

Title IIA Class Size Reduction Needs Assessment

Please use the following table(s) to support the need to reduce class size. Complete one table for each building.

Determine where the Title IIA class size reduction teacher has taught during each of the years listed, then, circle the section number that contains that teacher. For example, if your Title IIA class size reduction teacher taught in first grade during the 10-11 school year, circle the section total that includes him/her. Do the same for all years listed and for multiple teachers where appropriate.

It is not required that you complete both the elementary and secondary charts. Complete only those charts where you feel a teacher hired for class size reduction will be, or is currently, the best way to use your Title IIA funds.
