## Contact KSDE for assistance correcting verification 0214.

Unresolved 0214 may effect a district’s Level of Determination.

**Verification report**

**Q. What should I look for?**

**1. Unresolved verifications**

**a) Service line verifications affecting the OSEP / Federal environment**

- 0004 – Invalid or missing service settings.
- 0007 – Missing calendar
- 0011 – Zero days or days exceeding the calendar days in session
- 0012 – Service dates are outside of the calendar range
- 0039 – Setting “P” homebound listed for the same dates as school based settings.
- 0045 – No service lines are present.
- 0047 – Invalid neighborhood school
- 0070 – Service start date is blank or prior to the first day of school
- 0123 – Service start date is causing an Overlap
- 0124 - Service end date is causing an Overlap
- 0214 – Setting code does not match to the same program session in the directory.
- 0220 – Not all December 1 service lines have the same disabilities and / or Gifted indicator.
- 0221 – Not all December 1 service lines have the same Responsible school.

**b) Other Verifications affecting the OSEP / Federal child count categories**

- 0005 – Age of the student is less than 3 or greater than 21.
- 0022 – Area of disability is missing for a non-Gifted student.
- 0049 – Area of disability is an invalid code.
- 0053 - Area of disability = DD for dates outside of the students calculated age of 3 – 9.
- 0060 – Responsible school is invalid
- 0085 – Multiple active profiles are present for the same student.

Data Quality Checks – How to manage my December 1 data.

C) Exit data flags

- 0014 – Service dates are after the student’s exit date
- 0019 – Inactive status and no exit date
- 0020 – Exit date is listed but “Current” status is active
- 0144 – The latest service end date does not equal the student’s exit date.
- 0146 – There is a Gap in services excluding the December 1 date

Projected December 1 report

Q. What should I look for?

1. Start with the child count. Are the number of students in the projected report
   a) How do address this?
      Compare to your IEP system to verify child counts, add or remove student records as applicable. Check claiming indicator

2. Duplicates
   a) Duplicate records are not permitted per OSEP reporting requirements.
   b) Run Duplicate check using projected December 1 report.
      i) Use FY 2019 MIS Workshop handbook. Pages 16-18
      ii) To fix it, remove duplicate records. Only one record per student is allowed.

3. Find missing data or invalid data
   a) Invalid Assign Child Count organization – **this must be fixed**
      i) Does the ACC column have a Z0 or X0 organization listed?
         (1) This indicates an invalid responsible school.
         (2) Use FY 2018 MIS Workshop handbook. Page 20
         (3) To fix it change the responsible school to an elementary, middle or high school in your agency.
   b) Neighborhood LEA = Blank
      i) This indicates a closed school.
         (1) Same process as above, filter on Neighborhood LEA field
         (2) To fix it change the neighborhood school to an open and active building.
   c) Students with disability category of DD and age is greater than 9
      i) Use FY 2018 MIS Workshop handbook. Page 21
   d) Grade level = Blank
      i) Use FY 2018 MIS Workshop handbook. Page 19
         (1) To fix it, enter a valid grade level.
   e) Service code = Blank
      i) Use FY 2019 MIS Workshop handbook. Page 19
         ii) To fix it, enter a valid service code
   f) Setting code is invalid “Z”
      i) Use FY 2019 MIS Workshop handbook. Page 18
         ii) To fix it, enter a valid setting code
   g) County of residence = Blank
      i) Same process as above, filter on County of Residence field.
      ii) To fix it, enter a valid county code
   h) Parent language = Blank
      i) Same process as above, filter on Parent Language field
      ii) To fix it, enter a valid Parent language

4. Settings inconsistent with for the students age or grade level
   a) Preschool settings for student older than age 6 or grade levels higher than Kindergarten

Data Quality Checks – How to manage my December 1 data.

i) Use FY 2018 MIS Workshop handbook. Page 21

5. Accurate Responsible school
   a) The Responsible school on the December 1 service lines is in the Responsible organization during the date ranges that intersect the December 1 date.
   b) If a student moves between member districts of a Coop or Interlocal, report the correct responsible school by service date. Report multiple responsible schools under the same IEP by service date range. A Responsible school typically does not change based on a new IEP, but is reported by building exit and entry dates.

IT updates – IT has made several enhancements to the SPEDPro application

A. Building information page – Directory information for all schools and programs state-wide is now available on the building information page. Users can now view Directory information for outside organizations by selecting the organization from a drop down listing.

B. Personnel List report – A new report of SPEDPro providers is available on the reports page. The Personnel List report contains a complete listing of providers by school year. The report includes Provider ID, Name, Organization, Provider role, date and time stamp of the last edit of the provider information and who made the edit

C. Time out and Redirect – SPEDPro times out after 5 minutes of inactivity. Prior to the update, only an alert of time out were displayed. Now when the application times out due to inactivity, the user is redirected back to the log in page.
