Alcohol and other drug use

63.1% of students have had at least one drink of alcohol during their lifetime.

- 13.5% have used marijuana during the last month.
- 14.6% have taken prescription pain medicine without a doctor’s permission.
- 29.9% have had at least one drink of alcohol during the last month.

Here’s the deal:

Drug use impacts perception and can fracture developing neural pathways.
