

STOCK PRODUCTS (BUSES)

Stock buses allow a dealer to offer an already built new bus that complies with the parameters of the program. These buses are typically available for immediate delivery. You can view the available Stock Buses by logging into the program and selecting “Stock Products.”

If a stock bus appears to meet your needs, you may contact the respective dealer and ask them to “build” that stock bus in the program and clone it to you. This will allow you to compare it within the program to other buses with the same features, providing you a pricing comparison to assist in your decision.

If the stock bus works out to be the best deal for your district, simply go back to the stock bus section and purchase the bus through the program, if desired.
