

STATE PERFORMANCE PLAN / ANNUAL PERFORMANCE REPORT: PART B

for STATE FORMULA GRANT PROGRAMS under the Individuals with Disabilities Education Act

**For reporting on
FFY 2022**

Kansas

PART B DUE February 1, 2024

**U.S. DEPARTMENT OF EDUCATION
WASHINGTON, DC 20202**

Introduction

Instructions

Provide sufficient detail to ensure that the Secretary and the public are informed of and understand the State's systems designed to drive improved results for students with disabilities and to ensure that the State Educational Agency (SEA) and Local Educational Agencies (LEAs) meet the requirements of IDEA Part B. This introduction must include descriptions of the State's General Supervision System, Technical Assistance System, Professional Development System, Stakeholder Involvement, and Reporting to the Public.

Intro - Indicator Data

Executive Summary

Additional information related to data collection and reporting

Number of Districts in your State/Territory during reporting year

286

General Supervision System:

The systems that are in place to ensure that the IDEA Part B requirements are met (e.g., integrated monitoring activities; data on processes and results; the SPP/APR; fiscal management; policies, procedures, and practices resulting in effective implementation; and improvement, correction, incentives, and sanctions).

The Kansas Integrated Accountability System (KIAS) is the primary mechanism used to ensure that IDEA (2004) general supervision requirements, State Performance Plan Annual Performance Report (SPP/APR) requirements as outlined by OSEP, accountability provisions of the Elementary and Secondary Education Act as revised by Every Student Succeeds Act, and state statutes and regulations are met.

The KIAS is an integrated continuous process involving data collection, reporting, district determinations, district corrective action, data verification, incentives, and sanctions. The general supervision components of state and district performance reporting; fiscal management; data on processes and results, policy, practice and procedures review and application of incentives and/or sanctions are included. KIAS is enacted through the provision of aligned guidance, resources, integrated on-site and off-site monitoring, technical assistance and professional development as directed by the Special Education and Title Services (SETS) Team State Director, Assistant Directors, Coordinators, Education Program Consultants, Public Service Administrators, and Administrative Assistants within the Division of Learning Services of the Kansas State Department of Education.

The KIAS ensures effective implementation of State and district compliance with the federal special education requirements and improved academic, behavioral, social, and post-secondary outcomes for students with disabilities.

Technical Assistance System:

The mechanisms that the State has in place to ensure the timely delivery of high quality, evidence-based technical assistance and support to LEAs.

Operating within the Kansas Integrated Accountability System (KIAS) is a mechanism to ensure the timely delivery of statewide high quality, evidenced-based technical assistance and support to districts known as the Kansas Technical Assistance System Network (TASN). TASN provides districts a wide array of no or low-cost evidence-based technical assistance and professional development that is essential to increasing adult capacity, preventing educational inequity, and establishing inclusive, safe, and supportive learning environments.

The KSDE-sponsored TASN is a dynamic system of delivery that supports KSDE-identified initiatives and priorities that cut across technical assistance, professional learning, accountability, monitoring, governance, and quality standards aligned with the Kansas SPP/APR. The KSDE SETS leadership team provides oversight of TASN ensuring timely and quality technical assistance. All technical assistance and professional learning provided by TASN is directed by standard operating principles. The principles are based on implementation science and the Learning Forward Standards for Professional Learning with a focus on scaling-up of effective implementation of evidence-based practices by districts to improve the educational results and functional outcomes for students with disabilities. The TASN evidence-based professional development priorities include flexible services, resources and supports for general and special education teachers, paraprofessionals, family members, administrators, and support service professionals. The array of TASN priorities include parent information resource center, early-career special education teacher mentoring; special education teacher recruitment & retention, systems coordination, utilization-focused evaluation, provision of high quality instruction within inclusive environments, assistive and instructional technology access, instructional resource center for the visually impaired, multi-tiered system of supports and alignment, autism & tertiary behavior supports, school mental health professional development and coaching, general supervision, timely and accurate data and the ESEA Kansas Learning Network.

TASN providers include staff from KSDE Early Childhood and Special Education and Title Services Teams, the IDEA Parent Training and Information Center (PTI), Kansas Parent Information Resource Center (KPIRC) and IDEA State Personnel Development Grant (SPDG) programs and contractual partners, as well as field-based staff. Multiple funding sources assist districts in expanding services, improving educator skills, and providing quality professional development based on needs identified through analysis of statewide data. For example, the implementation of SPP APR Indicator 17: State Systemic Improvement Plan is carried out by the TASN Evidence-Based Professional Development System Evaluation priority and the Systems-level Coaching for Kansas MTSS and Alignment Improvement priority. Federal investments include IDEA VI-B, ESEA Title I, school improvement, State Personnel Development Grant funding, ESSERS and ESSERS-2 funds. More information about the TASN priorities is available at www.kdetasn.org.

Professional Development System:

The mechanisms the State has in place to ensure that service providers have the skills to effectively provide services that improve results for children with disabilities.

Operating within the Kansas Integrated Accountability System (KIAS) is a mechanism to ensure the timely delivery of statewide high quality, evidenced-based technical assistance and professional development to districts known as the Kansas Technical Assistance System Network (TASN). This mechanism ensures that service providers at the state and local level have the skills to effectively deliver services to improve results for students with disabilities. Identified TASN priorities make available the evidence-based professional development that is essential to increasing adult capacity, preventing educational inequity, and establishing inclusive, safe, and supportive learning environments. TASN activities are directed by KSDE initiatives, including the Kansas SPP/APR with input and feedback from various stakeholder data, and the number of requests for targeted professional

development in a specific area of need. To increase access and availability the cost of services and resources are offered at no-cost or a nominal fee may be charged.

Kansas has two work scopes implemented uniformly across each priority and all providers: TASN Coordination and Utilization-focused Evaluation. The KSDE ensures TASN providers have the skills to effectively provide services that improve results for children with disabilities through continuous professional learning opportunities focused on the Learning Forward Professional Learning Standards which incorporate adult learning principles and implementation science. Kansas utilizes the national technical assistance centers and OSEP for professional development, guidance, and collaboration to continually improve educational results and functional outcomes for students with disabilities. The identification of needs and selection of strategies are informed by data from self-correcting feedback loops. Strategies to improve educational results and functional outcomes for students with disabilities are designed using the implementation drivers focused on staff selection, training, coaching, and evaluation to ensure effective implementation of evidence-based practices. The implementation of SPP APR Indicator 17: State Systemic Improvement Plan is carried out by the TASN Evidence-Based Professional Development System Evaluation priority and the Systems-level Coaching for Kansas MTSS and Alignment Improvement priority.

Multiple funding sources assist in expanding services, improving educator skills, and providing quality professional development based on needs identified through analysis of statewide data. Federal investments include IDEA VI-B, ESEA Title I, IDEA State Personnel Development Grant funding, ESSERS and ESSERS-2 funds. More information on the TASN priorities is at www.ksdetasn.org

Stakeholder Engagement:

The mechanisms for broad stakeholder engagement, including activities carried out to obtain input from, and build the capacity of, a diverse group of parents to support the implementation activities designed to improve outcomes, including target setting and any subsequent revisions to targets, analyzing data, developing improvement strategies, and evaluating progress.

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

Apply stakeholder engagement from introduction to all Part B results indicators (y/n)

YES

Number of Parent Members:

3,649

Parent Members Engagement:

Describe how the parent members of the State Advisory Panel, parent center staff, parents from local and statewide advocacy and advisory committees, and individual parents were engaged in setting targets, analyzing data, developing improvement strategies, and evaluating progress.

Kansas provided several opportunities through multiple methods for Kansas parents to engage in setting targets, analyzing data, developing improvement strategies, and evaluating progress. Kansas State Department of Education (KSDE) staff held a meeting with all Kansas parent training and information center staff (Families Together) to review the learning materials designed to build stakeholder capacity, review the historical and trend data visualizations, and solicit feedback not just through the stakeholder feedback survey, but also through open discussion. Families Together continues to provide guidance to KSDE staff on connecting and engaging with families and opportunities for KSDE staff to share the learning materials designed to build stakeholder capacity with groups of individuals training to be education advocates.

Kansas described how parent members of the State Advisory Panel were engaged in this process, through multiple meetings, in the above Broad Stakeholder Input section. Parents from local and statewide advocacy groups were included in the stakeholder information distribution, as described in the above Broad Stakeholder Input section. As part of requesting stakeholder feedback, Kansas provides its 1-800 number as an option for stakeholders to provide feedback via a voice recording if they do not have access to the internet.

Activities to Improve Outcomes for Children with Disabilities:

The activities conducted to increase the capacity of diverse groups of parents to support the development of implementation activities designed to improve outcomes for children with disabilities.

To build the capacity of diverse groups of parents to support the development of implementation activities designed to improve outcomes for children with disabilities, Kansas created clear and consistent learning materials about all SPP/APR indicators with changes that included requirements for target setting, requirements for each indicator, the data source for each indicator, historical data for each indicator, proposed improvement strategies, information on the impact of COVID-19 on the indicator data when relevant, proposed targets for each indicator, and information on how targets were determined. To give stakeholders the opportunity to analyze indicator data in an interactive way, Kansas created a Tableau Public site with data

visualizations for each results indicator that provided detailed information on historical data and its comparison to state targets, an interactive data visualization that allowed stakeholders to select the baseline year and proposed targets to see the comparison to historical data and projected future trends, and proposed targets. To collect stakeholder input, Kansas primarily used an online survey to collect feedback on the proposed targets and demographic information on the respondents. Kansas also provided an opportunity for an open-ended response on each indicator where stakeholders could share narrative feedback on suggested improvement strategies, evaluating progress, and the opportunity to share their story within the context of that indicator.

Additionally, live, virtual parent meetings and in-person education advocate meetings provide the opportunity for KSDE staff to share information and dialogue with families about the development of implementation activities designed to improve outcomes for children with disabilities. These important conversations must continue a regular basis to inform KSDE as it works to further adjust the systems it has in place to improve outcomes for children with disabilities.

Soliciting Public Input:

The mechanisms and timelines for soliciting public input for setting targets, analyzing data, developing improvement strategies, and evaluating progress.

The mechanisms Kansas employed for soliciting public input for setting targets, analyzing data, developing improvement strategies, and evaluating progress are described above, in the Broad Stakeholder Input section. Kansas officially sought public input from mid-March 2021 through mid-September 2021. Kansas recognizes the importance of continuing to solicit public input on proposed targets and to engage stakeholders in analyzing data, developing improvement strategies, and evaluating progress and will continue throughout the remaining SPP/APR cycle. In the Spring and Summer of 2022 additional public input on setting new targets for Indicators 2, 8, 14 and 17 occurred based upon results of revised data collection methodologies.

Making Results Available to the Public:

The mechanisms and timelines for making the results of the target setting, data analysis, development of the improvement strategies, and evaluation available to the public.

To make the results of the target setting, data analysis, development of the improvement strategies, and evaluation of progress available to the public, Kansas utilized a similar learning pathway that it designed to seek diverse stakeholder input. Kansas created clear and consistent information to assist stakeholders in understanding the SPP/APR requirements, the final targets, and proposed improvement strategies; provided historical and projected data, including continuing to provide the opportunity for stakeholders to interact with created data visualizations to consider the impact of changing targets; and the results of targeted feedback on the proposed targets. The survey results were posted, along with aggregate demographic information on survey respondents.

Kansas distributed information on this learning pathway sharing the results with the public broadly including, but not limited to: the five established statewide groups referenced earlier; Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, and schools involved in KSDE's redesign initiative; the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff; other state agency staff and stakeholders connected to their distribution networks; private schools and organizations that serve primarily students with disabilities and stakeholders; and state commissions focused on the communities of those identifying as a particular race or ethnicity.

Reporting to the Public

How and where the State reported to the public on the FFY 2021 performance of each LEA located in the State on the targets in the SPP/APR as soon as practicable, but no later than 120 days following the State's submission of its FFY 2021 APR, as required by 34 CFR §300.602(b)(1)(i)(A); and a description of where, on its Web site, a complete copy of the State's SPP/APR, including any revisions if the State has revised the targets that it submitted with its FFY 2021 APR in 2023, is available.

Kansas reports annually to the public on the performance of each district on the targets in the Kansas SPP/APR no later than 120 days following the submission of the APR as required by 34 C.F.R. § 300.602(b)(1)(i)(A). The FFY 2021 performance of each district on the indicator targets is available to the public at the KSDE website, datacentral.ksde.org/sped_rpts.aspx. Select Special Education Reports and filter by organization/USO and year or statewide. A complete copy of the Kansas FFY 2021 SPP/APR and other related documents are available on the KSDE website, <http://www.ksde.org/Default.aspx?tabid=520>. Another location is OSEP's State Performance Plans (SPP) Letters and Annual Performance Report (APR) Letters website <https://sites.ed.gov/idea/spp-apr-letters> filter by Kansas. Dissemination of public reports is through direct distribution and notification of availability on the KSDE website through electronic media including listservs to ensure public awareness.

Intro - Prior FFY Required Actions

None

Intro - OSEP Response

Intro - Required Actions

Indicator 1: Graduation

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of youth with Individualized Education Programs (IEPs) exiting special education due to graduating with a regular high school diploma. (20 U.S.C. 1416 (a)(3)(A))

Data Source

Same data as used for reporting to the Department under section 618 of the Individuals with Disabilities Education Act (IDEA), using the definitions in ED Facts file specification FS009.

Measurement

States must report a percentage using the number of youth with IEPs (ages 14-21) who exited special education due to graduating with a regular high school diploma in the numerator and the number of all youth with IEPs who exited high school (ages 14-21) in the denominator.

Instructions

Sampling is not allowed.

Data for this indicator are "lag" data. Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2022 SPP/APR, use data from 2021-2022), and compare the results to the target.

Include in the denominator the following exiting categories: (a) graduated with a regular high school diploma; (b) graduated with a state-defined alternate diploma; (c) received a certificate; (d) reached maximum age; or (e) dropped out.

Do not include in the denominator the number of youths with IEPs who exited special education due to: (a) transferring to regular education; or (b) who moved but are known to be continuing in an educational program.

Provide a narrative that describes the conditions youth must meet in order to graduate with a regular high school diploma. If the conditions that youth with IEPs must meet in order to graduate with a regular high school diploma are different, please explain.

Graduation Conditions

Provide a narrative that describes the conditions youth must meet in order to graduate with a regular high school diploma.

The Kansas State Department of Education (KSDE) established minimum graduation requirements for all students to receive a regular diploma. These requirements are the same for students with IEPs. The requirements are as follows:

Overall 21 units of credit

4 units of English Language Arts

3 units of History/Government (i.e. World History, United States History, United States Government, Concepts of Economics, Geography, and Kansas History and Kansas Government)

3 units of Mathematics

3 units of Science

1 unit of Physical Education

6 units of Electives

1 unit of Fine Arts

Are the conditions that youth with IEPs must meet to graduate with a regular high school diploma different from the conditions noted above? (yes/no)

NO

Indicator 2: Drop Out

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of youth with IEPs who exited special education due to dropping out. (20 U.S.C. 1416 (a)(3)(A))

Data Source

Same data as used for reporting to the Department under section 618 of the Individuals with Disabilities Education Act (IDEA), using the definitions in ED Facts file specification FS009.

Measurement

States must report a percentage using the number of youth with IEPs (ages 14-21) who exited special education due to dropping out in the numerator and the number of all youth with IEPs who exited special education (ages 14-21) in the denominator.

Instructions

Sampling is not allowed.

Data for this indicator are “lag” data. Describe the results of the State’s examination of the section 618 exiting data for the year before the reporting year (e.g., for the FFY 2022 SPP/APR, use data from 2021-2022), and compare the results to the target.

Include in the denominator the following exiting categories: (a) graduated with a regular high school diploma; (b) graduated with a state-defined alternate diploma; (c) received a certificate; (d) reached maximum age; or (e) dropped out.

Do not include in the denominator the number of youths with IEPs who exited special education due to: (a) transferring to regular education; or (b) who moved but are known to be continuing in an educational program.

Provide a narrative that describes what counts as dropping out for all youth. Please explain if there is a difference between what counts as dropping out for all students and what counts as dropping out for students with IEPs.

2 - Indicator Data

Provide a narrative that describes what counts as dropping out for all youth

Any student who leaves school and does not enroll in another school or program that culminates in a high school diploma. The students reported by the LEA as exiting under the following exit categories count as a dropout: discontinued schooling, moved within the United States - not known to be continuing, unknown, transfer to GED completion program, and transfer to a juvenile or adult correctional facility where educational services are not provided. Also, any unresolved exits are counted in the dropout category.

Is there a difference in what counts as dropping out for youth with IEPs? (yes/no)

NO

If yes, explain the difference in what counts as dropping out for youth with IEPs.

Indicator 3A: Participation for Children with IEPs

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Participation and performance of children with IEPs on statewide assessments:

- A. Participation rate for children with IEPs.
- B. Proficiency rate for children with IEPs against grade level academic achievement standards.
- C. Proficiency rate for children with IEPs against alternate academic achievement standards.
- D. Gap in proficiency rates for children with IEPs and all students against grade level academic achievement standards.

(20 U.S.C. 1416 (a)(3)(A))

Data Source

3A. Same data as used for reporting to the Department under Title I of the ESEA, using ED Facts file specifications FS185 and 188.

Measurement

A. Participation rate percent = [(# of children with IEPs participating in an assessment) divided by the (total # of children with IEPs enrolled during the testing window)]. Calculate separately for reading and math. Calculate separately for grades 4, 8, and high school. The participation rate is based on all children with IEPs, including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year.

Instructions

Describe the results of the calculations and compare the results to the targets. Provide the actual numbers used in the calculation.

Include information regarding where to find public reports of assessment participation and performance results, as required by 34 CFR §300.160(f), i.e., a link to the Web site where these data are reported.

Indicator 3A: Provide separate reading/language arts and mathematics participation rates for children with IEPs for each of the following grades: 4, 8, & high school. Account for ALL children with IEPs, in grades 4, 8, and high school, including children not participating in assessments and those not enrolled for a full academic year. Only include children with disabilities who had an IEP at the time of testing.

Math	C >=	Grade HS	95.00%	95.00%	95.00%	95.00%

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

Regulatory Information

The SEA, (or, in the case of a district-wide assessment, LEA) must make available to the public, and report to the public with the same frequency and in the same detail as it reports on the assessment of nondisabled children: (1) the number of children with disabilities participating in: (a) regular assessments, and the number of those children who were provided accommodations in order to participate in those assessments; and (b) alternate assessments aligned with alternate achievement standards; and (2) the performance of children with disabilities on regular assessments and on alternate assessments, compared with the achievement of all children, including children with disabilities, on those assessments. [20 U.S.C. 1412 (a)(16)(D); 34 CFR §300.160(f)]

Public Reporting Information

Provide links to the page(s) where you provide public reports of assessment results.

Kansas reported to the public on the statewide assessments of children with disabilities in accordance with 34 CFR § 300.160(f). To view this data, please go to the Kansas Building Report Card – Participation Summary Report, located at https://ksreportcard.ksde.org/part_details.aspx?org_no=State&rptType=3 . In the box “Select Organization”, choose a school, district, or State Totals. In the box “Selections”, choose a subject, ELA, math or science, from the dropdown on the right and an option for All Assessments, General with Accommodations, and DLM.

Indicator 3B: Proficiency for Children with IEPs (Grade Level Academic Achievement Standards)

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Participation and performance of children with IEPs on statewide assessments:

- A. Participation rate for children with IEPs.
- B. Proficiency rate for children with IEPs against grade level academic achievement standards.
- C. Proficiency rate for children with IEPs against alternate academic achievement standards.
- D. Gap in proficiency rates for children with IEPs and all students against grade level academic achievement standards.

(20 U.S.C. 1416 (a)(3)(A))

Data Source

3B. Same data as used for reporting to the Department under Title I of the ESEA, using ED*Facts* file specifications FS175 and 178.

Measurement

B. Proficiency rate percent = [(# of children with IEPs scoring at or above proficient against grade level academic achievement standards) divided by the (total # of children with IEPs who received a valid score and for whom a proficiency level was assigned for the regular assessment)]. Calculate separately for reading and math. Calculate separately for grades 4, 8, and high school. The proficiency rate includes both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year.

Instructions

Describe the results of the calculations and compare the results to the targets. Provide the actual numbers used in the calculation.

Include information regarding where to find public reports of assessment participation and performance results, as required by 34 CFR §300.160(f), i.e., a link to the Web site where these data are reported.

Indicator 3B: Proficiency calculations in this SPP/APR must result in proficiency rates for children with IEPs on the regular assessment in reading/language arts and mathematics assessments (separately) in each of the following grades: 4, 8, and high school, including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year. Only include children with disabilities who had an IEP at the time of testing.

C	Grade HS	33	314	9.70%	16.82%	10.51%	Did not meet target	No Slippage

Provide reasons for slippage for Group B, if applicable

An analysis of the data suggests that this group of students who entered middle school in the height of the pandemic may not have had intensive supports and detailed instruction while instructed in virtual settings during the COVID-19 pandemic. Students taking the alternate assessment have the most comprehensive needs, so the suspension of or inconsistency in in-person instruction during those two years of middle school may have impacted these students. The impact may be more stark for those students with cognitive impairments and more comprehensive needs, which is why proficiency rates for 8th grade students show slippage in reading and math alt assessments.

Provide links to the page(s) where you provide public reports of assessment results.

In accordance with 34 CFR §300.160(f), Kansas reports all assessment data for all students (both general education and students receiving special education services) in the same manner so that data are consistent. Kansas information on performance and participation of students with disabilities is located in two places; (1) The Building Report Card <http://ksreportcard.ksde.org/default.aspx>, and (2) The SPP/APR District Report https://datacentral.ksde.org/sped_rpts.aspx.

Indicator 3D: Gap in Proficiency Rates (Grade Level Academic Achievement Standards)

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Participation and performance of children with IEPs on statewide assessments:

- A. Participation rate for children with IEPs.
- B. Proficiency rate for children with IEPs against grade level academic achievement standards.
- C. Proficiency rate for children with IEPs against alternate academic achievement standards.
- D. Gap in proficiency rates for children with IEPs and all students against grade level academic achievement standards.

(20 U.S.C. 1416 (a)(3)(A))

Data Source

3D. Same data as used for reporting to the Department under Title I of the ESEA, using ED*Facts* file specifications FS175 and 178.

Measurement

D. Proficiency rate gap = [(proficiency rate for children with IEPs scoring at or above proficient against grade level academic achievement standards for the 2022-2023 school year) subtracted from the (proficiency rate for all students scoring at or above proficient against grade level academic achievement standards for the 2022-2023 school year)]. Calculate separately for reading and math. Calculate separately for grades 4, 8, and high school. The proficiency rate includes all children enrolled for a full academic year and those not enrolled for a full academic year.

Instructions

Describe the results of the calculations and compare the results to the targets. Provide the actual numbers used in the calculation.

Include information regarding where to find public reports of assessment participation and performance results, as required by 34 CFR §300.160(f), i.e., a link to the Web site where these data are reported.

Indicator 3D: Gap calculations in this SPP/APR must result in the proficiency rate for children with IEPs were proficient against grade level academic achievement standards for the 2022-2023 school year compared to the proficiency rate for all students who were proficient against grade level academic achievement standards for the 2022-2023 school year. Calculate separately for reading/language arts and math in each of the following grades: 4, 8, and high school, including both children enrolled for a full academic year and those not enrolled for a full academic year. Only include children with disabilities who had an IEP at the time of testing.

3D - Indicator Data

Historical Data:

Math	C <=	Grade HS	16.64	16.55	16.45	16.36

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the:

(1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

Data Source:

###ESSDG583CFFY###

Date:

01/10/2024

Math Assessment Proficiency Data by Grade (1)

Group	Grade 4	Grade 8	Grade HS
a. All Students who received a valid score and a proficiency was assigned for the regular assessment	33,086	35,064	35,360
b. Children with IEPs who received a valid score and a proficiency was assigned for the regular assessment	5,739	4,861	4,233
c. All students in regular assessment with no accommodations scored at or above proficient against grade level	12,128	7,931	7,388

d. All students in regular assessment with accommodations scored at or above proficient against grade level	382	113	64
e. Children with IEPs in regular assessment with no accommodations scored at or above proficient against grade level	767	221	146
f. Children with IEPs in regular assessment with accommodations scored at or above proficient against grade level	166	51	16

(1)The term “regular assessment” is an aggregation of the following types of assessments as applicable for each grade/ grade group: regular assessment based on grade-level achievement standards, advanced assessment, Innovative Assessment Demonstration Authority (IADA) pilot assessment, high school regular assessment I, high school regular assessment II, high school regular assessment III and locally-selected nationally recognized high school assessment in the prefilled data in this indicator.

FFY 2022 SPP/APR Data: Reading Assessment

Group	Group Name	Proficiency rate for children with IEPs scoring at or above proficient against grade level academic achievement standards	Proficiency rate for all students scoring at or above proficient against grade level academic achievement standards	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
A	Grade 4	17.43%	44.19%	24.02	25.65	26.76	Did not meet target	Slippage
B	Grade 8	4.85%	21.08%	15.80	17.28	16.23	Met target	No Slippage
C	Grade HS	5.80%	27.31%	20.51	20.91	21.51	Did not meet target	No Slippage

Provide reasons for slippage for Group A, if applicable

To determine possible reasons for slippage, the state looked at various data points, among which the statewide chronic absenteeism data stood out. The state recognizes that students not attending school consistently across a school year will mean they are not regularly receiving instruction on the grade level standards upon which they will be assessed. Accordingly, there is an indication that the higher rates of chronic absenteeism may be linked and/or contribute to lower proficiency rates. The state observed a decrease in proficiency rates for students with disabilities on reading statewide assessments for 4th grade and an increase in proficiency rates for all students, thus increasing the gap between the two groups. An analysis of the data suggests chronic absenteeism may have influenced the gap in proficiency between students with disabilities and all students. The chronic absenteeism for 4th graders with disabilities was 27% for the 2022-2023 school year, where the chronic absenteeism for all 4th graders was 20%.

FFY 2022 SPP/APR Data: Math Assessment

Group	Group Name	Proficiency rate for children with IEPs scoring at or above proficient against grade level academic achievement standards	Proficiency rate for all students scoring at or above proficient against grade level academic achievement standards	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
A	Grade 4	16.26%	37.81%	18.58	19.07	21.55	Did not meet target	Slippage
B	Grade 8	5.60%	22.94%	15.36	15.32	17.35	Did not meet target	Slippage
C	Grade HS	3.83%	21.07%	17.22	16.64	17.25	Did not meet target	No Slippage

Provide reasons for slippage for Group A, if applicable

To determine possible reasons for slippage, the state looked at various data points, among which the statewide chronic absenteeism data stood out. The state recognizes that students not attending school consistently across a school year will mean they are not regularly receiving instruction on the grade level standards upon which they will be assessed. Accordingly, there is an indication that the higher rates of chronic absenteeism may be linked and/or contribute to lower proficiency rates. The state observed a decrease in proficiency rates for students with disabilities on math statewide assessments for 4th grade and an increase in proficiency rates for all students, thus increasing the gap between the two groups. An analysis of the data suggests chronic absenteeism may have influenced the gap in proficiency between students with disabilities and all students. The chronic absenteeism for 4th graders with disabilities was 27% for the 2022-2023 school year, where the chronic absenteeism for all 4th graders was 20%.

Provide reasons for slippage for Group B, if applicable

To determine possible reasons for slippage, the state looked at various data points, among which the statewide chronic absenteeism data stood out. The state recognizes that students not attending school consistently across a school year will mean they are not regularly receiving instruction on the grade level standards upon which they will be assessed. Accordingly, there is an indication that the higher rates of chronic absenteeism may be linked and/or

contribute to lower proficiency rates. The state observed a minor increase in proficiency rates for students with disabilities on the math statewide assessments for 8th grade and a more substantial increase in proficiency rates for all students, thus contributing to the gap between the two groups. An analysis of the data suggests chronic absenteeism may have influenced the gap in proficiency between students with disabilities and all students. The chronic absenteeism for 8th graders with disabilities was 34% for the 2022-2023 school year, where the chronic absenteeism for all 8th graders was 27%.

3D - Prior FFY Required Actions

None

3D - OSEP Response

3D - Required Actions

Indicator 4A: Suspension/Expulsion

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results Indicator: Rates of suspension and expulsion:

- A. Percent of local educational agencies (LEA) that have a significant discrepancy, as defined by the State, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
- B. Percent of LEAs that have: (a) a significant discrepancy, as defined by the State, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy, as defined by the State, and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

Data Source

State discipline data, including State's analysis of State's Discipline data collected under IDEA Section 618, where applicable. Discrepancy can be computed by either comparing the rates of suspensions and expulsions for children with IEPs to rates for nondisabled children within the LEA or by comparing the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

Measurement

Percent = [(# of LEAs that meet the State-established n and/or cell size (if applicable) that have a significant discrepancy, as defined by the State, in the rates of suspensions and expulsions for more than 10 days during the school year of children with IEPs) divided by the (# of LEAs in the State that meet the State-established n and/or cell size (if applicable))] times 100.

Include State's definition of "significant discrepancy."

Instructions

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, LEAs that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of LEAs totally excluded from the calculation as a result of this requirement.

Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2022 SPP/APR, use data from 2021-2022), including data disaggregated by race and ethnicity to determine if significant discrepancies, as defined by the State, are occurring in the rates of long-term suspensions and expulsions (more than 10 days during the school year) of children with IEPs, as required at 20 U.S.C. 1412(a)(22). The State's examination must include one of the following comparisons:

- The rates of suspensions and expulsions for children with IEPs among LEAs within the State; or
- The rates of suspensions and expulsions for children with IEPs to rates of suspensions and expulsions for nondisabled children within the LEAs.

In the description, specify which method the State used to determine possible discrepancies and explain what constitutes those discrepancies.

Because the measurement table requires that the data examined for this indicator are lag year data, States should examine the section 618 data that was submitted by LEAs that were in operation during the school year before the reporting year. For example, if a State has 100 LEAs operating in the 2021-2022 school year, those 100 LEAs would have reported section 618 data in 2021-2022 on the number of children suspended/expelled. If the State then opens 15 new LEAs in 2022-2023, suspension/expulsion data from those 15 new LEAs would not be in the 2021-2022 section 618 data set, and therefore, those 15 new LEAs should not be included in the denominator of the calculation. States must use the number of LEAs from the year before the reporting year in its calculation for this indicator. For the FFY 2022 SPP/APR submission, States must use the number of LEAs reported in 2021-2022 (which can be found in the FFY 2021 SPP/APR introduction).

Indicator 4A: Provide the actual numbers used in the calculation (based upon LEAs that met the minimum n and/or cell size requirement, if applicable). If significant discrepancies occurred, describe how the State educational agency reviewed and, if appropriate, revised (or required the affected local educational agency to revise) its policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, to ensure that such policies, procedures, and practices comply with applicable requirements.

Provide detailed information about the timely correction of child-specific and regulatory/systemic noncompliance as noted in OSEP's response for the previous SPP/APR. If discrepancies occurred and the LEA with discrepancies had policies, procedures or practices that contributed to the significant discrepancy, as defined by the State, and that do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP QA 23-01, dated July 24, 2023.

If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2022 SPP/APR, the data for FFY 2021), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

4A - Indicator Data

Historical Data

Baseline Year	Baseline Data
2022	4.51%

FFY	2017	2018	2019	2020	2021
Target <=	0.70%	0.00%	0.00%	0.00%	0.70%
Data	0.00%	0.00%	0.00%	0.00%	Not Valid and Reliable

Targets

FFY	2022	2023	2024	2025
Target <=	4.51%	4.51%	4.51%	4.14%

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

FFY 2022 SPP/APR Data

Has the state established a minimum n/cell-size requirement? (yes/no)

YES

If yes, the State may only include, in both the numerator and the denominator, LEAs that met the State-established n/cell size. Report the number of LEAs excluded from the calculation as a result of the requirement.

20

Number of LEAs that have a significant discrepancy	Number of LEAs that met the State's minimum n/cell-size	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
12	266	Not Valid and Reliable	4.51%	4.51%	N/A	N/A

Choose one of the following comparison methodologies to determine whether significant discrepancies are occurring (34 CFR §300.170(a))

Compare the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs among LEAs in the State

State's definition of "significant discrepancy" and methodology

Definition of Significant Discrepancy: The Kansas definition of significant discrepancy for suspension and expulsion is any district with at least 30 students with IEPs that suspends at least one (1) special education student and suspends at a rate three (3) times the state threshold of its special education population for more than 10 days.

Methodology: For indicator 4A, Kansas does not include nondisabled children in the calculation. Kansas does not include gifted only children in the calculation. Kansas compares the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs among LEAs in Kansas.

Kansas identifies an LEA for significant discrepancy if it suspended/expelled at least one of its children with an IEP for more than 10 days in a school year and suspends at a rate three (3) times the state threshold of its special education population for more than 10 days.

Kansas has set a cell size of 0 children with IEPs suspended/expelled for greater than 10 days in a school year. Kansas divides the total number of children with IEPs suspended/expelled for more than 10 days by all children with IEPs within the LEA and multiplies the quotient by 100 to create a percentage for the LEA rate. Kansas establishes an annual threshold by multiplying the state average rate by three (3). The state threshold is determined by dividing the total number of the children with IEPs suspended/expelled for more than 10 days in the state by all children with IEPs within the state and multiplying the quotient by 100 and multiplying the result by three (3) to create the state threshold. An LEA has a significant discrepancy when its rate exceeds the state threshold.

Among all the LEAs in Kansas for this submission, there were 12 LEAs that had at least 1 suspension, and the LEAs' suspension/expulsion rate exceeded the state threshold.

Provide additional information about this indicator (optional)

Review of Policies, Procedures, and Practices (completed in FFY 2022 using 2021-2022 data)

Provide a description of the review of policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

Identified districts submitted their policies, practices, and procedures relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards. KSDE reviewed district submitted documentation and performed verification, clarification, and data analysis for final determination of compliance or noncompliance.

The State DID identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b).

If YES, select one of the following:

The State did NOT ensure that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

The State must report on the correction of noncompliance in next year's SPP/APR consistent with requirements in the Measurement Table and OSEP QA 23-01, dated July 24, 2023. Please explain why the State did not ensure that policies, procedures, and practices were revised to comply with applicable requirements.

Districts received initial notification of noncompliance, and KSDE will verify that each identified district with noncompliance correctly implements the regulatory requirements through the correction of noncompliance process that includes conducting a root cause analysis, correction of each individual case of identified noncompliance and subsequent review of updated student file data as per OSEP QA 23-01.

Correction of Findings of Noncompliance Identified in FFY 2021

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
0	0	0	0

Correction of Findings of Noncompliance Identified Prior to FFY 2021

Year Findings of Noncompliance Were Identified	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2021 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

4A - Prior FFY Required Actions

The State did not provide valid and reliable data for FFY 2021. The State must provide valid and reliable data for FFY 2022 in the FFY 2022 SPP/APR using a methodology that meets one of the two comparison methods as required by 34 C.F.R. § 300.170(a) and the Measurement Table.

Response to actions required in FFY 2021 SPP/APR

OSEP could not determine if the state's FFY2021 indicator 4a data were valid and reliable. In response, the KSDE has provided valid and reliable data in this FFY 2022 SPP/APR using a methodology that meets one of the two comparison methods as required by 34 C.F.R. § 300.170(a) and the Measurement Table. Specifically, the chosen methodology is calculated using the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

4A - OSEP Response

4A - Required Actions

Indicator 4B: Suspension/Expulsion

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Compliance Indicator: Rates of suspension and expulsion:

- A. Percent of local educational agencies (LEA) that have a significant discrepancy, as defined by the State, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
- B. Percent of LEAs that have: (a) a significant discrepancy, as defined by the State, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy, as defined by the State, and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

Data Source

State discipline data, including State's analysis of State's Discipline data collected under IDEA Section 618, where applicable. Discrepancy can be computed by either comparing the rates of suspensions and expulsions for children with IEPs to rates for nondisabled children within the LEA or by comparing the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

Measurement

Percent = [(# of LEAs that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups that have: (a) a significant discrepancy, as defined by the State, by race or ethnicity, in the rates of suspensions and expulsions of more than 10 days during the school year of children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy, as defined by the State, and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards) divided by the (# of LEAs in the State that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups)] times 100.

Include State's definition of "significant discrepancy."

Instructions

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, LEAs that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of LEAs totally excluded from the calculation as a result of this requirement.

Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2022 SPP/APR, use data from 2021-2022), including data disaggregated by race and ethnicity to determine if significant discrepancies, as defined by the State, are occurring in the rates of long-term suspensions and expulsions (more than 10 days during the school year) of children with IEPs, as required at 20 U.S.C. 1412(a)(22). The State's examination must include one of the following comparisons:

- The rates of suspensions and expulsions for children with IEPs among LEAs within the State; or
- The rates of suspensions and expulsions for children with IEPs to the rates of suspensions and expulsions for nondisabled children within the LEAs

In the description, specify which method the State used to determine possible discrepancies and explain what constitutes those discrepancies.

Because the measurement table requires that the data examined for this indicator are lag year data, States should examine the section 618 data that was submitted by LEAs that were in operation during the school year before the reporting year. For example, if a State has 100 LEAs operating in the 2021-2022 school year, those 100 LEAs would have reported section 618 data in 2021-2022 on the number of children suspended/expelled. If the State then opens 15 new LEAs in 2022-2023, suspension/expulsion data from those 15 new LEAs would not be in the 2021-2022 section 618 data set, and therefore, those 15 new LEAs should not be included in the denominator of the calculation. States must use the number of LEAs from the year before the reporting year in its calculation for this indicator. For the FFY 2022 SPP/APR submission, States must use the number of LEAs reported in 2021-2022 (which can be found in the FFY 2021 SPP/APR introduction).

Indicator 4B: Provide the following: (a) the number of LEAs that met the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups that have a significant discrepancy, as defined by the State, by race or ethnicity, in the rates of long-term suspensions and expulsions (more than 10 days during the school year) for children with IEPs; and (b) the number of those LEAs in which policies, procedures or practices contribute to the significant discrepancy, as defined by the State, and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

Provide detailed information about the timely correction of child-specific and regulatory/systemic noncompliance as noted in OSEP's response for the previous SPP/APR. If discrepancies occurred and the LEA with discrepancies had policies, procedures or practices that contributed to the significant discrepancy, as defined by the State, and that do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP QA 23-01, dated July 24, 2023.

If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2022 SPP/APR, the data for FFY 2021), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Targets must be 0% for 4B.

FFY 2022 SPP/APR Data

Has the state established a minimum n/cell-size requirement? (yes/no)

YES

If yes, the State may only include, in both the numerator and the denominator, LEAs that met the State-established n/cell size. Report the number of LEAs excluded from the calculation as a result of the requirement.

31

Number of LEAs that have a significant discrepancy, by race or ethnicity	Number of those LEAs that have policies, procedure or practices that contribute to the significant discrepancy and do not comply with requirements	Number of LEAs that met the State's minimum n/cell-size	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
29	12	255		0%	4.71%	N/A	N/A

Choose one of the following comparison methodologies to determine whether significant discrepancies are occurring (34 CFR §300.170(a))

Compare the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs among LEAs in the State

Were all races and ethnicities included in the review?

YES

State's definition of "significant discrepancy" and methodology

Definition of Significant Discrepancy: The Kansas definition of significant discrepancy for suspension and expulsion is any district that suspends at least one (1) special education student of a given race or ethnicity and suspends at a rate three (3) times the state threshold of its special education population for more than 10 days.

Methodology: For indicator 4B, Kansas does not include nondisabled children in the calculation. Kansas does not include gifted only children in the calculation. Kansas compares the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs of a given race or ethnicity among LEAs in Kansas.

Kansas identifies an LEA for significant discrepancy if it suspended/expelled at least one of its children with an IEP of a given race or ethnicity for more than 10 days in a school year and suspends at a rate three (3) times the state threshold of its special education population for more than 10 days.

Kansas has set a cell size of 0 children with IEPs of a given race or ethnicity suspended/expelled for greater than 10 days in a school year. Kansas divides the total number of children with IEPs of a given race or ethnicity suspended/expelled for more than 10 days by all children with IEPs of a given race or ethnicity within the LEA and multiplies the quotient by 100 to create a percentage for the LEA rate. Kansas establishes an annual threshold by multiplying the state average rate by three (3). The state threshold is determined by dividing the total number of the children with IEPs suspended/expelled for more than 10 days in the state by all children with IEPs within the state and multiplying the quotient by 100 and multiplying the result by three (3) to create the state threshold. Kansas applies the state threshold to each racial and ethnic group. An LEA has a significant discrepancy when its rate exceeds the state threshold.

Among all the LEAs in Kansas for this submission, there were 29 LEAs that had at least 1 suspension, and the LEAs' suspension/expulsion rate exceeded the state threshold.

Provide additional information about this indicator (optional)

Review of Policies, Procedures, and Practices (completed in FFY 2022 using 2021-2022 data)

Provide a description of the review of policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

Identified districts submitted their policies, practices, and procedures relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards. KSDE reviewed district submitted documentation and performed verification, clarification, and data analysis for final determination of compliance or noncompliance.

The State DID identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b).

If YES, select one of the following:

The State did NOT ensure that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

The State must report on the correction of noncompliance in next year's SPP/APR consistent with requirements in the Measurement Table and OSEP QA 23-01, dated July 24, 2023. Please explain why the State did not ensure that policies, procedures, and practices were revised to comply with applicable requirements.

Districts received initial notification of noncompliance, and KSDE will verify that each identified district with noncompliance correctly implements the regulatory requirements through the correction of noncompliance process that includes conducting a root cause analysis, correction of each individual case of identified noncompliance and subsequent review of updated student file data as per OSEP QA 23-01.

4B - Prior FFY Required Actions

In the FFY 2022 SPP/APR, the State must provide data for this indicator for FFY 2022 using a methodology that meets one of the two comparison methods as required by 34 C.F.R. § 300.170(a) and the Measurement Table.

Response to actions required in FFY 2021 SPP/APR

In FFY2021 OSEP determined the state's chosen methodology for indicator 4b calculation was unclear. In response, the KSDE has provided valid and reliable data in this FFY 2022 SPP/APR using a methodology that meets one of the two comparison methods as required by 34 C.F.R. § 300.170(a) and the Measurement Table. Specifically, the chosen 4a methodology is calculated using the rates of suspensions and expulsions for children with IEPs among LEAs within the State. As such, the data reported under Indicator 4b are valid and reliable.

4B - OSEP Response

4B- Required Actions

Indicator 5: Education Environments (children 5 (Kindergarten) - 21)

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of children with IEPs aged 5 who are enrolled in kindergarten and aged 6 through 21 served:

- A. Inside the regular class 80% or more of the day;
- B. Inside the regular class less than 40% of the day; and
- C. In separate schools, residential facilities, or homebound/hospital placements.

(20 U.S.C. 1416(a)(3)(A))

Data Source

Same data as used for reporting to the Department under section 618 of the IDEA, using the definitions in ED Facts file specification FS002.

Measurement

- A. Percent = [(# of children with IEPs aged 5 who are enrolled in kindergarten and aged 6 through 21 served inside the regular class 80% or more of the day) divided by the (total # of students aged 5 who are enrolled in kindergarten and aged 6 through 21 with IEPs)] times 100.
- B. Percent = [(# of children with IEPs aged 5 who are enrolled in kindergarten and aged 6 through 21 served inside the regular class less than 40% of the day) divided by the (total # of students aged 5 who are enrolled in kindergarten and aged 6 through 21 with IEPs)] times 100.
- C. Percent = [(# of children with IEPs aged 5 who are enrolled in kindergarten and aged 6 through 21 served in separate schools, residential facilities, or homebound/hospital placements) divided by the (total # of students aged 5 who are enrolled in kindergarten and aged 6 through 21 with IEPs)] times 100.

Instructions

Sampling from the State's 618 data is not allowed.

States must report five-year-old children with disabilities who are enrolled in kindergarten in this indicator. Five-year-old children with disabilities who are enrolled in preschool programs are included in Indicator 6.

Describe the results of the calculations and compare the results to the target.

If the data reported in this indicator are not the same as the State's data reported under section 618 of the IDEA, explain.

5 - Indicator Data

Target B <=	7.00%	7.00%	7.00%	6.95%
Target C <=	2.18%	2.17%	2.16%	2.15%

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students

with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

None

5 - OSEP Response

5 - Required Actions

Indicator 6: Preschool Environments

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of children with IEPs aged 3, 4, and aged 5 who are enrolled in a preschool program attending a:

- A. Regular early childhood program and receiving the majority of special education and related services in the regular early childhood program; and
- B. Separate special education class, separate school or residential facility.
- C. Receiving special education and related services in the home.

(20 U.S.C. 1416(a)(3)(A))

Data Source

Same data as used for reporting to the Department under section 618 of the IDEA, using the definitions in ED Facts file specification FS089.

Measurement

- A. Percent = [(# of children ages 3, 4, and 5 with IEPs attending a regular early childhood program and receiving the majority of special education and related services in the regular early childhood program) divided by the (total # of children ages 3, 4, and 5 with IEPs)] times 100.
- B. Percent = [(# of children ages 3, 4, and 5 with IEPs attending a separate special education class, separate school or residential facility) divided by the (total # of children ages 3, 4, and 5 with IEPs)] times 100.
- C. Percent = [(# of children ages 3, 4, and 5 with IEPs receiving special education and related services in the home) divided by the (total # of children ages 3, 4, and 5 with IEPs)] times 100.

Instructions

Sampling from the State's 618 data is not allowed.

States must report five-year-old children with disabilities who are enrolled in preschool programs in this indicator. Five-year-old children with disabilities who are enrolled in kindergarten are included in Indicator 5.

States may choose to set one target that is inclusive of children ages 3, 4, and 5, or set individual targets for each age.

For Indicator 6C: States are not required to establish a baseline or targets if the number of children receiving special education and related services in the home is less than 10, regardless of whether the State chooses to set one target that is inclusive of children ages 3, 4, and 5, or set individual targets for each age. In a reporting period during which the number of children receiving special education and related services in the home reaches 10 or greater, States are required to develop baseline and targets and report on them in the corresponding SPP/APR.

For Indicator 6C: States may express their targets in a range (e.g., 75-85%).

Describe the results of the calculations and compare the results to the target.

If the data reported in this indicator are not the same as the State's data reported under IDEA section 618, explain.

Indicator 7: Preschool Outcomes

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of preschool children aged 3 through 5 with IEPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/ communication and early literacy); and
- C. Use of appropriate behaviors to meet their needs.

(20 U.S.C. 1416 (a)(3)(A))

Data Source

State selected data source.

Measurement

Outcomes:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/communication and early literacy); and
- C. Use of appropriate behaviors to meet their needs.

Progress categories for A, B and C:

- a. Percent of preschool children who did not improve functioning = [(# of preschool children who did not improve functioning) divided by (# of preschool children with IEPs assessed)] times 100.
- b. Percent of preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers = [(# of preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers) divided by (# of preschool children with IEPs assessed)] times 100.
- c. Percent of preschool children who improved functioning to a level nearer to same-aged peers but did not reach it = [(# of preschool children who improved functioning to a level nearer to same-aged peers but did not reach it) divided by (# of preschool children with IEPs assessed)] times 100.
- d. Percent of preschool children who improved functioning to reach a level comparable to same-aged peers = [(# of preschool children who improved functioning to reach a level comparable to same-aged peers) divided by (# of preschool children with IEPs assessed)] times 100.
- e. Percent of preschool children who maintained functioning at a level comparable to same-aged peers = [(# of preschool children who maintained functioning at a level comparable to same-aged peers) divided by (# of preschool children with IEPs assessed)] times 100.

Summary Statements for Each of the Three Outcomes:

Summary Statement 1: Of those preschool children who entered the preschool program below age expectations in each Outcome, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program.

Measurement for Summary Statement 1: Percent = [(# of preschool children reported in progress category (c) plus # of preschool children reported in category (d)) divided by (# of preschool children reported in progress category (a) plus # of preschool children reported in progress category (b) plus # of preschool children reported in progress category (c) plus # of preschool children reported in progress category (d))] times 100.

Summary Statement 2: The percent of preschool children who were functioning within age expectations in each Outcome by the time they turned 6 years of age or exited the program.

Measurement for Summary Statement 2: Percent = [(# of preschool children reported in progress category (d) plus # of preschool children reported in progress category (e)) divided by (the total # of preschool children reported in progress categories (a) + (b) + (c) + (d) + (e))] times 100.

Instructions

Sampling of **children for assessment** is allowed. When sampling is used, submit a description of the sampling methodology outlining how the design will yield valid and reliable estimates. (See [General Instructions](#) on page 3 for additional instructions on sampling.)

In the measurement include, in the numerator and denominator, only children who received special education and related services for at least six months during the age span of three through five years.

Describe the results of the calculations and compare the results to the targets. States will use the progress categories for each of the three Outcomes to calculate and report the two Summary Statements. States have provided targets for the two Summary Statements for the three Outcomes (six numbers for targets for each FFY).

Report progress data and calculate Summary Statements to compare against the six targets. Provide the actual numbers and percentages for the five reporting categories for each of the three Outcomes.

In presenting results, provide the criteria for defining "comparable to same-aged peers." If a State is using the Early Childhood Outcomes Center (ECO) Child Outcomes Summary (COS), then the criteria for defining "comparable to same-aged peers" has been defined as a child who has been assigned a score of 6 or 7 on the COS.

In addition, list the instruments and procedures used to gather data for this indicator, including if the State is using the ECO COS.

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

FFY 2022 SPP/APR Data

Number of preschool children aged 3 through 5 with IEPs assessed

3,763

Outcome A: Positive social-emotional skills (including social relationships)

Outcome A Progress Category	Number of children	Percentage of Children
a. Preschool children who did not improve functioning	17	0.45%
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	312	8.29%
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	1,148	30.51%
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	1,343	35.69%
e. Preschool children who maintained functioning at a level comparable to same-aged peers	943	25.06%

Outcome A	Numerator	Denominator	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
A1. Of those children who entered or exited the program below age expectations in Outcome A, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program. <i>Calculation: (c+d)/(a+b+c+d)</i>	2,491	2,820	87.61%	89.90%	88.33%	Did not meet target	No Slippage
A2. The percent of preschool children who were functioning within age expectations in Outcome A by the time they turned 6 years of age or exited the program. <i>Calculation: (d+e)/(a+b+c+d+e)</i>	2,286	3,763	60.30%	62.70%	60.75%	Did not meet target	No Slippage

Outcome B: Acquisition and use of knowledge and skills (including early language/communication)

Outcome B Progress Category	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	18	0.48%
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	305	8.11%
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	1,136	30.19%
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	1,319	35.05%
e. Preschool children who maintained functioning at a level comparable to same-aged peers	985	26.18%

program. <i>Calculation:</i> $(d+e)/(a+b+c+d+e)$							

Outcome C: Use of appropriate behaviors to meet their needs

Outcome C Progress Category	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	15	0.40%
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	246	6.54%
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	716	19.03%
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	1,503	39.94%
e. Preschool children who maintained functioning at a level comparable to same-aged peers	1,283	34.10%

Outcome C	Numerator	Denominator	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
C1. Of those children who entered or exited the program below age expectations in Outcome C, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program. <i>Calculation: $(c+d)/(a+b+c+d)$</i>	2,219	2,480	88.54%	90.36%	89.48%	Did not meet target	No Slippage
C2. The percent of preschool children who were functioning within age expectations in Outcome C by the time they turned 6 years of age or exited the program. <i>Calculation: $(d+e)/(a+b+c+d+e)$</i>	2,786	3,763	72.28%	76.03%	74.04%	Did not meet target	No Slippage

Does the State include in the numerator and denominator only children who received special education and related services for at least six months during the age span of three through five years? (yes/no)

YES

Sampling Question	Yes / No
Was sampling used?	NO

Did you use the Early Childhood Outcomes Center (ECO) Child Outcomes Summary (COS) process? (yes/no)

YES

List the instruments and procedures used to gather data for this indicator.

Instruments used to gather data for this indicator are:

At least one of the following curriculum-based assessments must be used in conjunction with information obtained through record review, interview, observation, screening, parent input, and additional tests to complete the COS:

AEPS, Carolina Curriculum for Infants and Toddlers/Preschoolers with Special Needs, Child Observation Record, Creative Curriculum (Teaching Strategies Gold), Hawaii Early Learning Profile (HELP), Transdisciplinary Play-Based Assessment (TPBA), Work Sampling System, and Desired Results Developmental Profile (DRDP).

Procedures used to gather data for this indicator are:

COS data are entered into the Outcomes Web System (OWS) application. Automated verification checks were developed within the OWS application to ensure reliable data. These verification checks ensure data entry user accurately completes the content required for each data element at the time of data entry. Targeted training was held across the state to reinforce the use of the decision tree in the rating process and additional information about comparison to typically developing students was provided. Training impact is demonstrated by the actual data showing the districts are rating children with increased inter-rater reliability and thus, have a consistent understanding of the child's functional outcomes compared to typically developing peers.

Provide additional information about this indicator (optional)

7 - Prior FFY Required Actions

None

7 - OSEP Response

7 - Required Actions

Indicator 8: Parent involvement

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

(20 U.S.C. 1416(a)(3)(A))

Data Source

State selected data source.

Measurement

Percent = [(# of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities) divided by the (total # of respondent parents of children with disabilities)] times 100.

Instructions

Sampling of parents from whom response is requested is allowed. When sampling is used, submit a description of the sampling methodology outlining how the design will yield valid and reliable estimates. (See [General Instructions](#) on page 3 for additional instructions on sampling.)

Describe the results of the calculations and compare the results to the target.

Provide the actual numbers used in the calculation.

If the State is using a separate data collection methodology for preschool children, the State must provide separate baseline data, targets, and actual target data or discuss the procedures used to combine data from school age and preschool data collection methodologies in a manner that is valid and reliable.

While a survey is not required for this indicator, a State using a survey must submit a copy of any new or revised survey with its SPP/APR.

Report the number of parents to whom the surveys were distributed and the number of respondent parents. The survey response rate is automatically calculated using the submitted data.

States must compare the response rate for the reporting year to the response rate for the previous year (e.g., in the FFY 2022 SPP/APR, compare the FFY 2022 response rate to the FFY 2021 response rate) and describe strategies that will be implemented which are expected to increase the response rate, particularly for those groups that are underrepresented.

The State must also analyze the response rate to identify potential nonresponse bias and take steps to reduce any identified bias and promote response from a broad cross-section of parents of children with disabilities.

Include in the State's analysis the extent to which the demographics of the children for whom parents responded are representative of the demographics of children receiving special education services. States must consider race/ethnicity. In addition, the State's analysis must also include at least one of the following demographics: age of the student, disability category, gender, geographic location, and/or another demographic category approved through the stakeholder input process.

States must describe the metric used to determine representativeness (e.g., +/- 3% discrepancy in the proportion of responders compared to target group).

If the analysis shows that the demographics of the children for whom parents responding are not representative of the demographics of children receiving special education services in the State, describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics. In identifying such strategies, the State should consider factors such as how the State distributed the survey to parents (e.g., by mail, by e-mail, on-line, by telephone, in-person through school personnel), and how responses were collected.

States are encouraged to work in collaboration with their OSEP-funded parent centers in collecting data.

8 - Indicator Data

Question	Yes / No
Do you use a separate data collection methodology for preschool children?	NO

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions

for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

Historical Data

Baseline Year	Baseline Data
2021	78.34%

FFY	2017	2018	2019	2020	2021
Target >=	66.40%	66.50%	66.50%	66.50%	78.34%
Data	60.32%	69.94%	72.25%	78.34%	86.41%

Targets

FFY	2022	2023	2024	2025
Target >=	78.50%	78.60%	78.70%	78.80%

FFY 2022 SPP/APR Data

Number of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities	Total number of respondent parents of children with disabilities	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
4,394	5,150	86.41%	78.50%	85.32%	Met target	No Slippage

Since the State did not report preschool children separately, discuss the procedures used to combine data from school age and preschool surveys in a manner that is valid and reliable.

All parents of students with a disability, aged 3-21, are provided the opportunity to receive and complete the parent involvement survey.

The number of parents to whom the surveys were distributed.

81,063

Percentage of respondent parents

6.35%

Response Rate

FFY	2021	2022
Response Rate	6.55%	6.35%

Describe the metric used to determine representativeness (e.g., +/- 3% discrepancy in the proportion of responders compared to target group).

The characteristics of respondents were compared to the characteristics of the population to determine if a representative group of parents responded to the survey. Kansas State Department of Education (KSDE) compared the representation of the population to the representation of the respondents using a +/- 3% criteria to identify over- or under- representativeness.

Include the State’s analyses of the extent to which the demographics of the parents responding are representative of the demographics of children receiving special education services. States must include race/ethnicity in their analysis. In addition, the State’s analysis must also include at least one of the following demographics: age of the student, disability category, gender, geographic location, and/or another demographic category approved through the stakeholder input process.

KSDE’s analysis found +/- 3% differences for Hispanic and Caucasian students with disabilities. The population consists of 63% Caucasian and 20% Hispanic; the respondents consist of 74% Caucasian and 9% Hispanic. All other ethnicities were within 3 percentage points of their population. The grade group analysis did not show a +/- 3% difference by grade group.

The demographics of the parents responding are representative of the demographics of children receiving special education services. (yes/no)

NO

If no, describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics

KSDE is engaging the Kansas Parent Training Information Center (Families Together, Inc.), the Kansas Parent Information Resource Center, districts, and the Special Education Advisory Council (SEAC) to develop statewide strategies for improving response rates from underrepresented groups. While KSDE always creates the survey to be in English and Spanish, KSDE is looking to expand the languages in which the survey will be available.

Describe strategies that will be implemented which are expected to increase the response rate year over year, particularly for those groups that are underrepresented.

Activities that KSDE will implement to improve response rate include: Extend survey timelines to increase participation; Utilize a census methodology to reach more parents; Solicit feedback from LEA Communities of Practice, Special Education Advisory Council (SEAC), & Kansas Integrated Accountability System (KIAS) Stakeholder group.

Describe the analysis of the response rate including any nonresponse bias that was identified, and the steps taken to reduce any identified bias and promote response from a broad cross section of parents of children with disabilities.

Although there are differences in the response rates by race/ethnicity, there were no significant differences in the parent involvement percentage itself by these groups. Because nonresponse bias measures the differences in opinions between respondents and non-respondents in meaningful ways, such as the positivity of responses, and there were no significant differences in the positivity of responses between groups for those that did respond, Kansas concludes that nonresponse bias is not present. Furthermore, there was no significant difference in response positivity between those that responded to the survey earlier in the collection window and those parents that responded later in the collection window.

Sampling Question	Yes / No

8 - Prior FFY Required Actions

None

8 - OSEP Response

8 - Required Actions

Indicator 9: Disproportionate Representation

Instructions and Measurement

Monitoring Priority: Disproportionality

Compliance indicator: Percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification.

(20 U.S.C. 1416(a)(3)(C))

Data Source

State's analysis, based on State's Child Count data collected under IDEA section 618, to determine if the disproportionate representation of racial and ethnic groups in special education and related services was the result of inappropriate identification.

Measurement

Percent = [(# of districts, that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups, with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification) divided by the (# of districts in the State that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups)] times 100.

Include State's definition of "disproportionate representation." Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

Based on its review of the 618 data for the reporting year, describe how the State made its annual determination as to whether the disproportionate representation it identified of racial and ethnic groups in special education and related services was the result of inappropriate identification as required by 34 CFR §§300.600(d)(3) and 300.602(a), e.g., using monitoring data; reviewing policies, practices and procedures. In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum n and/or cell size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in special education and related services is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY 2022 reporting period (i.e., after June 30, 2023).

Instructions

Provide racial/ethnic disproportionality data for all children aged 5 who are enrolled in kindergarten and 6 through 21 served under IDEA, aggregated across all disability categories. Provide the actual numbers used in the calculation.

States are not required to report on underrepresentation.

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, districts that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of districts totally excluded from the calculation as a result of this requirement because the district did not meet the minimum n and/or cell size for any racial/ethnic group.

Consider using multiple methods in calculating disproportionate representation of racial and ethnic groups to reduce the risk of overlooking potential problems. Describe the method(s) used to calculate disproportionate representation.

Provide the number of districts that met the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups identified with disproportionate representation of racial and ethnic groups in special education and related services and the number of those districts identified with disproportionate representation that is the result of inappropriate identification.

Targets must be 0%.

Provide detailed information about the timely correction of child-specific and regulatory/systemic noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training) and any enforcement actions that were taken. If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2022 SPP/APR, the data for FFY 2021), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Has the state established a minimum n and/or cell size requirement? (yes/no)

YES

If yes, the State may only include, in both the numerator and the denominator, districts that met the State-established n and/or cell size. Report the number of districts excluded from the calculation as a result of the requirement.

6

Number of districts with disproportionate representation of racial/ethnic groups in special education and related services	Number of districts with disproportionate representation of racial/ethnic groups in special education and related services that is the result of inappropriate identification	Number of districts that met the State's minimum n and/or cell size	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
0	0	280	0.00%	0%	0.00%	Met target	No Slippage

Were all races and ethnicities included in the review?

YES

Define "disproportionate representation." Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

Definition of Disproportionate Representation: A district is identified as having disproportionate representation if that district meets the following two-year criteria for racial and ethnic groups in special education and related services.

Year 1

Overrepresentation –The district must have:

At least 30 students of the target racial and ethnic group in the district; At least 10 students of the target racial and ethnic group in the category being evaluated; At least 10 students in the comparison group in special education and related services; and a final risk ratio ≥ 3.00 in the category being evaluated, except for the category of speech & language which must be ≥ 4.50 .

Year 2

Overrepresentation -The district must have:

At least 30 students of the target racial and ethnic group in the district; at least 10 students of the target racial and ethnic group in the category being evaluated; at least 10 students in the comparison group in special education and related services; and a final risk ratio ≥ 3.00 in the category being evaluated, except for the category of speech & language which must be ≥ 4.50 .

Methodology

The Kansas State Department of Education (KSDE) provides each district with a final risk ratio for overrepresentation. If a district has a final risk ratio ≥ 3.00 in the category being evaluated except for the category of speech & language which must be ≥ 4.50 , the following is implemented:

Year 1 –

KSDE team reviews the submitted information and verifies the year one data calculation. KSDE notifies the district of the data calculation and encourages the district to seek technical assistance to address the numeric discrepancy through a root cause analysis and action planning.

Year 2 –

KSDE team verifies the year two data calculation and identifies the district as having disproportionate representation accordingly. District completes and submits the required Kansas Self-Assessment Tool: review district policies, practices and procedures specific to the identified race and ethnic group to determine if the identified IDEA procedures occur and completes a root cause analysis. KSDE team reviews submitted information to determine whether the disproportionate representation is due to inappropriate identification.

Describe how the State made its annual determination as to whether the disproportionate representation it identified of racial and ethnic groups in special education and related services was the result of inappropriate identification.

KSDE notifies the district that it has disproportionate representation and provides the district with the required Kansas Self-Assessment Tool. KSDE requires the district to use this tool to review its policies, practices and procedures specific to the identified racial and ethnic group and disability category. The district completes and submits the Kansas Self-Assessment Tool data to KSDE and the KSDE team reviews submitted information to determine whether the disproportionate representation is due to inappropriate identification.

Provide additional information about this indicator (optional)

Risk Ratio: Within a USD, the risk ratio answers the question "What is the risk of children from a target racial/ethnic group found within a subcategory as compared to the risk of children from all the Comparison racial/ethnic group found within a subcategory within the USD?"

Risk Ratio Calculation Steps:

1. District Target Group Risk=(Cell Data: # in Target Race/Ethnicity Group within Category/Subcategory)/(N Data: # in Target Groups)

2. District Comparison Group Risk=(Cell Data: # in all Other Race/Ethnicities Group within Category/Subcategory)/(N Data: # in all Other Race/Ethnicities Group)

3.Risk Ratio=(District Target Group Risk)/(District Comparison Group Risk)

Alternate Risk Ratio: Within a USD, the risk ratio answers the question "What is the risk of children from a target racial/ethnic group found within a subcategory as compared to the risk of children from all the Comparison racial/ethnic group found within a subcategory within the state?"

Alternate Risk Ratio Calculation Steps:

1. District Target Group Risk=(Cell Data: # in Target Race/Ethnicity Group within Category/Subcategory)/(N Data: # in Target Groups)

2. State Comparison Group Risk=(Cell Data: # in the state for all Other Race/Ethnicities Group within Category/Subcategory)/(N Data: # in the state for all Other Race/Ethnicities Group)

3.Alternate Risk Ratio=(District Target Group Risk)/(State Comparison Group Risk)

Risk Ratio: Risk Ratio is reported for each district, disability group and race/ethnicity combination regardless of whether the Risk Ratio Cell Size and N

Size requirements are met.

Alternate Risk Ratio: Alternate Risk Ratio is reported for each district, disability group and race/ethnicity combination regardless of whether the Risk Ratio Cell Size and N Size requirements are met.

Final Risk Ratio: The Final Risk Ratio is either the Risk Ratio, the Alternate Risk Ratio or there is no Final Risk Ratio.

If the Risk Ratio Cell Size and N Size requirements are met for the Target and Comparison groups, the Risk Ratio is the Final Risk Ratio. If either the Risk Ratio Cell Size and N Size Target and Comparison group requirements are not met, the Alternate Risk Ratio is used as the Final Risk Ratio if the Alternate Risk Ratio Cell Size and N Size Target and Comparison group requirements are met.

There is no Final Risk Ratio if the Risk Ratio Cell Size or N Size Target or Comparison group requirements are not met, or if neither the Alternate Risk Ratio Cell Size or N Size Target nor Comparison group requirements are not met.

Indicator 10: Disproportionate Representation in Specific Disability Categories

Instructions and Measurement

Monitoring Priority: Disproportionality

Compliance indicator: Percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

(20 U.S.C. 1416(a)(3)(C))

Data Source

State's analysis, based on State's Child Count data collected under IDEA section 618, to determine if the disproportionate representation of racial and ethnic groups in specific disability categories was the result of inappropriate identification.

Measurement

Percent = [(# of districts, that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups, with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification) divided by the (# of districts in the State that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups)] times 100.

Include State's definition of "disproportionate representation." Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

Based on its review of the section 618 data for the reporting year, describe how the State made its annual determination as to whether the disproportionate representation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification as required by 34 CFR §§300.600(d)(3) and 300.602(a), (e.g., using monitoring data; reviewing policies, practices and procedures). In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum n and/or cell size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in specific disability categories is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY 2022 reporting period (i.e., after June 30, 2023).

Instructions

Provide racial/ethnic disproportionality data for all children aged 5 who are enrolled in kindergarten and aged 6 through 21 served under IDEA. Provide these data at a minimum for children in the following six disability categories: intellectual disability, specific learning disabilities, emotional disturbance, speech or language impairments, other health impairments, and autism. If a State has identified disproportionate representation of racial and ethnic groups in specific disability categories other than these six disability categories, the State must include these data and report on whether the State determined that the disproportionate representation of racial and ethnic groups in specific disability categories was the result of inappropriate identification. Provide the actual numbers used in the calculation.

States are not required to report on underrepresentation.

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, districts that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of districts totally excluded from the calculation as a result of this requirement because the district did not meet the minimum n and/or cell size for any racial/ethnic group.

Consider using multiple methods in calculating disproportionate representation of racial and ethnic groups to reduce the risk of overlooking potential problems. Describe the method(s) used to calculate disproportionate representation.

Provide the number of districts that met the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups identified with disproportionate representation of racial and ethnic groups in specific disability categories and the number of those districts identified with disproportionate representation that is the result of inappropriate identification.

Targets must be 0%.

Provide detailed information about the timely correction of child-specific and regulatory/systemic noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2022 SPP/APR, the data for FFY 2021), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

10 - Indicator Data

FFY 2022 SPP/APR Data

Has the state established a minimum n and/or cell size requirement? (yes/no)

YES

If yes, the State may only include, in both the numerator and the denominator, districts that met the State-established n and/or cell size. Report the number of districts excluded from the calculation as a result of the requirement.

29

Number of districts with disproportionate representation of racial/ethnic groups in specific disability categories	Number of districts with disproportionate representation of racial/ethnic groups in specific disability categories that is the result of inappropriate identification	Number of districts that met the State's minimum n and/or cell size	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
7	2	257	1.07%	0%	0.78%	Did not meet target	No Slippage

Were all races and ethnicities included in the review?

YES

Define “disproportionate representation.” Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

Definition of Disproportionate Representation: A district is identified as having disproportionate representation if that district meets the following two-year criteria for racial and ethnic groups in special education and related services.

Year 1 –

Overrepresentation –The district must have:

At least 30 students of the target racial and ethnic group in the district; At least 10 students of the target racial and ethnic group in the category being evaluated; At least 10 students in the comparison group in special education and related services; and a final risk ratio ≥ 3.00 in the category being evaluated, except for the category of speech & language which must be ≥ 4.50 .

Year 2 –

Overrepresentation -The district must have:

At least 30 students of the target racial and ethnic group in the district; at least 10 students of the target racial and ethnic group in the category being evaluated; at least 10 students in the comparison group in special education and related services; and a final risk ratio ≥ 3.00 in the category being evaluated, except for the category of speech & language which must be ≥ 4.50 .

Methodology

The Kansas State Department of Education (KSDE) provides each district with a final risk ratio for overrepresentation. If a district has a final risk ratio ≥ 3.00 in the category being evaluated except for the category of speech & language which must be ≥ 4.50 , the following is implemented:

Year 1 –

KSDE team reviews the submitted information and verifies the year one data calculation. KSDE notifies the district of the data calculation and encourages the district to seek technical assistance to address the numeric discrepancy through a root cause analysis and action planning.

Year 2 –

KSDE team verifies the year two data calculation and identifies the district as having disproportionate representation accordingly. District completes and submits the required Kansas Self-Assessment Tool: Review district policies, practices and procedures specific to the identified race and ethnic group to determine if the identified IDEA procedures occur and completes a root cause analysis. KSDE team reviews submitted information to determine whether the disproportionate representation is due to inappropriate identification.

Describe how the State made its annual determination as to whether the disproportionate overrepresentation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification.

KSDE notifies the district that it has disproportionate representation and provides the district with the required Kansas Self-Assessment Tool. This tool requires the district to review its policies, practices and procedures specific to the identified racial and ethnic group and disability category. The district completes and submits the Kansas Self-Assessment Tool data to KSDE and the KSDE team reviews submitted information to determine whether the disproportionate representation is due to inappropriate identification.

Provide additional information about this indicator (optional)

Risk Ratio: Within a USD, the risk ratio answers the question “What is the risk of children from a target racial/ethnic group found within a subcategory as compared to the risk of children from all the Comparison racial/ethnic group found within a subcategory within the USD?”

Risk Ratio Calculation Steps:

1. District Target Group Risk=(Cell Data: # in Target Race/Ethnicity Group within Category/Subcategory)/(N Data: # in Target Groups)

2. District Comparison Group Risk=(Cell Data: # in all Other Race/Ethnicities Group within Category/Subcategory)/(N Data: # in all Other Race/Ethnicities Group)

3.Risk Ratio=(District Target Group Risk)/(District Comparison Group Risk)

Alternate Risk Ratio: Within a USD, the risk ratio answers the question “What is the risk of children from a target racial/ethnic group found within a subcategory as compared to the risk of children from all the Comparison racial/ethnic group found within a subcategory within the state?”

Alternate Risk Ratio Calculation Steps:

1. District Target Group Risk=(Cell Data: # in Target Race/Ethnicity Group within Category/Subcategory)/(N Data: # in Target Groups)
2. State Comparison Group Risk=(Cell Data: # in the state for all Other Race/Ethnicities Group within Category/Subcategory)/(N Data: # in the state for all Other Race/Ethnicities Group)
3. Alternate Risk Ratio=(District Target Group Risk)/(State Comparison Group Risk)

Risk Ratio: Risk Ratio is reported for each district, disability group and race/ethnicity combination regardless of whether the Risk Ratio Cell Size and N Size requirements are met.

Alternate Risk Ratio: Alternate Risk Ratio is reported for each district, disability group and race/ethnicity combination regardless of whether the Risk Ratio Cell Size and N Size requirements are met.

Final Risk Ratio: The Final Risk Ratio is either the Risk Ratio, the Alternate Risk Ratio or there is no Final Risk Ratio.

If the Risk Ratio Cell Size and N Size requirements are met for the Target and Comparison groups, the Risk Ratio is the Final Risk Ratio.

If either the Risk Ratio Cell Size and N Size Target and Comparison group requirements are not met, the Alternate Risk Ratio is used as the Final Risk Ratio if the Alternate Risk Ratio Cell Size and N Size Target and Comparison group requirements are met.

There is no Final Risk Ratio if the Risk Ratio Cell Size or N Size Target or Comparison group requirements are not met, or if neither the Alternate Risk Ratio Cell Size or N Size Target nor Comparison group requirements are not met.

Correction of Findings of Noncompliance Identified in FFY 2021

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
3	2	0	1

FFY 2021 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

KSDE required the three districts with FFY 2021 findings of noncompliance to revise their policies, practices, and procedures, and then KSDE verified correction. After KSDE approval of all three districts' revised policies, practices, and procedures, KSDE reviewed a supplemental updated student data set (i.e. a review of student documentation focusing on evaluations related to the disproportionate representation and inappropriate identification finding) for one district with sufficient updated data to demonstrate systemic compliance. Through this review of updated student data, KSDE did not verify 100% compliance in the district's implementation of regulatory requirements and KSDE has assigned this district additional corrective action. KSDE will also continue to conduct additional reviews of updated data as part of verification activities to ensure compliance with and correct implementation of regulatory requirements.

The remaining two districts to which KSDE issued FFY 2021 findings of noncompliance are very small and did not have sufficient updated data to demonstrate systemic compliance in implementing the regulatory requirements. Accordingly, KSDE used other evidence for change, which is permitted per OSEP QA 23-01. This other evidence of change for the two small districts included staff training materials that the districts submitted for KSDE approval and documentation that the district conducted trainings on its revised policies and procedures. KSDE reviewed and approved the training materials the districts provided and verified the districts conducted the trainings based on additional documentation the districts provided. These two small districts demonstrated 100% compliance in the implementation of regulatory requirements, based on available evidence of change.

Describe how the State verified that each individual case of noncompliance was corrected

KSDE required each district to correct all individual cases of noncompliance and then KSDE reviewed these student files to ensure accurate correction of noncompliance. KSDE documents this review of correction of individual noncompliance. With one of the three districts, KSDE found continued noncompliance after giving the district a period to correct. KSDE continues to require this district to correct this continued noncompliance, as articulated in the next response.

KSDE verified that each of the remaining two districts 100% corrected each individual case of noncompliance, consistent with OSEP QA 23-01, as KSDE verified this correction of noncompliance after OSEP released OSEP QA 23-01.

FFY 2021 Findings of Noncompliance Not Yet Verified as Corrected

Actions taken if noncompliance not corrected

The one district that KSDE has not yet verified as correcting FFY 2021 noncompliance continues to work with the KSDE General Supervision, Timely and Accurate Data team to review student records, conduct a new root cause analysis and a new policy, practice, and procedure assessment, and draft a district corrective action plan to ensure correction of the district's implementation of the regulatory requirements. KSDE issued additional corrective action to the district requiring the district to correct continued noncompliance with the individual case of noncompliance. KSDE will verify compliance or continued noncompliance through subsequent record reviews within an expedited timeframe .

Correction of Findings of Noncompliance Identified Prior to FFY 2021

Year Findings of Noncompliance Were Identified	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2021 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

Year Findings of Noncompliance Were Identified	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2021 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

10 - Prior FFY Required Actions

Because the State reported less than 100% compliance for FFY 2021 (greater than 0% actual target data for this indicator), the State must report on the status of correction of noncompliance identified in FFY 2021 for this indicator. The State must demonstrate, in the FFY 2022 SPP/APR, that the three districts identified in FFY 2021 with disproportionate representation of racial and ethnic groups in specific disability categories that was the result of inappropriate identification are in compliance with the requirements in 34 C.F.R. §§ 300.111, 300.201, and 300.301 through 300.311, including that the State verified that each district with noncompliance: (1) is correctly implementing the specific regulatory requirement(s) (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memo 09-02. In the FFY 2022 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2021, although its FFY 2021 data reflect less than 100% compliance (greater than 0% actual target data for this indicator), provide an explanation of why the State did not identify any findings of noncompliance in FFY 2021.

Response to actions required in FFY 2021 SPP/APR

KSDE has verified that each district with noncompliance identified in FFY 2021 is correctly implementing the regulatory requirements through the correction of noncompliance process of conducting a root cause analysis, correction of each individual case of identified noncompliance and subsequent review of updated student file data. Data are collected through the State data system and has achieved 100% compliance as per OSEP QA 23-01.

10 - OSEP Response

10 - Required Actions

Indicator 11: Child Find

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Child Find

Compliance indicator: Percent of children who were evaluated within 60 days of receiving parental consent for initial evaluation or, if the State establishes a timeframe within which the evaluation must be conducted, within that timeframe.

(20 U.S.C. 1416(a)(3)(B))

Data Source

Data to be taken from State monitoring or State data system and must be based on actual, not an average, number of days. Indicate if the State has established a timeline and, if so, what is the State's timeline for initial evaluations.

Measurement

a. # of children for whom parental consent to evaluate was received.

b. # of children whose evaluations were completed within 60 days (or State-established timeline).

Account for children included in (a), but not included in (b). Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

Percent = [(b) divided by (a)] times 100.

Instructions

If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.

Describe the results of the calculations and compare the results to the target. Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data. Provide the actual numbers used in the calculation.

Note that under 34 CFR §300.301(d), the timeframe set for initial evaluation does not apply to a public agency if: (1) the parent of a child repeatedly fails or refuses to produce the child for the evaluation; or (2) a child enrolls in a school of another public agency after the timeframe for initial evaluations has begun, and prior to a determination by the child's previous public agency as to whether the child is a child with a disability. States should not report these exceptions in either the numerator (b) or denominator (a). If the State-established timeframe provides for exceptions through State regulation or policy, describe cases falling within those exceptions and include in b.

Targets must be 100%.

Provide detailed information about the timely correction of child-specific and regulatory/systemic noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2022 SPP/APR, the data for FFY 2021), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

11 - Indicator Data

Historical Data

Baseline Year	Baseline Data
2005	98.40%

FFY	2017	2018	2019	2020	2021
Target	100%	100%	100%	100%	100%
Data	99.66%	99.78%	99.55%	99.11%	99.63%

Targets

FFY	2022	2023	2024	2025
Target	100%	100%	100%	100%

FFY 2022 SPP/APR Data

(a) Number of children for whom parental consent to evaluate was received	(b) Number of children whose evaluations were completed within 60 days (or State-established timeline)	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
2,655	2,642	99.63%	100%	99.51%	Did not meet target	No Slippage

Number of children included in (a) but not included in (b)

13

Account for children included in (a) but not included in (b). Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

Range of days beyond the timeline 5–150 days. Reasons for delay: Miscalculation of days and staff error when applying the state exception within the State’s timeline for initial evaluations.

Indicate the evaluation timeline used:

The State established a timeline within which the evaluation must be conducted

What is the State’s timeline for initial evaluations? If the State-established timeframe provides for exceptions through State regulation or policy, describe cases falling within those exceptions and include in (b).

The State’s timeline for initial evaluations is 60 school days. The State-established timeframe provides for one exception in addition to the two federal exceptions, if the parent consents in writing to an extension of time. (K.A.R. 91-40-8(f)).

What is the source of the data provided for this indicator?

State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State’s monitoring, describe the procedures used to collect these data.

The Kansas State Department of Education (KSDE) collect data for all Initial Evaluations in an authenticated database system. KSDE required the districts to report the actual number of days for each Initial Evaluation in the data verification. If the Initial Evaluation extended beyond the state established timeline, KSDE required the district to report a reason the Initial Evaluation went beyond the timeline.

Provide additional information about this indicator (optional)

Correction of Findings of Noncompliance Identified in FFY 2021

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
10	10		0

FFY 2021 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

KSDE has verified that each district with noncompliance identified in FFY 2021 is correctly implementing the regulatory requirements through the review of updated student file data collected through the State data system and has achieved 100% compliance on updated data consistent with OSEP QA 23-01.

Describe how the State verified that each individual case of noncompliance was corrected

KSDE verified that all FFY 2021 findings of noncompliance were corrected within one year of notification of noncompliance. KSDE has verified through a review of data submitted in an authenticated database system that each district with a finding of noncompliance reflected in the FFY 2021 data reported for this indicator has corrected each individual case of noncompliance unless the child is no longer within the jurisdiction of the district or LEA consistent with OSEP QA 23-01.

Correction of Findings of Noncompliance Identified Prior to FFY 2021

Year Findings of Noncompliance Were Identified	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2021 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

11 - Prior FFY Required Actions

Because the State reported less than 100% compliance for FFY 2021, the State must report on the status of correction of noncompliance identified in FFY 2021 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2022 SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2021 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2022 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2021, although its FFY 2021 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2021.

Response to actions required in FFY 2021 SPP/APR

KSDE has verified that each district with noncompliance identified in FFY 2021 is correctly implementing the regulatory requirements through the correction of noncompliance process of conducting a root cause analysis, correction of each individual case of identified noncompliance and subsequent review of updated student file data. Data are collected through the State data system and each district has achieved 100% compliance as per OSEP QA 23-01.

11 - OSEP Response

11 - Required Actions

Indicator 12: Early Childhood Transition

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Compliance indicator: Percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays.

(20 U.S.C. 1416(a)(3)(B))

Data Source

Data to be taken from State monitoring or State data system.

Measurement

- a. # of children who have been served in Part C and referred to Part B for Part B eligibility determination.
- b. # of those referred determined to be NOT eligible and whose eligibility was determined prior to their third birthdays.
- c. # of those found eligible who have an IEP developed and implemented by their third birthdays.
- d. # of children for whom parent refusal to provide consent caused delays in evaluation or initial services or to whom exceptions under 34 CFR §300.301(d) applied.
- e. # of children determined to be eligible for early intervention services under Part C less than 90 days before their third birthdays.
- f. # of children whose parents chose to continue early intervention services beyond the child's third birthday through a State's policy under 34 CFR §303.211 or a similar State option.

Account for children included in (a), but not included in b, c, d, e, or f. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed, and the reasons for the delays.

Percent = [(c) divided by (a - b - d - e - f)] times 100.

Instructions

If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.

Describe the results of the calculations and compare the results to the target. Describe the method used to collect these data and if data are from the State's monitoring, describe the procedures used to collect these data. Provide the actual numbers used in the calculation.

Targets must be 100%.

Category f is to be used only by States that have an approved policy for providing parents the option of continuing early intervention services beyond the child's third birthday under 34 CFR §303.211 or a similar State option.

Provide detailed information about the timely correction of child-specific and regulatory/systemic noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2022 SPP/APR, the data for FFY 2021), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

12 - Indicator Data

Not Applicable

Select yes if this indicator is not applicable.

NO

Historical Data

a. Number of children who have been served in Part C and referred to Part B for Part B eligibility determination.	3,867
b. Number of those referred determined to be NOT eligible and whose eligibility was determined prior to third birthday.	495

c. Number of those found eligible who have an IEP developed and implemented by their third birthdays.	2,443
d. Number for whom parent refusals to provide consent caused delays in evaluation or initial services or to whom exceptions under 34 CFR §300.301(d) applied.	906
e. Number of children who were referred to Part C less than 90 days before their third birthdays.	19
f. Number of children whose parents chose to continue early intervention services beyond the child's third birthday through a State's policy under 34 CFR §303.211 or a similar State option.	0

Measure	Numerator (c)	Denominator (a-b-d-e-f)	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
Percent of children referred by Part C prior to age 3 who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays.	2,443	2,447	99.86%	100%	99.84%	Did not meet target	No Slippage

Number of children who served in Part C and referred to Part B for eligibility determination that are not included in b, c, d, e, or f

4

Account for children included in (a), but not included in b, c, d, e, or f. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed, and the reasons for the delays.

Range of days beyond the third birthday: 2 - 230

Reasons for Delay:

Staff Illness (1)

Staff Error (1)

Parent Declined to Hold Meeting on 3rd Birthday (2)

Attach PDF table (optional)

What is the source of the data provided for this indicator?

State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

The Kansas State Department of Education (KSDE) collects transition data from Part C to Part B in an authenticated database system. The districts were required to verify that the IEP was in place by the child's third birthday. If the IEP extended past the third birthday the district was required to state reasons for the delay. KSDE reviews the reasons and determines if the criteria for the exception category is met or if the action was completed even though late.

Provide additional information about this indicator (optional)

Correction of Findings of Noncompliance Identified in FFY 2021

4	4	0	0

FFY 2021 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

All findings of noncompliance for FFY 2021 were corrected and correction verified within one year of notification of noncompliance. The Kansas State Department of Education (KSDE) verified, based on a review of updated student file data submitted on children transitioning from Part C to Part B data that each district with a finding of noncompliance reflected in the FFY 2021 data reported for this indicator is correctly implementing the regulatory requirement and has achieved 100% compliance on updated data.

Describe how the State verified that each individual case of noncompliance was corrected

All findings of noncompliance for FFY 2021 were corrected and correction verified within one year of notification of noncompliance. The Kansas State Department of Education (KSDE) has verified through a review of data submitted in an authenticated database system that each district with a finding of noncompliance reflected in the FFY 2021 data reported for this indicator has corrected each individual case of noncompliance unless the child is no longer within the jurisdiction of the district or LEA.

Correction of Findings of Noncompliance Identified Prior to FFY 2021

Year Findings of Noncompliance Were Identified	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2021 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

12 - Prior FFY Required Actions

Because the State reported less than 100% compliance for FFY 2021, the State must report on the status of correction of noncompliance identified in FFY 2021 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2022 SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2021 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2022 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2021, although its FFY 2021 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2021.

Response to actions required in FFY 2021 SPP/APR

KSDE has verified that each district with noncompliance identified in FFY 2021 is correctly implementing the regulatory requirements through the correction of noncompliance process of conducting a root cause analysis, correction of each individual case of identified noncompliance and subsequent review of updated student file data. Data are collected through the State data system and each district has achieved 100% compliance as per OSEP QA 23-01.

12 - OSEP Response

12 - Required Actions

Indicator 13: Secondary Transition

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Compliance indicator: Percent of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency that is likely to be responsible for providing or paying for transition services, including, if appropriate, pre-employment transition services, was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority.

(20 U.S.C. 1416(a)(3)(B))

Data Source

Data to be taken from State monitoring or State data system.

Measurement

Percent = [(# of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency that is likely to be responsible for providing or paying for transition services, including, if appropriate, pre-employment transition services, was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority) divided by the (# of youth with an IEP age 16 and above)] times 100.

If a State's policies and procedures provide that public agencies must meet these requirements at an age younger than 16, the State may, but is not required to, choose to include youth beginning at that younger age in its data for this indicator. If a State chooses to do this, it must state this clearly in its SPP/APR and ensure that its baseline data are based on youth beginning at that younger age.

Instructions

If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.

Describe the results of the calculations and compare the results to the target. Describe the method used to collect these data and if data are from the State's monitoring, describe the procedures used to collect these data. Provide the actual numbers used in the calculation.

Targets must be 100%.

Provide detailed information about the timely correction of child-specific and regulatory/systemic noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2022 SPP/APR, the data for FFY 2021), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

What is the source of the data provided for this indicator?

State monitoring

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

The Kansas State Department of Education (KSDE) uses the National Technical Assistance Center on Transition: Collaborative (NTACT:C) Checklist to monitor data from all LEAs each year through collect data through an authenticated database system.

Question	Yes / No
Do the State's policies and procedures provide that public agencies must meet these requirements at an age younger than 16?	YES
If yes, did the State choose to include youth at an age younger than 16 in its data for this indicator and ensure that its baseline data are based on youth beginning at that younger age?	NO

If no, please explain

States may, but are not required to, include youth beginning at that younger age in its data for this indicator. Kansas is not including data from youth younger than 16.

Provide additional information about this indicator (optional)

Correction of Findings of Noncompliance Identified in FFY 2021

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected

FFY 2021 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

KSDE has verified that each district with noncompliance identified in FFY 2021 is correctly implementing the regulatory requirements through the correction of noncompliance process of conducting a root cause analysis, correction of each individual case of identified noncompliance and subsequent review of updated student file data. Data are collected through the State data system and has achieved 100% compliance as per OSEP QA 23-01.

Describe how the State verified that each individual case of noncompliance was corrected

All findings of noncompliance for FFY 2021 were corrected and correction verified within one year of notification of noncompliance. The KSDE has verified through a review of data submitted in an authenticated web application that each district with a finding of noncompliance reflected in the FFY 2021 data reported for this indicator has corrected each individual case of noncompliance unless the child is no longer within the jurisdiction of the district or LEA consistent with the OSEP QA 23-01.

Correction of Findings of Noncompliance Identified Prior to FFY 2021

Year Findings of Noncompliance Were Identified	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2021 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

13 - Prior FFY Required Actions

Because the State reported less than 100% compliance for FFY 2021, the State must report on the status of correction of noncompliance identified in FFY 2021 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2022 SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2021 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2022 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2021, although its FFY 2021 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2021.

Response to actions required in FFY 2021 SPP/APR

KSDE has verified that each district with noncompliance identified in FFY 2021 is correctly implementing the regulatory requirements through the correction of noncompliance process of conducting a root cause analysis, correction of each individual case of identified noncompliance and subsequent review of updated student file data. Data are collected through the State data system and each district has achieved 100% compliance as per OSEP QA 23-01.

13 - Required Actions

Indicator 14: Post-School Outcomes

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Results indicator: Percent of youth who are no longer in secondary school, had IEPs in effect at the time they left school, and were:

- A. Enrolled in higher education within one year of leaving high school.
- B. Enrolled in higher education or competitively employed within one year of leaving high school.
- C. Enrolled in higher education or in some other postsecondary education or training program; or competitively employed or in some other employment within one year of leaving high school.

(20 U.S.C. 1416(a)(3)(B))

Data Source

State selected data source.

Measurement

- A. Percent enrolled in higher education = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.
- B. Percent enrolled in higher education or competitively employed within one year of leaving high school = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education or competitively employed within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.
- C. Percent enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.

Instructions

Sampling of youth who had IEPs and are no longer in secondary school is allowed. When sampling is used, submit a description of the sampling methodology outlining how the design will yield valid and reliable estimates of the target population. (See [General Instructions](#) on page 3 for additional instructions on sampling.)

Collect data by September 2023 on students who left school during 2021-2022, timing the data collection so that at least one year has passed since the students left school. Include students who dropped out during 2021-2022 or who were expected to return but did not return for the current school year. This includes all youth who had an IEP in effect at the time they left school, including those who graduated with a regular diploma or some other credential, dropped out, or aged out.

I. Definitions

Enrolled in higher education as used in measures A, B, and C means youth have been enrolled on a full- or part-time basis in a community college (two-year program) or college/university (four or more year program) for at least one complete term, at any time in the year since leaving high school.

Competitive employment as used in measures B and C: States have two options to report data under “competitive employment”:

Option 1: Use the same definition as used to report in the FFY 2015 SPP/APR, i.e., competitive employment means that youth have worked for pay at or above the minimum wage in a setting with others who are nondisabled for a period of 20 hours a week for at least 90 days at any time in the year since leaving high school. This includes military employment.

Option 2: States report in alignment with the term “competitive integrated employment” and its definition, in section 7(5) of the Rehabilitation Act of 1973, as amended by Workforce Innovation and Opportunity Act (WIOA). For the purpose of defining the rate of compensation for students working on a “part-time basis” under this category, OSEP maintains the standard of 20 hours a week for at least 90 days at any time in the year since leaving high school. This definition applies to military employment.

Enrolled in other postsecondary education or training as used in measure C, means youth have been enrolled on a full- or part-time basis for at least 1 complete term at any time in the year since leaving high school in an education or training program (e.g., Job Corps, adult education, workforce development program, vocational technical school which is less than a two-year program).

Some other employment as used in measure C means youth have worked for pay or been self-employed for a period of at least 90 days at any time in the year since leaving high school. This includes working in a family business (e.g., farm, store, fishing, ranching, catering services).

II. Data Reporting

States must describe the metric used to determine representativeness (e.g., +/- 3% discrepancy in the proportion of responders compared to target group).

Provide the total number of targeted youth in the sample or census.

Provide the actual numbers for each of the following mutually exclusive categories. The actual number of “leavers” who are:

1. Enrolled in higher education within one year of leaving high school;
2. Competitively employed within one year of leaving high school (but not enrolled in higher education);
3. Enrolled in some other postsecondary education or training program within one year of leaving high school (but not enrolled in higher education or competitively employed);
4. In some other employment within one year of leaving high school (but not enrolled in higher education, some other postsecondary education or training program, or competitively employed).

“Leavers” should only be counted in one of the above categories, and the categories are organized hierarchically. So, for example, “leavers” who are enrolled in full- or part-time higher education within one year of leaving high school should only be reported in category 1, even if they also

happen to be employed. Likewise, “leavers” who are not enrolled in either part- or full-time higher education, but who are competitively employed, should only be reported under category 2, even if they happen to be enrolled in some other postsecondary education or training program.

States must compare the response rate for the reporting year to the response rate for the previous year (e.g., in the FFY 2022 SPP/APR, compare the FFY 2022 response rate to the FFY 2021 response rate), and describe strategies that will be implemented which are expected to increase the response rate year over year, particularly for those groups that are underrepresented.

The State must also analyze the response rate to identify potential nonresponse bias and take steps to reduce any identified bias and promote response from a broad cross section of youth who are no longer in secondary school and had IEPs in effect at the time they left school.

III. Reporting on the Measures/Indicators

Targets must be established for measures A, B, and C.

Measure A: For purposes of reporting on the measures/indicators, please note that any youth enrolled in an institution of higher education (that meets any definition of this term in the Higher Education Act (HEA)) within one year of leaving high school *must* be reported under measure A. This could include youth who also happen to be competitively employed, or in some other training program; however, the key outcome we are interested in here is enrollment in higher education.

Measure B: All youth reported under measure A should also be reported under measure B, in addition to all youth that obtain competitive employment within one year of leaving high school.

Measure C: All youth reported under measures A and B should also be reported under measure C, in addition to youth that are enrolled in some other postsecondary education or training program, or in some other employment.

Include the State’s analysis of the extent to which the response data are representative of the demographics of youth who are no longer in secondary school and had IEPs in effect at the time they left school. States must include race/ethnicity in their analysis. In addition, the State’s analysis must include at least one of the following demographics: disability category, gender, geographic location, and/or another demographic category approved through the stakeholder input process.

If the analysis shows that the response data are not representative of the demographics of youth who are no longer in secondary school and had IEPs in effect at the time they left school, describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics. In identifying such strategies, the State should consider factors such as how the State collected the data.

14 - Indicator Data

FFY 2021 Targets

FFY	2022	2023	2024	2025
Target A >=	45.00%	48.65%	48.65%	48.65%
Target B >=	69.60%	72.65%	72.65%	72.65%
Target C >=	81.09%	83.30%	83.30%	83.30%

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas’s state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state

associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

FFY 2022 SPP/APR Data

Total number of targeted youth in the sample or census	3,906
Number of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school	1,048
Response Rate	26.83%
1. Number of respondent youth who enrolled in higher education within one year of leaving high school	238
2. Number of respondent youth who competitively employed within one year of leaving high school	351
3. Number of respondent youth enrolled in some other postsecondary education or training program within one year of leaving high school (but not enrolled in higher education or competitively employed)	16
4. Number of respondent youth who are in some other employment within one year of leaving high school (but not enrolled in higher education, some other postsecondary education or training program, or competitively employed).	105

Measure	Number of respondent youth	Number of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
A. Enrolled in higher education (1)	238	1,048	26.84%	45.00%	22.71%	Did not meet target	Slippage
B. Enrolled in higher education or competitively employed within one year of leaving high school (1 +2)	589	1,048	55.16%	69.60%	56.20%	Did not meet target	No Slippage
C. Enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment (1+2+3+4)	710	1,048	69.62%	81.09%	67.75%	Did not meet target	Slippage

Part	Reasons for slippage, if applicable
A	An examination of state-level data suggests that slippage may be attributed to an increase of nearly 5% in response rate and an increase of more than 252% in the targeted universe due to a change in methodology from a sample to a census. Additionally, based on National Clearinghouse data for all students in Kansas, all cohorts are demonstrating declining participation rates in postsecondary education.
C	An examination of state-level data suggests that slippage may be attributed to an increase of nearly 5% in response rate and an increase of more than 252% in the targeted universe due to a change in methodology from a sample to a census. Additionally, based on National Clearinghouse data for all students in Kansas, all cohorts are demonstrating declining participation rates in postsecondary education.

Please select the reporting option your State is using:

Option 2: Report in alignment with the term “competitive integrated employment” and its definition, in section 7(5) of the Rehabilitation Act, as amended by Workforce Innovation and Opportunity Act (WIOA), and 34 CFR §361.5(c)(9). For the purpose of defining the rate of compensation for students working on a “part-time basis” under this category, OSEP maintains the standard of 20 hours a week for at least 90 days at any time in the year since leaving high school. This definition applies to military employment.

Response Rate

FFY	2021	2022
Response Rate	21.91%	26.83%

Describe the metric used to determine representativeness (e.g., +/- 3% discrepancy in the proportion of responders compared to target group).

+/-3% discrepancy in the proportion of responders compared to target group

Include the State’s analyses of the extent to which the response data are representative of the demographics of youth who are no longer in secondary school and had IEPs in effect at the time they left school. States must include race/ethnicity in its analysis. In addition, the State’s analysis must include at least one of the following demographics: disability category, gender, geographic location, and/or another demographic category approved through the stakeholder input process.

The State compared the representation by race/ethnicity, primary disability, and exit type in the population to the representation in the respondents using a +/- 3% criteria to identify over-or under-representativeness.

Using this methodology, no differences were found by primary disability. Differences were found by race/ethnicity and exit type. The SWD population consists of 60% of Whites and 11% of African Americans; whereas respondents consist of 65% of Whites, 8% of African Americans. In terms of exit type, the SWD exiter population consists of 14% of drop outs and 85% of graduates; whereas the respondents consist of, 8% of drop outs and 90% of graduates. All other ethnicities and exit types were within 3% of their population.

Although there were significant differences in response rate by race/ethnicity, there were no significant differences by race/ethnicity in the Measurement scores which suggests results are representative by race/ethnicity. Differences were found in Measurement C scores between exiters who dropped out and exiters who graduated. Thus, while the majority of the respondents were within 3% of their population, and exiters from a wide range of districts from across the state responded to the survey, the state concludes that the overall results may not be representative of demographics of the youth who are no longer in secondary school and had IEPs in effect at the time they left school.

The response data is representative of the demographics of youth who are no longer in school and had IEPs in effect at the time they left school. (yes/no)

NO

If no, describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics.

Technical assistance will target districts with students in the dropped out demographic group to increase response rates from this group. In FFY 2022, 20% of LEA’s opted in to call their exiters, and 80% of LEA’s did not. The difference in response rates between the LEA’s that called exiters versus those that utilized the call center was significantly higher.

Describe strategies that will be implemented which are expected to increase the response rate year over year, particularly for those groups that are underrepresented.

KSDE will continue efforts expected to increase the response rate of all exiters, in particular those of students that dropped out. The strategies KSDE will use to increase response rates are 1. Continue to conduct training events across the state that includes an objective of how opting in to call exiters significantly improves a district’s response rate. 2. Continue to email a link to the survey to non-respondents; 3. Send out a text blast to non-respondents; and 4. Work with district personnel to verify contact information and to contact non-responders in targeted sub-groups.

Describe the analysis of the response rate including any nonresponse bias that was identified, and the steps taken to reduce any identified bias and promote response from a broad cross section of youth who are no longer in secondary school and had IEPs in effect at the time they left school.

First, KSDE examined the overall response rate. The higher the response rate, the less likely nonresponse bias will occur. Kansas’s response rate was 26.83%, which is higher than the response rate of 21.91% last year.

Second, the representativeness of the responses was examined. The analysis verified that received responses were representative of student primary disability and came from representative geographic student locations across a variety of small, medium, and large school districts which decreases the likelihood of nonresponse bias.

Third, differences in response rates were found by race/ethnicity and exit type, and as such, responses of exiters who responded early in the process versus those who responded later in the process were evaluated based on a hypothesis that those who do not immediately respond and need multiple prompts to respond may be different than those who respond immediately. The analysis results showed no statistically significant differences between

exiters who responded earlier and exiters who responded later. Therefore, KSDE found no significant nonresponse bias, and the data is representative of a broad cross section of Kansas youth who are no longer in secondary school and had IEPS in effect at the time they left school.

Sampling Question	Yes / No

Indicator 15: Resolution Sessions

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / General Supervision

Results Indicator: Percent of hearing requests that went to resolution sessions that were resolved through resolution session settlement agreements. (20 U.S.C. 1416(a)(3)(B))

Data Source

Data collected under section 618 of the IDEA (IDEA Part B Dispute Resolution Survey in the ED Facts Metadata and Process System (EMAPS)).

Measurement

Percent = (3.1(a) divided by 3.1) times 100.

Instructions

Sampling is not allowed.

Describe the results of the calculations and compare the results to the target.

States are not required to establish baseline or targets if the number of resolution sessions is less than 10. In a reporting period when the number of resolution sessions reaches 10 or greater, develop baseline and targets and report on them in the corresponding SPP/APR.

States may express their targets in a range (e.g., 75-85%).

If the data reported in this indicator are not the same as the State's data under IDEA section 618, explain.

States are not required to report data at the LEA level.

15 - Indicator Data

Targets: Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

Indicator 17: State Systemic Improvement Plan

Instructions and Measurement

Monitoring Priority: General Supervision

The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

Measurement

The State's SPP/APR includes an SSIP that is a comprehensive, ambitious, yet achievable multi-year plan for improving results for children with disabilities. The SSIP includes each of the components described below.

Instructions

Baseline Data: The State must provide baseline data that must be expressed as a percentage and which is aligned with the State-identified Measurable Result(s) (SiMR) for Children with Disabilities.

Targets: In its FFY 2020 SPP/APR, due February 1, 2022, the State must provide measurable and rigorous targets (expressed as percentages) for each of the six years from FFY 2020 through FFY 2025. The State's FFY 2025 target must demonstrate improvement over the State's baseline data.

Updated Data: In its FFYs 2020 through FFY 2025 SPPs/APRs, due February 2022 through February 2027, the State must provide updated data for that specific FFY (expressed as percentages) and that data must be aligned with the State-identified Measurable Result(s) Children with Disabilities. In its FFYs 2020 through FFY 2025 SPPs/APRs, the State must report on whether it met its target.

Overview of the Three Phases of the SSIP

It is of the utmost importance to improve results for children with disabilities by improving educational services, including special education and related services. Stakeholders, including parents of children with disabilities, local educational agencies, the State Advisory Panel, and others, are critical participants in improving results for children with disabilities and should be included in developing, implementing, evaluating, and revising the SSIP and included in establishing the State's targets under Indicator 17. The SSIP should include information about stakeholder involvement in all three phases.

Phase I: Analysis:

- Data Analysis;
- Analysis of State Infrastructure to Support Improvement and Build Capacity;
- State-identified Measurable Result(s) for Children with Disabilities;
- Selection of Coherent Improvement Strategies; and
- Theory of Action.

Phase II: Plan (which, in addition to the Phase I content (including any updates)) outlined above):

- Infrastructure Development;
- Support for local educational agency (LEA) Implementation of Evidence-Based Practices; and
- Evaluation.

Phase III: Implementation and Evaluation (which, in addition to the Phase I and Phase II content (including any updates)) outlined above):

- Results of Ongoing Evaluation and Revisions to the SSIP.

Specific Content of Each Phase of the SSIP

Refer to FFY 2013-2015 Measurement Table for detailed requirements of Phase I and Phase II SSIP submissions.

Phase III should only include information from Phase I or Phase II if changes or revisions are being made by the State and/or if information previously required in Phase I or Phase II was not reported.

Phase III: Implementation and Evaluation

In Phase III, the State must, consistent with its evaluation plan described in Phase II, assess and report on its progress implementing the SSIP. This includes: (A) data and analysis on the extent to which the State has made progress toward and/or met the State-established short-term and long-term outcomes or objectives for implementation of the SSIP and its progress toward achieving the State-identified Measurable Result(s) for Children with Disabilities (SiMR); (B) the rationale for any revisions that were made, or that the State intends to make, to the SSIP as the result of implementation, analysis, and evaluation; and (C) a description of the meaningful stakeholder engagement. If the State intends to continue implementing the SSIP without modifications, the State must describe how the data from the evaluation support this decision.

A. Data Analysis

As required in the Instructions for the Indicator/Measurement, in its FFYs 2020 through 2025 SPPs/APRs, the State must report data for that specific FFY (expressed as actual numbers and percentages) that are aligned with the SiMR. The State must report on whether the State met its target. In addition, the State may report on any additional data (e.g., progress monitoring data) that were collected and analyzed that would suggest progress toward the SiMR. States using a subset of the population from the indicator (e.g., a sample, cohort model) should describe how data are collected and analyzed for the SiMR if that was not described in Phase I or Phase II of the SSIP.

B. Phase III Implementation, Analysis and Evaluation

The State must provide a narrative or graphic representation, (e.g., a logic model) of the principal activities, measures and outcomes that were implemented since the State's last SSIP submission (i.e., February 1, 2023). The evaluation should align with the theory of action described in Phase I and the evaluation plan described in Phase II. The State must describe any changes to the activities, strategies, or timelines described in Phase II and include a rationale or justification for the changes. If the State intends to continue implementing the SSIP without modifications, the State must describe how the data from the evaluation support this decision.

The State must summarize the infrastructure improvement strategies that were implemented, and the short-term outcomes achieved, including the measures or rationale used by the State and stakeholders to assess and communicate achievement. Relate short-term outcomes to one or more areas of a systems framework (e.g., governance, data, finance, accountability/monitoring, quality standards, professional development and/or technical assistance) and explain how these strategies support system change and are necessary for: (a) achievement of the SiMR; (b) sustainability of systems improvement efforts; and/or (c) scale-up. The State must describe the next steps for each infrastructure improvement strategy and the anticipated outcomes to be attained during the next fiscal year (e.g., for the FFY 2022 APR, report on anticipated outcomes to be obtained during FFY 2023, i.e., July 1, 2023-June 30, 2024).

The State must summarize the specific evidence-based practices that were implemented and the strategies or activities that supported their selection and ensured their use with fidelity. Describe how the evidence-based practices, and activities or strategies that support their use, are intended to impact the SiMR by changing program/district policies, procedures, and/or practices, teacher/provider practices (e.g., behaviors), parent/caregiver outcomes,

and/or child outcomes. Describe any additional data (e.g., progress monitoring data) that was collected to support the on-going use of the evidence-based practices and inform decision-making for the next year of SSIP implementation.

C. Stakeholder Engagement

The State must describe the specific strategies implemented to engage stakeholders in key improvement efforts and how the State addressed concerns, if any, raised by stakeholders through its engagement activities.

Additional Implementation Activities

The State should identify any activities not already described that it intends to implement in the next fiscal year (e.g., for the FFY 2022 APR, report on activities it intends to implement in FFY 2023, i.e., July 1, 2023-June 30, 2024) including a timeline, anticipated data collection and measures, and expected outcomes that are related to the SiMR. The State should describe any newly identified barriers and include steps to address these barriers.

17 - Indicator Data

Section A: Data Analysis

What is the State-identified Measurable Result (SiMR)?

Increased percentage of students with disabilities in grades K–5 who achieve a rate of improvement in reading at or higher than the expected growth for their grade-level peers.

Has the SiMR changed since the last SSIP submission? (yes/no)

NO

Is the State using a subset of the population from the indicator (e.g., a sample, cohort model)? (yes/no)

YES

Provide a description of the subset of the population from the indicator.

The SiMR cohort is a group of nine local education agencies (LEAs). Selection criteria included geographic representation across the state, being at the implementation or sustainability phases in Kansas MTSS and Alignment area of Reading by the beginning of the 2022–23 school year, and leadership being able and willing to sign a 5-year agreement to share the data to be aggregated for SPP Indicator 17 reporting.

Is the State’s theory of action new or revised since the previous submission? (yes/no)

NO

Please provide a link to the current theory of action.

<https://www.ksdetasn.org/resources/851>

Progress toward the SiMR

Please provide the data for the specific FFY listed below (expressed as actual number and percentages).

Select yes if the State uses two targets for measurement. (yes/no)

NO

Historical Data

Baseline Year	Baseline Data
2021	55.58%

Targets

FFY	Current Relationship	2022	2023	2024	2025
Target	Data must be greater than or equal to the target	55.70%	55.80%	55.90%	56.00%

FFY 2022 SPP/APR Data

Number of students with disabilities in cohort districts who made typical or aggressive growth in reading as measured by the fall and spring CBM-GOM	Number of students with disabilities in cohort districts who were assessed on the fall and spring CBM-GOM	FFY 2021 Data	FFY 2022 Target	FFY 2022 Data	Status	Slippage
359	654	55.58%	55.70%	54.89%	Did not meet target	No Slippage

Provide the data source for the FFY 2022 data.

The data source is the Curriculum-Based Measure General Outcome Measure (CBM-GOM) utilized within each school. In FFY 2022, all schools in the SiMR cohort administered the FastBridge aReading assessment in second through fifth grades and the earlyReading assessment in kindergarten and first grades.

Please describe how data are collected and analyzed for the SiMR.

All schools in the SiMR cohort administer a universal screening assessment three times a year (fall, winter, spring). The SiMR is calculated using data from the fall and spring universal screening administrations, specifically the assessment for reading. Assessments determine the performance level of each student and the fall–spring growth rate for each student. Data from students with disabilities are used for reporting for Indicator 17. Growth percentiles are categorized as flat (0–15%), modest (15–39%), typical (40–74%), and aggressive (75–100%) based on normative data provided by the assessment publisher. The SiMR is calculated as the number of students with disabilities who reach the typical or aggressive growth levels divided by the total number of students with disabilities who took the assessment in both fall and spring, aggregated across all SiMR cohort schools.

Optional: Has the State collected additional data (i.e., benchmark, CQI, survey) that demonstrates progress toward the SiMR? (yes/no)

NO

Did the State identify any general data quality concerns, unrelated to COVID-19, that affected progress toward the SiMR during the reporting period? (yes/no)

NO

Did the State identify any data quality concerns directly related to the COVID-19 pandemic during the reporting period? (yes/no)

NO

Section B: Implementation, Analysis and Evaluation

Please provide a link to the State's current evaluation plan.

<https://www.ksdetasn.org/resources/851>

Is the State's evaluation plan new or revised since the previous submission? (yes/no)

NO

Provide a summary of each infrastructure improvement strategy implemented in the reporting period:

As described in the Kansas SSIP Theory of Action, Kansas SSIP Logic Model, and Kansas SSIP Evaluation Plan, the Kansas SSIP addressed three coherent improvement strategies to achieve the SiMR during the FFY 2022 reporting period:

Coherent Improvement Strategy 1.0 focused on infrastructure development through strategically realigning, reallocating, and leveraging current State Education Agency (SEA) policies, organization, and infrastructure for increased capacity of districts to implement evidence-based practices. As described in the next section, the infrastructure areas addressed in FFY 2022 include data, accountability/monitoring, and professional development.

Coherent Improvement Strategy 2.0 focused on supporting the implementation of evidence-based practices through designing, implementing, and evaluating an integrated school improvement framework. The Kansas MTSS and Alignment State Trainers provided direct training and ongoing coaching to district leadership teams, building leadership teams, and collaborative teacher teams. The professional development increased district capacity to provide effective reading instruction for students with disabilities. As described in the next section, the infrastructure areas addressed in FFY 2022 include data and professional development.

Coherent Improvement Strategy 3.0 evaluated the degree to which the state infrastructure supported district implementation of evidence-based practices to improve reading results for students with disabilities kindergarten through fifth grade.

During FFY 2022, the timelines for Coherent Improvement Strategy 1.0, Coherent Improvement Strategy 2.0, and Coherent Improvement Strategy 3.0 were followed. Evaluation measures were refined and implemented as part of the TASN utilization-focused evaluation process. The principal activities and evaluation plan were fully implemented, and the results of the short-term, medium-term, and long-term outcomes for each of the three coherent improvement strategies were reported.

The Kansas State Department of Education (KSDE) made gains in infrastructure development and alignment that increased the capacity of districts to implement evidence-based practices. In collaboration with Kansas MTSS and Alignment, the KSDE expanded support to LEAs through the Kansas Education Systems Accreditation (KESA) process. Regional pilot trainings were conducted during FFY 2021 and continued in FFY 2022 in which LEAs engaged in a continuous improvement process of data analysis, setting goals, selecting strategies, implementing strategies, and analyzing strategies.

The implementation of evidence-based practices within districts applying Kansas MTSS and Alignment principles included the adoption of evidence-based core and intervention curricula, universal screening, progress monitoring, data-based decision making, and family engagement practices. During FFY 2022, leadership teams from the SiMR cohort districts participated in implementation coaching to sustain the evidence-based practices of Kansas MTSS and Alignment. Kansas MTSS and Alignment continued onsite coaching and in-person and virtual training options. Beginning in FFY 2021, the Kansas MTSS and Alignment State Trainers enacted the MTSS Inclusive Practices Site Visit Protocol to provide feedback to elementary school leadership on their inclusive practices during reading and math instruction. This protocol analyzed the extent to which all students with disabilities are included in core courses, accessing core instruction, and engaging with peers and teachers. While the SiMR focused specifically on the reading achievement of students with disabilities in kindergarten through fifth grade, Kansas MTSS and Alignment holistically supported sustainable, districtwide implementation of an integrated reading, math, behavioral, and social-emotional model from early childhood through graduation. By following this framework, each student, specifically students with disabilities, received the instruction and interventions necessary to improve reading, math, behavioral, and social-emotional outcomes.

The evaluation of the SSIP, Coherent Improvement Strategy 3.0, is comprehensive; utilization focused; and designed to support decision making at the

classroom, school, district, provider, and state levels. A meta-evaluation, including stakeholder input and feedback, confirmed the evaluation measures, processes, and analyses met the needs of the decision makers at these levels and followed the theory of action and logic model through aligned short-term, medium-term, and long-term outcomes leading to the SiMR.

Describe the short-term or intermediate outcomes achieved for each infrastructure improvement strategy during the reporting period including the measures or rationale used by the State and stakeholders to assess and communicate achievement. Please relate short-term outcomes to one or more areas of a systems framework (e.g., governance, data, finance, accountability/monitoring, quality standards, professional development and/or technical assistance) and explain how these strategies support system change and are necessary for: (a) achievement of the SiMR; (b) sustainability of systems improvement efforts; and/or (c) scale-up.

A description of how the State evaluated outcomes and each improvement strategy is provided in the Kansas SSIP Evaluation Plan, which directly aligns with the Theory of Action and the Logic Model. Four short-term metrics monitored improvements in knowledge, skills, and collaboration as measured through observation, participant report, document review, and stakeholder ratings. Four intermediate metrics monitored installation of evidence-based practices as measured through implementation fidelity measures, observation, participant report, and stakeholder feedback. Three long-term metrics monitored the sustained implementation of evidence-based practices.

Coherent Improvement Strategy 1.0 focused on improving statewide infrastructure. Activities in place for sustainability include monitoring the delivery of professional development and technical assistance, facilitating communication and collaboration across all levels of stakeholders, and aligning resources across KSDE and TASN providers. A document review was conducted to evaluate the collaborative efforts and determine increased alignment of the KSDE infrastructures that facilitated the implementation of the Kansas MTSS and Alignment framework. A review and analysis consisting of 232 documents indicated high levels of message alignment across KSDE divisions, TASN providers, and stakeholder groups. The collective message was instrumental in systems alignment that supports districts in the implementation of a tiered framework of supports that improves reading, math, behavioral, and social-emotional achievement of students, specifically students with disabilities, from early childhood through graduation. Stakeholder meetings, including the Special Education Advisory Council, the TASN Leadership Team, the State Board of Education, and the Special Education Administrators' Workgroup, focused on evidence-based processes, including root cause analyses and stakeholder engagement within a continuous improvement process, to maintain evidence-based practices.

Strategy 1.0 included the alignment of state policies and priorities for comprehensive school improvement through collaborative, data-based decisions. In collaboration with Kansas MTSS and Alignment, the KSDE expanded support to LEAs for the Kansas Education Systems Accreditation process. All LEAs in the pilot begun in FFY 2021 continued working toward continuous improvement goals based on one or more of the five Kansas State Board of Education outcomes, having set 90% of their goals specifically on reading achievement.

To promote shared understanding, the KSDE hosted the annual Summer Leadership Conference, which had 390 registrants representing numerous stakeholder groups: 36 KSDE staff members, 58 TASN providers (including the Kansas MTSS and Alignment project directors), 162 district personnel, 99 personnel from special education cooperatives and interlocals, 30 personnel from other educational agencies, and three representatives of the Kansas Parent Training and Information Center. Thirty-five out of 41 (85%) of Kansas' special education cooperatives/interlocals were represented. Representatives were present for 26 out of 33 (79%) of the districts that do not use a cooperative or interlocal for special education services. Conference materials were made publicly available, resulting in 25 resources for educational leaders focused on evidence-based practices that promote achievement for students with disabilities.

TASN Quarterly Meetings build coherence among KSDE and TASN staff and facilitate collaboration leading to effective and efficient use of human capital. Attendance at each meeting averaged 23 KSDE staff, 17 Kansas MTSS and Alignment State Trainers, 50 other TASN providers, and seven members of KSDE's Technical Assistance Team. Activities to foster alignment included learning about the work of each TASN project and KSDE's Special Education and Title Services team; collaborating around problems of practice for each TASN project; and reflecting on correlations among state assessment performance, graduation rates, and postsecondary effectiveness rates in Kansas.

Coherent Improvement Strategy 2.0 concentrated on the implementation of evidence-based practices in LEAs. The expanded TASN system fully incorporated the Kansas MTSS and Alignment project in FFY 2015. Implementation was sustained and scaled up through FFY 2022. In FFY 2016, the project provided intensive coaching in implementation of MTSS structures to 18 Kansas school districts (87 buildings and 32,255 students, including 5,460 students with disabilities); FFY 2017, 31 districts (266 buildings and 128,604 students, including 18,501 students with disabilities); FFY 2018, 43 districts (307 buildings and 140,075 students, including 20,954 students with disabilities); FFY 2019, 51 districts (271 buildings and 105,851 students, including 16,298 students with disabilities); FFY 2020, 60 districts (353 buildings and 138,081 students, including 22,080 students with disabilities); FFY 2021, 63 districts (351 buildings and 135,446 students, including 21,145 students with disabilities); FFY 2022, 77 districts (459 buildings and 188,614 students, including 29,666 students with disabilities).

The MTSS practices include evidence-based core and intervention curricula, universal screening, progress monitoring, data-based decision making, and family engagement. Data analyses resulted in district- and building-level action planning to continually refine implementation. In FFY 2022, the Kansas MTSS and Alignment project supported 177 districts, providing 37 statewide webinars with 2,806 attendees. The State Trainers worked intensely in 77 of these districts, providing 130 training opportunities with 6,455 registrations and 219 additional coaching and/or training events. A TASN evaluator observed 24 trainings; each met all Observation Checklist for High-Quality Professional Development—Version 3 indicators in the domains of Contextualizing the Content, Engaging in Learning, and Transferring Learning to Practice.

Educator collaboration was analyzed using data from ongoing training evaluations and the Inclusive MTSS Implementation Scale. Results from 349 instructional staff in SiMR cohort districts showed collaborative and building leadership teams are functioning effectively. For example, 83% of respondents agreed that My collaborative team regularly shares in the responsibility of formal problem solving using data to make decisions.

Of the 247 instructional staff in the cohort districts providing Tier 1, 2, or 3 reading instruction, 88% agreed that All students, including students with disabilities and English learners, are included in core reading instruction; and 89% agreed that When screening data indicate need regarding a student's reading, the student is placed in appropriate interventions. Of the administrators, 94% indicated that schoolwide decisions on instruction and curricula are based on data and 100% indicated that MTSS is a critical component of their accreditation process. Additionally, 94% of administrators indicated an increase in students scoring at benchmark on their school's universal reading screener.

The Kansas MTSS and Alignment State Trainers conducted observations and walk-throughs to promote implementation and verify data. Process measures included the MTSS Inclusive Practices Site Visit Protocol, the Classroom Intervention Fidelity Checklist, and inquiry cycle documentation. Implementation fidelity results demonstrated that, through the support of Kansas MTSS and Alignment, schools installed and then improved implementation of evidence-based practices.

Did the State implement any new (newly identified) infrastructure improvement strategies during the reporting period? (yes/no)

NO

Provide a summary of the next steps for each infrastructure improvement strategy and the anticipated outcomes to be attained during the next reporting period.

Coherent Improvement Strategy 3.0 focused on evaluation of the Kansas SSIP. All the identified activities have been implemented and sustained across multiple years. Qualitative and quantitative measures included observations, document reviews, stakeholder surveys, fidelity measures, and student progress data. Evaluation data demonstrated that stakeholders were integral to decision making, progress was monitored, and adjustments were determined based on data. The quality of the data was examined for limitations that could affect the implementation of the SSIP. To ensure that quality of the evaluation was not affected, policies and procedures of Kansas Data Quality Assurance were closely monitored. The KSDE Data Quality Assurance policies include training and data certification of district staff. Furthermore, the TASN Evaluation project provided additional data verification. The IDEA Data Center guidance on data collection, analysis, and reporting was reviewed to confirm that Kansas Indicator 17 data are timely, accurate, and complete. Self-correcting feedback loops have been constructed within the context of the evaluation to ensure that data continue to guide decision making for schools, districts, TASN providers, and the KSDE.

A meta-evaluation was conducted to ensure the evaluation met the Joint Committee Standards for Educational Evaluation (2010). These standards relate to the utility, accountability, feasibility, propriety, and accuracy of the evaluation. As part of the meta-evaluation, all TASN providers were asked to provide input on the effectiveness of the TASN system evaluation by completing a survey including both Likert and open-ended response items. When asked how well the TASN Evaluation project performed various duties, the percentage of TASN providers responding Working well or Working very well was 90% or above for all 12 Likert items, including the items Promote meaningful collaboration among TASN providers to build shared capacity, Build the skills of your team to collect and utilize evaluation data, Provide evaluation data in an easily interpretable manner, Support your project to streamline the process of providing data to educators to support their decision making, and Support your project in using data to improve project activities. Results were reviewed with the KSDE TASN Leadership Team in order to determine areas for improvement.

Data indicate that the coherent improvement strategies should be continued. During the next reporting period, the KSDE will expand supports within the accreditation process that are congruent with the Kansas MTSS and Alignment constructs and the continuous improvement process. The KSDE will continue to leverage ESSERS and ESSERS-2 funds to mitigate learning loss by elevating evidence-based practices, including professional learning focused on the science of reading, instructional practices that promote students' intrapersonal and interpersonal competency development, and the use of curriculum-based general outcome measures that support schools in determining intervention needs and monitoring the rate of improvement and learning for each student.

During the next reporting period, the Kansas MTSS and Alignment team will continue to provide ongoing professional development and coaching to district and school leadership teams at the structuring, implementation, and sustainability phases. Statewide trainings will focus on Tier 1 reading instruction, interpreting universal screening data, behavior and social-emotional learning, and coaching to improve instruction and implementation within an MTSS system.

These next steps for infrastructure improvement will focus on data, monitoring and accountability, and professional development. The evaluation of the Kansas SSIP will be maintained and expanded to include any new activities within each coherent improvement strategy. Measures will continue to include observations, document reviews, stakeholder surveys, fidelity measures, and student progress data.

List the selected evidence-based practices implement in the reporting period:

Through a structured process of districtwide improvement, district and building leadership teams analyzed data, including examining curricula, assessments, leadership, empowering culture, family engagement, reading instruction at all tiers, math instruction at all tiers, behavioral and social-emotional learning instruction at all tiers, and the efficacy of building leadership teams and collaborative teams. These data address the evidence-based practices within Kansas MTSS and Alignment. Data analyses resulted in the implementation of district- and building-level action planning to continually enhance and refine the implementation of Kansas MTSS and Alignment tenants.

Provide a summary of each evidence-based practices.

The research base for each element of Kansas MTSS and Alignment is outlined at <https://www.ksdetasn.org/resources/662>. The K-12 Reading Implementation Guide, available at <https://ksdetasn.org/resources/3750>, describes the evidence-based process for providing tiered reading supports matched to each student's needs.

Provide a summary of how each evidence-based practice and activities or strategies that support its use, is intended to impact the SiMR by changing program/district policies, procedures, and/or practices, teacher/provider practices (e.g. behaviors), parent/caregiver outcomes, and/or child /outcomes.

During FFY 2022, data from multiple evaluation measures demonstrated that educators have the knowledge and skills necessary to implement the evidence-based practices promoted through the professional learning and technical assistance provided by the Kansas MTSS and Alignment team. During the installation and implementation phases, district and building leadership teams participated in 5 to 6 full days of training to develop the necessary structures to implement Kansas MTSS and Alignment. The Kansas MTSS and Alignment State Trainers provided both onsite and virtual coaching following the coaching practices outlined in the NCSI's Effective Coaching of Teachers: Fidelity Tool Rubric (Pierce, 2014), including adherence to essential ingredients, quality, dose, and participant responsiveness. While the SiMR focused specifically on the reading achievement of students with disabilities in kindergarten through fifth grade, Kansas MTSS and Alignment holistically supported sustainable, districtwide implementation of an integrated reading, math, behavioral, and social-emotional model from early childhood through graduation. By implementing the framework, each student, specifically students with disabilities, received the instruction and interventions necessary to improve reading, math, behavioral, and social-emotional outcomes. District and building leadership teams analyzed data, including examining curricula, assessments, leadership practices, empowering culture, reading instruction at all tiers, math instruction at all tiers, behavioral and social-emotional learning instruction at all tiers, and the efficacy of building leadership teams and collaborative teams. Further, they collected and analyzed data from key stakeholder groups, including families. Data analyses resulted in the implementation of district- and building-level action planning to continually enhance and refine the implementation of Kansas MTSS and Alignment.

Implementation fidelity results demonstrated that, through the support of Kansas MTSS and Alignment, schools installed and then improved implementation of evidence-based practices. By holistically addressing students' academic, behavioral, and social-emotional learning needs through a research-based, decision-making process, students will engage more in learning and improve outcomes, including their reading achievement as measured by the SiMR. The Kansas SSIP Theory of Action, Kansas SSIP Logic Model, and Kansas SSIP Evaluation Plan outline the connection between the three coherent improvement strategies, outcomes, and impacts.

Describe the data collected to monitor fidelity of implementation and to assess practice change.

The Kansas TASN Evaluation project, in collaboration with KSDE leadership, TASN providers, and stakeholder groups, designed and installed the multiyear Kansas SSIP Evaluation Plan that outlines short- and long-term objectives aligned to the Kansas SSIP Theory of Action and Kansas SSIP Logic Model. The TASN Evaluation project monitors adherence to timelines, implementation, outcomes of infrastructure development, and support for district implementation of evidence-based practices. The evaluation indicators align with the five TASN evaluation outcome domains: (1) Participants increase awareness, knowledge, and skills; (2) Administrators and supervisors create conditions that support implementation; (3) Participants implement evidence-based practices with fidelity; (4) Students and children improve academic, behavioral, and social outcomes; and (5) Schools and organizations sustain implementation with fidelity.

Qualitative and quantitative measures included observations, document reviews, stakeholder surveys, fidelity measures, and student progress data. Evaluation data demonstrated that stakeholders were integral to decision making, progress was monitored, and adjustments were determined based on data. The evaluation measures and timeline were carefully designed to support data-based decision making in the areas of infrastructure development, alignment, and the implementation of evidence-based practices. At both the state and local levels, improvements are facilitated through the use of a problem-solving approach referred to as the self-correcting feedback loop. By using the self-correcting feedback loop, school and district teams access timely data that guide data-informed decisions at the student, grade, school, and district levels. Kansas MTSS and Alignment State Trainers function as coaches and utilize the data to prioritize improvements in knowledge, skills, and implementation within districts. The KSDE TASN Leadership Team analyzes aggregate student, district, and project data to inform infrastructure development and systems improvements. KSDE leadership, in collaboration with stakeholder groups, utilizes evaluation data to examine the effectiveness of the implementation, measure progress toward achieving intended improvements, and make modifications to the Kansas SSIP as necessary. Utilizing the NCSI SSIP Infrastructure Development and Progress Measurement Tool: Using Implementation Drivers & Stages of Implementation (NCSI, 2018), the Kansas SSIP is in the implementation or sustainability stage within each implementation driver.

Describe any additional data (e.g. progress monitoring) that was collected that supports the decision to continue the ongoing use of each evidence-based practice.

N/A.

Provide a summary of the next steps for each evidence-based practices and the anticipated outcomes to be attained during the next reporting period.

The evidence-based practices and process will be maintained during the next reporting period.

Does the State intend to continue implementing the SSIP without modifications? (yes/no)

YES

If yes, describe how evaluation data support the decision to implement without any modifications to the SSIP.

Evaluation data indicate that the implementation of Kansas MTSS and Alignment constructs promotes the success of each student. Through data-informed decisions, students are placed into and exit interventions in reading, math, and behavioral/social-emotional learning. Implementation and outcome data are summarized in this report and in annual evaluation briefs. During the reporting period, 54.99% of the students with disabilities in the SiMR cohort and 58.30% of all students in the SiMR cohort schools achieved a rate of improvement in reading at the typical or aggressive levels. Statewide data from the same measurement show that of the 99,245 Kansas students in kindergarten through fifth grade who were assessed in fall 2021 and spring 2022, 53.80% made typical or aggressive reading growth. Of the students who were assessed on the aReading and earlyReading measures, a higher percentage of students with disabilities in the SiMR cohort made typical or aggressive growth compared to all Kansas students in kindergarten through fifth grade.

Section C: Stakeholder Engagement

Description of Stakeholder Input

Kansas employed two primary mechanisms for soliciting broad stakeholder input on targets in the Kansas SPP/APR: (1) through five established statewide groups and (2) broad dissemination of learning materials to: build stakeholder capacity in SPP/APR requirements, review and interact with historical and projected Kansas SPP/APR data, consider targets and proposed improvement strategies, and provide feedback through a survey, live meetings, or the collection of stories and experiences.

The five established statewide groups met with KSDE staff on multiple occasions to develop, provide continuous feedback based on data collection and analysis, review progress, identify root causes and improvement strategies, and propose revisions on targets when needed. These groups include the: (1) Special Education Advisory Council (SEAC) (Kansas's state advisory panel); (2) Kansas Assessment Advisory Council (KAAC); (3) State Interagency Coordinating Council (SICC); (4) Kansas Technical Assistance System Network (TASN) providers; and (5) Kansas School Mental Health Advisory Council. These groups are comprised of parent members, consumers, multiple state agency representatives, school districts, higher education, state associations and parent advocacy organizations. In addition, KSDE distributed information and connected to networks including, but not limited to: the Kansas State Department of Education (KSDE) staff; distribution on multiple KSDE listservs including to all Kansas superintendents, local board of education clerks, principals, special education directors, early childhood providers, McKinney-Vento homeless liaisons, Kansas Education Systems Accreditation, the Kansas parent training and information center (Families Together) staff and families and education advocates (surrogate parents); local and statewide advocacy organization staff and families; other state agency staff; private schools and organizations that serve primarily students with disabilities; and state commissions focused on the communities of those identifying as a particular race or ethnicity. The Kansas Parent Information Resource Center conducted multiple events, presentations, consultations, webinars and responded to technical assistance support requests. Kansas also held meetings with the Kansas Integrated Accountability System stakeholder group, made up of special education administrators from each geographical region of the state and conducted sessions at the KSDE TASN summer leadership conference.

Following the stakeholder input period in FFY2020, KSDE staff met with SEAC to review all stakeholder input and propose changes to selected result indicator data collection methodologies. Based on stakeholder feedback, SEAC voted to approve all proposed targets without any changes. In FFY2021 the SEAC also reviewed stakeholder input, the proposed changes, and approved the data collection methodologies, baselines and targets for Indicators 2, 8 and 17 respectively. In FFY2022 SEAC reviewed stakeholder input, calculation methodology changes, and applicable baseline and target revisions for Indicator 4: Suspension and Expulsion. Additionally, SEAC provided input and reviewed year one results of the Indicator 14: Post-School Outcomes census data collection methodology.

Describe the specific strategies implemented to engage stakeholders in key improvement efforts.

The KSDE used principles of Leading by Convening (Cashman et al., 2014) to engage stakeholders through each phase of the SSIP process and continues to do so on an ongoing basis. Stakeholders at the local and state levels were intentionally informed of the SSIP implementation and were provided a voice in decision making. Stakeholders are represented by persons with disabilities, parents of students with disabilities, teachers, principals, superintendents, higher education faculty, state school staff members, correctional facility staff members, vocational rehabilitation representatives, and other state agencies. Organizations represented by stakeholders include the Kansas Special Education Advisory Council, the Kansas Parent Training and Information Center (PTI), the Kansas Parent Information Resource Center (KPIRC), the Kansas MTSS and Alignment project, the Kansas Learning Network, and the KESA Advisory Council. Additionally, multiple internal stakeholders were included from the KSDE Office of the Commissioner, Division of Learning Services, and Special Education and Title Services teams. At the local level, families were engaged as key stakeholders in educational decision making. When the new calculation and baseline were set in FFY 2021, the TASN Evaluation project, in collaboration with KSDE staff, facilitated input from stakeholder groups, including the Kansas Special Education Advisory Council, KSDE and TASN providers, district and school leadership, school instructional staff, and families. The TASN Evaluation project encouraged these stakeholder groups to ask clarifying questions to determine ease of interpretation, the accuracy of the graphical displays, and the usefulness of the data.

One in-person and three virtual TASN Quarterly Meetings were held during FFY 2022. Two key goals of these meetings were (1) to build coherence among KSDE staff and TASN providers and (2) to facilitate collaboration that leads to the effective and efficient use of human capital. Attendance at each meeting averaged 23 KSDE staff, 17 Kansas MTSS and Alignment State Trainers, 50 other TASN providers, and seven members of KSDE's Technical Assistance Team. Additionally, meetings were attended by leadership from the Kansas PTI and KPIRC. The TASN Quarterly Meeting evaluation data revealed that participants found the meetings to be relevant, useful, and of high quality. Following each meeting, participants were asked to rate items on a survey using a scale from 1 (Strongly Disagree) to 5 (Strongly Agree). Meeting participants provided an average rating of 4.44 for the item I understand how the content/practice is intended to improve outcomes for children and youth; 4.04 for the item I will use the content or implement the practice(s) from this training; and 4.28 for the item Overall, the training was of high quality.

Kansas MTSS and Alignment project leadership shared data with the KSDE through the formal TASN meeting structures and actively participated on KSDE advisory councils and workgroups. The Kansas MTSS and Alignment project received ongoing feedback from district leadership through the series of in-district trainings and coaching visits. The TASN Evaluation project verified data-based decision making and data sharing through document analyses and observations at meetings and trainings. To facilitate the communication of data, the TASN Evaluation project developed a Kansas MTSS and Alignment Evaluation Brief (available at <https://ksdetasn.org/evaluation/tasn-provider-evaluation-briefs>), which was disseminated to KSDE staff and other stakeholder groups. Stakeholder involvement informed training, coaching, and technical assistance for all implementation drivers and all stages of implementation. Stakeholders included district personnel, community and family members, and state-level stakeholder groups.

The Family Engagement Survey–Version 2 (Gaumer Erickson et al., 2022) was deployed to gain feedback from family stakeholders. The survey is based on the National PTA Standards for Family–School Partnerships, and items are separated into the domains of Welcoming Environment, Supporting Student Learning, Effective Communication, Sharing Power and Advocacy, and Community Involvement. Version 2 of the survey, first launched in FFY 2021, involved a substantial revision process in collaboration with KPIRC and with feedback from the KSDE, the Kansas PTI, OSEP, diverse families, and TASN providers. The revision process was driven by a need to ensure that survey items included two-way communication between schools and families. Based on 1,817, including 397 responses from parents of students with disabilities, results indicate that SiMR cohort families are engaged in decision making for their children. For example, 70% of all families (72% of families of children with disabilities) agreed that School staff seek my input to better understand my child and family, and 85% of all families (87% of families of children with disabilities) agreed that During conferences, teachers and I exchange valuable information about my child's strengths and challenges.

District and building leadership teams reviewed building- and district-level Family Engagement Survey data to identify strengths and target specific areas for improvement. Through the online data collection portal, districts launched the survey and could review results in real time, family members had the option to complete the survey in one of 11 languages, and easy-to-interpret data displays were auto-generated for each school and for the district overall. School leaders could view disaggregated displays for parents who identified having a student who received special education services at the school. The composite school- and district-level reports were also generated in 11 languages in order to promote the sharing of these data with families. Specific actions related to family engagement included developing a process for regularly sharing data with all families and embedding family engagement into the implementation protocol for reading interventions.

Were there any concerns expressed by stakeholders during engagement activities? (yes/no)

NO

Additional Implementation Activities

List any activities not already described that the State intends to implement in the next fiscal year that are related to the SiMR.

N/A.

Provide a timeline, anticipated data collection and measures, and expected outcomes for these activities that are related to the SiMR.

N/A.

Describe any newly identified barriers and include steps to address these barriers.

N/A.

Provide additional information about this indicator (optional).

(1) For a detailed explanation of how the Compliance Score, Results Score, and the Results-Driven Accountability Percentage and Determination were calculated, review "How the Department Made Determinations under Section 616(d) of the *Individuals with Disabilities Education Act* in 2024: Part B."

Exiting Data Elements

Exiting Data Elements	Performance (%)	Score
Percentage of Children with Disabilities who Dropped Out		
Percentage of Children with Disabilities who Graduated with a Regular High School Diploma**		

**When providing exiting data under section 618 of the IDEA, States are required to report on the number of students with disabilities who exited an educational program through receipt of a regular high school diploma. These students meet the same standards for graduation as those for students without disabilities. As explained in 34 C.F.R. § 300.102(a)(3)(iv), in effect June 30, 2017, "the term regular high school diploma means the standard high school diploma awarded to the preponderance of students in the State that is fully aligned with State standards, or a higher diploma, except that a regular high school diploma shall not be aligned to the alternate academic achievement standards described in section 1111(b)(1)(E) of the ESEA. A regular high school diploma does not include a recognized equivalent of a diploma, such as a general equivalency diploma, certificate of completion, certificate of attendance, or similar lesser credential."

2024 Part B Compliance Matrix

Part B Compliance Indicator (2)	Performance (%)	Full Correction of Findings of Noncompliance Identified in FFY 2021 (3)	Score
Indicator 4B: Significant discrepancy, by race and ethnicity, in the rate of suspension and expulsion, and policies, procedures or practices that contribute to the significant discrepancy and do not comply with specified requirements.			
Indicator 9: Disproportionate representation of racial and ethnic groups in special education and related services due to inappropriate identification.			
Indicator 10: Disproportionate representation of racial and ethnic groups in specific disability categories due to inappropriate identification.			
Indicator 11: Timely initial evaluation			
Indicator 12: IEP developed and implemented by third birthday			
Indicator 13: Secondary transition			
Timely and Accurate State-Reported Data			
Timely State Complaint Decisions			
Timely Due Process Hearing Decisions			
Longstanding Noncompliance			
Specific Conditions			
Uncorrected identified noncompliance

APR Score Calculation

Subtotal	
Timely Submission Points - If the FFY 2022 APR was submitted on-time, place the number 5 in the cell on the right.	
Grand Total - (Sum of Subtotal and Timely Submission Points) =	

(1) In the SPP/APR Data table, where there is an N/A in the Valid and Reliable column, the Total column will display a 0. This is a change from prior years in display only; all calculation methods are unchanged. An N/A does not negatively affect a State's score; this is because 1 point is subtracted from the Denominator in the Indicator Calculation table for each cell marked as N/A in the SPP/APR Data table.

618 Data (2)

Table	Timely	Complete Data	Passed Edit Check	Total
Child Count/ Ed Envs Due Date: 8/30/23				
Personnel Due Date: 2/21/24				
Exiting Due Date: 2/21/24				
Discipline Due Date: 2/21/24				
State Assessment Due Date: 1/10/24				
Dispute Resolution Due Date: 11/15/23				
MOE/CEIS Due Date: 5/3/23				

618 Score Calculation

Subtotal	
Grand Total (Subtotal X 1.23809524) =	

(2) In the 618 Data table, when calculating the value in the Total column, any N/As in the Timely, Complete Data, or Passed Edit Checks columns are treated as a '0'. An N/A does not negatively affect a State's score; this is because 1.23809524 points is subtracted from the Denominator in the Indicator Calculation table for each cell marked as N/A in the 618 Data table.

Indicator Calculation

A. APR Grand Total	
B. 618 Grand Total	
C. APR Grand Total (A) + 618 Grand Total (B) =	
Total N/A Points in APR Data Table Subtracted from Denominator	
Total N/A Points in 618 Data Table Subtracted from Denominator	
Denominator	
D. Subtotal (C divided by Denominator) (3) =	
E. Indicator Score (Subtotal D x 100) =	

(3) Note that any cell marked as N/A in the APR Data Table will decrease the denominator by 1, and any cell marked as N/A in the 618 Data Table will decrease the denominator by 1.23809524.

APR and 618 -Timely and Accurate State Reported Data

DATE: February 2024 Submission

SPP/APR Data

1) Valid and Reliable Data - Data provided are from the correct time period, are consistent with 618 (when appropriate) and the measurement, and are consistent with previous indicator data (unless explained).

Part B 618 Data

1) Timely – A State will receive one point if it submits all *EDFacts* files or the entire *EMAPS* survey associated with the IDEA Section 618 data collection to ED by the initial due date for that collection (as described the table below).

618 Data Collection	EDFacts Files/ EMAPS Survey	Due Date
Part B Child Count and Educational Environments	C002 & C089	8/30/2023
Part B Personnel	C070, C099, C112	2/21/2024
Part B Exiting	C009	2/21/2024
Part B Discipline	C005, C006, C007, C088, C143, C144	2/21/2024
Part B Assessment	C175, C178, C185, C188	1/10/2024
Part B Dispute Resolution	Part B Dispute Resolution Survey in EMAPS	11/15/2023
Part B LEA Maintenance of Effort Reduction and Coordinated Early Intervening Services	Part B MOE Reduction and CEIS Survey in EMAPS	5/3/2023

2) Complete Data – A State will receive one point if it submits data for all files, permitted values, category sets, subtotals, and totals associated with a specific data collection by the initial due date. No data is reported as missing. No placeholder data is submitted. The data submitted to *EDFacts* aligns with the metadata survey responses provided by the state in the State Supplemental Survey IDEA (SSS IDEA) and Assessment Metadata survey in EMAPS. State-level data include data from all districts or agencies.

3) Passed Edit Check – A State will receive one point if it submits data that meets all the edit checks related to the specific data collection by the initial due date. The counts included in 618 data submissions are internally consistent within a data collection

How the Department Made Determinations

Below is the location of How the Department Made Determinations (HTDMD) on OSEP's IDEA Website. How the Department Made Determinations in 2024 will be posted in June 2024. Copy and paste the link below into a browser to view.
