understandable. Please consider sending the kids back to school full time after Labor Day. They need it and we need to ensure our tax dollars are being spent in the appropriate means for our children.
7/21/2020 14:49:47	Sam	Soliday	Maranatha Academy	Olathe	Schools need to open on time. There have only been two deaths of people under 60 in Kansas and very few teachers are over 60. Kids need to be able to return to normalcy.
7/21/2020 14:49:50	kelly	guzman		wichita	<p>Evidence-based decisions are necessary, but the peoples' voice is also important -- these are hard to balance. Please carefully consider both.</p> <p>The data available to the public says COVID-19 is very contagious and can be fatal, therefore it would be a devastating and inevitable outcome to our communities to lose teachers and/or students to COVID-19. Thankfully, it has not happened locally but because schools have been closed. Please consider these devastating outcomes and the long-term financial (e.g., costly and mandatory PPE for daily use, professional cleanings after exposures, potential lawsuits to school districts after deaths or exposures, etc) and emotional impacts to our communities. Waiting for in-person school until after Labor Day or even delaying until the spring may help reduce financial and emotional impacts.</p>

7/21/2020 14:49:55	Greg	Worley		Andover	<p>I am writing in support of delaying school. With the current rate of infection, especially in Sedgwick County, I do not see any way that schools can be opened safely. Israel tried something similar, with lower case transmission and had to close again within 2 weeks. (<a href="https://www.npr.org/sections/coronavirus-live-updates/2020/06/03/868507524/israel-orders-schools-to-close-when-covid-19-cases-are-discovered">https://www.npr.org/sections/coronavirus-live-updates/2020/06/03/868507524/israel-orders-schools-to-close-when-covid-19-cases-are-discovered</a>). We need the extra time to try to reduce the case count here so as to not repeat what happened in Israel.</p> <p>I do understand that there are many rural counties that do not have an issue with COVID at this moment. In a vacuum it would make sense for them to go back to school. However, rural areas need to delay any COVID spike as long as possible due to the rural hospital situation. They have to send their series COVID patients to Wichita or Kansas City. Right now Wichita only has 12.5% of ICU bed available to take patients (<a href="https://sedgwickcounty.maps.arcgis.com/apps/opsdashboard/index.html#/7b2b4364a5fa4ba3a015d52450acfe0d">https://sedgwickcounty.maps.arcgis.com/apps/opsdashboard/index.html#/7b2b4364a5fa4ba3a015d52450acfe0d</a>) and it is only going to get worse in the next month or so. If COVID hits in the rural areas before it is under control in the metro areas then there won't be any where for rural COVID patients to go. This will significantly increase the mortality if it happens. Lets keep kids out of schools to reduce the possibility of this happening.</p> <p>Finally, the AAP, one of the few doctors' groups arguing for opening schools, has walked back the original statement with and updated one: <a href="https://services.aap.org/en/news-room/news-releases/aap/2020/pediatricians-educators-and-superintendents-urge-a-safe-return-to-school-this-fall/">https://services.aap.org/en/news-room/news-releases/aap/2020/pediatricians-educators-and-superintendents-urge-a-safe-return-to-school-this-fall/</a>. There original argument that kids don't spread COVID has been proven wrong. We still don't know if they are super-spreaders or not. The reason we don't know is that there isn't much evidence on either side of the argument. This is mostly due to schools being closed during most of this pandemic. I seems foolhardy to assume that an absence of evidence is proof of a negative. I don't want Kansas to prove that kids are super-spreaders. Leave that to Florida or Arizona, both state which seem hell bend on helping COVID spread.</p> <p>Thanks for reading through all of this. I do want students to go back to school, but I do not want to sacrifice anyone for kids to be able to go back to school.</p>
7/21/2020 14:49:58	J	G		Augusta	Schools have had since the beginning of the pandemic to prepare for this upcoming school year. It is ridiculous to think that they need more time. For the teachers that don't want to be back in the classroom, I question their dedication to the students. Kids NEED to be in school and, more importantly, returning to a business as usual setting. NO masks, NO distancing, just like we treat any other flu. Hold parents accountable but let those of us who have common sense and the best interests of our children in mind make the decision on sending our children to school each day!!!
7/21/2020 14:50:04	Liv	Frost	Self	Lawrence	I'd like school to resume after Labor Day. I'd like kids to wear masks and have temperature taken daily.
7/21/2020 14:50:11	Theresa	Gram	Kansans 6th District	Clyde	Please uphold the governor's data-driven, evidence-based, scientifically-rational executive order to delay the beginning of face-to-face instruction until after Labor Day. Thank you.
7/21/2020 14:50:18	Amy	Mayhugh	Usd 232	Shawnee ks	I have 3 kids in the Desoto school district ages 6-15 and we support in person at the school for their education and for other growth development. Thank you
7/21/2020 14:50:21	William	Corbett		Wichita	Even Fauci now says masks are not useful, and to open back up. I will not wear a mask! Open our state back up!!
7/21/2020 14:50:22	Lindsay	Osborn		Liberal	Our schools need to open. I would prefer a hybrid model format for those districts heavily affected by active cases. Areas with less of a threat should have flexibility to open as they see fit. Masks, social distancing, and health checks seem like common sense expectations to ensure everyone's safety during this stressful time. A lot of people forget that these guidelines are temporary, even though this pandemic has and will create change to what we perceive as normal in the future.
7/21/2020 14:50:24	Teresa	Feyerherm	parent of 3 students	Hays	PLEASE DELAY for the safety of our children and teachers and their families.

					<p><a href="https://blog.usejournal.com/i-spent-three-weeks-in-school-with-kids-under-covid-19-21b78c1a9339">https://blog.usejournal.com/i-spent-three-weeks-in-school-with-kids-under-covid-19-21b78c1a9339</a></p> <p>Please take the time to read this article. I think it will be very eye-opening about what in-person school would be like... Nothing like we've known it in the past. I believe kids and families believe that going back will be like it used to be, and it just can't be right now.</p> <p>I believe online schooling is the way to go for now and for the foreseeable future. At some point, of course, we would all like to be back in the classroom, but now is not the time for that. I believe with some creative thinking and problem-solving we can help the families that would struggle with online learning the most. We are going to lose many to homeschooling if we do not do this.</p>
7/21/2020 14:50:30	Stacey	Tischhauser		Wilsey	Thank you for your time and consideration.
7/21/2020 14:50:32	Ryan	Boyer		Mission	I am supportive of the Governor's orders. No child, parents, teacher, or staff member should have their lives put at risk when there are alternatives.
7/21/2020 14:50:35	Mary	Campbell		Wichita	It does not make sense to open schools when tightening restrictions for gatherings because our community spread of COVID is so high. We should not open schools until our numbers are at a level that allows students and teachers safety
7/21/2020 14:50:53	Julia	Brockway	A school employee/ parent	Eldorado	<p>As much as I miss my early childhood kids, I'm extremely fearful for them and myself that going back to school too early would be a huge mistake. I'm also greatly concerned for my daughter who has asthma to be wearing a mask all day long would be hard for her but not wearing one could be worse. Please also take into account those of us that work in special ed. We have extremely close contact with our students. We help with toilet needs and are often sneezed, coughed, spat, and hit on. I feel like Paraeducators deserve some sort of hazard pay! We receive no benefits, so if we get something from the students, we pay our own medical. Plus if we pass it to our family it can ruin us. Please consider a considerable raise and hazard pay. Even grocery store employees are getting that.</p> <p>Thank you</p>
7/21/2020 14:50:57	Deborah	Bartley	Teacher in Johnson County	Overland Park	As a teacher the delay of school allows teachers to plan for any of the contingency plans that may need to be implemented. This year will not look like any other we have experienced and having time to be as prepared as possible will provide a more stable and rigorous academic program making up for time lost with the delay as opposed to floundering through the potential frequent changes in teaching modes. In addition with this area being a hot spot it will allow more time to see if there is a steady downward trend.
7/21/2020 14:51:04	Jordan	Ford		Cheney KS	Yes keep schools closed until after Labor Day! Keep our teachers and our students safe!
7/21/2020 14:51:07	Anthony	DeFilippo	Kansas Resident	Lawrence	It seems that it would be best to ensure that in person classes do not begin before the number of new cases per day has reached a sufficiently low amount such that the outbreak does not explode again when schools open. If the schools begin online and formulate plans to allow safe reopening, they can perhaps avoid an inevitable closure and end up with more total time in-person than if they started when numbers are still high.
7/21/2020 14:51:23	Roanne	Doty	USD232	De Soto	PLEASE wait until AFTER Labor Day to open schools! PLEASE!!!

7/21/2020 14:51:25	Rebecca	Taylor		Overland Park	Will schools be providing the same plexi glass dividers between desks that the Kansas board members are privy to? I can only assume our children are just as important as the board members. How is it going to be possible to distance 20+ children 6ft apart in a small classroom, many of which do not have any working windows? How are the districts going to account for the children who receive Motrin or Tylenol prior to arriving to school? Parents send their children to school sick all the time so how will this be prevented? Temperature checks will not work when these children are given medication before school. Will hybrid options (remote and in-class) options be provided? What measures will the schools do to ensure that my child with a medical 504 is safe? How can children go back to school in the counties when the positivity rate is reaching 12-14% with rapidly rising transmission rates (Johnson County, Wyandotte, Sedgwick)? If my children or myself becomes hers COVID due to school transmission, is the state of Kansas going to pay for my and my child's medical bills? As a single parent will the state come in and help me take care of me and my children if we catch COVID? Help from my parents who are almost 80 would not be an option. It is not right to put the burden on parents to make the right decision for their families. We all want our kids back in school. We all need our children back in school. How can anyone right now say that the state of Kansas is in any position to do that safely right now? This is absurd. Our state failed at proper mitigation which is why we are one of the top states for transmissibility. I hope we don't fail our kids and teachers as well. We all need to do our part in containing this, but we are not even close right now in this state. Perhaps we should take note of how other countries handled this. They did not send kids back to school with the virus at its peak.
7/21/2020 14:51:33	Sunnte	Haines	Larned usd 495	Larned	I am writing to request that our kids aren't mandated to wear masks! I believe enthusiasm is a huge part of teaching little kids at least and if the teacher is covered and the kids are covered that will make it very hard to do. They also learn a lot from Pronunciation of words when they are learning to read... I would really love to see it being left up to the parents to put their own child in a mask ! I feel as though our rights for our own children in our own lives are being taken away . Please consider all your options before making a decision
7/21/2020 14:51:35	Jeremi	whitham	Parent	Tribune	Please consider giving each district the choice of delaying start of school. We are not being affected by high rates of COVID -19 in our community. I've been participating in a site council with our school administrators for the past 6 weeks. They have a safe and common sense plan in place for our students as they return to the classroom where they belong. I'm both a parent and health care professional and I'm confident our students will be in a safe environment where they can continue learning. I appreciate your consideration of this.
7/21/2020 14:51:36	James	Norris	None	Topeka	Open the schools. Children a VERY low risk and it makes no sense to keep things shut. If you are going to delay opening your going to reduce my taxes right?
7/21/2020 14:51:37	Natalie	Freeman	Self	Overland Park	Please do NOT delay the start of the school year! Education has not been happening since early March and the kids are at risk of falling too far behind. In addition, they are suffering from depression and isolation which has the potential to be more detrimental to them than COVID-19. School can be attended in person in a safe manner. At a minimum, this decision needs to be made by each school district, not by a one-size-fits-all mandate by the governor!
7/21/2020 14:51:45	Stephanie	Bailey	Parent	Scott City	I am a mother to 5 children all school age and I want my children to resume their school and activities. School needs to resume immediately and no masks need to be required. Our kids need to get back to life. Deny Laura Kelly's orders

					<p>Please uphold the Governor's delayed start executive order. This is a time for my children's schools to actually get things in order to be able to do what is necessary to be safe and collaborate go have solid lessons.</p> <p>Please do not make local boards have to go through and decide individually. We elected Governor Kelly. She made an executive order that will help. Please don't do anything to prevent it from going through (and have to start over the process with each local board).</p> <p>Regardless of numbers in counties currently, they are likely to go up with sports etc. Others might go down. Administration needs time to get things ready, get supplies, update systems to keep the buildings safe for children. Teachers need time to collaborate, spend time making good lessons that can easily flow between remote, hybrid, and in person depending on the numbers in the counties. Please do not take this gift of time away from schools. As a parent I want this time for the schools to prepare all safety precautions so it is actually done correctly. I want teachers to have time to collaborate and adapt lessons so they are well thought out and can provide meaningful learning on these new environments that are also fluid</p> <p>No matter the number of current cases, each school needs time to make these preparations now for the year. Please don't rush this and jeopardize the health of my children or the quality of the instructions that could have been provided for them.</p> <p>As a teacher, I am willing to and wanting to do this collaboration even if some of it isn't paid, even if we go later into May or June as a consequence. As a parent, I am even more adamant that time is provided for schools to do this well. We simply have not had the time to prepare like we usually do since we haven't known what we are preparing for (this includes both prepping the building for safety and prepping lessons for quality in new formats). Please don't take away this gift of time to start school right for all districts in the state. Regardless of current numbers, all schools need to do this work before starting with students.</p>
7/21/2020 14:51:57	Crystal	Kerr	Parent to middle school	Andover	Thank you.
7/21/2020 14:51:58	Jerad	Gorney	My family	Gardner, KS	If you pack teachers and kids in schools face to face kids will become vectors to parents and others in the community. People will die. Go online until we have a vaccine. (2nd semester, Spring 2021)
7/21/2020 14:52:06	Ashley	Westfahl		Wichita	As a parent and an educator we need to delay. 3 weeks will allow numbers to decrease as well as giving us all a chance to properly prepare for returning safely. The lives of children, educators, and all the family members of everyone that enters a school building are in YOUR hands. Make the right choice and delay start. It will affect how I vote in November.
7/21/2020 14:52:09	Jeremi	whitham	Parent	Tribune	Please consider giving each district the choice of delaying start of school. We are not being affected by high rates of COVID -19 in our community. I've been participating in a site council with our school administrators for the past 6 weeks. They have a safe and common sense plan in place for our students as they return to the classroom where they belong. I'm both a parent and health care professional and I'm confident our students will be in a safe environment where they can continue learning. I appreciate your consideration of this.
7/21/2020 14:52:13	Lisa	Reed		Newton	Open the schools as usual and let wearing a mask be preference, not mandatory.
7/21/2020 14:52:16	Bill	Taggart	Individual	Overland Park	Keep making decisions based on advice from the experts that are still learning about this new deadly virus to keep our students, their families and school staff safe!
7/21/2020 14:52:18	Monte	Evans	Self	Wichita	I support Executive Order 20-58.
7/21/2020 14:52:23	Michele	Gerber		Silver Lake	I am a teacher and mother of 6. I would like to see you override the Governor's EO and place the reopening of schools in the local districts hands. Throughout the process of developing the Navigating Change document we've heard decisions would be at the local level. That's what's best for Kansans in my opinion. Our district has plans in place and is ready to return in August. Our own children need to return to structured learning environments with other adults. Thank you for your time!
7/21/2020 14:52:49	Jennifer	Power Steketee	Blue Valley Highschool	Overland Park	School needs to begin on time— look at the stats— the deaths around Covid are not around kids of highschool or elementary age— they are around LTC facilities and older populations!!!!

7/21/2020 14:52:55	JEFFREY	MOSS		OVERLAND PARK	While I can understand the argument that a "one size fits all" order does not address the unique needs of various districts EO 20-58 is the only and the safest option left the governor in the absence of any clear guidance. In urban areas forcing the schools to open while there has been no clear or continuing reduction of Covid-19 propagation is an invitation for even greater loss of life; students, teachers, staff and family members. The board, not individual districts, has a responsibility to create metrics that can be used to determine when schools can fully open, when a hybrid model is more appropriate and finally under what conditions a school or district must close. Until those metrics are defined and agreed upon all schools should remain closed and plan on starting the year via distance learning. Sticking your heads in the sand and leaving the decisions to individual districts will guarantee failures that were unnecessary. Hold schools to nothing but distance learning and take the necessary time to do your job well. Bottom line, do your jobs or resign.
7/21/2020 14:53:05	Paul	Walls		Wichita	I am the parent of a high school student, and I do NOT feel comfortable sending her to school right now while cases are so high. I AGREE with the delay of schools (public AND private K-12 schools) until after Labor Day and reevaluating at that time. There's no way high school students are going to adhere to social distancing and wearing masks during the school day, AND temperature checks do NOT account for those who are asymptomatic!
7/21/2020 14:53:25	Todd	Burroughs	Myself	Williamsburg	I do not believe that Governor Kelly should have the final say over the education of our children. That authority should rest with the local school boards.
7/21/2020 14:53:39	Scott	Currier	Retired Educator	Overland Park	As a retired educator I can't believe you are willing to put the lives of our students, teachers and community at risk. You must do the right thing and keep schools closed. If not, the death of every person connected to the Kansas education system will come back on those who vote to open.
7/21/2020 14:53:46	Joan	Frederick	Grandparent	Hutchinson	Schools NEED to reopen in August as planned. Surely you realize what this shut down is doing to this generation of school kids. Many are at home doing nothing because parents have to work. 2 and a half weeks will not make much difference...Open schools.
7/21/2020 14:53:48	Donna	Deever	Educator	Topeka	Please start schools after Labor Day, not because it is a political stand, but it is the safe and right thing to do. Children can be infected with COVID. School districts need time to get safety precautions in place, classrooms set up, teachers need time to prepare and districts need time to train teachers how to beat approach the new year. This is not a political topic, it is a health topic.
7/21/2020 14:53:49	Alexis	AMOS		Olathe	I fully believe the delay should take place and I will NOT be sending my 2 elementary children to in person school this year, unless there is some sort of hybrid. I think they should do something similar to what I've seen other districts and states do. A group goes in person on Monday and Tuesday, no goes Wednesday and another group goes in person Thursday and Friday. They can distance learn the 3 days they are not in person. It gives the best of both worlds and doesn't force kids to wear masks for 8 hours a day, 5 days a week. It is also less stress on the kids and everyone involved in the case of a possible need for full remote learning due to exposure or spikes this season.
7/21/2020 14:53:49	Emily	Yeager	Teacher/parent in USD	Manhattan	I support waiting to reopen in-person schools across the state until COVID-19 numbers drop significantly in Kansas. This is a short term situation that will become much more dire if reopening is hurried, leading to much greater educational and economic consequences for Kansans.
7/21/2020 14:53:52	Gitanjali	Thomas	Blue valley schools	Overland Park	Even though I would want nothing more than to go back to work....I am extremely worried about it not being safe, just yet. So many parents have expressed anxiety about their children going back to school. Some have grandparents living with them, some have children prone to pneumonia and severe allergies. One loss will be one loss too many. Please support Gov Kelly. She is not taking any chances and is devoted to keeping us safe. Sincerely, Special education Teacher
7/21/2020 14:54:16	Scott	Robinette	Maranatha Christian Ac	Olathe	Please allow schools to reopen without delays. We can manage risk effectively with masks, distancing and other important safety protocols, but we can't effectively manage the emotional distress and educational shortfalls that come with delays. Parents can still choose not to send their kids to school if they need to manage their own risk, but we need to have the option of in-person for those who need it. Thanks for your consideration and for all you are doing to provide leadership during this challenging time!

7/21/2020 14:54:22	Maria	Volden		Liberal ks.	The kids have been out of school long enough apparently this "virus" has no time limit...we need to move on and continue to live our lives...kids need to get back into the swing of things
7/21/2020 14:54:30	Jessica	Acosta		Hays	I believe kids need to be in school, not just for education but for social growth. I have seen my kids have been affected and I can only imagine this is the same situation with all children across Kansas and the US. Please let schools open on time. Our Kansas children need it.
7/21/2020 14:54:39	Elizabeth	Morris		Kansas City	Please do not put districts in a position where we are forced to ignore public health recommendations and social distancing requirements that are in place for all other settings. We know it's not safe. KDHE knows it's not safe. The medical community knows it's not safe. Making the start date after Labor Day is not the real issue. The incidence within the school will reflect the incidence of its community. Teachers and other staff should not have to choose between their health and their job. Parents should not have to accept the risks in order for their children to be educated. All the time and money spent on trying to plan, change plans, and change plans again to achieve the impossible—a safe school environment—could have been spent on ensuring internet access and purchasing robust online education platforms. SARS CoV2 is in the same category as all the communicable diseases that require vaccination for school enrollment. If an entire school can be dismissed for an outbreak of measles (which can be vaccinated for) we shouldn't be attending with the prevalence it has in our communities. Thank you.
7/21/2020 14:54:44	Deena	Amont		Lawrence	Please support Governor Kelly's executive order delaying the start of public school. My reasons are twofold: one, it will allow Kansans time to follow health and safety protocols and reduce the sharp rise in Covid-19 infection rates in the state, and two, it will allow school personnel to properly plan for the best education for Kansas students.
7/21/2020 14:54:46	Ashley	Ippert	USD 380 Schools	Frankfort	I am opposed to opening schools before the labor day holiday. I feel it is in the safest manor for the staff, teachers, and especially the students themselves. We don't know the long term affects of this virus. Everyday there is new information and new studies. We opened the state to fast and look at our cases and deaths starting to spike. I would feel more comfortable and confident in waiting to start school until after the labor day holiday. Thank you for reading.
7/21/2020 14:54:46	Mary	Martin	Resident	Lenexa	Let's consider the health and welfare of our children and getting them back to school. Learning and social interactions are a very important component of a child's well-being. Let's be leaders and move forward by getting our kids back in school. Look at the scientific data, not the fear mongering emotional pleas to make this decision. Do NOT kick the can down the road. Make it as safe as possible with cleaning policies, hand sanitizing, etc.
7/21/2020 14:54:55	Sara	Stapleton	USD 300	Coldwater	Let the districts determine what is best for their individual school!

					<p>I am the mother of four active teenage children in the USD 497 district. I am also a registered nurse at a local pediatric clinic. Because of this, I understand very well both sides of the decision that you have to make concerning school and what it will look like for the 20-21 school year. I am thankful that I am not in your position, therefore I appreciate the time and effort that has been put into making this decision. I think delaying the start of school was a good idea, as I know that things can change, for better or worse, in just a few weeks time. I think that providing options for online, in-class and hybrid learning is a fair, safe solution. I am asking that you consider allowing sports conditioning to continue in the month leading up to school. As a healthcare provider in a pediatric population, I have seen the mental and emotional toll this has taken on our kids over the last few months. The amount of increased anxiety and depression concerns and the reports of attempts at harming themselves has skyrocketed-I know this because daily I see the effects and triage phone calls from parents that are worried about their kids. I can tell you as a mother, the morning conditioning workouts are what motivate my kids to stay out of trouble-especially given the enormous amount of free time they now have-and to come home early and get a good night's rest. It is the only thing that is getting them out of bed, sometimes before I do. It is keeping them off of their electronics and the endless black pit of social media. For some, sports and activities are sometimes the only motivating factor for them to succeed. I can tell you from personal experience, the LHS football coaches have done an outstanding job of adhering to proper social distancing, safe conditioning workouts. I have a difficult time understanding why this would be an issue if it is done in a safe way. If there are some that are uncomfortable with allowing their kids to continue participating, I can appreciate that and they certainly can choose not to opt out. But to take this one thing completely away during a time that is as dark and stressful and full of anxiety as this is right now could be detrimental to our kids. Please consider doing everything you can to keep our kids involved, while keeping them safe.</p> <p>Thank you for your consideration</p> <p>Sincerely,</p> <p>Kelly Mondri</p>
7/21/2020 14:55:00	Kelly	Mondi		Lawrence KS	
7/21/2020 14:55:08	Wendy	Macrorie	Holy Trinity	Lenexa	Reopen schools no mask for students before Labor Day
7/21/2020 14:55:12	April	Brenner	Blue Valley Randolph, U	Randolph Ks	I have three children under the age of 12. They need regular school days. They are desperately looking forward to being in their regular school environment with their peers. They are at critical ages where school is vital to their daily growth. I am a taxpayer & I choose to send my children to public school. If I wanted to homeschool, I would choose that. If I have to mandate my children's remote learning again, I would like to receive monetary compensation for doing so. It was a lot of work & it isn't my career choice. I didn't not see any growth within my children during remote learning. They miss school. Desperately. Please allow school to move forward on September 9th. They WANT to be in school again.
7/21/2020 14:55:20	Henry	Friesen Guhr	Community member and	Newton	I believe that it is incredibly important not only for students but also for teachers and staff that the executive order stays in place. If we don't delay schools, it could contribute to a major breakout of the virus in our community. It's not just about protecting students but also about keeping them from spreading it to others that they interact with outside of school.
7/21/2020 14:55:22	Karin	Kaufman Wall		Newton, KS	I am so grateful for the wise leadership of the Governor! Delaying the start of the school year allows teachers and administrators contract time to develop a plan (hopefully with online option) for our kids to get an education without jeopardizing the health of our kids, all of our public school employees and the community that comes into contact with them!
7/21/2020 14:55:22	Rachel	Robb		Lenexa	I agree with the order that Governor Kelly is wanting to put into place, delaying the start of school until after Labor Day. This allows for us to do more to prepare and also flatten the curve more on COVID cases.

7/21/2020 14:55:24	Hilary	Nash	Maranatha Christian Ac	Shawnee	I know you are getting many opinions and comments so I will attempt to keep mine brief. I am a physician in Johnson County, as well as a parent with children in elementary and junior high. Although the issue is complex, I agree with the American Academy of Pediatrics and Children's Mercy that the long term risk of not having our children attending in-person school is greater than the risk of a Covid surge. The data continues to show low risk of transmission from children under age 10. Although the risk of transmission is likely equal to adults in ages 10-19, this age group is better able to comply with masks, hand washing and social distancing. I also think smaller schools, which are better able to meet social distancing requirements, should be allowed to start on time. Lastly, with flu season looming in the fall, the more school days we can get in before then, the better. I appreciate your time and consideration and we are certainly praying for wisdom and clarity with the difficult decisions the board has to make.
7/21/2020 14:55:25	Nina	Caldwell	Maranatha Christian Ac	Shawnee	Our family would love for school to start this year at our original time planned. They have been out for far too long. Distant learning isn't great for younger school aged children. They need social interaction. Keeping our kids safe is first priority. If our school is taking all those safety measures there's no reason for school to be postponed. We are blessed to be in a smaller setting. Our school has been taking these precautions over the summer when hosting summer camps. It has worked. My daughter is attending a different camp then the schools due to we needed all day camp and our schools was half day. With that being said daycare facilities still remain open. What is the difference from going back to a school setting and daycare? People still have to work. If we continue to shut down school or have distant learning where will our children go? We are fortunate enough that we have options but not everyone has this luxury. People quitting and not being able to provide for their families is a non negotiable.
7/21/2020 14:55:26	Sandra	Urban	Children	Lawrence	Keep our kids and teachers safe. Do not open schools at least until after Labor Day.
7/21/2020 14:55:41	Lisa	Howard	None	Atchison	I think Governor Kelly is spot on. Please allow our teachers and administrators to make sure they have all the supplies they need and also to make sure they have the right plan in place for our children and staff. This is new for everyone, they need the extra couple of weeks to figure out what is best. Hopefully the number of covid cases will decrease and make us feel a little safer taking our children out as well as keep our teachers and staff healthy.
7/21/2020 14:55:42	Charles	Hunter	Self	Olathe	Delaying the start of the school year is only effective once the governing bodies have made a decision on what to do. Until a firm plan of action is in place, delaying the start of the school year just causes the DoE and school boards to push back making decisions. What our schools and teachers need is more time to implement those decisions. As it stands now, parents and teachers will receive about two weeks notice in our area to enact whatever plan the school board decides. This means that if the school board's plan is woefully insufficient or if the DoE and school boards continue to pass the buck instead of taking responsibility for the safety of the students in the hope that someone else will make a decision first, parents won't have time to make the right decisions for their children.
7/21/2020 14:55:44	Katie	Kidwell		Junction City	I think we should absolutely delay school as long as possible, or do the fall semester online. If it is not safe for teachers, staff and students to return to school we should absolutely not force it.

7/21/2020 14:55:50	Andrea	Berg	Olathe District Schools	Shawnee	On KU health system's Facebook live, a pediatric infectious disease doctor said that they're finding that child to child and child to adult transmission is really only uncommon through age 10-12. After that, kids are basically acting like adults as far as transmission goes, which is particularly worrisome for middle school and high school students, teachers and staff. I am a 4th grade teacher, and I would like schools to have enough time to get any safety equipment in place that they need and safety procedures in place. I would like the staff to have proper training on what this will look like. I would like to see teachers have PLCs & staff meetings via zoom and no adults other than the classroom teacher should be in the classroom. That also means special teachers should not be coming into the regular classrooms to do art on a cart, etc. On nicer days maybe PE could be done outside to social distance. It would be great to have elementary students wear masks, but I don't know that this is always going to be doable for them. All adults in the building should be wearing masks. For middle and high school I think a mask should be worn by students and adults. I would also hope that as a classroom teacher I would have the ability to scan my students' temperatures as they come into my classroom and after they eat lunch. There should be a policy in place that if a child has a temperature they need to go home immediately. Parents should be reminded to keep allergies under control with proper medications. I would also hope that the school districts have enough cleaning supplies, gloves, hand sanitizer, etc. It might be beneficial for classrooms to also have air purifiers. I do think sports should continue because it's good for our bodies and mind, but precautions should be in place. I do believe it is important for the kids to start school in person.
7/21/2020 14:55:51	Becki	Bowman		McPherson	Please delay the school year until Sept 9. (LONGER WOULD BE BETTER!) It's not safe for schools to be open yet. We should not rush back to normal just because we want it.
7/21/2020 14:55:54	Terri	Maas	Me, Myself & I	SOLOMON	I personally think this is all idiotic! But really why delay the start when summer/fall is when the kids are the healthiest. Doesn't make any since to me! My daughter is young, active and healthy the chance of Covid causing her trouble or anyone in our house hold is pretty much none!! Its called building you immune systems. If parents have a worry about it then they can keep there kids home and have them zoom meeting classes.
7/21/2020 14:55:02	Tiffany	Baker		Shawnee	I think our Governor is ridiculous and does not have the best interest of our children in mind. Our children need normalcy again. The percentage of children catching or spreading Covid-19 is 0%! Not a single child has suffered or died. Keep that in mind when making the decision to close or delay our school. If you choose to close or delay. Make sure you furlough all employees so my tax dollars are not used for teachers sitting on their ass while us working essentially employees are now forced to either quit or find someone to actually teach our children because the virtual learning is an absolute JOKE and my children and I know several other kids got absolutely NOTHING out of the joke of virtual learning.
7/21/2020 14:56:02	Rae	Law	Mother of 4	Louisburg	I think it will be beneficial for the teachers and schools to have adequate time to prepare for the upcoming school year. As a former teacher, and now mother to 4 elementary age children, I know how much work teachers put into preparing for a normal school year. This has been a time of change and uncertainty. I believe that more time is needed before the start of school not only for health and safely needs to be met, but so that the teachers have time to prepare and be the best possible for our students. Thank you

7/21/2020 14:56:02	Peggy	Brown	Maranatha	Basehor	<p>When reasonable social distancing guidelines are met, we can reopen the classrooms safely. Maranatha Christian Academy has the classrooms ready to meet these guidelines.</p> <p>Staff members are also ready to teach in that environment. Health checks will be done before school starts and as needed, per guidelines throughout the school day.</p> <p>Students do not ride school busses. Parents are responsible for getting their children to and from school. This creates less exposure to individuals in a confined area.</p> <p>Any students with autoimmune issues, other health issues can be offered an online course alternative.</p> <p>Please allow students and parents the ability to make the best choices for their family's situation. A one-size-fits-all approach is counterproductive in our student's academic and social growth.</p>
7/21/2020 14:56:04	Nora	Schoenthaler	USD 231	Gardner	I would request the board vote to support the delay. Because of the rise in numbers and the often daily changes, our district, like many districts, have not yet released a plan to the teachers. Teachers want to teach, but they must be given the time to plan and train so they can provide the best education for the circumstances while keeping the students safe.
7/21/2020 14:56:06	Aubree	Alexander	Parent	Colwich	Let the kids go back to school, mask free, let the parents decide what is best for their children
7/21/2020 14:56:08	Sheri	Richter	Beeson Elementary	Dodge City	Please vote in favor of governor's order. Schools need time to figure out how to open the safely
7/21/2020 14:56:08	Georjann	Randall		Paola	Childcare centers, Walmart, grocery stores, and restaurants have been deemed essential, are schools essential or nonessential?
7/21/2020 14:56:14	James	Carney		Colby	Please let our children go back to school. I have two children that need a regular schedule and someplace to be around children their own age.
7/21/2020 14:56:23	Michelle	Kadolph		Derby	School should be online, but if it has to be in person, delay as long as possible. Children 4th grade and up are super spreaders!
7/21/2020 14:56:27	Christa	Minks-Brown	PTO member at multiple	Olathe	It is a difficult decision either way. Kansas already has an online public school however, and I don't see why a virtual option should be delayed. Having each district develop their own 3 pronged approach (online, hybrid & in-person) seems destined to fail because it spreads resources and attention even thinner. Why can't Kansas use the already existing virtual schools as an option for everyone who wants to be virtual and allow the previous existing brick and mortar schools to focus on making the in-person experience as safe as possible? Allow for fluid transfers between districts and virtual schools to fit the needs of the teachers/staff wishes and the parent requests.
7/21/2020 14:56:29	Kent	Kramer	Myself	Winchester	I think we should delay the start of schools until we have a plan for the safety of our kids and faculty .
7/21/2020 14:56:48	Megan	Ibarra		Olathe	I support the delayed start for the 2020/2021 school year. Teachers, staff, schools, etc. need time to prepare for all scenarios for their safety and the safety of our kids and families so that we can attempt to start and continue the year without disruption of school closure due to an outbreak, etc. Thank you for your consideration and all the time and energy you're putting forth to help put the best guidance and practices out there!
7/21/2020 14:56:48	Richard	Epp		Colby, KS	There no reason school can start as originally plan and scheduled. Everybody can check for a fever multiple times a day and hand washing can be done multiple times a day. If anybody has a fever send them home until they're fever free for 24 hrs, they could also be checked for COVID-19. Get the kids back in school and back to as normal as possible. I personal feel masks could be optional.
7/21/2020 14:56:52	Debra	Schwylhart	Retired Teacher	Winfield	School should not open for the sake of students, teachers and staff health both short term and long term. Scientists do NOT know long term effects! Remote learning should happen this year.
7/21/2020 14:57:21	Jane	Dor		Shawnee Mission	I know that you are being bombarded with all points of view in regards to delaying the beginning of school. I just ask that you take our current upward climb in cases into consideration. Every single child from Kindergarten to 12th grade is incredibly precious and worth protecting and if a delay in the start of school can allow the people of Kansas time to try to get this under control, then it is in our best interests to do so. In the end, every single life here is worth protecting and it is our utmost priority to keep them safe. Please consider the lives of both the students and staff here and give districts the time needed to prepare for what teaching will look like this school year.

7/21/2020 14:57:22	Allison	Cox	Myself	Leawood	Until the state can show a 14 day decline in cases of COVID, we need to avoid in person school. Delaying the start of school to after Labor Day will give the state time to see if the masks mandate is working and cases are going down! It will also allow for teachers to use their contract time (mid-August to Labor Day) to finalize their virtual lesson plans!
7/21/2020 14:57:51	Carol	Brown	Resurrection Catholic School	Wichita	I know you have a very hard decision to make, but I feel the students are much safer in school than at home. They are missing out on nutrition, socialization, and education. Many are at home without supervision, getting into trouble/abused, and lacking food. Please consider the children over the greater good.
7/21/2020 14:57:55	Sue	Forstner		Leavenworth Kansas	When will we get a refund of our taxes which was allocated towards the school system? I would also like a detailed spending report of last year as well as this year.
7/21/2020 14:58:03	Dawn	Prehn		Overland Park	I support Governor Kelly's decision to delay starting the school year until after Labor Day. I strongly encourage you to allow this decision to stand - the health of Kansas families depends on it. Please make smart, data driven decisions. Thank you!
7/21/2020 14:58:09	Shelley	Phelps	Teacher	Ulysses	I have mixed emotions about delaying the start of school. As a parent of two teenagers I'm ready for them to get back to school. They need to be with their peers and teachers. However as a teacher I could use the three weeks to prepare. Teaching in a mask with students in masks is a daunting . However my biggest hurdle is getting more comfortable with the technology so that I can be prepared to have a virtual class again. I am also concerned with how our community has dismissed the mask mandate and social distancing recommendations. Because of this we have seen an increase in cases. What will happen when we get students and teachers together? So overall, I think delaying the start of school will benefit the health of our teachers and students.
7/21/2020 14:58:14	Nancy	Wilkerson	St. Ann School	Prairie Village	Yes On after Labor Day start
7/21/2020 14:58:23	Brian	Hall		Topeka	<p>In March, Governor Laura Kelly did the right thing in keeping Kansans safe by finishing the rest of the 2019-20 school year online. That, combined with stay-at-home orders and the usage of masks helped keep the number of COVID-19 cases and deaths down in our state.</p> <p>Sadly, due mostly to political motivation, our numbers started to increase exponentially when the state re-opened. Now, our state is in worse shape than it was when schools went online back in March. While I don't think delaying the start of school until after Labor Day will decrease the number of cases or deaths without measures of additional stay-at-home orders, mask mandates, and increased testing, it will give districts, teachers, other staff, parents, and children time to get what they need to protect themselves and others and give extra time to work out how online school will work if needed.</p> <p>I understand there is no easy answer and the answer to every question just brings up more questions but we need to try to keep our numbers down as much as we can. Allowing students and staff to congregate in school buildings for upwards of 7 hours a day with little time to prepare is irresponsible. If one person in a school building is sick then everybody else is sick and everybody they interact with is sick.</p> <p>In closing, I am asking that you agree with Governor Kelly's executive order to postpone the start of the 2020-21 school year until after Labor Day in order for everyone to prepare, in whatever way they need to, for the new school year.</p> <p>Thank you.</p>
7/21/2020 14:58:27	Ashley	Nichols	Teacher	Topeka	I support the decision to start school after Labor Day. Districts need time to put a good plan in action and be prepared for the upcoming school year. With COVID cases increasing, it is better to start a little later. So many times parents would give their children Tylenol and send them off to school when the child had a temperature. Parents have also sent their child to school after the child had been throwing up all night. It is best to wait until everything is more under control and districts have a plan in place. The safety of everyone is more important than starting school in August.
7/21/2020 14:58:30	Ellen	Kampfe	KNEA	Lindsborg	Please comply with the Governor's mandate that schools delay opening until after Labor Day. I teach in Salina, and numbers need to go down before opening with children in the classroom.

7/21/2020 14:58:34	Kerri	Christian	Lawrence High, Billy M	Lawrence	I agree with the governor's order. Thank you for keeping our kids safe. I would also be in favor of stopping in person/ classes by before Thanksgiving and keeping it online only until after winter break
7/21/2020 14:58:38	Brian	Cody		Leawood	Delaying the start of school until after Labor Day is the responsible choice for our kids, the school administration and faculty and all of our families. An extra couple of weeks could do a lot for public health/safety but won't have a negative impact on the school year.
7/21/2020 14:58:41	Patty	Leary	Usd259 Nutritional Serv	Wichita	Open Schools these kids need structured education and proper social skills <del>Dear State Board of Education representatives,</del>
					<p>I'm writing to urge you to vote in favor of Governor Kelly's Executive Order 20-58. This is literally life and death. If we mess this up, there will be no way to recover the lives of the children, parents, teachers, and staff we lose. With COVID-19 cases trending staggeringly upward over the last few weeks and over a thousand cases identified yesterday alone (July 20th), it would be hugely irresponsible of us to put our communities at risk by allowing schools to open at this time. I've heard the argument made that this should be a local decision left up to each respective community to decide what is best. Unfortunately, this idea fails to account for the fact that some of our more rural communities are also the most vulnerable. Even if numbers are currently very low in these areas, the scarcity of hospitals, the fragility of local economies, and number of high-risk individuals (due to health conditions and/or age), mean that an outbreak spread through the school system without warning could be devastating in ways that our already-strained small-town communities may never recover from. All evidence from scientific experts makes it clear that the level of risk is too great at this time and we need to follow Governor Kelly's leadership in instituting a policy that unites the entire state.</p> <p>As a current public school teacher, I know many of my colleagues are looking to Wednesday's decision to decide whether they will stay in teaching. If folks feel that their health or the health of their family members is threatened, many of them will stay home or look for other employment, exacerbating the shortage of teachers which already exists in our state (not to mention the paucity of substitutes). In other words, trying to push forward in reopening schools without making sure teachers and staff members feel safe is almost guaranteed to backfire and leave us in a situation in which districts are do not have the minimum number of teachers they need to keep a building running, let alone meeting the recommendation of smaller class sizes which ensure safety.</p> <p>I am healthy and in my early 30s. However, a friend of mine who shares the same characteristics (similar age, healthy, and no pre-existing conditions) contracted COVID-19 back in March. She was bedridden for six weeks and made two visits to the hospital. She is still working with her doctors to determine if some of the health effects she suffered are temporary or permanent. Please understand that if you vote to block this executive order, you are sending the message to teachers, staff members, and parents of our students that their lives and their long-term health are expendable at the</p>
7/21/2020 14:58:42	Laura	Bock	N/A	Overland Park	I understand that people are scared, but leave the health decisions to the parents. It is your job to keep schools open and the parents' job to make health decisions and raise their kids the best way they see fit. Do not delay the opening of schools.
7/21/2020 14:58:45	Emily	Boehm	USD 253 Middle School	Emporia	Please follow the Gov. Executive order for delaying the start of the school year. The students and educators should not be out in harm's way to satisfy politicians that know nothing about the workings of a school building. Educators should not have to feel the pressure to update their last will and testament before returning to work. Virtual learning is the obvious solution while the numbers continue to rise in the state. Virtual learning does not mean expectations are lower or that students won't receive a good education. Kansas teachers care for students but we shouldn't be forced to choose between our family safety and work. It is not a teachers job to be the glue that holds together our economy or takes care of kids so parents can go back to work. That falls on the politicians to help those families until it is safe to return to school.
7/21/2020 14:58:50	Kerry	Wixon	USD 204	Lenexa	
7/21/2020 14:58:59	Susanna	Cooper	Healthcare	Horton, KS	Please let science and public health guide your decision. There is no way students will be able to socially distance adequately. I 100% support Governor Kelly's executive orders and plead with you as a mother and a nurse to vote to uphold these orders. It's not a question of if but when we will have massive statewide spread, illness, and loss of life.
7/21/2020 14:58:59	Amy	Stevens		Shawnee	Please delay the start of school per Gov. Kelly so our administrators and teachers have more time to prepare for a safe re-entry.

7/21/2020 14:59:07	Shelley	Jaderborg	Myself	Shwnee	Please follow Gov. Kelly's fact-based recommendation to open schools after Labor Day. The economy will improve and thrive when the corona virus is defeated. I will homeschool before I will send my family to school without a mask before Labor Day.
7/21/2020 14:59:11	Autumn	Williams		Olathe	I applaud Governor Kelly for taking the extra steps to keep our children safe. The school's will need that extra time to put in place new safety procedures, train staff, and acquire additional PPE for the upcoming school year. Our children, and students, need the extra time for infection numbers to decrease, as well.
7/21/2020 14:59:23	KRISTI	CARRITHERS		DERBY	I have a grandson that attends school in Derby, Ks. I have witnessed too many people disregard the science that wearing a mask protects everyone. The wearing of masks has become a political issue. I humbly ask you to support the governor's order to postpone the opening of schools until September. While I understand that not all districts face the same challenges to dealing with the safety procedures necessary, this is only a couple of weeks. Please support the order so that all districts are on the same path to recovery from this crisis. Thank you
7/21/2020 14:59:24	Mary Jo	Gates		Overland Park, Ks	I support the governor's order to delay opening schools until after Labor Day.
7/21/2020 14:59:28	hi	hi	hi	ks	If teachers are exposed to covid 19, what happens to that class?
7/21/2020 14:59:30	Michelle	Westrup	Parent of middle and high school	Lenexa	Please delay in-school teaching until at least Labor Day. Also, only allow in-person teaching after cases have shown a trend of decline.
7/21/2020 14:59:35	Gina	Cabanas		Lawrence	I would like to see schools start back up asap and as soon as it is safe for the kids. It is important for them to get back to routine. There needs to be temp checks and more disinfecting along with handwashing and sanitizer. It is possible to get them back if everyone works together
7/21/2020 14:59:43	Kendra	Moss		HOXIE, KS	Our children need to go back to school and back to normal. This political agenda needs to be stopped. Please send the kids back to school in August and make masks optional. Aren't we in America.....?
7/21/2020 14:59:50	Jeff	Watts	parent	Olathe	I support the Governor's mandate. I feel that it is irresponsible to even attempt to hold such large gatherings in what is still the midst of a pandemic.
7/21/2020 14:59:52	Susannah	Louderbaugh	Myself	Tribune	I believe that it is unjust to mandate all counties schools have to push back the start date for the school year. Our school district in Tribune, Ks can follow the social distancing and has only a few contained Positive cases. Also the pushing back of the start date will interrupt the custody agreement between divorced parents and cause undue court fees to determine wether the child can finish the school year with one parent or be cut short on their school year to go into the other parents custody. There is a difference for county with 10,000 plus people and just 1,000. I believe the elected county representatives should be able to decide what is best for their own county. Thank you for your time!

7/21/2020 15:00:08	Brenda	Carroll		Shawnee	<p>I am a school nurse and a parent of students that attend USD 232. I am writing to ask you to eliminate the need for temperature checks at school. 1) Covid patients are contagious 2 days before symptoms begin and many pediatric patients do not present with a fever. 2) Temperatures are impacted by hot or cold weather conditions as well as if the student has recently exercised. 3) Thermometers continue to be in short supply and the cost to obtain high quality (meaning accurate) thermometers is quite high. 4) The logistics of taking temperatures are mind boggling and will take significant time for little benefit.</p> <p>Please consider allowing schools to monitor for symptoms throughout the school day rather than doing temp checks. Additionally, please consider having parents monitor temps at home rather than making this another burden on the school.</p> <p>I am in favor of the delay until after Labor Day IF school staff, particularly school nurses, are allowed to use the time productively to prepare rather than simply having our start dates pushed back too. Additionally, I am in favor of a hybrid model of instruction with some in person contact and some online instruction. While Covid is scary, there are many other concerns including mental, emotional and developmental health that must be balanced with physical health concerns.</p> <p>Finally, please consider waiving all screenings (vision, hearing, dental) for the 2020-21 school year. These will be difficult to manage with social distancing and online instruction plus nurses are going to have a heavy burden of care this year with Covid restrictions.</p> <p>Thank you for your consideration.</p>
7/21/2020 15:00:13	Kjia	Hart		Overland Park	<p>I am in favor of delaying the opening of schools for the safety of staff and their families. Returning to the classroom before it is safe in the name of “learning” and “getting back to normal” is reckless and will not accomplish that goal. No quality learning will take place with the precautions necessary at this time. I would be in favor of opening for online classes only. Teachers will need time and training to prepare for this option.</p>
7/21/2020 15:00:26	Leslie	Krehbiel	USD 331 - BOE Membe	Kingman	<p>I urge you to vote against EO 20-58 based on the damage it causes to all civic engagement. Our area is mitigating covid-19 with efforts that make us proud. Over all this time, we have minimized effect to 5 cases. Citizens have responded, school officials have worked tirelessly to prepare for a meaningful school year in the midst of uncertainty. We held a graduation, but cancelled a prom celebration for the second and final time. We've handled tough and disappointing decisions and maintained a determined attitude - until EO 20-58 which leaves us doubtful, hopeless, listless, and defeated. Disengagement on all levels will be the result of EO 20-58 if it is passed. No one in our area will be affirmed for previous efforts and the hope of some sort of school year becomes elusive. EO 20-58 is very damaging to any interest in civic service possibilities, after all we watch 2 months of work by volunteers to the KS BOE become null and void by an EO that surprised everyone. Please allow the local areas to survey and determine what is right for their area. The governor calls it a burden for local leaders to decide, I call it robbing their dignity for the reasons they ran for elected positions.</p>
7/21/2020 15:00:30	Mary	Colvin		Weir	<p>We just received the guidance from KSDE. We need TIME to put everything into plans and action. We had to rush to turn in a dime in the spring and it didn't go well. Let's not go about it the same way again. The delay is what is best for everyone!</p>
7/21/2020 15:00:37	Mary	Kraft	Self	Emporia	<p>Schools need to open up!! Children are falling behind academically at a rapid rate. Abused and neglected children have no one to report the abuse and neglect. There is no data to support keeping the children home, they need to be where they can learn socialization skills, age appropriate educational material and have food. We have so many children that these are the only meals they get! There is no one to drive them to a location to pick up food. Some parents cannot provide for their families and help the children with their on-line classes. Very few children learn well using on-line methods. We want our children safe, educated and socialized - they need their peers!! Please open Kansas schools. Thank you.</p>

7/21/2020 15:00:37	JOHN	stalec	MCA Shawnee Kansas	Shawnee Kansas	I don't agree with wearing masks. I don't agree with you closing the schools last year. I'm an essential worker I I drive a truck for a living and work with 583 other drivers out of the FedEx terminal. We've had to covet cases in the FedEx terminal since its this stuff came around. We just started wearing masks due to Governor Kelly's brilliant idea to force everybody to wear a mask which I think is wrong turn! I will let you know this if you do not open them up in August more than likely I will look into homeschooling.
7/21/2020 15:00:48	Robert	Brooks	Grandparent	Wichita	Wait to open school is the best idea
7/21/2020 15:00:54	Carmen	Cutting	Mom of 3 children in Ka	Overland park	Kids need to go to school for mental and social stability! The risks of Covid are minimal for kids and a much smaller risk than the common flu. Pediatricians even recommend that they go to school. Our Governor is STEALING school experiences (including sports) from our kids. If some don't want to send their kids, then they should have that choice, BUT don't make that mandatory for others who want to go! Have each school determine the risks they have. It's not the same for all schools. Our Democratic Governor is trying to CONTROL us!
7/21/2020 15:00:57	Megan	Casper-Rose	Parent	Bennington	I don't mind delaying school until after Labor day just as long as kids can actually go to school in person and participate in sports! Please do not do all online learning.
7/21/2020 15:01:00	Robin	Simmons	Olathe233	Spring Hill	Please uphold the EO.
7/21/2020 15:01:01	Susan	Lehrman	USD 411 and USD 373	Goessel	I support the executive order to delay the start of all Kansas schools.
7/21/2020 15:01:13	Kayci	Weimer		Gardner	Good afternoon-  I am a parent in the Gardner-Edgerton School District, and I am writing to ask you to support Governor Kelly's executive order to delay the opening of Kansas schools.  As a single, working parent, I desperately want schools to open back up again; however, I am not willing to send my child into an unsafe situation. The order by Governor Kelly will help ensure that students, teachers and school staff are able to return to schools in the safest way possible. I strongly urge you to support our Governor's efforts to keep our children & teachers safe.  With thanks, Kayci Weimer
7/21/2020 15:01:15	Elizabeth	Godfrey	Parent in the Blue Vally	Overland Park	Thank you, Governor Kelly, for putting common sense and science first when making the difficult decision to send our children and educators back to school. We appreciate you and support you.
7/21/2020 15:01:23	Rhonda	Buckles	Myself	Independence	I am a grandparent of 4 children who will attend KS schools this year. I am FOR Gov. Kelly's delaying the start of school. The delay would allow a reasonable amount of time to lower the rate of positive Covid cases. In addition, if Gov Kelly would again mandate masks, require social distancing,, & turn back the reopening phases of our cities, our KS kids could more safely return to school after Labor Day. As a retired teacher of kindergarten, for over 20 years, I would not want to return to teaching during these dangerous times. I don't want my grandchildren there, either - at least until the virus is contained. It would also be my hope that when schools DO OPEN, they have shorter hours of instruction with some virtual learning. Small children should not be required to spend as much time in school, as their older counterparts.
7/21/2020 15:01:24	Kayla	Shaughnessy	Holton Elementary	Holton	I am an educator in Jackson county at Holton Elementary school. I have been a 2nd grade teacher for 4 years. Never in a million years did I think I would live through a pandemic that would close down our schools, but here we are facing a very challenging time in the United States. I am writing to voice my opinion on the governor's recent executive order on delaying schools until after Labor Day. I believe that this is exactly what Kansas school systems need to prepare for the challenging times we face ahead. As you are voting on this decision, please keep the safety of our educators in mind. We can't wait to get back and make a difference in our children's lives, but we also need to make sure it is safe to proceed. We can't risk losing our greatest educators, as we are already struggling to keep teachers in schools. So please, hear my voice and share my thoughts with the board as you vote to delay school until after labor day.

7/21/2020 15:01:31	Shawna	Hansen	Self	Maize USD 266	I am anxious for my children to start school on time. Even though they had distance learning in the spring, it was not to the standard that we expect. There needs to not be a gap of 5 months in children's educations. We must find a way to do both appropriate learning and stay as safe as possible. The option of zero cases of corona virus will never happen, so we must find a way to do both items. If we delay now, who's to say we won't delay again and again. I vote for kids in class 5 days per week or have virtual option. This works for working parents and for parents able to help with a virtual program. The governor is not using appropriate data to support this choice.
7/21/2020 15:01:40	Robert	Coberly	Maranatha Christian Ac	Lenexa	Please allow schools to open as regularly scheduled in August and not after Labor Day. Science is showing kids are at very low risk of either getting or spreading Covid 19 and delaying or diminishing their education is certainly not without significant risks to their future well being.
7/21/2020 15:01:46	Kim	Spillman	Myself, as a teacher	Lenexa	Please give us the time we need whether it's to open in person, or to prepare new curriculum we will need to teach online. Please vote to start after Labor Day. Teachers need TIME. Why are we in such a hurry? Schools used to open after a Labor Day all the time.
7/21/2020 15:01:50	Austin	Mann	USD 259	Wichita	I'd like to see a hybrid. That way students and teachers that are immunocompromised can teach and learn safely at home while the rest of us who are healthy and know we will be ok, can wear masks and social distance at school effectively.
7/21/2020 15:01:50	Adrienne	Geiger		Troy	Please DO NOT delay the start of the school year!!!
7/21/2020 15:01:53	Trisha	Adams	Community member	Dodge City	Don't push it back to September 9th!
7/21/2020 15:01:57	Megan	Belisle	USD 259	Wichita	I believe that the delay to the beginning of the school year is a very smart idea. The cases of COVID 19 are increasing daily and far worse than when the schools were shut down in the spring. I love my job but am not willing to risk my life or the lives of my loved ones and that's what I'm scared of doing if schools open up too soon before there is a significant decrease in COVID 19 cases. Hopefully with this delay and the mask mandate in my county, there will be time to see if the cases do decrease. If not, I still think schools should open on Sept 9 but not in person. School should be online until we can lower the curve. Getting back to school is not worth risking the lives of staff members, their families or students and their families.
7/21/2020 15:01:57	Janel	Voorhees		Belleville	I think it's a good idea to delay school I also think it would be much safer to do online schooling as well..I would much rather my kids be in school and so would they but I also worry about everyone's health and well being
7/21/2020 15:01:57	Candice	Rambo	Sedgwick county comm	Wichita	Please consider not opening school until there had been a major improvement in this pandemic. We opened too early as a city and now our positive cases, hospitalizations, and deaths have all significantly increased. These children MAY NOT get as sick as older populations but they are bringing it home to their relatives who then spread it farther. We do not have any type of solution for this pandemic and sending a bunch of children back to overbooked classrooms with terrified teachers will only make the situation worse.
7/21/2020 15:01:58	LeAnne	Stowe	Business owner	overland park	Support schools being online only including colleges
7/21/2020 15:02:00	Chris	Davis	I am a parent	Liberal	No they need to go back to school they do not need to be delayed
7/21/2020 15:02:07	Amands	Kennedy	Teacher	Holton	I support the Governor's orders to delay school until September 9th. It will give the administrators, teachers, secretaries, janitors, bus drivers, etc enough time to properly plan and prepare a plan that is safe and appropriate for our students. If not given enough time I feel pushed into an unsafe environment.
7/21/2020 15:02:12	Mary	Boehm		Elbing	Do not delay the start of school! Leave the health decisions to the parents.
7/21/2020 15:02:14	Kristen	Hopkins	USD 383	Manhattan	I teach at Manhattan High School. I have been in contact with many students over the course of the past months. They are struggling, emotional, depressed, and scared. Not because of the virus, but because they need interaction. They need a strong, safe and caring learning environment. Please consider not approving Governor Kelly's order. We have never in history closed school because of a virus. We are still 50+ million away from hitting the Swine Flu numbers from 2009! Kids are regressing. I have a second grader and kindergartener. They are praying to go back to school. Please, school should not be delayed. Do this for our kids.

					<p>Please remove the politics from this decision!</p> <p>When you consider all the variables and possibilities, we have little control, as a society, over how this virus is spread. It is easy to describe certain orders and mandates as absolute when standing at a podium or making comment in a public forum but the reality is no law, order, mandate, regulation, or even public shaming will have absolute control over whether this virus is contained by masks or any arbitrary delay to the start of school. We cannot logically assume that ALL kids AND faculty will wear their masks all day without question. We cannot assume they will wear them correctly, keep their hands off them, wash them daily, or limit any exposure to anyone or anything outside of school hours. The reality is these mandates become empty promises that will never be able to provide the security or protection they are said to achieve. They will instead be a major distraction that prevents the education they should be receiving. They may even lead to a false sense of security that risks higher infections instead of preventing them. The executive orders will not magically create absolute adherence or somehow correct the usage of masks. In addition, this proposed delay is more likely about lining up with other executive orders expiring on Labor Day, than related to any facts about the virus. To my knowledge, there is no data anywhere that says September is different than August in relation to this virus. The idea that school officials need more time to review the plan is interesting considering they have been reviewing and planning since March. There are certainly a lot of things to consider but if our educational leaders throughout the state cannot find a way, at a minimum, to provide the same level of education as in previous years, then what is their priority. Is it more important to save face and associate with one public opinion over another or should they take a step back and remind themselves what our educational system is designed to do? This decision should be about how to best educate our students DESPITE the pandemic, not how much we can reduce their education, and still be "OK" with it. Everyone has the right to be scared for many reasons but please do not let fear drive your decisions. What we need right now is clear thinking and honest decision making about what is in the best for our children's education. Everyone in the school system can and should take whatever precautions they deem appropriate for themselves but truncating the school year and trying to force mask usage on ALL students and faculty regardless of their own beliefs does nothing but weaken the education our students receive and further politicize an educational system that should be unbiased. Regardless of political beliefs, we have always kept schools open during other seasons of illness. In fact, when the 2009 H1N1 pandemic swept the nation, there were no school closures or delays even though it was much more dangerous to the children! Education was still provided because there was an understood agreement</p>
7/21/2020 15:02:19	Craig	Poe	My own children's and a	Manhattan	
7/21/2020 15:02:20	Julia	MacLachlan	Patron of USD 512	Lenexa	I completely support Governor Kelly's order to delay the start of school until after Labor Day.
7/21/2020 15:02:24	Megan	Lorson	None	Gypsum	Please keep schools closed. An inconvenient short term is much preferred to possibly devastating consequences.
7/21/2020 15:02:26	Nolan	Hull		Colby	No masks. Everything goes back to normal. Play sports. Don't cheat these children.
7/21/2020 15:02:31	Sheyda	Jahanbani	Self	Lawrence	I fully support whatever measures the Governor thinks are necessary to keep our children and communities safe. I do not support Republican death cultists who seem to have gotten so far away from facts that they no longer recognize simple science. Please, Governor Kelly, protect us from them as well as the virus.
7/21/2020 15:02:35	Jennifer	Green	The Green Family	Abilene	I appreciate the need to start a few weeks late to prep for sanitation, etc., Please do not mandate children to have temperature checks nor wear face masks. Suggest, please do not mandate. Very Respectfully, Jennifer Green
7/21/2020 15:02:36	Austin	Mann	USD259	Wichita	I think we should delay opening school.
7/21/2020 15:02:46	Lynn	Malir	Resurrection Catholic G	Lenexa	As I read the fine print of the Governor's executive order, I am surprised and disappointed to see that both public schools and private schools that are ready and can go on-line in August should be held back! Our students at Resurrection Catholic School already have many barriers to overcome and this order holds them back when our school was already fully on-line last year. Why make an order that hold back schools that are ready? 75% of our students are at poverty level and almost the same percentage are English as a second language. They are already behind and this forces them to be further behind. This order is a penalty for being prepared and hits our school even harder. Please please let the private and public schools that are ready to continue instruction in August! Thank you.
7/21/2020 15:02:46	Brianna	Boehm	Remington High School	Elbing	Do not delay the start of school! The best thing for children right now is to get back to school. Open school and leave health decisions and precautions to the parents.
7/21/2020 15:02:47	Isabel	Bogowith		Delia	No, schools should not delay opening. We are the only nation who is not opening schools as normal. The CDC says that children rarely ever transmit the virus or even catch it, therefore I see no need to put children through unnecessary pain.

7/21/2020 15:02:51	Heather	Leggett		Derby	Please delay, please allow choices upon return, please mandate masks and temperature checks, please allow distance option students to participate fully in athletics and extra-curriculars
7/21/2020 15:02:52	Lissette	Calderón	Wichita HS South	Wichita	Hire all subs. Eliminate electives for the 20/21 school year. Have those teachers assist in students main courses. Monthly in-service meetings on Zoom. Focus on catching up and working ahead to bring up state scores. Allowing seniors to graduate early or use 2nd semester to catch up on elective requirements. We are too far behind.  All students and faculty stay in the same room. No passing period. Lunches to be distributed to classrooms, providing better head count, no additional waste of food daily. Be the case COVID19 becomes a threat, that classroom can be closed and taught through computer/iPad for the 14 day or required time.  If students are allowed to work from home, those who do not show signs of improvement or meeting standards are mandated school after the first 6 weeks.
7/21/2020 15:03:01	Melissa	Lollar	Parent	Easton	I think we should start school on time. Starting school late will put a huge burden on my family, trying to find childcare.
7/21/2020 15:03:04	Nicole	Ratzlaff	Parent	Colby	Start after Labor Day in Classroom
7/21/2020 15:03:08	Elizabeth	Loomis		Lenexa	Why are private schools thrown into this EO? Our private schools have been diligently preparing for this scenario. Students need to return to the classroom. Have you seen the recent article in the WSJ about the social interaction our kids are missing? I am more worried about the mental health of students and teachers than i am of a virus with a 99% cure rate. If teachers do not want to, return, they have the freedom to make that choice and not return. Our students and families of those students also need that choice. I do not understand why you are limiting virtual learning. Please give the power to the district Administration or Principal for making this decision. Small private or rural schools are prepared for social distancing in the classroom. Private high schools require laptops and are ready to begin teaching. Every year we are told how much knowledge a student loses during the summer, this year they have been out 6 months, how much review will be needed? Why don't you want our students learning? Please let our students learn!
7/21/2020 15:03:13	Brent	Mariman	USD 315	COLBY	Please veto the EO. With two parents that are essential workers my child falls behind with online learning. My child does not get the education he needs.
7/21/2020 15:03:16	Alyssa	Kendrick	Member of the Olathe c	Olathe	As a parent of 3 high school children and a nurse practitioner, I urge the board to please approve the Executive Order to push back the start date of school to after Labor Day to slow the spread of COVID-19 and reduce the burden on our health care system and mitigate the risk to the students, their families, and those who work in the schools.
7/21/2020 15:03:16	Patti	Worthington	Teacher	Olathe	I am for pushing start date to after Labor Day.
7/21/2020 15:03:24	Cheryl	Ostmeyer		Oakley	I am in favor of and support Executive Order 20-58 that will delay the start of school until September. As a teacher in a private school I know we need more time to prepare to safely bring students into our school. Please vote YES to delay the start of school.
7/21/2020 15:03:28	Darcy	Hansen		Ellsworth, KS	Let's do what we need to do to keep our kids and teachers well. As a parent you a child with severe asthma I am concerned about her health and am worried about the other kids as well. I think this late into it, it's just best to start after Labor Day and give our administration time to take the proper precautions. I would rather start later and get to stay in than to jump the gun and have to go back to all online learning. Please keep all your constituents in mind when you make your decisions because it effects all of us. Don't make this a political game. Do the moral thing.

					<p>As a pediatrician and the parent of children in Wichita Public Schools, I support the decision to delay the reopening of Kansas schools and make the KSDE guidance mandatory for school reopening. Please work to approve Governor Kelly's executive order.</p> <p>On-site learning is vital for academic achievement and the social and emotional wellbeing of children. In order to successfully return to on-site learning, we must work together to decrease viral transmission in our communities as well as set up safety measures to mitigate transmission within schools. Delaying school reopening until after Labor Day will allow public health officials to have a better understanding of the viral transmission in our state and also give schools time to prepare and implement measures that will improve student and staff safety.</p> <p>The success of schools reopening will directly depend on the community prevalence of SARS-CoV-2. Currently, our state is experiencing increased cases, case rates and percent of positive tests for COVID-19. Opening schools at this time would be unwise. We are in the midst of a serious pandemic and the primary focus should be the safety and health of all students and staff. Furthermore, it is difficult to predict how the prevalence of COVID will change over the next few weeks. Our state is at a crucial time where we must work together to reduce the transmission of SARS-CoV-2. This means that all Kansans must limit non-essential public activities, wear masks in public places and practice good physical distancing and hand hygiene. Although these efforts have reduced viral prevalence in other communities, there has not been a consistent public effort to execute these recommendations in our state. It is likely that Kansas will continue to see increasing rates of COVID-19 in our communities.</p> <p>So, in the midst of the rising cases and uncertainty about the trajectory of COVID-19 in our state, schools must develop and prepare for on-site learning while also developing hybrid and remote learning programs. They must maintain a focus on academic achievement while also supporting our state's students in other domains such as social and emotional wellbeing, essential therapies and mental health. The "Navigating Change: Kansas Guide to Learning and School Safety Operations" document released by the Kansas State Department of Education outlined important academic guidance and safety measures. Parents, students, teachers and staff must feel protected and safe upon school reopening. The KSDE guidance should be mandatory to make school as safe as possible. Schools have only recently received this guidance and will need extra time to obtain supplies and prepare for the start of the school year in order to implement these recommended operations effectively.</p> <p>Kansas needs strong leadership that prioritizes safety during this ongoing public health emergency. Your collective</p>
7/21/2020 15:03:29	Paul	Teran	Pediatrician	Wichita	
7/21/2020 15:03:33	David	Drew	Individual Wichita Citiz	Wichita, KS	Considering the safety of students, teachers, and all staff I believe that school should be delayed until case numbers drop significantly. What will happen when a student or teacher gets sick? Even following all the safety measures it is likely to happen. What will the policy dictate if a student tests positive and has exposed the entire class or the greater school community? Will there be contact tracing and all those exposed sent home to quarantine? This situation is very dynamic and dangerous for our students, teachers, and school staff members. It is nearly impossible to keep younger students from sharing supplies, masks, or enforce distancing and hygiene standards. Please give serious consideration to delaying in-person school until it is safe.
7/21/2020 15:03:39	Andrea	Arnoldy	Self	Colby	Schools need time to make plans for each individual district. Sports should not be the main focus of education. One death in a school due to lack of planning is one too many.
7/21/2020 15:03:47	Joy	Lenz	Parent, public school tea	Winfield, KS	I am in full support of delaying school. This gives teachers and staff more time to re-think every aspect of their school day and make buildings safer for students.
7/21/2020 15:03:47	Cheryl	Ostmeyer		Oakley	I am in favor of and support Executive Order 20-58 that will delay the start of school until September. As a teacher in a private school I know we need more time to prepare to safely bring students into our school. Please vote YES to delay the start of school.
7/21/2020 15:03:49	Jessica	Gad		Olathe	I would like to see kids back in schools in August, with the option to attend in a school setting. No waiting until September.
7/21/2020 15:04:03	Matt	Clarke		Spring Hill KS	Please open schools on time to in person learning
7/21/2020 15:04:12	Gail	Smith		Lenexa	When making the decision regarding executive order 20-58, I urge you to take advice from medical experts and vote to delay the school year. I should not have to explain to educated adults that we are living in a Red Zone in the middle of a pandemic and if you choose to listen to unqualified political voices, you will be risking the lives of students, staff and their loved ones. Now is not the time to play politics when so many lives are at stake. Once again I urge you to delay the start of the school year so that Kansans can attempt to slow the spread of COVID-19 and so school districts have more time to prepare to protect the lives of all students and staff, including my own.

7/21/2020 15:04:14	Amy	Guerra	Family	Wichita	Please do not delay the start of the school year unless more time is needed for the faculty to prepare for kids to be in class at school.
7/21/2020 15:04:16	Erin	Debler		Alma	Good afternoon,  My name is Erin Debler. My husband and I live and work in the Flint Hills of Kansas as a rancher and banker. Our children are in the Wabaunsee USD 329 school district. I would like to encourage you to allow Kansas children to return to school in the fall as soon as reasonably possible. Thankfully, my children have been able to stay active at home on the ranch with their 4-H projects, but the extended period has taken a toll on them. Their attitudes and moods have been in greatly improved as they were able to safely play rec ball this summer for a shortened period and have returned to summer weight training thru the local school district. Being able to see their friends have been huge for them! And we have a stable home and family life. What about those children that don't? What about those children whose only safe place is school? Please see fit to give that back to them. It is desperately needed for the mental and physical well-being for not only them, but of all children in Kansas.
7/21/2020 15:04:16	Erin	Debler		Alma	Thank you very much in advance for your consideration.
7/21/2020 15:04:16	Quintin	Flanagin		Colby	Let our schools decide what is good for them. We are not having a surge in Covid cases in our area. We can safely get our kids back to school. Metro areas might be different, but don't punish our kids for what's going on in KC or Topeka.
7/21/2020 15:04:19	Brian	Vulgamore	Vulgamore Family Farm	Scott City	We need to open schools and have sports at their normally scheduled time this fall. We have learned that Covid is not a threat to young people. Poor and disadvantaged kids will be hurt the most by delaying school reopening. They Have already been out of school for nearly 6 months.  Continuing to live in fear is causing much more damage to our country than the coronavirus could have ever caused. We have to stop this nonsense and get back to living life normally! Our country can't afford this any longer. It will take some strong leadership on the local and state level to go against the Governor. I hope you are willing to step out.
7/21/2020 15:04:20	Brittany	Barton		Colby	I think a hybrid approach is best. This will allow the exposure to be minimized but will also allow children to get interaction with other children. For those kids who did well online have them physically attend classes Tuesday and Thursday and for the children who didn't like online format allow them more in class time - Monday, Wednesday, and Friday. For kids who have disabilities allow them to attend school daily with restriction to specific teachers and other kids. Something needs done to minimize exposure or there are going to be more and more outbreaks and children dying or having last effects from COVID.
7/21/2020 15:04:21	Tara	Schroer	Colby public schools	Colby	Start school later but please have activities resume as normally as possible. Let districts decide mask policies. Western Kansas is FAR different from eastern Kansas and even then our districts here differ too. Let the local boards decide what is best for our kids. Thank you for allowing us to give input. I appreciate your work and consideration.
7/21/2020 15:04:28	Lisa	Mathes	Usd361	Harper	We need to start school in person, we need to follow the AAP and CDC guidelines for safety.
7/21/2020 15:04:29	Brenda	Conrad	St Francis catholic school	Wichita	We need to delay and see our numbers coming down before bringing everyone back to school. Safety first. Gives us more time to prepare for precautions also.
7/21/2020 15:04:36	Michelle	Webster		Maize	Educators have always been data driven in preparing and presenting instruction to students. Opening schools should be no different. At this time the spread of Covid-19 is in the rise. To protect all that would be in direct or secondary contact in a school building Gov. Kelly's order should be upheld. The time will also allow for more plans to solidify in how to move forward with the entire school year.
7/21/2020 15:04:42	Melanie	Vandenberg		Lenexa	Please allow a local approach rather than a blanket policy that cannot possibly adequately address the needs of rural v suburban; parochial v public; and HS v elementary education.
7/21/2020 15:04:46	Kara	Warren		Hutchinson	Please delay the start of school to allows schools to have plans in place to keep staff and students safe.

7/21/2020 15:04:50	Emily	Mailey	n/a	Manhattan	As a working parent I have experienced how difficult it is to try to balance work and childcare/school. It is nearly impossible to do it all and I would love to have my children back in school. However, the governor is absolutely correct that it is not safe to reopen the schools right now. It is not safe for our children and especially not for our teachers, who may not have a choice to stay home if and when schools reopen. As parents we are going to have to continue to be creative, but our health should be the priority right now. I would like to see an allowance for districts to begin online/virtual instruction prior to Labor Day if they believe it is feasible to do so.
7/21/2020 15:04:51	Janice	Grisham	Just retired, 38 years wit	Frontenac	Please keep schools closed until it's safe for all involved.
7/21/2020 15:04:51	Hollie	Zimmerman		Wichita	Please start school on time.
7/21/2020 15:04:51	Brice	Barton	parent at usd 315	Colby	We have to be back in school for the sake of our kids. With that said we will likely need to make concessions to make that happen. If that means a needed delay or mandatory masks then that is what we need to do.
7/21/2020 15:04:53	Jacolyn	Cook		Great Bend	Please open our K-12 schools on time in August! Do not delay! Thank you!
7/21/2020 15:04:58	Kathy	Phar		Olathe	Please reopen our schools and vote no on Governor Kelly's overreaching mandates. Our children should not be a political pawn. This is causing children unnecessary and long-term social and emotional distress. Please vote no.
7/21/2020 15:05:04	Bailey	Stupka		Colby	I don't think the school year should be delayed.
7/21/2020 15:05:07	Bruce	Coleman		Wamego	Open schools when they are scheduled. Do not approve the executive order to move the start date. Kids need to be back in school. Thank you
7/21/2020 15:05:18	Marilyn	Moss	Myself	Overland Park	Schools should NOT be opened until after Labor Day, as specified in Governor Kelly's Executive Order. The current rates of COVID-19 make the school environment too risky for students, teachers, and staff. It may be necessary to have online learning only for some time until a healthy environment can be assured for all. Currently however, sending students, teachers, and staff into close indoor spaces for multiple hours per day, and then sending them home again to spread all the germs they've picked up is a guaranteed way to spread the COVID-19 virus efficiently, resulting in much unnecessary illness and probable death. It would be foolish and a dereliction of your duty to vote to do so. Please do the right thing and vote to keep our students, teachers, and staff safe and healthy. Thank you.
7/21/2020 15:05:17	Jack	McNickle	None	Cambridge, Kansas	It should be left to each individual school district. It is not for the governor to make a rule that applies to all school districts, because there are great differences in urban and rural schools.
7/21/2020 15:05:24	Stephanie	Simmons	Usd 382	Pratt	The kids needs to be back in school.
7/21/2020 15:05:25	Jennifer	Mencel	Parent and also teacher	Hutchinson	As a teacher, I am thankful for the possible opportunity of additional time to prepare for the safest opening of schools as possible. I want to be at school, I want to be with students, and I want my children at school, but only if schools are adequately and safely prepared to do so. The additional time will allow for the best decisions to be made, the safest decisions to be made and them implementation of those decisions. I don't want stressful, important decisions to be made in regards to my own children's safety and learning environment in a quick manner. This goes for my students and myself as well. We also need time to order the necessary equipment for a safe reopening and that will take time to get here. It's logical to wait a few extra weeks, especially if that means we can be in person with students.
7/21/2020 15:05:41	Jack	Jamison		Colby	Vote YES in support of E.O 20-58. School and teachers need time to prepare for all the changes they need to make.
7/21/2020 15:05:47	Morgan	McCabe	High School Music Teac	Concordia	I fully support Gov. Kelly's statement that schools should not officially open until after September 8th. Everyone's health is at risk and this time gives the teachers and students the appropriate time to readjust and create compatible opportunities for our students.
7/21/2020 15:05:51	David	Klahr	Holton USD 336	Holton	I request you follow Resolution 20-58 and delay the start of schools until after Labor Day.
7/21/2020 15:05:50	Jackie	Kindred	Parent	Lenexa	Please allow virtual classes/learning for those schools and/or districts that are ready. There is so much that can be done in this manner to allow students and teachers to begin the year. Teachers can set the rules and expectations. They can learn names, they can talk about requirements. Students can meet the teacher, get comfortable with the subject matter, see friends. It has been five months, please don't punish the schools and students that are ready to start. Even virtual learning is learning. As a parent of a child who did receive assignments, grades, and had to attend online class for the last two months of the year, I saw the good that happened. And how beneficial it was for my child. It can be done but don't make the whole suffer because some of the parts need additional time. Thank you.

7/21/2020 15:05:59	Tammy	Sanders	Teacher	Topeka	Our lives matter as well. We all want to go back to school but not until it is safe for all. I don't want anything to happen to my friends, students, their families or my myself and my family. Wait. Get everything in line. We need testing! If baseball players can get it why can't teachers.
7/21/2020 15:05:59	Sabina	Hoffman	USD 489 Early Childho	Hays	Please stand by and support Governor Kelly's EO to push back the start of school until after Labor Day. Randy Watson and our educators of Kansas have worked tirelessly all summer to create a well-rounded document to guide us through this school year but with that document comes many changes that need time to be implemented properly. Considering all of the changes because of Covid-19 and the constant changes we are still seeing in our state, please give us as educators the best possible way to prepare for our students by giving us this additional time to plan, prepare, and train our staff to properly serve our students. As the time frame sits, districts across Kansas will already be rushing to purchase necessary supplies as well as training employees in best practices while they coordinate with local health officials. Our students and families are dependent on us to serve them in the best capacity and we want to serve them accordingly by preparing ourselves to the highest extent. This is new and uncharted territory for all of us, please give your educators a fighting chance to create a somewhat "normal" year for our students. We all deserve the best for ourselves and our children!
7/21/2020 15:06:07	David	Jarmolowicz		Lawrence	Please delay opening
7/21/2020 15:06:17	Jennifer	Dugan		Arcadia	I believe that schools should resume as normal. There should NOT be any delay in school, activities or athletics. I feel as though the numbers speak clearly. We can not live in fear. We can take precautions to keep children as safe as possible, but should allow us the choice to send our child to school and allow them to participate in these types of things. Taking precautions with cleaning, hand sanitizer usage, temperature taking and such should have been used all along for things such as the flu virus. Give an option. If parents would like to opt for online learning, fine. But don't punish the ones that need the face to face learning. Don't punish the children from losing the opportunity to play sports, activities, etc. We can not live in fear for the rest of our lives over a virus. We have a right to be given a choice for our children. Schools in different states are resuming as close to normal as possible, and this should be Kansas as well. Governor Kelly should allow a choice to be given. A parent can sign a waiver, if it comes to that. Just like restaurants and businesses that have the opportunity to be open, so should schools. I work in healthcare daily and we are seeing more asymptomatic numbers than symptomatic by far. This is what they are not telling the public. We can not live in fear! Let them go to school. Let them play sports and participate in activities. Let them resume school on the original start date!!! Governor Kelly needs to allow us to have a choice. It's our right as a parent! We can't live in fear. Trust in God! Thank you.
7/21/2020 15:06:18	Sindy	Rosproy	none	McPherson	I support Gov Kelly's decision to not open schools until September 2020. Teachers and staff need time to plan for opening their classrooms safely.
7/21/2020 15:06:19	Sheyene	Heller	parent of incoming 8th g	Lawrence	Please accept Governor Kelly's recommendation to start school after Labor Day so that local school districts will have more time to develop their plans and prepare. The lives of our children, teachers, staff, family members, and friends are at stake here. We should not gamble with the health of our communities. Many of us with children in K-12 share the belief that school districts should not be rushed. Our children will do better if there is more time for appropriate planning and teacher training for various in-class, hybrid, and online options. Thank you for your consideration.
7/21/2020 15:06:20	Justin	Lehrman	Parent	Goessel	I think starting the school year later is the best thing to do. If Positive Covid-19 cases don't go down then maybe we should look into going online like we did the last semester.
7/21/2020 15:06:21	Elizabeth	McCleary	My community is Scott	Scott City	Please vote to allow each district the right to make their own choices in this matter. This matter is too important to be a "One size, fits all" scenario. Our local school board knows their teachers, students and community best. This is what America is all about. We voted in the local leaders because we trust them, to know us and have our best interest in mind. LET THEM! Thank you.
7/21/2020 15:06:25	David	Rieder		Overland Park	I am aware that this is a big decision to make and I do not envy those having to make it. I am in favor of keeping the school schedule start date in August, or at the very least allow schools that want to start in August do so by distance learning until Sept 1.
7/21/2020 15:06:26	Tonya	Raaf		Holton	I dont think delaying it will help because influenza season is only weeks away from September 9th.
7/21/2020 15:06:28	Cindy	Bowman		Goodland	Please vote to accept Governor Kelly order to delay school opening.

7/21/2020 15:06:37	Shelly	Duvall	USD428	Great Bend	Kids and teachers need to be in school. Every precaution necessary will be in place to create a safe environment for everyone!
7/21/2020 15:06:37	Mindi	Edwards	Scott City Kansas school	Scott City	I am not in favor of the order to delay schools. Kids in our community have been practicing sports, in the weight room, attending camps and everything else for quite some time now. And they will continue to meet right up until 8/10 when they will instantly be forced to stop for a month. I do not understand how shutting down school for 3 more weeks will help in any way? Schools need to be allowed the right to decide based on the information in their specific area. I realize that not all counties look like ours as far as numbers go. Currently our numbers remain low, only 2 active cases. This virus is not going away, even with a vaccine available. There will remain risks no matter the decision but kids NEED to be back in school. The risks of keeping them out far outweigh keeping schools closed. I am also not in favor of my kids wearing a mask all day at school. I strongly feel that poses a greater risk to them than wearing a mask does. I think it should be left up to the parents as to whether or not a kid wears one. And Kelly isn't even following the American Academy of Pediatrics recommendation of masks for 6th-12th only. Younger age children shouldn't be wearing a mask all day. I hope and pray that you really think through every scenario and make the decision to get schools back open and allow each county to set the standards that fit their area.
7/21/2020 15:06:39	Heather	Holstein	USD 466	Scott City	We need to get back to the way things used to be!!!!
7/21/2020 15:06:42	Charles	I Cannon	Maranatha Christian Ac	I Shawnee	I believe that the school's should be delayed
7/21/2020 15:06:47	Libby	Long	USD 259 Wichita	Maize	Delay school until at minimum Labor Day
7/21/2020 15:06:48	Melissa	Gilliland	Parent, Staff at USD 43	Jackson	I wanted to share that I support Governor Kelly's initiative to keep Kansas students and teachers safe.
7/21/2020 15:06:53	Jason	Whitener		OLATHE	As a life-long conservative who has never voted anything other than Republican, I support the governor's orders.
7/21/2020 15:07:10	Nancy	Rothwell	Parent of student	Lawrence ks	I don't think schools should be starting yet. It needs to be delayed until the positive cases gets under control.
7/21/2020 15:07:13	Amber	Walters		Olathe	I DO NOT want school to be delayed. Children need school. Pediatricians have echoed that as well. Our children deserve an education and we as parents should have a choice to send them. If parents are concerned then they can make the choice to keep them out and go online. Do not take the choice away from the parents who want/need to send their kids.
7/21/2020 15:07:23	Angela	Lee	Parent	Overland Park	Online learning when school should start!!
7/21/2020 15:07:29	Diane	Owens		Overland Park	I am unable to pick up as planned my grandchildren Joshua & Emma after school. Please support the order.
7/21/2020 15:07:41	Hans	Krohn		COLBY	There is no need to delay school. FYI I will not send my kids to school if masks are required ever! We will homeschool before we wear unnecessary masks. If teachers are worried about getting infected then let them choose whether to wear a mask. Not my child
7/21/2020 15:07:46	Amanda	Moon		Merriam	Kids need things to go back to normal! Send them back with extra precautions such as twice a day temp checks, hand washing and germ x! Keep the interactions small within the class room. Allow one group of kids at recess that way it's contained.
7/21/2020 15:07:58	Susan	Lynn	None	Iola	Dear members of the board, I appreciate the concern you have for our teachers, staffs and students in regards to the COVID-19 pandemic. Today's positive number of cases in Kansas exceed 23,300, up 10,000 in just one month. Clearly, we do not have this virus under control. I would ask that you postpone school until after Labor Day so that our schools can appropriately prepare for this health crisis. I would also ask that as leaders, you continue to lend Gov. Kelly your public support. Thank you, Susan Lynn
7/21/2020 15:08:07	Steve	Glickley	Emerald City Gymnastic	Lenexa	The State should reopen schools for numerous reasons; education and social benefits to the children come to mind. Human beings cannot legislate a virus to behave the way we want. The current "actions" are an over reaction and over reach of government. My customers are reacting to your decisions; totally afraid to return to healthy activities, like gymnastics. Your decision can additionally affect private businesses like mine to go permanently out of existence. Please remove the fear factor. Thank you.
7/21/2020 15:08:08	Shannon	Myers	Colby Public Schools	Colby, KS	My opinion is that the opening of the 2020-2021 school year should NOT be delayed. Thank you.
7/21/2020 15:08:13	Michelle	Mullins		Quinter	Our kids need to be learning from teachers in the class room with peers. It allows them to learn other ways of thinking, other questions to ask, it teaches them patience, it allows them to build their strengths and weaknesses. Children need social skills and interaction. They need structure, and schools are essential to them having that.
7/21/2020 15:08:21	Jessica	Wollesen	Parent	Lawrence	Delay it

7/21/2020 15:08:22	Kristi	Hecker	Concerned parent	Clearwater	School should begin on time, no delay. Governor Kelly claims she is giving the extra time for schools to plan for reopening, but they've had 5 months to prepare. Let's get our kids back to a sense of normalcy... Masks, no masks, part time, in person school.. whatever it's going to be, let's get it going! Our kids deserve to get their lives back!
7/21/2020 15:08:27	Mary	Beebe		Augusta	I am in support of delaying the re-opening of schools.
7/21/2020 15:08:27	Ben	White		Anywhere in Kansas	Will ONLINE ONLY be available to parents who do NOT want to send their kids to school? Underlying health issues with child and other family members.
7/21/2020 15:08:29	Kim	Walters	Parent	Overland Park	Schools need to start on time!!!! Kids need the structure and continuity. Parents are at work and their kids or teens are running around crazy doing god knows what!! Please don't delay the school year, kids are suffering more then we could ever imagine
7/21/2020 15:08:30	Cherie	Duprez	Myself	Haysville	Schools need to open! The kids need stimulation and social interaction. What kind of life is it when you are cooped up alone in your house?
7/21/2020 15:08:31	Joanne	Burckhart	USD313	Buhler	Please support the executive order 20-58 to delay the start of schools. Number of covid cases are increasing across the state. Teachers are worried about the health of their students, co-workers, and themselves being in a confined classroom with 20 students for 7 hours a day. Districts have not had time to fully plan after receiving guidelines for reopening from KSDE. In this situation reopening should not be rushed. District administrators, school boards, and teachers need this time to prepare for in-school and remote learning platforms. Too many lives are at stake to just push us all back into the buildings to see what happens.
7/21/2020 15:08:32	Alisha	Berry		Overland Park	Please support the delay in opening schools until after Labor Day. The COVID-19 virus is still spreading rapidly across the state. Children should not be put at risk needlessly by forcing them back into the classroom when it is not safe.
7/21/2020 15:09:13	Sally	Morrison	Parent	Olathe	School should open and run under as normal a circumstance as possible. The science shows children are at very low risk for having severe symptoms from the virus and from spreading. Children need normalcy, a strong academic experience (unlike that received online last spring) and social and emotional development. The ability of families to work and fuel the economy depends upon our schools being open. Governor Kelly is trying to make a name for herself and doing so to the detriment of the future of our state and nation. Please board of education provide an appropriate and measured approach to this situation and step in and do what our governor has been unable to do this far.
7/21/2020 15:09:19	Timothy	Turner		Ness City	I thank you for the chance to give you my opinion. I think it not good for our kids to keep them out of school any longer. I have worked part time at the Sheriffs Office as a Deputy in Hodgeman County and work for the City of Ness as a maintenance person. I have had lots of interaction with many different people in this State and others and I only know one person that has even came down with this sickness. The kids of this state have already had a big enough seat back because of the on line School. It was better then nothing. My kids had to do a lot of it on their own because me and my wife both have to work to keep the bills paid and was not their to provide all the help needed and it showed in my kids grades. I try to teach my kids not to live in fear and enjoy life. God has a plan for us all and when it's our time there will be nothing any of us can do to change it. You take away the things they are used to doing then you are telling them to give into the fear. I am not saying not to take some precautions but let school start as normal and let them play sports. They played softball and baseball all summer long and it didn't hurt anyone. I know I am not the only person in this State that is tired of this mess and want our lives back. I pray when you make the decision you take into count that at some point we are going to have to go back to normal and I say there is no better time then now. Thank you for taking the time to read this.
7/21/2020 15:09:23	Suzanne	Broddle		Wichita	I feel we as a state need to slow down and allow hospitals and staff to recover from the recent surge of cases. Although young students are not as likely to get sick or show symptoms, they are taught by adults who will get sick. Districts need time to implement the health standards in the executive order and work with staff to prepare to teach students either in the classroom or using a hybrid approach. Based on the guidelines in your document there are some counties in the state that should be teaching online. We should delay the start date until after Labor Day. Thank you.
7/21/2020 15:09:23	Brandon	Pepin		Overland Park	Please open schools. Too much time has been wasted. Kids need to be in school. I am a teacher.

7/21/2020 15:09:25	Pascha	Medlin	Goddard Public Schools	Wichita	I believe we are ready to start school back up in Aug. Daycares have been successful, so why can't schools reach out to them and see what their day looks like.
7/21/2020 15:09:30	Susan	Jones		EMPORIA	Definitely delay the opening of school. Teachers can and will find a new way to instruct children. IF you must open in-person school at some point, you need to have no more than 15 students in a room. If this means half the class in the morning and half the class in the afternoon like Kindergarten used to do, then so be it. You will have to hire additional teachers to teach online or have different teachers in the morning in-person and then in the afternoon in-person. If space is a problem, we should use churches who generally have additional space during the week. If an empty warehouse is available, that could be used to separate some spaces and have some classes there - yes, there will be additional costs. Yes, there will be additional staff needed for janitorial services, lunchroom services, cleansers, masks, gloves, etc. We must take all precautions to keep our children safe, the school personnel safe and others that may come in contact with them.
7/21/2020 15:09:35	Tamara	Fish		Little River	Please re-open schools in August children need to go to school and socialize and get an education. All this waiting and back and forth is not good. Let them go back. They are resilient and are more likely to get milder cases of COVID if they even get it.
7/21/2020 15:09:38	Cheron	Tiffany	Children of Kansas	Olathe	If you're meeting via Zoom to discuss the opening of school, it's not safe. Delay the start until September.
7/21/2020 15:09:38	Braden	Unruh	USD 411 Goessel Public	North Newton	My wife and I are both educators in Marion County, and we ask that you please support Governor Kelly's executive order to delay school opening until after Labor Day. While we are yearning to get back to teaching students in person, we are extremely uncomfortable with putting ourselves, our students and community, and our families at risk of serious illness or even death. We must flatten the curve of Coronavirus cases in our state so that is safer for our students and teachers to return to some form of in-person education. We must also prioritize the safety of the families that we all go home to at the end of the day. I would much rather get the local spread of the virus under control now, rather than open school prematurely and have to shut down shortly thereafter due to outbreaks within our communities.  Yes, if you support Governor Kelly's order, there will be anger and frustration from some. However, they will live. If you defy Governor Kelly's order and send our students and staff back to school too early, we or our loved ones might die. Are you prepared to live with that consequence, for those deaths to be a result of your decision to send us back to school too early?  I am not comfortable with the risk that my loved ones and community could get sick or die if we prematurely send our children back to school. Our classes, activities, and sports can wait. Some may not understand that importance, but you as our State leaders must prioritize the safety of our students and communities first.
7/21/2020 15:09:39	Andrea	Sullivan	Christ prep academy	Overland Park	While I don't believe returning to school is risky for children, there are many administrators, support staff and teachers that I believe would benefit from a delayed start because hopefully the numbers of infected people will have made a downward turn.
7/21/2020 15:09:42	Martha	Clements	Citizen/Educator	Fort Scott	Please follow the Governor's direction to not open the Kansas' schools until September. I feel as an educator we are not fully prepared to handle school and this pandemic in a safe manner for all who will be attending, educating and working within the Kansas' schools.
7/21/2020 15:09:44	Shelby	Westerhaus		Haysville	I beg of you as a k-12 special education teacher and a mother to a son starting sixth grade to make the correct choice of waiting to start school until after Labor Day. Why would we put staff and students at risk when numbers are continuously rising with no signs of relief. This would make no sense to expose either one of us to hundreds of people daily when we have been doing our part and staying home with minimal contact since March. Until the numbers dramatically fall, I think putting me as a teacher and our students at risk for especially when health officials say the opposite, is a foolish and borderline unethical decision, when we strive to protect our students, by offering them a safe environment and teach them proper decision making skills. Thank you.
7/21/2020 15:09:47	Trevor	Martin		Abilene	Please open school in August. Do not delay!

				<p>The question on the block is "should children go back to school right now?" To that end, let's go back to school ourselves and do a little mathematics.</p> <p>Let's use the Shawnee Mission School District as a sample. They have about 30,000 students spread out across several campuses. Let's also assume that every 30 students is taught by exactly 1 teacher. This is, of course, an exceptionally lowball estimate, owing to the underfunding of the public school system, but that is an argument for another day, so let us concede that this estimate gives us about 1,000 fulltime teachers. This does not include administration, substitute teachers, dining staff, custodial staff, mass transit staff, etc., so let's add this in as another 1,000 people. This gives an estimate of about 32,000 people involved in the education of children in a single school district in Kansas, on both sides of the education equation.</p> <p>1/32000 is about 0.003125%. It just takes that three-thousandth of one percent to be asymptomatic, go to school or work, and unknowingly spread the disease. We already know that social distancing is the best way to prevent the spread, and that is virtually impossible within the school setting. If a slight uptick in public cases was enough to close schools back in March, why are we talking of reopening in the midst of the worst cases of infections here in July?</p> <p>Some will say that children have a better chance with the disease, that their illness and death rate are lower than that of their parents and grandparents. The response there is threefold. First, we simply do not have enough science on what the longterm effects of COVID-19 are to say that recovery from the immediate effects of the disease means recovery from the effects. Second, the argument ignores the adult portion of the population surrounding the children - teachers, principals, nurses, custodians, librarians, and of course, parents. These adult caretakers will be exposed as well when a child becomes infected. Finally, and this is the most morbid of the arguments, this argument supports that there is an acceptable number of dead children to chance having all children go back to school.</p> <p>In conclusion, it is unconscionable, immoral, and mathematically unsupported to reopen schools at this time. The government should keep schools closed indefinitely until the COVID-19 crisis has passed in order to ensure as few familial tragedies occur - otherwise the blood of thousands will be upon their hands.</p>
7/21/2020 15:09:55	Stephan	Pfuetze	Overland Park	
7/21/2020 15:10:04	April	Pfeifer	St. Mary's School	Ellis
				I understand the political divide as far as a delayed start for school, but as an administrator, I feel I need that time to implement all of the necessary precautions and complete my plan for the school year.
7/21/2020 15:10:08	Jane	Smitj	Moundridge Communic	Newton
				We own Moundridge Communications and live in the Newton school district. (Two very different school districts) It is imperative that these kids get back into school and ALL of the activities involved with "school". If someone is uncomfortable with going back they should be able to go online... however there are so many kids and districts that are not facing the same kind of issues that large metro schools are facing. One size fits all is not the answer, let them go back as scheduled and let the parents/students make the decision if they are ready to go back in person. If a metro school admin is not ready, let them delay until September. The smaller districts can do this in August and they are ready! The many kids I have been in contact with have indicated they are ready to go back, the ones that are "scared" are being led to believe that it is scary. The older kids that can think for themselves, by and large are "let's go!" There are those that are scared and that's fine, give them an option to go online and go to class... hold them to the same standards of attendance, but online. It can be done and the fast work of the teachers last spring proved it might not be pretty, but it can be done.
7/21/2020 15:10:14	Danielle	Armitage		Emporia
7/21/2020 15:10:15	Judy	Faurot	Retires Speech Therapis	Scott City
				Our children DESPERATELY need to be in school!!
7/21/2020 15:10:17	Travis	HAMPL	Individual Teacher/Parent	Hutchinson
				Please vote to support Governor Kelly's executive order delaying the start of school until after Labor Day. The increase in positive COVID-19 cases in Kansas has made it unsafe to begin in-person instruction in August. Teachers and school districts will need proper time to get PPE supplies and ready the buildings for students. As a teacher and parent I feel now is an unsafe time to return to in-person learning. I fear if you leave it up to each county or district there will be many students, teachers, parents, and community members put into harm's way. Please be careful and deliberate about your decision and how it will impact the health of all Kansans. Thank you.

7/21/2020 15:10:17	Donna	Erpelding	Ms.	Manhattan	Please keep schools closed until after Labor Day....or until the Covid 19 curve has flattened.
7/21/2020 15:10:20	Jamie	Nutt		Stilwell	School needs to happen. This delay is pointless considering there has been months to clean and get prepared. I financially cannot work and homeschool, I'm a single mom with an essential job
7/21/2020 15:10:23	Tonya	Martinez	USD 259	Goddard, Kansas	School should start after labor day to give school staff time to work out all details and give cases a chance to decrease.
7/21/2020 15:10:26	Jessika	Werner		Colby	Please let our children go back to In School setting. They need to have social interaction all school year! The last few months of the last school year have been the hardest time for their vulnerable minds. It has affected their summer as well.
7/21/2020 15:10:27	Sherry	Geng	KC Parents Education G	Overland Park	I Like to see school open on August as originally planned
7/21/2020 15:10:27	Julia	Strnad		Wellington	Being a farm wife, with my child on the farm trying to learn has not been easy. He would rather be working outside then doing school work. When I got him in the house to do his work, he wasn't focused at all on it. He needs to be back in school. Especially if he wants to learn anything. He will be a SR. this year and that brings all sorts of other reasons why he wants to be at school, but the main one is to get his school work done and correctly so that he can move onto college. He is also a football player that was wanting to play on in college. Without sports he has become a little withdrawn and upset with all of the accomplishments that he has made and slowly watching those go away. He lost weight because he couldn't be in the weight room. Weight he really worked hard at getting while in the weight room. PLEASE, look at the science of it all and open the schools back up. The school that he goes to is willing to do what ever they need to keep them safe, we just need to get them back to school. THANK YOU!
7/21/2020 15:10:29	Amelia	Burbank		Ellsworth	I am a paraeducator for elementary aged children. I absolutely adore my job but am anxious about in-person schooling. I have four of the co-morbidity risk factors for COVID, one of which is classified as very high risk. The ratio of para to special education students is not one to one exposing me to a variety of grades and classrooms. While social distancing looks good on paper, I do believe in practice it will not be obtainable. Working with special ed students requires me to be next to them, often even hand over hand. Socialization is vital to children's development and we adults are still learning what this new "social" looks like and children have not adapted to playing with social distancing. Increasing exposure during rising daily case counts puts successful opening at risk. While other countries have opened schools they also had a declining daily case count whereas we do not. Here in Kansas our numbers are increasing daily and neighboring counties are seeing significant surge. I'm a proud resident of a rural community and increases at the rate our neighboring counties are seeing would overwhelm our hospital. Although I believe we can open schools and maintain a relative amount of safety for the students, doing so increases the risk to our dedicated faculty as well as vulnerable members of student families. Please vote in favor of Governor Kelly's executive order to give more time to slow the spread and lower the curve so we can open safely as possible.
7/21/2020 15:10:34	Samantha	Lindsay		St. George	Our state as a whole is having a heck of a time keeping up with COVID-19 and we failed miserably by ignoring the Governor's orders for safety last time. As a mom of medically complex twin 9 year olds I believe that Kelly has our best interest at heart and we need to follow such!
7/21/2020 15:10:35	Stephanie	Graff, MD		Leawood	I support a delayed start
7/21/2020 15:10:36	Roger	Owens		Overland Park	I am unable to pick up my grandchildren. Please support the order.
7/21/2020 15:10:47	Cheri	Nace	Rose Hill High School	Rose Hill KS	I want school to open ASAP
7/21/2020 15:10:50	Lynn	Mehlinger		Olathe	School should be delayed per the governor's order. It's unfair to put the pressure of deciding teacher and staff safety on parents.
7/21/2020 15:10:54	James	Bell	myself	Hays	Please allow the delay.
7/21/2020 15:10:56	Julia	Reel		Topeka	Please allow school districts to make decisions based on how and when school will start. You have given them excellent guidance. They know what is best for kids in their county. Kansas is so diverse in the pandemic with many counties hardly having any active cases. Don't keep kids out of school where it isn't necessary!!!

					<p>I am very concerned that people are not understanding or preparing adequately for the inherent risks in re-opening our schools in the midst of this ongoing pandemic.</p> <p>Even if we think that children are largely unlikely to have complications when (not if, but when, since data proves that containment efforts are not working) they contract the virus, how are we not also thinking about the fact that other people connected with these children (teachers, substitute teachers, and staff at school, bus drivers, extended family and caregivers outside of school) are likely to have complications?</p> <p>How will social distancing protocols be determined, and more importantly, how will they be enforced? We had children participate in a summer sports program in our school (Basehor Linwood High School), and despite the reassuring talk of social distancing protocols, the reality was very different. Not only were protocols ignored, but efforts to communicate responsibly and conduct contact tracing and quarantine surrounding positive cases were half-hearted at best. What will happen when there are all the students, all day long, inside school together?</p> <p>Our communities have, unfortunately, utterly failed to show humility and kindness and cooperation since the pandemic began. We have chafed at and reacted violently towards attempts to simply require masks in public. We have refused to stay at home and avoid large gatherings or risky activities. We have seen only short-term inconvenience, equated it with loss of liberty, and rebelled against it. We now need to face the fact that we cannot open our schools. Maybe we should have thought about this at the beginning of the summer, and planned ahead, instead of screaming about our rights to get haircuts and go to parties and cough all over each other at the grocery store.</p>
7/21/2020 15:11:02	Anne	Hollond		Linwood KS	
7/21/2020 15:11:04	Deborah	Byers	Early Childhood SPED	Kansas City	<p>When Johnson and Wyandotte counties are leading with the most Covide 19 cases it would be wise not to open schools until September 9th. A lot of staff living in Johnson county and a lot of staff and families in Wyandotte county with compromised conditions.</p>

					<p>Open up - there is more evidence showing it's safe for kids to return to school and make don't work. Conclusion Regarding Masks They Do Not Work</p> <p>By Dr. Sherri Tenpenny, DO, AOBNMM, ABIHM www.Vaxxter.com www.Courses4Mastery.com</p> <p>There are NO randomized, controlled trials (RCT) with verified outcomes that show a benefit to healthcare workers or community members for wearing a mask or a respirator. There is no such definitive study. Likewise, no study exists that shows a benefit from a broad policy to wear masks in public (documented below).</p> <p>Furthermore, if there were any benefit to wearing a mask, because of the blocking power against droplets and aerosol particles, then there should be more benefit from wearing a respirator (N95) compared to a surgical mask. There is not. Neither masks nor respirators protect; cloth coverings are essentially worthless.</p> <p>It should be noted that the surgical masks are primarily designed to protect the environment from the wearer, whereas the respirators are supposed to protect the wearer from the environment. (Balazy, et al).</p> <p>o Public Health Experts Keep Changing: Mask vs No Mask • <a href="https://www.news-medical.net/news/20200315/Reusing-masks-may-increase-your-risk-of-coronavirus-infection-expert-says.aspx">https://www.news-medical.net/news/20200315/Reusing-masks-may-increase-your-risk-of-coronavirus-infection-expert-says.aspx</a></p> <p>§ § March 30, 2020: WHO Emergencies Press Conference on coronavirus disease <a href="https://www.who.int/docs/default-source/coronaviruse/transcripts/who-audio-emergencies-coronavirus-press-conference-full-30mar2020.pdf?sfvrsn=6b68bc4a_2">https://www.who.int/docs/default-source/coronaviruse/transcripts/who-audio-emergencies-coronavirus-press-conference-full-30mar2020.pdf?sfvrsn=6b68bc4a_2</a></p> <p>§ at 00:22:39) "We don't generally recommend the wearing to masks in public by otherwise well individuals because it has not been up to now associated with any particular benefit...It does have benefit psychologically, socially and there are social norms around that and we don't criticize the wearing of masks and have not done so but there is no specific evidence to suggest that the wearing of masks by the mass population has any particular benefit. In fact, there's some evidence to suggest the opposite in the misuse of wearing a mask properly or fitting it properly or taking it off and all the other risks that are otherwise associated with that.</p> <p>§ March 31, 2020: <a href="https://www.newsmax.com/us/surgeon-general-adams-masks/2020/03/31/id/960679/">https://www.newsmax.com/us/surgeon-general-adams-masks/2020/03/31/id/960679/</a></p>
7/21/2020 15:11:06	Sean	Fisher	n/a	Gardner	
7/21/2020 15:11:18	Patty	Flory-Evans	Usd348	Overbrook	Please delay school for a few more weeks. We need the time to organize and get the school ready. Teachers are amazing but we are exhausted trying to be all things, in all situations, for our students. We want to go back but safely. Also subs are in critical short supply.
7/21/2020 15:11:19	Katelyn	Blasi	USD 233	Lenexa	I support Governor Kelly's executive order and I support the DELAY of the 2020-2021 school year
7/21/2020 15:11:20	Gina	Sucher		Andover	I'm okay with the delay to start school but do not want my young kids in masks all day.
7/21/2020 15:11:22	Christine	Byard	USD 231	Gardner	I do not think it is safe to return to in person schools. Cases are increasing every day! I support delaying the start of school so we can look at opening schools safely..... knowing that if the cases continue to rise we should have remote/virtual learning for the fall. It is the only way we can keep teachers, staff and students safe!
7/21/2020 15:11:23	Sara	Forsberg	Forsberg Family Inc.	Gypsum	Our schools need additional time to devise proper cleaning, teaching and administrative policies. We closed school in the spring in order to keep everyone safe and it makes no sense to send our children back into the environment while the number of cases in the state is climbing at an alarming rate. I have 3 kids, 2 are on IEP's and 1 has medical concerns. Additional time to ensure that our schools have everything in place to keep people safe is quite simply a matter of life and death.
7/21/2020 15:11:34	Katie	Gartenmayer	Teacher	Overland Park	I do not think it's safe to open up schools due to the high and increasing positivity rate in the state of Kansas. Please let health, science and data lead to a decision that is best for all Kansans.
7/21/2020 15:11:35	Judy	VanSickle	Self	Newton	Delaying the start of the school year until after the Labor Day Holiday is a good idea. Should be implemented every year to possibly be cooler weather and thus be a savings for the schools.
7/21/2020 15:11:37	Kimberly	Cicora		Haysville	I'm in support of the delayed school year as a parent and a teacher.

7/21/2020 15:11:39	Travis	Glassman		Colby	I feel that delaying our public teaching any longer will be a detriment to the already suffering well being of our children and their learning. Many parents don't have the means of teaching or supervising at home learning and we've extended this delay long enough. Get the kids back in school WITHOUT masks and let our immune systems do what they're supposed to do, fight and build antibodies. Our kid's education and social interaction is much more important than the agenda that's currently taking over our lives. Thanks for allowing us to give our feedback.
7/21/2020 15:11:41	Roswell	Schlesser	Parent	Shawnee, KS	Please do not delay the start of school any longer!
7/21/2020 15:11:43	Alexandra	Driskel	Former USD 383 employ	Manhattan	I think delaying school should happen. However, I recognize that there are families on the lower socioeconomic scale that rely on sending their kids to school during the day. If there were a way to offer in school classes to those on the free lunch program I think it would be greatly beneficial to these families.
7/21/2020 15:11:50	Meghan	Strassburg	Independence High School	Independence	<p>**Please note, I am not on the district's reopening committee, but I have provided feedback when asked. I have also submitted a more detailed letter to Mr. Porter regarding my thoughts and feelings on Executive Order 20-58. In summary, I believe the delay in allowing students to begin school should be approved for the following reasons (not listed in order of priority):</p> <ol style="list-style-type: none"> <li>1. School sports and activity seasons can be adjusted easier if we don't have as wide of a range on our school calendar's statewide. Imagine trying to plan a season when half of our schools are starting almost a month earlier and half of the schools are going to school until mid June. (depending on how school calendars work)</li> <li>2. The delay will allow schools to gather ample supplies needed before the school year starts. Some of these supplies are already hard enough to find right now.</li> <li>3. The delay should be for students only. Staff (administration, teachers, custodians, librarians, lunch staff, etc.) could be using the time to clarify school procedures, practice procedures that will be put into place, and continue to revamp curriculum if needed (depending on the school's plan). These plans will only work if everybody is on the same page.</li> <li>4. The Navigating change document and Governor's orders were issued roughly about a month before most schools begin. This would allow teachers who aren't on reopening committees time to review the document and figure out how they will implement that document into their teaching in addition to their individual schools' reopening plan.</li> </ol>
7/21/2020 15:11:55	Todd	Horsch	Renwick USD 267	Mount Hope	Centralized control is not the answer. Leave it up to the local school districts as the situation is different for each of them. Vote to ignore/overturn the executive order.
7/21/2020 15:12:00	Marci	Patton	Usd 466 second grade teacher	Scott City Ks	We have been together all summer with very few cases. I feel like we need to move on with our lives! I will do any safety precautions it takes so we can go back to school on time and have our fall activities.
7/21/2020 15:12:11	Lisa	Pierce	Usd 409	Atchison	As a elementary school principal I agree that we should approve the executive order
7/21/2020 15:12:18	April	Johnson	Usd 412	Goessel	We need are schools open. Are children need to learn. They need there teachers and class mates.
7/21/2020 15:12:25	Marisa	Larson	self	Manhattan	Please allow the delay in opening schools until after Labor Day. Our community needs the extra time to get the virus under better control and to plan on how to instruct students well and safely. It's imperative that we keep our children, teachers and school staff safe and keep all of their families safe as well.
7/21/2020 15:12:34	Jeffwry	Joyce		Shawnee, Ks	Each school has its own circumstances and should be allowed to adjust accordingly. Smaller schools, especially rural and private schools, may be better equipped to open safely than others. A statewide, one-size-fits-all, order is not in the best interest of Kansas. Please focus on parameters that allow for schools to open on-time, rather than mandates that require a delay, even when unnecessary.
7/21/2020 15:12:35	Andrea	Cartwright		Olathe	I think starting school at the normal time is beneficial because I fear a greater re-occurrence in the flu season that may require a change of schedule then.
7/21/2020 15:12:39	Erica	Buchanan	USD 383	Manhattan	I was relieved when the govener made the announcement. Not because I don't want to be with students, but because our teachers need more time to prepare this year. Normally I would be in my classroom multiple times a week after July 4th, but we aren't allowed in the buildings right now. I am also responsible for training my building on how to use our online resources. Many have never used them and we need this extra time to prepare our staff. We can't train anyone until after August 5th, our contracted start date, so postponing the start date of classes would give us the time we need.

7/21/2020 15:12:44	Julie	Harber	Students	Overland Park	I have two high school kids who weathered the end of last semester but who need to be in an in person learning environment for their emotional well being. Also as an educator I understand that there are 3 types of learners; visual, tactical, and auditory. Ignoring a subset of tactical learners would set them at a great disadvantage. Our kids need to be in schools and participating in athletics and other extracurricular activities. The risk of COVID-19 is not as great as the risk of having a majority of our students lost emotionally and academically.
7/21/2020 15:12:45	John	West	myself	Healy	I cannot fathom, as a teacher, how delaying will enhance the students' educational experience. They are suffering socially and emotionally. Several have told me that they cannot wait for school to start. Another month cannot help them. It can only damage our kids.
7/21/2020 15:12:51	Michelle	Reed	Olathe usd 233	Overland Park	With the proper accommodations, I feel school should be held in person starting early September.
7/21/2020 15:12:52	Teresa	Richards	Usd259	Wichita	I believe the decision should be made district by district. This is not a one size fits all decision that needs to be made. I for one want to be back to work and back to school...with precautions.
7/21/2020 15:13:01	Sandra	Myers	Parent	Cimarron	Do NOT delay school! Our kids need the socialization and mental/emotional support they receive in school & activities. Let the counties or regional school districts decide what is best for their area. You can't compare rural towns to Wichita or Kansas City.
7/21/2020 15:13:03	Cory	Davis		Olathe	I think the need for education outweighs the need to be over protective. This decision should be left up to the voluntary school staff and parents who can decide what is best for their children.
7/21/2020 15:13:06	Carrie	Paschke	Mother of 3 athletes	Overland Park	Our teachers are essential employees and should go back to work like everyone else. If they are not comfortable doing so then, with all due respect, they should seek another profession. It IS possible to keep them safer at work than we ever have before. We have masks, face shields, Plexiglass boards between them and the students, hand sanitizing, temperature checks, etc. Even with all these in place, is there still a risk? Sure, but we can not live in a zero-risk society. That doesn't exist. And anyway the risk of surviving Covid is high - 99.984% survival rate (per Johnson County Health Department) as of today (July 21). Please consider that we CAN send kids back AND keep teachers safe, it doesn't have to be one or the other. Please don't let the demands from the teacher's unions overshadow what's best for our kids.
7/21/2020 15:13:09	Lisa	Crook	Walnut Grove Elementa	Lenexa	I support the executive order to delay the start of Fall 2020 school year.
7/21/2020 15:13:10	Vickie	Oard		Colby	I appreciate you, Our School Board, asking and taking into consideration opinions. You all have a big decision and will weigh carefully the options. Growing up we always started school after Labor Day. But with this strange season we ended the 2019/2020 school year in, and also planning ahead for any storm days (if we are IN school building!) I think our school board should be able to make the starting date decision rather than be ruled by the governor. Also, it is important for the children to be back with teachers and friends. But, please, NO masks. Thanks!
7/21/2020 15:13:12	Derrick	Slocum	Parent	Iuka	I think this was a great, temporary, solution. It gives schools and districts more time to prepare. Also a great idea on requiring mask wearing.
7/21/2020 15:13:15	Tran	Vu	Wichita Public Schools	Wichita	This is just a thought, have you thought about tiering and transitioning the students, teachers, and staff of the school by quarters? For example, continue online learning for the 1st quarter and re-evaluate whether it is safe to go back yet? If so, start transiting slowly the 2nd quarter and eventually over time we'll have everyone back in school, if it is safe.
7/21/2020 15:13:20	Robert	Deister	We the People	Buhler	It is time to get our children back in school for Education and socialization. This past spring was nothing but a sham at Education once the school buildings were closed. The once in a lifetime events like graduations, primary, athletic championships are a huge loss in students lives. Education did not happen for most students after the buildings were closed. I know Districts did their best to create online curriculum that students could use but the truth is most did not use it without the structure of going to school everyday. I recognize that there is some risk but the numbers are suspect and in my opinion are not anywhere close to accurate. It is time to open school buildings, get the teachers and students back into a structured and organized environment. Thank you for your consideration and time. Sincerely, Robert L Deister
7/21/2020 15:13:28	Angela	Gantzer		Shawnee	The governor should not have the authority to make decisions for our schools. That should be left to individual districts and schools.

7/21/2020 15:13:40	Dean	Caldwell	Maranatha	Mission	Kids need school!!!!!! You guys ended school early didn't stop COVID!?! Now you want to start late!?! It will still be here in December.Lets use some personal protective equipment and teach some proper sanitation.
7/21/2020 15:13:41	Kristin	Dillard	School nurses	Olathe	I am a school nurse. I work with the most fragile of students...special education students. They won't understand the importance of social distancing or wearing a mask. They will cough and not cover their mouth. It is important that we do not rush back to school, especially with Covid cases on the rise in Kansas. We need to be fully ready with PPE, plans, and spaces to deal with sick students! Please listen to the scientists. They know and understand this virus. For the safety of our students and staff, please support Governor Laura Kelly by voting for her mandate to start school after Labor Day. Thank you!
7/21/2020 15:13:47	Therese	Cannon	Maranatha Christian aca	Shawnee	I would like that the schools opening be delayed.
7/21/2020 15:13:51	Marike	Janzen	parent of high school stu	Lawrence, KS	I agree with Governor Kelly, we need to delay the start of school until after Labor Day.
7/21/2020 15:13:57	Tonya	Grider		Halstead	Please allow schools to start up in August and reject the Governor's executive orders
7/21/2020 15:13:59	Stacey	Chik		Lenexa	Please open schools August 11. The children need to be in school and have a sense of mental, social, emotional, and in some cases physical safety. Keeping the schools closed means that hundreds of thousands of children in our state are languishing at home with subpar attempts at academics and are more prone to fall into horrendously unsafe activities online due to a lack of parental supervision. Nevermind the ways this affects the parents. Please, for the childrens sake open the schools!
7/21/2020 15:13:59	Stephanie	Hessling		Clay center	Delaying starting school isn't going to make a difference in the Covin situation. But I can say having kids 5 and above wear masks 8 hrs a day isn't going to work. I can see older kids but not kids in elementary school especially Kindergarten thru 3rd grade. I've got kids in kindergarten, 2, 3, 6,7 and 11th grade. I am giving my kids the options to go back into the classroom & will respect what they want. I feel all this is going to add more stress on staff than anything.
7/21/2020 15:14:03	Sam	Kepfield	n/a	Hutchinson	Comment removed due to profanity
7/21/2020 15:14:04	Rhonda	Koehn	USD 418	Galva	Unless it is deemed safe for elementary students not to wear a mask, I think we should delay or just plan on remote. I think masks will cause emotional trauma and distract our young students from learning.
7/21/2020 15:14:05	Stephanie	Southard	Walnut Grove Elementa	Olathe	Vote in favor of the order if youbat all care about our children.
7/21/2020 15:14:07	Beth	Olson	Elementary level reading	Lindsborg	DELAY start and mandate CDC standards
7/21/2020 15:14:04	Natalie and Dav	Brown	Blue Valley School Dist	Leawood, Kansas	Due to the facts that the number of COVID-19 cases continue to rise with a large percentage of cases in our teens, schools need time to prepare buildings and staff with safely regulations, and parents have yet to receive the school plan options from districts to make the best decision for their families, it is necessary to delay the start of school until after Labor Day.
7/21/2020 15:14:29	Stephannie	Erie		Fort Scott	Our children need to get hack to school NORMALLY. This virus isn't hurting our children. If people are scared they should keep their kids home. In our home both parents work and we have no way of doing home school even 1 day a week. The fact that this is even a thought is insane. My child also will NOT be wearing a mask to school. Asking a child to wear a mask is also insane. Our kids need interaction with others. It is VITAL to their growth. Stop the Governer from making these TERRIBLE decisions!
7/21/2020 15:14:22	Dori	Hilker-Ridge		Cimarron	I am a current school board member in USD 102, Cimarron-Ensign. I disagree with the mandated delay of opening school. We have been working on reopening plans since May in our district. One size (solution) does not fit all districts in our state. We are ready to start school as scheduled. Further time out of school is a detriment to children in many different ways. Medical guidance on the issue is clear, and we have worked diligently to plan for a safe reopening. Please leave the decision at the local level, where it belongs. Thank you.
7/21/2020 15:14:34	Brittany	Beard		Riley	Delaying the start of school allows time for covid numbers to decrease while allowing school officials to better prepare for students to re-enter the classroom. As a parent and a teacher I believe this is highly beneficial for all parties involved.

7/21/2020 15:14:37	Y	Allen		Olathe	I have two school aged children that suffered greatly with online schooling the last quarter of 2019-2020. Specifically my oldest, who is starting high school this year, she has a learning deficient and needs to be in a class room. While I understand the gravity of the pandemic there have been several studies proving children are not at great risk. This is particularly going to hurt low income communities. There are ways to make it safe for everyone, including online learning for those who opt in. Please let the schools open on time to ensure all of KS children are getting the best education possible.
7/21/2020 15:14:40	Carmen	Cutting	Mom of 3 children in Ka	Overland park	Kids need to go to school for mental and social stability! The risks of Covid are minimal for kids and a much smaller risk than the common flu. Pediatricians even recommend that they go to school. Our Governor is STEALING school experiences (including sports) from our kids. If some don't want to send their kids, then they should have that choice, BUT don't make that mandatory for others who want to go! Have each school determine the risks they have. It's not the same for all schools. Our Democratic Governor is trying to CONTROL us!
7/21/2020 15:14:42	Shelly	Allmon	Blue Valley	Olathe	No school until after Labor Day! Also let's keep students and staff safe with hybrid model.
7/21/2020 15:14:46	Signe	Truelove	USD 253	Emporia	Asking schools to wait until after Labor Day is a small ask. Most schools in other states don't start until after Labor Day. Even if it saves one life or keeps people safe, what's the harm? A few week delay or weeks in the hospital... or the end of life. Seems like an easy decision to me.
7/21/2020 15:14:47	Danielle	Reda		WICHITA/ANDOVER	Please support Governor Kelly's executive order to delay school opening until September 9, 2020.
7/21/2020 15:14:53	Sarah	Harris		Topeka	I am writing to ask you to leave school control in the hands of local school boards. It has been said over and over that one size does not fit all in Kansas. I believe that to be true. I am asking you to vote no on allowing the governor to control education across Kansas.
7/21/2020 15:14:58	Deborah	Hill	Teacher - I represent my	Spring Hill	<p>As we anticipate moving into a completely new realm of instructional delivery, time is the only thing we have on our side at this moment. The safeguards put in place will not be sufficient to protect students and staff. However if we are forced to work under poor conditions, the very least we can have is additional time to prepare properly. We know that there will be days of instructions that must be remote once the virus begins to spread through buildings and while we did wonderful things with our quick fix last spring we all know it wasn't sufficient. Time to properly prepare new setups in classrooms, time to train staff on new protocols, time to let families adjust to new realities, this is all we have right now. This pause in learning and pause in life is not the end of the world, some losses can be recovered; others, such as a human life, cannot.</p> <p>I have worked most of the summer. I have read research documents, I have participated in webinars, small group planning and discussions, learned about apps and tools for remote learning. I have studied so many research documents that I can't keep them straight, but I do know they all had the same gist. This virus is not going away anytime soon. We must be vigilant about public health safety protocols and aware of the aerosol studies that indicate how easily the virus spreads.</p> <p>I believe the only reason children have not represented a significant number of cases is because they haven't been in schools where the exposure risk will be greatest. Anecdotally, we know that first year teachers and first time public school students have a higher rate of illness during that first year than other staff and students because they haven't built up immunity yet. Anecdotally, we know that introduction of technology devices into schools saw an increase in illness because so many different people were handling devices when they weren't "working" properly.</p> <p>Life turns on a dime, teachers are called upon more than any other profession to pick up the broken pieces of society. Most teachers have two, three, four or more degrees - to help us be better at what we do, because our passion is the classroom and learning. For our students we are counselors, social workers, parents, medical consultants, bullet takers, problem solvers, suppliers of food and clothing and school needs.....the list is long. Please don't think for one minute we are running from yet another piece of broken society. As always, we want to do what is best of our students while maintaining our dignity, our families and personal health.</p> <p>If you have not had an opportunity to read all the studies related to this virus and how to appropriately respond, please ask any educator where to find them.</p> <p>We need this delay in the start of the school year. It's the least you can do for us.</p>

					<p>While I would like to think that the many of the school districts across the state of KS would have used the time after spring break and through summer to prepare and plan for the eventuality of returning to school in the fall with SOME type of modifications needed; if they (collectively) need additional time (three weeks, three days, etc.) to plan for the return of kids, so be it.</p> <p>I do believe, that each school district should treat the school year the same academically, regardless if the student attends physical, virtual, or a hybrid approach. It doesn't feel equitable when one district doesn't allow students grades to go down if they attend virtually.</p>
7/21/2020 15:15:08	Zack	Odell		Colby	
7/21/2020 15:15:12	Richard	Carlson	USD 383	Manhattan	I support delaying in-person classes until schools are much better prepared.
7/21/2020 15:15:20	Bonny	Brown	Northwest Kansas Educ	Colby	I am in favor of waiting until after Labor Day to start back to school. I have an underlying health condition, so I am in favor of waiting.
7/21/2020 15:15:22	Meghan	Cunningham		Shawnee	We, as a family, need in-person schooling to begin. My husband works away from the home and I am part of a 2 year program for Neurodiagnostic Technology. In order for us to go on with daily life we need to be able to send our kids to school. I know that Covid-19 is an issue but for us not sending our kids to school creates a hardship.
7/21/2020 15:15:37	Kyle	Taylor		Colby	I would like Kansas K-12 to start the school year on the regular date that it should start.
					<p>I strongly support the governor's executive order to delay the opening of schools until after Labor Day so we can address some key issues.</p> <p>One issue I foresee is the actual physical space that would be required for proper social distancing. My first grade students sit 4 to a table, share materials, and work frequently in small groups. This coming year, I have 21 students on my list. I do not see how they can each be 6 feet from the next student, or even 3 feet in that space. Even if we could designate areas for each student, there is no guarantee they will remain in their spaces.</p> <p>Young children, in the best of circumstances, cannot be expected to wear masks and maintain social distance with a level of fidelity that would make these measures effective. For many of my students, life circumstances have left them with fewer supports, tools, and skills for maintaining self-control, making following directions for social distancing extremely challenging.</p> <p>One other big concern I have is staffing. I predict our substitute shortage will only grow this year, because many subs are retired teachers who are in a higher risk category for complications with COVID19. Classroom teachers' ability to be at school if they or a family member gets sick will be undermined, elevating our need for subs at a time when we have fewer.</p> <p>We as teachers know that our students need to be in school with us to learn best, and we want them back in school. Honoring the governor's executive order will give us time to learn, plan, and strategize about issues of space, instructional practice, and staffing. It will also give time for (hopefully) more robust social distancing practices among all Kansas to lead to a decrease in the number of cases of COVID-19. If we begin before these things are in place, we will most likely have to shut down at a later date, to a greater detriment to our students and teachers.</p>
7/21/2020 15:15:42	Laura	Cooper		Leawood	
7/21/2020 15:15:47	Steve	Vequist		WICHITA	Please vote to delay school opening.
7/21/2020 15:16:07	McKenzie	Smithson	Parent	EIDorado	Please vote to over rule the EO and let schools start. Our youth need to get back to normal, they need a safe place to continue to grow and mature. Behind a computer screen is not ideal for all. There are many barriers that create a greater educational divide if we continue at home. Sadly for some of our Kansas youth home is not a good place and school provides an opportunity to get help either through counseling, meals or a safe shelter. We must make sure we are looking at all groups of kids and how they will be impacted.

7/21/2020 15:16:09	Lauren	Farmer	Myself	Olathe	Please uphold the decision to delay the start of the school year until after Labor Day. As teachers, we give so much of ourselves to our students, but we should not be asked to give our actual lives because we rush this. Doctors and scientists are finding evidence of damage in asymptomatic coronavirus carriers, including children. Infants have also become victims of this disease, which shows we know nothing yet. Rushing back puts our students, their families, all educators and staff, our families, and our communities at risk when we go back. Please also note that cases are up by 190%, which means we're worse off than in March. We should not rush because we want to be back to normal. We need to be cautious. If anything, please look at how things worked during the Spanish Flu in 1918-1919. It probably started in Kansas, so let's be proactive this time and not let this get out of control like before.
7/21/2020 15:16:15	Lisa	Robbins		Louisburg	I believe school should be delayed until after Labor Day. I feel the extra time is needed to prepare our kids/teachers during these unprecedented times. My oldest is a senior, and this is not how I want his last year to be, but I want him (both my kids) to be safe. My kids will wear masks if that is what it takes to be back in school.
7/21/2020 15:16:16	Laura	Oyler	USD 497 - Lawrence Ki	Lawrence	Hello! Thank you for taking the time to read my comments today. I am a kindergarten teacher in Lawrence and I am writing to ask you to please support Governor Kelly's order to postpone school until after September 8th. Last year I had 25 five and six year olds in my class. I was so blessed to be their teacher and deeply love every single one of them. However, I can also say they are experts at spreading germs! As a kindergarten teacher, it is normal for me to ask students to stop picking their nose, take their hands out of their pants or mouth, or even to not lick classroom materials. I say these things multiple times a day, everyday. Just last winter alone I was diagnosed with influenza B, bronchitis, and multiple sinus infections. I am confident I picked up all these viruses at school, as my students always had them before I did. In fact, we had a large outbreak of influenza B in kindergarten for several weeks. While my heart aches to be with my students, I know that starting school in August is not safe for me or them. Not only will the delay in school give us time to lower the number of cases of COVID-19, it will also give teachers like myself time to plan for the school year. Today is July 21st and my district has not released their plan for our return to school. I know they are working hard to make decisions and plans, but I still do not know whether I will be teaching kindergarten remotely when school starts or if I will be back in a building. Those extra three weeks we would gain by your approval of this order would be invaluable. I ask you to please vote yes so we can have that time. I know there are some Kansans asking this be a decision that is made locally, but I ask you to please keep in mind the spike in cases that occurred as a result of the mask mandate not being a requirement statewide. I know this is a difficult decision. It is always hard when you have to make a decision you know some people will not agree with. I ask one last time that you will please do what is safest for all Kansas teachers and students and vote yes to delay the start of school until after September 8th. Thank you for your time!
7/21/2020 15:16:19	Sarah	Standage		Colby	Would like to resume school as soon as possible as our county has less than 25 cases. My child was struggling with online school as he was in kindergarten and worry that with any further delays will struggle for years to get him caught back up. At this point I worry that we will only be in school this coming year for a few months. I want my child to continue to get in person teaching to help with his development socially.
7/21/2020 15:16:26	Andrew	Breese	Colby Public schools	Colby	As much as I don't want to see home schooling again, I'd rather my family be safe in the long run. I also know the isolation of kids staying home is damaging as well. I do not know what the answer honestly is. There has to be a way to play and socially interact besides zoom meetings while still being safe. These kids need actual physical social interaction. I know that we need to be safe a socially distant as well.
7/21/2020 15:16:28	Carla	Sloan-Brown	Colby Public School	Colby	If delaying helps educators better prepare for what has to be done in this weird time, I'm for it. I would like schools to send out information for community resources (counseling, food banks, technology,etc.) so that families in need can find them. I'm not sure what avenues schools are currently using to proactively reach these students but these efforts may need to be increased during this time of delay. There are many needs that school meets that aren't academic. The loss of these will be greatly felt this year.

7/21/2020 15:16:31	Peter	Werkowitch	My family	Louisburg	I am beyond supportive for the mask mandate. We have a surgeon, an ER nurse, an ER doctor and a Radiologist in my immediate family. They are in 100% agreement masks work and are an effective component of fighting COVID. They are astonished at the level of false information some people are being presented and believing. Please do the right thing and protect our families by keeping the mask mandate in place until at least the vaccine is being administered or case count falls a great deal. Fall is near and so is flu season, we do not need to take a step backwards. Kansas is already being severely impacted from the perspective of job losses due to COVID and a continued spike will only worsen our economic outlook along with the health of Kansans. Taking every measure we can to protect both economic and health interests are critical. Masks are temporary, health and economic impacts are long lasting.
7/21/2020 15:16:33	Chanelle	Martin		Leoti	Open the schools!!!!!!
7/21/2020 15:17:03	Mary Jo	Worthington	Elementary Classroom T	Andover	I agree with the delay but support the reopening of schools. We need to use the delay to put proper protocols in place to keep everyone safe.
7/21/2020 15:17:04	Kristy	Bergstrom	USD 400	Lindsborg	Please strongly consider overturning the Governor's order. This should be something decided locally. I am a 30 year veteran teacher and I saw the mental health take a hit even from my students with a strong family support. Online learning doesn't do justice to those younger students. I appreciate your dedication to do what is best for students.
7/21/2020 15:17:06	Kristin	Kent	Private school/homescho	Overland Park	I am respectfully asking that you do not approve this executive order. As it should be, leave the decision in the parent's hands. They may decide if their child is more susceptible to this virus to keep their child at home and let them continue their education online, not the governor. Additionally, private schools should not be included in this mandate. They are not supported by the government and should not be told when they can or can't start classes. In general, these private schools have fewer students in attendance, and, therefore, they don't have a "large gathering of people" at these schools. They can provide a safe environment for our kids. For their mental health, kids need to get back to some normal activities and classes. They have had to deal with disappointment after disappointment over these last few months. They have missed being with friends, playing sports and just going to the park. It is time for those least susceptible to this virus, our kids, to get back to a normal life.
7/21/2020 15:17:14	Karen	Parsons		Oxford	Please listen to your educators and health officials and leave politics out. Thank you, Governor Kelly, for having the courage to lead in these divisive times.
7/21/2020 15:17:15	Megan	Marasco	SMSD 259	Overland Park	Hoping to encourage placement of our children back in school asap with precautions taken. Our children need to continue boosting their immune systems around people, places and things. We are not only hindering their academics, but also their physical and mental wellbeing. Please please reconsider continuing to withhold children from schools.
7/21/2020 15:17:37	Andrew	Lake	High School Math Teac	TOPEKA	I support the delay.
7/21/2020 15:17:43	Joe	Pfannenstiel	JH/HS Counselor	Inman USD 448	As a school district we desperately need the time to implement the best practices for the safety of staff and students. We all want to be back in school but not in risking safety of any of our kids, parents and staff. We are a small enough school that if we have a teacher or two that gets sick or quarantined we are in big trouble delivering what we need to for students and it affects us grades 7-12. We have a lot of details to work out to provide a safe environment rather than just taking a stab at it and hoping it goes ok. I'd rather see us go in with a "smart, thought out " plan than start and have to send everybody home again. Please support the Governors recommendation.
7/21/2020 15:17:49	Justin	Smith	Usd 204	Kansas City	We have more cases per day now than in March when school was suspended. As a teacher, I implore you to vote yes to the Governor's executive order and delay the start of school.
7/21/2020 15:18:03	Tina	Mensch		City of Riley	Online is safer. Kids will spread germs like crazy
7/21/2020 15:18:06	DJ	FREEMAN	USD411	GOESSEL	Please do not delay start of schools.
7/21/2020 15:18:07	Jeremiah	Enna		Merriam	Start school on time. Based on the E.D. of the governor (wear a mask, have sanitizer in the room), I see no need to delay the start.

7/21/2020 15:18:10	Christina	Jeffery	USD 107 - Rock Hills	Mankato	I believe that there shouldn't be a 'one size fits all' plan for the school year. I believe it should be left up to the school district. We are in a small community in a small county and feel that it is completely safe to send our children to school. If there were to be an outbreak, I feel that no more than 3 weeks should go by before getting our children back into the schools. It may be easy peasy for stay at home parents to school their children, but this is not the case for our community! And if it is safe to send a large majority of children to daycare facilities - there should be no difference for sending our children to school.
7/21/2020 15:18:14	Shannon	Reilley	Colby public schools pa	Colby	I am fine with waiting until after Labor Day! I believe this will give our teachers and staff time to get into their classrooms and prepare for the semester as far as Covid preparation. We don't need to rush in a week and then backtrack.
7/21/2020 15:18:25	Shawna	Scott	Heritage Christian Scho	Topeka	I feel as a private school that I pay for out of my own pocket with no support from local government that we should be able to start our school at normal times. I also feel that it should be up to us (the board, parents, and principal) on what is acceptable in out classrooms and what precautions we should take while allow our kids to go back to school for some routine and normalcy.
7/21/2020 15:18:38	Isaac	Reed		Stockton	As a student in high school I find Postponing school until a later date to be irresponsible. If we begin to postpone now, when will the start actually occur. We've had since March to figure out how school should start. The virus is not going to die down more before September according to most data. Require masks or anything that needs to happen, but do not postpone.
7/21/2020 15:18:41	Candace	Mcartor	Usd264	Clearwater	Schools should open on time in August.
7/21/2020 15:18:47	Michele	Reed		Olathe	I support delaying the start of school, in the hope that in the meantime Kansas can reduce the number of coronavirus cases in the state.
7/21/2020 15:18:48	Jill	Schulz	Holton USD 336	Topeka	I strongly believe in delaying the start of school, as mandated by Gov Kelly.
7/21/2020 15:18:49	Sara	Weinert		Winfield	I urge the board to uphold the governor's mandate. As I watch the Kansas numbers in horror, I cannot imagine the precipitous climb the curve would take if classes, sports, and other activities were added to contact on the mid-August schedule. Thank you for your leadership in keeping us safe.
7/21/2020 15:18:54	Brent	Wiedeman	F&M Bank of Colby	Colby	Please do NOT delay the start of school. If it is done once, it will continue to be delayed! Kids need to go to school and will be safe and it is better than staying home and getting farther and farther behind in school. Masks should not be required either! There will be more germs spread by dirty masks then it will do good.
7/21/2020 15:18:54	Alison	Replogle	USD 400	Lindsborg	I am a proud Kansas educator, parent, and member of the Kansas School Counselors Association. As a public educator and parent of school age children, I support Governor Kelly's executive order keeping schools closed through September 8. Educators need time to plan and be ready to safely welcome our students back to school. We have a tremendous amount of work ahead of us. As a parent, I do not feel safe sending my children back to school until I am certain we have done everything possible to ensure their safety. I do not feel we are at that place yet. Please uphold Governor Kelly's executive order. Thank you.
7/21/2020 15:18:57	Jeff	Koelzer	Usd 322 board President	Onaga	We are gifted with 2 great administrators. Please let our district resume in August liked planned. They have worked endless to improve the safety of our students and staff at 322. Many parents with students with IEP's have seen their kids learning fall behind. And for parents that have concerns about students safety we have implemented virtual school with 2 families already signed up. I'm free to visit any time 785-799-4072 Jeff Koelzer Board President USD 322.
7/21/2020 15:18:58	Tori	Mace	USD615	Horton	I would like the schools to open as they were supposed to with safety measures put in place!
7/21/2020 15:19:03	Meagan	Roth		Paola	If we do not postpone the school start date cases will start to increase and we will have to call it an early semester. This would be the same outcome of last semester. It is important that we look out for the safety of the teachers and students. I feel as if we act now, we can fix things but if we ignore the virus now it will only ruin things later on. No point in ending a long period of time off only for it resume two months later. Think about the safety of not only the students, but the teachers.
7/21/2020 15:19:04	Kay	North		Lenexa	Our kids need to be in school, in person, at the very least for the core classes. Online school was/is suboptimal at best. Having only online school will further increase the disparity between the top and bottom students. Not to mention allow those with few resources or home support to fall further behind which may also negatively impact their future. Our teachers should be deemed essential employees and as such should be required to teach in person. It would be fair to offer an online alternative for those who want it.

7/21/2020 15:19:05	Betsy	Hadley	public school teacher &	Overland Park	<p>I am writing to express my relief when Governor Kelly announced the order to delay the start of school until after Labor Day. The additional time gives schools time to gather necessary supplies and to solidify plans which will allow them to do our job as educators in a safer manner. Delaying the start of the school year is important to teachers because we are going into this next school year blindly. We had very little time to prepare for the 4th quarter in the spring. This added time does not look like an extended summer break, but rather a longer time for professional development as a staff to prepare for our students. When teachers are prepared, they are better able to meet student needs. This is especially true in a time when we will be planning for academic needs and health needs. Never before have we had to plan to keep our students safe and healthy with this high of risks.</p> <p>On a personal note, I have done my part to keep myself, my family &amp; my community healthy. I came home for the start of my district's spring break in March and have basically been home since then. We pulled our daughter from daycare to keep her healthy and reduce the number of people walking in and out of our in-home daycare which we loved. We have hardly seen our family except for driveway visits and front porch drop offs. I have been into public places only when necessary and took the proper safety guidelines seriously. I know not everyone in our community has done the same. I am worried about the virus making its way into our school building when school resumes and I'm worried for my health (as a high risk person) and the health of my loved ones (who we will limit seeing even more).</p> <p>I know there are no easy decisions, but following the Governor's order to delay the start of the 2020-2021 school year seems to be the right decision in the long run when it comes to the safety of everyone in Kansas!</p>
7/21/2020 15:19:06	Marsha	Tannehill	N/a	Manhattan	The Governor's order re delaying start of school until after Labor Day should be supported. More data is confirming that children, when tested, test positive positive for COVID-19, and could obviously pass it along to others in the house.
7/21/2020 15:19:06	Stacy	Teske	Parent of 2 young school	Wamego	I am pleading with you to veto the governor's executive order to delay the start of school and make masks mandatory. Leave it up to the school districts as one size doesn't fit all. My kids need to be back in school, in the classroom. They have already missed many months of school from last year, please don't delay it any further. Facial interaction is very key in the success of kids learning. They need to be able to see each others faces, see their teachers faces and the teachers need to be able to read their kids. Wearing masks will be a huge distraction to the kids' learning and the teachers will spend the majority of their time making sure the kids have them on instead of doing what they are paid and love to do, which is teach! Please veto the governor's order to delay schools. Thank you.
7/21/2020 15:19:16	Jill	VonFeldt	Blue valley school distri	Overland Park	I would still like to start in school instruction after Labor Day for my Kindergartener and second grader. I am comfortable with them wearing masks and getting their temperature taken. These kids need their peers and a real teacher teaching them. Thank you.
7/21/2020 15:19:21	Katie	Usiak		Lawrence	I think giving the school system time to prepare for a mixed schedule of in person and online schooling would be what's best for kids/families.
7/21/2020 15:19:26	Susan	Gerth	USD 383 paraeducator	Manhattan	Please delay the start of school until September 9, at the very earliest.
7/21/2020 15:19:29	Jean	Janner	Myself	Olathe	I urge you to vote AGAINST delaying the start of school. 3 weeks' delay may not sound like much, but having a target start date on the calendar and honoring it feels like a victory. Schools have been preparing for months. Give administrators/teachers/parents credit in their ability to plan wisely and responsibly.
7/21/2020 15:19:33	Dan	Paschke	Parent	Overland Park	The kids needs to be in school. Please provide an in person educational opportunity. The risks are within reason and it is time to get back to normal life. The kids need the full benefit of a full school, social, mental, physical. If someone is not comfortable with the risks, they can do school at home. Thank you.
7/21/2020 15:19:33	Grant	Lunkenheimer		Wichita	As a Pediatric ICU RN I cannot imagine anything worse than closing schools. We are putting kids at risk for abuse and neglect that will damage or take their lives all for a disease that does not effect them. Teachers need to decide if they want to serve the kids they signed up for or walk away- if you are essential than be essential. There are ways to mitigate the risk. There is only way to reduce neglect and abuse in our kids- open the schools. ON TIME!

7/21/2020 15:19:40	Sarah	Dolence	Blue Valley School Dist	Overland Park	Keep schools closed until after Labor Day!! A mild inconvenience and deviation in routine can save lives and help curve this virus. It will give schools and teachers more time to plan for ALL students. Students will not fall behind - we don't have to resort to "normal expectations." We must do what's right - and in this case, it's what's different. Please please please do the right thing.
7/21/2020 15:19:46	Nick	Stamatis	Christ Prep	Overland Park	The delay is not needed. It is a safety measure that is out of line with the severity of the threat. People who are at risk should not come to school or be in the public but at this time the medical facilities have plenty of capacity. Open the schools on time.
7/21/2020 15:19:52	Rachel	Baumbach		Lawrence	I am a nurse, I see COVID day in and day out in my ER. Cases are rising, young people are getting sick, extremely sick. We DO NOT want our children going back to school while cases continue to rise. Children are social individuals who don't always understand the reason they're being asked to do things or pay attention to why they're important. They're not going to social distance or wash their hands enough, or even wear their masks correctly. It's not in their best interest to send them back to school while this virus is spiking. We didn't want them in school during the beginning of these outbreaks - so why send them back now that they're worse? I urge you to delay sending children back. And if my word isn't enough - go into a hospital and see for yourself why it is a bad idea.
7/21/2020 15:19:52	Betsy	Morin		Wichita	Please vote to start in September
7/21/2020 15:19:55	Amanda	Metcalf		Fort scott	Start as normal. Void face masks on all children k-12. Take governor to court. Fight this!!
7/21/2020 15:19:57	Travis	Branum		Colby	I don't think the delay needs to happen, kids will be around each other as they have been all summer, weather you start tomorrow or in January. Makes no difference so why not start on time.
					<p>man at the middle school level.</p> <p>Things that keep me up at night:  I have a small classroom with no windows and everyone who enters my room remarks how humid it is, the air vent doesn't work properly. I am a special education teacher, so my pull out classes are smaller, but not small enough to properly socially distance in my small room. I wonder how to teach math from 6 ft away when I can no longer use manipulatives (not enough for everyone to have their own, same with calculators). Also I cant have small group sessions at my table. I will not be able to see their math problems either on paper or device from 6 feet away to see if they are solving them correctly. I will not be able to monitor if they are on the assigned website if they have to all face me and I cannot safely circulate the room to ensure they are on the correct site and not YouTube or games. When I push in to assist my students in a gen ed class how do I assist them 1 to 1 from 6 feet in a mask quietly enough that only that 1 student hears and I don't disrupt the other students or the gen ed teacher's lesson? Plus, then I am adding another body to an already over-crowded room. Where do I find enough sanitizer and wipes to keep my classroom clean enough without risking my life going to multiple stores? How do I even begin to do my job when everything I have done the last 9 years is basically impossible? How do I teach a class and monitor the students zooming in remotely from home? How do I take students to wash hands every hour in a building without near enough sinks?  Worst of all, how do I deal with the fear, guilt, and loss if anyone at school gets covid-19? How do I keep from infecting my students and family. How do I teach in person and remotely (at same time) 5 days a week without worrying about my own children being home to remote learn the 3 days a week it isn't their days to be in the building with no one to monitor them? If I get sick who takes care of them? What if I pass it to them? I could go on and on... I have loved being a teacher. I just don't know how to do all of this. I hope we can go remote until things simmer down. School in person will be nothing like it was.</p> <p>Thank you.</p>
7/21/2020 15:20:07	Laurie	Lane	Usd 501	Meriden	
7/21/2020 15:20:14	Jessica	Twin		Olathe	I think delaying the school year is the best choice possible since we must have an in person option. It allows more time to develop an appropriate plan for best protecting the teachers and children, and to gather the supplies needed to implement those plans. Optimally only the children who must go to school in person would attend and any others who can do distance or virtual learning would do so to help protect as many people as possible.

7/21/2020 15:20:14	Megan	Bastemeyer		Overland Park	As a district employee, I believe that adopting Governor Kelly's order to delay openings until after Labor Day would be the best way to keep everyone is the district and community safe. It would give us time to slow the spread and prepare for a safe return. Returning in August would be a detriment to our community and the cost would be human lives. We can not afford to take that risk. Our children, their families, and our staff are worth too much to take that risk. Protect us. Uphold the executive order. Keep us alive.
7/21/2020 15:20:29	Esther	Martin	Christ Preparatory Acad	Lenexa	Private schools must be allowed to best accommodate their students in the ways that they deem best, which includes the setting of their own school calendars and starting and closing dates. As we keep the safety of our students foremost, we must maintain the ability to choose for ourselves based on our particular students, their families and their needs, both academically and socially.
7/21/2020 15:20:33	Jessica	Ciaccio		Lenexa	I support keeping schools closed until after Labor Day.
7/21/2020 15:20:40	Jenny	Karr		Manhattan	A delay to the school year is absolutely vital. It will ensure schools have time to plan and implement not only safety procedures but all effective teaching. It is highly likely that most instruction will occur digitally and teachers need time to set up appropriate online course materials.
7/21/2020 15:20:46	Sally	Schuler		Chapman	Please honor Governor Kelly's Executive Order regarding the delaying of the new school year until September 9. This gives the school districts extra time to organized and gather materials that will be needed for this new normal. Please respect the lives of the teachers, students, and all the other employees in our Kansas schools. Everyone wants them back in school. But it's imperative that it's a safe environment for all. DO NOT let politics guide this decision.
7/21/2020 15:20:49	Colleen	Goldblatt	n/a	Overland Park	Dear Kansas State Board of Education,  As a parent of two children in school, I implore you to please consider approving Governor Kelly's executive order to delay the start of school. I want my kids to have as rich of an academic experience this year as possible, and being in the classroom I know is a top priority for our family.  I know that you all, like me, are seeking the insight and guidance of scientists. In listening to them, I see that:  1) masks work... PLEASE give them time to work in our communities. In Johnson County, we're just beginning to see declines in cases again, linked to the Governor's mask order  2) our schools need time to acquire supplies to follow the Governor's order (centered on your guidelines) and keep our kids safe  Getting kids into the classroom as consistently and much as possible, is also of vital importance to getting employees back to work. But we cannot do this if there are constant interruptions to the school year. My family is among many who have 2 working parents, and are unable to both work AND supervise our children's learning and do a sufficient job at either.  Thank you for your consideration. We need you to support our kids, our teachers, and our communities.  Sincerely, Colleen Goldblatt
7/21/2020 15:20:55	Helen	Solem	Christ Preparatory Acad	Lenexa	I concur with the Governor. Please delay the opening of school until September 9, 2020.

7/21/2020 15:20:57	Jim	Cameron	Kansas Resident-Johnso	Gardner	<p>I find the Executive order issued by Governor Kelly to be misguided and a huge over step of her authority. I believe the previous recommendations made by the school board were more than adequate in light of the actual facts about COVID-19. Our kids need to be back in school ASAP and without any additional restrictions or stipulations from Topeka. My children will not wear masks and thus will be discriminated against due to the governor's order. It should be left up to the school, their administration, and parents on how to handle our children's educational environment. We cannot continue to live in fear of a virus that 99.2% of people recover from or show no symptoms at all!</p> <p>Sincerely, Jim Cameron</p>
7/21/2020 15:21:02	Andrea	Berg	Olathe District Schools	Shawnee	<p>On KU health system's Facebook live, a pediatric infectious disease doctor said that they're finding that child to child and child to adult transmission is really only uncommon through age 10-12. After that, kids are basically acting like adults as far as transmission goes, which is particularly worrisome for middle school and high school students, teachers and staff. I am a 4th grade teacher, and I would like schools to have enough time to get any safety equipment in place that they need and safety procedures in place. I would like the staff to have proper training on what this will look like. I would like to see teachers have PLCs &amp; staff meetings via zoom and no adults other than the classroom teacher should be in the classroom. That also means special teachers should not be coming into the regular classrooms to do art on a cart, etc. On nicer days maybe PE could be done outside to social distance. It would be great to have elementary students wear masks, but I don't know that this is always going to be doable for them. All adults in the building should be wearing masks. For middle and high school I think a mask should be worn by students and adults. I would also hope that as a classroom teacher I would have the ability to scan my students' temperatures as they come into my classroom and after they eat lunch. There should be a policy in place that if a child has a temperature they need to go home immediately. Parents should be reminded to keep allergies under control with proper medications. I would also hope that the school districts have enough cleaning supplies, gloves, hand sanitizer, etc. It might be beneficial for classrooms to also have air purifiers. I do think sports should continue because it's good for our bodies and mind, but precautions should be in place. I do believe it is important for the kids to start school in person.</p>
7/21/2020 15:21:13	Julia	Straw		Wichita	<p>We need to wait at least until after Labor Day to begin school. Hopefully the infection rate will improve and if not, schools will have time to successfully plan for fully inclusive, online instruction.</p>
7/21/2020 15:21:16	Jeanine	Meiers	Private school	Lenexa	<p>The kids should start in person in August. They are ready and teachers are ready to go in person. They have time to get ready and, for their mental health and education quality, they need to be in school. This could just keep getting pushed out more and more. It is time to take a stand and listen to the doctors and have the kids in school. Thank you.</p>
7/21/2020 15:21:30	Sharae	Slater	USD 253 as a parent	Emporia	<p>I support delaying the start of school, but want the days excused and not required to be made up. If we do delay the start of school, then PLEASE allow parents the option to send kids to school or keep them home. Please allow BOTH options.</p>
7/21/2020 15:21:40	Rebecca	Maher		Overland Park	<p>Yes, to delaying schools until after Labor Day!</p>
7/21/2020 15:21:40	Maggie	Peterson		Prairie Village	<p>Start school after Labor Day</p>
7/21/2020 15:21:42	Tracy	Mai	Parent	Hays	<p>I think we need to delay school until at least after Labor Day!! There are too many positive cases and the schools need time to prepare!!</p>

7/21/2020 15:21:45	Rob	Kooser		Derby	<p>I am taking a few moments to express my views/opinions on the recent changes that the BOE is considering regarding the COVID19 "Pandemic". This is yet another inconsistent, illogical decision made that is not clearly supported by data. There are countless data (for and against) this view, however it is very upsetting to see the BOE decide to follow an order given by Leadership that chooses to not let reality play a factor. These children (ages K-12) MUST get back to school SOONER then later. The data clearly shows the deaths in Ks of people under the age of 25 is ZERO! This is still a "virus" that 99% people who happen to acquire it, FULLY RECOVER! DEATH RATES continue to be below 1%.....the logic the BOE would be taking would beg the question as to why they don't use the same approach to the Flu Virus (that is 4.5 Times MORE then the Covid deaths this year!).... Please, I ask that you please give a true, open minded approach to such a decision. It is clearly obvious that there are other "agenda's" at hand and this is a topic being used as a political divide. These children need to get to school soon! There are too many kids hungry because they are not in school. There are kids who are getting abused at home because they can't go to school. Please consider ALL options when making this decision.</p> <p>Regards, Rob Kooser</p>
7/21/2020 15:22:01	Jessica	Gibbons		Louisburg	I am a special educator and mother of 2. As much as I want to be back in school and have my girls be in school, I do believe that our governor's plan to delay school is the right decision. We need time to plan and determine what actions will best for our staff and students when that first day comes. We want to be back so badly, but in terms where we feel safe and can enter without fear. Allowing the extra three weeks will give our administration time to collaborate to devise the best reopening options. Thank you for listening to our governor, health department, educators and parents while making this difficult decision.
7/21/2020 15:22:03	Joyce	Verkinderen	Usd259	Wichita	School needs to be canceled or online until we can safely return. Many staff, including me, are high risk
7/21/2020 15:22:09	Hallie	Vaughn		Colby	Start School in August. We need activities and athletics. Western Kansas is different than the other side of the State.
7/21/2020 15:22:21	Lisa	Colson	Beloit elementary	jewell	Please let our schools be open. This is hurting our children to pushed to stay home, not go anywhere, not see friends. They need to have a normal life again. I understand sickness is always among us. It always has been and always will be. We have to teach the young to wash hands and be proactive against sickness, not to stay home and hide. Our children have the right to get an education!
7/21/2020 15:22:27	Sharla	Reynolds	My children	Clearwater KS	My children need normalcy and deserve an education. They were already cheated of weeks of education last spring. School should resumed full time as planned. For this at risk or afraid of the virus, let them do online school.
7/21/2020 15:22:32	Brandy	Loomis	Nurse	Great Bend	I feel that this delay is a smart decision. This allows districts to put safety precautions into place. I also feel that having all students and and staff wear masks is smart .
7/21/2020 15:22:34	David	Pinckard		COLBY	Start school at normal time of year as we have always had.
7/21/2020 15:22:38	Chris	King	Lawrence // Parent of tw	Lawrence	K-12 in Lawrence needs to open and in session on time and in person for each student. Fall Sports should also be allowed prior to September. Areas throughout the State are already participating in sports camps without problems. Based upon information available to public .007% infection rate for state as of today. .001% DGCO.
7/21/2020 15:22:40	Paige	Rounds	My family	El Dorado	I feel like waiting until after Labor Day is a good call. I live in a multigenerational household. My mom has severe health issues and my son has a weakened immune system. I prefer to be extra cautious to when it comes to germs in general, but especially right now. Until we start to see cases decline, I'd rather not risk the health and safety of families, children, and school staff.

7/21/2020 15:22:41	Michelle	Lippelmann	Mother	Colby	As fast as this virus is spreading and the concern of young children wearing a mask for 8hrs a day is almost impossible, then you've got some of the older kids who think it's all a joke therefore there's gonna be more issues with having the kids wear them properly. You've gotta think that just by wearing a mask ur still carrying the virus on ur clothes shoes body (that is not covered) I for one will NOT risk my children's health by sending them to school. I have 1 child who is 6yo and a respiratory child and for him to come into contact with a class/school of the possible virus is unacceptable for me. Some people are A symptomatic so screening at the doors is really not stopping anything JMO. I will be looking into online and homeschooling my children this year if they continue to open usd 315 back up for school. Kids are massive germ carriers no matter how hard we try to keep them safe things happen, and again a classroom and school full of kids with all this virus goin around nope I'll school online. Thank u
7/21/2020 15:22:42	Melissa	Oakma	Myself, private citizen	Lawrence	Postpone in whole(in-person) or everyone will have to opt out.
7/21/2020 15:22:47	Jamie	Porter-Knox	Topeka Public Schools/S	Topeka	I support Gov. Kelly's delay of school, as well as future closures or 100% remote learning, that may be warranted due to increased or spiking local cases. Students and staff deserve every reasonable expectation of safety when we return to buildings, especially at-risk staff members who won't have the option to work from home (like students). Compromising the safety of students and staff by prematurely opening schools, in order to boost the economy, is not acceptable. Thank you for looking out for the health and safety of Kansas students and staff.
7/21/2020 15:22:52	Christine	Parsons	Holy Trinity Catholic Sc	Olathe	I am writing today to have you please strongly consider opening schools on-time, August 20th. I am a parent of a first grader and third grader and believe these children need to be in school ASAP! I look at HTS to be my partner when it comes to my girls education, they are not their babysitting service! Back in March, HTS had a strong virtual learning system and as a family, we completed every assignment and went above and beyond. With that said, I made the choice to get a summer tutor for the both of them because I felt that what transpired in the Spring was still not enough. And I fear that with the delay of school and the potential for online learning again that it still won't be enough. I don't have the answer and applaud you for having to make the difficult decisions! But I do know that my kids thrive in the classroom, and we as a family will do what it takes to make sure they are safe but know that when it comes to their mental health it is vital that they attend school and find some sense of "normalcy" through this entire pandemic! I hope you will give the schools as well as private schools the opportunity to make their own judgement call as long as protocols are in place so that my healthy 6 and 8 year old can get an education! Thank you for reading!
7/21/2020 15:22:55	JOHN NEIL	UEBELEIN		OLATHE	I believe educating our children through in-person learning is critical to their development and well-being. In addition, the at-risk communities will suffer the greatest harm from any delay. Please fully open and on time.
7/21/2020 15:22:57	Sarah	Giddens		Lawrence	All for it. Please keep our kids and teachers and staff safe.
7/21/2020 15:22:58	Connie	Herbster	Prairie Hills usf1 14	Sabetha	With Covid cases spiking and citizens not wearing masks and meeting in lg groups, Ithink school should be online for the 1st 9 weeks at the minimum. I'm scared to death to be in a classroom rotating HS STUDENTS every hour. I have diabetes and high blood pressure. I also don't want to give it to my family
7/21/2020 15:23:03	Kelley	Freund		Christ Preparatory Acad	Please consider allowing schools to start at the regularly scheduled date at the end of August. It will be very difficult to cover the necessary material if the days are reduced.
7/21/2020 15:23:08	Alicia	Farley	Parent/Para	Clay Center	I think we should delay school. With numbers rising it would be the best interest for all staff members and students to wait until after Labor Day or longer. This would give schools more time to prepare for what they need to do.
7/21/2020 15:23:08	L.	Alvarado		Shawnee	Open our schools! Governor Kelly continues to act like a tyrant, making ridiculous decisions regarding Covid19. The lockdowns, mandating masks, and now delaying of school is not acceptable to the majority of people I know. We will always have viruses around— it is part of our human existence. The precedence being set for how we are going to live from here on out is so important— Hiding from every virus and having the government control us is very un-American. Please tame Governor Kelly's tyranny and send the kids back to school! If school isn't in session, these kids will still be going to stores and restaurants and getting together—they need to be in school and regain some sense of normalcy. We cannot continue to live like this.

7/21/2020 15:23:18	Michelle	Crews	Heritage Christian Acad	Overland Park	Please allow private schools to maintain jurisdiction on decisions related to COVID-19 recommendations for minimizing risk and spread of the disease. Our smaller school community allows for adequate implementation and supervision on protocols put in place to keep our kids and families healthy and safe.
7/21/2020 15:23:35	Amanda	McGreer		Colby	I do not understand what the benefits are to delaying school. My husband and I work full time and find the timeframe that our kids have been out of school and away from adults disturbing. Kids are resilient but need structure and continual education. I believe a breakout amongst the teachers is possibly a bigger risk. With that said, maybe trying to deepen the bench in terms of substitute teachers is worth exploring.
7/21/2020 15:23:36	Patty	Hennes	Teachers	Osawatomic	I am writing in support of the order to delay school opening. This time is for the safety of students and staff! Schools need time to procure supplies needed, training on implementing the guidelines and time to digest and plan from the guidelines YOU unanimously passed! We want kids back in school, but safely and with thoughtful plans in place.
7/21/2020 15:23:44	Shane	Winsor	Parent at USD 382	Pratt	VOTE NO ON GOVERNOR KELLY'S SCHOOL MANDATES
7/21/2020 15:23:51	Amy	OHara	Parent	Lenexa	Please allow local districts and private schools to make their own determination on school start time.
7/21/2020 15:23:57	Haley	Weidman		Clearwater	I think schools should be delayed until September. It gives staff more time to figure out their plans and gives the cases in the county time to decrease.
7/21/2020 15:24:06	Karen	Truitt	USD 475	Manhattan	Please, give honest consideration to delaying the start of school until after Labor Day. This will give district and teachers more time to prepare. Don't make this about politics and/or down playing the severity of coronavirus. Make your decision based on preparing for the worst and planning for the best. Remember it's not just about the children, but it's also about educational and support staff. It's what's best to ensure the safety and security of everyone (students, staff, families, and community). Thank you.
7/21/2020 15:24:11	Penny	Vogler	Parent of high school stu	Colby	The kids have been getting together all summer whether it is for summer weights, to hang out with friends, to have prom, to have graduation and receptions. Even if school is delayed they are already together. It is important for them to get back to a regular schedule which includes school, sports, and activities. I find it interesting that colleges are starting early so they can dismiss at fall break when "they" anticipate a second round or increased cases, yet our governor delays the start of K-12 school by as much as 3 weeks in some cases. Let's get the kids back in school!
7/21/2020 15:24:23	Thomas	Swartz	My family	Pittsburg	I do not feel we are ready to send kids back to school. It is unsafe kids and the entire staff and their families.
7/21/2020 15:24:38	Andrea	Bauer	Parent, First-grade Stud	Great Bend, KS	I support the delayed start to the school year. This extra time is important for public health as well as professional development for our teachers. They spent the end of the last year teaching on the fly and need time to train and hone skills for on-site, hybrid and remote learning.
7/21/2020 15:24:42	Kyle	Helmer		Lenexa	This is a terrible decision not based on data around the world that kids do not get sick from this and they do not spread it. It's based on politics and fear. Very sad and disappointing
7/21/2020 15:24:43	Saleena	Skillett		LaCrosse	I can't imagine the stress that everyone is under in trying to make the right decision for school. Delaying the start of school is going to be harmful for our kids. Our kids are already behind with how last year finished out. The longer we wait to start school, the more these kids are going to have to have refreshers to even begin to learn new material. A one size fits all approach for the schools across Kansas won't work. Small schools can adapt and take precautions so much easier than the larger schools. I understand if a larger school needs to be virtual due to the sheer volume of students and faculty. Our kids need normal...they are hurting emotionally and scared of what the future holds. Our kids have been playing ball and gathering in parks and going to the pool all summer together...I don't understand why they should not be allowed to go back to school at the scheduled time. Please think about letting the local school districts decide for themselves what will work best in their community. I understand that the mask mandate is not something you guys can review, but I still want to touch on it. My 14 year old will struggle to stay focused while having something covering his face all day long. He struggles to stay focused under normal conditions...this is a huge distraction that is going to affect his school work. I can't even begin to imagine how are kindergarten and 1st graders are going to be expected to learn and stay focused. How they are going to learn sounds and how to form their mouths when learning how to spell. Thank you for your time and your service to our kids.
7/21/2020 15:24:44	kelly	kelly	Heritage christian acad	Overland Park	Let us go to school. Let our kids learn and be together. They can wear masks in between classes. Let them go to school

7/21/2020 15:24:49	Tammy	Lind	Christ Preparatory Acad	Lenexa	Please vote to allow schools to start at their regularly scheduled times. The students have been out of the physical classroom for so long that it would be extremely helpful to their well-being and particularly their mental health to be allowed to return to school and proceed as we have always in the past. Many scientific and educated sources indicate that it is imperative that students return to school quickly and as usual with little or no limitations. I appreciate any concern you have for our health, but I believe it is time to allow us to be completely back to school and business as usual. Thank you for your consideration.
7/21/2020 15:24:51	Katelyn	Blasi	USD 233	Lenexa	I support Governor Kelly's executive order and I support the DELAY of the 2020-2021 school year
7/21/2020 15:24:56	Courtney	Devot		Fort riley	Delay
7/21/2020 15:24:56	Tiffany	Hentges	Kansas Connections Acad	Shawnee	I am a teacher and mother of a 7th grade boy and a ninth grade girl. I support the idea of returning to school with an option to stay home. I think a "skeleton crew" model like is used in business can be used in the school setting. Where the minimum number of personnel is needed to operate and maintain the school day. So, families and teachers would have a choice to attend. If they choose not to attend, they can access online learning. If they choose to attend, the schedule can be split or reduced to accommodate less numbers at a time. While at school, students can participate in online learning at their grade-level. They can use a computer safely, socially distanced and wear masks. The teacher would be there to answer questions and clarify directions and concepts. The teacher would be considered their learning coach and assist with online learning. A special education teacher can be available to assist as well.
7/21/2020 15:25:03	Shelley	Pickardt		Lawrence	As the grandparent of elementary aged students and mom of a high school teacher I am in support of delaying the school year until after Labor Day. The health and safety of the students and faculty is important and the additional weeks will give the state time to flatten the curve.
7/21/2020 15:25:16	Diane	Smith	None	Lenexa	Do what is safe for all. Remember the ages of a large percentage of teachers, Food Service Employees, janitors and all other staff. Many are over 60 years old. Please do not jeopardize their health and lives. If you have no staff, you have no school, whether it is in person or online! And please keep our kids safe. We will need all of them to take care of us someday!
7/21/2020 15:25:25	Christy	Younger	Self	Wichita	I am happy with the decision to wait.
7/21/2020 15:25:28	Brenda	Johnson	Childcare	Olathe	Definitely school should not start! Friend caught Covid and she died from it. The nursing home was so careless and Covid spread thru out. Several died there. Now her family is suing the nursing home. I do not think the schools need to have this liability against them! Protect yourselves and have the teachers protected too! Elearning is the way to go! In December consider the possibility of in class learning!
7/21/2020 15:25:33	Sonya	Horsch		Mount Hope	Please do everything you can to get our schools back open ASAP! There are many reasons our school children should not be forced to wear a mask all day and I hope you have studied the risks. We need to provide as much normalcy in the schools as we can to avoid making a generation of fearful and anxious kids. Thank you for listening.
7/21/2020 15:25:39	Jeremy	Goode		Pittsburg	Please vote to support Governor Kelly's orders. They are consistent with the guidance of our public health agencies and provide time for our schools to implement plans to begin safe operation. As a parent of 3 children in Pittsburg USD 250 schools, I can certainly sympathize with the temptation of a hasty reopening. I don't however believe that you should undermine our governor in order to provide individual districts with the freedom to disregard public health and endanger our children.
7/21/2020 15:25:40	Stacia	Schwarz		Stilwell	Please consider opening school this fall according to the regular schedule. Please require masking, social distancing and other important safety and health precautions to ensure that students and staff are safe. I would like to see the schools open in August.

					<p>To whom it may concern:</p> <p>I am a retired businessman, a parent and a grandparent. Both my wife and I have underlying medical conditions that place us "at risk" for contracting the COVID-19 virus.</p> <p>In my opinion, it is imperative that you delay opening schools in Kansas until such time that the recent spikes have leveled off to a safe place. Please. We need to make our children as safe as possible, not only for them but for their teachers, staff, administrators, siblings at home, their parents, and of course their grandparents.</p> <p>In an effort to keep as informed as possible, I watch a number of news outlets and follow social media in an effort to be as widely informed as possible. From the social media I have read, many parents simply want school to open so they won't have to deal with their children being home. This should be the last reason for reopening the schools.</p> <p>So, an option that I support would be online learning. While not perfect, it keeps the child/student active in learning and can be a good alternative in the short term.</p> <p>Thank you for your support!</p> <p>Best regards, Mr. Dana Messerly</p>
7/21/2020 15:25:50	Dana	Messerly	Concerned Citizen, Pare	Olathe	
7/21/2020 15:25:51	Amy	Mccalmon	Christ prep academy	Olathe	School should start no later than sept 9th 2020 and masks should be optional. If people feel strongly then they can wear masks and people who would rather not wear masks should not be forced to. This is America people!
7/21/2020 15:25:59	Crystal	Helm		Goddard	I feel we need to stay home and start at a later date to give more time to figure this out I also feel it would be safer to do online schooling. If college kids can do online so can the younger kids. They are very good with technology and we need to keep our children safe but also the staff and teachers who are in that high risk category. Otherwise we will have our children sent home multiple times through out the year for weeks at a time and this will never end.
7/21/2020 15:25:59	David	Friesen	Christ prep Christian ac	Lenexa	It is not acceptable to delay the start of school. We can not live in fear of getting sick. People have gotten sick and even died of said sickness for as long as there has been people. Seek the truth.
					<p>Teachers and students are not guinea pigs to get sick and die, or kill their families, so we can do a trial run of in person classes.</p> <p>A typical high school teacher has approximately 30 kids per class and 7 classes per day (assuming they aren't on lunch duty). That is the potential for 210 DIFFERENT students being exposed to them. Do not just delay schools, mandate they go back to online classes. Give assistance to families who will have to take leave from work to teach their children and put money into the education system instead of dancing around the larger issue.</p> <p>This is still a global pandemic. Kansas is the SECOND LEAST RESPONSIBLE STATE after Florida in our response to this Coronavirus. You and your team's, the people who are rallying against you, Governor Kelly, you are all failing your people. You are killing us. You are giving us no chance to recover. Mandate schools have virtual learning, lock the state back down, help the people survive this long nightmare.</p>
7/21/2020 15:26:05	Spencer	Buettgenbach		Wichita	Be. Better.
7/21/2020 15:26:06	Amy	Branum	Colby High School USD	Colby	I do not support delaying school or sports. I do not support wearing a mask, this should be your choice.
7/21/2020 15:26:18	Marypat	Kilstofte	Olathe public schools	Overland Park	Please delay school. It is vital for schools to prepare for the health and safety of everyone.

7/21/2020 15:26:20	Allison	Kramer		Overland Park	As the parent of a medically fragile child and as the spouse of an immune compromised person, please adhere to the governor's direction to delay the start of school until after Labor Day due to COVID cases rapidly increasing in our state. This delay will give everyone the best chance to go back to school with less risk and fewer interruptions to students' education due to schools and teachers being better prepared to handle the new normal. As a lifetime Kansan, I am frankly embarrassed by how many of the leaders and citizens of this state have shown such disregard for public health in this pandemic.
7/21/2020 15:26:27	Jenny	Wyatt	Wyatt Family	Olathe	It is our hope that school starts as initially proposed in August. Our kids desperately want to return to school and return to normal lives. They have been attending summer weights and camps with no issues. They also play summer sports and have had no issues with exposures or symptoms of the virus. While we understand there are risks of exposures to viruses at school this has never changed. Kids have always been exposed to viruses at school. This virus is no different and people need to stop acting like it is. Let the kids return to school!!
7/21/2020 15:26:34	Kay	Scott		Johnson county	Schools need to reopen sooner than later. There were over 60 million cases of H1N1 while oBama was in office and no panademic and schools remained open and that mist kids got. Covid is safer and less infected. This is a political move. Open schools
7/21/2020 15:26:37	Tim	Harder	USD 492	Cassoday	Please make school NORMAL ... no wearing masks, starting regular time! We are HURTING our children's health mentally and physically by keeping them distanced, and having to wear masks. That will not help.
7/21/2020 15:26:37	Laurie	Ramirez		Lawrence	I am asking you to support the govenor's executive order to delay the start of school until after Labor Day. This will give districts time to finalize plans and train staff in rigorous online education platforms and/or safety measures in buildings not designed for social distancing. Staff has been working tirelessly since June to develop plans but early June plans are not good plans now. Please support the safety of teachers, children and the community. Teachers will be working during this time to get ready to give kids the best experience possibly.
7/21/2020 15:26:40	Vlada	Binshtok	parent of a child with sp	Overland Park KS	Please make plans to restore services for special needs children a priority. While you are allocating resources either to safely reopen schools or to prepare for virtual learning for all, this small population of students could be safely served with either option at the scheduled start of school year. Thank you.
7/21/2020 15:26:40	Misti	Valentine	Students (my children) i	Derby	I believe that it is not in the best interest of our children to delay school. The schools have put precautions in place so our children can return to school on time. I believe that schools closing at the end of last year and not starting on time will do more harm to our children. At this point I'm more concerned about my children's mental health and their social emotional health then I am covid.
7/21/2020 15:26:41	Jim	Briggs	Christ Preparatory Acad	Baldwin City	Even though I reside in Douglas County, my place of employment is in Johnson County. I teach at a private school, which receives NO tax money at all. However, the parents of the students still pay their property taxes to support the government schools. The private schools MUST remain open beginning in August!! Closing the schools has already caused enormous harm to numerous students and families. Our school year MUST begin on time, with face-to-face contact at the beginning of the school year next month. To vote to close private schools is a vote to cause enormous harm to numerous students and their families.
7/21/2020 15:26:49	Jessica	Roths		Viola	We absolutely should delay the start of school. I work as a para at my daughter's school. My daughter has a heart condition that puts her at higher risk. I also know of several other children and staff at our school that are high risk. Give us the extra time to make the proper preparations to keep our students and staff safe and healthy. If we can't open safely we're going to see detrimental things happening when it just doesn't have to be that way. Please delay school starting for the well being of our students and staff.
7/21/2020 15:26:50	Brittany	Zschoche	Parent of child in SMSD	Prairie Village	I support upholding Governor Kelly's order to delay the start of school. The facilities and staff need ample time to procure PPE and solidify contingency plans. I think virtual options should be encouraged for those who can and are willing to utilize that option, in order to reduce the number of people in buildings at one point. Teachers are nimble by virtue of the profession and now is when they need our support. They need time to procure the means to be safe and well as the funds to do so. We also need to include their voices in the discussion - I urge all of you to listen to the teachers' responses. Being a public servant (and an underpaid one at that) should not be a death sentence. Teachers go into this profession because they want to serve their communities, not because they want to be sacrificed to a poorly-handled public health crisis.
7/21/2020 15:26:53	Ana	Ortiz	Yes	Olathe	Safety for my kids is my number one priority.

7/21/2020 15:27:03	Jaci	Littrell	Educator	Winfield	I think delaying the start of school to after Labor Day is a wise idea. It allows districts, administrators, and teachers more time to prepare to safely conduct in-person classes with the new KSDE guidelines. It also could allow more time to (hopefully) see a decrease in COVID cases statewide.
7/21/2020 15:27:16	Lorna	Larson	Self	Lawrence	Please approve the delay in opening schools.
7/21/2020 15:27:17	Laura	Randall		1124 Atchison St	I think school should go as planned in August
7/21/2020 15:27:18	Kim	Hutto	Teacher	Cowley	Please support the delay in opening schools
7/21/2020 15:27:20	Kylie	Smith		Derby	As a teacher, I don't have a choice in keeping my children home to do virtual. With the rise in cases and hospitals becoming full, I feel that delaying school would be the best option. I have people in my life and home that could become very ill from this virus.
7/21/2020 15:27:23	Tanya	Jensen	My child	Stilwell, KS	The kids should be in school this year. This summer kids have not been quarantined. Teens have been at parties/hanging out with friends/working out with sports teams. Kids have been in their neighborhoods, pools, parks playing with friends. Because of this I don't think I will see a spike in numbers. The benefits of children being in school far out-weighs the minimal risks.
7/21/2020 15:27:25	Sasha	Gilbert	self	Hays	My children attend USD489. I will keep this short and sweet but would like to state my opinions: 1) Schools need to open as planned in August 2) Young students should not be expected to wear a mask 3) School entrances need to be remained locked and monitored (not open to allow daily temperature checks & the potential for masked visitors) 4) Five day/week onsite education should be an option for the families that want their children to continue in-person learning
7/21/2020 15:27:26	Karen	Downing	The public	Overland Park KS	Please do not continue to keep things locked down like school. We need to have schools open & business to keep our economy strong. Children do not pass the covid/19 virus to adults/staff/teachers. This is a time we show we can use mask, gloves if necessary to keep everyone in school safe.
7/21/2020 15:27:33	Amy	Turner		Wichita, KS	The delay is almost certainly not enough of a delay, given current trends. As much as I hope students are able to return to school, I urge the Board to institute delays and virtual requirements until the risk of infection to students, teachers, staff, parents, siblings, and the community is minimal and well controlled.
7/21/2020 15:27:34	Alisa	Ehrlich	None	Wichita	Please follow the Governor's Orders. They are prudent and the safety of our children, teachers and school staff is paramount.
7/21/2020 15:27:37	Amber	Cameron	Christ Preparatory Acad	Gardner	I disagree with the governor's executive order, and her extension of school start times. I urge you to consider starting school as planned, and allow our children to further their education and socialization. As a fellow Kansan, I believe the Kansas board of education should have the final decision in the welfare and education of our students... not the governor.
7/21/2020 15:27:44	Chris	Cameron		Goddard	The only reason Kelly is continuing to sign executive orders regarding COVID-19 is because this is an election year and she wants everyone to be unsure what is really going on. This COVID-19 hoax is just so they can hurt President Trump, H1N1 was just as bad and the Obama administration covered it up. We see what the democrat idiots are doing and the silent majority will issue our response in November. Kelly is unfit to hold office and should be recalled immediately.

7/21/2020 15:27:45	Britney	Williams-Bey	Piper USD 203	Overland Park	As a Middle school teacher I am concern with the health and well-being of my students as well as myself if exposed to COVID. Knowing that there are some unknowns to how the virus can effect children & teens with variants of strains this virus has districts need to be given more time to prepare multiple plans. Delaying school to Sept. 9 will give school districts opportunities to prepare. That includes giving teachers a chance to plan and learn what is needed to go either remote or in-person teaching. Part of everyone's goal should be to prevent another statewide school closing. I hope that you take into consideration of ALL children's health over your political views. Ask yourself the question- Would you send your child back to school (in-person) knowing the potential health risks? Knowing there is NO vaccine to combat this particular virus. Keep in mind that if your child's teacher is exposed who will replace him or her? There are not enough teachers or substitute teachers in this state as it is.
7/21/2020 15:27:47	C	J		Hutchinson	With the delay of school and parents working full time this is adding to the financial stress of parents and more personally my own household. Paying more than we would in a typical year for childcare and also trying to find said childcare has been extremely hard. My children are not old enough to leave home alone/ unattended for any length of time. My husband and I both have full time jobs that we cannot and don't have the luxury of working from home. Online education was extremely hard for us as a family with both of us working full time jobs and then trying to come home and home school our children in the evenings. It caused lots of added stress and anxiety on all of us for those several weeks of them being out of school and trying to do home online education. One of my children just started IEP classes prior to school getting closed which also caused a lot of added stress and confusion for her on top of her feeling and being more delayed in her schooling/ education. I personally feel like everyone that is still working already has the same risks that teachers and children are going to face day to day. Teachers have an essential job and they need to be able to do it. Yes there are risks but it s not different than anyone else that is working. My children specifically need to be in an in person school setting to be able to get the proper education and the one on one learning they need and desire. My children want to attend school! Also, what is the difference of children that are all attending daycare and other child care facilities and attending school. They all carry the same risks everyday!
7/21/2020 15:27:49	Sarah	Leonard	USD 259	Wichita	I think it is incredibly smart to wait until at least after Labor Day to start school.
7/21/2020 15:27:56	Sylvia	Fleming	Home	Olathe	Opening schools in Johnson County is a death sentence for all that walk through the door. Show compassion and integrity and keep schools closed
7/21/2020 15:27:59	Malarie	Umscheid	Parent	Wichita	Please delay the school year..... One month/semester/year "lost" is minor compared to loss of life or lifelong effects. Increased viral load is a contributing factor of illness. Keep kids & staff safe & healthy
7/21/2020 15:28:16	Johnell	Holley	Mom	Delay school till Sept 8,	I would like to see the Wichita School Year to start after Labor Day so that the city of Wichita and the Wichita School District have a better idea of where and how the COVID 19 virus is declining for everyone in the state of Wichita Kansas. I feel it would be in the best interest of our children and for our teachers and our community to just hold off on starting the school year after Labor Day because our kids and teachers and everyone's health is more important at this point of time
7/21/2020 15:28:24	Brianna	Fox	Sped teacher	Wamego	As a teacher who has an autoimmune disease, what is the plan to protect the teachers who are at high risk? On a typical day I have 40 + students from different classrooms come into my resource room to receive direct instruction or to simply take a break. I do not know how I can safely meet my students needs while minimizing my exposure. I am extremely concerned for my health and my children's health. -Thank you!

7/21/2020 15:28:25	Nathan	Hanson	Christ Preparatory Acad	Shawnee	I believe that private schools should be allowed to begin classes on the normal date. The governor's orders should be followed as far as in-person, at-home, or hybrid, based on the current COVID status in the area. While large school systems need the extra time to prepare, our school administrators, teachers, staff and parents have been planning since spring for how to safely open in the fall. We have a small enough school that we have been able to prepare for a safe return. We should be allowed to start on time, since we are ready. The governor's mandate to delay the start would have negative and unnecessary consequences that are entirely avoidable in our small setting.
7/21/2020 15:28:29	Trish	Staab		Spring Hill	Please do not delay the start of school. Vote NO to the governor's recommendation!
7/21/2020 15:28:31	Dene	Dryden		Manhattan	I am in support of Gov. Kelly's order to delay the start of K-12 instruction in Kansas. I hope that the Board of Education also advocates for wider COVID-19 testing throughout the state (including asymptomatic/random population testing) and other measures like face masks and gathering size restrictions to limit the spread of COVID-19 in Kansas before any in-person instruction resumes. While education is important, online-only instruction is far better than in-person instruction interrupted by a COVID-19 cluster that results in the death of a student, teacher, staff member or parent. Health should be the board's number one priority this year. My mother is an elementary school teacher in Rooks County. One of my sisters is entering high school; the other sister is an elementary para. If Kansas does not center health in its plan to start the school year, my family and countless other families will be subject to unnecessary risks to their health, happiness, educational progress, and life. Children can't get a good education if they are dead or battling illness for several weeks. Thank you.
7/21/2020 15:28:32	Kimberly	Burbank		Wellsville, Ks	My family and I are AGAINST delaying the start of school. We are ready for our children to have as normal of a life as possible. This virus is not as bad as the media portrays it to be, we need to move on and move back to normalcy.
7/21/2020 15:28:36	Jennifer	Dunhan	Lawrence Public School	Lawrence KS	At what point can we be concerned with the emotional health of our children? Schools have had since March to come up with a plan- get the kids back to school. There is no perfect answer. Do what we do in healthcare- the best we can with the info we have. Be kind to parents who have worked EVERY DAY of this pandemic. We can't all stay home and homeschool.
7/21/2020 15:28:38	Brianna	Brooks		Winfield	I agree with delaying the start of school. This will give schools and staff more time to create a plan that will easily adjust for all learning modalities. It will also give staff the ability to gather supplies needed to keep the buildings protected and clean.  I would suggest against a hybrid week if possible. I do not feel like this will lower contact. Having teachers teach 2 in person groups a week will keep the teacher and other staff exposed to all students who attend. Also, this increases the exposure of the children because many of them will have to go to a 3rd location outside of school and home during the week. If a district does not feel like it is safe enough for all students to be in the building together, all students should move to virtual together.  As a parent, I do not mind if we have to extend part of the school year into next summer to make up hours. Also, as a parent of young children, I do not mind asking my children to wear a mask, and they will. That being said, I know there will be many young students with sensory issues who will not be able to manage a mask. It may be worth it to consider making masks optional for K-5th grade.
7/21/2020 15:28:44	Sh	Call	Parent	Overland Park	May your decision on reopening be based on facts, the true interest of families, and sound reason. May you genuinely set politics aside and vote in a manner that is wise and just.
7/21/2020 15:28:47	Sheryl	Rorabaugh	Democrat and previous	Wellington	Please, they must not continue reopening until all are safe and they have everything, in a newscast, Sedgwick County said they did not have funds to support teachers and staff. My daughter is a teacher, 2 grandchildren in school, and my Grandson in High School when I asked how he felt, said "It is dumb to go back and everyone get sick and have to shut it all down again." My kids better be protected, do not get bullied into an earlier opening or insufficient funds to protect everyone.

7/21/2020 15:28:49	Traci	Hutchinson		whitewater	I am a single mom of two boys as well as a K-8 Music teacher at an amazing district. I am imploring you to let us all go back to school in person without a mask mandate. It should be a personal choice to wear or not wear a mask. For the mental, emotional and physical health of all involved we need to be back in school. My boys and I are abuse survivors and we all 3 have PTSD and anxiety and wearing a mask creates trauma and increased anxiety for us. I support the decision of others to wear masks but do not support a mandate of wearing one. As a teacher who teaches almost 400 students I am desperate to get back in the classroom. Please let us go back in person. I appreciate all the hours you are putting in and look forward to returning to educating my students and interacting on a personal level with them.
7/21/2020 15:28:51	Tracy	Abendroth		Lenexa	Schools open on time. 3 weeks won't make the virus go away, nothing is going to change in that time frame while our kids have missed out on any kind of education for 6 months. If you say the mask works, then I don't see a problem with having kids in school. But if the masks don't work like you say they do then we have another issue.
7/21/2020 15:28:51	Michell	Ray	Skelly Elementary	ElDorado KS	PLEASE FOLLOW! Our staff needs the proper amount of time to prepare our classrooms for the safety of all of our staff and students and my family.
7/21/2020 15:29:00	Sarah	Langley		Topeka	Please don't shut down or delay schools for children. They need consistency. Parents need your help. Please don't add an extra burden on our society by changing things and upturning lives even more.
7/21/2020 15:29:01	Darrell	Dix		Moran	I believe that delaying the start of school is important. However I believe we should flip the spring and fall sports to allow a better chance of participation. Football and volleyball are high risk whereas baseball and softball are low risk. It would also be beneficial to flip them due to weather. Less rain days in the fall vs the spring and you can get more games in before the cold by having multiple games per week. Track and cross country can also flip.
7/21/2020 15:29:03	Kyle	Nelson	Auburn Washburn school	Topeka	As a teacher, it feels comforting to know that the governor is willing to protect schools and students, even when that means she got a lot of political attacks for it. It doesn't feel like many leaders care much about the health and safety of teachers. Please vote to postpone until after Labor Day. I don't mind teaching into June.
7/21/2020 15:29:06	Shiloh-Rose	Meikel		Lawrence	Allow the delay of schools till after Labor Day
7/21/2020 15:29:20	Lisa	Pinkerton	teachers	Rose Hill	With the continuing rise in COVID-19 cases in Kansas it is in everyone's best interest to wait until after Labor Day at the very least to start school if you are planning on sending students to face to face school.
7/21/2020 15:29:25	Katherine	Burns	My Family	Overland Park	As a pediatrician, I want both our children and our teachers to be safe. Data is accumulating that elementary children are NOT a significant route of transmission. This means that while basic social distancing and limited number of contacts (and likely masks in some spaces) needs to be in place, these are for ADULT protection, not the younger children. There is NO evidence that delaying school will improve the situation. The numbers are still increasing, and without a definite end point, plan, or specific criteria for reopening, delaying schools seems futile. I would be much more supportive of a plan which included definite goals and details for delay, instead of broad strokes, or a statewide plan to actively decrease new cases leading to safer opening of schools. Kansas has had increasing cases for weeks. Schools have had months to prepare for this, therefore I am uncertain the purpose of delay.  It seems punitive and random to delay schools while so many other activities, businesses, and such are open for business. Additionally, the delay does not address the needs of children with special education needs. These children need the services provided in person in school and also are less likely to learn remotely. Delaying the school year seems to increase the risk to this population.
7/21/2020 15:29:25	Andrea	Saffle	Valley Center Intermedia	Sedgwick	I'm a Para with Sedgwick County Coop #618. I work with special needs kids that have compromised immune systems. While I love our kids and want to see them, I want them to be safe and healthy more. I am also extremely concerned for my own health and safety. I've recently been considering returning to school to become a teacher, but seeing the lack of support and concern for those of us who work within the schools, I'm not sure I want to do that any longer. I am paid less than \$12 an hour to work as a para. I have insurance, but it's the lowest I could possibly afford. If I were to become ill as a result of working in the schools, there is no doubt in my mind that I would not be able to make it financially and I would likely lose everything. I'm scared. I became a para to work with children and teach them, and to love and care for them. I didn't become a para so I could contract and possibly spread a virus that results in my death or the death of our students and staff. That is more responsibility than any of us should be asked to shoulder.

7/21/2020 15:29:34	Laurie	Hutchison	Christ Preparatory Acad	Lenexa	I am a high school teacher at a small private school in Lenexa. I understand that the governor desires to delay the start of school, in part, to give districts the time to be well prepared to start school. In many ways, that makes sense to me, but our school does not have many of the challenges that our local public schools have; ie buses, large food service programs, taking the temperature of 1900 students every morning... and our families are paying tuition for every day that we are teaching their students. It seems to me that an executive order that would delay our start for over 2 weeks will do unnecessary harm to our school. If you do vote to uphold the order to delay, please consider waiving the requirement for private schools. We have 200+ students, and we believe we can be ready for our planned start the 3rd week of August with all required safety measures in place. Our school's task force has been meeting all summer to be sure to be ready to go. I would also like you all to know that many in our community are praying for you, as we know this has been a challenging time for all, and that you bear much responsibility for many students, families, teachers, and coaches in Kansas. Thank you for your service to us.
7/21/2020 15:29:36	Denise	Hansel	public school teacher	Mulvane	I support Governor Kelly's plan to open schools after Labor Day. This extra time is needed to make our schools safe for all, and to adjust our plans for a successful school year where all students can learn and be kept safe. Please vote in favor of schools starting after Labor Day. Thank you.
7/21/2020 15:29:39	Dana	Braxton		Overland Park	I am ready for my boys to be back at school BUT we need to do it safely. Please delay school until after Labor Day. Give us time to try to get covid #s trending downward. Please put the safety of our children, teachers, staff before politics. Thank you.
7/21/2020 15:29:42	Isaac	Burbank	Christ Preparatory Acad	Lenexa	Private schools should without a doubt be allowed to resume school in August. With the small class sizes, social distancing measures can easily be safely implemented. Please allow our children to resume in-person learning, as it is vital to their educational well-being.
7/21/2020 15:29:48	Caitlin	DeFilippo	Kansas resident	Lawrence	I believe that Governor Kelly's executive order should be confirmed. The rates of infection in our state are not yet stable, and outbreaks are happening in various places, both rural and urban. This is a good step toward keeping our communities safe.
7/21/2020 15:30:10	Amy	Rust	Parent of studenta	Olathe	I think kids need to be back on a regular school schedule in person.
7/21/2020 15:30:11	Colleen	Bloom	Sunflower Elementary	Lawrence	I fully support the governor pushing the start date back if it increases the chance of starting in a brick and mortar school!
7/21/2020 15:30:13	Marisela	Hernández		Garden city	Start school as governor Kelly has suggested.
7/21/2020 15:30:19	Gwen	McDonald		Ellinwood	Support this order to delay the school year.
7/21/2020 15:30:22	Jamie	Garrow		Olathe	Please vote to pass the delay in school. We are currently experiencing a spike in cases in our area. Our case numbers are higher than we've had any other time so far in this pandemic. There is also a new study that shows that kids aged 10 and up spread COVID at the same rate adults do.  Please allow schools an opportunity to get the materials needed to keep everyone as safe as possible, and time to see what happens to our case numbers so that we know if in person is a safe option. We need to keep students, staff, and families safe.  Thank you.
7/21/2020 15:30:24	Keli	Thelen	Olathe school district pa	Lenexa	Please allow k-12 students to attend in-person school after labor day. Parents will assume risk and liability. Please give students/parents a choice. The survival rate of Covid19 is over 99 percent, per the CDC. Not all kids are online learners and need in -person education. Thank you!

7/21/2020 15:30:25	Anonymous	Anon		Junction City	It is absolutely and utterly irresponsible to open schools in person for this school year, even for the beginning. As a local scientist, I know first hand of the dangers this will cause. You are not prepared, and cannot be prepared enough to handle an outbreak in a school. Schools are not hospitals and they are not equipped to stay sanitary. It is also not realistic for any parent to ensure their child has spent 6 hours doing schoolwork on the computer. The kids will catch up, but the virus will have a vaccine by around Feb/March. Just let the kids off. Organize zoom conferences for the kids so they feel like they still have some socialization. Do free kindle challenges for books (if you read x amount of books out of this list by the time school starts back you get to join a pizza party!). Don't make this worse on the families who are already struggling because of an innate need for funding. The children come first, always. The teachers, the staff come first, always. Just wait for the vaccine and stop contributing to scaring half the country with unknown plans. You have not given parents feasible options.
7/21/2020 15:30:25	Vance	Flowers	Christ Preparatory Acad	Lenexa	There is no scientific data to substantiate a delayed opening of school. The situation and infection rates are unlikely to improve over the next two weeks, so why delay? We need to get back to school, so we can all get back to work.
7/21/2020 15:30:27	Jenny	Voth		Overland Park	Our children attend Christ Prep Academy. We would like our small, private school to make the decision for our school community, whether in person or virtual learning, instead of a state-wide, one-size-fits-all mandate.  Our daughter takes band at the public school as well. We live with high-risk people and want proper distancing and precautions, but we think that those closest to each community are able to make best decisions. If they need additional time to get things in order, that accommodation should be made.
7/21/2020 15:30:29	Leslie	Coats		Paola	As a high school teacher, I request that you accept the governor's executive order because it allows districts the time to adequately plan for the possible scenarios for delivery of instruction this fall. Without the delay, my district will have two days of professional development/prep time before we have students in our classrooms, one of which is totally consumed by mandated dyslexia training. With the delay, we will alter our calendar and front load our professional development before Labor Day so that we can really be ready for our students no matter how we have to deliver instruction during the upcoming year.  Additionally, the location of Labor Day and Memorial Day in this particular year allows us to still complete our contract days and required student contact time before June even with the delay in beginning school for students. It's a win/win. Please accept the governor's executive order delaying the beginning of school until after Labor Day.
7/21/2020 15:30:31	Cody	Janousek		Lenexa	As a teacher, I am fully in support of Governor Kelly's Executive Order 20-58 that would delay the start of the 2020-21 school year. If we are truly have the health and safety of our students, faculty, and community in mind, we need more time to adapt our educational system to reflect what we know about COVID19. It is my hope that our legislators will consider the information and expertise collected that prompted Governor Kelly to take this direction, and will use this Executive Order to facilitate our return back to a safe and healthy classroom.
7/21/2020 15:30:32	Katarzyna	Spiewacki		Olathe	School needs to be open.

7/21/2020 15:30:50	Matt	Bunker	Parent of 3 students in U	Olathe	I implore the State Board of Education to vote against Governor Kelly's mandate. The mandate itself is overreach and removes representation of public opinion, regardless of the current state of the COVID19 situation. As a parent of 3 students in USD 230, my concern is not about delaying the start date but rather the unnecessary and added agenda of the governor linked to the mandate, specifically the denial of interaction between students, teachers and coaches "including virtual, online, and any other direct or indirect means of providing instruction". COVID19 is not an "electronic virus" and the denial of even virtual communication and valuable interaction between school representatives and students tied to the mandate is abhorrent. It is neither benefiting the health of the student or preventing further spread of a virus. I'd argue the overreach is likely more damaging to the mental health of our students. This is unacceptable in any form and sets up all districts across Kansas for additional denial of local control via mandate for the rest of the school year as well as setting a bad precedent for control via mandate by future governors. Please let Governor Kelly know this is unacceptable for Kansans and allow local school districts the flexibility to care for and meet the safety needs of their students at a local district level. I'm confident that each school district in Kansas does not need to be told via mandate how to keep staff and students safe. I appreciate the time and effort the board has made in providing the districts with guidelines that can be used to execute safety protocols during the 2020-2021 school year. Thank you, Matt Bunker
7/21/2020 15:30:54	Nelly	Tovar	Parent	Wichita	I want to delay for the health of my child. He has had anxiety all summer about going back to school and possibly getting sick or us getting sick. Even if it's just a couple of more months, we would be willing to give up any breaks or have school go into next summer. Anything that could slow down the spread!
7/21/2020 15:30:56	Danny	Gilbert	Family	Hays	Reducing the school year will do absolutely nothing to prevent the spread of disease and it's unfortunate for the kids that their education is being held hostage without any scientific basis the for the fear being spread throughout the country.
7/21/2020 15:30:58	Robin	Stucky		McPherson	This should be left to each School District to decide when they should start back to school. They know if they are ready or not to begin and I would think they should have a plan by now as to what will happen. If they don't then what the heck have they been doing all this time have they stuck their head in the sand.
7/21/2020 15:30:58	Ashley	Reed		Hays	I feel kids need to be in school before labor day. Too many kids are being abused and there is another mental pandemic brewing with our kids. They need the structure of school. With the right precautions and some creativity i think we can open schools safely. Some school districts are having classes held outside. I think we can get creative and please open our schools back up!
7/21/2020 15:31:00	Shanelle	Canaday		Emporia	School is a safe place for so many children. When children from abusive homes don't have a place like school to go to, they are living with more devastation. We know that abuse is up but reports are down as teachers are not there to help and report. Sex trafficking is through the roof. Having children at home to do online school or due to delay is the worst decision to be made. When did we stop putting our children first? The devastation from not being in school is worse than the threat of coronavirus....which if you look at the data is not even a threat. Go look at the data. Coronavirus is not the biggest threat. Children need to be in school, end of discussion
7/21/2020 15:31:03	Marisa	Stone	Gardner Edgerton USD	Gardner	I wanted to take a moment to ask that you please not accept the delayed start that Governor Kelly has imposed. My children need to be in school, not because I need to work or need a babysitter, but because they need their education and their peers. I have a son with autism and he desperately needs his peers and the structure of school. I also have a daughter with severe anxiety and she needs her school schedule and routine as well. Thank you.
7/21/2020 15:31:04	Rachel	Ledbetter		Olathe	Private schools have been working through the summer to prepare for opening. Public schools may need their opening to be delayed, but the order should not apply to private schools. At the very minimum private schools should be allowed to start getting kids in the building so they can practice all the new procedures the kids are going to have to follow without eating into additional instruction time.

7/21/2020 15:31:07	Rebekah	Smith		overland park	Delaying school does not benefit the kids. Kids need to be in school. Parents need to be able to work. Delaying the start of school is doing more harm than good. Some kids depend on that time away from a stressful home situation, depend on school for food, and need the physical outlet. Sports, especially outside sports, should go on as well. Kids need an outlet. They need physical activity. Taking away competition and activities is doing more harm than good. It weakens the immune system. Physical activities help to replace mitochondria that makes cells healthy. Unhealthy cells and unhealthy kids make for sick kids. It also affects their psychological well being. If Kids are stuck at home, no physical activities, no healthy competition... you might as well put them all in a bubble. Do you remember the movie, "Bubble boy?" This is ridiculous. You worried about kids and anxiety and depression and suicide before all this... Delaying school and taking away sports will definitely increase... much worse than the possibility of "catching" a disease that may or may not affect them. Good teachers teach despite the risk (school shootings are one example). It is more than a job, it is a mission. The kids are more important. I am a teacher. Let me teach! Masks should not be required. It should be up to the school, parents, teacher.... government has no idea what makes a certain school work. It would be like me coming into your house and telling you how to raise your children... ridiculous. Kids are at no risk. By taking away outside competition sports and school, we are dooming a whole generation. Life is not safe. You can not keep everyone safe from any thing. School shootings, suicide, sickness, death, it will happen. And if you take things away... you are at risk of losing kids to something much worse than a disease.
7/21/2020 15:31:07	Kristi	Williams	Olathe SD	Overland Park	I believe the delay is a great idea from the perspective that this gives the state time to really evaluate the situation. Also it gives districts plenty of time to plan and prepare. Being a teacher on the other side of the state line my state is being forced into hurrying through the process. I would rather them take their time and give us time to make sure we are prepared in the classroom for something that's going to look very different.
7/21/2020 15:31:09	Arlene	Noll		Nortonville, Kansas	Good afternoon. As a parent and former educator, I wanted to express my feeling about the delayed start of school. I firmly stand by the Governors decision to delay the start of school. I think the families, educators, and children all need this extra time to prepare. We all know this school year will be different and in order to ensure we can all be working toward the safest and best environment for the students, staff, and families there needs to be proper preparation. The extra time will allow for this to happen. I think it will allow for a smoother transition into what will likely be a bit of a nontraditional school year.
7/21/2020 15:31:10	Kelly	Ranz	Goddard Parent	Wichita	Keep school closed until after Labor Day
7/21/2020 15:31:11	Ashleigh	Hill		Colby	The proposed date (delay of school starting) is fine with our family. What we are not okay with is wearing masks at school or delaying activities like football, basketball, cheerleading, ect.
7/21/2020 15:31:16	Wendy	Watts	Parent	Lenexa	Voting no
7/21/2020 15:31:20	Liza	Perry		Princeton	I think we need to follow the Governor's order to delay schools for both student and teacher safety.
7/21/2020 15:31:21	Christina	Hicks	Olathe District Walnut C	Overland Park	Please at a minimum keep the delayed start as it will give teachers, parents, and school officials more time to prep and prepare. As a parent I need more than a few days to decide if I am going to enroll my children or not specially since I have yet to see the official plans from our district. I can't make a safe decision without my knowing what to expect for the safety of myself, working in the school, my children, who attend the school, and the vulnerable loved ones we have contact with to help them with daily needs. At least I feel like virtual learning is the best decision and would be in support of the 1st semester being virtual learning to help lower our numbers then slowly introduce children back into the school building at small steps to see how the covid numbers go after allowing a few back at a time. Please consider the unknowns that we still are unaware how covid affects our children and the spread of it from child to child.
7/21/2020 15:31:27	Cathy	Penner	Title*UDS 418	Newton	Please wait until after Labor Day to start school in the hopes that with masks in place we can bring our covid numbers down and allow schools time to get all things in place to have a safe start to the year. Thank you for your consideration!!
7/21/2020 15:31:29	Mindy	Barr	Goddard Middle School	Wichita	I prefer the September 9th start date as the order calls for. With the number of cases on the rise, it buys us more time to hopefully a healthier start.

7/21/2020 15:31:32	April	Brenner	Blue Valley Randolph, U	Randolph Ks	I have three children under the age of 12. They need regular school days. They are desperately looking forward to being in their regular school environment with their peers. They are at critical ages where school is vital to their daily growth. I am a taxpayer & I choose to send my children to public school. If I wanted to homeschool, I would choose that. If I have to mandate my children's remote learning again, I would like to receive monetary compensation for doing so. It was a lot of work & it isn't my career choice. I didn't not see any growth within my children during remote learning. They miss school. Desperately. Please allow school to move forward on September 9th. They WANT to be in school again.
7/21/2020 15:31:35	Stephanie	Wixon	I work for SMSD 512	Lenexa	Please work with Governor Kelly on this! Teachers are terrified to go back right now. It's not safe for us or our students, especially middle and high school aged students. Studies are showing that their transmission rates are much higher than younger children. School districts will worry about state funding if this decision does not come from the state level. Please do not put this pressure on local school board, have courage and take your leadership roles seriously. This is not a political issue, it is an issue of the health and safety of our families and communities.
7/21/2020 15:31:37	Elizabeth	Meagher	USD 383	Saint George	I believe that if we delay school starting, we also need to delay teacher report dates. Teachers with school aged children will be left without care for their children.
7/21/2020 15:31:39	Virgil	Calhoon	Myself	Wichita	PLEASE, PLEASE, PLEASE! It is science, not politics. Do not send the kids and me back to school when the numbers and infectious rate is high. I drive a school bus, as a lot of us "older" semi-retired people do. Bus drivers are in high demand. We have always been short drivers over the past four years that I have been driving. What protection do we have from Covid; very little other than masks. I carry an "average" number of kids on my bus. Some drivers carry a lot more. I carry 45-55 K-5, and 40-45 6-12. Buses are cramped with little ability to distance anyone on the bus, yet alone control the airborne particles from the kids. Especially, the K-5 kids. Death from Covid is a small part of the consequences. It is way too early for long term comorbidities of the disease to appear. I recently saw where as many as 1 in 8 survivors have some sort of cardiac issue after recovering. It is unknown at this time what the recovery will be. Currently, I think there are about twenty percent of our drivers, older with potential health concerns, that have not made up their minds yet. They, like me, are waiting for the guidelines to come out to see if the risk is worth it. We all want to drive. I have two daughters that are teachers as well. They want to teach but are extremely concerned about protection. I am building plexiglass shields for their desks. Do the schools have ample stockpiles of protective gear and sanitation equipment? Will the hospital staff have enough supplies to protect them? Will they still have enough after all of the school systems stockpile? It's a tough decision. I'm counting on you to make the correct decision.
7/21/2020 15:31:40	Tony	Ballard	Self	Manhattan	I am the father of a 6th grade daughter and and 8th grade daughter. My 8th grade daughter is a high needs special education student with multiple medical issues. My wife is also an elementary teacher. While I want my kids to be back in school and my wife back to work comfortably, I do not believe we are there yet. With so much being decided at the last minute, I believe it would be in the best interest of my wife and my daughter's for school to be delayed. That delay will allow school districts to properly provide the professional development needed to staff of all levels and ensure that buildings and staff are prepared for student arrival right after Labor Day. Personally I do not believe that we will see a significant change in COVID numbers between now and Labor Day, but I do believe that we can see vast improvement to preparedness by teachers and staff if given the appropriate time to work through all that will be expected of them. Districts of ALL sizes and locations will be dealing with new issues this school year that have not been discussed with staff at this point. It is unreasonable to expect that staff will learn, practice and implement all that will be expected of them without giving them the time to work through the process. I ask you to vote in favor of delaying the opening schools across the State of Kansas.
7/21/2020 15:31:46	Susie	Brown	Family	Eudora	By keeping the children home longer and wearing masks all day and for as long as being required, that is hurting their immune system. I'm concerned with the mental and social problems this will also cause along with weakened immune systems. Leave it up to each school district on how they want to handle it and start back to school.

7/21/2020 15:31:52	Tara	Perdue		Lawrence	Comment removed due to profanity
7/21/2020 15:31:55	KYLEE	JAKABOSKY	ELYRIA CHRISTIAN S	MCPHERSON	SCHOOL SHOULD NOT BE DELAYED. OUR CHILDRENS EDUCATION DEPENDS ON IT
7/21/2020 15:31:59	Joanna	Kimball		Westwood, KS	I am a resident of Westwood, KS and also happen to be an Infectious diseases physician at KU medical center. I wanted to voice my support for delaying the school start date. Our numbers are rising plain and simple, and unless those numbers dramatically decrease soon, which we have no evidence that they will, teachers, cafeteria workers, bus drivers, students and their families will all be put at risk. I strongly urge you to support this delayed start.
7/21/2020 15:32:01	Toby	Green		Shawnee	I do not support delaying the start of school. While I am supportive of the mask mandate in place, I feel there is nothing gained by pushing the start of school. With proper social distancing and masks when social distancing can't be achieved returning to school can be done safely. At the very least this decision to be left to the school districts and not a statewide mandate.
7/21/2020 15:32:01	Tamara	Knutsen-Hagemann		Manhattan	I'm glad they aren't starting until after Labor Day and I really wish we we're starting online.
7/21/2020 15:32:06	Chelsee	Poskey		Lawrence	As a teacher myself, I believe that the delay is a MUST. It allows for a number of things to happen, hopefully cases to lower and also more time for districts To prepare a safe and adequate plan. Going back as planned in August is dangerous, stupid, and a risk I'm not willing to take for myself, my family, my students and my students' families. We do NOT deserve this risky situation, our lives should be protected NOT risked by going back too early.
7/21/2020 15:32:07	Sean	West	Self	Overland Park	I believe the Board of commissioners, with input from school and health officials, should make the decision about school start dates and conditions.  The Governors' heavy handed exercise of emergency powers regarding this issue as well as her comments to the Board of Commissioners to "Not make this political" are absolutely appalling. Our school administrators and teachers have been working extremely hard with the health of our children, and their own, in mind. I MUCH PREFER to hear from them rather than have their work blown up by the Governor sitting in Topeka!! Our teachers and administrators will actually be in the building with our kids, shouldn't we hear from them????
7/21/2020 15:32:09	Gail	Sherron		Lawrence	Please delay the start of the school year.
7/21/2020 15:32:11	Somsanit	Sengchan	Self	Lawrence	Yes, delay the start of the school year.
7/21/2020 15:32:16	Jessica	Nagel		Bucklin	Please consider allowing our public schools to start on time rather than delaying until after Labor Day. As a parent of 2 children whom I have previously homeschooled and will be first time enrollments at USD 459, my children are excitedly waiting for the school year to start, especially my Freshman as he is anticipating the start of fall sports. I do not feel that this virus is reason enough to delay. We have spent our summer swimming and playing ball as soon as allowed by Ford County and have had no issues in our small community. I know that there is always a risk for exposure but believe that we can not put our lives on hold any longer for a virus that statistically has shown to have a high recovery rate. As essential workers, my husband and I have continued working through out the pandemic and do not feel that our children would be at any more risk than they already were during that time. It is time for our communities to return to an as normal as possible way of life. Thank you for your consideration.
7/21/2020 15:32:25	Arlene	Kirby		Syracuse	Let the kids go to school, on time, without masks. Kids are in the lowest percentile of threat potential.
7/21/2020 15:32:26	Sara	Graff-Daugherty	My children	Spring Hill	I support the decision to delay school opening until we can stabilize the spread of COVID-19 via masks or other methods. Also, I support a delay until we can adequately equip our local schools with funding to provide PPE and a proper social distancing setup.  My children (8 and 9 yrs old) both have asthma and are at higher risk during this pandemic. I believe every school should also offer a fully remote/virtual option for families such as mine. Thank you for putting the safety of our children and teachers first. Your thoughtful and cautious consideration is greatly appreciated.
7/21/2020 15:32:34	Brett	Sramek		Lenexa	It is important for school to start on time and get kids engaged in learning, please vote to start school in August

7/21/2020 15:32:36	Diane	Hulet	My family	Olathe	Please do not delay the school year. Allow the marching bands to practice outside immediately. There is minimal risk for the spread of Covid for outside activities. Covid is less deadly than the flu, especially for children.
7/21/2020 15:32:36	Ty	Wilder	School parent	Hutchinson	The following is from a study they did in New South Wales where they did not shut down school in the heart of the so called pandemic. They found that this virus less contagious than influenza in children. Here is a full link to the study, <a href="http://ncirs.org.au/sites/default/files/2020-04/NCIRS%20NSW%20Schools%20COVID_Summary_FINAL%20public_26%20April%202020.pdf">http://ncirs.org.au/sites/default/files/2020-04/NCIRS%20NSW%20Schools%20COVID_Summary_FINAL%20public_26%20April%202020.pdf</a> . Our detailed investigation of COVID-19 cases in 15 NSW primary and high schools found only two secondary cases, both in students. This was despite initial cases occurring in 9 students (including two students in two schools) and 9 teachers. Very detailed follow-up, including additional testing for the presence of the virus and for antibodies to the virus, occurred in a proportion of the total 863 close contacts identified from the school setting. Our investigation found no evidence of children infecting teachers. One secondary case (in the child in a high school) was presumed to have been infected following close contact with two student cases. The other secondary case was presumed to have been infected by a staff member (teacher) who was a case.
7/21/2020 15:32:45	Faith	Robertson		Overland Park	Delay
7/21/2020 15:32:47	Melissa	Petz	Myself	Wichita	I strongly believe that our children need to be in school, starting on time in August. This is not a risk free society and there will always be risks for our children of something in this world. Many millions of viruses are out there and anxiety, depression are not worth the risk for our children not being in school. They need to be in a structured classroom with teachers and their peers without masks. Please do the right thing for all of our children.
7/21/2020 15:32:56	Valerie	Walter		Beloit	I'm deeply concerned by the closure of schools mandated on the state level, and I implore the State Board of Education to not approve the governor's action. School closure decisions should be left to the county and local school boards.  Barring a miraculous development, this is sure to be a difficult school year for most. I expect multiple extended closures will disrupt nearly every community, complicated more by the upcoming cold and flu season. However, closing schools statewide now, when many students, teachers, and communities in general might be healthy, is unnecessarily shortening the school year further. These warmer months may be our best opportunity for normalcy, and the governor is needlessly taking that away from us.  Local counties and school boards are fully capable of making these decisions for themselves. There are still multiple counties with no active cases, low population density, and small class sizes, and they should not be treated with the same broad brush as Johnson and Shawnee counties. Rural communities may lack many of the advantages of larger cities, but in many ways we are in a superior position to manage this pandemic, and people who don't live here should not be making these decisions for us.  Furthermore, I ask that you allow schools to follow their own county's mandates regarding wearing masks without fear of losing accreditation. A statewide mandate of face coverings for children as young as preschool is unnecessarily detrimental to children's health, development, and emotional well-being. The safety of young children wearing masks has not been proven, in terms of not *increasing* infection due to misuse. Please allow schools and counties to make these decisions at the local level!
7/21/2020 15:32:57	Terah	Robinett		Salina	Please vote in support of the governors executive order.
7/21/2020 15:32:57	Jared	Slusser		Lenexa	The children need to be able to go back to school on time. With already almost 6 months out being out of school, it begins to hurt the student mentally. Not having the schedule and social structure that they need so bad at these ages. Pushing the school back 3 weeks will only open the door to kicking the can down the road and continually pushing the opening back further after each interval. The children and teachers are ready to be back.
7/21/2020 15:32:59	Jeff	Benton		Cimarron	Leave the opening up to the individual districts

7/21/2020 15:33:04	Candy	Hill		Valley Center	It is beyond ridiculous to think these kids need to lose out on anymore education. If a parent is worried they need an option to home school, some children don't learn by being on a laptop. Different learning styles matter and delaying thus is putting already disadvantaged children at an even bigger disadvantage. In no way should expect these children will wear mask appropriately without the urge to share them or pass them around. There should be steps enforced when a child is sick, but children should be in school.
7/21/2020 15:33:08	Kelly	richardson	Patent and teachers	pratt	Please allow our communities to take their own precautions to this virus for our area and let our children get back to the classroom!!
7/21/2020 15:33:12	Kirby	Daetwiler	USD 259	Mulvane	I prefer to wait until after Labor Day to return to school due to the rising Covid 19 numbers at the present time. Why make a serious situation potentially worse?
7/21/2020 15:33:15	Pam	Ogle	Christ Preparatory School	Olathe	I appreciate all that Governor Kelly and her staff are going to keep Kansans safe. I don't pretend to know the best course of action to take. I have family and dear friends in the medical field, including a nephew who went to NYC to help with the Covid 19 crisis there. All are very concerned about this pandemic and both the short and long term effects of this insidious virus. Along with teaching, my husband and I own and run a restaurant. This struggle is very real to all of us on so many levels. As someone teaching in a small, private school, it is important to remember that 'one size' does not fit all. While certain restrictions may be necessary, best practice, for large school systems, the same is not true for a small private school where certain distancing, safety and protective measures can be maintained. We can distance, ensure mask wearing, monitor health, etc. better than a large school setting. We believe that in person class is better for our small community. Our school admin and board have taken extensive measures to evaluate the pulse of our teachers, staff and families and while our views are as varied as the people of our great state, we feel confident that we can create a hybrid model that will meet the varied needs and concerns of our community without moving to solely remote learning or starting late. Thank you for your time and consideration!
7/21/2020 15:33:20	Dani	Durand	Teacher	Garnett	I feel school districts should decide when school starts. Our county (Anderson) has 6 current positive cases compared to Johnson county that has hundreds. I feel that it is critical to get students back in school for their mental health and academic learning.
7/21/2020 15:33:34	Cate	Jenks	Kansas City Christian School	Prairie Village	Hi, I believe that it should be up to each school (private) and district (public) as to whether they want to start school or not. I believe that with schools following the safety guidelines already set forth by the Dept of Education and medical professionals, then the timing of the start of school should be up to each private school or district. If we continue to delay the start based on current trends or numbers then I feel we are in a never-ending cycle of pushing things back. With the likelihood of Covid-19 not being completely resolved quickly and without guarantee, then it is necessary to consider the other ramifications of not having the option for kids to attend school in person and for kids to continue learning online.

					<p>I am concerned that governor is creating executive orders with advice from a very small group of like minded advisors. I understand that your meeting tomorrow is around whether or not to delay the school start date until after Labor Day.</p> <p>1) I agree with delaying the start of school if we are waiting to make sure the schools are prepared, but with the restrictions of EO 20-59 mitigation procedures, how will schools be ready?</p> <ul style="list-style-type: none"> <li>- Temp checking every person entering the school every day - we have small schools and I don't know how that is feasible. Time, staffing and availability of enough reliable no-touch thermometers are the main barriers.</li> <li>- Masks required for everyone? Data shows that children under 10 aren't generally spreaders, and until they are used to wearing a masks it does more harm than good to have it on.</li> <li>- How do you have masks for everyone? Kids will misplace them and just use someone else's (gross and the opposite of the intent) - why would we expect them to act differently about masks?</li> <li>- I believe that kids from low-functioning households with poor parental support are going to be the ones most impacted</li> <li>- are we going to punishing children because they don't have a mask, or will the schools supply masks for everyone? That's not very reasonable but it would seem it's one or the other.</li> <li>- Who makes sure kids have clean masks? Breathing through a dirty mask makes people sick, again supplying clean masks to everyone?</li> <li>- I have a junior high student with a hearing deficit and she relies on seating preference a bit on lip reading. We know how muffled our speech is through a mask, what kind of learning environment can be created for kids like that?</li> <li>- I believe the schools plans should reflect the student body, staff and the ability of the school to use its space to create safe environments, and yes, I believe that masks and temp checks are part of that. I think that the school districts should continue to work with local public health to develop plans using the Navigating Change guidance tool fitting it to their staff, students, facilities and the COVID-19 data in their area.</li> </ul> <p>2) I agree with delaying the start of school to wait for the data to be more favorable but if we think the number of positive cases will go down by September, I don't know if that is realistic.</p> <ul style="list-style-type: none"> <li>- We are now testing in Kansas at a high rate so the numbers will keep going up. In Ottawa County we have increased positive cases recently mainly due to an out-of-county funeral. Funerals, for one, have caused more spread than any</li> </ul>
7/21/2020 15:33:38	Sara	Hodges	Public School Parent	Bennington	
7/21/2020 15:33:38	Craig```	Archer	Student	Olathe	State BOE please vote NO regarding this E.O.
7/21/2020 15:33:42	Michelle	Siegrist	Christ Prep Academy	Olathe	I've always thought the school year should run between Labor Day and Memorial Weekend. I'm in favor of starting school the day after Labor Day but allowing for teacher in-service days to be completed before Labor Day weekend.
7/21/2020 15:33:46	Angela	Swartz	My family	Pittsburg KS	I think that remote learning needs To be an option for the students in counties where the cases are still rising, like ours. I do not feel that it is safe for children or staff to be crammed into these old buildings with questionable ventilation. It is inevitable that this will cause super spreader issues. This puts everyone in danger - parents, grandparents, people with illnesses. I do NOT want to send my children into that situation. I have health issues that could cause me to get seriously ill if I got Covid. How would my children feel if they brought it home and their mother died from it? We have been diligent about social distancing and masks, while many people around us feel it's a hoax. There will be kids at school who won't follow the rules. I'm not ready to take that chance. I hope distance learning is being considered for the fall semester.
7/21/2020 15:33:50	Theresa	Meiwes	Overland Park Elementa	BASEHOR	Support
7/21/2020 15:33:52	Barbara	Boudreaux	Self	Topeka	Starting schools past Labor Day with no virtual learning in the interim will further set my children behind from their peers in other states. I urge you to require schools to provide virtual learning opportunities during that four week period. There is no reason schools should be wholly stopped from occurring during this nearly month-long delay when virtual learning opportunities exist. There are no local summer camps or other structured learning opportunities during that four week period to engage my children. If everyone wants Kansas children to learn, then let's let them start on schedule virtually in mid-August. The schools, after all, have been preparing since May for this start date.
7/21/2020 15:33:53	Kelly	richardson	Patent and teachers	pratt	Please allow our communities to take their own precautions to this virus for our area and let our children get back to the classroom!!
7/21/2020 15:34:17	Kristin	Brown		Wichita	I am in full support of delaying the start of school. I want schools to be open, but only if our numbers say it's safe.

7/21/2020 15:34:22	Clare	Stafford		Lawrence	All comments are related to High School—No cookie cutter approach like last spring. HS students can handle more in-person and virtual class time and workload. Grades need to count this time. Require masks in schools, classrooms (unless min. 6ft. distancing is possible, open windows). Consider staggering/alternating high school grade levels on certain days, times. Allow local districts to develop creative plans that best fit their communities. Please don't set low standards. Make HS students accountable for attendance and grades by giving districts guidelines that set expectations high for learning. We send 60% of our taxes for public education. Parents and students should expect a public education that delivers academic excellence as a return on investment.
7/21/2020 15:34:26	Liz	Ewing	Educator	Wichita	Please honor the governor's mandate and give us the gift of time. We need numbers to go down to feel safe and we need time to plan effectively.
7/21/2020 15:34:27	Jana	Peirce	Rockville elementary US	Louisburg	I agree with the governor's executive order.
7/21/2020 15:34:31	Lindsay	O'Neil	DeSoto School District	Olathe but within school	Please delay the start of school or utilize remote learning until there are no new cases for at least 14 days. The cases are steadily rising in Kansas and it is unsafe for our students and staff to return to school. Please do the responsible thing and keep families at home.
7/21/2020 15:34:43	Elizabeth	Musil		Manhattan	My hope is that the board will vote to uphold Executive Order 20-58. Delaying the start of school will allow districts and educators to properly plan for the school year with social distancing measures in place. Many districts have not yet finalized plans for exactly what the school year will look like - if we start in August, there will not be enough time to plan quality education, be it online or distanced in the classroom. Delaying the start of school will give time for educators to react once opening plans are announced and finalized.
7/21/2020 15:34:52	Carol	Burgardt	Retired teacher	Wakeeney	Vote yes to start school after Labor Day. Protect our children and teachers!
7/21/2020 15:34:56	Doug	Westerhaus	My famil	Overland Park	Please support Gov. Kelly's Executive Order to delay school start until after Labor Day - for the sake of safety.
7/21/2020 15:34:57	Angela	Portenier		Washington	I feel that it would make no difference in health if we start school at the regular scheduled time. These kids need classroom education. I also feel requiring face masks will not benefit a proper learning environment.
7/21/2020 15:35:03	Rebecca	Miller	Broadmoor Elementary	Louisburg KS	Our family as well as the others in our neighborhood would like school to start in August. These kids have been home since March, losing out on education and social interaction. They miss friends, teachers, school and staff. This is a small town that needs schools open in order to thrive. Waiting an additional month over minimal cases here seems more detrimental to the kids then the public if school was to open on time.
7/21/2020 15:35:12	Kristina	O'Connell	private school parent	Bucyrus	Students need to be in the classrooms learning. Delaying the start of school will hurt students. Any action to be done should be on a school by school basis. IF they have anyone in that school building contract the virus, then that school needs to deal with it. As for private schools they should be allowed to open when they see fit and not be mandated by the government. They receive no government aid so therefore the government should not be allowed to put restrictions on them.
7/21/2020 15:35:16	Terresa	Kohman		Rural Solomon	I support Governor Kelly's postponement of schools until after Labor Day. Having served on USD 393 school board for 12 years, I understand the tough decisions schools have to make to keep them safe for students and staff. As a grandparent of school age grandkids, I'm even more concerned about the safety in schools.
7/21/2020 15:35:17	Holly	Day	Parent of middle school	Olathe	As a parent of a student going into the 8th grade this Fall, I would like to see him begin school, on campus, in August. If the decision to open schools after Labor Day is final, then I would like to not see another delay after that. I understand the importance to keep staff and students safe during the pandemic and that school will look different. My student does better in class vs remote learning. Speaking for myself, I am willing to do what I can for him and others to stay safe while learning in school. Whatever that looks like. I appreciate your consideration in this matter and the hard work that I know this is causing.  Thank you.
7/21/2020 15:35:19	Noel	Delgado	Sunflower Elementary S	Liberal, KS	The consequences of bringing together small children and then sending them home just does not make any logical sense in the middle of a pandemic. Most children lack the discipline to keep hands off their face and they love to touch everything! I believe a delay is better than starting everything and then having to shut down later due to students/teachers getting sick.
7/21/2020 15:35:21	Kate	Carnahan		Lawrence	Please allow sports to continue. These kids need an outlet of some kind of school cannot happen. It's so important for their mind body and soul.

7/21/2020 15:35:41	Karla	Haggard	Self & Kids	Gem, KS-Colby USD 31	I feel the kids need to get back to whatever kind of "normal" is possible at this point. They need to be in school and have structure and the chance to see their friends and teachers. Things with this virus are making it hard to have the "normal" we know. I'm not a fan of the kids having to wear masks but if it means they can be back in school with a somewhat "normal" atmosphere then my vote is to let them go back and go back in August. What is a couple weeks going to do? Waiting till September doesn't make it any safer than it would be right now. Let them get back into a routine and back to learning the way they're used to. Too many kids are suffering from not having that structure and atmosphere. The help of the teachers, the support of friends and activities. Have hand sanitizer, put in some plexiglass for separators in places if needed. I work in the court system and we have managed to make it work with plexiglass barriers, masks and frequent cleaning, washing of hands and sanitizer. I think the schools could do that too. Kids need to be back to school and whatever kind of "normal" they can have at this point. Kids still need to be kids and not miss out on everything because of this stupid virus and fear. At the very least, look at each individual school and the areas they are in. We are in Western KS and it's not as bad out here as it is in the Eastern part of the state and the more populated areas. So don't lump ALL schools together. Take time to look at the areas and what they're dealing with. How many cases they've had and how many recovered. Right now, we've had 20 cases and 18 are recovered out of a county of 10,000. Those are pretty good numbers. Those are things to take into consideration and not just lump the whole state into one pot. I vote for starting in August like normal and taking precautions so kids can go back and continue life! Don't let them live a life of fear.
7/21/2020 15:35:45	Melanie	Beard		Riley	I believe districts should be allowed to independently make the decision on when to open and to what degree, as well as to determine what methods should be available (on campus, distance, hybrid). My reasoning behind this is that what is necessary for a large district may be more drastic than what is needed for a smaller district. Similarly, what is sufficient for a smaller district may not be enough to ensure safety of staff and students or a larger district. Size of a district is not the only deciding factor that should be looked at. The number of cases and how it is believed COVID-19 is being spread differs from area to area and city to city. These are things that should also be considered. To make a blanket law for all districts does not make sense when considering what is best for students and staff.
7/21/2020 15:35:45	Courtney	Weis	USD 232	Shawnee	Please vote no to the governor's mandate regarding schools in Kansas. I believe that Kansas is such a diverse state that the decision needs to be left to each district as to when to begin and what class options will look like. There are many areas that are not overrun with COVID cases and would be perfectly safe to begin school.  I have read the Board's recommendations and they are solid. I feel confident that they have also provided options that will work for EVERY family. When numerous pediatricians (medical professionals) say that our children need to be back in school, I believe them!  Let's not politicize this decision and please ask the governor to stop overreaching into education. She is a politician! I understand teachers are worried, but essential workers have been working this entire time, including my husband. Education is ESSENTIAL and we need to get back to it!  Thank you.
7/21/2020 15:35:49	Amanda	Nolasco	Usd 204	Bonner Springs	I am a school counselor for Usd 204. One of the arguments for school reopening is a concern for the mental health of students. However, bringing students back to the school building during a pandemic when the numbers are trending upward will only cause an increase of mental health issues for students and teachers. Educators need as much time as possible to delay school reopening to make sure that it is a safe place for students to be. Not only should the board vote to uphold the executive order and delay school, they should also recommend virtual learning to prioritize the health and safety of educators and students.
7/21/2020 15:35:51	Erin	Ensz		Lawrence	I stand with the governor's plan to delay the start of school until a decrease in number on Covid cases is seen. I am a registered nurse and know the governor is making decisions based on science and safety. Please do not cave to those who do not base their feelings in facts and are using this issue to divide and politicize. Please show that Kansas is a state of common sense with educated leaders and follow the governor's plan.

7/21/2020 15:35:57	Rachel	Brown		Wichita	Please allow school to start on time, our kids have already been out of school for 5 months. Let the parents decide what is best for their kids. We want a vote against the executive order. We are 100% against starting after Labor Day.
7/21/2020 15:36:00	Deena	Clark		Hays	I would request you consider having school as normal as possible and extra curricular activities. I work In the schools as a counselor/educator and I also have children. Life is not a "non-risk!" The risks of not starting (abuse, mental health issues, suicides, etc) are far higher than the chance of our students getting Covid-19. I am not scared to go back to work. We will have precautions in place and use good hygiene, as we should on any given day. Thank you for your consideration.
7/21/2020 15:36:00	Sarah	Morales	Parent in the district	Geary	I prefer schools to delay opening
7/21/2020 15:36:02	Lynette	Koon	Student Parent	Colby	I understand the students need to be back in school for numerous reasons. These are scary times in more ways than just worrying about spreading the Covid virus. Our community has been fortunate thus far to have had very few cases of Covid-19, but due to that reason, there is a mentality here that this virus is not that serious and many individuals seem to think it is all a hoax and they are not taking the situation as seriously as they should be. I feel it's best to follow the governor's mandate to wait until after labor day to start school. That allows this community to see what happens after the county fair and a few other public events that are planned and to give the State, as a whole, more time to slow the spread (if that's possible), and the school leaders more time to work on the best possible plan for the safety of our kids and families. Thank you for the opportunity to give my opinion.
7/21/2020 15:36:07	Amanda	Winter		Andale	I think postponing until after Labor Day is a good idea if this will give school districts needed time to make classroom adjustments, acquire PPE and help keep our kids safe during the school year as well as hopefully see our numbers improve and have less disease burden on our local hospitals and resources.
7/21/2020 15:36:08	Melissa	Ross		Wichita	Please follow CDC guidelines. Listen to science and data and delay opening school.
7/21/2020 15:36:09	Rachelle	Morrison	Colby Public Schools	Colby	I am concerned about any physical school start date now. Local people have made the decision to hold the county fair. Two weeks from that event we will have a guaranteed increase in cases. This time line will come close to an earlier start date. If we wait until after labor day, then the irresponsible people who do not wear a mask or social distance will attend gatherings and will infect others. I have entertained the idea of homeschooling but am on the fence as my children feel they learn better in person. I am interested in the recommendations set forth by the board to protect our students health, their families health, and the community as a whole. You have a tough decision ahead and I realize not everyone is going to be happy with what you decide. Please make the decisions with your hearts and not based on politics. This whole situation has become political and decisions need to be based on what is the best for the children of Kansas. I will be praying for all of you as you decide what the future education of Kansas children will be.
7/21/2020 15:36:19	Nicholas	Quenzer		Colby	I am against the late start for the 20-21 school year.
7/21/2020 15:36:20	Holly	Schmitz		Baileyville, ks	I would strongly like school to start on original date set and not wait until after Labor Day. The kids need to be back in school for a multitude of reasons. Safety is important but mental health more important.
7/21/2020 15:36:21	Deborag	Hamil	Maranatha Christian Ac	Lenexa, Kansas	I ask that school would be able to start in August. Students and parents are ready for school to begin in August. Please don't extend it longer, past Labor Day. If nothing else, let each district make their own decision based on the demographics of what part of the state they are in. A blanket start/no start, isn't the best decision as some schools don't need an extra 6 weeks from now to get ready. Thank you for your consideration and all the work you put into this. I don't think that the whole state of Kansas needs to wait until September to start school. Thank you!
7/21/2020 15:36:26	Blake	Shinkle		Overland Park	I would like the executive order to be approved.
7/21/2020 15:36:33	Alyssa	Detwiler		Manhattan	I think schools should not be in person at this time. The first semester should be online.
7/21/2020 15:36:34	Julie	Laflen	Teacher	Pittsburg	The longer we can wait to put kids back in the building, the better. Teachers need TIME to learn how teach online and set up correct protocols for the classroom.
7/21/2020 15:36:46	Daniel	Dennis		Colby	Comment removed due to profanity

7/21/2020 15:36:48	Amanda	Chen		Olathe	Schools are safer and will comply with more rigorous cleaning policies than most public places people are already visiting. There are options for those who feel uncomfortable with sending their children, but please don't deny mine the right to the best education available due to fear or political agendas. Schools will likely face setbacks if cases spike again in the Fall as predicted so getting kids back on track as soon as possible is a key to educational excellence. My daughter, Kansas middle school teacher (100+ students), her husband, Kansas higher education instructor (200+ students), my 3rd grade granddaughter (19+ classmates) will return home, daily, bringing the possibility of exposure from a pool of over 300+ people. School for this year is unhealthy for teachers, instructors, and students.
					Let the schools be the first segment of society to set Covid boundaries by:  Virtual learning for the majority of students to last minimally through March 2021 or throughout the 2020/2021 school year.  Provide limited services for certain special education students and at-risk-for-abuse students.  Make internet hotspots available throughout Kansas for rural and non-internet zones.  Make equipment such as tables, computers, available for those without.  Give support to one parent staying home by giving guidance and skills regarding school learning and appropriate parenting.  Provide free lunches to those in need.  No foreclosures, evictions or utility cut-off during the pandemic.  Print the money to support those in need that are caring for children - it certainly isn't the same as giving out gold.  The children will quickly pick-up on education when Covid is over. This too will pass. Help it pass more quickly by being giving, compassionate, logical and health minded.
7/21/2020 15:37:00	Dayna	Peacock		Prairie Village	
7/21/2020 15:37:07	Joel	Arnold		Kingman	1. This is a local decision not a statewide decision. There are counties where there are still 0 cases, and many where it is in the single digits. This is having a huge impact on families, and in these areas, there is simply not the risk to justify something so detrimental to our kids and parents. 2. This just goes against science. The science on how kids are impacted by covid is very different than how it impacts adults. Studies in Denmark, Ireland, Australia, many more have detailed that schools reopening in those countries did not lead to a rise in infections among adults. Kids aren't driving the spread. 3. As a school principal, I don't buy the whole "schools need time to prepare" talking point. We had our plan 90 percent ready before Gov. Kelly's mandates, and then everything completely changed. We realize that our plan is going to go through even more changes as we adapt to the latest information. We are never going to be 100 percent ready. But we won't know what adjustments need to be made until we can put the plan into practice, and that needs kids in the building! So whether it is Aug or Sept, we are just going to have to be flexible.
7/21/2020 15:37:11	Rita	Mudd	Home	Belleville	Yes if it's needed by our school teachers and workers to make the changes that will make a smoother transition.

7/21/2020 15:37:12	Cynthia	Jacobsen	Christ Prep Academy pa	Olathe	I see no logical reason to delay the start of school if appropriate precautions can be taken. Our school and most others in the Johnson County area have been preparing all Summer for any contingency, whether it be online or in person education. There is no justification for mandating a delay for all schools, regardless of their particular circumstances. Not even allowing online classes to happen until after September 8th doesn't make any sense at all from an infection control standpoint. I would appreciate the Kansas board of education to allow school districts and private schools to make decisions appropriate to their circumstances instead of an all encompassing rule that makes the school year disjointed and sub-par again.
7/21/2020 15:37:17	Rex	douglas		Weir	First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas. Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening. I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following: Safe School opening following the Board of Education Return to School Plan No delay to student participation in school, athletics, and activities. In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions. This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense. Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.
7/21/2020 15:37:23	Belle	Gifford		Paola	Please do online classes. We need to protect our kids! It's just not safe to let them back into school! Why was it not safe last March, when school was closed for their safety, and there weren't as many people sick and dying from Covid-19, and why would it be safe now, when there are so many more cases and more people dying ???
7/21/2020 15:37:32	Derald	Carlson		Lawrence	I support delaying the school year. Do not open while infections are rising, wait as long as it takes until they are way down.
7/21/2020 15:37:36	Karen	Graves	Blue River Family Medi	Manhattan	As a family practice physician in Kansas, I implore you to postpone the opening of K-12 schools until after Labor Day. Our schools and teachers are not prepared to open in less than a month. Schools should not operate at full in house capacity. Hybrid options should be considered. ALL students K-12 should be REQUIRED to wear a mask to school, or be sent home. This a public health issue and must be treated as such. Politics does not belong in this discussion.
7/21/2020 15:37:43	Suzanne	Quick		Fort Scott	Our children need to return to face to face, in the classroom, learning as originally scheduled prior to Governor Kelly's mandate to push the starting of schools until after Labor Day. All sports activities including; conditioning, weights, practice and games should also resume as originally scheduled. If there are parents, students or teachers that do not feel safe returning to the regular classroom setting then they can choose to do online schooling/teaching. Let the parents decide if their children should return to the classroom and sports. I know that my child learns best from face to face instruction and I want my child back in the classroom. I also know the importance of sports and the roll they play in education and I want my child practicing and playing sports! The children have already lost so much from this virus. 3 months of classroom instruction and well as their Spring sports, proms and graduations. This virus will effect these children more mentally than it will ever effect them physically. Holding kids back until after Labor Day will not change anything except delay their education even further! If a waiver needs to be developed for children to be involved in practices and sports then I know that I along with many others will sign it. We will not live in fear and our children should not be punished because of this virus. We as parents should have the choice to decide what the next year will look like for our children.
7/21/2020 15:37:44	William	Titterington	Tax Paying grandfather	Clearwater	I believe the kids need to get back into a bricks and mortar school environment. Day cares seem to have been operating without major issues or positive cases for 3-4 months now in a similar environment. Waiting until Labor Day is fine but make some decisions so that teachers can make plans. Quit kicking the can down the street.

7/21/2020 15:37:45	Dedra	Boggs		Wamego	I believe parents and local school districts are the ones who should determine when and how students return to school. It is important students return to school as soon as possible, understanding a student loses nearly 40% of the knowledge they have gained in the summer break and our students have been away from meaningful instruction for nearly two months longer than they would during a normal summer break. For some children with underlying health issues, putting them at greater risk from Covid-19, in-person learning may not be possible. They should be assisted in receiving the instructional direction best fitting for their situation. However, for a majority of students the risk is small and following safety protocols should be adequate for their needs. Again, local school districts and parents are the best ones to determine the right actions for their students. Please, revoke the Executive Order delaying the start of school.
7/21/2020 15:37:48	Jennifer	Clevenger	Christ Prep Academy	Lenexa, KS	Please consider letting private schools be exempt from the start date. Our family believes that CPA will be ready and able to start on time. With the small size and high teacher to student ratio, they should be able to determine when they are prepared. When school was shut down in March, CPA was ready for online Zoom classes with only one day missed to prepare. We feel our 17 year old daughter did not miss anything in her final quarter of the year academically, all due to the preparedness of CPA.
7/21/2020 15:37:53	Kelly	Temple	A self-employed/stay at	Wichita	Do not delay school! These kids need social interaction!!!
7/21/2020 15:37:53	Sheri	Bonnet	USD253	Emporia	Please support Gov. Kelly's Sep. 9 start date. A few more weeks can't hurt.
7/21/2020 15:37:53	Michelle	Daugharthy		Roeland Park	I would like to ask that each school be allowed to make their own decision based on where they live and who they serve.
7/21/2020 15:37:55	Jen	Rosema		Olathe	I want our students to be able to go to school in person, so if that means they need to wait a bit longer to make that possible and safe then I am all for it. However, I do believe students should be allowed to practice and participate in sports prep at this time. This is so important to their emotional and physical health, and the programs and practices are being done in a safe way.
7/21/2020 15:38:13	Danielle	Molloy		Overland Park	I'm so proud of our governor and lawmakers for putting our children, teachers and citizens first!
7/21/2020 15:38:13	Magan	Harrell	USD204	Lenexa	I am a secondary teacher who is eager to go back to work, however I have concerns. I think there should be a delay so that schools/districts can develop a safe plan to return. Our district has nothing set up. I along with others are autoimmune compromised and do not feel comfortable returning to school without any set plans about what happens if a student is sick, PPE for staff, discipline for students who do not comply with mask mandate, helping students while maintaining, are we going back at 100% capacity or will there be a hybrid, what curriculum are we using for online options, how to catch students up who opt out of in school learning. There are too many unanswered questions for us to return on Aug 13th. And if admin wants us to return as a staff via Zoom and not in person, doesn't that say a lot about how safe they feel? They won't do in person staff development, but expect teachers and students to return at full capacity without safety measures does seem like it's in the best interest of students or staff.
7/21/2020 15:38:15	Kimberly	Harber	Eureka USD 389	Greenwood county	I think it is a huge mistake!! They are controlling us for a socialist economy and we have to stop them. I am not saying there is no virus, but it is spread like any other. And every person that has died was immune compromised! Allow time for handwashing No sharing of drinking/eating supplies, and checking temperatures is ok, masks don't help. But follow good hygiene Do not let them railroad you!!
7/21/2020 15:38:19	Karen	Hanneman		Lawrence	I fully support Governor Kelly's decision to postpone the reopening of schools. My child will not return prior to September 8th.
7/21/2020 15:38:28	Heather	Adams Encinias		Kismet	Open schools this new generation is dying from not learning, no social interaction...
7/21/2020 15:38:32	Michelle	Daise		Shawnee	Thank you for delaying the start of school to allow local districts additional time to determine the safest return for students and staff.
7/21/2020 15:38:33	Amy	Kirkpatrick		Parker	I believe that we don't need to delay school starting. Three weeks is not going to change anything and we have had months now to prepare for all of this. Our children need to go back to school in the school and be adequately taught. If there are teachers who don't want to go back then replace them or don't pay them. The rest of the world has had to go back to real life and function. That's life!

7/21/2020 15:38:34	Danya	Banning	Parent in BVSD	Leawood	Our children need to go back to school. If we delay until September, our kids will have been out of school for almost 6 months. What learning there was the last quarter of school was not really learning. My 5th grader was on a zoom call once a week with his teacher for 30 minutes. PPE should have been purchased well in advance of order 20-59 so to delay for that reason is ridiculous. Since there was an option for families to enroll their children in remote learning, I don't understand why we can't start there if the Health Department does not feel the kids should go back in person. If a child needs a computer, can't the schools have pick up times like we did for our kids belongings. Parents need to get back to work and kids needs to get back to school. Mental health of being out of school needs to be looked at too.
7/21/2020 15:38:35	catherine	seals	self--educator	topeka	Please support of the executive order to delay the start of school until September 9th.
7/21/2020 15:38:36	Carissa	Marshall		EMPORIA	no
7/21/2020 15:38:40	Amanda	Miller	USD 383, Marlatt Eleme	Manhattan, KS	PLEASE pass this. Elementary teachers ARE NOT READY to start school in August. We need time to train for online learning, move everything online, prepare our physical rooms to follow safety guidelines as close as possible, recreate plans that rely on small group learning and sharing, and then all the normal beginning of the year things. Older grades may be prepared, but elementary IS NOT. I was relieved when Gov. Kelly announced this, and I am hoping it is upheld either at the state level or by our district. Teachers need more time.
7/21/2020 15:38:48	Lisa	Yoder	McPherson USD 418, H	Hesston	I would encourage the board to confirm the governor's order to delay the start of school. As an educator, I want us to get kids back in school AND I want us to do it safely. I believe it would be so beneficial for educators to have more time to plan for the safety measure we need to put into place so that kids and staff can be safe in the school building. If we rush this, we could make mistakes, and unfortunately, that could result in very serious consequences. If we have more time, we can get it done well. More time will also allow Covid numbers to go down across the state and make schools even safer. I have talked to many parents who want their kids to have the opportunity to be in the school buildings - this extra time allows us to make that a safer environment. As a parent, I want my children to go to school and not wonder or worry about safety - if this extra time is given, educators will have time to adequately plan for and provide that safe environment.  I understand this has become political - this deeply saddens me. Please make the best decision for public health and remember, it's not just kids returning to school, it's adults who love to work in education in the state of Kansas. I have worked in 2 KS school districts and am a parent in a 3rd district - you know what's been the same thing in all those districts? Kansas teachers work hard and go above and beyond to meet the needs of their students, whether it's educational, physical, emotional, etc. Give these loving, caring, well-trained, and intelligent public servants the time to make safe and lasting decisions for this coming school year.
7/21/2020 15:38:53	Judy	Scheuerman	USD #428	Great Bend	Start school as usual ... no delays anymore !!
7/21/2020 15:38:55	Shelby	M		Spring Hill	Vote yes! For the safety of our students, staff and families, PLEASE vote yes to delaying school until at least September 9th.
7/21/2020 15:39:00	Hailey	Danyelle		Buhler	As a student myself I say schools need to reopen because by September I will already be out of school for six months. Six months which is way to long. This is my education and we should get a say. I understand everyone's concerns with masks, as a student I know for a fact it won't work and they will get in the way. I can hardly focus on a test when the heater is on in school little alone sitting in 7 classes with a mask on. Especially because with my heart issues my heart rate goes up and I can't breathe. Masks should be optional for students, saying that I know that most students will want to wear one to be safe. Masks should be required for teachers because studies show that adults spread it more than kids. We can take the precautions with extra cleaning and hand sanitizer and making sick kids stay at home and doing a two week quarantine before starting up school again. If the schools decide to make the classrooms smaller and limit the children to things they will not find joy in school and their mentality will go down drastically. I want to be able to sit with my friends at lunch and talk to them in the classroom. I would also like to add that last year a sickness that everyone thought was influenza spread around my school around flu season. Sickness is going to go around schools no matter what happens that's just how it is. All we can really do is take precautions but we don't need to make school not joy able.

7/21/2020 15:39:01	Sunny	Weiner	Parent	Gardner	Please send our kids back to physical school. Online is not beneficial and is not giving our children quality education. The learning That was done from March through the end of school was sub-par at best, and most kids did not log in. Many children do not have adult supervision so they are falling through the cracks widening the gap between the have and have nots. Our children are becoming hopeless and depressed. They need social interaction and the opportunity to strive for success in the classroom and with extra curricular activities. Depression and despondence are a greater risk for our youth then COVID. Surely 5.5 months has been an adequate enough time for the schools to put sensible plans together and get hand sanitizer. The loss of learning time Will be compounded by a late start date. It's time to get back to living.
7/21/2020 15:39:14	Megan	Owen	USD 233	Olathe	Please don't open schools and sentence, me, my children, my students and their families to death. Covid is rampant in Johnson County right now. We need a state mandate to make the district delay opening. Please keep us safe.
7/21/2020 15:39:17	Shelisa	Welde	Elementary teacher & parent	Overland Park	Teachers want nothing more than to welcome our students back to the safe, creative, nurturing environment school provides when the time is right and that is not right now. We're in the business of keeping kids safe. We practice fire, tornado, and active shooter drills. How do we not choose the safest path with a pandemic? Medical experts, including the US Surgeon General, and data support this delay even if politics do not. While the death rate is low among children so far we must think about the adults that run the school as well as the undetermined long term effects of the virus. Delaying just 3 weeks can put us in a safer position by giving time for the mask mandates to lower the transmission rate while giving us time to increase the physical changes and supplies needed within our schools. Delaying could decrease the likelihood of multiple opening and closing cycles which will be more disruptive in the long run. The calendar shouldn't force us back into a metaphorical burning building. Have you been in a room 7 hours a day with 23 five year olds? Social distancing and germ prevention is the exact opposite instinct of a child. 3 weeks could literally be life changing...make that live saving. Yes, sacrifices will need to be made, but I refuse to believe those sacrifices should be our students, teachers, principals, counselors, paras, lunch workers, janitors, and families. Let's be on the side of history of this awful pandemic who does everything they can to protect our most valuable resource, our schools. Please vote to support the delay.
7/21/2020 15:39:27	Laura	Sixta	De Soto High school	Shawnee	If we do not delay school until Kansas gets this outbreak under control, students will transmit the virus, teachers and staff will get sick, and people will needlessly die. Do not make me jeopardize the health and safety of my family.
7/21/2020 15:39:27	Jessie	Pullins	Blue valley	Leawood	Delay til 2021
7/21/2020 15:39:35	Mary Grace	Lanese	self	Leawood	I fully support Governor Kelly. Personal distancing, wearing of masks, and delaying the beginning of the school year until after Labor Day. I do not want the health and lives of the children of this state jeopardized. The Governor listens to facts presented by the public health authorities before making her decisions. I support her researched based decisions.
7/21/2020 15:39:37	Ashlee	Jack	Patent	Overland Park	I feel that someone needs to put our teachers and students before politics! Let other states open and be test subjects, we don't need it to be our kids.

7/21/2020 15:40:04	Savana	Debo	USD 447	Liberty	I have struggled for some time on what exactly to say to share my concerns for returning to school when Coronavirus cases are increasing rapidly in our state and county. What it all comes down to is that I feel the risk outweighs the benefits of returning to in-person schooling at this time. Yes, I am just as concerned about the students I work with that have social, emotional, and mental health needs being at home for extended periods of time. I am assured that teachers, counselors, and school social workers will undoubtedly continue to provide those students and families with support and resources they need whether we are in-person or working remotely. However, I agree with Governor Kelly and feel that to send students and teachers into schools when this serious virus is running rampant is too risky. You are essentially asking teachers to put themselves and their own families at risk for severe illness, possible lifelong health issues, and potential death to ensure that students don't "get behind in their studies". Not only are you asking teachers to walk into very risky situations, but you are also asking students and their families to carry that risk as well. Valuing the lives of Kansans is of the utmost importance. I have heard arguments from people that have several variations but technically say "essential workers have never stopped working, we should send kids back to school". The difference is that an adult essential worker has so much more control over their environment. They can step back if others are getting too close. They can keep their mask on all day. And they can do the tasks of their job sufficiently without too many added measures. Putting students back in the classroom while this deadly virus is increasing at fast pace will not only put everyone at risk, we can potentially cause more harm to students by being forced to continually urge them to "stay back", "keep your mask on", and "play by yourself in your isolated area". This is not how our children are appropriately socialized or educated. I feel that the stress of teaching and learning in this type of environment could not possibly achieve the amount of growth that we were able to pre-covid and I also think that more can be learned at a distance and online. This is just a temporary sacrifice to ensure that thousands of children, families, and educators are not put into unnecessary risky situations. Insurmountable Coronavirus illness, health complications, and deaths will occur if schools return too soon. I have stayed home and quarantined since mid-March, not attended any social gatherings, shopped for groceries online, and ordered meals curbside pick-up to ensure that my family and high-risk loved ones are safe. That will all feel pointless if I am forced to walk into school amongst those that haven't taken this virus seriously and social distanced at all. Its a terrifying feeling to want to be there for my students but to do it at the risk of my own children and family members. The only way I know how to do both in the current state of our world is to do it remotely. Please postpone physically opening schools until it is safe to do so.
7/21/2020 15:40:14	Candace	Davis	Maranatha Christian	Olathe	I wish school to start as planned. I have 3 girls k, 2nd and 6th and they miss the social interaction and also the additional learning they miss during a classroom setting.
7/21/2020 15:40:15	Anita	McDaniel	Retired Teachers	Pittsburg	This is the best idea ever. It's dangerous for children, teachers, other school personnel , parents and especially grandparents otherwise. Labor Day may NOT be long enough. ,
7/21/2020 15:40:18	Meghan	Shave		Park City, KS	Please uphold the Governor's order to delay the start of schools. Maybe we will then be able to send our children to schools safely. If schools start in August, I do not believe it will be a safe environment for our children. I understand that some feel this should be left up to local districts. Unfortunately, we cannot be sure that different districts or counties will make the best decisions for the safety of our children. As a parent, I allow my children to make decisions for themselves. There are times that I have to step in and make the decision for them. In the middle of a pandemic, it is completely acceptable for the state to step in and help us with these decisions. Thank you!
7/21/2020 15:40:22	Cindy	Johnson		Wichita	I am for waiting till after Labor Day to start.
7/21/2020 15:40:24	Jesse	Carr	-	Lawrence, KS	Please uphold Gov Kelley's decision to delay the start of school! I have a kid in elementary and a kid in middle.
7/21/2020 15:40:32	Tai	Edwards	Parent	Lawrence	I understand the reason for delaying start until after Labor Day. However, I think school districts should have the choice to start ONLINE LEARNING prior to that date. Our children need some kind of curriculum. We need some kind fo academic fulfillment. Also, if the entire school year is online, without any option to send children to school buildings where at least someone can help them with their online assignments, my spouse and I will not be able to work and my children will be in mental health collapse. One of my children was already in mental health collapse in May. I want people to be safe. But "going to school like normal" vs. "exclusively online" are not the only choices. Every government owned property (whether by city, county, or state) that is not at full capacity right now should be transitioned to temporary school space. Limit it to 10 people if need be. We should be asking our local churches and utilizing other vacant properties for this work. I'd like to see an executive order related to these issues as well.

7/21/2020 15:40:43	Mary	Plott	Teacher	Salina	I love my students and cannot wait to see them, however I feel waiting until the numbers are down is the safest choice. Thank you for all you do for kids and teachers.
7/21/2020 15:40:44	Kayla	Smith		Winfield	I support the governor's executive order for schools to open after Labor Day with safety measures in place. I am an elementary teacher and I am worried for myself, my family, and my students' health should school resume as normal. Please allow our districts the extra time to plan for appropriate safety measures.
7/21/2020 15:41:00	Gay	Henrikson-Ladwig		Wichita	I support delaying the start of school until after Labor Day (or later, if necessary) in order to reduce the infection rate of COVID-19 and bend the curve back to a statistically safer number, as well as reducing the census of COVID-19 cases in our hospitals.
7/21/2020 15:41:06	Jaime	Kavanaugh	Maranatha Christian Ac	Lenexa	I would prefer schools to open as previously scheduled for August 12th, with safety precautions in place (masks, sanitizer, etc).
7/21/2020 15:41:16	Kimberly	Copenhaver	USD 443 and USD 225	Fowler	In the best interests of all Kansas stakeholders, I urge you to move in favor of delaying the start of school until September 9th. This will give districts time to plan, provide training, and gather supplies in order to meet the recommendations of KSDE and Governor Kelly's EO on safety protocols. I realize that this is usually a local decision, however many districts are scheduled to start school in a mere 3 weeks. This is not a realistic timeline for schools to be ready. Thank you for your time.
7/21/2020 15:41:31	Andy	Lee	Myself and my school as	Prairie village	I believe we need to make sure to do best for everyone involved, not simply the children. While it turns out that children are less affected by Covid, that does not mean that they will not cross contaminate one another, contaminate or sick and the teachers and staff at the schools, nor does it mean that they will not bring home Covid to family members. I believe we need to look at a hybrid or combination of in school and online studies, and provide reasonable accommodations for learning. Nothing will be perfect, and someone will always be left out but we need to do what is best for the greater good.
7/21/2020 15:41:36	Linda	Franklin		Goodland	Please, our children need to be in school! Surely teachers should be considered essential. Many of the rest of us have continued in our jobs for the betterment of the community and so should they. If they don't want their jobs, let someone else have them. Our children are missing out in too much already. Thanks for your service.
7/21/2020 15:41:46	Mitzi	Hoeme	USD 466	Scott City	I think school districts need to make their own mandates based on their community needs. We live in a small town in western Ks where covid is not a problem. I feel the mandates will do more harm mentally and will be detrimental to our kids education. Our kids have gone all summer with no masks, playing sports, having open gyms and weights our community is not in peril from covid. To all of a sudden put these mandates in place is a huge step back and really unnecessary for our community and many, many others. Thank you for listening to the people who live, work and have students that will be affected.
7/21/2020 15:41:48	Charles	Nagel	USD 459	Bucklin, KS	I am not in favor of delayed start, I feel it is unnecessary. Our small community has functioned just fine despite this "pandemic" and see no logical reason for any delay.
7/21/2020 15:41:57	Shaunda	Chang	Family with kids	Wichita	Please give recommendations but let each school district decide based on the needs and risks in their area. Please recommend outside play time even if all classes need to take turns. Please provide options such as face shields for face covering for other students such as my son that are asthmatic and so far haven't found any mask that makes him short of breath.
7/21/2020 15:41:58	Stephanie	Allen		Hoyt	Please keep schools closed until after Labor Day.
7/21/2020 15:42:03	Ryan	Jacobsen MD		Olathe	I encourage you to follow the guidance of the medical experts and pediatricians who wrote a position from the American Academy of Pediatrics stating that the risk to children not going to school is much worse than going to school with the unknown risk of Covid. I strongly encourage you to open schools fully with mitigation measures in place.
7/21/2020 15:42:12	Ann	Edwards	USD259	Wichita	The decision of whether to delay the opening of school buildings should not be made politically. It appears everyone is afraid of taking a stand that might be unliked by some. Please stand up and protect families and all school staff from the possibility of being exposed by this virus!! So many have been trying to stay home and be safe - now we would even think of opening schools when our state is in the worst shape it has been in since this all began?!? My husband and I were both hospitalized with Covid and are now facing many medical bills. He was on a ventilator for 9 days I don't want to get this virus again and possibly pass it on to him again. We have 50+ adult staff and over 400 students in my building! Please all of us and approve the governors order!!!

					<p>July 21, 2020</p> <p>Kansas State Board of Education Members -</p> <p>I urge you to uphold your approval of the Navigating Change Document that you approved as a guide on July 15 which gave local control to school districts in Kansas based on their incidence level of the virus at hand. By approving a comprehensive guide which intentionally included both implementation and operations components, you gave respect to districts which face difficulty in maintaining physical distancing in their operational facilities given their district size and the county and patrons they serve, while at the same time respecting districts that have more feasibility in maintaining physical distancing given their lower student populations and the stakeholders in their district as well. The intentionality that you placed by approving the comprehensive Navigating Change document as a guide with respect to low, moderate, or high incidence of the virus at hand, spoke volumes of you as a state board in both respect to the educators, parents, and other stakeholders involved on the document state wide, and your respect of the local board of educations which operate under you, allowing each district in respect of their own incidence levels throughout the school year to determine measures such as masking.</p> <p>As a parent, a teacher, and a product of Kansas education my entire life, I urge you all to uphold your approval from 7 days ago, which respects your decision and tells the state that you not only value the work that was recommended in respect to local districts, but also demonstrates the confidence that you have in the decision that you made.</p> <p>Thank you for your time and service,</p> <p>Melissa Harlan</p>
7/21/2020 15:42:17	Melissa	Harlan	Parent and Teacher US	Madison	
7/21/2020 15:42:26	Brandy	Butcher		Overland park	Well personally I think school should always start after Labor Day but as far as this executive order I think the governor should let this be up to individual school boards. I definitely don't think this should apply to virtual schools or private schools
7/21/2020 15:42:28	Sherrie	Ratterre		Frontenac KS	I'm ok with waiting for school to start... I'm concerned with distancing, masks, hygiene, parents who send their kids to school who have fevers or are sick, home school, hybrid class time, getting a vaccine for covid.... the list goes on.
7/21/2020 15:42:35	Betsy	Morken	Maranatha Christian Ac	Shawnee	I appreciate all that Governor Kelly and her staff are going to keep Kansans safe. I don't pretend to know the best course of action to take. I have family and dear friends in the medical field, including a daughter in Texas who is working as a nurse with the Covid 19 crisis there. All are very concerned about this pandemic and both the short and long term effects of this insidious virus. This struggle is very real to all of us on so many levels. As someone teaching in a small, private school, it is important to remember that 'one size' does not fit all. While certain restrictions may be necessary, best practice, for large school systems, the same is not true for a small private school where certain distancing, safety and protective measures can be maintained. We can distance, ensure mask wearing, monitor health, etc. better than a large school setting. We believe that in person class is better for our small community. Our school admin and board have taken extensive measures to evaluate the pulse of our teachers, staff and families and while our views are as varied as the people of our great state, we feel confident that we can create a hybrid model that will meet the varied needs and concerns of our community without moving to solely remote learning or starting late. Thank you for your time and consideration!
7/21/2020 15:43:04	Cynthia	York	Blue Valley	Overland Park	Please delay start
7/21/2020 15:43:09	Cara	Andreasen		In town	I am ready for school to start, have a plan, let us start moving forward. Treat this like influenza if anyone exhibits symptoms stay home. Enforce sanitizing and frequent hand washing and lets start September 8th. If people are filled with fear let's get a plan and start homeschooling and start in January. Either way let's decide and move forward

7/21/2020 15:43:16	Matthew	Steele	my family	Meriden	If the executive order makes any reference to private schools you should not vote in favor of the order. You are public officials for public schools, those families that have chosen to utilize private school have done so to be separate from public schools.
7/21/2020 15:43:16	Emily	Jueneman	St. John's Catholic Scho	Hanover	I feel myself and the country as a whole are living in fear and letting it take over! I believe COVID is real and it is scary, but we are letting our fear paralyze us. Keeping schools shut down might be keeping us safe physically, but it's coming at a cost. It's hurting us mentally, emotionally, and spiritually. If you're sick, yes, isolate and the vulnerable should take extra precautions, but why are we punishing the healthy? Isn't there more to life than just not getting sick and not dying?
7/21/2020 15:43:19	Stephanie	Frohlich		Scott City	Our kids deserve and need to be in school. Delaying start may shorten their year even more if there is an early release due to a covid increase. Counties could make the best decisions for their schools in accordance with what is happening in their individual counties. There is a lot of variance in what is happening in different parts of the state. I strongly feel like my kids need to be back in the classroom with their teachers.
7/21/2020 15:43:24	Kellie	Magnuson	Parent, Substitute teache	Lawrence	<p>Hi - I'm writing to ask you to pass the Governor's Executive Order delaying the start of school until post Labor Day. I write you first and foremost as a mother of a 10-year old. He would desperately love to return to school, however if school starts as planned on August 17th, he will not be returning to the building. I am terrified of the possibility of him getting Covid or passing it on to someone, like my mother who was widowed 3 years ago when my father died of cancer. I hope that the three weeks will give enough time for the mask order and closing of the bars to have an effect on our community. It will also help us gain a glimpse of how students returning to the University of Kansas impacts Lawrence with regards to Covid.</p> <p>I am also a substitute teacher and studying to be an elementary school teacher. With the numbers as they are, I will not be subbing and I wonder how many subs will actual be willing to enter the classroom and risk their health for the \$100/day. I believe there will be a shortage of substitutes.</p> <p>Moreover I write you as a future elementary school teacher. I am terrified for my colleagues who are scheduled to return to work in brick and mortar buildings very shortly and for myself to do my student teaching. I want desperately to be able to be with the kiddos who bring me so much joy, as do my colleagues, but if we return soon we will risk teachers', staff and students' health and lives. We do not know the long lasting effects of Covid and I don't think we want to learn them this way.</p> <p>As the situation with Covid is day-by-day, three weeks can provide necessary time for teachers and districts to use your guidelines to figure out if and how they can return safely to school. Please put our children and communities' health above politics and support the Governor's Executive Order.</p> <p>Thank you for your service to our state.</p>
7/21/2020 15:43:34	Desiree	Granstra		Junction city	These kids need to be in school sooner rather than later. You are hurting them far worse wit this than anything covid could do. 246 People recently volunteered to test for free and only ONE was positive. Heath county is quite low on cases. And enough with the masks. They need to be focused on school. either no masks or choose to stay home and do elearning for those scared. Let US make those choices! Not the government or the school district.
7/21/2020 15:43:48	Mark	Kramer	Grandparents	2028 Quail Creek Dr., L	Please follow Gov. Kelly order
7/21/2020 15:43:59	Sarah	Donahue		Leawood	I urge the board to accept Governor Kelly's executive order to delay the start of school until after Labor Day. All decisions to reopen schools must be grounded in data and safety. Transmission levels are currently at an all time high and this delay will allow time for them to decrease. Furthermore, this delay will allow districts more time to prepare and stay open. Students and teachers in Kansas should not be be used as political pawns. Thank you for your time.

7/21/2020 15:44:08	Angie	Williams	USD 483	Plains, Kansas	We need to delay school so that we can prepare for our students. Some say that we had all summer to prepare, but during that time we did not foresee COVID cases increasing, which they are doing each day with reopening. Delaying school two weeks will not hurt the child's education.
7/21/2020 15:44:11	Jennifer	Bowles	Teach and children of th	Wichita	It will not hurt anyone to wait til after Labor Day. The risk is there ppl will suffer if we open the schools too soon. Thank you.
7/21/2020 15:44:17	Tassy	Rouse		Larned	I want to wait to send my child back to school as long as I can. This virus is scary stuff.
7/21/2020 15:44:19	Leah	Giger		Elmdale	Please let the districts control the school calendar. Studies have shown that kids are not in danger from Covid 19 and do not transmit it. Governor Kelly has over reached. We ask you to preserve our freedoms. She has not respected individuals to know what is best for their own families. We have not been treated as adults in this pandemic. Government is not our mother.
7/21/2020 15:44:20	Shawna	Glick		Plainville	There is no reason schools be delayed. This Covid crud is no longer considered a pandemic. I believe through a lot of research you are going to cause more problems then necessary. Children need to get back to as normal a life as possible, without restrictions. Governor your actions are proving to be selfish. Acting on your own agenda is wrong. You are causing massive problems and creating unnessecary division within this state. You are a problem!
7/21/2020 15:44:36	Heather	Schrotberger		Overland Park	Please delay the start of the 2020-2021 school year to allow all children across Kansas to return to school with a greater degree of stability and safety. The extended time will provide greater opportunity for planning, and troubleshooting, plans across districts. Thank you.
7/21/2020 15:44:53	Sara	Ebberts		Overland Park	I do not feel that opening public schools for students right now is a safe or prudent decision. Cases of COVID-19 are on the rise and, while there is some debate among public health officials and epidemiologists regarding just how much children increase the R0 of this virus, there is no question whatsoever that putting kids back into a school setting will lead to an increase in diagnoses and death. If the Department of Education puts all of its efforts into making the best online education program it possibly can, there is no reason we can't make a success of this situation. I understand that there are kids who are vulnerable to other deleterious factors such as abuse and food insecurity. However, I believe that we can find a balance that will work to mitigate the spread of COVID-19 & reach out to provide services for children & families who are vulnerable in other ways.
7/21/2020 15:44:54	Scott	Maley		Stilwell, KS	I recommend the school year be suspended as it poses a significant risk to public health to have in-person classroom activities. Children, teachers, and other school employees will almost certainly get sick from coronavirus, and there will be people who die from exposure in the school setting. It is simply too high of a risk. I am a physician and recommend that the school year be suspended until the health burdens of the coronavirus are under improved control.
7/21/2020 15:45:05	Alice	Miller		De Soto	I am writing to ask you to support Governor Kelly's order to delay the beginning of the 2020-2021 academic year.  I miss students and fellow staff members and would love to be with them in classrooms again. Everyone, including me, wishes we could go back to the "normal" time before COVID-19. As much as I wish we were not in a hotspot of this global pandemic, we are. Regrettably, as reality stands in this moment, the infection rates here are rising. Gathering in schools right now would further increase the spread of the virus and put community members in even more danger.  As an immunocompromised person, I cannot help but think of going to back to school on-site and feel fear for my health and safety. I know I am not the only member of the educational staff, not to mention the student population and their families, at high risk for serious complications if I am unfortunate enough to contract the virus.  Please support the governor's order. Please give infection rates time to fall. And please give our schools time to better prepare for the challenges that are sure to come.  Thank you for your time and consideration.
7/21/2020 15:45:06	Jada	Tubbs		Colby	Please do not delay anymore. Please do not require masks.

7/21/2020 15:45:06	Rebekah	Adams		TOPEKA	Please allow schools that want to open the freedom to do so. Our children need to be able to attend school with their peers. If there are districts that feel strongly that they cannot resume classes, then they can make that decision, but it should not keep the schools in other districts or private schools from reopening.
7/21/2020 15:45:06	Amanda	Beatty		Vassar	Delaying school makes sense with the increase in cases. Schools shut down in March and today new cases are higher than they were in March. Children should not be sent back until it is safe whether that be after Labor Day or a later date. I have 2 children one in 1st grade and another in 4th it is not worth risking their lives or the lives of teachers and staff. We can do distance learning until we are in a better place with this virus. Anytime their have been large gatherings of people there have been outbreaks I suspect it will not be any different with school. It is not worth our children and teachers being test subjects for an experiment that we likely already know the result.
7/21/2020 15:45:12	Stephanie	Galusha	None	Great Bend	The kids miss school, but honestly what does a few extra weeks of summer hurt. My only questions are will they still be required to attend the same amount of hours (For the school year) as in years past and does this shorten next summer break by lengthening the 2020-2021 year?
7/21/2020 15:45:24	Meredith	Templeton	Emporia High School	Emporia ks	Let. Them. Play!!!!
7/21/2020 15:45:29	Brandi	Noonan	School dance team	Burlingame	Do not delay school.....
7/21/2020 15:45:30	Nathan	Aldridge		Wamego	Do what's best for the students and teachers. Extending beyond Labor Day gives teachers and other faculty the time they need to digest and find ways to implement the new learning plan.
7/21/2020 15:45:41	Grace	Rucker	Public school teacher At	Derby	Please delay opening schools. I don't want any children to get sick. I don't want them to be carriers and get other people sick. Please flatten the curve before reopening schools again. I know there are equality issues but I believe the safest thing for public health is to make part of this school year all online, at least starting the first quarter or semester.
7/21/2020 15:45:43	Leslie	Wohler	No organizations-School	Manhattan	Please vote in favor of Governor Kelly's order to delay school reopening.
7/21/2020 15:45:45	Mark	Scarborough	None - Retired citizen	Lenexa	Delaying the start of school until cases are significantly reduced is the only prudent action to protect students, teachers and staff. Time to support the governor.
7/21/2020 15:45:49	Kristin	Durkee		Manhattan	Agree with the delay to see how openings play out in other states
7/21/2020 15:45:57	Angela	Thompson	Walnut Grove	Overland Park	Agree to delay school until after labor day
7/21/2020 15:46:10	Melissa	Johnson	Public school teacher	Lawrence	I am terrified about going back to school right now. Cases are spiking and the behavior of our public gives me no reason to suspect we'll see a decline any time soon. Some concerns I have: We are not a child care facility. Yes, we provide oversight of children during the day, but we do that while providing education. Education is the primary reason for our employment. All the data I've seen suggests teenagers contract and spread the disease just like adults. There is absolutely no safe way to have our students at school and avoid transmission of the virus. Even if we see only 50% of our students on any given day, as teachers, we are still exposed to 100% of our students, and our risk is absurdly high. People working in health care at least get PPE and a limited number of bodies in a given area. We know that trauma and mental health issues make learning difficult. The constant anxiety that is a result of the worry and uncertainty from living during this pandemic will absolutely continue to pile up for students and staff, making learning difficult on top of the logistical issues. Additionally, when students or staff die (not if, when), that will add more to the already-too-big pile of trauma. Typically, when a staff member or students dies, the district's mental health support teams seem to drop everything to focus on that. There's no way we'll be able to adequately address student and staff deaths when our buildings become hot spots. Less well studied, from what I've seen, but what studies there have been concerning educational progress of students who lost long stretches of educational opportunities suggest that they recover and catch up. I'd rather we all lose a year of education (or do it online, acknowledging that it will likely be less effective, especially in regard to equity of access) than lose people or lose quality of life due to life-long chronic health and wellness issues that stem from COVID after effects.
7/21/2020 15:46:14	Brandon	Daley	USD 497 - Lawrence	Lawrence	Please delay school for adequate preparation, communication and surveying of families and staff, and to monitor numbers and health data.
7/21/2020 15:46:14	Jessica	Esh	Christ Prep Academy	Shawnee	I support my children's school opening on its original start date in August. Further, the decision as to when private schools will open should be made by the individual schools and not mandated by the state.

7/21/2020 15:46:16	Craig	Staab		Spring Hill	Please vote No on this EO. I see more harm in delaying school for children; particularly when you hear stories of school being one of the only safe places for some of these kids, or the only decent meal they're going to get for the day. I'm not denying there is a concern with this virus, but the development of our future generation outweighs it. There seem to be options for children that want to remote school, and that's good. But for the majority of kids, I think we need to get them back together sooner vs later.
7/21/2020 15:46:16	Shannon	Lee		Pittsburg	I've seen firsthand how this lockdown from school has impacted my child's mental health. Zoom classes were not very effective. The flu kills a lot more kids each year so if we are going to lock schools down for Covid, why not for the flu? We are supposedly protecting others by keeping kids home but we personally have a family member with a compromised immune system and we didn't expect the world to shut down to keep him from getting sick. We took our own measures. I think this is a political move. The governor does not care about my family or my son would not be sitting at home wondering when he can go places again and see his friends. He has changed from a kid who was learning to be more independent to being scared now whenever I leave the room. He's lost his confidence in himself. School was so good for him and this lockdown has gone on long enough. Please consider what this is doing to the mental health of the kids in Kansas. They really need someone to fight for them. If someone doesn't agree, I think having the option to learn online or in person should be offered. Thank you for your time.
7/21/2020 15:46:21	Julie	Yates	Kansas private school	Olathe	Please let the private schools make their own decisions on when to open school. Most private schools are smaller and are prepared to follow the social distance guidelines. Our kids need to be back in their physical school buildings. The private schools should not be in the same category as the large public school districts.
7/21/2020 15:46:22	Nathaniel	Bouton		Silver lake	Don't delay
7/21/2020 15:46:29	Catherine	vonSeggern		Wamego	I believe that each local school district should be able to determine what is best for their community/schools. The Governor and State BOE has not influenced when school has started or stopped before now, simply they have required a certain amount of days/hours for students and staff to meet in a school year. Many, many people in these communities want to get back into the classroom and others don't feel safe. PLEASE, let each school district determine their community's needs. Please, show our students that we live in a strong state that places value in their education, their futures and their lives. Show students that we consider them essential.
7/21/2020 15:46:39	Kendra	Neill	Paren of children in Priv	1959 N Sedgwick St	We have 5 children middle school and high school and want to see our schools back in session, as carefully as possible. Please do not delay school any further!
7/21/2020 15:46:41	Diane	Morgan	Teacher	Shawnee County	There are many people in my community who do not believe that wearing masks is necessary. There are many people in my community who are not being careful with their personal behaviors regarding taking care not to get exposed to the virus. If you do not approve a delay in school until the numbers go down, you are exposing me and my family at risk. Teaching school is different than shopping at the grocery store. I will have extended exposure to people who may be making poor choices for themselves, not a passing 10 minute exposure at the check out line. It is not the same.
7/21/2020 15:46:49	Joe	Quinn	Self	Lenexa	Please do NOT institute a delayed start to the school year. We want to open school as planned in August and to be able to provide excellent, in classroom education utilizing reasonable COVID precautions.  Do not cave to the scare-mongering, bogus science of the mob, but what we're actually seeing.  Even with the (questionable) spike in positive cases there is no correlation with deaths and hospitalizations.

7/21/2020 15:47:06	Cindi	Barta		Shawnee	<p>Please vote for an after Labor Day opening of schools. Give teacher the gift and grace of time to plan for the upcoming year. Give us the gift of time to see a decrease in the number of new active cases. The last thing I want to do this year is explain to students that one of their classmates has died or is critically ill because we opened schools too soon without time to prepare. I fear if we start school too soon we will be in lock down before we can turn around and students will suffer.</p> <p>Districts can change the length of day by just a few minutes to meet the required hours and not disrupt the already adopted calendar. Such a simple fix in these trying times.</p> <p>Please listen to the health professionals and do what is best for students and staff. We want to be back with our students in a safe environment where they can learn with as few interruptions as possible.</p> <p>I thank you for your time and service for building a strong education system for our students. Please do what is right for our school communities.</p>
7/21/2020 15:47:16	Tara	Rodgers	Wichita Public Schools	Wichita	<p>I support delaying the start of public schools under after Labor Day. My hope is that by delaying the start, we can give our local community a chance to lower the number of cases so that when they do open, masks and hybrid learning will not be required. Hybrid learning will not allow students a full education and will cause more work for all educators (with out any additional pay or resources). I also believe that students and staff should not be required to wear masks. There are plenty of other options like virtual schools and other jobs for those who are not comfortable with being in a school at this time. Majority of students and teachers want to be back without harsh guidelines.</p>
7/21/2020 15:47:26	Patty	Ortwaga		Emporia	<p>Let local communities decide. I do think a short delay is not a bad idea but believe in returning to in person school this fall.</p>
7/21/2020 15:47:32	David	Lang		Bucyrus	<p>It is inappropriate to delay the return to school for two reasons: 1. You cannot stop the virus. 2. It poses very little if any risk for morbidity or mortality for school age children. If you had wanted to stop this virus you would have closed the borders and made everyone wear masks from the beginning and isolated the sick and vulnerable. You didn't so now you can't stop it. Stop living in fear and live your life. The only thing your doing is delaying the inevitable while ruining the economy and people's lives</p>
7/21/2020 15:47:37	Terrence	Edelman	Concerned citizen	OVERLAND PARK	<p>For the health and safety of pupils and administration personnel school should not be open so quickly. I think we should take her Phased in approach and do what the other districts are doing</p>
7/21/2020 15:47:40	Jaelyn	Jenkins		Pittsburg	<p>Please keep the schools closed! Of all of the places that would be hard to keep clean and sanitized, schools are the top of the list. I know our kids might be "behind" right now. But I can only imagine how much further behind they will be, if they have to spend weeks recovering from COVID-19. I would rather my child struggle with fractions, than struggle to breath. Nothing about this situation is ideal. It's a time when you really have to list out what your priorities are. For this family, safety is number one. I hope it will be number one for you as well.</p>
7/21/2020 15:47:44	Garrison	Stamatis	CPA Football	Overland Park	<p>I just want whatever is best for all the students.</p>
7/21/2020 15:47:55	Jackie	Kerschen		Shawnee	<p>Please vote No and do not pass the governors executive orders regarding schools starting late and No against not allowing virtual learning (or teacher/student communication) prior to that date.</p>
7/21/2020 15:48:01	Robin	Henman		Ellis	<p>This is not a one size fits all answer. What the large Kansas cities are experiencing isn't what we see in western Kansas communities. All school districts should be given the right and power to do as their community sees fit without giving anyone a guilt trip! There is so much information out there involving the pandemic and how and who it is transmitted to that it is hard to believe the accuracy of any of it. Kids in our area have not been social distancing since day 1 in March nor have they been using PPE and yet we have very few cases. Why then do we think putting off formal schooling will stop or prevent the spread of Covid? I am a retired teacher who now babysits grandkids. The assignments my grandkid did on line in the spring was a joke. He was finished in under 5 minutes and there wasn't any challenge. Online learning was a failure in my opinion for good students as well as students that fall below the average level. I say start School with extra cleaning but don't expect kids to social distance nor wear masks. Teachers should be given the option but I wouldn't recommend it because masks give a person muffled voices and it is really hard to understand.</p> <p>Thanks for your time and thanks for asking for public opinion on this subject.</p>

7/21/2020 15:48:06	Tricia	Schmitz	Mom	Manhattan	The school year needs to start. Not every parent can afford to stay home. Children need social interaction with their peers. They are not going to understand why they can't hug their friend or why they have to do online schooling. Not every child can learn on an iPad. Teachers are there to TEACH. There are some students who's only safe place to be was at school.
7/21/2020 15:48:06	Ryan	O'Toole		Pittsburg, Kansas	Please do not open schools until cases of Covid begin to decline. It is dangerous to do so in a pandemic that has gone out of control. Please accept Governor Kelly's mandate. She has been very reasonable and has exemplified the spirit of compromise. Do not open schools until it is safe.
7/21/2020 15:48:16	Sarah	Beals		Clay center/ miltonvale	I think it is a good idea to delay school and I believe you guys will be doing everything you can to keep our kids safe. I am a little worried however because it will be hard to keep the younger ones apart from each other and keep the spread of germs to a minimal
7/21/2020 15:48:20	Jill	Smith		Overland Park	My sons are registered at new elementary and middle schools for the fall and the thought of them meeting new teachers and classmates for the first time hidden behind face masks and being discouraged to socialize makes me incredibly sad. No amount of practice wearing masks is helping my already anxious new middle schooler. If we attend school in person there is no question that masks should be required. I just wonder if all the mandates and guidelines will be more distracting and kids will get a better education mask free and healthy at home.
7/21/2020 15:48:22	Jim	Lind	Christ Preparatory Acad	Lenexa	Please read the article in this link as it will confirm that it is ok to open the schools on time safely. <a href="https://www.cnbc.com/amp/2020/07/14/schools-coronavirus-infection-rate-low-german-study-finds.html">https://www.cnbc.com/amp/2020/07/14/schools-coronavirus-infection-rate-low-german-study-finds.html</a> The science says we can open safely.  Thank you.
7/21/2020 15:48:26	Erin	Appuhn		Topeka	Please support the delayed school start. Covid numbers do not support return to school now. Also, teachers need more than a few non-student contract days to enact new health/safety and instructional recommendations.
7/21/2020 15:48:27	Angela	Sherman		Gardner	Please follow governor Kelly's order. This will allow teachers and administration time to plan and get things in order, either at the school building or prepare better for online learning. Either way, the extra few weeks would give all involved more prep time, instead of throwing something together real fast and hoping for the best! Please allow her order to stand.
7/21/2020 15:48:29	Lisa	Lynch		Olathe	I completely support delaying the start of school. If it is delayed or not delayed, all students should be given the choice to attend in person OR virtually and all schools - including private schools - should be prepared to provide students a quality education in both scenarios.
7/21/2020 15:48:59	Deb	Helmer	Retired teachers	Winfield	Please give everyone a chance to be on the safe side of this Covid! Children will be ok going later and certainly the adults will be safer!
7/21/2020 15:49:00	Shana	Lander	Self	Manhattan	Please vote in favor of the Governor's mandate to delay the start of school until after Labor Day. This will allow schools to have more safety precautions in place. Thank you from a K-6 music teacher.
7/21/2020 15:49:01	Jenna	Brunner		Colby	Please start school on time. I feel it should be up to the district/county to decide. There is no one size fits all for the state of KS. Also, masks should be left up to the individual.
7/21/2020 15:49:04	Stephanie	Carson		Wichita	In the spring we closed down schools around Spring Break early in this pandemic because it is widely known and accepted that children in schools are vectors for virus spreads. This is why each year many district mandate a flu protocol level cleaning starting in October. The current state of the pandemic in our state is worse than it was in the Spring when we forced shut down. In order to combat this we need our entire state on the same page. While local districts could make this decision on their own I fear they would not even if in the best interest of public health of their communities, students, and staff. Schools need leadership, guidance, and unwavering support to do what is right. Postponing will allow all districts to better prepare for the opening of schools, whether virtual or face-to-face. In addition, many teachers have been hesitant to begin planning for beginning of school as they still wait to hear what the beginning of school will look like. This additional time will allow educators to more thoroughly prepare a quality environment and education for all students during this difficult time. I know that people will be upset either decision you go with on voting for this mandate, however, I think Kansas can and will do better UNITED. Thank you for your time reading this.
7/21/2020 15:49:10	Sarah	Yaeger		Wichita	School needs to open! No masks inside class rooms. The can wear them in hallways but that is it!
7/21/2020 15:49:12	Richelle	McCarty	Private school	Shawnee	Open the schools or give me my tax dollars back so I can look out for the best interest of my children.

7/21/2020 15:49:26	Kimela	Woods	My family	Winfield	Please follow the Governor's executive order regarding Kansas schools beginning after Labor Day. I do not feel the schools are ready to open to students and faculty without procedures enacted for everyone's personal health. My daughter is a teacher and I am worried for her and her family if protective measures are not in place. The schools need more time to get these procedures implemented.
7/21/2020 15:49:27	Abbie	Davenport		Louisburg	Please delay the starting of school until after Labor Day.
7/21/2020 15:49:40	Brett	Murray	self	Lenexa	Just going to make this short. The State School Board should accept Governor Kelly's order to delay the start of the school year. As a school psychologist for 15 years, I have listened and followed plans about reopening the schools and at this point there are no clear plans. Accept her order and at least allow a little more time for some clearer ideas to be developed. Thank you for your time and service to all of us Kansans.
7/21/2020 15:49:45	PJ	Lassiter	Myself	Pittsburg	I am in support of governor's executive order. We have already seen the results of camps and summer school: mire virus outbreaks. We need to have a solid plan and reduced risks before reopening physical school - for teachers and staff their families (which I am among) as well students and their families.
7/21/2020 15:50:01	Angie	Bielefeld		Clearwater	This is ridiculous we even have to get on here and give an opinion. It's three weeks. What is the big deal? School never used to start until after Labor Day. You don't need our opinions. You need to lead. Do what is best for students and teachers. Not what the group that yells the loudest wants.
7/21/2020 15:50:16	Tawne	Martin	Myself	Wilmore	No mask for k-12
7/21/2020 15:50:16	Lacey	Gould		Benton	I think schools should start in August, because who knows what covid numbers will even look like in September? As a working parent my child is either going to face possible exposure in a child care setting or possible exposure in the school setting. Postponing the start date simply prolongs the inevitable.
7/21/2020 15:50:19	Chris	Lang	Self	Minneola Ksl believe	I believe this part of Ks is ready to start school
7/21/2020 15:50:22	Niki	Cash	Educator	Paola	Please keep school buildings closed and delay in class school.
7/21/2020 15:50:31	Jamie	Cole	WPS	Wichita	I believe that the delay will allow time for our District and buildings to fully prepare for students. We're not physically ready! Supplies and protcals need to be purchased and delivered! Training needs occur.
7/21/2020 15:50:33	Rebecca	Williams	My children in USD234	Fort Scott	I do not think a delay will do what we think. We are unfortunately delaying the inevitable. We quarantine for 2 months, opened and more cases due to more testing, numbers and many document pricing numbers of positive cases may be compromised. Let's give our children a chance!
7/21/2020 15:50:35	Heather	Simons	SMSD parent	Prairie Village	I am in full support of the executive order. I do not feel we k ow enough about this novel coronavirus and its potential impact on kids to risk reopening schools right now when the rate of infection is so high. We should not be treating our children, teachers and staff like Guinea pigs in an experiment. There is the option of reopening early online and using the time to do review work since the kids have been out for such a long time.
7/21/2020 15:50:49	Misti	Griffin	Goessel High School	GOESSEL	This is terrible. I have a 16 and 15 year daughter's who are now on social media more than ever. Depression is looming in them. They need a routine. They need education. They need athletics. They need to be social. They need interaction. Never have I seen such a poor decision.
7/21/2020 15:50:52	Jarrold	Black		Pratt	School needs to be delayed. It is not safe for our staff or students. Pratt's numbers continue to increase.
7/21/2020 15:50:58	Chris	Appuhn		Topeka	Please support the delayed school start. Covid numbers do not support return to school now. Also, teachers need more than a few non-student contract days to enact new health/safety and instructional recommendations.

					<p>To whom it may concern:</p> <p>I appreciate the executive orders put in place to protect students, teachers, parents and communities. While I agree with the delay in school start times, I can't understand why, in these unprecedented times, our school activities and athletics are being limited by school start dates. These activities are an essential part of education and provide growth opportunities that are just as necessary as content centered instruction.</p> <p>A team or group of 50 controlled and homogenous student athletes working outdoors does not equate to the same risk as having 1800 students indoors moving freely throughout the school building. The risk is simply not the same. If we can limit team sizes the risk will be reduced greatly.</p> <p>Furthermore, many of our students have already been participating in outdoor athletics and activities throughout the summer. Is postponing the start of these activities going to curb the current spread of the disease? Unfortunately, I don't believe delaying activities will have any net effect on slowing the virus in our current climate of public dissent. Canceling or postponing activities will have a large effect on the psychological component of many of our students. I cannot imagine having my senior year of football canceled, that would have changed the trajectory of my life and career completely.</p> <p>As Governor Kelly has done it is important to provide leadership and make decisions during this time period. No decision will be perfect but if we work together we can do our best. I suggest activities limit roster size, cancel unnecessary events that underclassmen will have opportunities to participate in future seasons, but most importantly protect the full season for our senior classes. It is my hope that the State Board of Education will allow activities and athletics to begin practicing outdoors and in limited capacity two weeks prior to the start of the school year. This would allow activities to begin competition on the Friday after Labor Day and would only result in a net loss of one week of competition.</p>
7/21/2020 15:51:02	Kevin	Stewart	Free State Football	Lawrence	Thank you for your time, and I appreciate the forum to express my thoughts.
7/21/2020 15:51:13	Kimberly	Williams		Manhattan	While I am on board with the need to get our kids back in school, we have to have the capacity at our medical facilities to assist those in need. Evidence suggests that schools will exacerbate community spread of COVID-19, and delaying the start of the school year by two weeks will allow public officials to gauge the current exponential increase in cases before we throw our kids into the mix. We need to follow the science to reasonably protect the vulnerable.
7/21/2020 15:51:23	Amy	Reed		Gardner	I feel it would be negligent to send the kids back to school in the fall. This puts the students, teachers & all staff members susceptible to catching &/or exposing the virus & then the risk of having to shut schools down shortly after they are opened back up. My daughter is considered at high risk due to having 'compromised' lungs from having had RSV & double pneumonia when she was younger; if she were to contract the virus I'm afraid that I would be watching my child fight for her life again. Also, the younger kids have been so isolated all spring & summer that once they get back to school & see their friends, they won't be willing to socially distancing themselves from one another. Not to mention the fact that they will not have recess or eat on the cafeteria or drink from the water fountain & they will be required to wear a mask for 8hrs. I, personally, would like to see the fall semester be virtual.
7/21/2020 15:51:28	Colleen	Biggs	Just a parent - no specific	Lincoln	I feel like the delayed start isn't a bad idea...as long as the last day of school isn't moved to sometime in June! (Back in the day we always started after Labor Day!) Although I think smaller districts such as ours could safely start on time. As for the mask requirement...I don't see how it is feasible. Seems that the kids will be interacting in other ways (for example...at lunch or after school when teachers aren't there making sure they have masks on) so germs are going to be spread regardless. Plus, I highly doubt that all masks will be worn appropriately...especially in the lower grades! I just think they will distract from the learning that should be taking place and I question how effective they actually will be.
7/21/2020 15:51:29	Sheila	Tabb	Grandparent	Garden City	I do not consent to wearing masks

7/21/2020 15:51:31	Riann	Hand	USD 259 Teacher	Wichita	I fully support delaying the start of school and feel when we do go back it should start online. It is the safest! Think of all the lives that this will keep safe!!!
7/21/2020 15:51:36	Rachel	Kendrick		Overland Park	I feel strongly that every precaution should be taken to protect students and their families, as well as teachers/staff and their families. A later start would allow districts to strategize and plan the best ways to keep everyone safe.
7/21/2020 15:51:37	Amelia	Allen		Leawood	Please honor the governor's executive order and keep school facilities closed until after Labor Day. We are still seeing increases in cases, and this is the best way to protect our kids, teachers, and all other school staff.
7/21/2020 15:51:38	Ashley	Tumberger		Olathe	Please Open the schools, Our children need to learn. As a working parent I can't possibly give my children the education they need and deserve.
7/21/2020 15:51:38	Natasha	O'Donnell	My children	Lenexa	I have four children in three different schools; public, private and virtual. The virtual school is ready to go and shouldn't be held back to start. They are the most ready for this. If private schools are ready to teach online or at least start to acclimate students to an online learning platform, then I believe they should be able to start as planned. My oldest will be a senior at Shawnee Mission NW and he needs to be in a school/classroom environment to learn. I am fine with him starting after Labor Day if it can be in person.
7/21/2020 15:51:40	Susan	Rathert-Todd	USD 475	Milford	Please support Governor Kelly by delaying the start of the school year. I spent 33 years in the above district and cannot imagine all the changes that must be considered and implemented to keep everyone safe. In the event you are thinking "but the schools have had all summer and they should be ready" it really is not that simple. We know so much more now than in March and even the beginning of June. Add to that equation the constantly evolving nature of this situation and the extra time would be extremely beneficial to prepare. It might prevent us from having to backtrack later. I understand the concern that one size does not fit all; but the guidelines you have endorsed provide the flexibility to address local differences. Thank you.
7/21/2020 15:51:44	Holly	Mcpeak	Usd 497	Lawrence	Please uphold Governor Kelly's order. Students are at risk and so are communities. Please allow all schools time to plan a safe opening. Even rural schools are being affected and need the time to prepare.
7/21/2020 15:51:51	Robert	Martin		Andover	Delayed start would give teachers and schools time to prepare more effective plans. Even a late end to the school year would be acceptable for the safety and effectiveness of students and staff.
7/21/2020 15:51:52	Richard	King	N/A	Lenexa	Schools must be allowed to open on time, at the very least via video, and in-person if they are prepared to do so safely. Anything else is an overreach of authority.

7/21/2020 15:51:53	Olivia	King		Olathe	<p>My stomach is in knots, this whole conversation is gut wrenching. I am completely torn in between wanting to go back to school and wanting to cancel learning in person in general. There are so many factors involved. I want to go back to school to see my co-workers and to see our students. I want my child to return to school to see his friends and his teachers. Yet, the more we think about the virus and the fear that people have over it, the more likely it is that school will never be the same. So is it worth the time and effort it's going to take overall to make our schools actual learning environments and not just a place for social interactions with protocols?</p> <p>We will have to invest so much time and money into making classrooms a practical environment regarding the guidelines. If students have to wash their hands every hour and it takes each student 20 sec (at minimum) to wash their hands, then how much time is cutting into the instructional time tax payers pay for their children to get everyday? How are we expected to keep the kids from getting up and walking around the room? How are we expected to force these children to keep the masks on their faces for 7 hours straight, especially the SPED students. How much time is going to be allotted for lunch time, seeing as students will have to be social distancing? How are masks going to make a difference, if our schools have poor ventilation anyway? How are we then going to compensate for the increase in duties among the faculty and staff at each school, when we aren't getting paid enough as it is? There are too many "what ifs" to continue down this road.</p> <p>I am more worried about what is happening to students while the schools have been shut down. Why are schools deemed inessential? We talk about safety, but we are forgetting about all the lives we're putting at risk by not reopening as usual. Malnutrition, abuse, neglect, suicide, anxiety, depression, these are all issues we need to be looking at when we consider reopening. Not just the inaccurate data everyone is basing their responses on. We need to be able and willing to face this virus head on, because it is inevitable, regardless of whether there is a vaccine or not.</p>
7/21/2020 15:51:54	Naomi	Reeh	Sacred Heart Catholic S	McDonald	I do not agree with the forced mandate to wear face masks all day whenever we are in the school. That is a long time to have to wear a face mask each day. That will be over 40 hours each week wearing a mask and not able to breathe the fresh air. I am worried that this will not be healthy for the students', staffs', or teachers' lungs. I think the temperature checks, hand washing and hand sanitizers are a good idea. Could we just wear the face masks at large school assemblies and situations when everyone is together?
7/21/2020 15:52:05	Paula	Bunde	Shawnee Mission Schoo	Overland Park	Please pass the governor's executive order to delay the beginning of school and allow staff to better prepare for the requirements, as well as have more time for the viral spread in the community to level. Delaying also helps us see how things go in schools across the country that open earlier and learn from them. Thank you.
7/21/2020 15:52:11	Lanese	Wherry	Parent	Lenexa	The school systems should have the plans in place already to begin a plan. The schools have worked all summer to begin school in person and go to online learning if needed. They do not need another 3 weeks. Start school in August and go with it. What is to say September 8th comes along and you move it to what-October 8th? Start school when it was scheduled to start-in August. Kids need an education and delaying and delaying does nothing for them.
7/21/2020 15:52:19	Logan	Schrag	TRUMP 2020	Bel Aire	This is all a false narratives and I am completely against keeping schools from starting. <b>START SCHOOLS ON TIME</b>
7/21/2020 15:52:22	Christopher	Ledbetter	None	Olathe	If the goal is the safety of school kids and teachers in the face of this pandemic, it doesn't make a lot of sense to delay schools from opening even if they are willing to use online tools as an alternative to face-to-face classrooms. It seems unnecessarily restrictive and it complicates the plans of schools, parents, and children.
7/21/2020 15:52:26	Regina	Keim		Sabetha	I strongly plead that you will vote to start school as planned on Aug. 22nd or before for school districts in Kansas or let the individual districts decide for themselves the appropriate time to start school for their district. My children WANT to go to school as planned. They are excited to be in school to learn with their peers. Their emotional and mental well being needs to be considered. School is their normal. Please let them have normal. I understand COVID and I understand the concern, but go beyond and think of the children and their desire to return to a normal life. Our county has had few cases and hospitalizations, none have been children, and all have recovered. Each county is different and should be treated as such. Please take that in to consideration when making your decision. Thank you. Gina Keim, parent in USD 113

7/21/2020 15:52:27	Carrie	Conley	Olathe Public Schools	Olathe	My hope is IN person school and school sports are available
7/21/2020 15:52:30	Becky	Benoit		Damar	I completely respect the decision to delay school until after Labor Day. What I do not agree on is mandating K-12 students to wear a mask. Each should be up to each parent to decide what is BEST for their family. Washing hands, using good hygiene I completely understand as well. What actually needs to happen is adequate time off for ALL. Workers that need to stay home and care for themselves and their children if happen to fall ill and feel the only way to make ends meet is to medicate themselves or their children and send them to school/daycare or return to work sick because they feel that they cannot stay home or risk being fired or not getting paid. THAT is not ok. This has always been an issue. Parents send kids to sick to school during a normal, non-pandemic year, because they cannot afford to stay home for one reason or another. FIX that and I feel that the results in kids being sick in school would dramatically decrease. Please also look at the regions of Kansas separately. What is done in a more populated part of the state doesn't necessarily fit into what happens in rural community. This cannot be a one size fits all Kansans scenario. Please, please, please let each school district decide based on their own region and circumstance. I understand there are so many what if scenarios and everyone is trying their best to do what is right. BUT PLEASE, PLEASE let the school districts and communities decide.
7/21/2020 15:52:39	Geri	Caraway	Parent of high school stu	Goddard	School administrators have been planning for school to start in August whether through in-person classes, on-line or hybrid. I would like to see the decision to start school be left to individual school districts and not a one-size fits all approach.
7/21/2020 15:52:39	Teresita	Deckard		assaria	Please get these kids back in school!
7/21/2020 15:52:54	Kacie	Olson	Parent	Lenexa	I believe it is important to rely on the foundations in which Kansas Education has set in place. Local control and decision-making ability should be given to the schools and districts. I agree that human safety and the well-being should be the number one priority. Then students receiving quality face to face instruction number 2. The state-board already approved guidance with these priorities clearly stated. Please allow and trust district and school leaders to make local decisions with the same priorities but differentiated and appropriate to the context in which they are living and serving families. Just like the districts and schools will give families the opportunity to do the same. Thank you for your support in not approving the governor's executive order to delay school.
7/21/2020 15:52:58	Timothy	O'Crowley		Douglass	Leave reopening decisions in the hands of local boards. One size does not fit all.
7/21/2020 15:53:05	Sheila	Stimatze	grandparent of a kinderg	Syracuse	While face coverings may be okay for older children but a younger child, elementary school, will only play with it all day distracting them from school work, hypoxia should be a concern in any child as face coverings limit the fresh oxygen they would breath. Temperature checks, smaller class sizes and social distancing via patricians are a good idea to help keep any and all illnesses under control. Limiting visitors inside the school would also be a good idea. Handwash and/or sanitizing stations at each and every door would be a good idea.
7/21/2020 15:53:14	Pat	Argueta	School district 497	Lawrence	Delay!
7/21/2020 15:53:15	P. Shelly	Myers	Parent although I teach	Colby	Although I don't mind the late start date of 9/9, I feel as though requiring students to wear masks while in the school building all day isn't realistic. As a teacher, I don't feel as though this is necessary unless the city in which I reside is under siege by the virus. I hope local decisions can account for some of the mandates aside from the start date.
7/21/2020 15:53:18	Stephanie	White	Westside Elementary	Pittsburg	I am in favor of Governor Kelly's executive order in delaying the start of school until after Labor Day. I would like to see our district take the time before Labor Day to properly implement the KSDE's guidelines as it pertains to our academics and school environment by allowing us to attend professional development to address our districts needs. After teaching summer school it is vital to have face to face instruction for my students but I am also concerned with the health and welfare of not only our students but our staff and teachers as well. My summer school students did surprisingly well with wearing a mask at school!! I have a picture of them if you are interested in seeing it! They look really cute!! :)

7/21/2020 15:53:26	Ashley	Beier	USD 259 - Elementary T	Wichita	I am concerned about the amount of work our custodial staff will be asked to do. Currently we have 1 of our 3 custodial positions filled. We are a building with an average enrollment of 550-600 students. One custodian cannot maintain our building and keep it safe. I am also concerned about our air quality. We are an old building. It is rare a week goes by without an issue with our heating or air. Many of our rooms do not have windows and many more have windows that do not open. I love my job, but I cannot do it adequately if we open on time. Please give teachers the time we need to adequately prepare for this unprecedented situation and our communities time to get the spread of the virus under control.
7/21/2020 15:53:31	Matt	Kendrick		Overland Park	With such a dynamic situation, I think it's crucial to allow schools this extra time in order to develop a plan that maximizes safety for all stakeholders.
7/21/2020 15:53:34	James	Stone	Nike Elementary School	Gardner	I disagree with the executive order and would like school to resume as scheduled without restrictions
7/21/2020 15:53:38	Sara	Jenkins	Wolf creek elementary	Spring Hill Ks	I do not think we should delay school, I think kids should have the option to attend school in person
7/21/2020 15:53:42	Mark	Williams	Parent	Paola	Open schools now with all activities, this nonsense has to stop!
7/21/2020 15:53:44	Joe	Hildebrand		Overland Park	Our kids need to go back to school as soon as possible. The data of this virus is available and it's a virus that isn't any worse than others we have faced in the past. The damage being done by politicians is treasonous. This needs to stop
7/21/2020 15:53:50	Jane	Wallace	Self	Wichita	Please open schools back up before Labor Day for the good of the students.
7/21/2020 15:53:51	Amanda	Juenemann	School	Colby	If this pertains to masks, I am very against the rule of having all students wear masks during the school day. As a parent and educator, this decision was made very poorly and not with a clear mindset of what is being asked of these students. How can we expect elementary school aged students to wear a mask all day? We are going to lose a lot of students if this is still in effect. If I was not a teacher, I would not send my kid to school where he has to wear a mask all day. This decision will shut down our schools and the students will not get their appropriate education. Try wearing a mask all day. It is hard to understand the person wearing the mask, glasses fog over and it's hard to breathe. All we will get done in a day is talking about masks! Think about the students who are speech impaired and how this affects them. I can tell already that the ones who don't wear a mask because if they have a disability that would do more harm than good won't wear a mask and then the other students won't keep theirs on because classmates don't have theirs on. If we have to wear masks, have them wear them in hallways but in the classrooms is just asking too much. Please think about the students and also how this decision will impact our schools for the worst and not the better.
7/21/2020 15:53:52	Ryan	Edwards	Parent	Lawrence	While I agree the physical closure of schools is important for the health and safety of educators and students, the order's prohibition against online instruction has no public health benefit, making the order an overreach. Local school districts that have prepared for the contingency of beginning the school year virtually (on time), should have the option to do so. Local school districts that are unprepared to do so, should be accountable to their constituents.  Finally, to the extent no instruction is provided until September (or later), what assurances is the BoE willing to provide to overcome the 6-month gap in education many Kansas children have experienced ( will the 2020-21 school year be extended through the summer of 2021)?
7/21/2020 15:53:52	Reuah	Knoles	Teacher	1031 E Dover Circle	I support Gov. Kelly
7/21/2020 15:53:52	Haley	Rafuse	Shamnee Mission Sou	Overland Park	I agree with delay order. Additionally, I think all extracurricular activities and non-GED required courses should be cancelled. The building could be used for required classes only, i.e. math, English, History, science. This would allow students to spread out into more classrooms and appropriately social distance. Any classes/lectures should be offered in person and virtual. The school days should be half days and students go home for afternoon study hall or reserve limited seats in MPR or library for additional wifi access or tutor help.
7/21/2020 15:53:55	Jennifer	Ninen		Gardner, KS	Delay!!!! Masks if needed. I think breaks in their classrooms will be appropriate
7/21/2020 15:53:57	Dave	Williams		Colby	True kids need to be back in the classroom to learn best and to have the social interaction with their peers. This is very important to their full and complete development

7/21/2020 15:54:06	MEgan	Wilcoxson		Glen Elder	Let them go back! I don't feel they are retaining much if anything over internet school. Emotionally they are failing too....no interaction with other kids, no structure when internet classes, and what is 3 weeks going to do. We live in Rural Kansas ans have a school of 200 that being K-12 grades. Let it be up to the districts what will work best for them, you can not compare our district to metro areas. They need normalcy and I know for one my kids want to go back sooner than later. Even if have to wear a mask for certain things, let our local districts decide whats best!
7/21/2020 15:54:06	Tammy	B.	Self	Topeka	I would like to take this time to ask for you to consider opening schools in August. Children have been out of school for five months. Kids need structure, which some do not obtain at home. Some children rely on a meal that some do not get at home, parents will not have daycare for the month of August, and last but not least, they need the opportunity to learn. Everyone wants safety to be number one. However, I feel that this can be done whether kids reintegrate in a block schedule setting or virtually. Virtual learning was rough at first in the early spring, but overall, my household had a positive experience. While some may not like virtual learning, if school is going to be delayed until September, I ask to at least implement online learning in August as an option to not only assist the children in getting back into a routine, but to help stimulate their brain from the long extended break. Delaying until September is not going to change any spike of the virus that may or may not occur. Mask mandates were made prior to the 4th of July holiday and what have we seen, an increase. What does September 9th fall after, Labor Day. The last holiday of the summer where families and friends gather. With that being said, socializing and mass gatherings will not cease. If anything, they will increase. If educators wish not to return work, I know many personally that would gladly take their place and earn their paycheck. I believe that if parents and educators work together, we as a team can make school happen in August. Please consider this option and don't make the children suffer from what they have no control over. Thank you!
7/21/2020 15:54:14	Lisa	Reeves	Parent in BVSD229 (for	Leawood	I stand with Governor Kelly and believe in-person school should be delayed until it is safe to gather in large groups in enclosed spaces. Virtual school is, in my family's opinion, the safest choice for all students, faculty, and staff until a vaccine is available, along with effective treatment for those diagnosed with Covid-19. Thank you for your consideration.
7/21/2020 15:54:16	Sandy	Nitcher		Wichita	Please support Governor Kelly's executive order to delay the start of schools. The numbers of Coronavirus cases in Sedgwick County is alarming and schools need time to have all safety measures in place.
7/21/2020 15:54:27	Sarah	Patton		Lenexa	Private school should be allowed to open, many have worked through the summer to prepare and are ready to open on time
7/21/2020 15:54:27	Kendra	Morford	373 & 259	Newton	Please delay the start of school! We are a parents of 3 school aged children and are teachers ourselves! This dramatically affects us!
7/21/2020 15:54:39	Jackie	Norman	Colby Public School	Colby	Please do not delay school, our kids need their education. The need to be social
7/21/2020 15:54:40	Kris	Shields	Kansas voter	Lawrence	Does anyone else appreciate the irony that the board members are meeting remotely in order to decide whether our kiddos should be crammed into school rooms together?? Incredible.
7/21/2020 15:54:45	Edwin	Gener	My Family and myself	Overland Park	Please allow the Governor's order to take affect. She is NOT shutting down in person teaching/learning. She is merely asking for time so that the appropriate stakeholders can evaluate and prepare for the upcoming school year. This is the most prudent course of action. We all know the horrible outcomes possible if we open too early and without a good plan (see Miami, Arizona, and California).
7/21/2020 15:54:51	Kathryn	Sheedy		1325 Stonecreek Dr	I support the Governor's order delaying schools until after September 8 as it is reasonable and necessary given the recent increase in COVID cases in Kansas. As a parent of elementary school children, I will not feel comfortable sending my children to school in person until new COVID cases begin to decline in our community over an extended period of time. Starting school in person at this point during the pandemic exposes teachers, students, and their families, as well as our communities as a whole, to unnecessary risk.
7/21/2020 15:54:51	Rebecca	Cumberland	Christ Prep Academy	Spring Hill	Please delay the start of school.
7/21/2020 15:55:08	Mary	Lonker	USD 320	Wamego	Please follow Governor Kelly's plan to delay the start of school to Labor Day. As a teacher who is on an Apollo redesign team, we will need time for not only the logistics of safety protocol and procedures, but more importantly to study and prepare for the new state competencies!
7/21/2020 15:55:12	Angie	Nelson	USD259	Wichita	It is not safe to open. Please don't put us or our kids in harms way. There are other options. Please consider.

7/21/2020 15:55:18	Abbey	Vogel	Usd 284	Cottonwood Falls	Please do not postpone the opening of schools on a "whole". Our community has had 6 cases of Covid and our children are ready to attend school after this extended break. They crave routine, sports, teachers and friends. No delay. Start in August!
7/21/2020 15:55:22	Kathy	LindseyKramer	Parent	Gardner	Our students need to be in school, delaying the start is not changing the outcome of the virus but the outcome of our children's future.
7/21/2020 15:55:24	Carol	Everley	Maranatha Christian Ac	Lenexa	Children need to return to school before labor day so they can return to as much normalcy in their lives as possible. They have been out of the learning process for far to long. They need structure and in person learning for many reasons which include interacting with their fellow students and the ability to return to a routine that is good for their mental health and their learning health. Teachers should be an essential worker as much as grocery stores, gyms and far more than liquor stores. The harm to their lack of education to their future is the greatest harm we can do to our children.  Statistics show that children are far less likely to contact and spread COVID19 than almost any other group of people.
7/21/2020 15:55:25	Hagan	Booi	Colby public schools	Colby	Please consider this request for the good of our future society. Our children have been taught nothing since March it is time to return to school veto the governor.
7/21/2020 15:55:26	Valerie	Buell		Westmoreland	Please do not delay the openings of school. Our kids need to be back in school. I felt our school district had a good strategy for our students to come back in August. Schools have been preparing for this since shut down. I don't think they need anymore time and some districts can't afford to hire new employees to take temps and whatever else they have to buy. Budgets are thin as it is. At least give them a chance to start before Labor Day. Let our children have sports and other activities.
7/21/2020 15:55:26	Brianna	Thompson	USD 383	Manhattan	I genuinely appreciate Governor Keny's consideration for school safety and proposing to postpone the start date until after Labor Day. We simply cannot deny the data within our state. We cannot deny that our data is far worse than when we closed schools in the Spring. We simply cannot deny the fact that if we were to return students to school buildings sooner rather than later, we would be jeopardizing the safety of students, educators, and all of their families. We cannot deny that schools are a shared space, among several grade levels, and several adults. Every student that enters school also goes home to a family every day, one who takes COVID seriously, or one who does not. But that's the thing, COVID doesn't play sides. Consider the spread that happens from school to home, even when we are not in a pandemic? Strep, cold, flu, lice, etc. We simply cannot deny the fact that schools have been notoriously known as spaces that spread sickness, especially when there is a lack in sanitation, ventilation, and proper hygiene. We cannot deny the fact that if we were to open schools sooner rather than later, it could be a pivotal moment in this pandemic. We cannot deny that this decision could make or break us. We cannot deny that it becomes important to consider that education never stops, we demonstrated that during continuous learning, all the way up to this moment right here.  We are constantly educating ourselves on best practices. As educators, we long and hunger for learning, all in efforts to benefit our students. We are constantly analyzing how can we keep our students safe. The love a teacher has for their students cannot even be put into words, and when you care for someone to that magnitude, you are going to sacrifice some things for them. More than anything teachers want to be with their students, but we are sacrificing the joy we get in working with them, to ensure they are safe and healthy. Not only them, but their families as well. We are more than okay with taking preventative measures, if that means we get to see them safely again one day and they get to see us. We are more than okay with taking preventative measures if this means that someone doesn't have to sit a student down and let them know they lost a teacher, a friend, a family member, due to COVID. We are more than okay preventing the opportunity for this virus to spread. The amount of time that educators and educational leaders have been putting into learning, preparing, observing, and so much more is incredible. But it is on every educator's mind whether it has been enough to prevent the loss of lives when it comes time to return to school.  More time. Time opens up more, in regards to gathering and assessing COVID data. Time allows us to prepare for what is best for our community. Time allows us to analyze what measures we need to take locally. Time provides us with

7/21/2020 15:55:39	Brett	Burhenn	SMSD	Gardner, KS	I fully support EO 20-58. As a teacher and especially as a parent, I have little to no faith that the area in which I live is ready to open up fully. The risks to our student and children are much too high, and the answers to all of our “what if...” questions are not there or are not satisfactory. With cases on the rise, there is absolutely no way to make the virus go away if students continue to share it amongst themselves. I’ve heard the “Kids aren’t at risk and can get over it easily” arguments many times, but that doesn’t account for the people those students can and will infect while they’re getting over it that WON’T get over it easily. As long as we’re encouraging students to show up to school in person, we’re negating all of the stay-at-home time we all put in over the spring. I believe governor Kelly has the right idea. At the very least, give us more time to plan for the inevitable disaster that an in-person school year will bring.
7/21/2020 15:55:42	Kim	Newell	Parent of K-12 students	Wamego	Please leave this decision up to each individual school district. The needs and challenges are not the same across the whole state. Teachers and educators have been planning for this all summer. They are ready to meet the needs of their individual community and families deserve the right to choose. Students are falling farther and farther behind while the whole world is using scare tactics for an illness that has proven more than a 95% survival rate. Kansans do not want Executive Orders! Kansans want freedom!
7/21/2020 15:55:43	Joseph	Fix	Self	Lawrence	I understand holding school until Labor Day. But extra-curricular work for sports should absolutely be allowed to continue. These are being run in full compliance with guidelines including masks, separation, etc. physical and mental exercise is critical for these kids - and they face less risk than older people. The governors blanket approach to everything is the “easy way to avoid criticism”. Keep the kids involved or you will lose them
7/21/2020 15:55:46	John	Riggs		Lansing	Due to the increasing number of cases of Covid-19, I believe it will be crucial to delay the opening of public school buildings. Teachers and staff will need as much time as possible to procure the necessary supplies and materials, and provide professional development and training to implement appropriate safety procedures. Delaying will also provide districts much needed time to prepare contingency plans and provide training for teachers should remote learning and/or hybrid learning become necessary.
7/21/2020 15:55:53	Jeannette	Bonjour	Olathe Northwest	Kansas City	As a teacher in the Olathe school district, I am urging you to support Governor Kelly’s executive order. I am a 27-year veteran educator, with a 60-year old husband and a son with moderate to severe asthma. While I am eager to meet my new class of seniors, I do not believe that it is safe for any of us to be in our building at this time. Please—PLEASE—do the right thing for all Kansas students, teachers, paraprofessionals, bus drivers, custodians, and their families. Follow the science, and support the governor’s plan to delay the start of the school year until after Labor Day.
7/21/2020 15:56:07	Katrina	Duff	USD #466	Scott City	Please do not approve this order to delay school and sports to September 9th. Every district has had ample time to prepare for the school year how they deem necessary. I also ask that you please don’t require our children to wear masks. Let that be to our discretion.
7/21/2020 15:56:10	Jamie	Bezdek	Self	Lenexa	Please, I strongly urge you, consider letting each school district make the choice themselves regarding activities prior to Sept 9. The schools know best, one answer does not fit all of KS
7/21/2020 15:56:15	Scott	Kemme		Lawrence	School should be only re-opened for in-person contact when it doesn’t constitute a threat to life to students, their family members (who are subsequently exposed) or teachers and staff. Make online learning work.

7/21/2020 15:56:22	Carrie	Karns		Topeka	<p>Board members, I know that you are facing a very hard decision right now and a lot is at stake. Thank you for your service and dedication to the education of young Kansans. I am reaching out to you as an elementary teacher and a concerned Kansan. If school goes back to normal and begins in early August many people will be put in great danger. This is not a political issue. It is an issue of keeping people safe and healthy. I know that you are concerned about the well being of our children, I am too, but the danger that they will be in (plus every single school staff member) is not worth the risk. A delay in learning could keep a child from loosing a guardian to sickness, loosing a teacher to sickness, or abruptly having to switch to online learning. Personally, I am fearful to go back to my job due to the fact that I also have a lot on the line. I am a secondary caretaker for my father who suffers from Alzheimers. If I am required to go back to school when the risks is as high as it is I will loose precious time with my father who is suffering from a degenerative illness and will not be able to provide my mother, his full time caregiver, the relief that she needs. Taking the time to be careful will give me more time with my father. I do not tell you this with the hopes of receiving special treatment. I am sharing my story with you because I am certain that there are other teachers who are in similar situations of needing to take care of loved ones. I love my job and care greatly for my students but know that school as normal will likely not be the best for them or the teachers who will be asked to put their lives at risk. I've started my masters in curriculum and reading instruction this summer out of dedication to this profession. Through my studies I have studied the work of Nel Noddings who was an influential educational theorist. Noddings' work points out the fact that teachers have a very important role in caring for children and modeling how to take care of others so that children can learn to have compassion and care for others when they are developmentally ready to do so. In order for teachers to be able to care for their students they themselves have to feel cared for. I know several teachers in the area, including myself, who don't not feel cared in this unpredictable situation. If teachers do not feel cared for, if we feel that our health has been put on the back burner, how are we to care for and teach our students in this emotionally taxing time? Thank you for your time, Carrie Karns</p>
7/21/2020 15:56:22	Sara	Hasty	1957, school physical th	Sabetha	<p>mentally I am ready to start school on the 21 of aug, but if there is not a plan in place to protect teachers and students then let's start after labor day. I want a better experience for the students, parents and staff. We need to be organized and not flying by the seat of our pants. My rep is Deena Hurst.</p>

7/21/2020 15:56:26	Kevin	Neenan		Roeland Park	<p>I am a parent, coach, and business owner. I have 4 children between the ages of 9 and 15. Two are in a private high school and two are in a private grade school. I am NOT in favor of the proposed order by Gov. Kelly. The data does not show that this is the right thing to do for the kids. Interrupted learning and socialization is proven to be less healthy for these kids. We know who the vulnerable are and it is not these kids. The data backs this up. As a parent, I have seen the difference in my kids from when they were locked down to when they could go back out and participate in sports and activities. One of them in particular really struggled and was depressed. It went away when activities began again. I can also tell you as a coach and league administrator for youth football that other parents feel the same way. We have 200 plus kids signed up for fall football. If they were concerned, they wouldn't have signed up. We have not had a big outbreak with all the baseball going on. I see the same kids and parents at tournaments every weekend. Teams have not had to drop out of leagues or cancel games because of a big spread of Covid19. I just don't see the point in taking away activities tied to schools when other activities will continue.</p> <p>I also don't think it's right to put every school district or school in the same category. I know our schools have spent months preparing for the school year and have a good plan in place. We should focus on the schools and school districts that aren't ready or have the resources available and help them get there. I'm sorry but an extra 3 weeks is unacceptable at this point. There has been plenty of time and I'll bet you'll find that most schools are ready because they have had several months to figure it out. I think the schools that pass the second part of the order, the guidelines and protocols, should be able to be open on time. I understand the pandemic and realize there are some areas of the country that have full hospitals; but the fact is that we don't have that here in Kansas. The biggest reason for locking stuff down is to not overwhelm the hospitals. I would understand this order if we were in that situation. Please look at the overall picture and the risk/reward. Please allow school districts to make the decision based on their plans in place in accordance with your guidelines. I truly believe if this order passes, it will open the door to keep them out of school all year.</p>
7/21/2020 15:56:27	Jamie	Junker	Usd259	Andover	I support delaying the start of 20-21 school year. This gives us time to adequately prep our buildings and appropriately train staff for new safety measures.
7/21/2020 15:56:28	Laura	Petersma	Christ Preparatory Acad	Lenexa	I fully support delaying the start of the 20-21 school year until after Labor Day.
7/21/2020 15:56:29	Bella	Garcha	Lawrence public school	Lawrence	I am in favor! This is a big deal and kids are experiencing trauma and they can not learn while being stressed out
7/21/2020 15:56:38	Bradford	Elsten	Family USD 497	Lawrence	The sports teams have demonstrated strong oversight and controls during summer conditioning. I feel that it is important to allow the sports teams to continue to practice for the mental well being of the high school kids. There are certainly more oversight and controls at the high school facilities then there will be if the athletes are all left on there own.
7/21/2020 15:56:40	Shara	Tracy	Usd 259	Wichita	I think we should delay school until safety measures can be put into place, and our local cases of COVID 19 are down
7/21/2020 15:56:42	Ceridwen	Goulter	Lawrence Public School	Lawrence	Our teachers, our parents, and our students deserve a safe return to school. It's that simple.
7/21/2020 15:56:44	Alli	Patton	Usd466	Scott City, ks	Start school on time with sports
7/21/2020 15:56:54	LeAnn	Kruckenber	USD 266	Wichita	I support the Governor's order to delay the opening of school. It is not safe for children & adults to be with large numbers of other people. Too many positive cases of COVID-19 in Sedgwick County! Safety should come first.

7/21/2020 15:57:01	Jake	Reinert		Colby	I understand the unprecedented challenges bestowed upon the educational system at this time. I trust that the board leadership will continue to have the best interest of our children in mind when deciding what steps to take now, and into the foreseeable future. Not only is the health and Safety of our teachers and students at risk from this contagion, but also the community's Working class infrastructure is at risk with a blended learning or no school environment. As a healthcare worker we have learned how to adjust very quickly and at times we have been exposed to known hazards unwillingly. But that is what our profession calls us to do no matter the circumstances. We have been 'holding the line' so to speak during this pandemic and it is my opinion that the school systems need to act more like an essential function so that our community can continue to grow and flourish like we all want it to. My specific concern as a parent is the incredible gap that the education system will face the longer we withhold some form of traditional learning from our youth. This will only bring the system down if we are not prepared. Thank you for sending this survey out. I hope you receive good feedback. The window of opportunity seems narrow but I understand the incredible time pressures you face. Ultimately I believe in the board and will support its decisions either way. Thank you for your service.
7/21/2020 15:57:04	Ashley	Peterson		Baldwin City	Please allow sports to continue with practice and games.
7/21/2020 15:57:06	Tina	Busenitz		Wichita	Please delay Schools opening until after Labor Day. This gives our cities and counties a chance to lower the number of Covid cases.
7/21/2020 15:57:07	Sabrina	Fink		Salina	Please make all districts the same - don't let districts decide, there is too much pressure from local politics. I am a teacher in one district and my kids attend a different district. If some delay and some don't it is going to put a HUGE strain on us!!! Also hybrid sucks for everyone, all in school or all virtual.
7/21/2020 15:57:20	Caitlyn	Barnes		Salina	Open schools up when they were supposed to be open! These kids have gone long enough without any sort of normalcy, they NEED to be back in school. Parents are not going to be able to teach their kids while working a full time job, and it's not the daycare providers job to teach them, while watching other children.
7/21/2020 15:57:31	Terri	Hatch	Blue Valley Schools	OLATHE	I am very much in favor of delaying the opening of school until our cases have decreased and we are no longer seeing spikes. I would prefer the start of school to happen online for the safety of our teachers, janitors, office personnel and of course children. There are so many things to consider and the list is never ending. I know masks and temperatures being taken to enter the building are required. A concern I have is that more entrances to the buildings are going to have to be open. How are those entrances going to be controlled with active shooter measures put into place as well. I know that kids are going to be behind but they are all going to be behind together. Keep our teachers safe and alive so that when we can safely return they can get our kids back up to speed. I realize that there are some students who need to get back to the classroom. Their home lives do not bode well to online school, they have IEP's, mental issues, depression, etc. Get those kids back in the classrooms. Give them the space and let the kids who are going to do just fine online do so with the guidance of online teachers. I believe that by opening the schools we are delaying the end of this pandemic. I will not be sending my kids back to the Blue Valley School District until it is safe to do so. While my middle school son would learn better in person I will not risk our families safety by sending him. Please let's flatten our curve and get our cases down first and then worry about getting back into the brick and mortar buildings. If these kids return in person, school is going to be so different that it will be more of a distraction than anything. Also, I know that families already do not follow the health guidelines during a normal flu season. Those same families will not follow them now. Thank you for your time!
7/21/2020 15:57:33	Bill	Baker		Olathe	If we closed in March to be safe and now cases are going up how do we in good conscious go back to a normal day? While kids may not get as sick please think about the teachers. Without them there will be no school. We want to be back. But i want to be safe
7/21/2020 15:57:38	Jessika	Koons		Scott City	As a nurse, cross contamination of masks will hinder our health much more than not wearing masks. Temperature checks, only done accurately, will help, but masks will not help spread contamination with young students.
7/21/2020 15:57:43	Chase	Stamatis	Christ Prep Academy	Overland Park	Start school on time. Delaying school will do nothing but hurt the kids.

7/21/2020 15:57:53	Jaelyn	Stowell	Mother and teacher in O	Lenexa	There is no way to safely open schools yet. Please put the safety of teachers and families above needing somewhere for children to go so parents can work. Teachers are not babysitters. As a teacher, I accept that I might have to sacrifice myself if a gunman enters the classroom. But we are not ready to bring Covid back to our own families. Even if .02% of children that get it die, the teacher ratio is MUCH higher. Please do not have in person learning until it is safe to do so. And if you just can't help yourself from opening it, please make masks MANDATORY and not recommended.
7/21/2020 15:57:53	Stacy	Neumann	USD 501	Topeka	This is not a political issue. Decisions need to be made on facts. We have an increase in cases in Kansas. We can only predict what will happen when we have 400 students, K-5, and 60 staff members in a poorly ventilated building but it doesn't look good. The excuse that children don't get it is false. They do get it and spread it to adults that are teachers and paras. Then we take it home and they take it home. It goes on and on. Save lives. Teach online.
7/21/2020 15:57:56	Kara	billings	myself and my son	ft scott	I would really prefer that my son be in school. He has an IEP and needs extra help and I believe the longer he is out the harder it will be for him when he does go back.
7/21/2020 15:58:02	Margaret	Shadid	N/A	Lenexa	First of all, thank you for your service to the students of Kansas. You have a monumental task ahead of you- preparing for a school year full of unknowns. I would highly encourage the board to approve Executive Order 20-58. I can appreciate that not all schools in Kansas will need the extra time to prepare for the school year, but for school districts in my area, this gift of time will be imperative. My hope is that the majority of the 2020-2021 school year can be face-to-face, but this can only be accomplished if the proper precautions are taken on the front end. Ideally, smaller districts would be able to open earlier if they feel as though they are ready, but approving this EO would give all districts the time they may need to prepare for the upcoming school year. Again, thank you for your service to the great state of Kansas.
7/21/2020 15:58:29	Jennifer	Wilson	MCA	Overland Park	I believe opening school on time and utilizing reasonable pre cautions is the most responsible decision to both care for our students educational and mental health well-being.
7/21/2020 15:58:30	Jill	Schulz	Holton USD 336	Topeka	I strongly believe in delaying the start of school, as mandated by Gov Kelly.
7/21/2020 15:58:34	Amber	Johnson		Olathe	I can't understand how we come to decisions to delay school with unproven scientific theories to back it up compared to real time science. If current studies show that barely any kids are affected by this virus and that the flu is more deadly to kids then this virus then why in the world would we delay school? Non of this makes sense except this being political and benefiting only those who make this decision. On top of that making kids wear masks is ludicrous also with no science to back that either. The consequences of delaying school and keeping them home are more catastrophic then them contracting a virus that is almost harmless to them. What is going on with this decision making?
7/21/2020 15:58:37	Heather	Edverson		Overland Park	Please affirm the order to delay the start of school. There are no good options for this school year. But a delay will allow both time for communities to reduce community transmission of COVID-19 and for schools to more adequately prepare for schooling whether that be in-person or virtual.
7/21/2020 15:58:55	Jaime	Keltner	USD 500	Overland Park	Please uphold Governor Kelly's Executive Order, no school until after labor Day!!!
7/21/2020 15:59:00	Danielle	Smedley	Parents	Blue Springs, MO	Why are we all of the sudden concerned about people, such as teachers, having to work when thousands of "essential employees" have been working this whole time?! School needs to open business as usual and teachers need to go back to work. Students need education. It's not any less important now than it set has been.
7/21/2020 15:59:11	Jenessa	Elling		Colby	I think it is important for our children to get back into to school on time(August). These kids have already missed out on so much learning when school was dismissed during spring break. Some parents are not equipped to teach their children and the kids will fall behind if school continues to be postponed. A high percentage of families have both parents who work full time, multiple children in school, unpredictable work schedules, etc., simply need school to start because there are daycare shortages. It is for the safety of our children, the development of our children, and the future of our children. This virus isn't going to disappear because we post pone school, so we need to get our kids back to into learning.
7/21/2020 15:59:15	Jill	Reyes	Usd259	Wichita	I teach middle school students and I believe all secondary students should be doing online education and not return to school because COVID seems worse now than it was when we originally closed. Teachers will be putting our lives at risk and there are not enough subs to even cover for us when we get COVID as well. There is no way to avoid passing it around to one another if we return to school.

7/21/2020 15:59:24	Paula	Naughtin	myself	Lawrence, KS	I urge caution when asking teachers, children, and staff to come back physically to school this fall. We are seeing an increase in cases and no vaccine is available. As the parent of a now grown daughter whose heart was devastated by a virus, I know that what seems innocuous can be deadly. She has had two heart transplants and has life-limiting heart issues. I don't want another child to suffer what she has gone through. I don't want our teachers to do so.
7/21/2020 15:59:25	Jennifer	Tavernaro	Blue Valley Schools	Overland Park	Please do not send us back until after Labor Day so a safe, solid plan may be developed. Right now, there isn't one that I feel will make me feel comfortable. If the NFL players are balking about safety (and everyone is listening) then why shouldn't people listen to teachers?
7/21/2020 15:59:33	Lindsay	Wilson	McPherson High School	McPherson	Time to get the kids back in school
7/21/2020 15:59:38	Mrs.	Heim	SELF	Leavenworth	Please keep the many older teachers at the forefront of your decision making. The thought of potentially losing many mentors is very difficult to process. Many districts have a large number of "experienced" educators who will literally risk their lives for the good of their class. Thank you.
7/21/2020 16:00:04	joseph	schuier	Olathe school distric	Olathe	I live within two blocks of four schools and preschools. I have many co morbidity issues. also , opening and closing schools repeatedly with every new fever or positive test result is very expensive. That sounds like more property taxes needed to pay the increased costs.
7/21/2020 16:00:07	David	Becker	Myself	Lawrence	Let them practice and play
7/21/2020 16:00:08	Paula	Jaeckel	None	Wichita	Kids need to be in school! Not 5 days a week 6 hours a day! Use some common sense. Ask the teacher that is IN the classroom, not an administrator
7/21/2020 16:00:14	Suzanne	Long		Clearwater	Please consider that there is no "one size fits all" solution to this situation. What works for the large districts in the state won't necessarily work for the small districts. I'm not sure that delaying by three weeks will make much difference, I'm more concerned about all the other guidelines that don't make sense for ALL districts statewide.
7/21/2020 16:00:15	Anel	Cox	Cox powerLine LLC	Pratt kansas	I feel kids need to go to school wear the proper mask and social distances. They need to interact with teachers and peers.
7/21/2020 16:00:19	Amanda	Anderson		Wichita	Please uphold the order
7/21/2020 16:00:29	Melanie	Wehrman		Cheney KS	I would like to see authority to decide the school start date and other decisions about how to have school this year given to individual school districts. There is a big difference in what is happening with Covid-19 in different parts of the state, in different size cities and towns, and even within counties.
7/21/2020 16:00:39	Lori	Harding	USD 259	Wichita	I'm concerned about schools opening without it being safe for all adults and students to be in the buildings. I am in the age group that is seeing the highest growth of positive cases right now. Many teachers are above the age of 50. I want to be in the classroom with my students when it's time. Right now cases continue to rise and people need to wear masks to stop the spread. There is still so much to be done to prepare for a safe start to the school year. I'm also concerned as a primary teacher regarding the justification for young students to wear masks safely and properly and the struggle to social distance especially in a small classroom. Our classrooms should be half full to allow for social distancing. It's going to be hard going back to students without hugging and interacting with them and allowing them to touch one another also. Students need to be in school but school cannot be the same as they remember and it will take time to adjust for everyone. Please allow time for schools, administration and teachers to be ready for a safe start to the school year.
7/21/2020 16:00:45	Amy	Blake	Self/parent	Colby	As a parent of an incoming kindergartmer, I cant begin to tell how frustrated I am that she will have to wear a mask. I'm totally ok with my 7th grader wearing a mask but anyone k-3 will not tolerate it. They will bot keep them on and it will greatly effect their learning. My 5 year old is also autistic and this will effect her. Since she hasn't been in contact with many people since this started, she will have enough social problems going into school as it is. All kids are going to have enough trouble after being out this long.
7/21/2020 16:00:46	Amy	Calhoun	Parents and educators	Salina	For the safety of our kids and educators, please keep schools closed until September. 9 and allow for the virus to trend down. Then allow all students to return to school in full classes for normal daily instruction and learning!

7/21/2020 16:00:52	Concerned 10 yr	Olsen		Wichita	Do you want to kill teachers? Do you want to kill students? Do you want to get sued for deaths? Well if you do send them back to school and be guilty for killing and hurting teachers and students. Children will not be able to keep masks on . They will drop them and sneeze and cough and they will just not wear them. How are we going to keep children six feet apart ? Some students like to hug their teachers and if we find out the teacher or the student has it the whole class should quarantine. How often will the teachers and students be able to wash hands ? That will take away from class time. Will the Teachers still get payed in the time that they quarantine? What if teachers don't have enough room in their classroom to spread the desks six feet apart? Some younger students pick their nose and stick their fingers in their mouths and some stick stuff in there mouths such as pencils and erasers then they touch other stuff and spread germs. Some student's parents let them go to school if they are still ill. Students and teachers might not be able to breathe through their masks. Some students don't use soap when they wash their hands and they won't all wash for 20 seconds. And who knows where the teachers and the students have been. So in conclusion please don't make the students and teachers suffer and get sick at school and let them teach and learn from home so we can save lives. Nate Olsen
7/21/2020 16:00:57	Lauren	Braun		Manhattan	Please don't open the schools early unless everyone in the country starts following CDC guidelines immediately. Let's get on top of this virus together so schools can open safely. Until then, everyone should stay safe at home.
7/21/2020 16:01:00	Paige	Boyer		Merriam	There are schools in Kansas poised to open under EO20-59 and/or virtually. The governor's order that ALL schools (public and private) to include ALL instruction (even virtual) and activities not begin until after Labor Day robs those ready schools of an opportunity to return a sense of normalcy for a large number of students in our state. There are existing virtual schools, schools who found a strong virtual option in the spring, small schools with the ability to implement all mitigation measures, schools with a model that lends itself well to current circumstances (ie - university model, hybrid model)... ALL ready to begin a new school year and continue a strong academic experience for their students "on time". One size does not fit all and the EO20-58 does not take these schools, their capabilities, and the opportunity they bring to many Kansas students, families, and communities into consideration. If a school is able to follow the EO20-59 mandates then they are creating an environment safer than what's being followed out in public by the rest of the community and should be allowed to offer that to their families. If "in person" school needs to wait, then schools able to provide a virtual program to their students should be allowed to do so according to their school calendar; there is no reason to delay ALL schools and ALL instruction. Please consider that, while a delay for in-person classes or even virtual classes might be needed for some school districts to give them time to prepare... there are schools who do not need that time because they are ready now.
7/21/2020 16:01:04	L.	B.	Educators	Wichita	I am anxious to return to school and understand frustrations voiced by those opposed to delaying our return any longer. My concern is the recent rise in positive numbers here in Sedgwick County. People in our area have not been following social distancing, mask guidelines. A delay until Labor Day makes sense, it will give communities time to prepare. Teachers could return, to plan (Which would be great considering the challenges we will face in the coming academic year.), and help with preparations for the return of students. Please comply with the order, it really isn't a great deal of time. Thank you.
7/21/2020 16:01:08	Sarah	Newberry	Self	Attica	I do not believe that delaying school is necessary. Most families have masks and hand sanitizer already. The parents should be responsible for supplying that for their children. If that is not a possibility, it is amazing how communities can come together to help. The reason for the delay is to help the schools prepare? Everyone has been preparing, all summer. The kids need to be able to start school sports. Many kids, Seniors, are banking on their grades/sports to get college scholarships. Scholarships that turn out to be the make or break for many of them to further their education, their future. Many will not see the delay as a, "Big deal", but for those that live for sports, it is heartbreaking. By no means do I take COVID-19 lightly. My family would tell you I go overboard with precautions. Please find my plea to be that of a scared, heartbroken, anxious, overcautious, and desperate mother/aunt/friend/neighbor. Whatever is decided, it is what it is and we will all move on. Nothing these days seems to go how any of us had ever imagined. Have a good meeting.
7/21/2020 16:01:12	Amy	Lunde	USD 500 teacher	Olathe	Delaying the start of the school year will allow teachers to prepare for whatever type of learning occurs. Whether it is in person, blended or online. We need this time to be informed of all risks involved with in person learning. Please protect everyone's health and make the right decision for our state and delay the start of school.

7/21/2020 16:01:21	Heather	Shire		Lawrence	For their fitness and mental health, I would love if the student athletes could continue with conditioning as they have been, in a safe manner, even if school is not in session. Thanks for hearing my input.
7/21/2020 16:01:28	Doug	Miller	Self	Hiawatha	I think we should open prudently. The health and safety of students, teachers, and staff plus all the contacts outside of school they have offer a very large footprint of possible exposures. If it becomes prudent to delay school starts because of spikes of infection, then needed precautions should be taken.  Our actions regardless of the circumstances will provide a learning opportunity for our students about decision making under crisis.
7/21/2020 16:01:31	Kathleen	Breuer	Free State High School	Lawrence	Three things: 1) schools should only restart as brick and mortar when our cities daily positive cases start tapering off, or no new positive cases in a 14- day period of time. Until then, online learning should be the only clear option here. 2) High school sports should take extreme caution for continuing workouts, practices and games. Sweat, spit and other bodily fluids are hard to control when on the football field, volleyball/basketball court, etc. 3) This might be the perfect time for the Kansas school system to recreate and reorganize the school year. Maybe the 10- month school year should run mid-February through mid-November. With break being during the winter months. Spring break would actually be considered summer break the week of fourth of July.
7/21/2020 16:01:32	Jami	Lane		Lenexa	Our kids need school. They haven't been able to adequately learn or socialize in 6 MONTHS! The long term affects that this will have on our children, could be irreversible. They're already behind, losing a whole 9 weeks last year. Please, do the right thing, and let our kids go to school!!!
7/21/2020 16:01:48	Briana	Stephenson	My family and work for	Sharon,Ks	Please leave this decision up to the districts. There is not and never has been a "one-size fits all" solution. It is unfair to rural counties and districts that have had little to no cases in the past 5 months to follow the same strict mandates as heavier populated areas. We have been preparing and are ready to take extra precautions to start school and sports on time and face to face. The kids so badly need to have social interaction for their well being and development.
7/21/2020 16:01:49	Ryan	Hickel	District 233	Olathe	My oldest son attends Meadow Lane elementary. I have some concerns that I would like you to know. Please do not support the governors request to delay schools. Both my wife and I are considered essential workers and have full-time positions. Having to extend care for my child when we already pay taxes to support him going to school is a financial burden...I guess my question to you is will the state offer a tax relief for the additional costs working parents will have making these arrangements? If nurses are essential and still expected to go to work to take care of Covid patients, then our teachers are essential to teach and educate are healthy children. I respect the fact that the district has given us an option for the in-person and the at- home or the hybrid option but please let us have that option and don't delay school for my child. My fear is that this delay will continue. Brooks gets so much more than just education. His emotional and his social health depend on that interaction that he has with his teachers and his friends. He'll be in 2nd grade and is ready to accelerate his learning, not delay it. As your constituent please DO NOT SUPPORT THE GOVERNOR's request to delay schools. I respect your position, I hope you respect my stance.
7/21/2020 16:02:08	Kerri	Burr		BEL AIRE	I believe schools should only be open for children who literally have no other option or who do not have a safe environment, food, or resources to school at home. Or face to face schooling should be delayed until January, and online only this fall.

7/21/2020 16:02:09	Kendra	Robinson		Colby	I do not like the situation this world is in. Unfortunately COVID does not care about my opinion! Delaying the school year breaks my heart, but again it isnt about a full time working single mom scrambling to figure out places for kids. If the Board of Education feels this is what is best for the safety of the Educators and children then I support that decision whether or not I agree 100%. I think COVID is here and a reality we have to face. While my workplace remains shut down to visitors I can see the damage it has caused many elderly people and I hope and pray holding off on school is not going to have the same effect on the children. The children already faced challenges they were not prepared for the end of last school year. With that being said, I also think expecting children to wear a mask all day at school is not going to work. It's one more thing to distract them, for them to get scolded for and it's going to put way more stress on the educators causing a quick burn out rate. COVID has made everything a "double edge sword" so to speak, so as a parent it is my job to support whatever the Board of Education see best.
7/21/2020 16:02:10	Christin	Nunnery		Hays	Our kids need to be back in school. Statistics prove this is no longer a pandemic and our kids are the least vulnerable! Let them get back to school and back to sports! My son struggled greatly with online, while my daughter thrived! It's time to get our kids back to school for their mental health
7/21/2020 16:02:12	Brett	Reichert	USD308	Hutchinson	All for the safety of the children and staff
7/21/2020 16:02:19	Jeremy	Peterson		Olathe	I think we need to open schools. I am a teacher and we need kids to be in school and things to get as close to normal as possible. If masks work at stopping the spread, why wouldn't we open things up? If they don't, why are we wearing them?
7/21/2020 16:02:20	Kathy	Terhune	Self	Rural Carbondale	All 4 of my grandsons live north of Topeka and attend Seaman school district. Last school year two attended elementary school and two younger ones the learning center, old Lyman. I have seen a significant change in their behavior because of the isolation and it's not on a positive way. I know this virus is horrible and I get the fear. But we have to push forward. Masks only prevent the spread, we deal with flu and the risk everyday when we get in the car! How many children die in car accidents a school season? More than flu and this age group is not the one at most risk. These is more risk to their mental and emotional health by isolation. These numbers are blown out of proportion in some States, therefore, increasing the fear in parents. We need to open, the only way we can beat this is with herd immunity. Please use caution but don't force our children to abide by a law that is unreasonable. They are having problems processing everything. Let's give them something to look forward to. I have lost a brother in law age 70 and 2 very dear friends 80 and 82. These people did everything right, they were locked down but because they had health issues to treat this horrendous virus took their life. I'm just not going to live my life in fear and I don't want that same fear to affect my grandchildren. Thank you for your time and consideration.
7/21/2020 16:02:23	Julie	Uebelein		Olathe	There was a time we used to value education in this state. Now it is nothing but a political object and it is absolute neglect to not have our children in school. It is foolish to believe that lower income children and single parent homes are not falling further behind with each missed school day. Show some courage and open the schools. Iowa is opening their schools. People crossed the plains of Kansas enduring great hardship in covered wagons not too long ago. Open the schools. People enter stores, coffee shops, gas stations, Targets, Walmart's and restaurants on a daily basis and our children cannot go to school. If teachers are afraid, let's find teachers that have courage to teach in a troubled time. The doctors, nurses, and hospital staff does it every day. Our military goes off and fights wars and yet our teachers cannot teach the most vulnerable in our state. It is sad how our state is dealing with this. Finally, I love the Chiefs. I do. But it is seems wrong they get to start back up. They will travel across the country playing football sweating and breathing on one another and our children in Kansas cannot attend school. NFL football families will live their lives and not be in quarantine but our kids cannot be in school. Makes no sense at all. Sincerely.
7/21/2020 16:02:26	Rhonda	Winchel	Olathe	Olathe	I would prefer my high school student start at normal time.Kids are losing out on essential skills and interactions. What happens to the kids that rely on socializing with friends because they don't have Internet or phones people are becoming isolated and an increase in mental health issues by isolating people.

7/21/2020 16:02:30	Jennifer	Appelhanz		Topeka	Please do not let Governor Kelly dictate our kids. She has already created enough trauma by shutting down schools unnecessarily. Please do the right thing and open our schools as normally scheduled. School is a VERY important time for development for our kids that is getting squashed by our Governor. It will already take along time to recover what has been lost. Let's not make it worse by prolonging it.
7/21/2020 16:02:31	marian	riekenberg	usd443	Dodge city	In a big district I feel we could benefit from a later start but feel like smaller districts can start as scheduled .
7/21/2020 16:02:36	Ashley	Stone	Parent	Derby	School needs to be reopened on the scheduled start date of August 12th. Parents are NOT trained educators and children are already behind from missing the last two months of school last year. The "online zoom education" implemented for April and May was a joke. Twice a week, 20 minute meetings for our 8 year olds to jump around and say hello to friends is NOT an educational tool. School is where children gain valuable social skills and where many learning disabilities are found and fixed. For many parents who have to continue to work, or who cannot afford an at home internet connection, homeschooling is not a viable option. Closing, postponing or forced homeschooling is denying our students the privilege of a decent education and there is no call for that.
7/21/2020 16:02:37	Megan	Law		Hutchinson	Yes! Please delay the start of Kansas schools to keep teachers and students safe! Infection numbers are at an all time high in Kansas. Now is not the time to go back!
7/21/2020 16:02:38	Nicholas	Myers	Self	Lawrence	I understand the need to proceed with caution when it comes to large schools with hundreds of students. However, there are schools in this state that have far fewer students that have the ability to operate. Should the Board decide to uphold the order, I would like to see an exemption for schools under a certain enrollment. Kansas is currently allowing athletic camps to go on with groups of 25. If a school has the ability to safely teach small groups of students, that school should be allowed to open. There should NOT be a blanket order for ALL schools. The number of students should be taken into consideration.
7/21/2020 16:02:42	Danielle	Dillard	JC Harmon High School	Overland Park, KS	Please do not reopen our schools too early! This community needs to keep its students, teachers, faculty, and family members safe.
7/21/2020 16:02:44	Jessica	Carlisle	Lakin USD 215 parent	Lakin	We need not forget those of us that live in a rural settings in which social distancing can be done more easily within the classroom. I believe my child's largest class size was 13 while others were 5. Also, school is a safe haven for some students from physical, verbal and sexual abuse and the only meal some children will have for the day. Why wait to start after another holiday weekend. It doesn't change what's going on. As an RN who has worked frontline believe we should get school going ASAP.
7/21/2020 16:02:45	Madeleine	Lowe	Wichita public schools	Wichita	Please delay the start of the school year. This virus is not under control. As an educator and a parent I feel that safety should be top priority and NO lives should be lost from attending school in the middle of a pandemic hotspot!
7/21/2020 16:02:47	Robyn	Fields	Family	Leawood	This school debate is not based on science. Have school in person. Stop interfering. Kids don't transfer this, adults do, and kids are not at risk. Teachers can be protected with masks.
7/21/2020 16:02:49	Christina	Kunz	Kansas School Nurses	Gardner	Good afternoon!! I have been a public school nurse in Johnson County for the last 10 years. It is my utmost priority to do anything possible to protect the safety of students and staff. With positive COVID cases trending to their highest yet in the state of Kansas while still on "summer break" from school, I am alarmingly concerned as to how these numbers will look when we put groups of hundreds to thousands of people of all ages in one building for 8 hours a day x 5 days a week. Our average elementary classroom normally has 19-26 students, with a lead teacher and often other support staff such as paras and aides present. I support the guidelines set forth by Governor Kelly as a starting point of interventions to make attempts in returning to school. In order to make this feasible, we need time to plan, order supplies, rearrange rooms, create new spaces of isolation away from others for those exhibiting signs of COVID, and make sure all of these new processes are in place BEFORE we open school buildings. Therefore, I respectful request that the state of Kansas accept the opportunity outlined by Governor Kelly to push back the start of any in-person schooling until after Labor Day. Thank you for your time and attention to this matter!
7/21/2020 16:02:49	Dana	Ford	parent	SHAWNEE	I would encourage districts to decide what is best for individual districts instead of the state as a whole. If schools are not ready to open safely at this time, I would encourage them to open virtually and hopefully work towards in person classes. There is no reason to delay the start of school. Private schools are not delaying and had actual classes last spring. Students in the public school system are already behind those in private schools.

7/21/2020 16:03:00	Allen	Childers	Paraprofessional at USI	Pittsburg	I feel that the delay will allow our school districts adequate time to prepare and train our teaching & staff for the safety measures needed to hold a school session. While I feel an in school session is woefully ignorant to the science surrounding this pandemic. We all know that the school environment with safety measures needed to insure the health of both staff and students is not conducive to learning. Thank you for listening.
7/21/2020 16:03:08	Kari	Moore Larson	parent of private school	Lenexa	I am a parent of several school age children. Please do not pass a sweeping resolution to delay reopening of all Kansas K-12 schools. I think we can all agree that schools need to open as soon as is safely possible. I whole-heartedly agree that schools should have a plan and supplies in order to accomplish this before opening. However, a "one size fits all" approach is not needed. For instance- schools conducting online classes, small private schools, and districts where the number of COVID cases are low may be able to start sooner and still abide by the same safety guidelines as larger districts (who may need more time to get started). School administrators should have the freedom to start when it is safe for them to do so. Pass all the guidelines and benchmarks a school must reach in order to start that you want, but let them start when they have reached these. To make a sweeping resolution that affects all Kansas students is to deprive some of them of up to 2-3 weeks of school that they could safely attend. Please do not pass this executive order. Sincerely, Kari Moore Larson
7/21/2020 16:03:09	Clarie	Holland	Myself	Bonner Springs	Please start school on time. Kids need to be learning. Do not hold our kids out of school to fit some bogus agenda that they cannot understand. On line is really not a substitute for in person instruction nor is it viable for all students. Kansas students have missed so much already please let them back in school on time without a bunch of ridiculous restrictions.
7/21/2020 16:03:14	Jean	Janner	Myself	Olathe	I urge you to vote AGAINST delaying the start of school. 3 weeks' delay may not sound like much, but having a target start date on the calendar and honoring it feels like a victory. Schools have been preparing for months. Give administrators/teachers/parents credit in their ability to plan wisely and responsibly.
7/21/2020 16:03:19	Lawna	Kurtyka		Wichita	I am a teacher and I approve the delay of school until September 9, but beyond that, I'm ready to return to my classroom.
7/21/2020 16:03:26	Baylee	Crahan		Pleasanton	Normally postponing school until after labor day I feel would be no big deal, but these kids have already had an extended summer and are already in jeopardy of losing a lot of the information they learned last year. I am 100% for opening the schools as originally planned and with only the ABSOLUTELY NECESSARY precautions. To me that means NO MASK unless in a common hallway with a bunch of kids. That means eating lunch with your classmates and having recess. Please do not punish our kids because the majority of the state did not abide by the governors mask mandate.
7/21/2020 16:03:54	Emily	Hill	Kansas City Christian sc	Kansas City	I believe it is best for the children's academic, physical, and emotional, and social health and development to return to school in August.
7/21/2020 16:04:06	Cindy	Riddell		Shawnee	I would like for my child to attend school IN PERSON. They need to open schools and get these children back in touch with teachers and peers. With the proper safety mandates this should be done. Children are allowed to attend daycare and summer camps without major outbreaks. They should then be allowed to happen in the schools as well. Children's Mercy Hospital is also advocating that it is in children's best interest to be in school. <a href="https://www.kctv5.com/school_authority/children-s-mercy-hospital-experts-say-getting-local-kids-back-to-school-in-person-is/article_0074b1a2-caf3-11ea-8aed-abd021eb49ad.html">https://www.kctv5.com/school_authority/children-s-mercy-hospital-experts-say-getting-local-kids-back-to-school-in-person-is/article_0074b1a2-caf3-11ea-8aed-abd021eb49ad.html</a> These children need to get back to some normalcy and should be allowed to return to the classroom. Our tax dollars pay for these schools and teachers and they need to provide our children with a quality education. Please allow schools to open in person.

					<p>I believe schools need to open with precautions. Teachers, individual schools, and parents need the autonomy to think outside the box to solve safety measure challenges. (Sack lunches only [if on school lunch program-schools gives cold lunch only] no bus route, limit days, extend hours [to help with drop off/pick up] increased outside time, tape on the gym floor, created workbooks instead of paperback books to share, ect).</p> <p>If offices are opening, outpatient elective medical care is being provided, and restaurants are open, there is no reason schools shouldn't be open as well. There can't be different rules for people all living in the same home-that doesn't make sense. If parents can go to work, kids can go to school.</p> <p>As a medical professional I understand the challenges. I have worked this entire pandemic as an RN. But there are always risks-it's about managing the risks to the best of our ability.</p> <p>We all know the risks of opening schools. But we haven't seen discussions about the risks of not.</p> <p>Risks to not opening schools:  -neglected social/emotional needs  -childcare/dangerous isolation for elementary aged children? Essential working families have to do something with kids during the daytime. It's a lose lose situation.  -parents as teachers. Are children learning what they should and how does common core play in? Parents were not taught the same way. The sad truth is some parents won't teach in home.  -increased screen time. A HUGE problem.  -children have no practice or instruction of how to "do" independent learning. It can be difficult for adults, online classes-but we make it a sudden requirement for children?</p> <p>Transparency and common sense will be essential.</p>
7/21/2020 16:04:13	Emily	Rudnitsky	Personal Family	Olathe	School needs to open-with smart health precautions.
7/21/2020 16:04:16	Regan	Rieder		Overland Park	We want the schools opening in August, not a delayed start.
7/21/2020 16:04:16	Amber	Stevens	Schools	Junction City	Waiting till after Labor Day is a much better idea. Furthermore the amount of seat time for the year should be lessened.
7/21/2020 16:04:20	Elizabeth	Astrab	Myself	Lawrence	Please follow the guidelines set by Governor Kelly in regards to delaying the start of school until after Labor Day.
7/21/2020 16:04:21	Tresa	McAlhaney	MHED Substitute teacher	Lawrence, KS	I am very worried about our staff supply collapsing under Covid-19 outbreaks. Schools across the state struggled to staff adequately, and this will only add to the strain. It is important to protect the staff and families of people who work in our schools. Any precautions we can take, we should. Please support the governor's late start and safety precaution mandates.

					<p>As an HVAC engineer, I have been working with all my colleagues inside my company, equipment manufacturers, and professional engineering societies such as ASHRAE to come up with the best solutions we can. We are doing what we can from an industry perspective to improve safety. There are good measures which can be taken to improve safety within schools. We can improve air change rates through ventilation. We can improve filtration effectiveness. We can incorporate technologies such as electrostatic filtration, bi-polar ionization, UV treatment, particulate acceleration control technology, photo catalytic oxidation, and more technologies which are in expedited development. While there is evidence that COVID-19 can be transmitted through the air, this is only one means of transmission - and likely not the primary means of transmission. There are studies being performed to validate the impact that some technologies may have on surface disinfection, though this data is very preliminary and generally not vetted by 3rd parties.</p> <p>Hopefully many schools have been able to upgrade their filter media, increase spacing in classrooms &amp; cafeterias, upgrade to automatic doors &amp; touchless restroom fixtures, and train staff for administrative/behavioral controls to limit transmission. Some of the more impactful technologies are expensive and will take time to validate and implement. I am concerned that 3 weeks may not be enough time to have an impact in this regard.</p> <p>While it would no doubt be safer if schools could prepare for a semester of remote teaching, I understand how even 3 weeks may be politically challenging. One clear benefit I see in delaying the start date for another few weeks is that it may at least allow for cooler outdoor temperatures that may enable air handling units to run with higher % of outside air and maybe even allow teachers to open windows in their classrooms. This should be encouraged where feasible.</p>
7/21/2020 16:04:22	John	Randtke	I represent only myself,	Eudora	<p><del>we cannot in good conscience reopen schools until we have adequate resources to make every school safe for teachers and students. It is still too dangerous, and we do not yet have the resources or space to make it safe. Reopening schools would put students and teachers in danger, as well as their families, the community, and our state.</del></p>
7/21/2020 16:04:26	Susan	Woodbury		Prairie Village	<p>Pediatricians advise that children should only be allowed to return to school if measures to keep students safe have been put in place. With recent news of several cases of healthy children with no preexisting conditions becoming very ill from COVID 19, some with possible long term heart and lung and other conditions, it is clear that children are vulnerable to COVID 19.</p> <p>Many recent outbreaks in our community have involved teenagers, that then led to others in the community becoming ill.</p> <p>At a Montessori daycare/school where my nephew attends, 3 teachers who had been practicing social distancing became ill with COVID 19, which led to the school closing for two weeks while others were tested. Imagine that occurring times every school in the school district and state.</p> <p>Many local school districts don't have the necessary resources or capacity for even very basic preventive measures of physical distancing and limiting contact between students.</p> <p>Other countries have been able to reopen schools because their governments invested in personal protective equipment, health and safety measures for schools, as well as adequate nationwide testing for COVID 19. Our country has yet to expend the resources to do that to the degree necessary to reopen.</p> <p>With regard to remote learning, it has to be done in a way that is equitable to all students. Again, financial resources have to be made available in order to achieve it, but that seems more feasible at this time than reopening underprepared schools.</p>
7/21/2020 16:04:51	Olga	Silverman	Concerned educator and	Salina	<p>Please follow the governor's proposal to postpone the opening of schools. As an educator, we need time to figure out what is the best approach to keep everyone safe.</p>

7/21/2020 16:04:55	Jeasica	Kistler	Colby public schools	Colby	I would like to see school start in September so teachers have a chance to prepare for what is to come.
7/21/2020 16:04:57	Wendy	Lunsford-Baruth	Parent/Instructional Coa	Topeka	To Whom It May Concern: I am writing to ask for you to vote yes to following Gov. Kelly's mandate to delay school until after Labor Day. While I understand that some are not in favor of this, as a parent and an instructional coach at an elementary school, I truly believe this is the best choice for our students, staff, and families. Covid is a virus that we know spreads easily, and schools tend to struggle already with colds and influenza spreading. I cannot imagine what Covid will be like in schools. I worry about my own children, my school kids, my colleagues, and all of our families as our numbers continue to rise. While it seems many will be okay if they get Covid, we do not know the long-term effects of this virus. Sitting in committee meetings, via Zoom, I have read our plan. It includes forming a crisis plan for if and when a student, teacher, or family members passes from Covid. This is heart-wrenching, and honestly scary. I do not want to live in fear. I miss schools, the hustle and bustle and excitement of a new year. But this year, we need to be more calculated and smart. This year, we need time to gather supplies to keep everyone safe. I appreciate your time and consideration, as do my children, husband, students, school community and colleagues.
7/21/2020 16:05:11	Lauren	Siegel		Lenexa	I support the delayed reopening of schools. It will allow districts to better plan their safety measures, obtain supplies, train staff, and formulate a plan when positive cases appear in the school.
7/21/2020 16:05:12	Amanda	Ruth	Scott City Schools	Scott City	No delay for school start. No need of all precautions stay the same.
7/21/2020 16:05:16	Nick	Helton		Cimarron	Unfortunately this needs to be addressed in a timely manner. The mental well being of our children needs to be as large of a concern as their physical well-being. It's either time to get our children back in a school session or not at all so we can begin educating our own children. Masks are most likely going to be distraction in the public school setting more than they will be protection. Remembering this virus has a 99.98% survival rate. I do know that school back in session will put some children with underlying conditions at risk. There should be plans put into place to protect those children. They do matter. Children have more or less been out of school since March 2020. Pushing the return to school past Labor Day puts these children without formal education for six months. Yes we did have to educate our children at home for the remainder of the spring 2020 session. I'm all for our kids being safe in the re-entry into the fall 2020 school year. Mask or no mask it's time to get the ball rolling.
7/21/2020 16:05:16	Kristen	Lettow	My family	Leawood	Please open up schools. Our children need to learn and interact with others. All online is not a healthy mental option for children. We have risks of getting sick every day in various ways. It's not your job to mitigate every risk. We need to live our lives and stop being fearful!
7/21/2020 16:05:16	Abigail	Rieder		Overland Park	We want schools to open in August, not a delayed start.
7/21/2020 16:05:24	Julie	Hoag	none	arkansas city	I think school should not open until end of September.
7/21/2020 16:05:28	Courtney	Nichols		Ottawa	As a teacher and as a parent, I urge you to vote in favor of Governor Kelly's Executive Order 20-58.  Each school district needs time to implement the Navigating Change document. If you truly care about the health, safety, and well-being of students then you will support Gov. Kelly and approve this executive order.  Teachers everywhere are scared to return to school. We will be exposed to this virus hundreds of times for 8 hours each day. This is about keeping our students, staff, families, and communities safe, no matter where in the state they teach.  There is simply too much we don't know about how this will affect children in large groups. The amount of misinformation out there is incredible--please listen to state medical officials and health officers.
7/21/2020 16:05:31	Rebecca	Cumberland	Christ Prep Academy	Spring Hill	We need this time to prepare for what is coming. One life lost due to rushing school is one life too many.  Please delay the start of school.
7/21/2020 16:05:33	Chris	Riddell		Shawnee	I want my daughter back in school. There is no evidence that children are at such great risk that they should not be in school and receiving a quality education. My tax dollars pay for the public schools and I want my daughter back in school.

7/21/2020 16:05:41	Vicki	Thornton		Cottonwood Falls	Please make science and safety for school personnel and students the basis for decisions, remembering that our schools are built for social interaction rather than distancing. I know economic issues must be considered but they must not take precedence. Teachers work hard and this can only make it more complicated. Don't leave it on their shoulders, please.
7/21/2020 16:05:42	Dayna	Richardson	Learning Forward Kansas	Hutchinson	<p>I'm writing to ask for your SUPPORT of Gov Kelly's Executive Order of delaying the beginning of school until AFTER Labor Day. I had not thought of this option until she made the announcement last week. WOW...a great solution for everyone! I heard a sigh of relief across our state.</p> <p>Instead of each district having to struggle with the decision of when to open school, the governor's executive order gives district leaders the TIME and ENERGY to actually be prepared to open their schools: shared leadership (collective efficacy) and collaboration with district educators, parents, and the community. Yes, districts can now plan for a safe reopening during this "gift of time," plus ordering required resources, etc.</p> <p>We know that change is a PROCESS. The upcoming weeks/months is a process, not an event, and we know that it takes TIME and SKILLS to implement any change, especially one of this magnitude.</p> <p>The journey (including professional learning) of change is best done together, allowing for planning and implementing of the changes for whatever model each district selects. #StrongerTogether! Pretty Prairie and Pittsburg will be different. Medicine Lodge and McPherson will be different. Wichita and WaKeeney will be different. Liberal and Lawrence will be different. (Context) Each journey will be unique, always focusing on student success.</p> <p>Again, I'm hoping you will support our districts and educators with this GIFT of TIME.</p>
7/21/2020 16:05:44	Nancy	Nettles	Maranatha Christian Academy	Overland Park, Kansas	We are in favor of schools opening in August-not a delayed start.
7/21/2020 16:05:51	Virginia	Darling	Public-a grandmother	Pittsburg	I definitely support delaying the school year and having online school only for the first few months as long as Covid numbers are increasing or constant. I would support students going a half day as long as social distancing and masks / or shields were required by All children. I understand children need to be together but doing it gradually instead of all at once might be a safer option. I basically support Gov. Kelly's plan but I would include social distancing as much as possible. Elementary can wear masks/shields too. In parts of Kansas where there are no Covid cases they could go on as normal-just not for those areas who do. Overall, I think there will need to be many adjustments and changes in our normal schedule and school business this year. Think out of the box. Be as accommodating as possible to everyone even if they are on opposite ends of the spectrum. Both sides have good points. Don't put the security and safety of our teachers and children on the political spectrum. There is some panic on both sides. Do your best to ease the situation. Thank you.
7/21/2020 16:06:07	Jackie	Rieder		Overland Park	We want schools to open in August, not a delayed start.
7/21/2020 16:06:14	Margie	Busenitz		Newton, KS	Please reopen schools on time without masks
7/21/2020 16:06:24	Mikeshia	Bradner	Educators	Kansas City	I think delaying the opening of schools ,until after Labor Day, is a good idea. It will allow districts to build a more robust plan for learning in ways other than face to face. That time will also give districts the opportunity to really chart a course of action to keep students AND staff healthy and safe during this time. Being in a field that looks at test scores to guide instruction, we cannot ignore the data being presented around COVID-19. We have to use that data to guide our reopening plans. We need time to plan for SAFE, in person learning. If 6 feet and mask wearing is needed for the public, the that shouldn't be ignored when talking about students and staff returning to in person instruction. Thank you.
7/21/2020 16:06:49	Heather	Grann		Spring Hill	I think schools should open with no mask requirements.

7/21/2020 16:06:52	Laura	Wilson		Spring Hill	<p>Hello,</p> <p>I currently work in the Kansas Public Schools. I am writing to ask you to vote "Yes" to approve the Governor's order to delay school. Schools need the additional time to gather supplies, get a finalized plan in place, train staff, and give staff adequate time to make lesson plans for the method of teaching they may be asked to provide. In addition, with Kansas's numbers steadily increasing, our communities need time to flatten the curve again and get control of the rising COVID cases so that students and staff can attend school safely. Approximately a month ago, I filled out my district survey preference for teaching in-person. However, a lot has changed in a month, and the safety of the students and staff is of greater concern to me now due to the upward trajectory of cases. Please allow for the additional time to make sure that the proper precautions are in place and to provide more time to see if we are able to decrease the numbers to more safely return to school. Thank you for your consideration in this manner.</p>
7/21/2020 16:07:00	Laura	Tubbert	parent and teacher	Westwood	I am in favor of extending the start of the school year so that the time is used to prepare for the necessary changes that need to be implemented to keep everyone safe. With cases in our county on the rise I would hope that this time also allows for our numbers to begin to fall.
7/21/2020 16:07:01	Kenan	Stamatis	We the people	Overland park	There is no need to delay schools as the virus is isn't deadly to most students.
7/21/2020 16:07:06	Shannon	Graham	My children	Lawrence	<p>Please delay the opening of schools until after Labor Day. We need to give schools the chance to have a solid plan in place, and teachers the time to prepare for all of the extra responsibilities that will be imposed on them to keep our kids, themselves and the rest of our community safe.</p> <p>to the KBOE teachersmp,</p>
7/21/2020 16:07:09	Tom	Herzog	Parent - Blue Valley Hig	Stilwell	<p>First and foremost, our thanks for the roles you serve to ensure the best for our students and community. For me, Public Education is where equality, equity and inclusivity must happen. If we are going to address the challenges in our country today, we must ensure its viability.</p> <p>Public Education is a necessity for a thriving community to function; one of the reasons why so many of us advocate and support, through collaboration we can find safe and pragmatic solutions which adapt as needs arise.</p> <p>While I support a start date of September 8th, I believe it to be draconian to cancel all activities through that date. Based on what we know and current data these activities can continue and start as a means of phasing in a back to school model - providing valuable insight into practices and results. Schools have already been doing this for the last several weeks, showing that it can work, providing valuable insight as well.</p> <p>What is most important is that the KBOE, KSHAA, and Local School Districts work together to identify the best path forward for each specific region. Local leadership provides essential perspective to help shape the path to address both challenge and opportunity. I believe the Governor means well, agreeing with the first mandate around safety protocols for schools, but to shutter everything until the 7th is unnecessary at this point in time.</p> <p>We are left with no choice but to appeal for a NO VOTE for the Governors Executive Order for this start date, we do implore for a collaborative approach to find a solution that both adapts and aligns in a phased approach.</p> <p>Other examples for us to learn and model from include:</p> <p>Iowa: <a href="https://www.iahsaa.org/covid-19/">https://www.iahsaa.org/covid-19/</a></p> <p>Nebraska: <a href="https://nsaahome.org/nsaa-fall-sports-announcement/">https://nsaahome.org/nsaa-fall-sports-announcement/</a></p>
7/21/2020 16:07:18	Jaime	Vanasse	Walnut Grove Elementa	Overland Park, Kansas	We need remote learning options. Delaying start date is a great idea.

7/21/2020 16:07:20	S	H	Usd 109	Belleville	Please delay school. I work at the school and do not feel safe. No one takes the virus seriously here. I can't bring Covid home to my husband who has other health problems and I don't want young teachers bringing it home to their children. What about pregnant teachers? Children are resilient and will be fine. There are still too many unknowns to open schools and risk lives.
7/21/2020 16:07:22	Stacie	Carroll		Geary	I feel like this is wrong. What happened to creating herd immunity? That seems to be forgotten. I believe Dr. Mark McDonald, a psychologist specializing in children and at-risk youth, summed it up best. "The problem is adults are afraid. That fear is not good for anyone, especially our children. As parents, we will face many moments of anxiety, first day of kindergarten, first day of camp, the first day of college. We may want to protect them from the world, which indeed can be a frightening place. But let's be clear, when we do that, we are not really protecting our children. We are only attempting to manage our own anxiety, and we do that at the their expense. We are acting as negligent parents and educators. We are actually harming and failing them. We must agree to make decisions in the best interest of the children. If we do not - if paralyzed by fear, we continue to act purely out of self-interest - we will ensure an entire generation of traumatized young adults, consigned to perpetual adolescence and residing in their parents' garages, unable to move through life with independence, courage, and confidence. They deserve better - we owe it to them." Think about it, we do not close the schools down for the flu. Our past experience with remote learning was a disaster. Engagement was difficult and instruction time limited. Our kids need to be back in the classroom with peers. Please reconsider. Thank you.
7/21/2020 16:07:23	Diana	Wieland		Colby	With the amount of operational procedures, professional learning to include remote delivery and collaborative planning that all teachers need to be an active part, I believe that the start date after Labor Day would be beneficial for staff as well as improve the delivery and rigor for our students. Thanks for tackling this hard decision.
7/21/2020 16:07:28	Leah	Youngren	Lawrence Public School	Lawrence	I support the executive order, Governor Kelly
7/21/2020 16:07:30	Kelly	richardson	Patent and teachers	pratt	Please allow our communities to take their own precautions to this virus for our area and let our children get back to the classroom!!
7/21/2020 16:07:31	John	Mullen		Overland Park	They need to go back to school. Please consider the guidance from the American Academy of Pediatrics.  "the AAP strongly advocates that all policy considerations for the coming school year should start with a goal of having students physically present in school. The importance of in-person learning is well-documented, and there is already evidence of the negative impacts on children because of school closures in the spring of 2020." <a href="https://services.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/clinical-guidance/covid-19-planning-considerations-return-to-in-person-education-in-schools/">https://services.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/clinical-guidance/covid-19-planning-considerations-return-to-in-person-education-in-schools/</a>  I can understand parents and educators who have health concerns starting back up but what is really going to be the difference of a couple weeks. I understood there was a distance learning option that could be selected for these individuals. I can go to restaurants, stores and bars but kids can't go back to school? We have had 4 months to figure this out and the solution is let's just wait 1 more month?
7/21/2020 16:07:50	Nathan	Graham	SMSD	Prairie Village	Consider active shooter scenarios. What are teachers and students supposed to do? One protocol instructs teachers and students to close doors and windows, and huddle together, sometimes even in closets. The threat of COVID-19 means we have doors and windows open, with 6' between all of us. So which is it? What are we to choose in those cases? How are we supposed to prepare our children at home? And are teachers receiving hazard pay throughout all of this?

7/21/2020 16:07:59	Anne	Ogle-Puckett	Parent in USD 315	Colby	Parents should be the ones to decide what's best for their own children, not the Governor. The Governor should not be able to mandate a "one size fits all" solution for all schools across the State of KS. This should be left up to each individual school district in how they see fit to handle this situation. School needs to start on time. It was detrimental to the kid's learning & social well being, shutting down the schools like she did back in March. Daycare's have not closed down during all of this and have we heard of any issues with any daycare's in the State? No! I also believe that the proposed mask policy that you, as the Board of Education, came up with should be implemented b/c making young children wear masks all day long will not be healthy for them and will be a huge distraction in the classroom. Honestly, it should be left up to the child or the child's parents if they were a mask. And this should go for teacher's, staff & visitors as well. I am trusting that you, as the Board of Education, will make the right decision and not allow the Governor to dictate how things will go for the whole State of KS. Thank you for your time, Anne Ogle-Puckett
7/21/2020 16:08:01	Mariana	Hughes		Wichita	We should please delay the start of school year. We need students and teachers alike to be fully healthy! I also wish to have online schooling through the districts. I work in the school and I don't want myself or my child to bring back the virus to our families. The way school will have to be handled to be safe is no way for a child to learn. If school is going to be different, at least let the kids be home and comfortable.
7/21/2020 16:08:06	Marley Kay	Lowe	K-State Social Justice A	Kansas City/Manhattan	Hi there. As a college student who attends school in a different county than I reside in, I am especially concerned about transmission of the virus. Further, we know social behaviors (especially for the younger demographic) can exacerbate the already rising rates. With the opening of schools for face to face learning I am petrified for myself, my family members, my staff, and coaches who are being forced to take on a risk that could be eliminated by staying at home. I also have a little sister who attends public high school and I am very worried about her safety. While I completely understand the want/need to teach in person for the best education, however we have to recognize the risk we are asking teachers, staff, students, families, and communities at large to take on (some whom may not be able to). I am strongly in favor of the current executive order and hope it goes even further to include college students safety. And to those who say it is a violation of their "freedom", I ask where was this energy when pervious governors suppressed voting rights? Further, your right to freedom can not infringe upon others rights to life. I'd rather follow orders so we can live to exercise our right to freedom another day than have myself or my sister die because we were trying to get an education. The number of deaths we should accept is zero. Thank you Governor Kelly for your commitment to our safety.
7/21/2020 16:08:20	Dusty	Snethen	Parent	Topeka Kansas	The delay is the only way to be sure schools are equipped and trained to deal with the logistics of running classes, schools, in a way that provides quality learning. I don't want my child to bring home COVID because the board felt the need to rush back to school. I also don't want remote learning taking place in a haphazard fashion that wastes my child's time. Give them time to get things prepared.
7/21/2020 16:08:37	Angie	Turnbow	Shawnee Heights Footba	Shawnee County	We have been safely weight lifting and practicing all summer and would prefer to be allowed to continue especially when recreational sports are all being allowed to continue.
7/21/2020 16:08:51	Jessica	Barrow		Shawnee	I believe schools should be opened on time and that children 10 and under should not be required to wear masks. Furthermore, private schools should not be under this executive order as they are prepared to safely open on time and usually do not have many students per classroom. Please do not uphold this order for our schools.

7/21/2020 16:08:53	Austin	Weiner	Student	Gardner	As a student in the Gardener Edgerton school district I am very concerned about my education that will happen if we do not start school in the building on time. I have worked really hard to ensure that my academics are on point and have stayed up many hours in the night studying so I could get good grades that will help me get into college. Last year I was in Chemistry and Algebra II. Having to go online with voluntary school did not help me prepare for college or standardized testing. The curriculum was horrible and we learned no new content. I am scheduled to take College Algebra this year and feel behind. Online or a late start will only make it worse. I have a very high anxiety now about how college will go for me and if I will be able to get the necessary scores to get into my dream school. I am starting to feel hopeless and that all my hard work and sacrifice throughout high school is going down the drain. I have severe dyslexia and have had to work very hard to be a successful student. I have earned a college scholarship for football and now do not know if I can graduate early because school may start late. I have taken two years of dimmer school, skipped social gatherings and made tremendous personal sacrifices to get to where I am. It now all looks hopeless because after 5.5 months we may start school late and on top of it have no sports. I realize academics come first but three of my friends literally only pass classes so they can participate in extra curricular activities. Their home life is horrible and they have zero support system. They have the ability to get an athletic scholarship and this will change the trajectory of their lives. Our futures are not at stake because of COVID. They are at stake because of lack of opportunity and working toward positive goals that will help is become contributing citizens some day. Please send us back to school. We are ready to take life by the horns and get on with it. Please give us some hope and get us back to accomplishing our goals and dreams
7/21/2020 16:08:58	Diana	Vega	Free State High School /	Lawrence	The children should be going back to school during the normal time. Mortality rate among students is nil. Daycares and camps, including boys and girls club have remained open, virtually the entire time with no fatalities!!! First, school closures are creating “virtual dropouts.” Even those with access to computers who do check in are not learning in the same way. This will increase our country’s education gap and exacerbate racial and social inequalities — with impacts that will persist for years. Second, school closures impact kids’ health both with sedentary behavior and psychological repercussions. Third, a disproportionate burden of working from home is falling on women. I am a single mother for all intents and purpose, as my husband works/lives in another state. Kids are at lower risk from complications of covid-19, and basic risk-reduction control measures are working. We need to create a culture of health and safety, including wearing masks, hand washing, social distancing, staying home when sick, and clean indoor air environment. OUR SCHOOLS SHOULD REMAIN OPEN!!!!
7/21/2020 16:09:16	Susan	Panter	USD 237	Athol	School needs to start on time and be in person. Students have already lost valuable education time with the online classes the last 9 weeks of school.
7/21/2020 16:09:24	Chuck	Dehner		Prairie Village	I think Elizabeth Warren said it best,  “Forcing schools to reopen without providing them with the resources they need to do so safely is reckless, dangerous, and the last thing we should do.”

					<p>I am a concerned Kansas resident and a parent of a Blue Valley School district student in Overland Park, KS. I am frustrated upon learning about Governor Kelly's executive decision to delay school for the 2020-2021 school year.</p> <p>Many medical doctors, including Dr. Fauci and advisors from the American Academy of Pediatrics are saying it's okay for our students to go back to school. The Coronavirus has a 99.96% survival rate in the world according to the Centers for Disease Control and prevention. Taking proper safety precautions will help us get through the school year successfully.</p> <p>I hope that the Kansas state Board of Education will consider challenging this school delay executive decision order. This school delay will have kept students out of school for 6 months, including the summer. It is especially difficult for elementary students that thrive and grow from "in the classroom" learning environments. In addition, many students are missing out on music, arts, athletics and other extracurricular activities that are done in person.</p> <p>Moreover, I am a single parent who works 2 jobs and is a part-time caretaker for my aging mother. Adding another role as a homeschool teacher is very stressful. Although I enjoy helping my daughter with her school work, I am unable to teach her all of the academic subjects effectively.</p> <p>Thank you for taking the time to hear my concerns and thoughts regarding another school delay.</p> <p>Best regards, Stacy Johnson</p>
7/21/2020 16:09:28	Stacy	Johnson	Blue Valley School distr	OVERLAND PARK	
7/21/2020 16:09:34	Joel	Krum	Education	Olathe	Follow our elected governor's executive order to delay the start of schools and keep Kansan's safe!
7/21/2020 16:09:46	Kylie	Helmer	Holy Trinity School	Lenexa	I worry that the delay is going to postpone the school year. Also, there's already a chance that schools will go online after Thanksgiving through the flu season, so starting late will be detrimental. In my humble opinion, there is no higher risk by starting August 20 than there is September 9!
7/21/2020 16:09:48	Jess	Sholin	USD 383	Manhattan	I support Governor Kelly's executive order. Opening right now is not safe for our students or staff. We have to put our kids first. Pushing back the opening will allow staff additional time to train and be fully prepared to implement an online or hybrid platform as necessary.
7/21/2020 16:09:50	Alyson	Stewart	Educator	Topeka	Please consider voting in favor of Governor Kelly's orders to add a layer of protection for the children of Kansas. They are our future.
7/21/2020 16:10:01	Garrison	Stamatis	CPA Football	Overland Park	I just want whatever is best for all the students.
7/21/2020 16:10:05	Michelle	DeWeese		Topek	School should be able to start on time to those who want to attend, but sports should also be starting and should not be delayed if school gets delayed. My kids have played competitively all summer long, every single weekend and there have been no outbreaks. Kids are not the problem and they are the ones losing out on things they only get to do a few years in their lifetime and that is put on that school uniform and represent their school in a sport they love. Do not take that away from them because of the fear of this virus....let the kids play the sports they love!!!! They don't get this time back so don't be the reason they won't get that chance to be proud of what they do! We as parents are begging you to keep these kids active and doing what they love not only for the physical activity part of it but also for their mental well being!!!!
7/21/2020 16:10:08	Dallas	Froome		Salina	I am teacher. I am fine with school being delayed. I do not think schools and teachers are prepared and this allows time for preparation. Either way, school needs to be held in person for many different reasons. Myself and many others are itching to get back to work. The constant changing puts us on edge and causes stress. We need a sure plan so we can prepare accordingly.

7/21/2020 16:10:16	Lisa	Stallbaumer	Everything Grows With	Seneca	As a group home provider in Nemaha County, this decision makes little sense for our county. The number of cases is not a one size fits all. In Addition, we have been operating our daycare with 14 children and two adult care providers and two high school volunteers present every day since March. We were given little to no direction and have had to manage to continue to care for our children. It seems to me that schools should have been able to make some preparations for this and not need to have schools in all areas delayed. Thank you for making this difficult decision as I understand that there is plenty of opinions on the matter.
7/21/2020 16:10:21	Harry	Hester		Cherryvale	As a lifelong Kansan and registered Republican, I urge you to vote with the governor. This will allow time to sort things out and have a plan when and if this gets worse. This situation changes day to day as we gain more knowledge.  Also, as we face a shortage of workers from certified to classified in education, I know that anything less than a safe environment will add to this at all levels and across all job titles.  This crisis has been begging for leadership from the top of our government down and I believe Governor Kelly has provided just that. Please stand on the side of common sense and not succumb to politics.
7/21/2020 16:10:22	Asher	Weiner	Student	Gardner	As a student in the Gardener Edgerton school district I am very concerned about my education that will happen if we do not start school in the building on time. I have worked really hard to ensure that my academics are on point and have stayed up many hours in the night studying so I could get good grades that will help me get into college. If We do not start school on time I am concerned it will affect me on standardized testing and cause me not to do as well as kids from other states that will start school on time. If we go online I'm not sure that would help much either it is very hard to focus and asking questions directly to a teacher helps me as a student a lot. We have had since March to be prepared for school in August! Surely 5 months is an adequate amount of time. Our online school was a joke. It was not school and learning was not at a high level. Most of my friends didn't even login because it was voluntary. We are sad and discouraged. I need social interaction and goals to work toward. Many of my friends are becoming depressed and lazy. They don't even do anything all day. Our age group is more at risk for depression then COVID. Please give us some hope and get us back to accomplishing things and working at being successful citizens
7/21/2020 16:10:30	Elizabeth	OConnor	USD 260	Derby	I am a High School Teacher at USD 260. I do understand that children benefit from interacting with each other and that in-person classes generally are better for instruction. However, this pandemic is unprecedented and uncertain. Kansas and the country need leaders who will advocate for the health of all Kansans. That means supporting Governor Kelly's executive order to delay the opening of schools.  Allowing school to start in September will allow teachers to fully prepare for the challenges we face as educators. We need time to ensure our classroom our safe, that curriculum can be done at a safe distance and to collaborate with team members. Health and safety should be priority.  Kansas has been declared a red zone, Covid numbers are not decreasing, they're only increasing. Another reason to delay the school start date. Please stand with students and teachers and support Governor Kelly's EO.
7/21/2020 16:10:47	Kelli	Koberlein	Raintree Montessori Sch	Lawrence	Please allow private schools the opportunity to decide independently if we should delay the beginning of our school year with public schools. Since June 1st, we have operated successfully our elementary camp and childcare center with our health and safety protocols in place. We are ready and our parents are ready for students to get back to school. Thank you.
7/21/2020 16:10:49	Ronda	Langley	My kids	Rolla	I do not agree with Kelly's order. I don't have an issue with the delay start at all. My BIG issue is with the hitler protocols she has put in place. Masks, social distancing, hand sanitizer EVERY HOUR! Insane!!!! Please, please do not uphold this. Please. This is NOT a healthy environment for anyone. Kids or adults. It's conditioning. It's about compliance. That's it. Not a virus. The kids will be living normal outside of school anyway. This is not necessary and is overreach. Please strongly consider not enforcing this ridiculous order
7/21/2020 16:10:53	Jason	Marski	CPA	Overland Park	We need to start school on time

7/21/2020 16:10:54	Stephanie	Crittenden		Lenexa (Olathe School I	<p>We are not ready to resume in-person classes in August. Covid19 cases are increasing because we rushed to reopen Kansas and did it unsafely. Masks should have been mandatory earlier. Our best option is to start the school year with distance learning when the schools have a plan in place.</p> <p>We don't have accurate death rates, but if the rate is .05% for school age children and we have 490,000 students in Kansas, we would lose 24,500 students to Covid19 this year. The children would also pass the infection to their teachers, school staff, and older family members. How many people have to die before this is taken seriously?</p>
7/21/2020 16:10:58	Jodi	Gillespie		Quinter	<p>I am completely against my children wearing masks at school. If this will be required, we will be homeschooling our 6 school age children. I am way more concerned about the emotional ramifications on my children than I am about them getting Covid. I am also way more concerned about the effects of wearing a mask all day on their immune system. We have never worn masks, and I cannot even imagine breathing in your own germs and your own hot air for eight hours throughout the day. We will all eventually get exposed to Covid, we will either get or not, survive or not, it is up to God what the end result will be. Please, let's stop running, hit this head on and move on with our lives. Weakening our children's immune system's by wearing a mask is not going to help them one bit. Please let them go to school without any restrictions and be normal kids. Our children have been with other children all summer long at gatherings, at the pool, at each other's houses, I see nothing different about them going to school and being all together in a classroom, and I have absolutely no fear of them getting sick. Thank you.</p>
7/21/2020 16:11:14	Mackenzie	Spears		Hutchinson	<p>Please delay the start of school. As a band director I need more time to figure out how to best keep my students and self safe as we navigate this crazy year.</p>
7/21/2020 16:11:21	Jessica	Davenport		ToPeka	<p>Start school normal on august 13th. Back to normal No masks Kids have been thru enough they neex normalcy</p>
7/21/2020 16:11:24	Annie	Baldwin		Goddard	<p>This decision should be made at the local level...as should the mask mandate. Please vote down the late start order and let each district decide.</p>
7/21/2020 16:11:34	Duany	Ramos		Olathe	<p>I want the school to be delayed</p>

					<p>My name is Mark Skoglund. I live in Olathe, Kansas and am an assistant speech and debate coach at Olathe Northwest High School. My wife is a teacher, my brother is a teacher, and many of my friends are teachers. I grew up in Kansas schools and hope my newborn daughter will as well. I am writing to you today to urge you to uphold Governor Kelly's executive order, which would delay the start of schools in Kansas until at least Labor Day.</p> <p>I am sure that some people are writing to encourage you otherwise, citing "local control." I am often a proponent of local control, but this scenario poses the exact reason state government exists: without a consistent statewide policy, local control on health issues is meaningless. If Olathe closes and Blue Valley does not, Johnson County will continue to see a serious increase in cases, despite Olathe's attempt to protect the health and safety of its students, teachers, staff, and parents.</p> <p>Additionally, this issue has been problematically politicized. Health and safety decisions should be made considering only what is best for the health and safety of the impacted population – it absolutely should not be made with concern about political pressure. At the local level, political pressure is far more likely to decide this issue rather than simply making the right health and safety decision. The State Board of Education obviously does face political pressure at times, but you are far more protected from this pressure than local politicians, and you have the opportunity today to simply make the right decision.</p> <p>Cases continue to rise dramatically, and reopening schools too early would certainly cause increased spread. The CDC published an extensive study that indicated that children aged 10-18 spread COVID-19 just as easily as adults, even if they are presymptomatic or asymptomatic. (<a href="https://wwwnc.cdc.gov/eid/article/26/10/20-1315_article">https://wwwnc.cdc.gov/eid/article/26/10/20-1315_article</a>) Florida has 17,000 children who have tested positive for COVID-19. (<a href="https://couriernewsroom.com/2020/07/01/more-than-7000-children-in-florida-have-tested-positive-for-covid-19/">https://couriernewsroom.com/2020/07/01/more-than-7000-children-in-florida-have-tested-positive-for-covid-19/</a>). Each of those children lives with family who could be exposed. If schools were open, each of those children would regularly be around teachers, custodians, administrators, staff, bus drivers, and other students that they could easily spread the disease to.</p>
7/21/2020 16:11:35	Mark	Skoglund	n/a	Olathe	Some people argue that children are less likely to suffer severe complications or die as a result of a COVID-19
7/21/2020 16:11:46	Cami	Golden		Topeka	I am a single mom who works as a nurse and I'm wondering what I'm supposed to do with my kids when I work and my youngest is going to start kindergarten so I would have no daycare and now I am in a position where I need to find full-time daycare for not only one but two kids and also someone to tutor them. This is all just absurd that we are keeping kids out of schools when my youngest has been in daycare and my oldest has been at camp all summer and there have been no issues with Covid. Kids need social interaction and it's simply not okay to do this to them and also expect parents to home school or stay home when many don't have the financial means to do that! Please consider all the ways this is going to impact parents and kids, it's not just about a virus, we need to be exposed to the environment to keep our immune systems intact and this will have even worse consequences than the virus I'm afraid if we keep kids out of school.
7/21/2020 16:11:51	Sarah	Gabel	Heartland Christian Sch	Colby	I feel like a blanket statement for no one to start school in person in the state is inappropriate. For some individuals and areas, it may be best not to have school in person. In northwest Kansas our kids will be harmed more by not having school at school than by the risks to the kids and community of COVID. Please allow decisions to be made by local authorities. Offer virtual school separately in the state for those who are high risk or feel uncomfortable, and let the others go!
7/21/2020 16:11:57	Stephanie	Braden	Myself as a teacher	Overland Park	Please consider upholding Laura Kelly's executive order. Please rise above politics and know that teachers need this time to plan quality instruction. Nobody wins when we are trying to build the airplane as we fly it.
7/21/2020 16:11:57	Mike	Gehrer	1221 N. Webb Road	Wichita	School should start as soon as possible.
7/21/2020 16:11:59	Sammie	King		Galva	The school year should start as planned, waiting extra time will not solve anything.
7/21/2020 16:12:01	Kay	Burtzloff	Liberal Area Coalition f	Liberal	I support the Governor's action in delayinh the opening of schools. They need the time to get practices and procedures in place for the safety of the students, teachers and staff.
7/21/2020 16:12:02	Liz	Quinn	USD 259	Wichita	Please vote to close schools thru Sept 8th. I am an SLP in USD 259 & I worry the funding for PPE is not present. I also work PRN in the hospitals & I have seen the effects of COVID19 firsthand. Please take this seriously & vote "yes" to protect some of Kansas' finest professionals & children. Thank you for your work & service to education!

7/21/2020 16:12:19	Kayla	North	Teacher at Holy Family	Hays	I am a kindergarten teacher at a school where we don't have any additional procedures or guidelines in place yet. We need the extra time to revamp curriculum and make sure we have procedures in place to keep our students AND teachers safe and healthy. I do NOT feel comfortable going back to school right now. I am scared for my own safety!!! Please put political differences aside and push back the start of school.
7/21/2020 16:12:20	Mona	Enna	St. James Academy	Merriam	Our children need to be going to school on time. They need to be learning in a proper class room setting and having interaction with others. I don not want my children to get behind because this. 6 ft distancing and masks are all great precautions in order to keep them safe.
7/21/2020 16:12:28	Erika	Caudillo	My children attend Olathe	Olathe	Please resume the school year as originally scheduled. The data does not support postponing until after Labor Day. Fewer children have died from COVID-19 this year (30) than from influenza last year (190). While every death is tragic, it is not possible to reduce the risk from any illness to zero. We do not close schools on a mass scale for influenza. Our children need to get back to school not only for their education, but also for their mental and physical health. Provide an online option for those too fearful to return, those with underlying health conditions or those residing in multigenerational households.
7/21/2020 16:12:30	Shannon	Bisel	Parent	Olathe	My kids have been out of school since March - the lack of routine is wrecking them. They deserve to go back to school and receive a quality education...one that I cannot give them at home, as I'm a working parent. We are a double income family, and rely on both of them to survive. Neither my husband nor I can quit our jobs, and because we're both essential, we cannot work from home. My job involves working with children all day, and I know there are other entities out there doing the same (daycares, summer camps, etc). They have all remained open, serving a large number of children for long periods of time, with no reported outbreaks in KS. I think the re-opening plan needs to happen, on time, with safety mandates in place. Virtual-only learning will kill the economy and hurt tons more children who rely on school for safety and food, in addition to their education. Thanks for your time and consideration.
7/21/2020 16:12:37	McKenzi	Mispagel		Olathe	Please consider voting to keep Governor Kelly's executive order in place. This will give districts the time they need to prepare for the upcoming school year.
7/21/2020 16:12:38	A	Smith	SMSD	Merriam	I shouldn't have to die so students can have a social life.
7/21/2020 16:12:43	Jill	Ellner	Parent	Manhattan	I support the delay in opening schools so they have adequate time to obtain supplies, such as hand sanitizer and masks, that will help keep everyone safe. The extra time will allow teachers to better prepare for possible online classes and any changes for this new school year. The extra time will also allow for definitive answers needed regarding new protocols for COVID safety.
7/21/2020 16:12:49	Josh	Meraz		Topeka	I feel it's too soon to open schools. If you guys are having zoom meetings still why risk kids being in classrooms when you guys wont even meet in person..
7/21/2020 16:12:50	Shannon	Jones		Salina	As both a parent and an educator, I am in favor of delaying the start of school. This gives teachers extra time to learn all the safety procedures well, to make learning in person as safe as possible. Kansas is seeing a sharp increase in cases currently, and social distancing is difficult in any classroom.
7/21/2020 16:12:59	Melissa	Abernathy	Marantha Christian Aca	Overland Park	This is my sons senior year. He needs to be ready to compete nationally and internationally for college and the future of our great country. We need schools opened, opened safely. Delaying education further is a huge disservice to our children and the future of America. This school is ready to open and open under the guidelines released to KS. Please let it open! Respectfully yours, Melissa Abernathy
7/21/2020 16:13:06	Kristin	Scarborough	Concerned grandparent	Lenexa	Please follow governor's mandate
7/21/2020 16:13:17	Angela	Johnson	USD 232	Shawnee KS	Please give the educators and administration more time to prepare for this unprecedented year.
7/21/2020 16:13:20	Justine	Unruh		McPherson	I am in full support of gov. Kelly's executive order.
7/21/2020 16:13:26	Bud	Valerius	South Central High Sch	Coldwater	We believe these decisions are best left to the local authorities. A one size fit all approach does not work in this instance.
7/21/2020 16:13:29	Carrie	Allton		Lawrence	I fully support Governor Kelly's executive order delaying the start of the school year. With Covid cases rising across the state, school districts need more time to develop plans for keeping our children, teachers, and staff safe when they return to the buildings. And local health departments need more time to determine whether/when it will be safe to do so.

7/21/2020 16:13:31	Romanda	Hines		712 Shelburn Pl	I want school to be delayed to increase the probability of the COVID-19 numbers in Kansas to reduce dramatically. I want my child to be safe from getting sick with the coronavirus.
7/21/2020 16:13:33	Megan	Novellano	SMSD	Olathe	Thank you for putting everyone's safety and health first by delaying the start of the school year in the hopes we might be able to slow the spread of COVID-19. This also gives us the chance to possibly safely implement a hybrid model of teach so students can receive in person learning while everyone's safety is considered.
7/21/2020 16:13:40	Christina	Witten	My family	Derby	Please delay school until after Labor Day. I have a 4th and 5th grader and am very concerned about starting school in a couple of weeks. We need time to insure schools have the supplies needed to keep our kids safe. We also need time to get COVID-19 cases down.
7/21/2020 16:13:44	Lana	Stites	Maranatha Academy	Olathe	Please open the schools on time with no delay. Schools have precautionary measures in place to ensure the best possible safety of each child. The delay will hurt children with learning disabilities, low income families and single parents. Maybe there can be an online option for those who choose it? Thank you.
7/21/2020 16:13:45	Jennifer	Cox	Hesston HS	Heaston	I would like to see our school start as originally planned on the August 13th date.
7/21/2020 16:13:48	Kim	Ryden	Christ Prep Private Scho	Kansas City	I believe that the start of school should not be delayed because of Covid-19. If a school needs more time to prepare for online school or wishes to wait a while before they return the the classroom, that should be up to the school district or private school to make that decision. Thanks You.
7/21/2020 16:14:01	Nicole	Trendel	Parent of Student	Olathe	I am good with the governor's orders because there are a lot of lives on the line. Even those that survive COVID have long-term impacts that could impact attendance and employment for teachers and staff. I would ask that all kids have to wear masks to protect those that absolutely must be medically exempt. I am EXTREMELY anxious since I am high risk and have a high risk toddler to whom my child in school can bring COVID home to. I wish I was being offered a hybrid (mix of in person and online) for my kindergartener or even half days. Please consider that!
7/21/2020 16:14:01	Genie	Baylor		Columbus	I'm against it. I have seen several options for classroom. Foggers from a company in Joplin. Plexiglass dividers
7/21/2020 16:14:07	Caroline	Hastings		Topeka	Please support postponing the start of school until after Labor Day. The steep rise in Covid cases in Kansas is frightening, and I want my son in the safest environment possible. The extra time will allow for planning and a larger cushion to obtain needed safety equipment. Thank you for keeping kids, teachers, and Kansas families safer.
7/21/2020 16:14:09	Stacy	Lasswell	Usd 336	Holton	Teachers need time to prepare a safe environment and learning options. Please delay the start of school.
7/21/2020 16:14:09	Mariann	Jaksa	None	Overland Park	Having worked in a high school I can tell you that following protocol to keep everyone safe will be near to impossible. Classrooms and school buildings are not large enough to distance and schools cannot afford to hire more teachers - if they can even be found. Older teachers are worried and may quit or retire as they feel they have no other option to control their safety. Good teachers will be lost. Parents don't make their children wear masks now when playing with friends. Teachers will be spending their time dealing with safety protocol or in quarantine because of exposure. Especially at the high school level.
7/21/2020 16:14:10	Maria	Sender	None	Manhattan	Wait until the the number of new cases declines to have in person school. You can't social distance children, even if you separate them in classrooms, there is still school bus rides and lunch rooms. Many children are watched now by a close circle of grandparents and neighbors, bringing the virus into these close groups will destroy communities.
7/21/2020 16:14:13	Meredith	Warren		Overland Park	If the schools can present a safe environment for staff, teachers and students...my child is ready to go back.
7/21/2020 16:14:13	Mr	Anderson		Olathe	Please veto Governor Kelly's executive order and start school for our children
7/21/2020 16:14:17	Allison	Apaza		Bel Aire	Keep the schools closed till labor day, or at least until a more creative solution can be drafted. Outdoor classes, enrollment limited to essential workers /high risk families, optional attendance, community visits from social workers, and drop in food services are all viable options that need to be explored.
7/21/2020 16:14:19	Jayme	Hayes	Parent and teacher	Wichita	Please accept this order as it will ensure teachers have enough time to be trained, prepare, create, organize, learn, so that they can teach our children to the best of their abilities and not be rushed into a hybrid, remote, or unsafe situation. Please accept this order because of the current state our state is in. We need our numbers to go down, or at least stabilize. This is large than just school.
7/21/2020 16:14:20	Julie	Kice	Classical School of Wic	Wichita	Please allow small private schools that do not have the same issues with busses and lots of facilities to determine when they are ready to start. This is an overstep to dictate to small private schools that have sreFu made ready their plans, supplies and buildings for re entry .

7/21/2020 16:14:20	Matt	Meade	Parent of incoming High	Overland Park	<p>I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.</p> <p>I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:</p> <ul style="list-style-type: none"> <li>•Safe School opening following the Board of Education Return to School Plan</li> <li>•No delay to student participation in school, athletics, and activities.</li> </ul> <p>In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions.</p> <p>This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.</p> <p>Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.</p> <p>I am one of the over 6,200 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.</p> <p>We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know you have our support.</p>
7/21/2020 16:14:27	Sheri	Heath	my family	Bonner Springs	<p>Please PLEASE consider first the safety of our children and teachers when you determine how to go forward with the school year! It's important that the school districts have plenty of time to ascertain how best to educate our children while keeping them safe. Contrary to what some may think, they have not had all summer to plan this as the situation has been continuously evolving and has only recently gotten much worse. Plus, these people are for the most part not paid for 12-month contracts and truly deserved a break after the frantic switchover at the end of the last school year! There are so many possible permutations of delivery methods by age, school, district, and student characteristics that it's really important to think through all the options available. I ask that you please back up the Governor's executive order and in fact authorize districts to take even more time than allowed by the EO to plan their year if warranted in their circumstances.</p>
7/21/2020 16:14:31	Jill	Harrel	Parent of 3 K-12 student	Coldwater	<p>We need normalcy &amp; something reliable for our children! They don't want to wear masks, it'll cause more disruption in the classroom than before. Who will provide masks for them? Will there be a biohazard bin to dispose them everyday? What if a child needs a second mask in the day, who provides that? Parents should have a safe, non judgement option of choosing remote learning vs classroom for the school year.</p>
7/21/2020 16:14:50	Stephanie	Ryan		Haven	<p>Please delay until after Labor Day. Will give teachers more time to plan for all the safety precautions and have a room that's functional with those constraints.</p>
7/21/2020 16:15:03	Robin	Allen	Myself	COLDWATER	<p>Please open schools, sans the mask... Let each district decide their own rules, rural kansas is much different than cities... This is here to stay, like colds, flu, lice, chickenpox, flu a and b....we do not shut down a country for any of those. Kids need school... parents need school,!!</p>
7/21/2020 16:15:24	Kristen	McBride	Holy Trinity Catholic Sc	Olathe	<p>Please up hold the executive order. As a teacher and a mom, I hope that our state board is looming out for the teachers along with the students. We need more time to prepare.</p>

7/21/2020 16:15:25	Shan	Grey		Shawnee Mission	I feel it would be in everyone's best interest to hold off on opening schools until after Labor Day. To expect everything to be ready to go when it comes to all the changes in a matter of weeks isn't fair to the staff, parents and most importantly the kids. If it is decided to wait until September that will allow all parties to prepare for the changes.
7/21/2020 16:15:40	Gina	Lamberger	Clearwater USD 264	Wichita	I am working with the reopening committee. We really need the extra time to plan, gather supplies, install equipment and train staff in order to provide a safe in person school environment.
7/21/2020 16:15:49	Angella	Curran	0330008730	Pittsburg	I teach in Bourbon County, where that have chosen to opt out of wearing masks. My son goes to school at USD 250, and our cases here have not seemed to go down yet. I will probably be choosing to keep my son home until there are no new cases in our county for at least two weeks in a row. As a teacher, I think it is extremely important that we follow the governor's mandate to wait to bring kids back in person until September 9. This gives our districts time to order PPE, plan a schedule that will reduce the number of students in the same room, allow for teachers to build lessons that will accomodate both in person and online students and will allow for greater safety. I work in a high school. I am immunocompromised. I am at high risk of getting COVID, but I also can't afford to quit my job. I think it is completely disrespectful of the profession to expect teachers to return to an environment where there is a potential for a hospitalized illness (or even death) without allowing for workman's comp or extra days off. I work in a school that is majority free and reduced lunch. These students'parents can't afford to contract the virus either. Not only is it a safety risk, it is a huge financial risk. Many of our high school students are wards of their grandparents or live in multi-generational homes. The likelihood of a family member contracting the virus and leaving the student without a guardian is high. I understand the need to make sure that students have the social contact with their peers and their teachers, who love them and miss them. However, the emotional damage done by losing a loved one or dealing with the ongoing care of a loved one might be far greater, then the damage done by online schooling and/or waiting until September to start. I do not believe that individual superintendents and school boards should be making this decision, because they can easily be swayed by a community who does not appreciate the value of safety for students. Teachers love their jobs and want to be back just as much as students do, if not more, to a normal situation, But even returning in person right now would not be a normal school day. We need the time to plan. If you haven't read the news lately, just today several districts have decided that students will not return to school in person in August due to increasing covid cases. I believe in our governor, and I believe that we should follow the guidance of the surgeon general who stated students are in danger if they return to school now.
7/21/2020 16:15:50	Lana	Stites	Maranatha Academy	Olathe	Please open the schools on time with no delay. Schools have precautionary measures in place to ensure the best possible safety of each child. The delay will hurt children with learning disabilities, low income families and single parents. Maybe there can be an online option for those who choose it? Thank you.
7/21/2020 16:16:17	Erich	Barta		Merriam	I don't think it is morally responsible to start school while the COVID19 rates are so high and continue to set records for spreading. Teachers need time and equipment to keep themselves safe and by extension their students. Public health officials recommendations are consistently claiming we are not ready. Please don't make teachers into babysitters.
7/21/2020 16:16:27	Kristina	Endicott	High School teacher	Wichita	I support the governor's decision to delay the start of schools. Hopefully by then the number of cases will go down and we can safely open schools and hold in person classes.
7/21/2020 16:16:28	Tawnia	Bange	Usd 315	Colby	Start school in August

7/21/2020 16:16:28	Susan	Schultz		Arkansas City	As a mom and high school interrelated classroom teacher, I am pleading for the state board to please vote in favor of pushing back the start of the school year. With the recommendations for reopening only being released last week, there is not enough time for districts to get everything needed in order to be ready to go by early August. My biggest worry is that my son or I will bring home COVID-19 and pass it on to my husband or my mother-in-law who watches my son when we both are at work. The schools need every chance possible to be completely prepared if any form of in-person learning is going to occur. I personally would like to see the year start off as remote learning as cases are still surging in Kansas, but even the extra three weeks gives people in Kansas the chance to wear a mask and practice other safety precautions so maybe the trend can start going down. Even one student, teacher, or staff death should not happen and we still do not know the extent of the long term effects COVID-19 has on people. Yes, I do want to be back in school but I want it to be safely and I do not believe we are ready. So, again, please support the governor's mandate. Thank you for your time and consideration.
7/21/2020 16:16:28	Melanie	Thompson	High school music teach	Coldwater	As a Kansas educator, I implore you to delay the school start date until after Labor Day. Teachers and administrators are JUST NOW getting information and making plans for what the school year will look like. We need those extra couple of weeks to plan, prepare, gather supplies, and do our best to make sure we are ready for those kids when they come to our classrooms. Without that extra time, I expect a great deal of chaos would be added to an already unstable situation. And, especially in our small communities with limited healthcare resources, we cannot afford to be reactive; we must be proactive in protecting each other. I know kids and parents are ready to get back, but a couple weeks is a small price to pay when we consider the potential gains versus disastrous losses. I once again ask that you make the hard, but right, decision to delay the school start date. Because we Kansans CAN do hard things. We come from good stock. Thank you.
7/21/2020 16:16:31	Jennifer	Ortolani	parent	Pittsburg	School should absolutely be delayed, I am thankful our governor is making the tough decisions to keep us safe. There is no way schools can start as normal This will give more time to get a plan together. I think there is no way to safely open school buildings, Too many people inside older buildings, not enough desks, cleaning supplies, and schools are already underfunded. We need to have online school for months until the cases come down to protect our students and teachers. Opening schools now would create a giant spike in cases and possible serious illness to many. We are short on substitute teachers already, it would be a nightmare if students and teachers started coming down with it. Would 60 kids have to stay home for 14 days, all get tested, All teachers who were in contact with those kids or teacher, would they have to stay home for 14 days?? Where are the substitute teachers going to come from to cover all of these classes?? Keep the school buildings closed!!
7/21/2020 16:16:46	Molly	Kaup		Lawrence	I am a paraeducator in USD497. I'm confident that delaying the start of school would allow for greater safety procedures to be established prior to the start of the new school year. If schools are to open at all, teachers NEED this extra time to prepare. Please respect the health and safety of school staff, students, and families by voting in support of this executive order.
7/21/2020 16:16:48	Amy	Lafferty		Olathe	I have two children in Kansas schools, and I am very concerned about the fall semester. Of course, I want my children to attend school in person. They love school. And up until a few weeks ago, I was all set to send them. And then the cases in our county and the state started skyrocketing. I personally have a friend who passed away from COVID-19 at the beginning of the pandemic, and I worry about the unknown long-term effects of the virus. I WANT my children in school, but I want them to be safe while there.  I believe the schools should be required to work with the health departments to use science to make data-based decisions for the safety of our kids, teachers and staff. I do not want decisions based on politics or what people not trained in infectious disease and public health "want". We all "want" our kids back in school. The doctors and public health officials are the ones that have the expertise to determine when we can return them all "safely".  Approve Governor Kelly's executive orders and require schools to use science and medicine to determine what is in the best interest of our children's health and safety.
7/21/2020 16:16:52	Carri	Ball		Wichita	Let the kids go back to school in August!
7/21/2020 16:17:19	Austin	Case		Manhattan	I support the delay of schools opening. As a parent, I just want to keep my child safe, and it is not safe to open schools at the normal time.

7/21/2020 16:17:29	Tom	Balsbaugh	Parent	Overland Park	Please vote to overturn Governor Kelly's executive order. Please allow each district to make their own choice when to start school.
					<p>Kansas Board of Education,</p> <p>I am a VERY concerned parent commenting on Executive Order 20-58. This order is not needed. The schools and parents have ONE FULL MONTH to prepare for the 20-21 school year. This should be plenty of time to prepare both the cleanliness of Kansas schools and ordering the needed supplies.</p> <p>The fact that most private schools has such small classes means this order should not apply.</p> <p>One other item is that the case number does not make sense. The case number that the Governor is using that is listed on the Kansas Department of Health and Environment web site (23,334) is inflated. "A quote from this order is "WHEREAS, as of this date, in Kansas there have been 23,334 reported positive cases of COVID-19 spread among 102 counties, including 307 deaths;" According to the quote below, from their site, the case numbers include presumptive cases OR epi-linked cases. I thought the case number would ONLY be CONFIRMED CASES! Science does not include assumptions BUT FACTS.</p> <p>"As of May 7, 2020, confirmed and probable cases are included in the case totals. A confirmed case is defined as a person who tested positive by molecular testing for the novel coronavirus (SARS-CoV-2), which causes Coronavirus Disease 2019 (COVID-19). A probable case if defined as a person with: a) presumptive lab evidence (serology) with COVID-19 symptoms or epi-linked to a confirmed case, or b) no lab testing with COVID-19 symptoms and epi-linked to a confirmed case."</p> <p><a href="https://www.coronavirus.kdheks.gov/160/COVID-19-in-Kansas">https://www.coronavirus.kdheks.gov/160/COVID-19-in-Kansas</a></p> <p>The CDC defines epi-linked as:</p> <p>Epidemiologically linked case: a case in which the patient has/had contact with one or more persons who have/had the disease, and transmission of the agent by the usual modes of transmission is plausible. A case may be considered epidemiologically linked to a laboratory-confirmed case if at least one case in the chain of transmission is laboratory confirmed.</p> <p><a href="https://www.cdc.gov/mmwr/preview/mmwrhtml/00025629.htm">https://www.cdc.gov/mmwr/preview/mmwrhtml/00025629.htm</a></p> <p>In conclusion; the governor is using her power to delay the opening of Kansas schools bases on "confirmed and probable cases, serology, epi-linked or people that have had no testing. This is a deceitful way of inflating the case number so it looks like we have more cases then we have factual cases based on individual positive tests.</p>
7/21/2020 16:17:30	Jonathan	Broeker		Shawnee	Jonathan Broeker
7/21/2020 16:17:42	Dan	Simon		Lawrence	The governor and science should drive this decision. The disjointed and horrific federal response has demonstrated that a thoughtful leader such as our governor is the best person to make this decision. The rest of the ideologues and extremist politicians need to get out of the way and let informed science and our governor lead.
7/21/2020 16:17:44	Mickie	Mason		Mulvane	Let each district decide.
7/21/2020 16:17:51	Kathleen	Myers		Overland Park	I agree with waiting to start school until after Labor Day to give the districts more time to get their plans together for school starting.
7/21/2020 16:17:57	Lindsey	Welsch	Parent	Lenexa	Please delay school. Please.
7/21/2020 16:18:00	Jim	Forsyth	self	Anthony	All steps possible should be taken to protect everyone in the schools. A three week delay seems to be an appropriate measure at this time. I am a Reagan Republican but this should NOT be a political issue but one of public health. Please comply with the Governor's orders.
7/21/2020 16:18:07	Tiffany	Mullen		Overland Park	Elementary kids need to go back to school with an in person option as soon as possible.
7/21/2020 16:18:10	Brianne	HILLMAN	Parent	Olathe/Spring Hill	Start school
7/21/2020 16:18:11	Kylee	Sperber		Johnson	Delay the opening of school. Schools need time to plan and prepare to make returning safe for everyone. My husband is a teacher and we just had a baby last week. We don't want to send him to an unsafe environment everyday to risk his health or the health of our newborn and two other toddlers.
7/21/2020 16:18:16	Cindy	Bracker		Lawrence	I support the plans to delay school openings and enforce safety measures in the schools as laid out in Governor Kelly's executive order. While there are some parts of Kansas that have not been affected, we need to stand unified behind this policy as an entire state to eradicate (or at least control the spread of) this dangerous virus.
7/21/2020 16:18:29	Laura	Riffel	Behavior Doctor SEmin	Overland Park	I do not want school to open early. I fear for the safety of the teachers and students. I have attended a funeral of a student who died at school- I don't want anyone else to have to do that. I have also attended the funeral of staff members who died. I can't imagine how many we will have if we return too early.

7/21/2020 16:18:30	Felicia	Unruh		Walton /Goessel school	Our kids need the socialization and someone that went to school to teach!
7/21/2020 16:18:32	Andrew	Ortolani	College student	Pittsburg	100% support the delay, and keeping a close eye on any spikes/rises in cases to decide what to safely do next. Considering there are folk pushing to open schools back up yet refusing to hold the meetings in person tells you something about how they truly feel on a safety-standpoint. My brother will be returning to high school for his senior year and I'm incredibly concerned for his safety. Until there is a solid and coherent plan to safely conduct classes and other functions, there is 0 reason to be putting children and young adults at risk at this time. As a biology major, I understand the importance of allowing scientists to do what they do best: experiment and work towards a solution while also educating the public on their findings and goals. It is disappointing to say the least, that many do not trust our most intelligent minds in this country, and instead write off their many MANY warnings for political reasons or citing the revitalization of the economy. This is not a political issue. This is life and death for some.
7/21/2020 16:18:35	Katie	Cronin		Leawood	I am a parent of two elementary age children living in Leawood, KS. I am in support of the governor's order to delay the start of school until 9/7 to give teachers and administrators additional time to plan for high-quality virtual learning. Even if some in-person learning is available at the beginning of the year, distance learning seems likely once we hit cold and flu season. I want our teachers to have as many tools at their disposal as necessary to ensure distance-based learning is effective. In the alternative, to the extent that in-person school options are made available, I think this time will be necessary to ensure that PPE can be secured and critical safety protocols put into place. I would like to see an in-person option, but only for our most vulnerable children and children of essential workers, and only to be taught by young teachers who are not immunocompromised and who have volunteered to do so - see <a href="https://medium.com/@shaylargriffin/some-students-should-go-to-school-most-should-stay-home-8a57894b8487">https://medium.com/@shaylargriffin/some-students-should-go-to-school-most-should-stay-home-8a57894b8487</a> . Whether in-person or distance, teachers deserve to have the chance to prepare a single set of lesson plans, as we know from the spring that in-person curriculum often does not transfer effectively to in-person, and I'm sure the reverse is true as well. Thank you for your work on the Board and your thoughtful consideration during a very challenging time where there are only challenging options available.
7/21/2020 16:18:51	Michelle	Green		Junction City	I think delaying the start of school is ridiculous. Covid-19 isn't going to just go away. So what's the point of making our children start later?? It won't do anything.
7/21/2020 16:18:51	Melissa	Wenzl	Parent of BV high school	Overland Park	Please school board members speak for your own districts and don't let the governor dictate and mandate for the entire state. We're all suffering in different ways and different things will work and be feasible for each area of Kansas. Please say NO to executive orders...don't let politics interfere with the welfare of Kansas students. Thank you.
7/21/2020 16:18:57	Gabby	Asher	Holy Cross Catholic School	Overland Park	Please consider following Governor Kelly's orders to start after Labor Day, us teachers really really need this time to prepare and get our classrooms in order and ready. We would be under so much pressure and not set up in our best if school started at the Normal time. Please consider the healthy and safety of our students and parents and faculty. Thank you
7/21/2020 16:19:09	Gabby	Asher	Holy Cross Catholic School	Overland Park	Please consider following Governor Kelly's orders to start after Labor Day, us teachers really really need this time to prepare and get our classrooms in order and ready. We would be under so much pressure and not set up in our best if school started at the Normal time. Please consider the healthy and safety of our students and parents and faculty. Thank you
7/21/2020 16:19:16	Rebecca	Brown	myself, a teacher in KC	Overland Park	We are not ready for school to begin in August. We are in the middle of a Covid-19 surge, so putting 23,000 students and almost 10,000 staff together in buildings with inadequate ventilation and no way of truly practicing social distancing (just think about making 900 students go to the bathroom while following the 6' apart recommendation. Our school has 10 restrooms 5 for girls, 5 for boys. And do you honestly think students will keep their mask on during the bathroombreak?) Even if we eat lunch in our classrooms, we will have to take our masks off for at least 15 minutes. These are just a few issues with the CDC Guidelines. Instead, I would like that time to collaborate with my fellow teachers to develop learning opportunities that we can use when we have to do remote learning.
7/21/2020 16:19:20	Jennifer	Mackley	USD 315- Colby Public	Colby, Ks	Please do not open schools until it is SAFE!
7/21/2020 16:19:24	Maribel	Gallegos		Olathe	If children come first, then schools need to be virtual. Children have the right to remain healthy and not spread Covid-19 to their family and community. Please follow the science and not politics.

7/21/2020 16:19:33	Diane	Grubb	My family which includ	Wichita	I would prefer to postpone until December 1.  Now or even Sept 9 is too soon!  We will not sacrifice our little one
7/21/2020 16:19:34	Tari	Slaight	Leonardville nursing ho	Clay center	I believe it will not be a good idea for students to return to school until covid is at an end point. I already have the chances of bringing it home to my kids in my line of work. I do not want them to bring it home to me. I could possibly infect my coworkers or the people I care for.
7/21/2020 16:19:35	Veeva	Bratton	Self	Topeka	I think that it is a very bad idea to start school back at all right now.. think about all the kids that go to school do you really think that the small children are really going to keep their masks on.. what about when they eat lunch ad have to take their masks off.. what about gym and showering.. there is still not enough known about this disease to say that the younger generation won't get it who wants to take a chance on their lives or the lives of their parents or grandparents that they're coming home to that may get it..
7/21/2020 16:19:42	Ruth Ann	Gourley		Shawnee	It is vital to the academic and mental health of students that KS schools start on schedule in the fall, 2020. There are children in desperate need of education that only a classroom can give them. Remember the slogan "No Child Left Behind"? Well, this proposed continual shutdown has and will continue to leave many children behind. Not all parents are suited for homeschooling their children, let's say, it's not their gift. This will put those children even farther behind. For many children, school is their only place to learn. School is, in many cases, where children eat their only well-balanced meal each day. How can we go from having award winning programs to ensure that EVERY child gets chance, only to take it all away? Seems like this is all going backward to me and the better option is to return children to school on schedule in August 2020.
7/21/2020 16:19:45	Wendy	Nagel	Self	Olathe	Delaying school is absolutely necessary to make sure that the schools have time to prepare for the safety of students and staff members. There has to be a plan for how to handle the substitute situation when staff members have to quarantine for 14 days. They absolutely cannot put classrooms together if they don't get substitute coverage! What is the plan for that? What is the plan when a student is part of a family that has positive cases at home? Their whole class and teacher need to now quarantine? Lots of unanswered questions and numbers are definitely on the rise! We should not be taking these kinds of risks with our children and educators.
7/21/2020 16:19:50	Tally	Fleming	USD#362 La Cygne Ele	La Cygne	I would appreciate the delay being approved so the we have time to go through the recommendations provided to us in the Navigating Change document. We need time to run through procedures and logistics of having students in schools. Please approve the Governor's executive order. Thank you!
7/21/2020 16:20:03	Martha	Masinton	My family.	Lawrence	I support Governor Kelly's order to delay school opening until after Labor Day. The order is intended to safeguard students, teachers, and their families in the context of a poorly understood and rampant virus. I cannot see who would benefit from a rejection of this order.
7/21/2020 16:20:07	Jenny	Setser		Wichita, KS	In person school should start as scheduled. If parents are worried about sending their kids to school, they have the option to enroll in online public education. Parents have the right to send their kids to school.....in person school!
7/21/2020 16:20:07	Geneva	Grogan		Shawnee, KS	I am supportive of the delay of the start of schools. I have heard a lot about local control but when local control has been given, cities and counties have ignored the suggestions and have increased the number of cases in the state of Kansas. I also wonder, if every district is supposed to make their own decisions, why do we have a state BOE? Shouldn't each district get to choose what their students learn? Counties want to say that they don't have any cases or a low number of cases. What are they going to do if their cases spike? They can take this additional time and create plans. If they never need them, great but at least they have them should it get worse. Please force schools to take the time to do this right and protect the safety of our kids and teachers. This isn't political, it's about lives. Why wouldn't we do what's best and make schools do what is right according to the Department of Health in the state of Kansas.

7/21/2020 16:20:08	Brigette	Hahn	Public teacher and paren	Lenexa	<p>I am very interested in getting children back in school. I am concerned about their emotional, academic, and social well being. I know COVID is real, but I also see statistics where severe illnesses and deaths are not happening (or rarely happening) in children. As of today, there have not been any pediatric deaths in Johnson County. A news story today cited Pediatric Infectious Disease Experts from Children's Mercy Hospital as saying, "schools need to reopen because not being in school is riskier for most kids than the coronavirus." On Monday, the American Academy of Pediatrics stated that the benefits of school (with safety plans in place) greatly outweigh the risks of COVID."</p> <p>I'm a teacher in Olathe. We have a great school with amazing families and students. I fully support parents that want to choose online school, and am pleased to see that many districts are offering choices to families. However, as a teacher I am proud to say I want to be back in the classroom. Of course it will be a new challenge, but I believe those kids need us. Anyone that has a job (teacher or otherwise), or goes into the community, is at risk of catching COVID. I am confident that my district will do everything in their power to keep me (and my school aged children) safe. Please consider getting these students back in school as soon as possible. I greatly appreciate your time and consideration. Thank you!</p>
7/21/2020 16:20:26	Sarah	Watkins	Teacher at Wichita Publ	Wichita	<p>I am proud to teach the future of Kansas each and every day in my fourth grade classroom. However, I fear school districts' ability to protect students and staff when our communities have continued to have rising numbers of Coronavirus infection rates. While I understand some of you are fearful of making the decision for the whole state, I strongly urge you to step up and support Governor Kelly's mandate to delay the start of the year. While I respect the role of local school boards in making decisions for their own community, this is a state-wide crisis and local systems might be pressured to open in an unsafe manner without wise state-wide leadership.</p>
7/21/2020 16:20:28	Amy	Leiker		De Soto	<p>School should not resume until it is safe for students and teachers. They need to do online. Thank you</p>
7/21/2020 16:20:43	Heather	Owens		IOLA	<p>I'm not sure how in the areas with low numbers the youth benefit from starting school late. Children thrive in continuity and schedule, not starting school at least virtually does not help kids get back into the routine that they have been out of for so long.</p>
7/21/2020 16:20:43	Courtney	Albin	Special Education Teach	MANHATTAN	<p>I would like the board members to know that I support Governor Kelly's decision to have Kansas schools delay their start date until after Labor Day weekend and ask that the Kansas Board of Educators support the Governor's decision. As a mother of a grade school-aged child, I appreciate the extra time to be able to get the recent spike in Covid-19 cases in my community under control before sending my child to school. As an early childhood special education teacher, I appreciate the extra time to be able to prepare for the difficult year ahead in order to best serve my students. I know that it means my students will be missing out on special education services that they greatly need, but I feel the benefits of extra preparation time greatly outweigh the loss of a couple of weeks of services in the long run.</p> <p>Thank you for your consideration.</p> <p>Sincerely, Courtney Albin</p>

					<p>How can an individual who ran on their support for public education, was elected to represent public education and to lead and support the education of our children vote to delay the opening of schools?</p> <p>You can't and continue to expect to have any credibility or respect from your constituents.</p> <p>How can you have the words, "Our students come first in every Board decision", posted in your boardroom, a mission statement that says, "KSBE is to prepare students for lifelong success through rigorous, quality academic instruction, career training and character development according to each student's gifts and talents," and a Kansans CAN vision statement that says, "Lead the World in the Success of Each Student" and vote to delay the opening of schools?</p> <p>You can't and continue to expect to have any credibility or respect from your constituents.</p> <p>How can you support and pass with a 9-0 vote of the state board, a document that was constructed by KSDE along with 1000 volunteers, that included parents, educators, medical professionals and many others that provides guidance to schools supporting the decisions of local districts to determine what is best in reopening their schools and doesn't support mandates on the districts and then turn around and vote to support the Governor's EO as she places a blanket order on districts wanting to diminish the ability for local control?</p> <p>You can't and continue to expect to have any credibility or respect with your constituents.</p> <p>I understand districts have ultimate control on when they open but I rely on you to do what's best for ALL children and you didn't do that for my grandchildren if you supported the closure of schools in the spring and you aren't doing that if you vote yes on the Governor's EO. Especially for my grandson who is a special education student.</p>
7/21/2020 16:20:53	Penny	Rice	Self	Topeka	
7/21/2020 16:21:00	Tiffany	Couvillion	USD 385	Andover	<p>I would prefer to start after Labor Day to give myself and other teachers adequate time to prepare the best lessons possible for our students. Many of us are dealing with anxiety because we still don't know what the start of the year will look like. We need time to prepare thought-provoking and meaningful lessons for our students. Yes, we did this the last quarter but we are now starting at a new point in the year. Almost all teachers will need time and collaboration with other teachers to make sure our students are still getting a great education.</p>
7/21/2020 16:21:07	Annette	Alexander	Maranatha Christian Ac	Shawnee	<p>Maranatha is a small private school with small numbers in classrooms. I believe we can open the doors and address all the safety concerns and thrive in the midst of these challenging times. Not one parent I've spoken with who has children enrolled here has raised a concern that MCA would not be able to open safely. I would not want to put my children in harms way if I felt it was not safe and I believe that we need to get back to some normalcy. If this calls for wearing masks, and washing our hands, we will do it but let's get these kids back in school with their friends, socializing, learning, praying together, not sitting at home, learning nothing, doing nothing and without parental supervision. Let us show you we can do this and do it right.</p> <p>May God Bless you in making the decisions before you.</p> <p>The Alexanders ( A part of the Maranatha family for 12+ years)</p>
7/21/2020 16:21:07	Alexander	Barrioz		Kansas City KS	I will like school to open after Labor Day
7/21/2020 16:21:09	Becky	Calhoun	Christ Preparatory Acad	Lenexa	I feel that the governor's mandates should not apply to private schools, especially small ones like our school. The parents are paying for tuition so are able to choose another school if they are not satisfied with the safety precautions our administration has in place.
7/21/2020 16:21:20	Jo	DeYoung	USD 315 COLBY	Colby KS	Thanks for making tough decisions for our kids. We wish you the best in your endeavors!
7/21/2020 16:21:23	Christine	Lynch		Kansas city	Half home half at school. Ks high schools - each grade goes 2 days a wk.

7/21/2020 16:21:36	Angie	Gustin		Olathe	I support Governor Kelly's Executive Order to delay the opening of Kansas schools until after Labor Day. Delaying the start of school gives communities time to decrease covid cases. I live in the county with the most cases in the state. Schools need to order necessary supplies and implement rigorous cleaning procedures to protect the health and safety of students and staff. Many routine school supplies requested from families, such as cleaning wipes and hand sanitizer, are still unavailable or limited.
7/21/2020 16:21:39	Charles	Johnston		Hutchinson	A small delay in starting schools if it means a safer school year seems like a small sacrifice. Delaying the start of school is the right thing to do.
7/21/2020 16:21:57	Dena	Short	Parent	Pittsburg	I support Governor Kelly in delaying the start of school. Yes, it is important to be in school. But it is also important to keep teacher, staff, and families safe as well. I live in Crawford County Kansas and here alone we are seeing a large increase in cases, and that number is only getting higher quickly. So I ask you to support Governor Kelly in delaying the start of school until after Labor Day.
7/21/2020 16:22:05	Jenny	Weaver	Parents of school age ch	Osawatomie, Kansas	To keep all staff and children safe with constant routine, I ask that School be held in home based form on line with zoom classes for the first nine weeks. Reevaluate for the next nine weeks. Focus on core classes only. With children and staff testing positive still I would hate to start school and infect more and more children and other staff members. To illuminate some of the exposure children should stay home for at least the first nine weeks of school.
7/21/2020 16:22:06	Gary	Gourley		Shawnee	It is vital to the academic and mental health of students that KS schools start on schedule in the fall, 2020. There are children in desperate need of education that only a classroom can give them. Remember the slogan "No Child Left Behind"? Well, this proposed continual shutdown has and will continue to leave many children behind. This is going backward and the only option is to return children to school in August 2020.
7/21/2020 16:22:06	Kris	Schneider	Holy Trinity Catholic Sc	Olathe	Please consider the option of letting our kids meet virtually and get ready to learn for the upcoming school year. These little minds need the interaction and the learning PERIOD! The EO is an overreach of the Governor. We cannot let this stand. My child lost his father at 6 years old. We choose to send him to a private school for the curriculum and community. He is 10 now and finished the fourth grade online during crisis school. This child and Kansas child deserve more. We must do better and protect the mental health of our children.  Sincerely, Concerned Parent Kris Schneider
7/21/2020 16:22:38	Kirsten	Blankenship	Pratt USD 382	Pratt	I support delaying the start of school to September 9th. As an elementary school principal we need time to receive the safety items for school and to work with staff for a safe return.
7/21/2020 16:22:42	David	Bertoch	Self	Shawnee	Our daughter's school (Maranatha) has planned well and will be ready to start on schedule in August. Please let private schools proceed on their schedules. Thank you for your leadership.
7/21/2020 16:22:43	Matt	Gazaway	Christ Preparatory Acade	Lenexa	It's very important that students return to school for their academic, mental, and social health. I can attest as a parent and coach that all these 3 areas are already suffering and that remote learning is not a suitable replacement. There is a strong argument that keeping students away from school is more harm to society both short & long term than having them physically at school in this time. We have learned a lot from the spring and from other schools across the globe. Let's carefully but immediately get our students back to full time in person learning! And thank you for your hard work in this very challenging time!
7/21/2020 16:22:44	Monique	Holmes		Hays	Please open schools with the original calendar. Delaying the opening only creates more chaos. The schools have known what they needed when the CDC and AAP came out with their guidelines a month ago. They do not need three more weeks. Kids do not need more time home alone on electronics with no social interaction or academics.

7/21/2020 16:22:45	Shannon	Schwarz	Parents USD 437	Topeka	<p>I have children in elementary, Middle School and high school. I am also in the medical field providing anesthesia. I have read many reports and studies regarding schools being opened. According to the data and the reports of other schools that have remained open, I feel extremely comfortable in sending my kids to school without any restrictions besides the increasing in cleaning, which would help in any situation. Also, I feel they should be able to play all sports as they have been for the past 6-8 weeks indoors and outdoors without restrictions. According to the data we have currently, our children are more at risk from drowning than dying from coVID. Also, they are higher risk of dying in a car wreck on the way to school than dying from coVID. Also there are studies and reports stating that children rarely have symptoms when they get coVID. They also have been proven to not be vectors of transmission to adults due to their less viral load. With all the false positives throughout the country and people receiving phone calls that they are positive for COVID and not even been tested, there is significant error on the data regarding the positive rate increase. We need to look at the data and decide accordingly not base our decisions on opinions and or media outlets that sensationalize the data. When they say that the hospitals are full, they are not separating the elective surgeries, regular maintenance admissions, and or emergent admissions due to not maintaining their illnesses. With that if who is actually admitted for coVID itself. There is a huge difference between someone that was admitted for a heart attack and thrown test positive and someone that is actually having symptoms of coVID and gets admitted. These need to be differentiated in what the cause of admission was. Real data makes a difference. My support is for schools opening without restrictions and sports and other activities to continue as they normally would.</p> <p>Thanks</p>
7/21/2020 16:22:49	Tammy	Simons	USD 467 Leoti-Wichita	Leoti	<p>As an elected member of the USD 467 Leoti School District, Board of Education, I urge you to vote against the E.O. #20-58. The school calendar and opening date should remain in our local control.</p> <p>Leoti/Wichita COUNTY, is not even in the same ballpark as Wichita the CITY/Sedwick county. WE HAVE HAD 1 case OF COVID-19. We have less than 5 people per square mile in the county—social distancing is our way of life way before this virus. 90 of our 7-12 graders (half the school population) have been in the weight room and practicing sports together since June. Still ZERO cases in that age group and the adult supervisors.</p> <p>Our local school board/school administrators and our county health officials/commissioners are extremely dedicated and doing the best they can for protecting our public health. Please vote in a way that allows us to continue making our own decisions. We know our community best!</p>
7/21/2020 16:22:57	Caden	Pinter	Maranatha Christian Ac	Lenexa	I think that we should push the start date back. COVID rates are high and it is the best option to start later. We do not want to spread the virus more than it already is spreading.
7/21/2020 16:23:03	Rosemary	Robles		Kansas City KS	I will like school to open after Labor Day
7/21/2020 16:23:04	Mark	Taussig	My family	Manhattan	Please allow children to return to s school, their entire future may be riding on their current schooling needs.
7/21/2020 16:23:07	Jaime	Werner		Ozawkie	I believe we should go back at the normal time.

7/21/2020 16:23:10	Kim	Christopher		Basehor	<p>This is a partial response from a member of the State Board of Education that was responding to the many emails she received. I hope this encourages you to continue to make decisions based on facts and truth from our local community and not from Topeka. Thank you for the excessive amount of time and energy you have dedicated to this situation. We are DILIGENTLY praying over you and your family as you make these tough decisions. We are praying for wisdom and discernment as you continue to make these decisions for our children and community!</p> <p>The local boards of education are required by Kansas Statute to govern the schools in their district. By virtue of that statute, they are authorized and have the responsibility to make decisions for those schools. As you are aware, the members of local boards of education are elected by each district's electorate. The elections ensure there is local control of each school district. Local control guarantees that board of education decisions are crafted to fit the circumstances in that district for that specific district and that one district's decision doesn't impede on the need of the board of education in another district to make a decision which fits the circumstances in that district. Executive orders mean the entire state is treated the same whether or not it is inappropriate for say rural districts and urban districts to be treated alike.</p> <p>Some have implied that if I opposed the Governor it would only be because of politics...my view has absolutely nothing to do with politics, but with the long-standing state laws. I view the Governor's action as virtually a "take-over" of what has always been the responsibility of local school boards. [I would view the same action proposed by any governor in the same way regardless of their party.] It would have been respectful of local control for the Governor to have instead strongly suggested to each district where spikes in cases are occurring that they consider not opening school until after Labor Day instead of issuing an Executive Order that negatively affects school districts in communities that have no recent cases. My message is...a great leader does not make all the decisions, but instead she/he recognizes the value in allowing decision-making by those elected officials whose statutory job it is to make the decision you are tempted to find a way to make yourself. The Governor's place is to ensure county health officials and locally-elected officials have the latest data for their district, for the districts in close proximity to that district, and for the state as a whole, plus the Governor's recommendation, so they are making informed decisions. To enable members to make the best decision for their district, it important that each board of education has the ability to balance the data</p>
7/21/2020 16:23:14	CRAIG	MYERS	Colby High School	COLBY	I think that school should go on as normal and start in August. COVID-19 seems to be the same as bad flu season. It does not affect healthy young people as much. And kids need regular classroom time. They tend to fall through the cracks without school in session. Please restart school as normal.
7/21/2020 16:23:15	Alex	Kice	Csw	Wichita	Private schools need to be treated differently. Comply with KSHSAA requirements for sports, but leave academic decisions in hands of private schools! Or start giving private schools my tax\$!
7/21/2020 16:23:17	Dana	Friesen	None	Wichita	<p>I do not believe the governor has the right to mandate when schools start or how they start back up! How can she mandate what private Christian/Catholic/Parochial schools that don't receive government funding do? What is her reasoning for this? How can she put all school districts into the same "basket"?</p> <p>My husband is a Family Practice Physician here in Wichita. He agrees with the Academy of Pediatric Doctors that children must get back to school as soon as possible!! The Science says that children need to go back to school as soon as possible with no masks &amp; no spacing. No child has died of the virus, they don't get very sick, they don't spread it &amp; therefore, teachers are not in danger of getting it from kids!!! We are the only country of the Western civilized countries that has not gotten back to school!!!! Please overturn this unreasonable &amp; outlandish mandate &amp; let districts &amp; private schools open whenever they feel is best for their students - hopefully in mid-August!!! Our children's mental, physical &amp; academic health &amp; well-being is dependent on it!!! Thank you for doing the right thing for Kansas kids &amp; families!!!</p>
7/21/2020 16:23:20	Jessica	Shulda	USD 107	Mankato	Please just start school on time. We had already been making preparations to be safe and protect everyone. We are not going to delay the spread by keeping kids out for 3 weeks. I believe we will give them 3 more weeks to be at home, on vacations or out and about with high risk for getting COVID, verses being in school with safety precautions.
7/21/2020 16:23:23	Kaity	McAdams		Clay Center	School's should be delayed to allow teachers to plan properly for new procedures. Extra time would allow us to be more prepared and keep our students safe.

7/21/2020 16:23:25	Julia	Rose-Weston	Lawrence Community at	Lawrence, KS	Too much risk for teachers, school workers, students, parents, siblings and extended family. Staff and students should not be moving around to different classrooms and buildings. Delay school opening till after Labor Day and consider only online schools until there is 14 consecutive days of no new cases.
7/21/2020 16:23:26	Janelle	Samuel	Blue Valley School Dist	Leawood	Kids need structure and guidance during this time
7/21/2020 16:23:29	Heather	Johnskn	USD 233 teacher	Olathe	<p>I feel it is best for students to be in the classroom where there is structure and teachers can safely monitor social distancing. There are many kids who have horrible home lives and school is a safe place for them. Kids are getting together all over our community and aren't practicing social distancing.</p> <p>I am frustrated with all the teachers who are "too scared" to go back to work in fear of getting CoVid. However, these same individuals spend their weekends at sporting tournaments, at the lake, on vacations and allowing their self and family members to associate with multiple families/friends.</p> <p>Please do what is best for the social and emotional well being of the students-which is to return to in person classes.</p>
7/21/2020 16:23:34	Ryan	Harris	Parent	Dodge city	School boards and teachers need more time to come up with protocols that are achievable for children. New daily cases are still high and starting before we are ready will only increase these numbers exponentially. We saw what happened when businesses opened before they should have. We don't need a repeat.
7/21/2020 16:23:51	Tamara	Walters	Parent	Olathe	We have got to get activities going! I understand not wanting to crowd classrooms, we shouldn't have let class sizes rise as they have. Let the schools get some options out and see who wants to be on campus and who doesn't. And we most certainly should continue sports and activities such as band, kids need this now! We are hurting our students by continuing to fear and not prepare! Let's get schools open! And let's start addressing the crowding of our schools so this isn't an issue in the future!
7/21/2020 16:23:53	Anna	Fritz	Olathe	Olathe	<p>Please do not open schools for face-to-face instruction until we are seeing a consistent decrease in cases and hospitalizations in our state/county and/or until we can provide all staff and students effective PPE and follow guidance to avoid the spread of infectious diseases.</p> <p>While hospitals have been able to avoid transmission, schools have a wide range of additional variables to consider (students' ages and ability to social distance, classroom size and number of students in each class, ventilation systems, etc) and those should be factored into decisions about reopening.</p> <p>Our most vulnerable populations (young children, students with special needs, low income) should be a priority for face-to-face instruction and hybrid models should be included as options.</p>
7/21/2020 16:23:57	Michele	Bullins		Lenexa	I support delaying the start of the school year. Hopefully this delay will give the state an opportunity to move out of the "red zone" for COVID 19 and all schools the chance to train their teachers to deal with a very different teaching environment.
7/21/2020 16:24:02	Darrell	Surmeier	Colby Public School	Colby	We can NOT continue to keep our children away from peers and in-school structure. We cancelled the end of school abruptly last school year amidst a fear induced, miscalculated decision by our governor. Social isolation is severely detrimental to a rapidly forming, young mind. We did not have a single diagnosed case of COVID-19 in Thomas County throughout the entirety of (what would have been) our normal school year. Now, I'm not naive to think that because we did not have a confirmed case of COVID-19 in Thomas county, that it has not been around for the majority of 2020. Now we are doing contact tracing, thus the numbers infected are high, yet mostly asymptomatic. There is no science to think that any difference will be made by delaying the start of school by 2-3 weeks, rather it is another 'power grab' by our governor to only set her up for a series of further delays, indecision and ultimately another lost school year to unwarranted fear. In conclusion, many of the towns/cities in Kansas, including Colby, have colleges of all levels that are resuming in class schedules on time...college aged students from all over the state and country can meet in a classroom, but our local youth cannot?! Please stand firm, let's get our kids started back to consistency and normalcy!

					<p>I would encourage you to vote against the delay of opening schools this fall and for the return of students to the classroom. My children and I are comfortable with in-school learning without masks. I realize, for some, this COVID situation may be concerning. However, I believe in personal choice. It would be my choice to send my kids to school. Others, may be uncomfortable with this option. That is fine. They have the choice of home-schooling or on-line schooling. But please do not take the option of "normal/regular" school away from those of us who are fine with it for the voice of those who are not. In addition, my kids enjoy the personal interaction of peers and teachers. They strive on sports, extracurricular activities, clubs and community groups/activities. Sports practices, games, choir and band etc. should be included in these plans as well. Our kids need school for their emotional, social and academic well-being. There are too many children that the system will fail to teach properly if there are not loving teachers holding them accountable in a classroom setting. I do recognize that flare-ups and outbreaks of COVID may occur. But I do not feel we should ask everyone to drop out of life and live in the fear of the unknown forever. That is not healthy either. Recently, our community planned a 4th of July celebration in our city park and it was well attended. I believe our community is willing/ready to move on with life even considering the risks. There is hope in this situation, despite all the "doom and gloom" which is being portrayed.</p> <p>Thank you for reading,</p>
7/21/2020 16:24:06	Janice	Hawley	My personal family	Meade KS	Janice
7/21/2020 16:24:07	Don	Martin	USD 315	Colby	In my mind, the principal question is this: What is to be gained by delaying the start of the school year? Personally, I am not opposed to the Governor's order, and recognize that she has the safety of all as her foremost concern. I do not know the answer to the question above. If more time is needed to prepare schools to receive students, then, clearly, beginning after Labor Day is a good idea. However, are we simply delaying what we all know to be difficult and not without peril? In terms of the virus, will the situation have changed if we delay the opening of schools by three weeks? I think that these are questions to be discussed, and the answers to these questions may guide the decision as to the best course for all involved.
7/21/2020 16:24:11	Pat	Denning	none	Olathe	Please keep schools closed until after Labor Day and possibly beyond and follow the Kansas Governor's recommendations. She is following the science and protecting our health.
7/21/2020 16:24:16	Kate	Welch		Lecompton	Delay opening; allow KSHSAA to stay on schedule
7/21/2020 16:24:23	Dianna	Brashier	Parent	El Dorado	I think we should delay opening schools
7/21/2020 16:24:24	David	Cleaves	none	Wichita	From what we read, it seems the flu is more serious to children than the covid virus, with more flu cases and deaths. Schools were not closed or delayed opening due to the flu. Children need to get back in school as many pediatricians have stated and parents can get back to work. The school districts have had ample time to work out plans and still have a month to go. It appears the teachers are the ones who are worried, yet they face more issues with the flu and nothing is said about that. I see no reason to delay the opening. Please do not delay opening schools.
7/21/2020 16:24:25	Kate	Welch		Lecompton	Delay opening; allow KSHSAA to stay on schedule
7/21/2020 16:24:27	Nancy	Minster		Overland Park	Please do all you can to ensure graduation can occur- spring semester more important than fall
7/21/2020 16:24:28	Ashley	Breese	Parent of student going t	Colby,ks	I think the school districts should be able to make the decision on whether we should be able to start school or wait and what the guidelines should be. This entire COVID-19 is not a one size fits all it's different for each county.
7/21/2020 16:24:38	Josh	Hahn		Lenexa	I am really hoping that we can open our schools on time. Schools offer a safe place for my kids to go to continue their education and it is an important part of our community.

7/21/2020 16:24:40	Jon	King	n/a	Lawrence	Briefly, as I am sure the Board is well versed in the issues involved, I would like the Board to consider NOT authorizing the Governor's Executive Order as written. School district's need to start education as regularly scheduled. Whether that is in-school, virtual or a combination, pushing back a start date that SHOULD have been planned for long before now simply kicks the can down the road with no plan at all on how to proceed. Watching our local USD497 board meeting on 7/20, it is clear they want an extension because they haven't prepared and are counting on CARES Act money. Neither are excuses for not being ready for educating our children. We shouldn't condone administrative lack of preparation by pushing school start date back. Further, there is no solid plan for further funding and hoping that it will appear by 9/8 is also not appropriate. Last, the exercise in virtual learning this past spring was a joke. The Board should make sure districts are prepared for virtual if that is required (though I much prefer a hybrid). Thank you.
7/21/2020 16:24:41	Lee Ann	Rahto	Blue Valley	Overland Park	Please allow our schools to open on time and allow children to participate in sports and activities.
7/21/2020 16:24:56	Nancy	Merrell		Girard	Open everything. Open that school.
7/21/2020 16:24:57	Alanna	Burris		Emporia	Teachers and administration need the delay so that they are able to thoroughly read the Navigating Change document, gather appropriate PPE, and get the school ready for students. START AFTER LABOR DAY.
7/21/2020 16:24:57	DeJuana	Parker	Clearwater elementary	Clearwater	I do not believe its beneficial for us to delay the start of school. The education lost is far more important than a virus that isnt near as deadly as the flu. Kids need education and we are delaying this with no real.plan in place to make up for it.
7/21/2020 16:24:59	Philip	Newkirk	parent	Neodesha	Please follow the recommendation of Dr. Lee Norman and Governor Laura Kelly and delay school start until after labor day. Furthermore, I support a MANDATE of wearing masks in school until the virus is more under control. Thank you!
7/21/2020 16:25:02	Calleen	Bretz	Lane county schools	Dighton	Our kids need to get bawk to normal school activites. Our kids need school especially to socialize and learn. I am a mother of three and work full time i do not have any extra time to teach school i mean after all i do not have teaching degree. As far as the masks go no i do not believe they need them, you try and keep a mask on a 5 and 4 year old its like trying to give a cat a bath. These are just a few of my opinions thank you for your time.
7/21/2020 16:25:06	Jessica	Salazar Collins		Roeland Park	Online only
7/21/2020 16:25:13	Robert	Allen		Olathe	To whom this may concern: Please open School on time, I am begging you
7/21/2020 16:25:15	Mike	Mason	Parent	Olathe	My children need this very much. Thank you for you time.
7/21/2020 16:25:17	Shane	Baalmann	Sacred Heart, Colby	Colby, KS	I do not feel school should be delayed. I don't see a dramatic change in statistics happening between when schools normally open and opening in September. If anything, I think it cuts in to the amount of time students will be in the classroom. If a second wave is coming this fall would it not be better to have a good month or so of education before the schools shut down again.
7/21/2020 16:25:28	Travis	Church	USD 479 School Board	Kincaid	I'd like to urge you to please leave school board decisions up to local control. Every school district's needs are very diverse and we cannot use a one size fits all approach across our state. Local decision makers know how to best serve our schools and meet their needs! Thank you!
7/21/2020 16:25:30	Lacey	Johnson		201 e 4th st scott city ks	There is no reason to delay opening schools back up in Kansas, schools should open in August not September. Mandating masks to be worn in school and at activites is overboard. Our kids deserve a normal upbringing and school experience and the past several months has been anything but normal. Please consider how this has and is still impacting not only our entire country but the youth. Please vote to open our schools and not mandate masks. Thank you.
7/21/2020 16:25:41	Becky	Clark		Hays	The delay makes sense given where we are in the spike in cases. We don't really know how this will affect kids yet because they have not been inside a school setting since March. Could that be the reason some are saying it doesn't hit kids as hard? They have not been in that setting so we really don't know how it will impact them.

7/21/2020 16:25:43	Christopher	Johnson	Lakin High School	Garden City	My wife is a new teacher in a community that has not been social distancing nor wearing masks. I'm worried about her asthma. Delaying the start, in order to see if the situation can improve is well worth the three weeks students might lose. The students and parents and administration need time to prepare, both with purchasing and planning new equipment to mitigate the virus, and to mentally prepare for a different kind of school day with its new procedures and rules. New teachers in small communities that think this isn't real yet will be difficult to train. The extra time to prepare will be very useful. Please don't play politics with this. Please support the people who are trying to make this more safe. The governor is not doing this for, nor will she see positives from this decision from many people, but she's choosing to risk her political standing to keep us safe, especially out here in an area in which people are not taking this seriously. We need hers and your protection. Please. Teachers are begging. Thank you.
7/21/2020 16:25:52	Natalie	Wintz	Usd259	Derby	Delay the start of school to keep students and staff healthy! We need more PPE and time to plan!
7/21/2020 16:25:57	Sinda	Nispel-Borboa		Wichita	Online until it is safe!
7/21/2020 16:26:02	Natalie	Skidmore		Lawrence	I support Governor Kelly's order, and believe that we should challenge ourselves to use the time provided by this delay to help districts develop plans that move our state closer to achieving the Kansans CAN vision for education. After weeks of research, I believe there is another option that has the potential to keep all individuals safe, allow parents to go back to work, provide services for students with IEP/504 plans, increase the quality of instruction, and actually save school districts money. If we stop fixating on school buildings and expand our reach, we can work to facilitate partnerships between school districts and their communities that can simultaneously increase academic success and help families recover from the effects of COVID-19.
7/21/2020 16:26:04	Andrew	Sher	Parent	Olathe	Kids need classroom learning. Educators have had plenty of time to prepare (since last March). There is no excuse for further delay. It is abundantly clear that Olathe schools do not know how to do virtual learning based on our experience last spring. The district provided nothing to keep the kids engaged and teachers basically got an extra two months added to their summer vacation. Kids education needs to be a priority. Wear masks, social distance when possible but resume school.
7/21/2020 16:26:04	Katie	McElroy	Responding as a parent	Wichita	Please vote YES for the delay. It is important that we keep everyone safe, and that we listen to our health professionals.
7/21/2020 16:26:06	George	Barta		Shawnee	Do not start school until after labor day. Public schools and their staff are not baby sitters, we don't need to go to school because parents want a baby sitter. School staff needs time to prepare for remote teaching as it will be necessary to go to an alternative when we must go to lock down, as the numbers keep rising. Children may not show the same signs as an adult for covid 19, but they are humans and can still carry and transmit the virus to all who come in close contact.
7/21/2020 16:26:16	Jessica	Padgett		Andover	Please keep schools closed until after Labor Day.
7/21/2020 16:26:18	Bruce	Yarbrough	De Soto High School	De Soto	Please do not send us back into school when you do not feel it is safe to have a meeting in person.
7/21/2020 16:26:30	Penny	Plamann	Self	Topeka	I believe that opening schools should wait until after the first of the year, if then. If online classes are the only option, then I believe a September 1st date could work. We don't know enough about how this virus is going to spread once the flu season hits the covid-19 virus in packed classrooms. Children will take it home, families will have to be quarantined and once there's one case in a classroom, every one in that class is exposed. Safe distancing and requiring masks won't work. Look at teenagers now. They're practically uncontrollable now without considering the virus. And how about the anti-maskers who already are fighting wearing masks. Does anybody really think they're going to just back off when their children are required to wear masks truly believe, even considering the problems it creates online classes are what districts should do.
7/21/2020 16:26:31	Amanda	Vrana	My children	Goddard	Comment removed due to profanity
7/21/2020 16:26:38	Tony	Lonard	Parent of high school stu	Lawrence	I support allowing student athletes to practice and compete even if school is not in session.
7/21/2020 16:26:41	Tanya	Ayotte	Parent	Maize	Please open schools and allow children to attend without masks.

7/21/2020 16:26:52	Katy	Reinecker		Inman	<p>Dear State Board of Education members,</p> <p>My name is Katy Reinecker and I am a resident and business owner in Inman, Kansas. I am also a member of our local board of education, USD 448, and the mother of two high school-aged boys. I feel it is necessary to write to you regarding the governor's mandates, and the vote you must make tomorrow.</p> <p>Local school boards are quite capable of deciding what is best for our individual districts. What works and is necessary for a district in Johnson County or Sedgwick County, is not going to be what is best for a district in Thomas County or even McPherson County. As a school board member myself, I realize how difficult it is to know what would be the best plan for the most people. This is why you must allow local boards to do their jobs. We have the ability to take into account all the factors in our individual communities, and devise a plan to fit the needs of the children in our area. There are areas in our state that have few or no outbreaks at all. There are other places where many people are effected. A "one-sized" approach will certainly not fit all.</p> <p>As a mother, I am concerned about many of the mandates that are designed to keep our students "safe." One of my sons has asthma, and finds it difficult to breathe (and therefore concentrate) with a mask on. In addition, he has had allergic reactions to the over-use of harsh disinfecting chemicals in the past. Our County of approximately 29,000 people has fewer than 15 active cases. My son stands a much higher risk of illness with a mask, than without one. How will the Kansas State Board of Education ensure that my son (and many others like him) will not be adversely affected by these mandates, should you decide to force districts to follow them?</p> <p>Please know that I don't envy your job. There are many difficult decisions to be made in the days ahead. All the more reason to allow each district to do what is right for their schools. We ran for school board because we wanted to make a difference in our communities. Patrons voted for us because they believed we could. Please allow us to do our jobs.</p> <p>Thank you for your time.</p> <p>Katy Reinecker Board of Education Member USD 448</p>
7/21/2020 16:26:52	Bill	Gibbs	Private citizen with high	Bonner Springs	<p>I support kids going back to a physical school building. Cases of Covid in school aged youth are negligible and the death rate for them is 0 in Kansas. It is irresponsible and foolish to keep them from normal social and physical activity. The cost of avoiding the disease is a much a greater evil than the risk of contracting it, especially for this age group.</p>
7/21/2020 16:26:55	Lisa	Vance		Scott City	<p>As a nurse, I realize the impact first hand that COVID-19 has had on our community from a medical stand point. I also have seen the large impact it has had on the mental health of our youth. Many children have little adult interaction for days on end. Our youth are missing the human interaction that is crucial to development. I urge to to please allow schools to reopen for in-person education with the option for virtual learning as families see fit or medical needs require.</p>
7/21/2020 16:26:57	Jaime	Corbett	Maranatha Christian Ac	Kansas City	<p>Please do not reopen the schools until Covid is under control. I have a 7 year old daughter that I worry about, not to mention the other children, faculty, and staff at her school. I am also imuuno-compromised myself, and worry for my safety as well. Schools were closed in March when cases were way lower than they are now. Reopening August 12th, as my daughter's school wants to do, would be irresponsible and foolish.</p>
7/21/2020 16:27:01	Amanda	Morris	N/A	Salina	<p>Please give our teachers and school staff the extra time to make school as safe as possible. Three extra weeks will allow everyone to feel more ready and secure. This isn't about politics, this is about the lives of our children, their teachers and our families. Please do what is right and follow the Governor Kelly's recommendation. Thank you.</p>
7/21/2020 16:27:05	Johnna	Shoemaker		Manhattan	<p>As a teacher I feel pushing the start date back for students would allow my district to come up with a solid plan to keep TEACHERS AND STUDENTS safe.</p>

					<p>Please remove the mandate to wear masks for those over 5 years of age. To be honest I do not feel that they are effective. Here's why they are not effective:</p> <ol style="list-style-type: none"> <li>1) They will not be worn correctly, kids will pull them down below their noses, and that just defeats the purpose of the mask.</li> <li>2) They will not be cleaned properly, kids wearing masks will have spit, mucus, food and dirt on them and they will not be taken home on a daily basis and cleaned properly. Most likely they will end up in the book bag until the next day when they put them on again. Masks need to be washed daily in order to be free of germs.</li> <li>3) Kids will trade masks with each other, because they like their friends better than their own.</li> <li>4) Masks will not fit properly because they are either intended for an adult, or the elastic ear piece is stretched out and no longer has a tight fit around the face.</li> <li>5) Kids will be constantly touching their masks. As an adult, I find myself touching my mask more than I would just my face, because I am constantly adjusting it so that it is covering my nose or isn't fogging up my glasses.</li> </ol> <p>Next, when it comes to clean hands, I think the directive needs to be changed from using hand sanitizer every hour to washing hands with soap and water every hour. For one thing soap and water is much cheaper than the gallons of hand sanitizer that each class room is going to use in a years time. Secondly, soap and water are much more effective in cleaning germs than hand sanitizer.</p> <p>Lastly, holding off until after a major holiday is not going to help reduce the spread of the virus. We may see declines between now and the start date, but once there are gatherings on Labor Day, you are going to see outbreaks again. So there is no purpose in delaying the opening of schools. Let's get these kids back to school, they need the socialization that the lost with such an abrupt ending to the 2019-20 school year. They also need the direction from actual teachers and not stand in parent teachers. Parents are just not as skilled to teach kids, if they were, then they'd be teachers themselves. We pay for in-class/ face to face education, so let's give it to them and help our state testing improve. Get them back to school now!</p>
7/21/2020 16:27:11	ANTHONY	LAGREE	Catholic Schools	Hays	
7/21/2020 16:27:22	Lane	Eisenbart		Lawrence	Please delay opening schools until *at least* after labor day. I support Gov Kelly's decision.
7/21/2020 16:27:44	Rebecca	Ward	Concerned Parent	Minneola	99.96 % which is under 1% that's how many kids in the US are contracting the virus!! Let the state open up its schools!! One size does not fit all in Kansas! Let the districts decide!!
7/21/2020 16:27:47	Kali	Clune	Nativity Parish School	Leawood	Please allow us to start school! We are more than prepared and want our students back in the classroom to learn! They can't virtually learn the way we learn in person! Please override Gov Kelly and support the opening of schools! Our fear is that she will continue to push back the start date. These kids need to get back to school!!
7/21/2020 16:27:49	Robin	Webb	USD234 teacher	Fort Scott, KS	Please allow school to begin with necessary precautions as scheduled before the governors mandate and children under 12 do not need to wear masks. Research shows they are harmful at that age.
7/21/2020 16:27:51	Erica	Slocum	Gardner Edgerton Schoc	Gardner	Go all virtual schooling!! Or delay school till after Christmas Break.
7/21/2020 16:27:54	Kim	Muckelbauer	Myself/Teacher	Paola	I believe that Both the school start date order and the order of requirements when schools start should be upheld and followed as created by Governor Kelly. Both orders are written to protect the health of the students and all who work with them throughout the day. The later start date helps to ensure that all Kansas school districts will have the time needed to gather supplies, organize their individual plans, and protect everyone better than they are prepared to do so currently. It is better to open a few weeks later with a well laid out plan than to open on time unprepared and risk the health and possibly lives of all involved.
7/21/2020 16:27:55	Ron	Lawlor		Olathe	While I am unequivocally opposed to closing schools and going to a totally virtual environment (the research regarding children simply does not seem to support such a move), I do not find the delay to be overly onerous when viewed as a means of support for what will hopefully be a full year of in-person education. We cannot, however, hold schools hostage when far more likely hot spots go unfettered.
7/21/2020 16:27:56	Carrie	Allton		Lawrence	I fully support Governor Kelly's executive order delaying the start of the school year. With Covid cases rising across the state, school districts need more time to develop plans for keeping our children, teachers, and staff safe when they return to the buildings. And local health departments need more time to determine whether/when it will be safe to do so.

7/21/2020 16:27:57	Jason	Grider	Halstead USD 440 Teac	Halstead	I'm the president of the local teachers union at usd 440 Halstead. I'm asking that you repeal the governors order and let us get back to work and get the kids back in school. It's to objectively look at the data and what pediatricians are saying and get these kids back in the classroom as soon as possible.
7/21/2020 16:27:58	Bridget	Stegman		Topeka	If schools are going to start with distance/remote learning, it does not make sense to delay the start of school. It is only going to put students further behind.
7/21/2020 16:28:04	richard	spencer	Christ Prep academy	shawnee	Please open the schools on regular schedule.
7/21/2020 16:28:09	Mark	Williamson	The Williamson Family	Wichita	There are many organizations such as the CDC citing scientific evidence that masks prevent the spread of COVID, this while many states like California who have had mask mandates for over a month continue to have an increasing number of new cases. In a recent peer reviewed study with a control group comparing medical masks to cloth masks ( <a href="https://bmjopen.bmj.com/content/5/4/e006577">https://bmjopen.bmj.com/content/5/4/e006577</a> ) it was discovered that the cloth masks had a higher incidence of influenza like illnesses than the control group or medical mask group. It's also not safe to have children breathe all over masks, restricting their CO2 exhalation. Social distancing, and hand washing can suffice for teachers and administrators. Children have almost no incidence of illness or mortality from COVID. If forced to wear masks, in an open ended mandate that has no expiration while we have only tens of new cases per day in all of Sedgwick county, does nothing to stop COVID and is damaging to my children. I will find another option for school if the mask mandate is adopted.
7/21/2020 16:28:09	Shelly	Powell	Kindergarten	Goddard	I don't think that prolonging of opening schools will have an effect on the virus. Masks should not be mandatory. Let kids be kids, let them learn the way they should learn. Are we going to shut down schools every time a new flu or virus shuts down? NO!
7/21/2020 16:28:10	Linda	Normile		Ottawa, KS	I appreciate the incredibly difficult position of this board. I am concerned about both unilateral decision making AND political pressure (to open) overriding other sound decisions.  I am generally in favor of local control, though sometimes, as I'm sure you are experiencing, it is not politically expedient. As a parent I am completely uncertain of how to proceed. I want my child to be back at school, but I am aware that if most of us do so then transmission will be higher and more will be at risk, even though it's not likely to be my daughter. The truth is, even though the governor issued mask orders long ago, our commission saddled the middle ground by not overriding but also overtly not enforcing. As a result, there were minimal behavioral changes. As cases continued to rise, more businesses began filling the slack that the government wouldn't. Once they began requiring masks to enter, we have finally seen much higher levels of compliance. We have yet to see the results, that will take at least two weeks.  However, as a school employee charged with helping to craft a reopening plan, I believe we need more time. Running three models of school choice per the navigating document is exceedingly challenging and time intensive. I promise, we are doing our best. But "normal operations" are not in play. We have become front line workers. We are asking for time.  Thank you.
7/21/2020 16:28:14	Caleigh	Schneider		Wichita KS	vote yes to support gov Kelly's order
7/21/2020 16:28:15	Rick	Friesen	West Wichita family phy	Wichita	No medical indication to keep children out of school. Adjustments can be made for the higher risk students and teachers.
7/21/2020 16:28:23	Chris	Donelan	My kids	Colby	Open on time and not a fan of masks if your are going to force masks you need to force vaccinations
7/21/2020 16:28:35	Marsha	Korber	none	Seneca	Let the schools be responsible for the decision with strong guidance from you. Not all areas of the state are hot spots so let the kids get back to a little bit of normalcy in those areas. I feel we really need to question rather there should be any sports and other extra after school activities. It is more difficult to control social distance and exposure in those activities.
7/21/2020 16:28:42	Ryan	Barta		Shawnee	Please do not start school until after Labor Day. Listen to the health officials.

7/21/2020 16:28:45	Heather	Dunton		Berryton	I am a preschool teacher in Topeka, KS. I ask that you support Gov. Kelly's executive order to delay school until September. If districts are pushed to start school sooner than this, they will not be able to prepare for what is needed to be done ahead of time. Realistically, it takes more than a couple of weeks to get things together for a normal year, much less an exceptionally different year. Every year there are new teachers joining the building and adding this on to them would be unfair to start the school year without delay. It is already the end of July. Teachers need more than one and a half weeks to train, and prepare for what will inevitably be another challenging year. What doesn't need to happen is teachers being thrust into the front lines unprepared, by politicians, and having parent frustration be aimed at teachers. If teachers are given time to train for this, we will do great things. Without the delay, we will not be able to do everything that can make in-person, hybrid, or online learning what is best for our students and their families.
7/21/2020 16:28:47	Shalan	Field		Sedgwick	There is no need to quarantine or mask healthy adults or children. Children should not be responsible for wearing a mask 8 hours a day when they are not experiencing any symptoms! Children cannot be responsible for ensuring that they are wearing a mask correctly or identifying when it has been contaminated? Will 259 be supplying my child a new mask every time they touch it with their hands? How will you enforce this rule to children...send them to the principles office or detention if they are not wearing correctly? Please let the kids be kids! I feel like we live in another country with all these masks around for a virus that has a 98% chance of survival rate! Plus I have not heard of any covid outbreaks in daycare facilities, summer camps or 259 summer latchkey program?
7/21/2020 16:28:55	Bryan	Burdette	Maranatha Christian Ac	Shawnee	We would like to have school. It seems like there is more to loose by not having school. The education of kids is essential and nothing is better than face to face teaching. The kids have already missed so much. The longer they miss, it will be much, much harder to get things going correctly again.
7/21/2020 16:29:02	Shiloh	Harlan	Usd#231	Gardner	I am in favor of starting after Labor Day if this gives time for adequate PPE to be in place and schools can make plans to teach students. Having students stay in a square all day in the same room with no extra support, no pull out services, it seems very unrealistic to expect that of young students. I don't know how we can truly meet their needs in the building with these crazy restrictions.  Give me PPE so I can teach and kids can move about.
7/21/2020 16:29:05	Anita	Horinek	Sacred Heart School	Colby	Please let the individual school boards regulate school start and masks, etc. I beg you to consider how kids need to be back in school especially if they have two working parents, a single parent or special needs. Again, I beg you to let the local boards determine what's best for their staff and children and NOT make a one size fits all plan. Thank you.
7/21/2020 16:29:24	Bridget	Keesling	Myself and my family	Clearwater	Send the kids back to school. It does no good to continue to keep them out, as the numbers will continue to rise because of the testing. The numbers are skewed anyway. These kids need to learn! And masks are ridiculous, they're just going to mess with them all day long and they aren't protecting them. Open up sports!!

7/21/2020 16:29:27	Mark	Farr	Kansas NEA	Topeka	<p>To: Members of the Kansas State Board of Education  From: Mark Farr, President, Kansas NEA  Date: 7/22/2020  RE: Governor Kelly's Executive Order delaying the start of school</p> <p>Kansas NEA strongly supports Governor Kelly's Executive Order delaying the start of the school year until after Labor Day.</p> <p>We believe that local control over reopening is actually enhanced with the additional time. This gives school districts more power of local control over opening in that they will have the time to thoroughly plan their reopening and to involve more constituency groups in that planning including teachers, support personnel, parents, community members and business leaders.</p> <p>For those who oppose this on the grounds that it is a mandate, when the health of Kansans is at risk, the Legislature routinely enacts mandates to protect the people. Consider the indoor smoking ban as the best example. But we can add to that speed limits, seat belts, controls on the sale and consumption of alcohol, and many more.</p> <p>Sadly the growth of COVID cases in Kansas is out of control. And the terrible truth is that COVID-19 attacks children and some of them are dying. This reality means that it can, and if we are not careful, will spread to our teachers and other school employees. More and more young adults and children are contracting the virus. Some are bringing the virus to their friends and relatives. As if to prove that the virus does not discriminate based on age, one community in Texas has now found 85 infants with the virus.</p> <p>We know that there are four things we must do if we hope to get COVID under control. We must wear masks in public. We must social distance. We must practice good hygiene, especially washing hands. We must avoid large gatherings.</p>
--------------------	------	------	------------	--------	--

					<p>Kansas Board of Education:</p> <p>Closing and delaying schools is an enormous decision with far-reaching consequences. In order to best serve the public at large, children in the school system, and faculty and staff in the schools themselves, this decision must be considered carefully and made with the best interest of the community in mind. It would be most helpful to have good data that would lend indication on how you should decide.</p> <p>There was a recent study of contact tracing of COVID cases in Korea done from Jan-March 2020 that was released early by the CDC this week in the journal of Emerging Infectious Diseases. In this study, it was noted the highest COVID-19 rate for household contacts of school-aged children, with the lowest for household contacts of children 0–9 years in the middle of school closure. It was also found that household transmission of SARS-CoV-2 was high if the index patient was 10–19 years of age, which means children 10+ spread the illness at at least the same rate as adults. Another study from Shenzhen, China, showed that the proportion of infected children increased during the outbreak from 2% to 13%, suggesting the importance of school closure (<a href="https://wwwnc.cdc.gov/eid/article/26/10/20-1315_article">https://wwwnc.cdc.gov/eid/article/26/10/20-1315_article</a>)</p> <p>There seems to be an abundance of focus on the mortality rate of COVID-19. There is a preponderance of new data regarding morbidity of COVID-19 that has been observed. Besides the pulmonary damage of ARDS and pneumonia; hematologic, gastrointestinal, renal, hepatobiliary, endocrine, neurologic, and dermatologic long-term effects have been noted. Including a severe inflammatory shock that had features similar to those of atypical Kawasaki disease or toxic-shock syndrome that, if untreated, Kawasaki disease can result in coronary aneurysms in 25% of patients. (<a href="https://www.nature.com/articles/s41591-020-0968-3">https://www.nature.com/articles/s41591-020-0968-3</a>).</p>
7/21/2020 16:29:43	Austin	Armstrong		Wichita	Austin Armstrong
7/21/2020 16:29:46	Anai	Razo	Parent of a student	Dodge city	Do not delay fall school year. Delaying fall session WILL NOT prevent other children and staff from contracting the Corona Virus. Also, face masks will only distract kids. They will not prevent others from contracting the virus if they will be taken off at any point during the day, even if it's for a limited duration of time.
7/21/2020 16:29:47	Michelle	Folsom	Christ Prep school	Lenexa	I would like my child's school to start before Labor Day. I would also like my child to have school in a classroom .
7/21/2020 16:29:56	Shanna	Page	Public	Winfield	As a parent and elementary teacher I am thankful for Governor Kelly's leadership since March. No one has an answer but I appreciate someone looking out for my children's safety as well as my own. As far as delaying the reopening of schools until after Labor Day, the teachers really need that extra time to process the guidelines and recommendations the board only passed last week. My district, and many others, are still putting together the plan for our buildings. Teachers have no idea what the fall looks like yet. Yes, I am worried about going back in person and getting sick. Elementary kids are notorious for spreading germs and illness. Getting sick sucks regardless of the severity of it. However, I am more worried about not being prepared. I chose education as my career because I wanted to make a difference in kids' lives. I don't want to go into another semester of not being prepared and flying by the seat of my pants. It was hard on students, parents, and teachers. We need time to process our district plan so we can be safe and ready to plan for our new normal. If you ask me, the possibility of our local health commissioner recommending we close a building or all of them when we have an outbreak over and over is harder in a child than online learning. Uncertainty and an unstable routine is so much more detrimental than social impacts. If Kansas doesn't get things under control we will ALL feel the impact: unpaid sick leave, high medical expenses, tragedy. I can't shop and line your pockets if I'm paying medical bills. Please do the right thing and give educators more time to plan.
7/21/2020 16:29:56	Abigail	Compton		Hiawatha ks	Keeping the children out of school for another 2 weeks is only delaying the inevitable. The children should be in school. It IS essential. Teachers ARE essential
7/21/2020 16:29:58	Lindsay	Newton		Manhattan	Delay school openings

7/21/2020 16:30:01	Cassandra	Rhymer	Parent/teacher	Colby	I feel it is not necessary to extend the start of school. I don't see what it will really improve. As I have middle school and grade school children I also don't feel it is realistic to require masks. I would ask that our KBOE use common sense and think as parents and ask to have realistic measures to get our children back to school as normal as possible!
--------------------	-----------	--------	----------------	-------	---

I am extremely troubled by the Governor's executive order to delay the start of school for many reasons, and I think it would do more harm than good. All of our districts had plans to open or were close to having such plans she appears to want to overrule them. Adding a month does nothing for those plans as they are for the most part ready, as we often say where I work "the work always grows to the time allotted". Schools have had 4 months already to plan and from what any of us can tell have done a great job of doing so. So extending that an extra month does nothing to enable schools to get ready for students or to make it safer, but rather hampers their ability to learn. If schools need more time, let them individually ask for it. And I am fine with schools providing a virtual option, not all parents feel comfortable and not all teachers feel comfortable, but to not allow any schools in the state to open does our communities a disservice.

Kansas, like most states, has a diverse sets of needs throughout its various school systems. We live in the Blue Valley School system and that could not be more different than the 1A school systems throughout the state, most of which are in rural Kansas. I grew up in a town of 900 people, so I realize that my school that housed K-12 in one building has different needs and capabilities now from the schools my daughters go to now. The parents in these smaller communities have much different needs. My experience is that people who live in rural communities have much less ability to "work from home" so by forcing schools to remain closed you are hindering the ability of many with younger kids to earn a living, which is increased in rural communities. And for those that can work from home, you are hindering their ability to work efficiently and grow the Kansas economy.

By going virtual for an extra month, you are extending the loss of education across the state even further. Those who are less affluent often don't have access to a lap top and/or high speed internet, so you are putting them even further behind. Virtual learning for elementary and even middle schoolers is also much less effective, so those kids are going to suffer a lot, even from one more month of virtual learning. As you get into high school, it can be more effective to have some level of virtual learning so perhaps some adjustments can be made to how they operate. But again, let the school systems figure that out, don't send commands from Topeka for them.

Then there is the risk that students and teachers are in. As has been shown by the CDC stats several times over, the risk of death below the age of 15 is a fraction (1/5-1/15) of what the risk of death from the regular flu is. So for those students this year they will likely be safer because there is significantly more cleanliness that will be occurring. For high schoolers its probably slightly less dangerous than the flu (<https://freopp.org/the-chances-of-dying-from-covid-19-90cd5b885b52> does a good job of aggregating the cdc data and comparing it to risk of other ailments), again with various measures taken at most risk is on par of a regular year, if not safer. As for teachers, if they are below the retirement age it appears to be 2-4x times the risk of the flu, and less risky than a gambit of things we do every day. Again, with safety protocols, this risk will be even lower, so marginally more than a regular year. Some will site "other long term effects" rather than mortality, but those appear to be rare and again can happen with any ailment. This also ignores the fact that we are also using a month of summer which isn't flu season. The American Association of pediatrics and almost the entire medical community appears to think we should get back to school as soon as possible, Governor Kelly appears to have less faith in our schools than the rest of us do. I am not asking you to force students into schools, again there may be reasons parents feel more comfortable keeping them at home, but they should have the option.

As an additional reference here in Johnson County we have some pretty good stats on its Covid tracker. While we have an uptick in cases, below the age of 60 we have 2 deaths. TWO. Out of about 500,000 people that are that age. All deaths are unfortunate, but assuming that older teachers are given more leniency, there does not appear to be almost any risk here to them, we have the resources to deal with this. As far as the state as a whole I would guess you will find similar things, we definitely should protect the elderly but we are doing them no service by closing down the schools, all you are doing is hindering their grandkids' learning. We have covid deaths that are less than an average flu year. There are many potential reasons that we are doing better and better against this virus, maybe the virus is weakening as many do, maybe there is some level of herd immunity, the treatments are certainly improved from 4 months ago – but regardless our state is doing extremely well against this virus – something that just looking at case counts doesn't tell you.

If there is a major outbreak in a school, sure take a break at that school. Daycares have been doing this the entire time, we send our youngest to one where they have many protocols and haven't had an outbreak, probably largely because of all of those protocols. But if they do have an outbreak, we will deal with it then, and not shut everything down forever in the worry that something bad might happen.

I won't even get into the mental health, physical abuse, or other aspects that not allowing kids to come back. While the KSHAA appears to be pushing forward, I fear the next step will be to remove athletic and extra curricular events from our children's lives. KSHAA has been posting stats about youth happiness and based on my children I can attest to their mental state being much more depressed.

And again, if a school has an issue that school can deal with it, but doing so from Topeka for the entire state is wrong and we as Kansans shouldn't stand for it. We have school districts for a reason, not to have one plan forced on us by our governor, but so communities can utilize information and educate our children as each community sees fit. I suggest you let us do that and vote against the Governor's executive order.

Michael Huebner

Overland Park, KS

Dear Kansas State Board of Education:

As a Kansas teacher, I want to offer my thanks and support for the executive order to delay opening school until Labor Day. We can't afford to get the decision about how to re-open schools wrong. The health and lives of our students, teachers, staff, and their families are not worth risking opening in a way that is not safe.

In the few days since Gov. Kelly made her statement, many disturbing facts have been reported:

1. An unpublished document prepared for the White House coronavirus task force recommends that 18 states in the coronavirus "red zone" for cases should roll back reopening measures amid surging cases. Kansas is one of the 18 states listed.
2. Nearly one-third of every person under 18 years old tested for the coronavirus in Florida are positive for the virus. Palm Beach County's health department director, Dr. Alina Alonso, warned county commissioners Tuesday about the potential long-term health consequences for children who catch COVID-19. She said the virus could cause lifelong damage, even for children with mild illnesses. "They are seeing there is damage to the lungs in these asymptomatic children. ... We don't know how that is going to manifest a year from now or two years from now," Alonso said, according to the Sun-Sentinel. "Is that child going to have chronic pulmonary problems or not?" Florida had tested 54,022 Florida residents under the age of 18, according to the state's COVID-19 pediatric report on July 10. Of those tests, 16,797, or just over 31 percent, have come back positive. Meanwhile, the positivity rate for Florida's entire population stands at roughly 11 percent.
3. A popular Missouri summer camp reported 82 cases of coronavirus, the Stone County Health Department (SCHD) announced Monday. Organizers of the Christian Kanakuk Kamp in Lampe, Mo., in the state's southwest region near the Arkansas border decided to shut down last week after a number of suspected cases were detected. On July 2, health officials reported that at least 41 campers and staff had tested positive. By Monday, that number doubled to 82.
4. Researchers in South Korea have found that children between the ages of 10 and 19 can transmit Covid-19 within a household just as much as adults, according to new research published in the US Centers for Disease Control and Prevention journal Emerging Infectious Diseases. Researchers also found that children ages 9 and younger transmitted the virus within their household at rates that were a lot lower.

(Most of the above items were found on CNN.com and thehill.com. The Florida data was found on the website of a local Florida FOX affiliate TV station.)

So much is still unknown about how COVID-19 is transmitted and who is most at risk that caution is warranted. I appreciate the thorough work that was done by the State Board of Education to set up such detailed guidance as to how we can better educate in each of the three situations. I saw a report on KCTV-5 in Kansas City that indicated the guidance within the report is as follows:

Cases declining – On-site learning.

Cases flat – Hybrid learning.

Cases inclining – remote learning.

Kansas is considered in the Red Zone right now, with increasing cases in the state. Rather than making the three learning models guidance, please make them mandates. If we open too soon without the proper safety measures in place, chances are that many will needlessly become infected. If that happens, we will be forced to prolong remote learning and perhaps lose a lot more on-site time during the school year. However, if we apply the proper level of precaution now, it will be sooner in the long run that the whole state can become safer and then businesses as well as schools can return to more safe activity and stay open. If the mandates are connected to the data of cases and whether they are rising, flat, or declining, it takes the onus off of local school boards and connects the decision to science.

I know there is pressure from both sides of this issue. Please make the health of the children, their extended families, and adults who are involved in education your highest consideration.

Thank you.

Jon Copeland

---

Chairperson Busch and members of the State Board of Education,

We would like to thank you again for the opportunity to present the outstanding work of a thousand Kansans who are all trying to provide the best educational opportunities for all Kansas students. It was an honor for each of us to be their representatives.

The development of the *Navigating Change 2020* document has been in progress for months. Although we have been involved in this process and have done everything we can to be ready to start school on time, the Governor's announcement to delay the start of school lifted a great weight off our shoulders. We have been aware of the contents of *Navigating Change* for several weeks as we were participating in its development. However, there were certain decisions that could not be made until after it was accepted by the Kansas State Board of Education.

One example of such a decision centered around the ability to provide families a remote learning environment option. We could not finalize our plans until we were sure of the parameters under which a student who is attending school remotely could be counted as attending school. Between your approval of these parameters and the day that teachers return, we must determine which families and students will choose a remote option. Once we have that information, we will need to reschedule students and reassign staff across the entire district. In addition, we will need time to train staff who will now be teaching remotely full-time.

Another area of planning that may become problematic for districts is the strong recommendation (and now requirement) for students and staff to wear masks. Although reusable barrier masks may be available before school starts, other personal protective equipment recommended in *Navigating Change* may not be available on short notice. Some districts are still waiting on items that were ordered months ago. The extra time afforded by the Governor's Executive Order will help every district be more prepared for bringing students and staff safely back on campus.

Like you, we have been hearing from many people about the pros and cons of delaying the start of the school year. One group that should receive strong consideration is our school staff. Although there are data that suggest that our younger students are less susceptible to severe cases of COVID-19, this is not necessarily true for our staff. In fact, there are many individuals who have health conditions which would put them at much higher risk for severe complications. With the current rise in positive cases in Kansas at this time, a delayed school start may be the best way to avoid wider restrictions in our communities.

Given the complexity of all of these issues, and the scope of the work that we have to do, we fear that districts may find it difficult to implement the guidance that is recommended in an appropriate time frame. Although it may be unpopular with some people, delaying the start of school will give all districts the ability to carefully plan for the 2020-21 school year and provide the best hope of maximizing student time On-Site, while also helping to reduce the alarming increase in COVID-19 cases across Kansas.

Again, thank you for allowing us to present the work of an outstanding group of Kansans. This shows once again that Kansans Can!

Please over rule the mandate for masks to be worn all day in public elementary schools. I think this is ridiculous! The kids will not do well with this nor do I think it is healthy. They need to go back to school and learn, not be afraid and let this virus ruin their education. If the kids that don't have a good immune system need to wear a mask then let them. Mandating all kids wear a mask is not the answer!!

Thank you,

I am a first grade teacher. I have been giving the delaying of schools much thought as we are getting ready to move into some unknown areas. COVID is a very scary virus but when you take into account the higher number of tests being done (I know 2 people this week being tested due to elective surgeries on Thursday) I believe that adds to our numbers.

Our children have been out of school since March 5. If we continue to keep them out of school by not reopening in August as planned that is 3 more weeks of regression. I see the neighbor kids out playing together and it's not only with their own families. (they do not have masks on) Overall I see families now going about everyday business but have a mask now on at indoors places.

I would like you to seriously consider opening the schools as planned. My friend has been given information from 3 pediatricians from Children's Mercy that indicate it would be safe to open our schools. She feels safe sending her children to school even though they do have underlying health issues.

I do worry about the children that live in families where there can be neglect and abuse as well as very little food. This is a very hard time for them. At this time we have a 21 year old living with us who had been in the foster system for years and the abuse he had when he was younger is very scary.

Please consider having the schools open so our children can get back to some type of normal in their lives.

Dear Board Members,

I write today to implore you to stand by Governor Kelly's proposal to postpone the start of school and/or implement virtual learning. Teachers and children are counting on you to do what you can reasonably do to keep them safe.

As Kansas City is currently a “hot-spot”, it simply doesn’t seem prudent or reasonable to open our schools in-person right now. Hopefully, the addition of the mask order will help get our numbers under control. Until that time, I support a delayed start and/or virtual learning. In my opinion, we either start virtual or push back the start of school until the requirements for phase three are reached in our locale under the federal guidelines. We must rely on facts and take care to prioritize safety over inconvenienced parents.

On a more personal note, my daughter Adison will be entering Kindergarten at Clear Creek this fall. We moved to this neighborhood expressly *because* the schools are so wonderful. I mourn that her introduction to public school will be “strange” no matter what happens. While I was initially concerned about what learning virtually would mean for her social skills, it occurred to me last night to consider what attending in person would mean for her social skills. What will the long-term effects be of having to stay at least 6 feet away from everyone around you on a 5 or 6-year-old? Of washing your hands every hour? What will the effects on their speech development and emotional/nonverbal queuing be when they can’t see the full expressions and formation of words on their peer or teacher faces due to masks? What would it be like to explain to my Kindergartner that a peer or teacher is seriously ill or, God forbid, dies? As I consider these points, it just seems irresponsible to send children back in person at this time.

I don't envy your position as a board member, and I certainly appreciate your willingness to listen. Please vote to act prudently and follow Governor Kelly's mandates as she presents them. At the very least, please provide virtual options so that those who share my concerns have appropriate alternatives.

Thank you again for all you do,

I see nothing unreasonable about delaying school until until September 8 after Labor Day. But I do think for the students social, mental and educational stability it should not be delayed any longer than that.

However I do think it's unreasonable and unrealistic to expect students and staff to wear masks and etc.

FYI: I grew up in Iowa and we never started school before Labor Day. School was also dismissed before Memorial Day. Winter break in Iowa is also shorter than here and school was never cancelled everytime a snowflake fell! I've never understood why Kansas resumes school in the middle of summer and has such a long winter break!!!

Please Allow Children BACK TO SCHOOL AT THE USUAL TIMES, With Little Disruption To Their LEARNING And SPORTS Activities That They Are Accustomed To ...

If Teachers and Faculty find this decision is Not in their Own Best Interest, please Reassign them or accept their Early Retirement or Resignation...

The federal and state governments who say it is safe for children to return to school are working off the latest evidence. Here are five reasons we know it's safe.

## 1. Kids get infected with coronavirus at much lower rates than adults

This is the case in [Australia](#) and [throughout the world](#). There are no clear explanations for this yet, but it is a consistent finding across the pandemic.

Although SARS-CoV-2 can cause COVID-19 in school-aged children, it rarely does and children with the disease have mild symptoms.

Fewer than 150 children below 15 years [have been infected](#) with SARS-COV-2 in Australia since the pandemic began. This is compared to the [6,695 confirmed cases](#) of COVID-19 in Australia at 25 April, 2020.

## 2. Children rarely get severely ill from COVID-19

Data from [around the world](#) and Australia have confirmed children very rarely require hospitalization, and generally only experience [mild symptoms](#), when infected with SARS-CoV-2.

Deaths in children due to COVID-19 are [incredibly rare](#). Very few [children globally](#) have been confirmed to have died from the virus (around 20 by our calculations), in [comparison to more than 200,000 overall deaths](#).

Many parents have worried their kids' friends could be infected with the virus without showing symptoms. But this doesn't seem to be the case. A study in Iceland [showed children without symptoms](#) were not detected to have COVID-19. No child below ten years of age without symptoms was

found to be infected with SARS-CoV-2 in this study.

### 3. Children don't spread COVID-19 disease like adults

During the yearly flu season, children spread the flu to friends and grandparents alike. But COVID-19 behaves differently. In household clusters in China, Singapore, South Korea, Japan and Iran, [fewer than 10% of children](#) were the primary spreader – meaning the virus goes from adult to adult much more effectively than from children to other children, or even children to adults. The same has been found in new studies in [The Netherlands](#).

We still don't know why this is. It takes us all by surprise as kids with snotty noses are always blamed (and probably responsible) for driving the annual round of winter coughs and colds.

### 4. School children in Australia with COVID-19 haven't spread it to others

Schools where cases have been diagnosed in Australia [have not seen](#) any evidence of secondary spread.

This means even with kids sitting right next to each other in the classroom, they are very unlikely to infect their friends.

### 5. There is no evidence closing schools will control transmission

Modelling shows [only a small incremental](#) public health benefit to closing schools in the case of usual respiratory viruses such as influenza. But COVID-19 is quite different to flu, so any of the benefits seen for influenza [are likely to be even less](#) in the case of COVID-19.

During the 2003 SARS outbreak, school transmission was [not found to be a significant contributor](#) to the outbreak and school closures did not influence the control of transmission.

I am a 20 year Kansas teacher veteran and I'd like to encourage you as a board to approve the governor's executive order to delay the opening of schools.

Having the extra time to gather materials, train staff, and to monitor numbers of cases will allow schools to be prepared for the thousands of students to be safe in class.

Our district would only have around 8 hrs of time to prepare if our school were to start on our regular scheduled start date.

I'm asking you as an educator, but also as a mother of three school age children. Please put politics aside, and go with your gut instinct. Please approve the order.

**Subject:** Fwd: Mask Mandate for Schools  
**Date:** Tuesday, July 21, 2020 12:01:00 AM

---

To Whom it May Concern,

I'm completely appalled that the governor is requiring mask in schools. I am an RN and I do not see how we can expect children to wear mask all day or to don and doff appropriately. We can't even get adults in public to wear them appropriately. I feel we are placing children in a position that will cause undue stress and anxiety on them during a time they are already having many negative changes in their life. Teachers will not be able to be responsible for monitoring mask. If the public can enter a restaurant and remove their mask once seated then children should be able to remove mask once seated in their classroom. Children are only about 2% of all Covid cases.

Per the CDC June 28....

Based on available evidence, children do not appear to be at higher risk for COVID-19 than adults. While some children and infants have been sick with COVID-19, adults make up most of the known cases to date.

<https://www.cdc.gov/coronavirus/2019-ncov/daily-life-coping/children/protect-children.html>

Please allow children back in school without mask. We are looking at long term damage if our children can not learn. Parents must work and many are not home to help with online schooling. Children need to have the social interaction of school. Suicides rates are increasing as is abuse. Please stand for our children and do not vote for mask and definitely not all day wear.

#### BE A VOICE 4 THE VOICELESS

These are vulnerable little innocent lives you are speaking for. Until a vaccine or cure is founded there should be no kids gathering in public schools. They can be home schooled. I think we have a moral obligation to our children that can be easily summarized: number one, protect them from harm.

#NotMyKid

( I'm not political, I'm practical )

NO SCHOOL until there are other options besides 6 ft rule/masks OR permanent damage/death. DO THE RIGHT THING..I WAS SO PROUD OF GIV KELLY WHEN SHE SHUT DOWN THE SCHOOLS IN MARCH !!!

Lynn Crystal

childcare worsening poverty and neglect, abuse of children (which will be underreported), lack of support for children with special needs, anxiety, depression and lack of physical activity and peer relationships in children. The list goes on and on. But I want this post to focus more on the science of the disease so it can inform our public policy decisions.

6. I hope the above data are reassuring. The more we know, the better we can tackle and live with this disease.

Edit: Now that this post has been shared hundreds, scratch that, thousands of times (never imagined this), I want to say first of all, that I in no way am intending to detract from the seriousness of COVID-19. It is imperative our country get this disease under control -by social distancing, closing indoor businesses which are not essential, wearing masks, etc, but the above data at least suggest to me that children are not driving the pandemic; adults are. And I also want to say that a lot of what I shared above was recently discussed in the UCSF combined Medicine and Pediatric Grand Rounds lecture (an inspiration for me to write this to get this scientific info to the public). I encourage anyone interested in the above data to watch this recording of the Grand Rounds : [https://www.youtube.com/watch?v=yh9gmca6o\\_A&feature=youtu.be&fbclid=IwAR2HH3myAdjOBmebb23iI2DWPSkdYrEp2niYa\\_KRiwWStxqrN5f6JNxXPD4](https://www.youtube.com/watch?v=yh9gmca6o_A&feature=youtu.be&fbclid=IwAR2HH3myAdjOBmebb23iI2DWPSkdYrEp2niYa_KRiwWStxqrN5f6JNxXPD4)

And this article about the above UCSF physicians' stances on reopening schools and transmission in children: [https://linkprotect.cudasvc.com/url? a=https%3a%2f%2fmissionlocal.org%2f2020%2f05%2fucsf-medical-grand-rounds-the-doctor-is-ready-to-send-children-back-to-school-with-care%2f&c=E,1.BP\\_iVi09RqX7Sh1luEAqwfMbjvKYwhYXEJCGLebo1KairClacZxKtecBrMr789QPu8uJB82jLmm0tgLxvQ\\_wUDfD67gknICyQW4Oc4kppjT2cp9CD145sAi&typo=1](https://linkprotect.cudasvc.com/url? a=https%3a%2f%2fmissionlocal.org%2f2020%2f05%2fucsf-medical-grand-rounds-the-doctor-is-ready-to-send-children-back-to-school-with-care%2f&c=E,1.BP_iVi09RqX7Sh1luEAqwfMbjvKYwhYXEJCGLebo1KairClacZxKtecBrMr789QPu8uJB82jLmm0tgLxvQ_wUDfD67gknICyQW4Oc4kppjT2cp9CD145sAi&typo=1)

I welcome any data or questions you have. The science about COVID in pediatrics is evolving and we don't have all the answers (far from it), but I hope people can use the above data to help them make informed decisions about children's activities and school openings.

Now in my OPINION- elementary school is an essential service of a country. All other first world countries seem to realize that you can not open the economy until kids have somewhere to go (and preferably learn and be familiar and comfortable with the place!). When one considers the number of couples or single parents who are essential workers, or now working again in the US, with kids too young to watch themselves - I ask you- where will they go if not to school? And will the alternative be better? Since children of working parents do need to go somewhere and watched by someone (this is why many day cares and summer schools have been open up to this point). We as a society need to decide together, based on the science, where the best place for these children is (school vs. day care vs. being left alone vs parents quitting their jobs) and who should take on the risks of caring for them/teaching them (teachers vs. day care workers vs. school proctors (as they are doing in Arizona), etc). We also need to consider in this calculation what the short and long term risks are of kids NOT being in school (loss of learning, inability to report abuse, neglect, loss of school meals, exercise, social interaction, inability to escape poverty, loss of individualized education plans for children with special needs). It is our job together as American people to figure out what is in the best interest of all our children (regardless of socioeconomic status) - they are truly the future of our country and figuring how to open schools safely is infinitely more important than reopening Disney World (WHY is this open?). I hope we can use the above data and strategies of other countries (as well as our own YMCA daycares!) that have successfully managed this pandemic to guide us. Having NO plan for how to most safely open our elementary schools is not an acceptable modus operandi for our country.

\*\*\*\*\*

Edit to add new data:

7/16: In Germany, a study of over 2,000 children: "Scientists from Dresden Technical University said they believe children may act as a "brake" on chains of infection." <https://news.yahoo.com/german-study-finds-no-evidence-164704005.html>

7/16: Study performed by the Swedish and Finish Ministries of Health "closure or not of schools had no measurable direct impact on the number of laboratory confirmed cases in school-aged children in Finland or Sweden. The negative effects of closing schools must be weighed against the positive indirect effects it might have on the mitigation of the covid-19 pandemic." <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.folkhalsomyndigheten.se%2fcontentassets%2fc1b78bfbfde4a7899eb0d8ffdb57b09%2fcovid-19-school-aged-children.pdf&c=E,1,hAyoieqG-vjQcIKnTyu7txiBRdpV7ITzSuohWR0KYZO7-zZDCmUPJzM07JVpokYMKc-k6znw1LQyMi48D9KhlX7rb8nclZIS2Dzg1HqQ,,&typo=1>

\*\*\*\*\*

7/19

Per the CDC as of 7/15 for time period 2/1/2020 - 7/11/2020  
# of COVID deaths ages 1-14 is 22  
# of influenza deaths ages 1-14 is 87

In newborns 0-1 the numbers are much closer: 9 for COVID vs 14 for influenza.

An important thing to point out is we are missing the denominator for these calculations. It will be a challenge to determine the death rate of COVID until we know how many total cases there are and with many ages 1-14 suspected of being asymptomatic, this will be a challenge, and the true death rate for this population will probably need to come from a country that has done EXTENSIVE population-based testing which is not based on symptoms. Keep in mind that unless hospitals are completely full that disease prevalence in a country should not affect mortality rate.

[https://data.cdc.gov/NCHS/Provisional-COVID-19-Death-Counts-by-Sex-Age-and-S9b9g-hcku?fbclid=IwAR0fgYc4Y1-BJt3h9-OhMK-XqbJL\\_WL2sh10WstEJfLPNpEVOCKbaunBaGpg](https://data.cdc.gov/NCHS/Provisional-COVID-19-Death-Counts-by-Sex-Age-and-S9b9g-hcku?fbclid=IwAR0fgYc4Y1-BJt3h9-OhMK-XqbJL_WL2sh10WstEJfLPNpEVOCKbaunBaGpg)

This study from France ([https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.medrxiv.org%2fcontent%2f10.1101%2f2020.06.25.20140178v2.full.pdf&c=E,1,ioomDbrNi46znSi\\_6GJ9dW-DG2rz6CbHlazu-vAG31yu2QeXyV33Gtm3LAb3or-TAMEZ4evdc-pZUwM7UEb1zplUEHsUFplazhQUxzM6lPlrPAYRY1Dj1WacIj6&typo=1](https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.medrxiv.org%2fcontent%2f10.1101%2f2020.06.25.20140178v2.full.pdf&c=E,1,ioomDbrNi46znSi_6GJ9dW-DG2rz6CbHlazu-vAG31yu2QeXyV33Gtm3LAb3or-TAMEZ4evdc-pZUwM7UEb1zplUEHsUFplazhQUxzM6lPlrPAYRY1Dj1WacIj6&typo=1)) looked at 3 students in primary school with COVID-19 while in school and they did extensive contact tracing and found these students went on to pass the disease to 0/1047 pupils and 0/51 teachers.

I also want to touch on the South Korean study that was mentioned in the New York times ([https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html?smid=fb-share&fbclid=IwAR2W6LE4j0rxBtE-rLCs8oLoU-7WGRK1K8\\_6ngbUPaBByOxhyeu8ouTLe0](https://www.nytimes.com/2020/07/18/health/coronavirus-children-schools.html?smid=fb-share&fbclid=IwAR2W6LE4j0rxBtE-rLCs8oLoU-7WGRK1K8_6ngbUPaBByOxhyeu8ouTLe0)). This was a nice, large study which found in the 10 and younger age group the following amounts of transmission: 1% for non-household contacts  
5% for household contacts  
This age group also made up only 6% of the total cases in the population.

However, the important caveat with the study ([https://wwwnc.cdc.gov/eid/article/26/10/20-1315\\_article](https://wwwnc.cdc.gov/eid/article/26/10/20-1315_article)) is they state "we could not determine the direction of transmission" (meaning they could not determine if it was the child who transmitted to the adult or vice versa). So instead of more rigorous contact tracing, as in the French study above, they did the following: "Because we could not determine direction of transmission, we calculated the proportion of detected cases by the equation [number of detected cases/number of contacts traced] x 100, excluding the index patient".

Using a calculation such as this as a substitute more rigorous contact tracing could result in an overestimate of the number of transmissions from the youngest group if this group truly had few to no actual transmissions. So, this South Korean study, while large, does need to be looked at with this limitation in mind and in the context of the other studies that have been done in this age group. The South Korean study does reaffirm what has already sadly been found in previous studies, which is high school age children likely transmit the disease as effectively as adults.

Now FINALLY, thanks to everyone for keeping me up to date with the latest studies. And thank you for all of the personal messages. This post is still far from comprehensive and definitely not perfect. I would love to turn this into a peer reviewed article with other authors and reviewers helping me see beyond my own biases (we all have biases and that is why both team work and the peer review process are SO IMPORTANT in science; right now this is nothing more than a Facebook post and I am the first to admit it). If anyone is interested in working with the data here and anything else we can find for possible publication, please reach out.

1st...

Why would the school need to wait 4 more weeks to open school? The reason was so they can prep and get things ready for safety protocols.

How do they not have enough time right now, when they still have 3 weeks or so, to do just that!?

What is really the situation that is making a month delay to open school?

2nd question...

All the comments that school age kids aren't vulnerable to covid... How do we really know how susceptible they are, as we had school closures to prevent exposure?

3rd...

What about the organ inflammatory illness that kids are getting, will that be a concern and are there different safety measures for that?

Thank you!

## SEND OUR TEENAGERS BACK TO IN PERSON SCHOOLS!!!

Most importantly, high school and college students need to be present and amongst each other. This time in life needs exposure and immediate feedback from fellow classmates. In person with their teachers allows for direct assessments and the ability to “notice” each student in person where a computer zoom call or alike cannot capture what’s truly going on. Also, there needs to be statewide documents about the rules for safety & COVID. For example, Colorado has the same fliers on everyone of its businesses doors of entry including outdoor places. The communication is precise & consistent. Plus they are required to enforce no mask, no entry or business. Walking around people wore their masks outside of public places as well. Our schools should have the same expectations for the staff and students. Our teenagers need to be all in at school with masks & frequent hand washing times required. We need to face this mess straight on. Put our teenagers in the classroom face to face where they will best benefit not on a computer screen where there is ways to hide your struggles and lose site of direction and understanding. These are the years specifically to educate but even more intense is the need to prepare them for their college/post high school plans. You cannot achieve this without a well formed student done so through all the personal relationships, direct connections and academic fortitude one gets in the social environment in HS. The staff gets to know their students in many ways by the students present in their classrooms not virtual where everyone has a varying environment in which to learn. Be CONSISTENT Kansas with expectations and make the message clear and if not followed, fine the entity not following the guidelines and send the person away unable to enter due to not following the orders from the State.

Believe!  
Karen

Hello,

My name is Heather Kolb. This fall I will begin my first year of teaching as an elementary art teacher. This spring I was student teaching and had to anxiously watch as schools closed and activities were canceled due to a mountain of unknowns. So many art projects have sat in an empty classroom for months now. Children have been home, many without much structure for the past several months. I understand the need for extra caution back in March when many had only heard the word COVID once or twice. It has since been a word many have heard dozens of times a day.

There are still plenty of unknowns as we continue to battle our way through this pandemic, but there are also many clarities. For one, children crave structure, especially children who may have learning disabilities or other difficulties. For another, children are extremely unlikely to contract this disease and spread it to others, teachers, etc. Summer already presents itself as a time for 'backsliding,' but to keep students out of school for even longer than the extended period they have already experienced could warp their pace of development and cause for difficulty in learning socially as well.

As a teacher, I am ready to get into the classroom. I would ask you not to delay the start of the school year.

Thank you  
-Heather Kolb

Please respect Gov. Kelly's order to start school after Labor Day. Covid cases are on the rise. Schools need more time and money to make schools safe. Waiting a couple more weeks to achieve this is worth it.

I'm deeply concerned by the closure of schools mandated on the state level, and I implore the State Board of Education to overturn the governor's action. School closure decisions should be left to the county and local school boards.

We have risks every time we wake up. Motor vehicle accidents, death by narcotics, depression, suicide many of which are worse since this social isolation has begun.

The risk to those under 50 without medical conditions is on par with contracting influenza or driving a car, risks that most readily accept on a daily basis.

Closing schools statewide now, when many students, teachers, and communities in general might be healthy, is unnecessarily shortening the school year further.

The governor wrongly assumes that local school officials have been sitting on their laurels doing nothing to prepare to start school. That is completely wrong where I am from. They have spent countless hours preparing to open mid August.

Local counties and school boards are fully capable of making these decisions for themselves. There are still multiple counties with no active cases, low population density, and small class sizes, and they should not be treated with the same broad brush as Johnson and Shawnee counties. People who don't live here should not be making these decisions for us.

Local counties on school boards are also capable of deciding about masks and when they think it is appropriate. We can all read and understand guidelines. We also understand that the virus will permeate anything except for an N95 mask. And unless you have a hood, protective clothing, and N95 mask on at all times so the virus can't get on mucous membranes of nasal passages as well as eyes, we will be exposed. This research based evidence does not support children wearing masks. I won't even start about adults and masks.

We most likely are all going to get this virus at some point. Our best course of action is to try and keep people's immune system's robust and a part of that means keeping mental health status stable.

**LET US DECIDE WHEN WE CAN RETURN TO SCHOOL. OVERTURN THE GOVERNOR'S EXECUTIVE ORDER!!**

Thanks!!

To Whom It May Concern,

I am writing this email to encourage the State School Board/members to support the executive order that Governor Laura Kelly issued today, July 20. The number of Covid-19 cases continue to increase in Kansas, and even in smaller Mitchell County where I teach, the numbers are starting to increase as well. Likely this is happening, or is going to happen, in many communities in Kansas as things are opening back up. I am hoping that the mandatory mask order will slow down and decrease numbers in the coming weeks.

Her order is also going to give our school time to come up with the necessary protocols to follow and supplies, like PPE, to safely open the school. We will also have more time to connect with teachers about what the kids from the previous year missed and create a plan to teach them the things they may not have learned or need to revisit so they can begin the curriculum in their new grade. Lastly it will also give teachers three more weeks to come up with plans for learning that will follow socially distant rules and plan for any time that we might have to be out of school because of exposure to Covid-19, personally, or because of a school shutdown. Schools just received the KSDE plan last week, and I feel like things are going to be so rushed if we were to start on time now.

I want to be in school and I know my kids need to be in school, but we need to make sure we have a plan in place so that everyone can come back and feel safe. I have talked to many coworkers and friends in education who have said they are worried about coming back too soon or not having enough safety measures in place to start school. In my opinion, I feel that we just do not have enough time from now to when school was set to start to come up with adequate enough plans, especially with all the plans we will need to have in place, as teachers, in case we were to quickly change to online learning again.

I feel that this later start will make more people (staff, students, and parents) feel a little more ready and confident for starting a safe and successful school year. Thank you very much for all you do for public education.

**Subject:** Please Vote NO on School Delay Mandate  
**Date:** Monday, July 20, 2020 9:53:40 PM

---

Dear Kansas Board of Education Members:

First, I am writing to you to recognize your leadership and support you in this unprecedented situation. I am thankful for you and know your heart is to do what is best for the people of Kansas.

Second, I am writing to you in preparation for the Kansas School Board of Education Vote the mandate to delay school opening.

I respectfully request that we work with you to ensure a safe school environment that accomplishes both of the following:

- Safe School opening following the Board of Education Return to School Plan
- No delay to student participation in school, athletics, and activities.

In response to the Mandate delaying School opening statewide, Please vote the mandate down and allow the individual districts to make their own decisions.

This will allow each district to make the decision that is best for its community. The situations vary widely across the state and a one size fits all approach does not make sense.

Based upon the information available, I believe we are able to send them safely back to school and activities now. I also believe we do more harm than good if we delay starting school and activities on time.

I am one of the over 6,200 people who have signed the [#HelpThemPlayKansas](#) petition supporting all [#Kansas](#) High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay.

We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.

Thank you for letting me voice my opinion

Students need to go back to school now. No delay. There are districts that have had very little covid. So why does Governor Kelly want to keep our schools close when she claims she is the education governor. Educate our students is what we need to do

Let's not wait. Experts say mental health problems, abuse of children etc.

I feel that it is important to give districts the time to adequately prepare for a variety of learning scenarios and to return to school safely. In my district, staff will have exactly three days to adapt to the recommendations document adopted by the State Board if we follow our regular calendar. Let alone create a structure to follow in the variety of scenarios that may arise. I live in a community, where the desire to play sports overrules the common sense approach to providing a safe and well planned educational year. In my district, staff has been left out of any conversations about the upcoming year and that has only led to anxiety and distrust of the process needed to ensure the safety of all stakeholders.

Kansas Department of Education members;

Good Evening. I want to see schools that can safely reopen, be allowed to do so. Our children need to get back to school. I can't understand why students and staff can't return to school, but they have been able to participate in summer sports activities. It seems to me that if it was safe to be around one another then, it ought to be safe to go to school. I understand that some areas of the state have a large number of cases, and in those instances, delaying the start of school may be wise. However, most of the state doesn't have high rates of COVID-19.

I am afraid that further delaying school and learning, our students will suffer longtime deficiencies in their learning. It is a fact that students who have a high rate of absences fall behind in their education and I am afraid that this will be the case now, if students can't get back to school.

It is also a case of necessity for those vulnerable students who find that school is their only safe place during the day. Unfortunately, not all of our students have the support that they need at home and rely on the safety net of school staff to provide that support.

Please considering stopping the governor's executive order to delay school.

Sincerely,  
Michelle Fischer  
St. John

Dear KSDE,

Please keep students and teachers safe by delaying the start of school and supporting remote learning. I have been a teacher for over 20 years. I love my job, but in the current pandemic, it is not safe for school to resume. Please delay the start of school and uphold the governor's plan. Remote learning is the optimal way to have school this fall so that teachers and students can return to a safe learning environment. It is unsafe and unfair to send students and teachers into buildings and environments that will only amplify our current pandemic situation. The citizens of Kansas need you to do the right thing and delay The start of school until the virus does not have such a strong foothold in our community. Together we can overcome the challenges we face and make our schools stronger and safer. Thank you.

Hollie Rice

Re: Executive Order 20-58

20 July 2020

I am commenting as a parent of three elementary-aged children (one with health challenges), and as a teacher. Please accept and follow through with Governor Kelly's executive order to delay school start dates until Labor Day. This EO follows CDC guidelines of low community transmission being a necessity before opening schools fully. It includes safety guidelines that will be necessary in keeping both staff and students as safe as possible in these dangerous times.

My health, my wife's health (she teaches also), my children's health, my students' health, and the health of scores of co-workers and family members depends on us following the CDC guidelines. Look at the recent outbreaks at camps in Texas, Illinois, Georgia, and Missouri for a peek at what our schools could become, especially given that 40 states are showing increases of infection cases. Just today I saw a student death and a teacher death, both in Florida.

I ask that you put aside the political pressures and act in the best interest of the lives and safety of Kansans in general. More than the lives of students and teachers is at stake, as each person in a school has family at home, friends at church, and other contacts outside the school. The risks of opening schools too early without ensuring safety are immeasurable, and the disruptions (like in March of 2020) that could occur if we start unprepared but then have to close schools would be equally devastating. Given several weeks of preparation time, including a chance for the increases to flatten out, will allow local school boards to craft policies and procedures that will work for their communities, as well as procure PPE for employees and students. Plus, there's a small benefit to transfer students if we all start on the same schedule.

Local boards and communities can still have a vigorous debate about whether their schools should offer only distance learning, or have limited or traditional in-person learning, or something in between, a delay now (during a recognized increase in cases) will at least give school leaders time to put proper safety precautions in place.

**Subject:** Executive Order 20-59 masks in schools  
**Date:** Monday, July 20, 2020 6:19:35 PM

---

This is a horrible idea.

1. How are children supposed to learn when they can not see their teachers' faces? Sometimes it's hard to understand if you can not see someone's mouth to make out what they are saying or see if they are happy or being stern. They need to see whole facial expressions to learn proper communication skills.

2. How will teachers know when their students are struggling, upset, happy, or sad? Eyes don't show everything.

3. How will teachers catch speech and language issues when they can not see the child speaking, forming words, etc.

4. Some children are terrified of the masks, and have trouble reading the intentions of others who are wearing masks.

5. If a student is harmed by someone in school, it will make it more difficult for them to identify their assailant.

6. Many people, especially children, have sensitive skin. Hand sanitizer every hour is going to cause health issues and discomfort. Just one more thing distracting from the learning environment.

7. Younger children will never quit touching masks. One of the main fundamentals of PPE is not to not touch or adjust your mask....it is considered dirty. So they will just be collecting germs all day then touching and spreading them more than if they weren't wearing the mask in the first place.

Also, masks are supposed to be replaced when soiled.....are we going to require someone provide a new mask every hour or so once a student sneezes or gets it wet somehow? If they take it off, where are they going to put it? It needs to be stored properly so as not to spread germs even more.

These are but a few of my main issues with everyone wearing a mask at all times. There are many emotional and mental health issues that need to take precedence as well as safety and infection control issues that just mandating everyone to wear a mask doesn't cover. My youngest child always thinks people in stores are glaring at him, and even once thought someone spoke to him meanly just because their voice was rough sounding. He couldn't see them smiling...he totally misinterpreted the context of what they said.

I feel bad for those who spent so much time coming up with recommendations after weighing out the the concerns and opinions only to have their time wasted by a one size fits all mandate that is only going to cause more issues and less education....just what our youth in Kansas does not need.

Kids go to daycare, go swimming, play at friend's houses everyday....we don't have any major issues in our area....we shouldn't be mandated to follow the same rules as everyone else. Other states aren't following suit either....we might actually loose good families who would prefer to move than deal with this kind of force. Many might turn to homeschool and not actually have the support they need to be successful. This is a very sad day in my opinion. I'm not sure my husband will continue to let our children go to public school anymore.

I beg that this order be reconsidered.

Thank you for your time.

Allison Huff

July 16, 2020

The Honorable Laura Kelly  
Governor of the State of Kansas  
300 SW 10th Avenue, Suite 241S  
Topeka, Kansas 66612-1590

Re: Teachers/Covid19

Dear Governor Kelly:

Please know I greatly respect the policies and orders regarding Covid-19 that you have brought to the people of Kansas. I fully support your efforts.

Please consider this regarding our public school teachers and higher education educators:

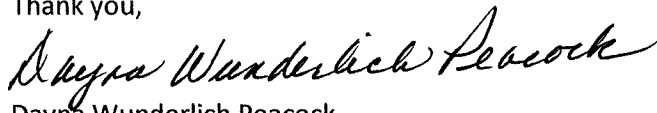

My daughter teaches in the middle school in Atchison, Kansas (minimum of 100 students). Her husband teaches at Benedictine College in Atchison, Kansas (minimum of 200 students). My third grade granddaughter (19 classmates). Each day they teach or attend school, they will be bringing home exposure to over 300 people. That is daily.

Should one of them develop Covid-19 symptoms or become ill the household will quarantine. If they fall ill one after the other, quarantine could last for weeks with the best case scenario. This would greatly impact the fluidity and consistency of the educational process. What happens if the general cold/influenza, etc. infects them? How many times will they go through testing?

- Please consider virtual learning for the majority of students to last through at least March 2021 if not the entire school year of 2020/2021.
- Please consider allowing certain special education students to have in-school services on a limited basis.
- Please consider allowing at-risk for abuse students to return to school on a limited basis. The teachers know who they are.
- Please make hotspots available throughout Kansas for rural and non-internet zones
- Please continue providing lunches to those in need

Governor Kelly, you are handling a very tough situation in a very gracious, honest and direct way.

Thank you,

A handwritten signature in black ink that reads "Dayna Wunderlich Peacock". The signature is written in a cursive, flowing style.

Ms. Renee Scott

Dr. Michael Fulton

Mr. Stephen Minnis

Dear Kansas State Board of Education,

07/21/2020

Our 5 year old child will be attending, Kindergarten at a Kansas USD 259 Magnet School this Fall. My husband and I are gravely concerned about a proposed delay of the 2020- 2021 school year. We are advocating for all Kansas School Districts to begin classes on time, starting in August 2020; and not to be pushed back (as Governor Kelly has ordered). We are asking the Kansas State Board of Education to follow thousands of Parent requests to re-open schools on their originally planned 2020- 2021 school schedule. We pray you will make an informed decision, and Vote in accordance with the majority of Pediatricians and Parents nationwide, who want Schools to Reopen on time.

I currently hold the seat of our local Head Start Policy Council Chairwoman, within the Sedgwick, Harper and Butler County areas. I have 2 children enrolled in the Child Start program, and I assist in overseeing and leading monthly meetings regarding policies for Head Start in this tri-county area. So, I am well aware of the possible COVID-19 infection risks children may encounter, as they attend in-person classes. Our communities cannot live in fear of contracting (any) sickness, while sacrificing our children's education. Not attending school has more long-term detrimental effects on children's mental and social well being, and far outweighs any possible infection rates. We agree a common-sense approach should be taken while children attend classes; such as Temperature Checks upon arrival, frequent Hand Washing and Social Distancing in most settings.

I'd like to make it known, my husband and I are fully against the mandated order which requires our Elementary School-aged children to wear face coverings/ masks while attending school. Published scientific research on the benefits of face coverings stopping or slowing the transmission of disease are mixed. There is, however, evidence that supports long-term (non-medical grade) mask wearing actually increases infection rates, and spreads viruses and bacteria more readily. This is noted in the following study and attached link <https://bmjopen.bmj.com/content/5/4/e006577> . Since there is no conclusive evidence of face coverings/ masks stopping rates of COVID-19 infection, I am opposed to this practice. Enforcement of such an order is a clear violation of our inherent personal rights, civil liberties, and person freedoms.

Thank you for taking time to read this letter!

Best Regards,

Daria Nelsen

Dear KDHE officials:

Please do NOT send kids and teachers back to school in buildings for several more months.

This is a PANDEMIC — Covid is a dangerous, highly contagious disease. Local school boards need to take good medical advice for a medical problem, and not leave it up to parents and public who find it easy to not listen to their local health official because they are tired of this long inconvenient situation and they wrongly believe there isn't much danger anymore. That is totally wrong!

If you put kids and teachers together for hours indoors in enclosed rooms, all it takes is one infected person with no symptoms to start it spreading and it will spread faster and faster like wildfire.

A NY Times story this morning says 40 percent of infected people show no symptoms, and that towns and localities with Covid victims have 2 to 13 percent more infected people than health officials know about because some sick people can't afford to go to hospital and some have very mild cases without any symptoms but can pass on virus to many others.

Doctors also say exposed children are excellent silent carriers because they will bring virus home to other family members and may continue going to school spreading virus while not appearing to be very ill at all.

A story in NY Times Sunday said children from age 10 to 19 can pass on the virus as much and as easily as adults do.

Please stop everyone statewide from going to school. The cases in Kansas are still increasing. This is the wrong time to open schools and expose children and loved ones to a lethal disease. It can kill children and adults or leave them with lasting multi-organ damage and longterm suffering.

It is too dangerous to start up school this soon.

I have a son who is a teacher and two grandsons in school and I feel very worried.

Thank you,

Nancy Tompkins

**Subject:** Delay of 2020-2021 School Year - VOTE DOWN MANDATE  
**Date:** Tuesday, July 21, 2020 12:08:32 PM

---

In response to the Governor's proposed order delaying school reopening statewide, I implore you to **vote the mandate down and allow each school district to make its own decisions for safely reopening schools**. Individual school districts are best suited to make educational decisions for the benefit of the students and families in the community including how to safely return to the classroom, and when. Delaying the start of the school year and sports/extra-curricular activities until after Labor Day across the board for all Kansas schools is not necessary and does not take into account various factors and circumstances in each individual district and community. My sons— incoming 10<sup>th</sup> grader at Blue Valley Northwest and incoming 7<sup>th</sup> grader at Oxford Middle School—are desperate to return to class and activities as soon as possible. Distance learning did not go well for us and I worry that a delayed start to the school year and/or continuation of distance learning will be detrimental to their education and that of other students who need in-person interaction with teachers and peers.

Understandably some families are concerned with returning to in-person classes and are more comfortable with virtual classes. For those families, distance learning is the right option for them. But many other students—my children included—need to return to in-person classes as soon as possible. I firmly believe we are able to safely send students back to school and activities now with appropriate PPE, sanitation protocols and social distancing. I recognize the seriousness of the virus and the need to protect the teachers, students and community; however, the long term, detrimental impact to our children cannot be overlooked or diminished. Students are struggling. They need live instruction, interaction with peers, extra-curricular activities and a return to some semblance of normalcy. Parents are struggling. We are returning to the work place and need to know our children are safely in school and receiving appropriate instruction.

Please vote down the Governor's delayed start mandate and allow the school districts to determine how best to safely resume classes.

Thank you for your time and consideration.

Thank you to all that have spent hours and days working on this situation.

Let us go forth with those that we work for in mind~ families that build our schools, fund our programs, and loan us their kids during the day to teach. It's a humbling thing when you think of it.

Essential workers: healthcare providers, firemen, grocery store clerks, trash service, and many more have done their job through this. We can too and do it in the buildings. We can and will follow guidelines. There will be cases. It will happen. That is happening. Just as the rest of the world is dealing with it, so will we.

Kids are at amusement parks, playing in ball tournaments, swimming at the lake, playing with their friends in their neighborhoods, going to church, skating at the roller rink... and then school won't be open? That doesn't match up. Sports are also a huge part of many students' lives- the physical and mental well being benefits are numerous, immunity boosting at its best.

Our special needs children, students living in poverty, children that live in trauma and crisis ~ they are most drastically affected by school being closed. I do live in a metro area that has more virus activity and know that we may have different guidelines than those in far southeast or northwest Kansas. Please let local areas address their needs and go forth with plans that serve their communities best.

Suzy Hartley

---

I am from rural Kansas. My children attend a 1A school in Nemaha County. We have very few active cases in our county at the present time. I am against the Governor's order to keep schools closed until after Labor Day. My children have been participating in summer weight programs all summer long. A group of around 50 individuals have been meeting 3 days a week for just over an hour in the mornings. When the Mask Mandate was placed into order – which our county rescinded – our school took steps and provided masks to all the children and coaches to wear when they are not able to be 6 feet apart, and moved most of the activities outside. Even though our county doesn't require them, our school took the extra steps on their own to make sure they all continue to stay safe and help with the spread of COVID. Our community and school has had 0 cases. The Governor's reasoning to delay school opening for schools to prepare better I feel is an inaccurate statement. I feel MOST schools have already taken measures to do their part to help prevent the spread of COVID 19. The schools in our county have already put into place measures to take temperatures. Our kids have been doing it all summer long. They are not allowed into weights until their temperature is taken. If they have one, they are sent home. If they are working in the school, they must have their mask. If they don't, they are sent home. Our schools have had since March, to work on what they feel they need to do on their end to provide a safe learning environment for the kids. When talking to school leaders in our district, they have deep cleaned the school, they already have hand sanitizing stations throughout the school. They have their own measures put into place before any recommendations were made public from the KSBOE and the Governor. Just like all essential businesses that have remained open and were able to adjust quickly to new cleaning measures, etc, the schools too jumped on board and started to gather supplies. If essential businesses can continue to operate, there is no need for schools to remain closed. Allowing them 3 more weeks to plan and stock pile cleaning supplies, masks, hand sanitizer, etc, is just plain bogus. Schools have already done their part. They want the kids back and they have gone through extreme measures to make sure they are prepared for the kids to return in August. The Governor's Executive Order to delay the opening of school is only hurting our children's education. And if the cases don't start to drop again, will she delay the opening even further? At that point will they then go to online learning only? As a family with two parents who are essential workers who work full time and have 5 children in school, we have already made the decision one of us will have to either go to working part time or quitting all together to teach our children as trying to work full time and teach 5 children in the evenings did not work and our children most definitely were the ones who ended up with the raw end of the deal. They are the ones that got hurt the most because we all failed to provide them the education that they need. As a parent we didn't have access to see what our children actually did during the day, what was turned in, if it was acceptable work or of poor quality. We had teachers who were great to work with and went above and beyond to make sure us parents understood how to navigate various websites that our district used. If we go back to online learning and we have to cut working hours, that means we then struggle with the idea of providing for our kids, paying bills and keeping the lights on. Just because one city, town, county, etc may have an increase in cases, does not mean you can just shut down all schools across Kansas. I also encourage you to look at the number of active cases compared to the total number of cases. Yes, Kansas may have 23,000+ cases, but out of that, how many are truly active cases. In our

county, we have 35 cases, but only 5 active cases. All of those cases are in older individuals and not associated with the school.

Also throughout the summer our kids have participated in summer ball. Through the entire season fans, players and coaches have all taken necessary precautions and were able to go through the season without any cases of COVID 19. We have kids who play travel ball and those as well have also went to various parts of the state and taken all necessary precautions and again, no reported cases of COVID 19.

Your job as being a member of the KSBOE is to ensure our kids are getting the education they need to be successful in life. Delaying the opening of schools is not what is best for our kids. They miss school, they miss their classmates, friends, teachers and are eager to get back to learning. They need the structure for their wellbeing. By allowing schools to let parents decide which form of education is best for them – online only, classroom, or mixture of the two – I see no need to delay schooling. Parents can decide as to which form of learning is best for them and their children. DO NOT let all children down because of what the Governor thinks is best. You are the ones who have had meetings with all schools and know what is best for Kansas. Do your part to sure our kids get the education they deserve.

Thank you.

For those of us who teach, please consider time for a safe reopening where both students and teachers can enter a classroom without fear. We are at war with a stealthy and silent enemy. Beginning school unprepared with a faculty that is afraid to return to the classroom, benefits no one.

Thank you for your consideration.

I hope and pray all of you on the Kansas State Board of Education will please consider postponing school.

Please support Gov. Kelly's executive order 20-58

Thank you

Linda Mitchell

Circleville, Ks.

July 20, 2020

Kansas State Board of Education:

The Kansas Association of Education Service Agencies (KAESA) exists to serve the needs of all Kansas Schools. As the state's largest provider of professional learning and support for Kansas teachers, administrators, and classified staff, KAESA is committed to helping every school, every educator, and every student succeed.

A core value of KAESA is the belief that every student and every staff member should be able to teach and learn in a safe, orderly, and caring environment. The governor's executive order delaying the start of school until September 9 supports this belief in three key ways:

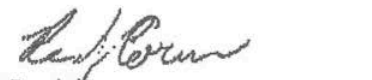

- It affords schools the time needed to secure the necessary safety equipment and implement the necessary safety measures as outlined in the KSDE guidance released to schools on July 16.
- It allows teachers and administrators the time necessary to fully implement and receive sufficient training for on-site, remote, and blended learning environments as outlined in the KSDE guidance released to schools on July 16.
- It allows Kansas residents, through guidance from state and county health officials to take necessary measures to lower the rate of COVID-19 spread across the state to a level that would better ensure a safe learning environment for every student and every school employee.

It is for these reasons that KAESA is in support of the governor's executive order delaying the start of the school year to September 9, 2020.

7/20/20

To the Kansas State Board of Education-

I'm writing to voice my input on Gov. Kelly's executive order on the delayed opening of Kansas schools. I am a band director in McPherson. As a teacher, I have strong emotions and honestly, I have conflicting wishes for the start of the 20-21 school year. While I would love more than anything to go back to "normal" and see my students in school, direct a marching band normally, and teach music like normal—I also believe it's ignorant and naïve to ignore the very real truths that are staring us in the face. *This is not a normal time.* As much as I, along with many strong voices in my community, want to minimize inconvenience and deviation from regular schedules, the medical and scientific realities are pretty clear. *This is not a normal time.* Possibly if we had done a better job of acknowledging and embracing this fact months ago in our state—taking proper precautions, mitigating risks with masks—there is a chance we may have been closer to returning to normal. But in reality, until a vaccine arrives, we will be living in an unusual time, much like that of the Spanish Flu of 1918. If we can accept that this is a historically difficult time, it becomes clearer that we should adopt measures like Gov. Kelly's to keep our children and communities as safe and healthy as possible, knowing that in a number of months, a vaccine will be the key to returning to actual normalcy.

Given the nature of this virus and the effects we see it has had across the globe, I suspect this is not the last difficult decision that will face our local, state, and national leaders. I view this executive order as an act of *moderation* by Gov. Kelly—it buys precious time for our state to assess the current spike of cases and adjust plans accordingly. It gives communities who have not taken collective action to mitigate risk of virus spread a little more time to correct course.

I also view this as a *moderate* course of action because I can imagine that more extreme measures may have been considered—like reverting to full virtual education across the state. In fact, as an adult responsible for large numbers of children under my instruction in McPherson, I am very concerned about the realities of returning to on-campus instruction—whether on time, after Labor Day, or through December. I think protective measures like distancing and masks are the bare minimum of precautions we must take, but my concern is that in highly populated campuses like schools, even those precautions are not enough to keep students and staff safe. With that in mind, it's clear to me that Gov. Kelly's order is necessary, but perhaps not the final measure that will be needed to keep our citizens safe, depending on how the virus spread progresses in the coming weeks and months.

I want to also make clear that I appreciate the pressure and scrutiny you are under, and that there are many who will be voicing their opposition to the executive order. I'm well aware of those opinions, and have friends and family who feel strongly that way. So many of the arguments I've heard from their side, though, rely on faulty logic or outright falsehoods. I believe the coronavirus is real, and that medical science and medical professionals are all the proof we need that this is no "hoax." Many are downplaying the ability of children to spread the virus—there is some evidence that older children may, in fact, spread the virus at similar

rates as adults. In no way whatsoever do I believe that full virtual education matches the effectiveness of normal in-person classes. But given the extreme measures likely required to make in-person classes safe enough, I'm doubtful that the quality of education we're all longing for will truly be present right now anyways.

On a personal level, I hope that the concerns of educational professionals are taken very seriously. After all, it is our lives, livelihoods, and the health of our families at home that are at stake. Many educators are in at-risk categories themselves, and many of us like myself have young families or at-risk members at home, whose wellbeing shouldn't be held hostage by a public that is rabidly demanding to send their kids back to school.

Gov. Kelly's executive order will not be a perfect cure for our predicament. Nor will it probably be the last measure or modification that will be necessary this year. But, this is a necessary *moderate* step at this time to give our communities the best chance to be safe and healthy, while giving students the best educational experience possible this semester. It has been clear at times in recent months where a lack of leadership has hurt nations, states, and communities. There will be no unanimously popular solutions, but the best measures will be the ones that—though likely not universally supported—will at least save lives. I believe Gov. Kelly is exhibiting leadership, and my hope is that you will see the merit of her order and take a brave stance in support of our communities' health and education.

Respectfully,

Kyle Unruh  
Director of Bands  
McPherson High School

Please do NOT delay opening schools. It is vital for the kids to continue live learning. If people don't want to send their kids to school, they can elect to keep them home. Working parents cannot keep their jobs and provide for their children if they have to stay home without pay to do the job teachers have been educated for and hired to do. If teachers are. It live teaching. There should be a large reduction or ceasing of their income.

## Executive Order 20-58 comments

How well prepared are the schools districts? From what I can tell not much. If additional time is required to get it right then it is a good idea to delay the start.

Considering airborne transmission of COVID 19, the possible number of asystematic students and that it is something like 10X more contagious then the common Flu it is imperative that all precautions are considered since it is impossible to reduce the risks to zero.

The experts believe the virus is transmitted by small particles versus droplets which makes it spread when people talk and can hang in the air for hours. Ventilation systems can exasperate the situation because it can spread the virus over an entire room quickly. Masks and limiting the number of children per room might be required.

While the instructions are fairly general what about special needs teachers like SLPs (Speech Language Pathologists) ? They require being able to see students mouths inside and out and to be closer then 6 FT. Shields and Plexiglas walls might be required. Special needs teachers usually have smaller offices/rooms in some cases which make the risks higher. How often will small rooms be sanitized?

While it is impossible to wear masks while eating I remember grade school lunch rooms as being noisy and children talking louder and or shouting which makes transmission all that more easier. What extra precautions are being taken?

Also in consideration choirs, bands, orchestras practices need to be evaluated since singing, woodwind and brass instruments spray saliva and can easily spread the virus to everyone in the ensemble.

Taking students temperature is a good idea but if standing in groups to enter school is a bad idea. Staggering times might be required. Trying to keep children distant is like impossible.

The difficult part that school boards have no control over is multi-generational family's or parents that are high risk. Its one thing to protect students at school but it extends much farther. In some cases it is imperative that students on food programs to go back to school since in some cases that is all the food they get in a day.

There are some difficult decisions to make in the next few weeks and many are on a district and school by school basis. Getting it right is necessary since as we have seen it does not take much to see cases explode. Herd immunity is not going to happen so prevention is the best method in my humble opinion.

Good luck,

Michael Kraus  
Concerned Citizen  
Rose Hill

**Subject:** open schools, no masks  
**Date:** Tuesday, July 21, 2020 10:07:53 AM

---

School must begin in August as originally planned. This virus is here - so are we really supposed to quit our lives forever now? Nothing is going to get better. How did we go from wanting to slow the spread to have NO spread. This is ridiculous and everyone is being treated like pawns.

Kids must be back in school and masks should be optional or at least left to local districts' decision.

Governor Kelly has overstepped her boundaries too many times and someone has to stand up to her and remind her this is not a dictatorship.

Private schools have the right to make their own decisions on wearing masks or beginning school. How does she have the power to tell private schools what to do? Tuition is paid by the individual and we receive no state funding. She needs to leave private schools alone. If the private school is of a religious connection, this could be considered an infringement on church and state.

As a collective school leader's organization, we support the Governor's Executive Order. Upon having conversations with our associations, many questions remain unanswered and/or unresolved, but all agree there is nothing more important than the safety of our Kansas students and educators. We trust the Executive Order is a decision based on the statistics compiled and analyzed by trusted Kansas health experts and not a decision driven by individual thought and rhetoric.

Students need to return to school and our associations understand the social and emotional challenges each student is facing, but that cannot be the sole reason we risk the health of students and staff returning to reopen schools. We strongly believe in local control and equity for all students and staff. When the two meet at a crossroads, we need state leaders to step in and make a decision.

Unfortunately, with rising numbers of COVID-19 cases, the looming question remains the same. Is this the best time to bring large gatherings of students and adults back together? Would schools be less susceptible to spreading the virus if we wait to open schools and allow the number of new cases to decline?

By supporting the Executive Order, USA-Kansas believes this will provide additional time to prepare for the critical reopening of our schools and will allow for school districts to:

1. better train and prepare teachers/staff for a competency-based learning model or a possible return to remote learning;
2. gather community input for the successful integration back to school for all students;
3. make sure schools have all the required PPE equipment needed to begin the school year;
4. hire the additional staff needed to support transportation, cleaning, health services, and the daily operations of our schools; and
5. delay putting our most important resources back (our students) into large indoor meeting locations as the large parts of the state works to reduce the rampant spread of COVID-19.

USA-Kansas represents

Kansas Association of School Superintendents  
Kansas Principals Association  
Kansas Association of Special Education Administrators  
Kansas Association of School Personnel Administrators  
Kansas Association of School Business Officials  
Kansas School Public Relations Association  
Kansas Leaders of Career and Technical Educators

Members of the Kansas State Board of Education,

In a typical year, Kansas schools would be making final preparations to reopen their doors over the course of the next three to five weeks, and even this year, we believe most schools will be ready to greet students back to begin the new fall semester. This is not a typical fall semester. With the recent release of the Navigating Change document, school districts are comparing notes and preparing for the known and unknown. Instructional teams are reviewing new learning options, creating unique schedules, and preparing teachers for a more robust remote learning model.

Unfortunately, with rising numbers of COVID-19 cases, the looming question remains the same. Is this the best time to bring large gatherings of students and adults back together? Would schools be less susceptible to spreading the virus if we wait to open schools and allow the number of new cases to decline?

The Kansas School Superintendents Association (KSSA) supports the Governor's Executive Order to delay the start of school. Our schools can be ready to reopen, but at the same, we trust the Executive Order is a decision based on the statistics compiled and analyzed by trusted Kansas Health experts and not a decision driven by individual thought and rhetoric.

By supporting the Executive Order, KSSA believes this will provide additional time to prepare for the critical reopening of our schools and will allow for school districts to:

1. better train and prepare teachers/staff for a competency-based learning model or a possible return to remote learning;
2. gather community input for the successful integration back to school for all students;
3. make sure schools have all the required PPE equipment needed to begin the school year;
4. hire the additional staff needed to support transportation, cleaning, health services, and the daily operations of our schools; and
5. delay putting our most important resources back(our students) into large indoor meeting locations as the large parts of the state works to reduce the rampant spread of COVID-19.

G.A. Buie  
Executive Director  
Kansas Association of School Superintendents

Dear Board of Education,

My name is Harlee Tilley. I'm an 8<sup>th</sup> grader from Bucklin, ks. That's in Ford County. Ford County USED to have the ~~most~~ most coronavirus cases in the state. Not anymore. In fact our numbers are trending down. We stayed open. Think about that. Bucklin is a small town. We have a little over 800 people and have only had 5 cases since March. I don't think that masks are mandatory in small schools and I also don't think that pushing back school is very smart either. Now, I am just an 8<sup>th</sup> grade girl but I think my opinion matters too. Also, I don't think I learned jack squat during online learning. And I'm a 4.0 student. Anyway breathing in your own  $CO_2$  can't be much worse than the big C in some cases anyway. I know it's serious but if we don't get things back to normal soon we are gonnd have much worse problems on our hands.

Sincerely,

Harlee Tilley

**To:** Kathy Busch <kbusch@ksde.org>  
**Subject:** Physician Support for Governor Kelly's EO

Chairman Busch,

I would like to encourage you to vote in support of Governor Kelly's executive order for delayed start to school. I am a local pediatrician (pediatric hospitalist) with KU Wichita Pediatrics and the Pediatric medical director at Wesley Children's Hospital. I have also initiated and am facilitating a regional collaborative group of physicians, school district nurses, and counselors/psychologists. Our group, Kansas COVID Workgroup for Kids, is a non political ad hoc collaboration with the mission to identify and address the needs of children and youth in our state as a result of the pandemic. We have offered school reopening guidance to KDSE and have been working with and advising many school administrators in Sedgwick County and other counties in the state as they work on their reopening plans.

As a Pediatrician and a mother of two daughters in the Andover district, I recognize the importance of school and its educational, mental, and social impacts for our children and youth. It is very important that we get our students back into the school setting as soon as we can. However, it is even more important that our students return to school in the safest manner and environment as possible. We must prioritize the safety of our students, the safety of our teachers and staff, and the safety of our families over any financial or political pressures. As there will certainly be challenges and many unknowns in the upcoming academic year, we must assure that our schools are prepared and equipped to be as successful as possible in the upcoming year.

My team has been meeting with school districts, reopening taskforces, and superintendents over the last couple of weeks. As I have been engaged in those meetings and conversations, it is evident that many schools are on a trajectory that will not allow them to be adequately prepared for reopening by a mid August start date. As schools have just received the 1000+ page Navigating Change document this week, that leaves only 4 to 5 weeks for many schools to create, adjust, and implement their reopening plans. It also leaves only a few weeks for training staff adequately, for obtaining the appropriate supplies and resources needed for risk mitigating processes and procedures, and for educators to build their onsite and remote lesson plans. We also do not have a robust community plan in place for the increased testing capacity that will be needed once schools open. Simply put, schools need a few more weeks to adequately prepare.

I am also very concerned in regards to the community spread within our own Sedgwick County. We have seen a rapid raise in the number of COVID cases and our percent positivity of testing in SC is now over 11%. This should correlate with a high risk zone within the education realm meaning that only remote education should be considered. In addition, our hospitalization rates for COVID have more than tripled since July 1<sup>st</sup>. If we continue on this trajectory without community changes to mitigate and reduce spread, we will likely exceed our capacity and resources within the hospital in the next couple of weeks. Our peak numbers would then likely coincide with the start of the academic year. While we are in agreement that young children do not seem to transmit and spread the SARS-coV-2 virus at the rate of adults, older children and teens are shown to transmit the virus. The increase burden and spread among students, faculty and staff, and families would likely overwhelm the system forcing us to use our scarce resource

plan where are physicians are forced to make decisions regarding who receives treatment and therapies and who is left to die.

Although I advocate for school reopening and getting children back into schools, I do agree with the decision that Governor Kelly has made to delay the start of schools. Our schools need more time to prepare to maximize their success and to ensure the safety our students, teachers, and staff. In addition, our community needs to see a steady decline rather than a sharp increase in the number of cases as we are seeing now. Regardless of your political views, please remember a medical pandemic is a public health issue and we must prioritize the health and safety of our students, teachers, and staff. I ask that you would please vote in favor of the executive order for delayed start to school.

Thank you for your time,

Stephanie Kuhlmann, DO, FAAP  
Associate Professor of Pediatrics  
Hospitalist Division Director  
KU Wichita Pediatrics  
Medical Director  
Wesley Children's Hospital

***As a pediatrician and the parent of children in Wichita Public Schools, I support the decision to delay the reopening of Kansas schools and make the KSDE guidance mandatory for school reopening. Please work to approve Governor Kelly's executive order.***

*On-site learning is vital for academic achievement and the social and emotional wellbeing of children. In order to successfully return to on-site learning, we must work together to decrease viral transmission in our communities as well as set up safety measures to mitigate transmission within schools. Delaying school reopening until after Labor Day will allow public health officials to have a better understanding of the viral transmission in our state and also give schools time to prepare and implement measures that will improve student and staff safety.*

*The success of schools reopening will directly depend on the community prevalence of SARS-CoV-2. Currently, our state is experiencing increased cases, case rates and percent of positive tests for COVID-19. Opening schools at this time would be unwise. We are in the midst of a serious pandemic and the primary focus should be the safety and health of all students and staff. Furthermore, it is difficult to predict how the prevalence of COVID will change over the next few weeks. Our state is at a crucial time where we must work together to reduce the transmission of SARS-CoV-2. This means that all Kansans must limit non-essential public activities, wear masks in public places and practice good physical distancing and hand hygiene. Although these efforts have reduced viral prevalence in other communities, there has not been a consistent public effort to execute these recommendations in our state. It is likely that Kansas will continue to see increasing rates of COVID-19 in our communities.*

*So, in the midst of the rising cases and uncertainty about the trajectory of COVID-19 in our state, schools must develop and prepare for on-site learning while also developing hybrid and remote learning programs. They must maintain a focus on academic achievement while also supporting our state's students in other domains such as social and emotional wellbeing, essential therapies and mental health. The "Navigating Change: Kansas Guide to Learning and School Safety Operations" document released by the Kansas State Department of Education outlined important academic guidance and safety measures. **Parents, students, teachers and staff must feel protected and safe upon school reopening. The KSDE guidance should be mandatory to make school as safe as possible.** Schools have only recently received this guidance and will need extra time to obtain supplies and prepare for the start of the school year in order to implement these recommended operations effectively.*

*Kansas needs strong leadership that prioritizes safety during this ongoing public health emergency. Your collective decision will have a large impact on the health of our state. Delaying school reopening by just a few weeks will give us a much better understanding of our community burden and give schools more time to prepare. Making the KSDE guidance mandatory will greatly improve the safety of our schools. These decisions will help protect the health and lives of many Kansans.*

*Thank you for considering my recommendation. Please feel free to reach out to me with any questions.*

*Paul Teran, MD

July 21, 2020

State Board of Education  
Kansas State Department of Education  
900 SW Jackson Street  
Topeka, KS 66612

Dear State Board Members,

Thank you for this opportunity to comment on Kansas Governor Laura Kelly's proposed executive order to delay the start of the 2020 – 2021 school year.

The Kansas Chamber is a statewide organization that advocates on behalf of the Kansas business community. Its members are small, medium, and large employers located across the state and from all industry sectors.

The Chamber has heard from many chamber members concerned about this delay for multiple and valid reasons. Chief among their concerns are the negative impact keeping students out of the classroom for another three to four weeks will have on their education as well as the governor attempting to override the local control of school districts.

The Kansas State Department of Education and the state's school districts have spent the last several months working with staff, parents and local health officials on reopening plans that prioritize the safety and well-being of its students and staff as well as the students' educational needs.

Without a statewide order, local school districts still have the ability to make their own decisions on opening dates and methods of instruction. With the health impact of COVID-19 contrasting greatly across Kansas, it is clear one size does not fit all.

The Kansas Chamber and its members are confident the State School Board and local school districts are well prepared to decide when and how to safely begin the new school year. We ask you to act to keep oversight and control of our schools in the hands of the state's local school districts.

All the best,

Alan Cobb  
Kansas Chamber  
President & CEO

I am a parent and a teacher.

As a parent of a special needs child, she needs school. The material sent via online or hybrid has been very weak and she has taken steps back socially. The routine of a school and the rigor is what she needs. Even with two educators at home, it is not the same.

As a teacher, we need to go back to school. The line between the haves and have nots is only going to grow wider if we do not open the doors. Not everyone has a parent at home to help with education needs and most have to work. Not to mention meals, social and emotional needs to be met.

Please open our schools back up.

Anthony Douglas

**Subject:** Delay of 2020-2021 School Year - VOTE DOWN MANDATE  
**Date:** Tuesday, July 21, 2020 12:08:32 PM

---

In response to the Governor's proposed order delaying school reopening statewide, I implore you to **vote the mandate down and allow each school district to make its own decisions for safely reopening schools**. Individual school districts are best suited to make educational decisions for the benefit of the students and families in the community including how to safely return to the classroom, and when. Delaying the start of the school year and sports/extra-curricular activities until after Labor Day across the board for all Kansas schools is not necessary and does not take into account various factors and circumstances in each individual district and community. My sons— incoming 10<sup>th</sup> grader at Blue Valley Northwest and incoming 7<sup>th</sup> grader at Oxford Middle School—are desperate to return to class and activities as soon as possible. Distance learning did not go well for us and I worry that a delayed start to the school year and/or continuation of distance learning will be detrimental to their education and that of other students who need in-person interaction with teachers and peers.

Understandably some families are concerned with returning to in-person classes and are more comfortable with virtual classes. For those families, distance learning is the right option for them. But many other students—my children included—need to return to in-person classes as soon as possible. I firmly believe we are able to safely send students back to school and activities now with appropriate PPE, sanitation protocols and social distancing. I recognize the seriousness of the virus and the need to protect the teachers, students and community; however, the long term, detrimental impact to our children cannot be overlooked or diminished. Students are struggling. They need live instruction, interaction with peers, extra-curricular activities and a return to some semblance of normalcy. Parents are struggling. We are returning to the work place and need to know our children are safely in school and receiving appropriate instruction.

Please vote down the Governor's delayed start mandate and allow the school districts to determine how best to safely resume classes.

Thank you for your time and consideration.

Thank you to all that have spent hours and days working on this situation.

Let us go forth with those that we work for in mind~ families that build our schools, fund our programs, and loan us their kids during the day to teach. It's a humbling thing when you think of it.

Essential workers: healthcare providers, firemen, grocery store clerks, trash service, and many more have done their job through this. We can too and do it in the buildings. We can and will follow guidelines. There will be cases. It will happen. That is happening. Just as the rest of the world is dealing with it, so will we.

Kids are at amusement parks, playing in ball tournaments, swimming at the lake, playing with their friends in their neighborhoods, going to church, skating at the roller rink... and then school won't be open? That doesn't match up. Sports are also a huge part of many students' lives- the physical and mental well being benefits are numerous, immunity boosting at its best.

Our special needs children, students living in poverty, children that live in trauma and crisis ~ they are most drastically affected by school being closed. I do live in a metro area that has more virus activity and know that we may have different guidelines than those in far southeast or northwest Kansas. Please let local areas address their needs and go forth with plans that serve their communities best.

Suzy Hartley

For those of us who teach, please consider time for a safe reopening where both students and teachers can enter a classroom without fear. We are at war with a stealthy and silent enemy. Beginning school unprepared with a faculty that is afraid to return to the classroom, benefits no one.

Thank you for your consideration.

**Date:** Tuesday, July 21, 2020 11:46:47 AM

---

Hello,

My name is Julia Sanders and I will be a first year teacher at Shawnee Heights Middle School this year. I am more than excited to be in an 8th grade ELA classroom and to begin my dream career of being a teacher. To provide you with some background about myself, I graduated with highest honors from Baker University this last May with a double major in History and Secondary Education as well as a minor in Psychology.

I understand that this Spring and Summer has made educators, administrators, parents, and students alike grapple with a more than challenging set of situations. Both my husband and I ended our senior year of college without a graduation or a celebration with our families. These set of circumstances aren't unique, however, I do not want to see them being the norm. I am a high-risk individual as I was born with only one of my lungs, thus making the possibility of contracting the virus extra problematic. However, I do not believe in living in fear and I am wanting to get into the classroom and teach kids in the most effective manner. I believe that continually postponing school is problematic for the students' social and emotional health, is hard on families, and keeps some students stuck in unsafe/unstable home environments. As I learned in my plethora of college classes, social and emotional health is incredibly important to adolescent development and that, as teachers, we are trained to work on their academic lives in addition to their social and emotional health. By using best pedagogical practices, we are able to conglomerate academic skills with social and emotional skills to provide a balanced learning environment for our students. By delaying school, though, students are not able to work on those ever-so-important social and emotional skills. Moreover, families need students back in school so that they are able to maintain their professional jobs. Many employers were extra gracious with the situation they were presented with last March, however, many parents are needing to return to work. Furthermore, parents are not classically trained teachers. Although many have the intense desire to help facilitate their children's learning, students learn best in an environment where a teacher is able to help them at every step of the way. Continually asking parents to step in and perform an educators job, is not an effective way for students to learn the content. Lastly, and most importantly, continually cancelling school could have detrimental effects on the students who are in challenging home situations. As educators, we all know that some of our students are in bad situations at home. Whether that be a food shortage, neglectful parents, or even abusive situations, not all students come from great households. As teachers, we recognize that every day in the traditional classroom. We form relationships with our kids to help them learn, be their advocate, and provide them with consistent structure. We continually take note of students who might be needing extra help- in whatever facet that may be- and we provide that for them. However, during the online portion of last year, I felt that many students were not getting the attention or advocacy they needed. Now, as we are faced with a delayment of school yet again, I feel that these students are again not getting the voice they deserve.

Please recognize that I am not intending to devalue the virus. I have a healthy respect for the impact it has had on Kansans as a whole, and my community as well. However, I do not believe that students effectively learn at home. I saw it at the end of my student teaching last semester, with only approximately 5-10 of my more than 100 students regularly completing

work and turning it in. Although I know educators were forced to pivot fast to a shocking set of circumstances, I do not believe that all students were granted an effective education in the last quarter of the 2019-2020 school year. It is our duty as educators, to provide Kansas kids with a competent education at the start of this year. Kids deserve advocates. Kids deserve teachers who will voice that they want to be with them in the classroom and will work to achieve that.

I understand that returning to school poses risks. Again, I am not undermining that. However, I feel that we can safely return to school with a set plan that all students and staff will follow. If you feel that returning to school right now poses too many risks, I will respect that. But, I do not feel that continually delaying school will be an effective solution to this seemingly ongoing problem.

Sincerely,  
Julia Sanders

July 21, 2020

Greetings KSDE,

I understand that these times are full of anxiety and uncertainty for many Kansas families. Kansans want to get back to work and they need schools to be open to provide adequate childcare for their children. However, I find Covid-19 to be a far bigger threat to human life than unemployment or loss of childcare.

Research suggests that Covid is highly contagious and spread mainly through respiratory droplets produced from coughing, sneezing, or talking.<sup>1</sup> Recent evidence supports the possibility of transmission from persons who are asymptomatic.<sup>2</sup> On top of that, infected individuals can create microscopic aerosol droplets that remain airborne longer than normal droplets because of their small size (<5  $\mu\text{m}$ ).<sup>3</sup>

How do we, as educators, prevent the spread of a virus that is so highly contagious from individuals with little or no signs of being infected? The truth is that we can't. Opening up schools while this virus is still present in our communities exposes all teachers, staff, students, mothers, fathers, siblings, and other family members to infection.

I, like many other teachers, want to see my students again but only when it is safe for them, their families, and my family. Covid-19 has created a unique situation for us all and it will take diligence, sacrifices, and dedication from all Kansans to beat it. As an educator, I do not feel safe exposing myself or my students and their families to the risk of exposure to this deadly virus when we have the technology to continue their education remotely for a short time.

This school year will be different than all before it but I know that Kansans will adapt and continue to persevere through the difficulties. *Ad astra per aspera.*

Sincerely,

Katrina Martin

To whomever it may concern:

I am writing to share my concern with schools not opening on time this year. I am not a doctor, teacher, or scientist. However, I am a working mother, and a mother has a lot of titles. In my household my spouse and I both work full time. Where we live there are not many options for daycare, this provides a challenge when it comes to online learning for our kids or just delaying the start of school, as I am sure many other parents are faced with the same. Children need to start to school in August preferably in person. If they can not start face to face consideration for online education starting in August should be considered verses a delay.

School for many students is a safe haven. There are many children in our state and country that come from poor living conditions at home. School is where they get their only meals, where they are around adults that genuinely care for them and where they can just be a child. Not all children are blessed with a home where they receive good care and can be a child. Not all parents/care givers know how to teach when learning is done online at home. Have we truly weighed the pros and cons of not sending our children to school in August due to COVID? Have we thoroughly thought about the effects to the quality of their education if school is to be online? Yes, there are some parents who are comfortable with teaching their children through homeschooling or online programs, but it is not for everyone. The average American family cannot afford for one parent to take off work consistently or quit working to teach or help with online learning at home. Children deserve the best we can give them. When a child is in a classroom setting, they are learning more than reading and arithmetic, they are learning respect, self-control, social skills, organizational skills, and the list goes on. Interaction and socialization are important for everyone. If we are not to resume school in person till after Labor Day or later depending on the trend of cases what are we doing to our children? Is the virus as much of a threat to them as the consequences of not being in the classroom?

Are the numbers we are given related to COVID cases and deaths truthful and transparent? If they are is it really something that should cause us to change our way of living. Our bodies are created to pick up bacteria and viruses to help grow our immune systems. Is the "spike" in cases right now truly a bad thing? The process of herd immunity is not bullet proof and each person and their reactions to illness is different but it can't hurt. The natural flow of things will take place no matter what we do. We were made to get sick and our bodies to fight leading to the development of antibodies.

Masks should not be made mandatory as we the people should have the right to choose our health care for ourselves and our children. Vaccinations are not made mandatory and we have more proof that those work than wearing a mask. Yet we let people choose vaccinations whether it be for religious reasons or other personal beliefs. When you take away the right to choose one's form of health care measures you are leaning on a socialistic form of health care. We have many examples of socialism not working, Venezuela and Canada just to name a couple. This "pandemic" has similarities of others we have seen in the past and we made it through without shutting our schools and economy down. There will be people who get extremely ill and die but that to is the nature of life. As I write this letter and look at KDHE's COVID death count being 307 is that truly so concerning that we should not start school and harm our children's development in more ways than one? Not mention coming out with a blanket statement/plan is wrong. Not every district/county in Kansas faces the same issues. Some places have had extraordinarily little impact and case numbers have remained low.

Options and considerations should be thoroughly discussed before just making the decision to delay the start of school. If teachers are willing to teach face to face and parents are willing to allow their children to attend face to face why shouldn't you allow it? Could schools make an option of online

learning for those parents that do not wish for their children to attend face to face? As a full time, working mother who values the school system and my children's best interest I ask that you allow children to start school in August face to face. If you can not do that then at least let them begin their education online and on time. While making your decision please also keep in mind families that have custody agreements and people that can only take family vacations certain times of the year would be impacted if we had to make up the time on the tail end of the school year. Thank you for time and consideration.

RE: Kansas school children/education

Dear Board members:

I am writing to you as a parent of four (4) young adults who have been born and raised in the State of Kansas, which until recently, was a source of pride for all. Two of them are in colleges (K State and Wichita State) and one will be a senior and one an 8<sup>th</sup> grader, hopefully, attending the Riley County School District. All of our children are straight A and B students. In addition to raising these children on our farm near Riley Kansas, both my husband and I are sole proprietors, myself of my law office, my husband a construction business.

I provide the above glimpse of background in hopes you will understand, we are not who have to choose between work and care for our children. Our concern is the harm, loss of educational background and building that they are losing by not being in school, not socializing and not participating in activities. This is harming, not only our children, but children across the state educationally and mentally.

I am appalled at how the education of our children has been handled by the Governor of the State of Kansas. Yes, I am aware there is a virus spreading through the State and Country, but it is just that a virus. We have not closed the schools and harmed the education of our children in the past, for the cold virus, influenza, any other virus. And yes, the studies are showing that his virus is in line with those prior viruses.

I point that out, as I think it is ironic that the governor has suggested that the Board of Education, should put 'politics aside and make the best choice for the kids', when she is not doing that, she is making decisions based upon politics, and in some points, because she has been challenged.

There are significant studies, examples from other countries, showing that is rare for kids to transmit this virus. In countries were schools were opened, it did not, NOT, show the upswing that has been claimed will occur here. You can read the information about this factor at any of the following links to medical articles:

- [https://www.sciencedaily.com/releases/2020/07/200710100934.htm?fbclid=IwAR06YXD26CJMUDNuyLKBsy\\_vNljsU-Rilv35yNzhUeGOA0QaBuWGLMknWR0](https://www.sciencedaily.com/releases/2020/07/200710100934.htm?fbclid=IwAR06YXD26CJMUDNuyLKBsy_vNljsU-Rilv35yNzhUeGOA0QaBuWGLMknWR0)

- [https://www.the-scientist.com/news-opinion/covid-19-is-very-different-in-young-kids-versus-adults-67637?fbclid=IwAR29LI3AWI\\_tBb1aZ26ym6eA2Bm6ODYzofFnmAj8w3nLIGGuL\\_ovNvfU9qc](https://www.the-scientist.com/news-opinion/covid-19-is-very-different-in-young-kids-versus-adults-67637?fbclid=IwAR29LI3AWI_tBb1aZ26ym6eA2Bm6ODYzofFnmAj8w3nLIGGuL_ovNvfU9qc)

If you don't want to consider the alternative countries, look at the reality here in Kansas. When the 'closure' of the state occurred, daycares remained open. Daycares, where you have very young children with little to no understanding of this virus and thus, ability to recognize for themselves that they need to distance, that they need to use hand sanitizer every hour, or whatever time frame you insert.

There has not been a report of any large number of children dying from the virus. Yes, there have been positive tests from children in the under 18 category; but we are not being bombarded with reports of 'clusters' from daycares. In fact, as of today, from the KDHE Coronavirus data, the number of children under 17 make up 8.5% of the cases, but none of the deaths are attributed to children. The closest age group is 25-34 years wherein there have been only 3 deaths, or 1.0%.

Ironically, Governor Kelly acknowledged that influence of co-morbidity on the death rate in her remarks on July 20, 2020. (Listen to the last 2 minutes of her press conference: 'The reason we don't see as many deaths among the young is that they don't have the co-morbidity situations, they do not have some underlying diseases that gets exacerbated by this.')

Yes, any death is too much, but when you start trying to assert the 'oh you want people to die' argument, you must look at comorbidity and concerns for accurate reporting of the cause of the death.

Thus, the science and information that has been compiled, when balanced against the needs of the children for education, socialization and activities, which all will aide them in their growth, physically and mentally, reopening the schools must occur.

Through the constitutional assignment of different roles to different entities, the people of Kansas have ensured that education of public school children is not entirely dependent upon political influence or the constant vigilance of voters. *Gannon v. State*, 298 Kan. 1107, 1108 (2014).

This comment by the Supreme Court seems very poignant as the parameters for doing so, that should be left to the local school officials. One size will not fit all of the school districts in the state. Mandating by the Governor of practical application of how kids are to be handled in school, is nothing but a political move; she was thwarted by most of the County Commissioners in the State on her mask mandate, so again, in a political posturing, she sets out the mandate of how schools are to handle the daily activities of the children.

There are just as many studies advising the harms of wearing masks by the healthy for prolonged periods of time. I find it ironic that none of the presentations ever consider those, or attempt to balance the two competing points of view. Forcing kids of any age, to wear a mask for 8 hours a day is ludicrous. There are reports of children collapsing and dying after being forced to wear a mask for an entire day. It is not health for a person to constantly be breathing in the expulsions from the body, which is what occurs when forced to wear a mask. And this does not even address the fact they are kids, they are going to be constantly touching them, after touching anything around them.

Additionally, it is counter productive as it depletes the ability to build a natural immunity. If you think there is not something to the point of allowing children (and adults) to build immunity, listen to the end of Governor Kelly's remarks at the press conference on July 20, 2020. Below is her exact statement before she promptly ended the conference and left:

'I can remember, very clearly, the first time I sent my kids to daycare, my husband and I spent years after that building immunity to all the stuff they brought home from school.'

She went on to assert that we do not know if there is immunity to this virus; but I would submit, immunity may be the very reason that the number of positives in kids is not higher in the other countries and studies. The reality of the situation, kids have been together, either in daycares, playing in their neighborhoods, or playing on the ball fields in areas that were reasonable enough to proceed with summer sports, swimming at local pools, and there have not been large spikes or designation of clusters. Thus, either young people are not as likely to catch and or transmit the virus, likely due to building an immunity.

The directive to close the schools, to harm the vast majority of kids in Kansas, is not to protect them, but once again a political ploy, power of the politicians, and to garner positive outlook for her by protecting others. This is not in the best interests of the children. Again, I am not proposing that we should be callous as to the others. However, each local school district can make arrangements and address the individual needs within their districts of students who may have underlying health issues, and or who have household members that do. The closure of the state allowed for redirection of processes, developed infrastructure for other means of learning; means have been identified and developed to allow for distance learning where it is necessary. It is not necessary for all, and the other harms- loss of socialization, loss of sports and activities, loss of in classroom learning, to the vast majority of students- does not justify the potential benefit to a few.

And that says nothing about the directive that they sanitize their hands at least once every hour. Wouldn't the more prudent directive be, 'if you are up from your desk, upon returning, you sanitize your hands.' Again, these type of minute details must be left to the local officials based upon the parameters that exist within their school district.

I am hopeful that you will look beyond the political rhetoric, look at all of the information, including the studies and information that supports the need for return to school, and allow the local school districts to implement the policies and protocols that are appropriate to their needs.

Sincerely,

The schools have had all summer to get ready and now want more time. They won't be any more ready after Labor day. No one is complaining about going to work as much as our teachers. We are hurting the children more by keeping them home especially underprivileged children.

I would vote to open up schools. Put the teachers in protective gear like a nurse and they should be as fine as everyone else that has to go to work. Thank you.

**Subject:** Delaying the start of public schools  
**Date:** Tuesday, July 21, 2020 12:30:52 PM

---

Greetings,

Just wanted to add my voice on the issue of delaying the opening of public schools. I'm a retired teacher, but my four sisters and many of my friends are still teaching in public schools. I'm concerned about their safety and the safety of all their colleagues, and the safety of all the public school students.

Sometimes we have to make tough evidence-based decisions that go against what we want and wish, and maybe even go against what is popular in various counties in our state. Kansas is in the throes of a pandemic. We have to listen to the guidance and recommendations of experts in infectious disease. We turn to science and research. We learn from the leadership and experiences of other countries who have "flattened the curve" of Covid-19.

I urge you to step up to the moment and show true leadership.

Of course you should approve delaying the start of the school year.

Thank you for your work on the school board,

Sincerely,  
Laurie Martin-Frydman

Public Comments on Consideration of Executive Order 20-58  
Dave Trabert, CEO  
July 21, 2020

Members of the Kansas State Board of Education,

We appreciate this opportunity to submit comments for your consideration of Executive Order 20-58, and there is ample evidence to justify your rejection of the order, including but limited to the following reasons:

1. The State Board of Education, not the governor, is constitutionally charged with the supervision of schools. While governors and their administrations do have a responsibility to protect public health, it's arguably an erosion of your constitutional authority for Governor Kelly to take the lead in ordering schools closed.
2. State Board members have often cited the importance of local control in the decision-making process, and affirming EO 20-58 runs contrary to your position on local control and the prerogatives of local boards of education.
3. EO 20-58 essentially moots the guidance provided from KSDE to local districts and undermines the steps already taken to ensure the health and safety of students, faculty, and state.
4. Governor Kelly's order says the Board must find that EO 20-58 is "in the best interests of the students in this state." How is it in students' best interest to be denied access to education? Students were already deprived of instruction time at the end of the Spring 2020 semester when Governor Kelly closed schools, and most districts offered less than a robust experience. A [report](#) from the Heritage Foundation says, "The Wichita, Kansas, school district is providing material that equates to about one hour of content per week to students in grades K-5, and about three hours per week for students in middle school."
5. The [Center for Reinventing Public Education](#) reports, "only one in three districts expect teachers to provide instruction, track student engagement, or monitor academic progress for all students, while schools were closed. A [national survey](#) of American parents found that 71 percent believed their children learned less than they would have had schools remained open. That survey also found that 40 percent of students had no individual interactions with teachers."
6. EO 20-58 is silent on whether the three weeks would be made up later in the year, and given Governor Kelly's history of shifting orders related to COVID, plus the uncertainty of the pandemic itself, it's possible that students may lose three more weeks of instruction if EO 20-58 is approved.
7. Multiple studies show students are at very low risk of contracting COVID and spreading it to adults.

- a. This [U.S. News & World Report article](#) cites a study of students in Germany, which found that students attending classes may not be much of a factor in spreading COVID. Germany began reopening schools in May, and the study by the University Hospital in Dresden analyzed blood samples from almost 1,500 children from 14 and 18 and 500 teachers from 13 schools in Dresden and the districts of Bautzen and Goerlitz in May and June. According to the story, “Of the almost 2,000 samples, only 12 had antibodies, said Reinhard Berner from the University Hospital of Dresden, adding the first results gave no evidence that school children play a role in spreading the virus particularly quickly.”
  - b. [National Public Radio](#) (NPR) reports that in an “unscientific survey of child care centers, Brown University economist Emily Oster found that, as of Tuesday afternoon, among 916 centers serving more than 20,000 children, just over 1% of staff and 0.16% of children were confirmed infected with the coronavirus.”
  - c. The [Foundation for Research on Equal Opportunity](#) (FREOPP) says “children are at very low risk of serious illness or death from COVID-19. Indeed, children aged 5–14 are seven times more likely to die of influenza than of COVID-19. Children aged 1–4 are 20 times more likely to die of influenza.”
  - d. While the research shows students aren’t major spreaders, adults are able to protect themselves while working in schools, just as adults working in the private sector are doing.
8. Governor Kelly cites “a significant increase in (COVID) cases” in EO 20-58, which is true, but she neglects to tell you the good news – that that has not led to an increase in hospitalizations and deaths. The KDHE statewide COVID dashboard shows a total of 23,334 cases and 1,497 hospitalizations as of July 20, for a 6.4% hospitalization rate. That’s down from 7.3% as of July 6, and over the last two weeks, the hospitalization rate was 4.1% of new cases. There were almost 3,300 new cases reported last week by KDHE but only 11 new deaths; the mortality rate, of confirmed cases, continues to drop and is now at 1.3% overall. With nursing homes accounting for 59% of all death in Kansas but just 5% of the cases, the mortality of all other cases is at 0.6%.

Source: Kansas Dept. of Health and Environment

Twenty-two of the state's 105 counties reported no new cases last week. One county reported a decline in cases and 37 counties had five or fewer new cases.

### **Conclusion**

We encourage you to reject Executive Order 20-58 for the reasons stated herein, and thank you for your consideration.

Dear Board Members,

Please do not let Governor Kelly dictate something she knows nothing about, our kids education. Kansas & our kids are NOT ONE SIZE FITS ALL! The Governor is making decisions based off her ego & flawed data. She is not taking into consideration what is in the best interests of our kids, their education, athletics & their mental health. She should NOT be dictating any of this, the Kansas Board of Education & the local counties should be. Please vote to reject her orders.

Our kids need in person instruction, especially those that have special needs like our daughter. Additionally, the Olathe School Districts virtual learning was an absolute joke this spring. There was little to no education or instruction involved. The teachers were not involved in either of my kids, aside from a once a week 30 min zoom call, which was a complete debacle. The kids were not held accountable in any way, so as a parent it was virtually impossible to enforce what the school could care less about. This is why it's critical that the teachers be required to actually teach, in person, because it's what best for the kids. Decisions need to be based off of valid data & no more of these fear driven decisions. Our youth depends on it & their mental health depends on it! They depend on you!

I respectfully request we work with you to ensure a safe school environment that accomplishes both of the following:

- Safe School opening following the Board of Education Return to School Plan
- No delay to student participation in school, athletics, and activities.

I am one of the over 6,000 people who have signed the #HelpThemPlayKansas petition supporting all #Kansas High School Students who voluntarily choose to engage in 2020 sports and activities this fall without delay. We all are thankful for the leadership you have provided in leading through the Covid-19 pandemic and know that you have our support.

Please consider the extreme disappointment at which the decision of delaying or even canceling high school athletics would cause. High school athletics are a huge part of any high school experience, life time memories are created as well as strong friendships and bonds with coaches and other staff. Not only do athletics provide us with a more positive high school experience. For many minorities, such as myself they are the only reason we continue to attend high school.

Sincerely,  
Jordan Wells

Dear Kansas School Board Members,

I am writing today as a parent of a Shawnee Mission School student. I wanted to express my support for Governor Kelly and her plan to delay school reopening until after Labor Day. My support for this plan is based on the current COVID-19 increase in our state and also the unknown consequences that opening our schools would have on our students and staff.

Thank you for work with this very important matter.

Blane Reeves

**Subject:** Requesting Approval of Executive Order #20-58 & #20-59  
**Date:** Tuesday, July 21, 2020 2:50:02 PM

---

I am emailing to show support of the Executive Orders in the subject line. Ms. Clifford, you oversee our district and I see that your home is in Finney County. A county that has been greatly impacted by Covid-19. Our household resides in Ness County where we have had only 5 confirmed cases thus far and I say this hesitantly as our residents continue to gather and gear up for events in which outside counties who have seen a spike in cases will be welcomed to our town, all while having opted out of the mask mandate just before the 4th of July weekend. All it takes is one asymptomatic and or presymptomatic child or adult to unknowingly cause a major spread within the school and within our small community. Kansas has made national headlines; a Kansas farmer sending his last N95 mask to Governor Cuomo at the start of this pandemic and most recently a post requesting prays for Logan, Kansas just four months later because so many in our state refuse to push the pause button..2020 has been a year for the books and with it being half way over now is the time to gather the reins and bring this pandemic to a halt, but this will not and cannot happen if our counties or the KSBOE provide a loop hole to local school districts to make their own rules. That offer has been made and here we are as cases in our state continue to rise. It is time that those leading the way look at the elementary science involved, step down from their political high horse and do the right thing! Just before our last holiday weekend our Governor issued a mask mandate, in which counties like yours, Ford, Hodgemen, Ellis, and my own county elected to Opt Out. We now watch as our numbers increase across the state when a simple measure could have helped keep our fellow citizens safe and send our numbers trending downward. Scary enough, is the fact that some counties out East have postponed their celebrations and are expecting to hold them during the Labor Day Holiday, just before school is to resume! Just like the Governor said in her announcement on Monday a Kansas family will spend a great number of days fighting off viruses which are quickly and easily spread within the confounds of a school. This year has already been one for the books, and I can only imagine the amount of weight on your shoulders but believe that it is best to be proactive in our approach and cautions. I again respectfully request that you cast your vote of approval for Governor Kelly's Executive Orders by prolonging the start of school and enforcing use of mask for all those entering the school above the age of 5 to prevent further spread of Covid-19. It is obvious that some residents have zero desire to social distance and the parade must go on for them and with that comes the need to strictly re-enforce these orders to ensure that our school year, once started is not interrupted again. Please keep the following statements in mind when casting your vote tomorrow.

Those who cannot remember the past are condemned to repeat it ~ George Santayana.

The definition of insanity is doing to same thing over and over again, but expecting different results ~ Albert Einstein

Stay well and stay safe,

I am sending this email to encourage you and others to uphold Governor Kelly's recommendations to delay the start of the 2020-2021 school year.

I am a parent who wants to see her children in school in person-but not at the risk of their safety or teachers and staff safety. At the point when our case numbers start trending downwards instead of steadily increasing is when we should be having discussions about opening schools. Not doing it because the calendar says it's time to start.

I am asking with much encouragement to help keep myself and my family safe by upholding Gov. Kelly's recommendation to delay school until after Labor Day.

Thank you for taking the time to read my email.

Sincerely,  
Lisa Sharpes

I'm growing more and more frustrated with the rampant abuse of power exercised by our governor under the guise of an emergency. What's more frustrating is the lack of education our kids received during the fourth quarter of last school year (during the shutdown). It was an absolute joke. Now, we're looking at more of the same this fall? Please don't make our kids suffer. They need a good, in-person education. They need social interaction. They need sports and other activities. The lack thereof is hindering their development.

I want to offer one other thought from a legal perspective. I have a front row seat to what the shutdown is doing to our families. My office has been flooded with people wanting divorces. Kids are suffering physically. Abuse calls are skyrocketing. PLEASE open our schools. As for mask requirements, every school and community is different. Please allow them to do what's best for their local kids and local school.

To who it may concern,

My name is Dr. Ryan Kohlmeier. My wife, Tyla, and I live in Emporia, KS. We have 3 very active children, ages 18, 15 & 8. First, let me say we are very appreciative of all the time everyone is putting into the decisions concerning our children's educational futures. We have been praying for wisdom and discernment for everyone involved!

Our family has been wearing masks and using other common sense practices throughout this pandemic, and will continue to do so...as to do our part in reducing the spread. However, we do not feel keeping our children in a bubble or out of school is in their best health interest. We believe they need to have structure, accountability, peer & teacher interaction, and activities...which all give them a sense of purpose and motivation. These past few months have been very hard on everyone, but especially young people's lives. Our family, thankfully, is very stable, yet I still see mental health issues arising in my teenagers...I CANNOT imagine what it must be like for those living in less than desirable conditions. Not to mention, all the unhealthy things they are finding to do to fill their time when left unsupervised for hours everyday.

To keep this short enough that hopefully someone will take the time to read this, I won't go into any of the scientific detail, but please listen to all the doctors saying that the health risks for kids to be out of school actually far out weigh the risk of being in school. Scared voices seem to be the loudest right now.

Please allow our kids back in school!

Sincerely,  
Dr. Ryan & Tyla Kohlmeier

This is just one video among many that gives a voice to the science against wearing masks. The actual scientific studies of which they are discussing can be accessed through the comments as they explain.

It seems that only "science" which is in line with mask wearing is given a voice in the public forum. It also seems to me that all of the "science" that recommends the use of masks has only come since the outbreak of Covid-19.

<https://youtu.be/C1ODBTdNiG0>

Hope those on the board will watch this and investigate true science

Thank you,

July 21, 2020

Dear Board of Education Members:

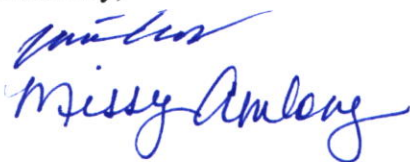

We are writing to you as concerned citizens, taxpayers, and parents regarding Governor Kelly's proposed mandates and executive orders, both regarding postponing the 20-21 school year and the requirement for all students to wear masks. It is our hope that you will not take the implications of removing these decisions from the individual districts lightly.

Kansas is diverse and has both large metro areas and sparsely populated rural communities. Personally, we have lived in both but currently reside in a smaller rural community. Our livelihood and day to day life is a far cry from that of someone that lives in a larger metro area in Kansas. Past decisions by Governor Kelly forced adherence to a one-size fits all mentality for months when there was little to no COVID-19 in our area. With these executive orders she is once again trying to place all locales on the same plane when that is so very far from reality.

Our children have already suffered greatly because of these past decisions and there appears to be no end in sight. We should have the right to allow our local districts to make decisions about what is best for the children in our area as opposed to someone sitting in the state capital or in a conference room hundreds of miles away that has no idea of what life is like in our district. Many of our classrooms rarely have more than 15 children in a room. These are not large classrooms like you would find at places like Wichita East. Under the proposed executive order it's possible students in our community would have to be in school into the month of June, which presents a hardship for many farm families. These are just some of the things that need to be taken into consideration in each district. Allowing the Governor to take away autonomy is setting a very dangerous precedence and makes it clear that local elected boards are not deemed intelligent enough to do what they were elected to do.

In addition, despite Governor Kelly's press conference saying that she has full control over the mask mandate we keep getting told by members of both the Kansas House of Representatives and the Kansas Senate that it is a decision by you, the members of the Kansas State Board of Education. Again, we beg of you to consider the risks involved with such a mandate and do what is necessary to allow local districts, along with local health authorities, to determine what is best for the members of our own districts. We thank you for your attention to this matter and feel confident you will not allow our children to continue to become political pawns.

Sincerely,

July 21, 2020

Dear Kansas State Board of Education Members:

**The Kansas School Nurses Organization supports the decision to delay reopening of Kansas schools and recommend that the Kansas State Board of Education approve Governor Kelly's Executive Order 20-58 "Delaying the 2020-2021 K-12 School Year."**

We are currently in the middle of our annual Kansas School Nurse Conference. This year, the conference is being held virtually with 500 Kansas School Nurses in attendance. *As of our last state school nurse survey conducted in 2017-2018 school year, there were 822 RNs and 83 LPNs in Kansas schools.* During our opening keynote presentation this morning, we conducted a poll with two questions with an opportunity for all attendees to respond to. See below for the results of the poll questions as of 12:30pm today:

**Based on the responses above, Kansas School Nurses strongly support the order to delay the start of school in Kansas.**

Your leadership as the members of the Kansas Board of Education in voting on the delay of school opening this year could save or jeopardize the lives of many people. Please allow yourselves, school personnel, health officials, and citizens, the grace of an additional few weeks to enable schools to determine more clearly what decisions must be made, obtain necessary supplies and develop protocols for a healthy and safe return to school for students and staff.

As you know, not every school employs a school nurse. The second question on our poll indicates that the majority of school districts are not hiring additional nurses for this school year. As members of the Kansas School Nurses Organization, we strongly urge the State of Kansas to re-allocate funds for the position of a **"State School Nurse Consultant."** This position would serve as a source of medical expertise for school districts and other community organizations, to guide and assist them in decisions related to school health.

Thank you for your consideration of our recommendation to support Executive Order 20-58 "Delaying the 2020-2021 K-12 school year."

Sincerely, ~

Kimber Kasitz, BSN, RN, NCSN  
KSNO President

Members of the State Board of Education:

It falls to you individually and as a constituted board which has the responsibility for K-12 Education in the State of Kansas to determine when and how schools in Kansas shall reopen. Because this is a geographically large state with a small population and that population is obviously not distributed evenly across our state – your job should be to provide resources and guidance to the school boards of each of the Unified School Districts so that they can make reopening and mitigation decisions based on the conditions in their individual local communities. In most cases that decision will be to reopen on the traditional dates with mitigation measures appropriate to the experience in that community.

We must reopen our schools because the effective loss of a second or third semester of education will put our schools nationally as well as in Kansas even lower against our World competition that they have already fallen to. A half century ago US schools were rated number one in the World. We have since fallen to 24<sup>th</sup> in Science and Reading and 39<sup>th</sup> in Mathematics as reported by Pew Research. (Not a right wing organization by any measure.) <https://www.pewresearch.org/fact-tank/2017/02/15/u-s-students-internationally-math-science/>

Of the OECD countries rating above us ALL have reopened their primary and secondary schools – or in several cases never closed them to begin with. (Singapore, Sweden, Taiwan among several.)

In exploring the health risk to children all the data show that the risk of SARS-CoV-2 to healthy children is near non-existent. The risk is only slightly higher for uncompromised teachers and staff less than 60 years old. There have been a number of early studies indicating that the secondary impacts on children in being away from the routine and social interaction of schools does damage that will continue to manifest well beyond the immediate.

The argument for local decision making is strong particularly in my count. Leavenworth County Health Dept has continuously improved their COVID dashboard. Yesterday's report (3 days including the weekend) shows a total of 14 infections in people under the age of 18 during the entire 5 months. We don't know how those are spread among the 5 school districts but it certainly seems that reopening schools will not present a substantial increase in risk to the kids or community. <https://www.leavenworthcounty.gov/covid/default.asp>

The benefits of reopening on schedule both social and economic are enormous. The closure of schools so precipitously and the projected delay in their reopening are having huge individual economic impact on families because of the loss of second income for so many people. Families have had to find somehow to provide care for the kids who would have been in school.

The State School Board should turn this over to the USD boards with the recommendation that they work to open on time and as fully as possible while taking mitigation measures appropriate to their individual location and data.

I hesitate to include this last reference because it comes from the University of Washington whose faulty models drove overreaction to this pandemic but here is the compendium of what other countries have done to reopen their schools. <https://globalhealth.washington.edu/sites/default/files/COVID-19%20Schools%20Summary%20%282%29.pdf>

**Subject:** Re-opening of Kansas Schools

EXTERNAL: This email originated from outside of KSDE. Do not click any links or open any attachments unless you trust the sender and know the content is safe.

I understand that there is a meeting at 10 AM tomorrow July 23rd, to decide whether to keep school facilities closed until after Labor Day. I tried to download a form to submit a commit, but the form would not open. Please submit or bring my thoughts forward.

As a former teacher, I know how much we interact with the children. Especially in elementary schools, hugs and hand-holding occur, and it will be challenging to have a no-touch environment. Going back to school will put all students, teachers, administration, and their families at increase risk of spreading the COVID19 virus. I strongly support delaying the opening of schools for the 2020-2021 school year. When schools do open, please have virtual learning as an option. If all children could stay home and learn in an adult-supervised healthy environment, I would encourage all students to stay home. The reality that I sympathize with is that some parents have to work outside of the home, and need their children to have a safe learning environment. By allowing parents to keep their children home, there should be a smaller turn out in the classroom. This will allow for greater social distancing.

When schools open, I suggest that all classes are virtual for the first week to teach the importance of safety measures. Such as wearing masks and/or face shields and hand washing. To learn hand gestures that can signify physical gestures. Arms crisscrossed across the chest to represent the gesture of a hug, quiet signals, and general safety. Whatever can be taught virtual, even meeting their classmates virtually. Please have a supply of masks, gloves, and face shields available for all who enter our schools. (Students, Teachers, Administrators, Parents, and any other visitors)

Bottom-line, keep children home as much as possible. They will catch-up. One more school year of staying home would be best where possible, especially until there is a vaccine.

Thank you for your time

Best regards,  
Paula Guerin 7917 Halsey St. Lenexa, KS 66215

July 21, 2020

Dear School Board Members,

I am urging you to reconsider the mandate to keep schools closed until after Labor Day. Our students have suffered enough due to the draconian lockdowns, and it's time we use some common sense.

First, let's look at the science. Covid 19 has a death rate of .26%. This is on par with the flu, and we never closed schools due to the flu.

Second, children are not affected by Covid. Studies from around the world conclude that the majority of people who suffer complications from Covid are elderly people over 75 years of age with 2 or more comorbidities. There is also no evidence to back up the claim that children are spreaders of Covid 19. Here is a quote from the WHO:

"From the data we have, it still seems to be rare that an asymptomatic person actually transmits onward to a secondary individual," Dr. Maria Van Kerkhove, head of WHO's emerging diseases and zoonosis unit, said at a news briefing from the United Nations agency's Geneva headquarters. "It's very rare."

There have been zero deaths in KS in the school aged kids. The youngest death in KS was 29 years old.

If you want to mandate something to improve health, then mandate fresh fruits and veggies for lunch, and extra recess time for physical activity. You cannot go wrong with real food and exercise! Remove junk food from the vending machines and make sure teachers have adequate paid sick time so when they or a family member falls ill, they can stay home.

I also suggest we teach immunology in science classes. The narrative that we can hide from mother nature in our homes is nonsense and shows a clear lack of understanding of the body.

Perhaps it is also time to debate the Germ Theory and The Terrain Theory in our schools.

We already have a common sense procedure in place at schools: a child is not to come to school if he/she has a fever. Simple and logical.

The media keeps reporting that cases are increasing. Let's keep in mind that the death rates are NOT increasing, but holding steady or even decreasing, despite the pumped up numbers since doctors are told to label a death due to COVID, even in the absence of a test. If a person dies in a car crash, but had COVID, their death is marked as a COVID death.

Second, the inaccuracy of the tests is widespread. Over 100 COVID-19 diagnostic tests have received FDA emergency use authorization to fast-track them and bring them to market. That means ZERO COVID tests have gone through the full approval process to bring a test to market, which would normally take years. Under section 564 of the Federal Food, Drug, and Cosmetic Act (FD&C Act), the FDA Commissioner may allow unapproved medical products or unapproved uses of approved medical products to be used in an emergency to diagnose, treat, or prevent serious or life-threatening diseases or conditions caused by CBRN (Chemical, Biological, Radiological and Nuclear) threat agents when there are no adequate, approved, and available alternatives.

The president of Tanzania, John Magufuli questioned the tests' accuracy. After receiving test kits, he sent in samples from a goat, a pawpaw fruit, and other non-human samples. Fake names were put on the samples, and all tests were returned **positive**.

As an educational institution, I urge you to seek out many voices in the scientific world when making decisions. We must all remember what happened when the entire world relied on modeling from Neil Ferguson from the Imperial College of London. He is the historically failed computer modeler, who threw darts at

a board, and launched a prediction of 500,000 COVID deaths in the UK and two million in the US, and thereby convinced both governments to opt for extreme lockdowns. He refused to share the code he used to obtain those results, until he resigned. Scientists from around the world have denounced his modeling as absurdity! The lesson we can learn is that listening to one voice is dangerous, and irresponsible when making decisions that impact thousands of families across the state of Kansas.

Kids have already missed so much school since they closed in March when Covid 19 was still a mystery. Now, however we know much more. We know it has a .26% death rate and does not adversely affect healthy children. Therefore, if we delay the opening of schools I will be asking the school board to provide the reasoning behind this. It is not acceptable for an educational institution to simply follow orders that are not based on science. I will also ask to be shown the "Model" that showed the reason for schools to be opened after Labor Day rather than in August.

I also urge you to thoroughly study the efficacy of masks. A recent meta-analysis of scientific literature, including 11 randomized, controlled trials and 10 observational studies, found that there was no clear clinical or laboratory-confirmed evidence that masks prevent infection.[2] <https://www.qeios.com/read/1SC5L4>

To the contrary, the study warned that facemasks "...may even increase transmission if they act as fomites [objects or materials that are likely to carry infection] or prompt other behaviours that transmit the virus such as face touching."

This echoes World Health Organization (WHO) guidance published on January 29, 2020 entitled, "Advice on the use of masks in the community, during home care and in healthcare settings in the context of the novel coronavirus (2019-nCoV) outbreak." [3] <https://apps.who.int/iris/handle/10665/330987>

In it, the WHO says, "Wearing medical masks when not indicated may cause unnecessary cost, procurement burden and create a false sense of security that can lead to neglecting other essential

measures such as hand hygiene practices.” Furthermore, the January 2020 WHO guidance stated that “Cloth (e.g., cotton or gauze) masks are not recommended under any circumstance.”

Cloth masks have been found to be particularly problematic.[4] A British Medical Journal (BMJ) study published in April 2020 cautions against the use of cloth masks, citing “Moisture retention, reuse of cloth masks and poor filtration may result in increased risk of infection.”[5] [https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4420971/#\\_ffn\\_sectitle](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4420971/#_ffn_sectitle) The WHO affirms increased infection risk with cloth masks in its latest June 5, 2020 guidance.[6] [https://www.who.int/publications/i/item/advice-on-the-use-of-masks-in-the-community-during-home-care-and-in-healthcare-settings-in-the-context-of-the-novel-coronavirus-\(2019-ncov\)-outbreak](https://www.who.int/publications/i/item/advice-on-the-use-of-masks-in-the-community-during-home-care-and-in-healthcare-settings-in-the-context-of-the-novel-coronavirus-(2019-ncov)-outbreak) It based its guidance on an earlier BMJ study that found the penetration of particles to be 97% in the cloth mask group, with significantly higher rates of infection and influenza-like illness.[7] [https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4420971/#\\_ffn\\_sectitle](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4420971/#_ffn_sectitle)

A study on the CDC website that reviewed 10 different randomized clinical trials worldwide on highly infectious respiratory virus transmission found “no significant reduction” in “transmission with the use of face masks.”[8] [https://wwwnc.cdc.gov/eid/article/26/5/19-0994\\_article](https://wwwnc.cdc.gov/eid/article/26/5/19-0994_article)

Thank you for your consideration,

Kathryn Andries
