Kansas 2021 Youth Risk Behavior Survey

What to Know

- Will be administering in Fall 2021.

- Hoping to have the option of administering survey online.

- 50-55 Kansas High Schools randomly selected by CDC to participate. Hope to have the list by the beginning of May.

- If schools are selected soon, will contact the schools to see if parental permission can be included in enrollment materials.

- Typically 3-5 classrooms are selected per school.

- Changes in the questionnaire:
  - Added 5 items about vaping
  - Included 3 items related to COVID-19
  - Added several positive life experiences items
  - Removed items asking about cocaine and heroin use
  - Removed several redundant items

Participating schools are to receive $1,500 that is deposited into the general fund, with a recommendation that some be directed to the classrooms that participated and school health-related expenditures. Discretion on use is left to the school/district.
