When the original accounting handbook was developed, it was reviewed by superintendents, assistant superintendents, business managers, certified public accountants, state association representatives, and state personnel to ensure it was a system that would work for Kansas school districts. The committee felt that the budget document should contain the required amount of information requested by the Federal Government. However, they also felt that school districts should be able to make further breakdowns in order to utilize the accounting system to best suit their needs.

This handbook does not include every possible data element. It is intended, rather, as a set of data element definitions and suggestions or structuring a report or an electronic record system. Every attempt has been made to include all data elements routinely required for federal education reporting.

These guidelines apply to all unified school districts in Kansas. Your comments concerning this publication or suggestions on its format would be appreciated.

## **Overview**

The terminology used in the Accounting Handbook includes funds, functions, sub-functions, and object codes. Funds will have the general definition as currently used under Kansas law, which would include such funds as general, Career and Postsecondary Education, special education, etc. Within each fund is a breakdown of five major functions performed by school personnel or activity. These five major functions include instruction, support services, operation of non-instructional services, facilities acquisition and construction services, and other outlays such as debt service and fund transfers. There will be further breakdowns of functions into sub-functions. The lowest breakdown of expenditures will be objects. A more detailed explanation of each category is covered later in this handbook.

The revenue portion of the budget has a coding system, which includes the following: local sources, county sources, state sources, federal sources, and other sources. The sources of revenue also have a breakdown of different types of sources within each of the five major revenue sources.

## **Coding Structure**

The coding structure utilized in this accounting system would use a minimum of nine (9) characters arranged in three groups. The sequence would be FUND  $\rightarrow$  FUNCTION  $\rightarrow$  OBJECT.

Individual USDs may desire and plan to incorporate supplementary numeric codes in addition to the nine characters used in this model. Such supplementary codes might be used to identify programs, fiscal year identifiers, sub-program classifications, and so forth. The three groups of code characters can be listed as follows:

FUND	Two (2) characters
FUNCTION	Four (4) characters
OBJECT	Three (3) characters

The organization of the groups of code characters can be illustrated as follows:

Fund	Function	Object
XX	XXXX	XXX

# **Funds**

General Fund Supplemental General Fund	Accounts for all financial resources of the LEA except those required to be accounted for in another fund.
Special Revenue Funds	Account for the proceeds of specific revenue sources (other than expendable trusts or major capital projects) that are legally restricted to expenditure for specified purposes.
	Examples: Restricted State or Federal grants-in-aid and/or Restricted tax levies
	A separate fund may be used for each restricted source, or one fund may be used supplemented by the dimension Project/Reporting code.
	Includes: Adult Education, Special Liability Expense, Adult Supplemental Education, Bilingual Education, Virtual Education, Driver Training, Professional Development, Parent Education Program, Summer School, Special Education, Career and Postsecondary Education, Textbook & Student Materials Revolving Fund, Capital Outlay Fund, Extraordinary School Program, Food Service, Extraordinary Growth Facility, Coop Special Education, Federal Funds, Preschool-Aged At-Risk, At-Risk (K-12), KPERS, and Cost of Living.
Capital Project Funds	Account for bond proceeds used to acquire or construct major capital facilities.
Debt Service Funds	Account for the accumulation of resources for, and the payment of general long-term debt, principal and interest.
	Includes: Bond & Interest, Special Assessment, No-Fund Warrants and Temporary Notes
Trust & Agency Funds	Includes: Recreation Commission, Recreation Commission Employees Benefit, Library Board, Library Board Employee Benefits, Historical Museum, School Retirement, Special Reserve Fund, Contingency Reserve Fund and Gifts & Grants

## **Account Groups**

The following are not funds, and therefore, do not report operations like the general fund or a special revenue fund.

#### **General Fixed Asset Accounts**

All of a governmental unit's fixed assets, which are not recorded in an enterprise, internal service, or trust fund, should be recorded in the General Fixed Assets Account Group. It is essential that a list of the district's fixed assets be maintained to help ensure accountability.

#### General Long-Term Debt Account Group

All of a governmental unit's long-term debt that is not recorded in an enterprise, internal service, or trust fund should be recorded in the General Long-Term Debt Account Group. It is essentially a list of the district's debt that has not matured (i.e. general obligation bonds, temporary notes, and no-fund warrants). It would also include liabilities for certain compensated absences (i.e. vacation and sick leave) and other claims and judgments against the district.

#### **Student Activity Funds**

Student Activity Funds consist of those activities that revolve around a student organization (FFA, FHA, Debate, Marching Band, etc.).

See the <u>Activity Fund Guidelines</u> handbook – within the <u>Guidelines</u> section on the <u>Guidelines</u> and <u>Manuals page</u> of the <u>School Finance website</u>.

#### **District Activity Funds**

District Activity Funds consist of co-curricular activities that have student participation in the activity, but are administered by the district (i.e., athletic events, music concerts, plays, book fair, etc.).

See the <u>Activity Fund Guidelines</u> handbook – within the <u>Guidelines</u> section on the <u>Guidelines</u> and <u>Manuals page</u> of the <u>School Finance website</u>.

#### Non-Activity Funds

Non-Activity Funds are collected at the building level and include fee funds, sales tax moneys, revolving funds, and petty cash.

See the <u>Activity Fund Guidelines</u> handbook – within the <u>Guidelines</u> section on the <u>Guidelines</u> and <u>Manuals page</u> of the <u>School Finance website</u>.

## **Expenditures**

## Functions, Sub-Functions & Objects

Funds will have the general definition as currently used under Kansas law, such as the General fund, Career & Postsecondary Education, Special Education, Transportation, etc. Within each fund will be a breakdown of 5 major functions performed by school personnel or activity as follows:

- instruction
- support services
- operation of non-instructional services
- facilities acquisition and construction services
- other outlays such as debt service and fund transfers

Under each major function will be sub-functions. For example, the major sub-functions that fall under the support services include:

- student support
- instructional support
- general administration
- school administration
- operations and maintenance
- other support services

Within each function or sub-function will be a breakdown of expenditures, which will be object codes.

Examples: salaries, employee benefits, purchased professional and technical services, purchased property services, other purchased services, supplies and equipment

The object codes may have a further breakdown under each object code by different types of expenditures. For example, salaries could be further broken down into salaries for teachers and other salaries for instruction. To better explain their use, a couple of illustrations are shown below:

#### Illustration #1

Placing the salary of the Supervisor of Guidance Services in the appropriate place in the accounting system.

First, under the definition in the handbook, this employee would go under the function heading of 2000 - Support Services. If you look under this function, there are several sub-functions. The appropriate one would be 2100 - Student Support Services since 2120 - Guidance Services is a sub-division under 2100 - Student Support Services. Under 2120 - Guidance Services is 2121 - Supervision of Guidance Services. We now have reached the lowest level of sub-function for this position.

We now go to the object code and find 100 - Personal Services (Salaries). This position requires certification and is a regular employee. We then go to 110 - Regular Certified Salaries. If this supervisor is full time, the fund placement would be under 111 - Full-Time Certified Salaries. However, if the supervisor is a part-time employee the code would become 113 - Part-Time Certified Salaries.

*In summary, this expenditure would be coded function 2121 – Supervision of Guidance Services and object 111 – Full-Time Certified Salaries or 113 – Part-Time Certified Salaries.*

Placing the cost of paper used in the classroom. The general rule for placing supplies in the function 1000 – Instruction, follows:

Supplies that are used in the classroom are to be placed under function 1000 - Instruction unless there is another specific function or sub-function that includes classroom supplies in its definition. Since paper used in classrooms is not specifically included elsewhere, it is placed under 1000 - Instruction.

Since there are no sub-functions under Instruction, we move to one of the main object codes 600 - Supplies. Next, we would move to 610 - General Supplies and Materials. Under this is the sub-object, 614 – Paper, where we would place the cost.

#### **Functions**

The function describes the activity for which a service or material object is acquired. The functions of an LEA are classified into five broad areas:

- Instruction
- Support Services
- Operations of Non-Instructional Services
- Facilities Acquisition and Construction
- Other Outlays

Functions are further broken down into sub-functions, service areas, and areas of responsibility. Each of these levels consists of activities, which have somewhat the same general operational objectives. Furthermore, categories of activities comprising each of these divisions and sub-divisions are grouped according to the principle that the activities can be combined, compared, and are related.

Example: Function 2000 Support Services

Sub-Function 2300 General Administration
Service Area 2310 Board of Education Services

Area of Responsibility 2313 Board Treasurer

An effort has been made to group together functions in relation to the magnitude of expenditures typically found in the LEA. This grouping corresponds to the categories most frequently requested in reporting to external authorities especially the federal government. The numbering code for functions are always in even thousands, such as 1000; 2000; 3000; etc.

#### 1000 - Instruction

Instruction includes the activities dealing directly with the interaction between teachers and students. Teaching may be provided for students in a school classroom, in another location such as a home or hospital, and in other learning situations such as those involving co-curricular activities. This includes expenditures formerly reported under 3400 Student Activities. Teaching may also be provided through some other approved medium such as two-way interactive video, television, radio, telephone, and correspondence. Included here are the activities of aides or classroom assistants of any type (clerks, graders, teaching machines, etc.) which assist in the instructional process.

Include only regular and part-time teachers, teacher aides or assistants, homebound teachers, hospital-based teachers, substitute teachers, and teachers on sabbatical leave. Full-time department chairperson's expenditures should be included only in 2490.

#### 2000 - Support Services

Support services provide administrative, technical (such as guidance and health), and logistical support to facilitate and enhance instruction. These services exist to fulfill the objectives of instruction, community services and enterprise programs, rather than as entities within themselves. The sub-functions of this function include: Student Support Services, Instructional Staff Support Services, General Administration, School Administration, Operation and Maintenance of Plant Services, Student Transportation, Central Services, and Other Support.

#### 3000 - Operation of Non-Instructional Services

Activities concerned with providing non-instructional services to students, staff, or the community. This would include such activities as food service operations, enterprise operations (such as LEA bookstores) and community services (such as recreation, public library, and historical museum).

#### 4000 - Facilities Acquisition & Construction

Activities concerned with acquiring land and buildings; remodeling buildings; constructing buildings and additions to buildings; initially installing or extending service systems and other built-in equipment; and improving sites.

#### 5000 - Debt Service

A number of outlays of governmental funds are not properly classified as expenditures, but still require budgetary or accounting control. These are classified under Debt Service. Activities related to servicing the long-term debt of the school district, including payments of both principal and interest. This function should be used to account for bond interest payments, retirement of bonded debt, capital lease payments and other long-term notes. Interest on short-term notes or loans is charged to function 2513.

A sub-function is the next level of accounting breakdown under the functions.

Example: For 2000 - Support Services function this would look as follows:

2000 – Support Services

4 2100 – Student Support Services

4 2200 – Instructional Staff Support Services

4 2300 – General Administration

4 2400 – School Administration

4 2500 – Central Services

4 2600 – Operation and Maintenance of Plant Services

4 2700 – Student Transportation Services

4 2900 – Other Support Services

The numbering code for the main sub-function is hundreds in the last three digits such as 2100, 2200, 3100, 3200, etc. Further breakdown below the main sub-functions will continue as follows for 2100:

4 2110

4 2111

The final breakdown of expenditures is called object codes. The object codes include such expenditures as salaries, employee benefits, purchased services, supplies and equipment. A detailed breakdown of object codes is provided for those schools which would like a further breakdown.

You will notice in the budget document there will be numerous breakdowns of the major object codes. Whenever there is a breakdown of the major codes, we will list an "Other" expenditure category. All other expenditures which do not fall into one of the categories listed on the budget document should be placed in the OTHER category. For example, in the General Fund for 1000 - Instruction, the 600-object code for supplies has a breakdown: 610 - General Supplies, 644 – Textbooks and 680 - Miscellaneous Supplies. All other expenditures under the 600 series such as 620, 630, 640, 650, 660 and 670 will be listed under the category 680 - Miscellaneous Supplies. This same concept will hold true for other object codes. Listed below are the nine major object codes, their sub-object codes and definitions.

# **Supplies & Equipment**

The purpose of this section is to provide some guidelines to the solution of that ever-present problem in financial accounting - distinguishing between supplies and equipment. These guides consist of criteria for classifying an item as a supply, criteria for classifying an item as equipment, and a detailed list of material items in which the items are distinguished as supplies or as equipment.

## **Supplies**

A supply item is any article or material which meets any one or more of the following conditions:

- It is consumed
- It loses its original shape or appearance with use.
- It is expendable, that is, if the article is damaged or some of its parts are lost or worn out, it is usually more feasible to replace it with an entirely new unit rather than repair it.
- It is an inexpensive item, having characteristics of equipment, whose small unit cost makes it inadvisable to capitalize the item.
- It loses its identity through incorporation into a different or more complex unit or substance.

## Equipment

The following is criteria of equipment:

- It retains its original shape and appearance with use.
- It is non-expendable, that is, if the article is damaged or some of its parts are lost or worn out, it is usually more feasible to repair it rather than replace it with an entirely new unit.
- It represents an investment of money which makes it feasible and advisable to capitalize the item.
- It does not lose its identity through incorporation into a different or more complex unit or substance.

It is necessary for Unified School Districts in Kansas to refer to Kansas law as it relates to the purchase of equipment and which fund the expenditure should be charged to.

Examples:

Bus purchases for regular route transportation may be charged to the General, Supplemental General, or Capital Outlay fund.

Equipment and repair of buildings may be purchased from the General fund. However, paying for remodeling out of the General fund is prohibited by state law.

School district personnel should refer to state statutes and Attorney General opinions when charging supplies and equipment to a particular fund.

# **Supplies & Equipment List**

While the list of items is rather extensive it is not practical, even if it were possible, to make it complete. If a specific item cannot be found in the list, it is suggested that a similar item be located to serve as a guide. The list should be in conjunction with the criteria for supplies and equipment presented above. In cases of doubt as to whether an article should be classified as a supply or as equipment, the issues should be resolved in terms of the criteria.

# **Budget Costs Review**

With the public emphasizing accountability for all government officials, it is very important that the budget of each USD be analyzed carefully by the USDs administrative staff. The public no longer wants total costs of programs, but also data that show costs of programs by the function and object categories. Administrators need to have such data available. As an illustration, when the patrons of a particular USD ask why the costs in a certain function are either high or increasing rapidly, it should be possible to see which costs is the cause. Sometimes it may be fixed costs, which a district has limited control, while on the other-hand it might be an area that has lagged behind and now is rising rapidly to catch up.

This system also allows the public to see that salaries of employees, especially teachers, and their associated costs (like social security, fringe benefits, etc.) make up a large percentage of the operational costs. If patrons support improved teacher salaries, it can easily be shown that it may cause a major increase in the total budget since it represents such a large percentage of the total.

The public today is less likely to approve of increased costs for education if they cannot see how the money is being spent. If certain functions are rising at a faster rate than others, the administration must be able to provide the reasons to the public. In some cases, the administration may need to do further study to see if that rise is justified. USDs who analyze expenditures may find more economical ways of performing the same function. Reviewing costs provides USD administrators a tool to compare expenditures to similar USDs.

This comparison allows them to ask the questions: Why are we spending considerably more in certain functions than many other districts? Is it necessary and is it providing for a better education for our students?

Included on the budget program is a file named Sumexpen.xlsx (Summary of Expenditures). This file automatically creates graphs and summary tables that compare costs for the budget year and the two prior years at-a-glance. The information below can be helpful in addressing budget questions and analyzing costs to utilize funds most effectively. This file shows expenditures in the following categories by fund as well as all funds combined:

- Instruction Costs (1000)
- Student & Instructional Support Costs (2100 & 2200)
- Administration Costs (2300, 2400 & 2500)
- Operations & Maintenance Costs (2600)
- Other Costs (2700, 2900, 3100, 3300, 4000 & 5100)
- Transfers (5200)

Although the state budget program is for the USD wide total budget only, many USDs have added coding for costs by building, grade level, and program. It is encouraged for USDs to continue analyzing costs to ensure the expenditures at the local level are being utilized to best meet the needs of their students.

## Instruction

## (1000)

Although all other functions are important, this function acts as the most important part of the education program, the very foundation on which everything else is built. If this function fails to perform at the needed level, the whole educational program is doomed to failure regardless of how well the other functions perform. Instruction not only includes the regular face-to-face classroom teaching but also such things as lab sessions, independent work, and education field trips.

By far the biggest cost items in this function are teacher salaries and associated costs such as social security, fringe benefits, and workers' compensation. Other major costs are providing substitutes and paraprofessionals who work with the teachers. All of the materials needed in the delivery of the instructional program by the teacher and helpers are another major cost. Costs that do not involve teachers, teacher helpers (paraprofessionals, substitutes, etc.) and the students' actual learning should not be included in this category.

# Student & Instructional Support (2100 & 2200)

Although Instruction (1000) is the foundation of an educational program, without good support services it cannot operate at the highest levels of performance. Student (2100) & Instructional (2200) Support Services covers all aspects of student and teacher services not related to actual teaching. The main purpose of this function is to help provide better instruction by providing continuing training for staff and services that prepare students to be physically and psychologically ready to learn.

Some of the services provided by this function are mental and physical health, curriculum development, teacher in-service, guidance counseling, program development, media services, technology, library, and all short- and long-term programs that benefit general education.

## **Administrative Costs**

(2300, 2400 & 2500)

General (2300) and school (2400) administration plan and oversee the mission of the USD. In order to improve the education of students, a USD must have creative, active leadership to make the best use of the expertise of all positions as well as plan and implement the most successful programs. At the school level, costs of principals and assistants are included.

The costs of superintendents, assistants and deputies, legal affairs and other miscellaneous central office administration (2500) are also included along with School Board expenses.

# Operations & Maintenance (2600)

Operation of the physical plant, maintaining grounds, buildings, & equipment related to facilities, school safety & security, utilities and operations staff are all included in Operations and Maintenance (2600).

When money is tight, there is a tendency to limit spending in this function. Neglect in the maintenance area could result in unacceptable building conditions that result in high repair costs or replacement later. Poor surroundings can also contribute negatively to student learning. A carefully planned timetable for maintenance can result in reduced costs in the long-term and provide facilities that contribute positively to learning.

## **Other Costs**

(2700, 2900, 3100, 3300, 4000 & 5100)

The largest costs in the miscellaneous category are Facility Acquisition and Construction Services (4000) and payment of Debt Services (5100). These are found in only a few funds and are not considered to be operational costs, although they are important in the long-term operation of USDs. Funds such as the No-Fund Warrant (66) and Temporary Note (68) are included in this category. Additional costs classified as "Other" in the Sumexpen.xlsx file include Other Support Services (2900), Student Transportation Services (2700), and Food Services Operations (3100). In a few funds, such as General (06), Supplemental General (08), Summer School (29), Career & Postsecondary Education (34), and Contingency Reserve (53), the area of Community Service Operations (3300) is included.

# Transfers (5200)

These are listed at the end of many funds under expenditures. Do not confuse these with incoming revenue transfers. Transfers have to be treated carefully so that expenditures are not duplicated.
