Deb Grunst		Travis Riebel		Natalie Clark	
Eleanor Hensley		Jim Means		Wendy Coates	
Michael Pang		Max Heinrichs		Gayla Randel	
Kent Cornish		Joni Clark-Leiker		Peggy Torrens	
Cloys Bayless		Stacy Smith		Kathleen Mercer	
Mac Barnett					
Jill Casten					
Jack Frederick					
Alex Delaney					
Lynette Yevak					
Clint Reed					
Michelle Jones					

## Minutes

**Agenda item:** Welcome, Introduction, Approval of January Minutes      **Presenter:** Lynette Yevak

**Discussion:**

Motion to approve agenda: Clint Reed, Seconded by Mac Barnett. Approved.

Motion to approve January minutes. Seconded by Mac Barnett. Approved.

**Agenda item:** Career Cluster Reviews      **Presenter:** Peggy Torrens, Jim Means, Kurt Dillon, Stephen King, Gayla Randel

**Discussion:**

The following Pathways were reviewed for approval. Voting to take place at June 2018 meeting.

### **Engineering Pathway – Peggy Torrens**

Began with 8 intro courses

15 member committee

Representing Business/Industry, secondary, post-secondary

27 courses down to 19

Developed new intro to engineering course

Schools will be able to use their choice of curriculum

Added half credit option for workplace experience

Removed computer apps from intro level

Revised some competencies

Will have several new course codes

### **Energy Pathway – Peggy Torrens**

15 member committee

Representing Business/Industry, Secondary & Post-secondary

Was a mini-engineering pathway

Streamlined from 29 to 16 courses

From 10 engineering courses to 2

Added courses for construction, repair, maintenance, occupations related to Energy

Creating 5 new courses & combining others

Final proposal sent out prior to June KACCTE meeting

New intro to energy course – will be required for Pathway

Also new environmental science course – intro level

Tech level

Energy industry fundamentals – required course – not new

### **Aviation Pathway Development Progress – Peggy Torrens, Jim Means**

Putting committee together – First meeting early May

Coordinating with Wichita USD 259 to connect with business & industry & post-secondary

Looking at aviation design & manufacturing/repair/maintenance

Plan to have final design ready for KACCTE approval in June

Two companies wanting to partner for this

Scott Smathers: Demand around state is ramping up now. May happen quickly

### **Agriculture Pathway**

All 7 Ag. Pathways are being reviewed for approval

Competencies are being streamlined

Committee of 20-some

Many teachers have no training in areas of new competencies

CASE curriculum used by many schools

### **Visual Arts**

Fashion, Apparel, Interior Design Pathway

Industry unable to find qualified workforce

Beginning to expand in KS City area

Focus on small design houses, entrepreneurial spirit

[www.rightfullysewn.org](http://www.rightfullysewn.org)

More high- wage potential outside of “fast fashion”  
 Proposing own Pathway  
 Working to start credential – would be first state to develop this with industry  
 Over 30 FAID businesses have major presence in KS; 6 have headquarters here  
 Would like to hold academies for interested teachers  
 Possibility of requiring teachers to be certified at certain levels to teach certain courses

**Arts & AV Communications Pathway**

First meeting of committee: Jan 31, 2018

Proposed changes: 2 Pathways to 3

Visual Arts (FAID strands) to FACS field

Visual Arts (Graphic Arts Strand) to Graphic Arts Pathway (Arts A/V Cluster)

A/V Communications – rename: Digital Media Pathway (Arts A/V Cluster)

Graphic Design Pathway Changes

Intro, Technical levels – no significant changes

Application Level: 21205 (Project Management)

This was replaced by Pathway specific PM course (31095 –

Digital Media Project Management)

Students need better understanding of business aspects of media

Project Management – 21205

In conflict with redesign messages

Would like to deter districts from integrated courses

Output needs to be separate & distinct

Some mess with KBOR Regents requirements

Integration of core courses with CTE is good

Project management in English courses leaves out Pathway specific application level skills

Weighted .5 CTE funding should go to high cost, low enrollment courses that reflect technical skill

Development.

Look at rural initiative to get Perkins dollars to rural schools

Skills taught in Project Management (current) are employability skills, not technical skills

Courses that teach employability skills are not funded

Would like to make PM part of application level courses that are specific to Pathways

Action items	Person responsible	Deadline
✓ Crosswalk to PLTW, EBD Eng. & Design	Peggy Torrens	Presentations at CTE Conference
✓ Send out Ag. Information from Kurt	Amanda Williams	5/2/2018

**Agenda item:** Cluster Member Updates Business/Industry Members

**Discussion:**

**Hospitality**

This summer – teacher’s training in Wichita – year one through three in their teaching careers.

Basic skill sets for classroom – culinary skills

Trusted Table Certification Program([trustedtable.org](http://trustedtable.org))

Can now be found at select restaurants, so that customers know they have the following:

In compliance with most recent inspection  
Serve-safe manager certified on site at all business times

### **Firefighting**

Indianapolis – conference with new studies  
Changes how firefighting is taught

### **Education**

Challenges: working with non-traditional teachers  
Wichita – High school students in teacher training program can work on para certification  
KSU has held summits to discuss how to get teachers in pipeline

---

**Agenda item:** Advisory Member Updates Advisory Members

#### **Discussion:**

#### **IPS Roadshows – Career Advising**

6 Roadshows left this spring  
Attendance has been good  
Training of Trainers model

Diane DeBacker – Important to make sure that needs of industry are being fulfilled  
Workforce AID  
Works with employers that have immediate need for employees

---

**Agenda item:** KSDE CTE Updates KSDE Consultants

#### **Discussion:**

WBL – Natalie Clark

KBOR, Dept. of Commerce, Labor, Commerce, Stacy, Kathleen, Natalie  
May 21-22 – going to state of Washington  
Have rural initiatives as well as urban  
Dept. of Labor  
Developing fact sheet for education agencies & industry members

College & Career Readiness & Success Center  
Providing tech assistance support to KSDE  
Schools & industry need guidance for WBL  
KSDE'S PLE document is great (Diane DeBacker)

#### **Guest Insights**

Scott Lucas

Post-secondary – trying to tie together secondary & post-secondary together  
Starting a nursing pathway at Maize  
Maize school building an airplane  
Working with Harper Co. schools on generic online intro to manufacturing program to launch this year  
Students will do online & on-site experiences  
Nc3 credentials

Diane DeBacker

Gov. Colyer would like to join Governor's partnership for P12 Computer Science – sponsored by code.org

Must have standards for computer science

Stephen King

March BOE meeting – building computer science standards

Increased software development by over 50% in secondary level

There is a need for k-12 efforts

Almost 70 applications to be on committee – first meeting May 9

First in person meeting hosted by Garmin in June (Overland Park)

Hoping to have standards to BOE by next March (2019)

**Conclusions:**

Motion to adjourn

**Action items**

**Person responsible**

**Deadline**

Poll for date/location of next meeting

Amanda Williams

5/1/2018
