

Structured Literacy

Instructional considerations for literacy components

A BREAKDOWN OF INSTRUCTION

Literacy Structure

The literacy structures and graphics represented in this document are intended to create a snapshot of the domains of language arts instruction that are included in a structured literacy framework. This document is a recommendation only and should be used in conjunction with professional conversations about literacy instruction. Although the literacy components are listed separately on the graphics, it is not expected that teachers silo the components in their instruction. Robust reading instruction and the components listed in this document should be integrated throughout the school day.

The terms of structured literacy and the science of reading are not synonymous. Structured literacy is founded on decades of research and instructional practice that are informed by the science of reading.

The focus of instruction in a structured literacy framework varies in the amount of time spent on each element. Instruction by a skilled general education teacher will ebb and flow as students' progress or as they need supplemental instruction to achieve mastery. Keeping this in mind, the following components should be included in your structured literacy lessons on a daily basis.

In grades kindergarten through second grade the instruction focus should include the following components as tied to Kansas ELA state standards. *The standards listed below are not intended to limit your instruction. These standards are listed to help educators understand the connection that already exists between structured literacy and the Kansas ELA Standards. All Kansas ELA Standards should be addressed at each grade level.*
