1. If a student graduates, moves out-of-state, or transitions out of a Kansas education program (e.g., LEA, SPED Cooperative, education service center or interlocal) and the equipment is uniquely personalized for the student's individual physical characteristics (e.g., ear molds, eye glasses, artificial foot orthotics (AFOs), etc.), the technology, equipment, or materials stay with the student.
2. If the equipment is not personalized (described in item one above) and the student transitions to another program within Kansas, the equipment stays with the student.
3. If the equipment, technology, and materials were adapted or personalized for the student's use (e.g., augmentative communication devices or toy activated switches), the technology, equipment, and materials may be purchased at the current market value from the local education agency. This arrangement needs to be made with the local education agency, the student (if applicable), or the student’s family.
4. If the equipment, technology, or materials no longer meets the student's needs, the local education agency may choose to:
