**VISION: All children will learn, grow and develop to realize their full potential.**

Parents as Teachers is an evidence-based parent education and family engagement model serving families throughout pregnancy until their child enters kindergarten. Families receive personal visits typically in their homes from certified parent educators; group meetings; developmental, health, hearing and vision screenings; and linkages with community resources. The model has four goals: to increase parent knowledge of early childhood development and improve parenting practices; provide early detection of developmental delays and health issues; prevent child abuse and neglect; and increase children’s school readiness and school success. It is adaptable to the needs of diverse families, cultures and special populations.

The information in this summary is based on data from the typical reporting period of July 1, 2018 to June 30, 2019.

**Note 1:** Because moving out of the service area is not a reason for exit that can be controlled by a PAT service provider, the annual attrition rate has been calculated both ways (with families that exited due to moving included and excluded from the calculation). Also note that the attrition rates reported here are based on only one program year.
