

## The administration of NAEP 2022 and NAEP 2023 was a major success!

**Thank you** to the grade 4 students and grade 8 students who participated in the NAEP 2022 mathematics and reading assessments, and the age-13 students who participated in the NAEP 2023 Long-Term Trend (LTT) assessments, from 100 different Kansas school districts. Also, a special **Thank You** to the administrators and NAEP school contacts in the 193 participating buildings. The NAEP assessment only lasts about 90 minutes, but school staff spent several hours preparing for the assessment. Thanks to your effort, policymakers, educators, and parents will have a better understanding of what Kansas 4th and 8th grade students (and age-13 students) can do in reading and math compared to the rest of the nation.

If you are interested in more information visit the Nation's Report Card website at <http://nationsreportcard.gov/>.

Thanks again and congratulations on a job well done!
