

CAPS Staff ID Assignment File Specifications

The Kansas State Department of Education (KSDE) has developed this document in order to provide School Districts and LEAs with a detailed description of the file requirements for uploading staff member information to the Categorical Aid Personnel System. The upload process provides an alternative method for School Districts and LEAs to obtain unique state Staff IDs for new staff members or update information for staff members who already have a state Staff ID.

General CAPS Staff ID Assignment Export File Requirements

- A. The **CAPS Staff ID Assignment Export File** specifications will be used for submitting data to KSDE for initial assignment of state Staff IDs and updating information related to existing Staff IDs. The *Staff ID/Teacher ID* field must be blank when submitting the file for initial assignment of state Staff IDs.
- B. All fields should contain actual data. That is, no trailing spaces should be appended to fill to the maximum length specified. Fields should not have any leading spaces; however, some fields may require leading zeros.

CAPS Staff ID Assignment Export File Specification

This file is to be exported from the School District/LEA as a comma delimited Excel file and processed through the Categorical Aid Personnel System.

Each School District/LEA CAPS Staff ID Assignment Export File will contain:

- The first row of each upload file will contain the names of data fields as follows: row_num, staff_id, district, fiscal_year, last_name, first_name, middle_name, suffix, gender, dob, prev_last_name, hispanicIndicator, ethnic_code.
- All other rows are detail records which are individual staff member records (one record per staff member).
- The fields in each record will be delimited by a *delimiter character* (the fields are not fixed length – the “maximum length” indicated in the record layout is meant as the highest number of characters allowed in that field). For detail (staff member) records the *delimiter character* used must be a comma.
- All fields are required to at least have a placeholder. That is, if the field has no data or is listed as “optional”, the *delimiter characters* that “surround” that field are there with no data between the *delimiter characters*.
- Each record is terminated by a carriage return/line feed character string. The last field in the record is not terminated by a *delimiter character* but only by the carriage return/line feed.

Please note that the **Field Ref #** below is included only for your convenience in referring to the fields, and is NOT part of the record layout.
